## Independent auditor's report

To the Shareholders of Oaktree (Lux.) Funds 49, Avenue J.F. Kennedy L-1855 Luxembourg

## Opinion

We have audited the financial statements of Oaktree (Lux.) Funds and of each of its sub-funds (the "Fund"), which comprise the statement of net assets and the schedule of investments in securities as at 30 September 2022, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 30 September 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

## **Basis for Opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

## Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

## Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

- Conclude on the appropriateness of Board of Directors of the Fund use of the going concern basis of
  accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to
  events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to
  continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw
  attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial
  statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on
  the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However,
  future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going
  concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Oaktree (Lux.) Funds - Annual Report and audited financial statements as at 30.09.2022

## Notes

## 1. General

Oaktree (Lux.) Funds (the "Company") was incorporated for an unlimited period of time on 06.11.2012 under Luxembourg law as a "societe d'investissement à capital variable" (SICAV). The Company has been authorised by the Commission de Surveillance du Secteur Financier (the "CSSF") as an undertaking for collective investments in transferable securities and regulated pursuant to the provisions of Part I of the amended law of 17.12.2010. The Company is registered with the Luxembourg Register for Trade and Companies under number B 172.546.

As of 30.09.2022 the Company offered shares in 8 Sub-Funds as follows:

- Oaktree (Lux.) Funds Oaktree Global Convertible Bond Fund, denominated in USD.
- Oaktree (Lux.) Funds Oaktree Global High Yield Bond Fund, denominated in USD.
- Oaktree (Lux.) Funds Oaktree European High Yield Bond Fund, denominated in EUR.
- Oaktree (Lux.) Funds Oaktree Global Ex-U.S. Convertible Bond Fund, denominated in EUR.
- Oaktree (Lux.) Funds Oaktree North American High Yield Bond Fund, denominated in USD.
- Oaktree (Lux.) Funds Oaktree Emerging Markets Equity Fund, denominated in USD.
- Oaktree (Lux.) Funds Oaktree Absolute Return Income Fund, denominated in USD.
- Oaktree (Lux.) Funds Oaktree Global High Yield Responsible Fund, denominated in USD.

The Board may from time to time decide to create within each Sub-Fund different Classes which may have a combination of the following features:

- Class E Shares: E Shares are open for subscription to Retail Investors that invest through financial intermediaries which: (a) According to regulatory requirements are not allowed to accept and keep trail commissions (in the European Union this will include financial intermediaries providing discretionary portfolio management or investment advice on an independent basis); (b) Are rendering non-independent advice and which according to individual fee arrangements with their clients are allowed to accept and keep trail not commissions; or (c) Are providing restricted investment advice within the meaning of the UK Retail Distribution Review (RDR).
- Class F Shares: F Shares are open for subscription for "Day one" investors until such time as subscriptions totalling the amount specified for the relevant Sub-Fund have been

received from investors subscribing to the F Shares (subject to the discretion of the Company to determine otherwise), calculated on a per Sub-Fund basis and not aggregated across F Shares in all Sub-Funds. When subscriptions totalling such specified amount have been received for F Shares, F Shares will be closed to subscriptions from new and existing investors. Acceptance by the Company of subscriptions in F Shares may be conditional upon the execution of a separate agreement between the investor and the Portfolio Manager or one of its affiliate, at the Company's discretion.

- Class Hedged shares: Hedged shares are issued in one or more alternative currencies at the Board's discretion. The relevant Sub-Fund will hedge the Sub-Fund's Reference Currency to the hedged share class currency (without reference to the currency exposures of the Sub-Fund's portfolio). Hedged Share Classes will bear the specific costs resulting from the currency hedging.
  - Class I Shares: I Shares are open for investment for Institutional Investors at the Company's discretion. Investors must demonstrate that they qualify as Institutional Investors by providing sufficient evidence of their status. Class I shares may not be purchased or held through fee-charging platforms or intermediaries. Should an existing investor's account become liable to bear a platform or financial intermediation fee, the Company may enforce a conversion into another Share Class in which such investor is entitled to hold Shares, which may have a higher Global Management Fee. Insofar as financial intermediaries and/or nominees hold Shares for the account of their clients, the minimum investment requirement must be met at the level of the client. If one or more redemptions by an Institutional Investor result in it holding less than the minimum investment amount, the Company may enforce a conversion into another Share Class in which such Institutional Investor is entitled to hold Shares, which may have a higher Global Management Fee.
- Class J Shares: J Shares are open for subscription by Institutional Investors at the Company's discretion. Investors must demonstrate that they qualify as Institutional Investors by providing sufficient evidence of their status.

- Class R Shares: R Shares are open for subscription by all investors.
- Class Z Shares: Z Shares are open only to Institutional Investors that have concluded an asset management or other similar agreement, or that invest through a financial intermediary that has signed a cooperation agreement, at the discretion. Investors Company's must demonstrate that they qualify as Institutional Investors by providing sufficient evidence of their status. No management fee is payable for this share class. A management fee will be payable under the relevant asset management, cooperation or other similar agreement. If such agreement is terminated, the Company will enforce a conversion into another Share Class in which such investor is entitled to hold Shares, which may have a higher Global Management Fee.

#### 2. Summary of significant accounting policies

The financial statements have been prepared in accordance with the legal and regulatory requirements relating to the preparation of financial statements as prescribed by the Luxembourg authorities for Luxembourg investment companies and include the following significant accounting policies:

- a) Valuation of investment securities of each Sub-Fund;
- (i) The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interest declared or accrued and not yet received, all of which are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof;
- Securities listed on a recognized stock exchange or dealt on any other regulated market will be valued at their latest available prices, or, in the event that there should be several such markets, on the basis of their latest available prices on the main market for the relevant security;
- (iii) In the event that the latest available price does not, in the opinion of the Company, truly reflect the fair market value of the relevant securities, the value of such securities will be defined by

the Company based on the reasonably foreseeable sales proceeds determined prudently and in good faith;

- Securities not listed or traded on a stock (iv) exchange or not dealt on another regulated market will be valued on the basis of the probable sales proceeds determined prudently and in good faith by the Fund Board of Directors; and the liquidating value of futures, forward or options contracts not traded on exchanges or on other regulated markets shall mean their net liquidating value determined, pursuant to the policies established by the Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other regulated markets shall be based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular futures, forward or options contracts are traded by the Company, provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Company may deem fair and reasonable. All other securities and other assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Company:
- The Net Asset Value per Share may be (v) determined by using an amortized cost method for all investments with a known short-term maturity date (i.e. maturity of less than three months). This involves valuing an investment at its cost and thereafter assuming a constant amortization to maturity of any discount or premium, regardless of the impact of fluctuating interest rates on the market value of the investments. While this method provides certainty in valuation, it may result in periods during which value, as determined by amortization cost, is higher or lower than the price the relevant Sub-Fund would receive if it sold the investment. The Company will continually assess this method of valuation and recommend changes, where necessary, to ensure that the Sub-Fund's investments will be valued at their fair value as determined in good faith by the Company. If the Company believes that a deviation from the amortized cost per share may result in material dilution or other unfair results to Shareholders, the Company

shall take such corrective action, if any, as it deems appropriate to eliminate or reduce, to the extent reasonably practicable, the dilution or unfair results;

- (vi) The Sub-Funds shall, in principle, keep in their portfolio the investments determined by the amortization cost method until their respective maturity date;
- (vii) Interest rate swaps will be valued at their market value established by reference to the applicable interest rates curve. Index and financial instruments related swaps will be valued at their market value established by reference to the applicable index or financial instrument. The valuation of the index or financial instrument related swap agreement will be based upon the market value of such swap transaction established in good faith pursuant to procedures established by the Company; and
- (viii) Shares or units of UCIs are valued on the basis of their latest available net asset value.
  - b) Financial instruments

Open forward foreign exchange contracts are valued at valuation date at forward exchange rates prevailing at this date and resulting changes in unrealised gains or losses are posted to the statement of operations and are shown under Net unrealised gain/loss on forward foreign exchange contracts in the statement of net assets.

A Sub-Fund may, but is not required to, buy or sell futures, swaps and options on currencies in order to hedge, in part or in full, the currency risk relating to investments held by the Sub-Fund against the Reference Currency of the Sub-Fund. This may be done directly (hedging of one currency against the Reference Currency) or indirectly (hedging of one currency against another currency that is then hedged against the Reference Currency).

The markets for options and futures contracts are volatile, and the possibility of making gains and the risk of suffering losses are both higher than with investments in securities. These techniques and instruments are only used if the Investment Manager and / or the Sub-Investment Manager (if any) determines in good faith that they are compliant with the investment policy of the Sub-Fund and do not impair the quality of the Sub-Fund. Securities not listed or traded on a stock exchange or not dealt on another regulated market will be valued on the basis of the probable sales proceeds determined prudently and in good faith by the Company or the Management Company, as the case may be ; and the liquidating value of futures, forward or options contracts not traded on exchanges or on other regulated markets will mean their net liquidating value determined, pursuant to the policies established by the Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other regulated markets will be based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular futures, forward or options contracts are traded by the company, provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract will be such value as the Company may deem fair and reasonable.

The market value of swaps and options contracts are presented in "Assets/Liabilities (as appropriate) in the statement of net assets. Unrealised gains or losses of futures contracts are shown under unrealised gain or loss on futures contracts in the statement of net assets.

 c) Net realised gain/loss on sales of investments of each Sub-Fund.
 The realised gains or losses on the sales of securities are calculated on the basis of the average acquisition cost.

Net realised gain or losses and the change in net unrealised appreciation/depreciation of futures, options and swaps are presented separately in the statement of operations.

#### d) Foreign exchange conversion

The financial statements are kept in reference currency of each Sub-Fund and the consolidated financial statements are kept in USD.

Any assets held in a particular Sub-Fund not expressed in the Sub-Fund's Reference Currency will be translated into such Reference Currency at the rate of exchange prevailing in a recognized market at 5:00 p.m. in Luxembourg on the relevant Valuation Day.

Income and expenses in currencies other than reference currency of each Sub-Fund are converted into the reference currency at the foreign exchange rate applicable at the date they accrue to the Sub-Fund.

Realised gains or losses on foreign currencies are accounted for in the statement of operations.

The acquisition cost of securities in currencies other than the reference currency of each Sub-Fund is converted into the reference currency at the foreign exchange rate valid at the date of acquisition.

- e) Formation expenses of each Sub-Fund Formation expenses are amortised on a straight-line basis over a period of five years.
- f) Allocation of accrued expenses Accrued expenses which can be allocated directly to a Sub-Fund are charged to this Sub-Fund, accrued expenses which cannot be allocated directly are divided among the Sub-Funds in proportion to the net assets of each Sub-Fund.
- g) Income recognition
   Dividends are recorded on ex-dividend date, net of withholding tax. Interest income is accrued on a daily basis.

#### **Swing Pricing**

In order to protect existing shareholders, the net asset value of a class of shares may be adjusted upwards or downwards by a maximum percentage ("Swing Factor") if the net aggregate transactions in Shares in the Sub-Fund on any particular Valuation Date exceed a threshold (known as the "swing threshold") that is pre-determined for the Sub-Fund by the Board and reviewed periodically. In such case the net asset value will be increased in the event of a net surplus of subscription applications or reduced in the event of a net surplus of redemption applications in respect of the applications received on the respective valuation date, provided that the same net asset value applies to all incoming and outgoing investors on that particular valuation date.

The adjustment of the net asset value aims to cover in particular but not exclusively transaction costs, tax charges and bid/offer spreads incurred by the relevant Sub-Fund due to subscriptions, redemptions and/or conversions in and out of the Sub-Fund. Existing shareholders would no longer have to indirectly bear these costs, since they are directly integrated into the calculation of the net asset value and hence, are borne by incoming and outgoing investors. The net asset value may be adjusted on every valuation date on a net deal basis. Shareholders should note that the performance calculated on the basis of the adjusted net asset value might not reflect the true portfolio performance as a consequence of the adjustment of the net asset value.

The aforementioned mechanism applies to all the Sub-Funds. The maximum Swing Factor is set at 2%. There was no swing adjustment as of September 30, 2022.

#### Management company fee

The Management Company is entitled to receive out of the assets of each Sub-Fund a fee of up to 0.03% per annum of the Net Asset Value of each Sub-Fund.

#### "Taxe d'abonnement"

The Company is liable in Luxembourg to a subscription tax (taxe d'abonnement).

The tax is calculated and payable quarterly on the basis of the Net Asset Value of the relevant Share Class at the end of the relevant quarter. The standard rate is 0.05% per annum but this rate is reduced to 0.01% for, among other things, a Share Class that is reserved to one or more institutional investors only.

Note that a Share Class reserved for Institutional Investors may be subject to the higher rate of 0.05% per annum during any period during which a retail investor holds Shares in such Share Class in breach of the eligibility criteria.

Under present Luxembourg law and administrative practice, neither the Company nor any of the Sub-Funds is liable for any Luxembourg corporate income tax, municipal business tax, and net worth tax.

No other tax is payable in Luxembourg on the issue of shares by the Company.

#### **Transaction Costs**

Transactions costs include brokerage fees, stamp duty, local taxes and other foreign charges if incurred during the year. Transaction costs are included in the cost of securities purchased and sold.

For the year ended on 30.09.2022, the Company incurred transaction costs relating to purchase or sale of investments in securities and similar transactions,

(including derivative instruments or other eligible assets) as follows:

Sub-Fund	CCY	Amount
Oaktree (Lux.) Funds - Oaktree Emerging Markets Equity Fund	USD	1,363,245.97
Oaktree (Lux.) Funds - Oaktree European High Yield Bond Fund	EUR	0.00
Oaktree (Lux.) Funds - Oaktree Global Convertible Bond Fund	USD	0.00
Oaktree (Lux.) Funds - Oaktree Global High Yield Bond Fund	USD	11,238.89
Oaktree (Lux.) Funds - Oaktree Global Ex-U.S. Convertible Bond Fund	EUR	0.00
Oaktree (Lux.) Funds - Oaktree North American High Yield Bond Fund	USD	670.71
Oaktree (Lux.) Funds - Oaktree Absolute Return Income Fund	USD	0.00
Oaktree (Lux.) Funds - Oaktree Global High Yield Responsible Fund <sup>*</sup>	USD	0.00

\*Sub-Fund launched on 24 January 2022.

Not all transaction costs are separately identifiable, for fixed income investments, forward foreign exchange contracts and for some other derivative contracts, transaction costs are included in the purchase and sale price of the investment. Whilst not separately identifiable these transaction costs are captured within the performance of each Sub-Fund.

#### **Total Expense Ratio (TER)**

(see detail at Sub-Fund level)

The TER expresses the sum of all costs and commissions charged on an ongoing basis to the respective Sub-Fund, taken retrospectively as a percentage of these assets.

The TER is calculated following the SFAMA guideline.

For the Sub-Fund launched during the year, the TER figure is annualised based on total of charges.

The Investment Managers have voluntarily agreed to limit certain operating expenses with respect to Oaktree North American High Yield Bond Fund, Oaktree Global Convertible Bond Fund, Oaktree Global High Yield Bond Fund, Oaktree Absolute Return Income Fund. Oaktree Global Ex-U.S. Convertible Bond Fund, Oaktree Emerging Markets Equity Fund, Oaktree European High Yield Bond Fund, and Oaktree Global High Yield Responsible Fund. The entities liable for expense waivers are the Investment Managers, Oaktree Capital Management, L.P. for Oaktree North American High Yield Bond Fund, Oaktree Global Convertible Bond Fund, Oaktree Global High Yield Bond Fund, Oaktree Absolute Return Income Fund, Oaktree Global Ex-U.S. Convertible Bond Fund, Oaktree Emerging Markets Equity Fund and Oaktree Global High Yield Responsible Fund, and Oaktree Capital Management (UK) LLP for Oaktree European High Yield Bond Fund. Therefore, to the extent that operating expenses would exceed the expense cap, Investment Managers have voluntarily agreed to reduce their Portfolio Management Fee accordingly. For the year ended 30.09.2022, Oaktree North American High Yield Bond Fund, Oaktree Global Convertible Bond Fund, Oaktree Global High Yield Bond Fund, Oaktree Absolute Return Income Fund, Oaktree Global Ex-U.S. Convertible Bond Fund, Oaktree Emerging Markets Equity Fund, Oaktree European High Yield Bond Fund, and Oaktree Global High Yield Responsible Fund exceeded the expense cap and had a portion of management fees waived. The Investment Managers may, in their sole discretion, designate which expenses of the Fund will be subject to any such expense cap. There is no guarantee that the existence or level of these expense caps will continue in the future and no obligation on the part of Investment Managers to agree to limit expenses in this way.

## Changes in the composition of the securities portfolio

Changes in the composition of the securities portfolio during the reporting year are available to shareholders free of charge at the registered office of the Management Company or the local representatives in the countries where the Company is registered.

#### **Exchange Rate**

The consolidated financial statements are kept in USD. For this purpose, the financial statements of the Sub-Funds are converted into USD at the foreign exchange rate as of 30.09.2022:

#### **Close of business:**

- 1 USD = 1.02077 EUR

15

#### Average for the year:

1 USD = 0.92494 EUR

#### Sub-Fund performance

(see detail at Sub-Fund level)

The performance is based on the net asset values as calculated on the last business day of the year. Those net asset values reflect the market prices of the investments as of the last business day of the year.

Historical performance is not an indicator of future performance. The performance data given does not take into account commissions and costs incurred in the purchase or redemption of Sub-Fund shares. The YTD (Year-To-Date) Performance relates to calendar year return from 01.01.2022 until 30.09.2022 (YTD is nine-months ended 30.09.2022).

#### **Financial Derivative Instruments**

The Sub-Funds may engage in derivative transactions for the purpose of efficient portfolio management. Details of the derivatives are displayed in the Notes pages.

Depending on the type of derivatives held, collateral might be received from the different counterparts to reduce the counterparty exposure. For other type of derivatives, margin accounts might be used.

No collateral was received by the Sub-Funds to reduce the counterparty risk as of 30.09.2022.

#### Events during the year

On 25 October 2021, an increase of capital of the Oaktree Global Convertible Bond Fund resulted from a contribution in kind comprised of assets with a value of USD 63,100,594.79. In consideration of such contribution, the Sub-Fund issued 328,341.11 shares with nominal value of USD 192.18.

An updated Prospectus was issued 8 July 2022.

Oaktree (Lux.) Funds - Oaktree Global High Yield Responsible Fund was launched on 24 January 2022.

In February 2022, a number of countries (including the US, UK and EU) imposed sanctions against certain entities and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation. Announcements of potential additional sanctions have been made following military operations initiated by Russia against Ukraine on 24 February 2022.

The situation, together with growing turmoil from fluctuations in commodity prices and foreign exchange rates, and the potential to adversely impact global economies, has driven a sharp increase in volatility across markets.

Although neither the Fund's performance and going concern nor operations, at the date of this report, have been significantly impacted by the above, the Board of Directors continues to monitor the evolving situation and its impact on the financial position of the Fund.

Oaktree Emerging Markets Equity Fund holds three Russian assets, namely LUKOIL PJSC ADR, Novatek PJSC, Sberbank of Russia PJSC ADR. As at 30 September 2022, the Company priced these assets at zero due to Russia/Ukraine crisis and imposed restrictions on foreign investors to sell their Russian assets.

Oaktree Emerging Markets Equity Fund I USD Distribution share class was launched on 8 August 2022.

Except above no other significant events occurred during the year.

#### Subsequent event

No significant events occurred after the year end.

#### **Remuneration (Unaudited)**

FundRock Management Company S.A. ("FundRock") has established and applies a remuneration policy in accordance with the ESMA Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and AIFMD (ESMA 2016/579) and any related legal & regulatory provisions applicable in Luxembourg. The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the Funds that it manages and of the investors in such Funds, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Funds that the Management Company manages.

FundRock ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that FundRock's employees who are identified as risk-takers under UCITS V are not remunerated based on the performance of the funds under management.

A paper version of the remuneration policy is made available free of charge to investors at FundRock's

registered office. FundRock's remuneration policy can also be found at: https://www.fundrock.com/policies -and-compliance/remuneration-policy/

The amount of remuneration for the financial year ending 31 December 2021 paid by FundRock to its staff: EUR 11,293,609 Fixed remuneration: EUR 10,565,583 Variable remuneration: EUR 728,026 Number of beneficiaries: 135

The aggregated amount of remuneration for the financial year ending 31 December 2021 paid by FundRock to Identified staff/risk takers is as follows: Identified staff/risk takers: EUR 2,622,285

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of FundRock, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The Policy is subject to annual review by the Compliance Officer and the update is performed by HR department of FundRock and is presented for review to the Remuneration Committee and approval by the Board of FundRock.

#### **Risk Management (Unaudited)**

The global exposure of the Sub-Fund Oaktree Absolute Return Income Fund is calculated on the basis of VaR approach whereas all other Sub- Funds are calculated on the basis of the commitment approach.

For the financial year ended September 30, 2022, the VaR methodology, the information on the utilisation of the VaR limit (the lowest, the highest and the average VaR), the model and the parameters used for its

calculation as well as the average level of leverage are detailed as follows:

For the 1 year Period		
Ending	9/30/2022	9/30/2021
	Oaktree	Oaktree
	Absolute	Absolute
	Return	Return
	Income	Income
Sub-fund name	Fund	Fund
Global exposure -	Absolute	Absolute
methodology	VaR	VaR
Information on the VaR:		
Limit	20%	20%
Reference Portfolio	N/A	N/A
VaR model used	Historical	Historical
Lowest VaR used	0.84%	0.57%
Highest VaR used	1.92%	3.85%
Average VaR	1.34%	1.64%
Historical data series size	1 Year	1 Year
Price return frequency	1 D	1 D
Decay factor	0.995	0.995
Time horizon	20 D	20 D
Confidence level	99%	99%
Average level of leverage	134.87%	102.00%

#### **Securities Financing Transaction Regulation**

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A Security Financing Transaction ("SFT") is defined as per Article 3 (11) of the SFTR as:

- a repurchase/reverse repurchase agreement,

- securities or commodities lending and securities or commodities borrowing,

- a buy-sell back transaction or sell-buy back
- transaction, or
- a margin lending transaction.

The Company did not hold any total return swaps or enter in security financing transactions during the year ended 30.09.2022.

## Sustainable Finance Disclosure Regulations (SFDR)

The Sub-Fund Oaktree (Lux.) Funds - Oaktree Global High Yield Responsible Fund is categorized under Article 9 of SFDR. The other Sub-Funds are currently classified under Article 6 of SFDR.

The investments underlying the "other sub funds except for the above mentioned sub fund" do not take into account the EU criteria for environmentally sustainable economic activities.

#### Manager's Report

## Oaktree (Lux.) Funds – Emerging Market Equity Fund

Emerging markets equities fell sharply during the twelve months ended September 30, 2022. Stocks tumbled on a number of macro headwinds including Russia's invasion of Ukraine, China's zero-Covid policy, rising inflation, tightening monetary policy and fears of slowing global economic growth.

Russia's invasion of Ukraine was the most significant event during the first half of the period. EM equities began to underperform their developed market counterparts following the invasion. MSCI removed Russia from the Emerging Markets Equities Index in early March after the U.S. and several other Western countries implemented strict sanctions against Russia. The invasion and subsequent sanctions exacerbated global supply-chain issues, which put further upward pressure on inflation around the globe.

Inflationary pressure prompted a hawkish shift among developed market central banks, which heightened investor fears about a global recession. These fears were exacerbated by China's strict zero-Covid policy. The government has been slow to open the economy given its commitment to maintaining its dynamic zero-Covid policy, while the property sector has continued weaken. The government has announced multiple policy measures to help the stalled real estate industry, however investor sentiment around the sector remains poor, as most market participants believe the measures taken will be insufficient considering the magnitude of the crisis. Although consumption has improved modestly in areas where lockdowns have been lifted, the government has continued to pursue its zero-Covid policy. Thus, sporadic lockdowns continue to be implemented in response to local outbreaks, which has prevented consumption from gaining momentum. Meanwhile, the prices of many commodities have fallen in recent quarters, given the weak demand in China and continued global recession fears. However, most commodity prices remain above their pre-pandemic levels.

Despite weak absolute performance for the asset class, the Fund outpaced its benchmark during the period. At the country level, stock selection in China contributed the most to our relative results, followed by selection in Korea, India and Brazil. Our overweight allocations to Brazil and Indonesia also contributed positively, as did our underweight exposure to Taiwan. Stock selection in Russia, Indonesia, Taiwan and Mexico detracted from our relative performance, along with our underweight exposures to Saudi Arabia and India. By sector, stock selection among consumer discretionary and industrials positively impacted our relative returns, while stock selection among materials, financials, real estate, health care and energy had a negative effect. Our overweight allocations to industrials, materials and energy contributed positively to our relative performance, as did our underweight exposures to communication services, consumer discretionary and information technology. Our underweight allocations to consumer staples and utilities had a negative impact.

Central banks in developed countries such as the U.S. and Europe remain on a hawkish path and will likely continue to raise interest rates to battle inflation. Meanwhile, several EM countries, such as China, are loosening monetary policy, while many others, such as a Brazil, have the ability to ease. In fact, real yield differentials between EM countries and the U.S. are well above the long-term average, suggesting that EM central banks have plenty of room to maneuver to support economic growth.

We maintain our view that emerging markets will be impacted less negatively during this downturn than they were in previous cycles. This is primarily because many of the biggest EM economies are in sound fiscal shape and most EM governments understand how to manage their economies in an inflationary environment.

We continue to believe that value stocks will outperform their growth counterparts over the next several years, as value continues to trade at a significant discount to growth and has historically outperformed when inflation expectations rise. Value stocks are attractive in both emerging and developed markets, but EM equities arguably offer a better risk/reward profile, given that valuations are lower on both a P/E and P/B basis. (Both metrics are near their 15-year lows.) Fundamentals of value companies are also strong despite commodity price volatility, as cash flow generation remains healthy on average. Moreover, the depressed value of EM currencies could potentially be an added tailwind, as currencies have plenty of room to appreciate toward more normal levels versus the USD. In short, we continue to believe the medium-term return story for EM shareholders is favorable.

The EM equities index ended the period trading at 1.3 times book value and 10.6 times consensus forward estimated earnings. Both of these figures are significantly lower than the corresponding metrics for both the U.S. market and for developed markets equities as a whole. Our portfolio remains value-biased and trades in line with the overall EM market on book value and at a discount to the index on forward earnings. Moreover, our portfolio's trailing-12-month dividend yield at the end of September was 4.8%, compared to 3.3% for the benchmark. Brazil, China, and Indonesia are our biggest overweights by country, while Taiwan and India are our largest underweights. By sector, the portfolio remains overweight in materials, industrials, and energy and underweight in communication services, information technology, and consumer staples.

#### Oaktree (Lux.) Funds - Oaktree European High Yield Bond Fund

Recession fears and rising interest rates pummeled financial assets over the past twelve months. High yield bonds were not immune to the declines, but did receive some protection from its higher coupon and moderate (especially compared to investment grade credit) sensitivity to rate moves.

Although the default environment remains relatively benign, there has been an increase in the number of issues trading at or below 80% of par (an indicator of creditor weakness). The rising amount of stressed and distressed debt suggests that defaults should increase from their current low levels. However, the rise in defaults is expected to be moderate, as the European high yield bond market benefits from a high overall quality (over half the market is BB-rated) and from having recently experienced a (mild) default cycle, which served to remove vulnerable names from the market.

Yield spreads at quarter-end were wider than the high end of the normal range, providing attractive compensation for the bearing of credit risk. Additionally, the average price in the high yield bond market has fallen well below par, providing investors with meaningful capital appreciation potential. Yields have risen to a 2022 high of 9.4%, only a touch below the peak yield reached during the covid-19 drawdown in March 2020.

As we begin the fourth quarter, the spotlight remains on the ongoing challenge for central banks to curb inflation. Fortunately, high yield bonds have shorter average duration than investment grade bonds, making the former less vulnerable in а rising-interest-rate environment. Alongside the challenge of rising rates, we also face the threat of a global recession, an escalation of the war in Ukraine, and the potential for a severe energy crisis in Europe.

We expect credit markets to remain volatile in the short term as investors grapple with this range of risks. While the volatility is difficult to stomach, it's in choppy environments like today's that our commitment to credit research and our focus on downside protection are rewarded.

## Oaktree (Lux.) Funds – Oaktree Global Convertible Bond Fund

Global financial markets fell sharply during the twelve months ended September 30, 2022. Risk assets plunged on a number of macro headwinds including Russia's invasion of Ukraine, rising inflation, tightening monetary policy and fears of slowing global economic growth.

Russia's invasion of Ukraine was the most significant event during the first half of the period. Following the invasion, the U.S. and several other Western countries implemented strict sanctions against Russia. The invasion and subsequent sanctions exacerbated global supply-chain issues, which put further upward pressure on inflation around the globe.

The second half of the period was marked by continued inflationary pressure, which prompted a hawkish shift among developed market central banks. Aggressive monetary policy tightening heightened investor fears about an economic slowdown and markets began pricing in the potential for a meaningful global recession.

Equities weakened 15.7% during the period (FTSE All-World Total Return Index – Local Currency). Stocks in all regions generated negative returns, led by those in Asia ex-Japan and small-caps in the United States. Japanese equities, albeit still negative, declined the least. Almost all sectors, with the exception of energy, were negative during the period. Stocks within communication services, consumer discretionary and information technology fell the most. Credit markets also tumbled during the period,

with global high yield bonds declining 14.0% (ICE BofA Non-Financial Developed Markets High Yield Constrained Index – USD Hedged). Credit spreads expanded significantly and interest rates rose meaningfully in all major regions.

Against this backdrop, convertible bonds fell 20.8% (Refinitiv Global Focus Convertible Index - USD Hedged) and underperformed global equities. What explains this lag versus the broader equity indices? On the equity side, the convertible market has relatively more exposure to high-multiple, high-growth issuers that are vulnerable to rising interest rates, and these names underperformed during the period. From a sector standpoint, energy has been the top performer this vear, and this sector is underrepresented in the convertible market relative to equities. From a geographic perspective, Asia ex-Japan (notably China) has had a negative relative impact on convertibles given China represents a larger portion of the convertible market benchmark and has performed poorly. This weighting is lower in the equity indices. Conversely, Japanese stocks have fared better this year and have a larger representation in the stock indices.

Another equally important driver has been rising interest rates and wider credit spreads. The 5-year U.S. Treasury yield increased by 310 basis points during the period while the Barclays Global High Yield Index widened 275 basis points. Our portfolio's average duration is 2.5, thus the impact of higher rates and spreads during the fiscal year negatively impacted absolute performance.

After seeing record-high volumes in 2020-21, global new issuance of convertibles slowed during the twelve months ended September 30, 2022, with only \$49.7 billion coming to market. The majority of issuance was concentrated in the United States, followed by Asia ex-Japan and Europe. Similar to last year, industries with the highest issuance were information technology, consumer discretionary and health care. The remainder of issuance was well-diversified by sector. As always, we evaluate each new deal on a case-by-case basis. As the primary market has slowed, we've increasingly found more attractive opportunities in the secondary market.

We continue to believe that convertibles remain a conservative way of gaining equity market exposure. At the end of the period, our portfolio's underlying

equities were down 41% from their peak in February 2021, while the Fund itself was down 22%. This marks the second largest drawdown in our Fund's history, behind only the Global Financial Crisis. Thus, convertible bond pricing is attractive for the first time in a long time. Further, roughly three-quarters of the bonds in the global convertible universe are now offering positive yields and nearly two-thirds are trading below par. Our portfolio offers a positive yield of 4.5% (USD hedged), while retaining optionality should equities start to recover. We continue to focus on good quality companies with underlying stocks trading at reasonable valuations and convertible structures with favorable ratios of upside-to-downside.

## Oaktree (Lux.) Funds – Oaktree Global High Yield Bond Fund

Recession fears and rising interest rates pummeled financial assets over the past twelve months. High yield bonds were not immune to the declines. Most notably, we've seen a significant increase in Treasury yields, which has pushed down bond prices across all fixed income, including high yield bonds. Importantly, however, the duration of high yield bonds is moderate, particularly compared to investment grade bonds. In addition to rising interest rates, the yield spread of the high yield bond market has also widened over the twelve-month period.

Although the default environment remains relatively benign, there has been an increase in the number of issues trading at or below 70% of par (an indicator of creditor weakness). The rising amount of stressed and distressed debt suggests that defaults should increase from their current low levels; however, two factors may help issuers survive an economic downturn.

First, the vast majority of bank loans are "covenant lite," meaning most credit agreements don't require companies to satisfy financial covenants, such as leverage ratios. Companies with credit agreements lacking these financial (aka maintenance) covenants obviously don't have to worry about defaulting by breaching such covenants, so borrowers with covenant lite loans should default less frequently than those with traditional credit agreements.

Second, strong demand for high yield bonds from retail and institutional investors enabled many companies to extend their debt maturities and lower their interest burden by refinancing their debt.

What's our current view of high yield bonds? Yield spreads at quarter-end were meaningfully wider than the high end of the normal range (which we typically describe as between 300 bps and 500 bps). At these levels, we believe high yield bond investors are being well compensated for bearing credit risk. Additionally, the average price in the high yield bond market has fallen well below par, providing investors with the potential for meaningful capital appreciation.

As we begin the fourth quarter, the spotlight remains on the Fed and its ongoing battle to curb inflation. Fortunately, high yield bonds have shorter average duration than investment grade bonds, making the former less vulnerable in a rising-interest-rate environment. Of course, rising interest rates aren't the only risk hanging over our market. We also face the threat of a global recession, an escalation of the war in Ukraine, and the potential for a severe energy crisis in Europe, just to name a few.

We'll leave macro forecasting to the so-called experts, but we wouldn't be surprised to see the bumpy ride we've experienced this year continue through the fourth quarter. While the volatility is difficult to stomach, it's in choppy environments like today's that our commitment to credit research and our focus on downside protection are rewarded handsomely.

## Oaktree (Lux.) Funds - Oaktree Global Ex-U.S. Convertible Bond Fund

Global financial markets fell sharply during the twelve months ended September 30, 2022. Risk assets plunged on a number of macro headwinds including Russia's invasion of Ukraine, rising inflation, tightening monetary policy and fears of slowing global economic growth.

Russia's invasion of Ukraine was the most significant event during the first half of the period. Following the invasion, the U.S. and several other Western countries implemented strict sanctions against Russia. The invasion and subsequent sanctions exacerbated global supply-chain issues, which put further upward pressure on inflation around the globe. The second half of the period was marked by continued inflationary pressure, which prompted a hawkish shift among developed market central banks. Aggressive monetary policy tightening heightened investor fears about an economic slowdown and markets began pricing in the potential for a meaningful global recession.

Equities weakened 13.7% during the period (MSCI EAFE - EUR Hedged). Stocks in all regions generated negative returns, led by those in Asia ex-Japan and Europe. Japanese equities, albeit still negative, declined the least. Almost all sectors, with the exception of energy, were negative during the period. Stocks within information technology, consumer discretionary and industrials fell the most. Credit markets also tumbled during the period, with global high yield bonds declining 14.0% (ICE BofA Non-Financial Developed Markets High Yield Constrained Index – USD Hedged). Credit spreads expanded significantly (e.g., the spread on the Barclays Global High Yield Index widened 275 basis points to end the fiscal year at 652 basis points) and interest rates rose meaningfully in all major regions.

Against this backdrop, convertible bonds fell 16.0% (Refinitiv Global Focus ex-U.S. Convertible Index and underperformed EUR Hedged) alobal ex-U.S. equities. What explains this lag versus the broader equity indices? We believe the underlying shares of convertible bonds have underperformed equity markets for several reasons. From a sector standpoint, energy has been the top performer this year, and this sector is underrepresented in the convertible market relative to equities. From a geographic perspective, Asia ex-Japan (notably China) has had a negative relative impact on convertibles given China represents a larger portion of the convertible market benchmark and has performed poorly. This weighting is lower in the equity indices. Conversely, Japanese stocks have fared better this year and have a larger representation in the stock indices.

Another equally important driver has been rising interest rates and wider credit spreads. The 10-year German Bund yield increased by 232 basis points during the period while the Barclays European High Yield Index widened 330 basis points. Our portfolio's average duration is 2.3, thus the impact of higher rates and spreads during the fiscal year negatively impacted absolute performance.

After seeing record-high volumes in 2020-21, global new issuance of convertibles slowed during the twelve months ended September 30, 2022, with only \$49.7 billion coming to market. The majority of issuance was concentrated in the United States, followed by Asia ex-Japan and Europe. Similar to last year, industries with the highest issuance were information technology, consumer discretionary and health care. The remainder of issuance was well-diversified by sector. As always, we evaluate each new deal on a case-by-case basis. As the primary market has slowed, we've increasingly found more attractive opportunities in the secondary market.

We continue to believe that convertibles remain a conservative way of gaining equity market exposure. At the end of the period, our portfolio's underlying equities were down 30% from their peak in February 2021, while the Fund itself was down 19%. This marks the second largest drawdown in our Fund's history, behind only the Global Financial Crisis. Thus, convertible bond pricing is attractive for the first time in a long time. Further, roughly three-quarters of the bonds in the global ex-U.S. convertible universe are now offering positive yields and nearly two-thirds are trading below par. Our portfolio offers a positive yield of 2.0% (EUR hedged), while retaining optionality should equities start to recover. We continue to focus on good quality companies with underlying stocks trading at reasonable valuations and convertible structures with favorable ratios of upside-to-downside.

## Oaktree (Lux.) Funds – Oaktree North American High Yield Bond Fund

Recession fears and rising interest rates pummeled financial assets over the past twelve months. High yield bonds were not immune to the declines. Most notably, we've seen a significant increase in Treasury yields, which has pushed down bond prices across all fixed income, including high yield bonds. Importantly, however, the duration of high yield bonds is moderate, particularly compared to investment grade bonds. In addition to rising interest rates, the yield spread of the high yield bond market has also widened over the twelve-month period.

Although the default environment remains relatively benign, there has been an increase in the number of issues trading at or below 70% of par (an indicator of creditor weakness). The rising amount of stressed and distressed debt suggests that defaults should increase from their current low levels; however, two factors may help issuers survive an economic downturn.

First, the vast majority of bank loans are "covenant lite," meaning most credit agreements don't require companies to satisfy financial covenants, such as leverage ratios. Companies with credit agreements lacking these financial (aka maintenance) covenants obviously don't have to worry about defaulting by breaching such covenants, so borrowers with covenant lite loans should default less frequently than those with traditional credit agreements.

Second, strong demand for high yield bonds from retail and institutional investors enabled many companies to extend their debt maturities and lower their interest burden by refinancing their debt.

What's our current view of high yield bonds? Yield spreads at quarter-end were meaningfully wider than the high end of the normal range (which we typically describe as between 300 bps and 500 bps). At these levels, we believe high yield bond investors are being well compensated for bearing credit risk. Additionally, the average price in the high yield bond market has fallen well below par, providing investors with the potential for meaningful capital appreciation.

As we begin the fourth quarter, the spotlight remains on the Fed and its ongoing battle to curb inflation. Fortunately, high yield bonds have shorter average duration than investment grade bonds, making the former less vulnerable in a rising-interest-rate environment. Of course, rising interest rates aren't the only risk hanging over our market. We also face the threat of a global recession, an escalation of the war in Ukraine, and the potential for a severe energy crisis in Europe, just to name a few.

We'll leave macro forecasting to the so-called experts, but we wouldn't be surprised to see the bumpy ride we've experienced this year continue through the fourth quarter. While the volatility is difficult to stomach, it's in choppy environments like today's that our commitment to credit research and our focus on downside protection are rewarded handsomely.

## Oaktree (Lux.) Funds - Oaktree Absolute Return Income Fund

Amid persistent recession fears and continued rate hikes, markets have been under pressure most of 2022. The Fed continues to emphasize their focus of bringing down inflation, even as markets have moved lower throughout the year. For global bonds, various measures indicated the lowest level of liquidity since March 2020, intensifying volatility in daily market moves throughout the latter part of the period. The VIX finished September 30, 2022, at 32, just a few points off the recent highs. Economic conditions in Europe remain uncertain. As winter approaches, energy prices are again a major focus amid weakening solutions to bring down costs in time for the increased demand. Looking further out, although infrastructure plans have been set to reduce Russian energy dependence, the solution is likely a multi-year build out. As we enter the fourth quarter, we continue to monitor earnings, which are meeting or exceeding expectations, providing some promise throughout the uncertainty.

Through the year we have trimmed several of our well performing positions, opting to capture gains on names we believe are fully valued. We have been active participants in both the new issue calendar and the secondary market to evaluate new positions, but we remain highly selective when adding to the portfolio. The portfolio remains more conservatively positioned than we were at the start of the period amid an uncertain outlook. We've added to our defensive sleeve organically over the year while still generating an attractive yield. We continue to focus on managing duration and on higher quality names.

Within this unprecedented environment of higher inflation, fears of a looming recession, and ongoing conflicts in Europe, we are closely monitoring and evaluating positive developments against ongoing headwinds. Rising inflation and the Federal Reserve's hawkish response to stem the tide continue to weigh heavily on investor's minds. At the same time, the war in Ukraine and unresolved energy crisis in Europe only add to the uncertainty. The wide range of potential outcomes and balance of risks necessitates prudence and an emphasis on valuations in steering portfolio positioning. In this environment, we follow the wisdom of Oaktree co-chairman Howard Marks to "proceed, but with caution". As such, we prioritize liquidity and downside protection and selectively increase credit exposure at attractive levels.

#### Oaktree (Lux.) Funds - Oaktree Global High Yield Responsible Fund

Recession fears and rising interest rates pummeled financial assets over the past twelve months. High yield bonds were not immune to the declines. Most notably, we've seen a significant increase in Treasury yields, which has pushed down bond prices across all fixed income, including high yield bonds. Importantly, however, the duration of high yield bonds is moderate, particularly compared to investment grade bonds. In addition to rising interest rates, the yield spread of the high yield bond market has also widened over the twelve-month period.

Although the default environment remains relatively benign, there has been an increase in the number of issues trading at or below 70% of par (an indicator of creditor weakness). The rising amount of stressed and distressed debt suggests that defaults should increase from their current low levels; however, two factors may help issuers survive an economic downturn.

First, the vast majority of bank loans are "covenant lite," meaning most credit agreements don't require companies to satisfy financial covenants, such as leverage ratios. Companies with credit agreements lacking these financial (aka maintenance) covenants obviously don't have to worry about defaulting by breaching such covenants, so borrowers with covenant lite loans should default less frequently than those with traditional credit agreements.

Second, strong demand for high yield bonds from retail and institutional investors enabled many companies to extend their debt maturities and lower their interest burden by refinancing their debt.

What's our current view of high yield bonds? Yield spreads at quarter-end were meaningfully wider than the high end of the normal range (which we typically describe as between 300 bps and 500 bps). Of course, rising interest rates aren't the only risk hanging over our market. We also face the threat of a global recession, an escalation of the war in Ukraine, and the potential for a severe energy crisis in Europe, just to name a few.

We'll leave macro forecasting to the so-called experts, but we wouldn't be surprised to see the bumpy ride we've experienced this year continue through the fourth quarter. While the volatility is difficult to stomach, it's in choppy environments like today's that our commitment to credit research and our focus on downside protection are rewarded handsomely.

#### Statement of Net Assets in USD
