As at 31 March 2024

This report has been prepared in accordance with the laws and regulations in force in Luxembourg (LUX GAAP) based on the going concern principle.

The Company, each Sub-Fund, each share class and each share has a net asset value. The reference currency of the Company is the EUR (the "Company Currency"). The respective reference currency of the Sub-Funds (the "Sub-Fund Currency") and of the share classes (the "share class currency") may differ. The net asset value of the Company is calculated as the sum of the net asset values of all Sub-Funds. The net asset value of a Sub-Fund is calculated as the sum of the net asset values of all share classes of this Sub-Fund. If there is only one share class in a Sub-Fund, the net asset value of this Sub-Fund is calculated as the sum of the values of the assets attributable to this Sub-Fund, less the corresponding attributable liabilities. The net asset value of such a Sub-Fund is calculated on each valuation day fixed for such Sub-Fund. The net asset value of a share class is calculated as the sum of the assets of the respective Sub-Fund attributable to the respective class, less the corresponding attributable liabilities. The net asset value of a share class is calculated for each valuation day determined for this share class. The net asset value per share is calculated by dividing the net asset value of the corresponding Sub-Fund or the net asset value of the corresponding share class by the number of shares in this share class. The net asset value of the share is generally calculated in the Sub-Fund Currency and then converted into the share class currency of the corresponding share class.

The value of the assets of the Company is determined as follows:

- a) Target fund units are valued at the latest determined and obtainable net asset value per share or redemption price.
- b) The value of any cash on hand or bank balances, certificates of deposit and outstanding receivables, prepaid expenses, cash dividends and interest declared or accrued and not yet received corresponds to the full amount thereof, unless, however, they are considered unlikely to be paid or received in full, in which case the value is determined in application of an appropriate discount to reflect the true value.
- c) The value of assets listed or traded on an exchange or another regulated market is determined on the basis of the latest available price, unless otherwise specified below.
- d) If an asset is not listed or traded on a stock exchange or on another regulated market or if, with regard to assets that are listed or traded on a stock exchange or other market as mentioned above, the prices in accordance with the provisions contained in c) do not reasonably reflect the actual market value of the assets in question, the value of such assets is determined on the basis of the selling price which one would reasonably expect according to a prudent estimation.
- e) The settlement value of futures, forwards or options which are not traded on stock exchanges or other organised markets shall correspond to the respective net settlement value as determined in accordance with the guidelines established for the Sub-Fund/Company on a basis which shall be applied consistently with regard to all different types of contract. The settlement value of futures, forwards or options traded on stock exchanges or other organised markets is calculated on the basis of the most-recently available settlement prices for such contracts on the stock exchanges or organised markets on which such futures, forwards or options are traded by a Sub-Fund; if a future, forward or option cannot be settled on a day for which the net asset value is determined, the valuation basis for such a contract is determined by the Company in an appropriate and reasonable manner.
- f) Swaps are valued at their market value.
- g) Money market instruments can be valued at the market value fixed in good faith by the Company and according to generally accepted valuation rules that can be verified by auditors.
- h) All other securities or other assets will be valued at their reasonable market value as determined in good faith and according to a procedure to be specified by the Company.
- i) The pro rata interest on securities is included if it is not already in the price (dirty pricing).
- j) The value of all assets and liabilities not expressed in the reference currency of the corresponding Sub-Fund or the corresponding share class of the respective Sub-Fund will be converted into such currency at the latest available exchange rate. If such rates are not available, the rate of exchange will be determined in good faith under procedures established by the Company.

The Board of Directors may, at its discretion, permit other valuation methods if it considers that to be in the interests of the more appropriate valuation of an asset.

If in the consideration of the Board of Directors, the net asset value determined on a particular valuation day does not reflect the actual value of the respective shares, or if there have been significant movements on the relevant stock exchanges and/or markets since the determination of the net asset value, the Board of Directors may decide, in good faith, to update the net asset value on the same day. Under such circumstances, all subscription, conversion and redemption applications which are received for such valuation day are processed on the basis of the updated net asset value.

No securities financing transactions and total return swaps within the meaning of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on the transparency of securities financing transactions and on reuse, and amending Regulation (EU) No 648/2012 ("SFTR") were used during the reporting period. Consequently, no information within the meaning of Article 13 of that Regulation shall be provided to investors in the semi-annual report.

Risk warnings on Ukraine conflict

The impact of the Ukraine crisis on the Company and its Sub-Funds is currently not conclusive. Even if there are no direct holdings of securities in Ukraine or Russia, there is a risk that indirect risks from the sanctions imposed, resulting market volatility or rising energy prices may affect the performance of the Company or of counterparties.
