ONE Sustainable Fund

General information

ONE Sustainable Fund (the "Fund") publishes an annual report, including audited financial statements, as at December 31 and an unaudited semi-annual report as at June 30 of each calendar year.

These reports contain a breakdown of the sub-funds in the relevant reference currency. The combined financial statements for the Fund as a whole is given in Euro ("EUR"). The annual report, which is published within four months of the end of the financial year, includes financial statements audited by the *Réviseur d'Entreprises Agréé*.

The annual report, including audited financial statements and unaudited semi-annual report are available to Unitholders at the head office of the Management Company and the Depositary Bank. The issue and redemption price of the sub-funds are announced in Luxembourg at the head office of the Management Company and the Depositary Bank. Notices to the Unitholders are also published in a Luxembourg daily newspaper and, if necessary, in foreign daily newspapers.

The following documents are available free of charge from the head office of the Management Company:

- the Management Regulations;
- the latest Prospectus;
- the Key Investor Information Documents ("KIIDs");
- the Key Information Documents ("KIDs");
- the latest annual reports, including audited financial statements and unaudited semi-annual reports of the Fund.

The above mentioned documents, except the Management Regulations, can also be downloaded free of charge on the homepage www.fundsquare.com.

The following documents are filed at the head office of the Management Company, where they are available for inspection:

- the articles of incorporation of the Management Company;
- the agreements concluded between the Depositary Bank, the Administrative Agent, the Investment Manager and the Management Company. These agreements may be amended by common consent of the parties involved.

ONE Sustainable Fund - Global Environment

Management's report

I. Introduction

A. History

ONE Sustainable Fund - Global Environment is a Luxembourg sub-fund with EUR 48.8 million (CHF 48.3 million) of AuM. It is a thematic and a sustainable investment sub-fund. It invests in companies that provide services and technologies with a positive environmental impact. The companies active in controversial areas such as weapons, alcohol, tobacco production or its derivatives, pornography, gambling or genetic engineering in the natural environment are excluded if their sales exceed 5% of the overall turnover.

On September 2, 2013, the management company "LIVING PLANET FUND MANAGEMENT COMPANY" has transferred the management of LIVING PLANET FUND to FundPartner Solutions (Europe) S.A., an entity of the Pictet Group.

CONINCO Explorers in finance SA is the manager.

The new name of the sub-fund is ONE Sustainable Fund - Global Environment.

B. Investment Target

The ONE Sustainable Fund - Global Environment sub-fund invests in innovative companies which:

- Contribute significantly towards the protection of the environment.
- Respond to financial strength criteria as defined by the investment process.
- Demonstrate a connection to ONE or more of the sub-fund's investment sectors.

The sub-fund is managed to promote, among other characteristics, a combination of environmental and social characteristics within the meaning of article 8 of SFDR but does not have a Sustainable Investment objective.

C. Sub-fund Characteristics

Style: a bottom up approach that selects companies within each of the themes related to environmental technologies.

Strategy: active management with a combination of quantitative and qualitative methodology.

Geographic allocation: global

Portfolio: diversified, multisectorial, around 42 positions (2022).

Currency: euro

Benchmark: none

Risk measure: MSCI World

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Global Environment

Management's report (continued)

II. Investment Philosophy

The investment philosophy is to concentrate investments in companies engaged in technologies linked to the environment. We expect that such companies would yield investment performance superior to the returns of stock market indices in the middle to long term.

Each of our investment theme is linked to an important economic and/or environmental challenge be it climate change, the use of natural resources, the preservation of biodiversity or expected demographic trends.

Only companies operating in high growth sectors are selected to form part of the portfolio.

A rigorous selection process allows for the identification of the best companies within each investment theme.

III. Sustainable Investment Policy

The sub-fund will have an exposure to any type of equity and equity related security issued by companies operating in technologies associated with environmental themes and considered to present investment opportunities that are likely to yield superior investment returns in the medium to long term. The sub-fund invests in various themes whereby each theme is linked to one or more important environmental and economic challenges.

"Sustainable Investment" means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The companies in which the sub-fund invests will follow good governance practices. Good governance practices of the investee companies are monitored via the governance ratings.

The Investment Manager integrates Sustainability Risks and opportunities into its research, analysis and investment decision-making processes.

The characteristics promoted by the sub-fund consist in investing in companies having a positive impact on the environment that is derived directly from their operational activity. The Investment Manager considers companies with good ESG ratings that are related to environmental technologies thematic (e.g. Water management, Waste management, Energy efficiency, Ecological materials, Renewable energy, Sustainable mobility, etc.). Regarding the ratings, the Investment Manager uses information coming from the provider Refinitiv.

The Investment Manager excludes companies with poor Environmental, Social and Governance ratings, companies producing nuclear power, using Genetically modified organisms (GMOs), producing tobacco, Alcohol or military weapons as well as any company from the gambling sector. In addition, companies are also excluded if a significant part of their activity negatively impacts the environment, the ecosystems and human health.

ONE Sustainable Fund - Global Environment

Management's report (continued)

IV. Investment Process

The investment process of ONE Sustainable Fund - Global Environment includes the following steps:

- Definition of the investment universe
- Financial filter
- Extra-financial filter
- Exclusion criteria
- Portfolio construction
- Portfolio Monitoring

A. Definition of the investment universe

The investment universe is composed of companies belonging to the environmental technology and SRI universe. Companies with high ESG ratings are considered (exclusion of companies with worst ratings):

This universe is established through analysis of information compiled from diverse and varied information sources.

B. Financial filter

CONINCO Explorers in finance SA is the sub-fund's investment manager. Stringent financial review of companies for constituting the portfolio takes into account not only the historical financial results of the companies, but also their future prospects. The financial review process includes the following analysis:

1. Analysis of profitability ratios: this analysis identifies the economic stability and the growth in sales and profits over the long term. These ratios are used to assess the ability of the company to grow and adapt to macro-economic trends.

2. Analysis of financial strength ratios: these ratios assess the level of debt of a company as well as its liquidity. They also help in the understanding on how revenues are generated and the importance of debt in the development and results of the company.

3. Valuation ratios: These ratios are used for analyzing the market valuation of the company and to determine if it is over or undervalued.

Following this financial screening of the entire universe, that is approximately 1900 companies, the investable universe is reduced to around 300 companies.

C. Extra-Financial filter

Either a significant part of, or the entire economic activity of the company must be engaged in at least ONE of the following technological areas: measuring, preventing, limiting or remedying damage to the environment, be it in the sphere of water, the atmosphere or the soil, including addressing challenges associated with waste disposal and ecosystems. The company's business operations must currently have a minimum of 20% of positive impact on the environment.

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Global Environment

Management's report (continued)

The technology activity must be linked to ONE of the following sectors:

- Renewable energy represents the grouping of a range of diverse activities whereby the common factor of operations is that usage of energy required for operations does not result in the consumption of the resource utilised for the production of that energy.
- Energy efficiency groups together all processes, products and services that permit a reduction in the energy consumption.
- Ecological materials: as a result of their constitution or due to their special functions, the use of those materials allow for the substitution of existing more polluting materials.
- Environmental chemistry and biology: these themes regroup the range of products, services and processes that allow (due to advances in chemical and biological engineering) for the reduction of the environmental impact of human activities.
- Environmental advisory: this sector represents management systems, management tools and processes that optimize the operations of economic activities so as to reduce the environmental impact.
- Sustainable mobility: sustainable transportation covers low environmental impact means of transportation or any other service or product that allows for the reduction of the environmental impact associated with the travels of human populations.
- Waste management: waste management refers to environmental technologies in waste management and includes all products, services and tools used to recycle or to reduce waste, to produce energy from waste or to the treatment of waste to reduce their environmental impact.
- Water management: this sector refers to environmental technologies that allow for the efficient and sustainable management of water resources and related technologies (leaks management, measurement, efficient distribution, cleaning, preservation, etc.).

Quantitative analysis is complemented by qualitative analysis which assesses the overall positioning of each company within its market and its opportunities for growth including the potential development of its environmental technology. The choices made during this qualitative analysis represent the deep conviction of the investment manager of each company's expected capacity to maintain or to grow revenues over the long term.

D. Exclusion criteria

Specific exclusion criteria are applied. Thus are excluded* from the sub-fund any companies involved in the following business activities:

- Production of armaments and military products;
- Production and processing of tobacco;
- Production of alcohol;
- Gambling;
- Pornography;
- Production of nuclear power;
- Genetic engineering in the external environment;

**Sales must not be over 5% in the excluded activities.*

Non conventional weapons are strictly excluded.

ONE Sustainable Fund - Global Environment

Management's report (continued)

E. Portfolio construction

The weighting attributed to companies in the portfolio is comparable to "fundamental indexing". Market capitalisations are weighted to stabilise market fluctuation risks in relation with the benchmark. The sub-fund allocation is a result of the selection process and not the reflection of the investment manager's view.

The Manager CONINCO commitment includes:

- Offering private and institutional investors the opportunity to align sustainability with investment goals.
- Investing in companies proactively addressing environmental and social challenges. The environmental technology field, which has a strong growth potential, presents an excellent investment opportunity for investors.

F. Portfolio monitoring

Continuous monitoring is ensured for both financial and sustainable analysis.

Extra financial data provider ensure compliance regarding exclusion criteria and ESG company ratings.

V. Historical performance

A. Since inception

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Global Environment

Management's report (continued)

B. Performance 2022

VI. Allocation as at December 31, 2022

A. By region

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Global Environment

Management's report (continued)

B. By technology

C. By market capitalization

VII. Follow up

A. Investment opportunities

The management team meets weekly and discusses the investment opportunities resulting from the investment process. The whole team is working in the same office, which allows a constant exchange of information. All team members can set a meeting at any time to discuss any kind of subject.

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Global Environment

Management's report (continued)

B. Turnover

The investment strategy is based on the sustainability concepts. Thus, the turnover will be low because each investment is made with a long term horizon, allowing to fully taking advantage of the development potential of invested companies.

January 2023

Established by the investment Manager

Approved by the Board of Directors of the Management Company

ONE Sustainable Fund - Europe Dividend

Management's report

I. Introduction

A. History

ONE Sustainable Fund - Europe Dividend is a Luxembourg sub-fund with EUR 24.4 million of AuM (CHF 24.1 million). It is a Long Only European sub-fund. It invests in companies that provide high dividends with low leverage and strong profitability. Companies active in controversial areas such as weapons, alcohol, tobacco production or its derivatives, pornography, gambling or genetic engineering in the natural environment are excluded if their sales exceed 5% of the overall turnover.

In addition, companies with severe exposure to controversial areas such as Human rights, Child Labor, Corruption and Major environmental damages are excluded.

The management company is FundPartner Solutions (Europe) S.A, an entity of the Pictet Group.

CONINCO Explorers in finance SA is the manager.

B. Investment target

The ONE Sustainable Fund - Europe Dividend sub-fund invests in European companies with:

- Historically high dividend payments.
- Low leverage.
- Solid profitability.

The sub-fund is managed to promote, among other characteristics, a combination of environmental and social characteristics within the meaning of article 8 of SFDR but does not have a Sustainable Investment objective.

C. Sub-fund characteristics

Style: a bottom-up approach that selects companies within each of the sectors and European regions.

Strategy: active management with a quantitative methodology.

Geographic allocation: Europe.

Portfolio: diversified, multisectorial, around 28 positions (2022).

Currency: euro.

Benchmark: none.

Risk measure: MSCI Europe.

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Europe Dividend

Management's report (continued)

II. Investment philosophy

The investment philosophy is to concentrate investments in SRI qualified companies that are expected to outperform stock indexes in the medium to long term.

The ONE Sustainable Fund - Europe Dividend sub-fund offers a transparent, rules-based investment tool with a focus on stability and high level of dividends and profitability measured by the Return on invested Capital.

III. Sustainable Investment policy

The characteristics promoted by the sub-fund consist of investing either in companies that respects a Norm-based approach (e.x. the Global Compact Initiative of the United Nations), and/or in companies with good Environmental, Social and Governance ratings. Regarding the ratings, we use information coming from the provider Refinitiv.

In addition, we exclude companies with poor Environmental, Social and Governance ratings, companies producing nuclear power, using Genetically modified organisms (GMOs), producing tobacco, Alcohol or military weapons as well as any company from the gambling sector. Moreover, companies are also excluded if a significant part of their activity negatively impacts the environment, if they are related to child labor, if they do not respect human rights, or if they are involved in corruption practices.

IV. Investment process

The investment process of ONE Sustainable Fund - Europe Dividend includes the following steps:

- A. Definition of the investment universe
- B. Financial filter
- C. Restriction criteria
- D. Portfolio construction
- E. Portfolio monitoring

A. Definition of the investment universe

The investment universe includes all European companies that are signatories of the UN Global Compact, European companies that are components of Sustainable indices and those qualified as SRI by CONINCO Explorers in finance. Best in class in terms of ESG rating companies are also considered.

This universe is established through analysis of information compiled from diverse and varied information sources.

B. Financial filter

CONINCO Explorers in finance SA is the sub-fund's investment manager. Stringent financial review of companies for constituting the portfolio takes into account not only the historical financial results of the companies, but also their future prospects. The financial review process includes the following quantitative analysis:

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Europe Dividend

Management's report (continued)

1. Analysis of dividend ratios: indicates how much a company pays out in dividends each year relative to its share price.

2. Analysis of financial strength ratios: these ratios assess the level of debt of a company as well as its liquidity. They also help in the understanding on how revenues are generated and the importance of debt in the development and results of the company.

3. Analysis of profitability ratios: this analysis identifies the economic stability and the growth in sales and profit over the long term.

4. Valuation ratios: These ratios are used for analysing the market valuation of the company and to determine if it is over or undervalued.

Following this financial screening of the entire universe, that is approximately 1000 companies, the investable universe is reduced to 200 companies with high dividend profile.

C. Restriction criteria

Specific exclusion criteria are applied. Thus are excluded* from the sub-fund any companies involved in the following business activities:

- Production of armaments and military products;
- Production and processing of tobacco;
- Production of alcohol;
- Gambling;
- Pornography;
- Production of nuclear power;
- Genetic engineering in the external environment;

**Sales must not be over 5% in the excluded activities.*

In addition, the management team assess and exclude any companies exposed to the following controversies:

- Human rights violation;
- Child Labor;
- Corruption;
- Major Environmental damages;

D. Portfolio construction

The weighting attributed to companies in the portfolio is comparable to "fundamental indexing". Market capitalisations are weighted to stabilise market fluctuation risks in relation with the benchmark. The sub-fund allocation is a result of the selection process and not the reflection of the investment manager's view.

The Manager CONINCO commitment includes:

- Offering private and institutional investors the opportunity to align sustainability with investment goals.
- Investing in companies with historical high dividend, low leverage and solid profitability.

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Europe Dividend

VI. Allocation as at December 31, 2022

A. By Region

B. By sector

Past performance is not an indicator of current or future returns.

ONE Sustainable Fund - Europe Dividend

Management's report (continued)

C. By Market Capitalization

VII. Follow up

A. Investment opportunities

The management team meets weekly and discusses the investment opportunities resulting from the investment process. The whole team is working in the same office, which allows a constant exchange of information. All team members can set a meeting at any time to discuss any kind of subject..

B. Turnover

The investment strategy is based on both financial and sustainable screening. Thus, the turnover may vary from year to year allowing to fully taking advantage of new opportunities.

January 2023

Established by the Board of Directors of the Management Company

Report of the Réviseur d'Entreprises Agréé / Auditor's report

To the unitholders of
One Sustainable Fund
Fond commun de placement
15, avenue J.F. Kennedy, L-1855 Luxembourg

Opinion

We have audited the financial statements of One Sustainable Fund (the "Fund") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2022 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at December 31, 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the Réviseur d'Entreprises Agréé for the Audit of the Financial Statements" section of our report. We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund's Management Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the Réviseur d'Entreprises Agréé thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Report of the Réviseur d'Entreprises Agréé / Auditor's report (continued)

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund's Management Company for the financial statements

The Board of Directors of the Fund's Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund's Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund's Management Company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund's Management Company either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'Entreprises Agréé" for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the Réviseur d'Entreprises Agréé that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund's Management Company.
- Conclude on the appropriateness of the Board of Directors of the Fund's Management Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the Réviseur d'Entreprises Agréé to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the Réviseur d'Entreprises Agréé. However, future events or conditions may cause the Fund to cease to continue as a going concern.

Report of the Réviseur d'Entreprises Agréé / Auditor's report (continued)

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de Révision Agréé*

Ladislav de Crouy-Chanel, *Réviseur d'Entreprises Agréé*

ONE Sustainable Fund

Notes to the financial statements as at December 31, 2022

NOTE 1

GENERAL

ONE Sustainable Fund (the "Fund") is legally established as an open-ended investment fund under Luxembourg law under the legal form of a collective investment fund in accordance with Part I of the amended law of December 17, 2010 on Undertakings of Collective Investment (the "2010 Law"). Initially named "LIVING PLANET FUND", its management regulations were first deposited at the Trade and Company Register on July 9, 2003 and published in the "*Mémorial C, Recueil des Sociétés et Associations du Grand-Duché de Luxembourg*" for the first time on July 19, 2003.

FundPartner Solutions (Europe) S.A., a public limited company (*société anonyme*) with registered office at 15, avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg, was appointed Management Company of the Fund as of September 2, 2013. It is a Management Company within the meaning of the 2010 Law.

a) Sub-funds in activity

As at December 31, 2022, the Fund has the following sub-funds:

- ONE Sustainable Fund - Global Environment;
- ONE Sustainable Fund - Europe Dividend.

b) Significant events and material changes

In February 2022, a number of countries (including the US, UK and EU) imposed sanctions against certain entities and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation. Announcements of potential additional sanctions have been made following military operations initiated by Russia against the Ukraine on February 24, 2022.

The situation, together with growing turmoil from fluctuations in commodity prices and foreign exchange rates, and the potential to adversely impact global economies, has driven a sharp increase in volatility across markets.

At the date of this report, the Management Company continues to monitor the evolving situation and its impact on the financial position of the Fund and any of its compartment.

As at year end, the Fund has no Russian exposure.

A new Sales Prospectus came into force in February 2022.

c) Units classes

The sub-fund ONE Sustainable Fund - Global Environment has two classes:

- ONE Sustainable Fund - Global Environment - A;
- ONE Sustainable Fund - Global Environment - B.

The sub-fund ONE Sustainable Fund - Europe Dividend has one class:

- ONE Sustainable Fund - Europe Dividend - B.

ONE Sustainable Fund

Notes to the financial statements as at December 31, 2022 (continued)

Units of Class "A" are for retail investors;

Units of class "B" are for institutional investors (as defined from time to time by the Supervisory Authority in Luxembourg).

All units issued among each class are exclusively issued in bearer form.

Within the sub-funds, the Management Company may establish unit classes with one or more distinct characteristics such as, for example, a specific subscription or redemption fee structure, a specific management fee structure, a particular dividend policy, investor eligibility conditions or any other criterion as specified in the Appendix of the prospectus of the relevant sub-fund.

All units in the same unit class shall have the same rights.

The ONE Sustainable Fund - Global Environment sub-fund issues two classes of accumulation units: class A and class B.

The ONE Sustainable Fund - Europe Dividend sub-fund issues one class of accumulation units: class B.

NOTE 2

SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

a) Presentation of financial statements

The financial statements are prepared in accordance with generally accepted accounting principles and presented in accordance with the legal reporting requirements applicable in Luxembourg relating to Undertakings for Collective Investment.

b) Valuation of assets

1) Securities, derivatives and other investments listed on a stock exchange are valued at their latest available published closing price on the valuation day. If the same security, derivative or other investment is quoted on several stock exchanges, the latest available published closing price on the valuation day on the stock exchange that represents the major market for this investment will apply.

In the case of securities, derivatives and other investments thinly traded on a stock exchange and for which a secondary market among securities traders exists with pricing in line with the market, the Management Company may value these securities, derivatives and other investments based on these prices. Securities, derivatives and other investments that are not listed on a stock exchange, but which are traded on another regulated market which is recognised, open to the public and operates in a due and orderly fashion, are valued at the last available price on this market.

2) Securities, derivatives and other investments that are not listed at a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, are valued by the Management Company according to other principles chosen by it in good faith on the basis of the likely sales prices.

Notes to the financial statements as at December 31, 2022 (continued)

3) The valuation of derivatives which are not listed on a stock exchange (Over The Counter ("OTC") derivatives) takes place by reference to independent pricing sources. In case only one independent pricing source of a derivative is available, the plausibility of the valuation obtained is verified by means of methods of calculation recognised by the Management Company, based on the market value of the underlying instrument from which the derivative is derived.

4) Shares of other Undertakings for Collective Investment in Transferable Securities ("UCITS") and/or UCIs are valued at their last Net Asset Value ("NAV").

5) For money market instruments, the valuation price is gradually adjusted to the redemption price, based on the net acquisition price and retaining the ensuing yield. In the event of a significant change in market conditions, the basis for the valuation of different investments is brought into line with the new market yields.

6) Securities, money market instruments, derivatives and other investments that are denominated in a currency other than the currency of account of the relevant sub-fund and which are not hedged by means of currency transactions are valued at the middle currency rate (midway between the bid and offer rate) obtained from external price providers.

7) Time deposits and fiduciary investments are valued at their nominal value plus accumulated interest.

8) Cash is valued at nominal value, plus accrued interest.

c) Presentation of combined

The combined financial statements of the Fund are expressed in EUR and are equal to the sum of the corresponding items in the financial statements of the different sub-funds, converted into EUR at the exchange rate prevailing at the end of the financial year.

d) Foreign exchange translation

Cash at banks, other net assets as well as the market value of the investment portfolio in currencies other than the base currency of the sub-fund are converted into the base currency of the sub-fund at the exchange rates prevailing at the end of the year.

Income and expenses expressed in currencies other than the base currency of the sub-fund are converted into the base currency of the sub-fund at the exchange rates applicable on the transaction date.

The net resulting foreign exchange gain or loss are included in the statement of operations and changes in net assets.

e) Acquisition of investment securities

The cost of investment securities expressed in currencies other than the base currency of the sub-fund is converted into the base currency of the sub-fund at the exchange rate applicable at acquisition date.

ONE Sustainable Fund

Notes to the financial statements as at December 31, 2022 (continued)

f) Net realised gain/loss on sales of investments

The net realised gain/loss on sales of investments is calculated on the basis of the weighted average cost of the investments sold.

g) Income

Dividends are recorded net of withholding tax at ex-date. Interest is recorded on an accrual basis

h) Formation expenses

Formation expenses are amortised on a straight line basis over a period of 5 years. As at December 31, 2022, the formation expenses are fully amortised.

i) Transaction fees

Transaction fees represent the costs incurred by the sub-funds in relation to the purchases and sales of investments. They include brokerage fees, bank charges, taxes, deposit fees and other transaction costs and are included in the statement of operations and changes in net assets.

NOTE 3

TAXE D'ABONNEMENT

The net assets of the Fund are subject to a "taxe d'abonnement" (subscription tax) in the Grand Duchy of Luxembourg at the annual rate of 0.05% (with the exception of unit classes eligible for tax at the reduced rate of 0.01% as specified in the relevant sub-fund appendix to the prospectus in force), payable at the end of each quarter and calculated on the amount of the Fund's net assets at the end of each quarter.

NOTE 4

EXPENSES PAID BY THE FUND

The principal running costs of ONE Sustainable Fund - Global Environment and ONE Sustainable Fund - Europe Dividend are the following:

Depository fees	Max 0.08% p.a. of the total net asset (annual minimum amount of EUR 50,000)
Management Company fees	Max 0.08% p.a. of the total net asset (annual minimum amount of EUR 60,000)
Central Administration and Investment Controlling fees	Max 0.20% p.a. of the total net asset (annual minimum amount of EUR 100,000)
Domiciliation fees	EUR 3,750 for the initial Fund structure, plus EUR 750 per sub-fund.
Investment Management fees	Max 1.00% p.a. of the total net asset

In addition to the aforementioned costs, the Fund bears:

- a) all taxes which are levied on the net assets of the Fund, particularly the "taxe d'abonnement",
- b) depository brokerage fees and commissions which are charged by other banks and brokers for securities transactions and similar transactions,

ONE Sustainable Fund

Notes to the financial statements as at December 31, 2022 (continued)

- c) costs for extraordinary measures carried out in the interests of Unitholders, particularly arranging expert opinions and dealing with legal proceedings, and
- d) annual audit costs.

NOTE 5 OTHER FEES PAYABLE

As at December 31, 2022, the other fees payable include mainly Administration, Audit, Management Company, Depositary and risk report fees.

NOTE 6 SUBSEQUENT EVENTS

No significant event occurred after the end of the year.

ONE Sustainable Fund

Total Expense Ratio ("TER") (Unaudited Appendix I)

Pursuant to the "Guidelines on the calculation and disclosure of the total expense ratio (TER)" of collective investment schemes of May 16, 2008 (version of August 5, 2021) of the Asset Management Association Switzerland ("AMAS"), the Fund is obliged to publish a TER for the latest 12-month period.

The TER is defined as the ratio between the total operating expenses (operating charges primarily consist of investment management fees if any, depositary fees, bank charges and interest, service fees, taxes and duties) and the relevant sub-fund's/unit class' average NAV (calculated on the basis of the daily average of the total net assets for the relevant period) expressed in its reference currency.

For the period from January 1, 2022 to December 31, 2022, the TER were the following:

Class	Currency	Annualised TER including performance fees	Annualised TER excluding performance fees
ONE Sustainable Fund - Global Environment			
A	EUR	1.60%	1.60%
B	EUR	1.54%	1.54%
ONE Sustainable Fund - Europe Dividend			
B	EUR	1.62%	1.62%

ONE Sustainable Fund

Performance (Unaudited Appendix II)

The performance per unit class was calculated by comparing the net assets per unit as at December 31, 2022 with the net assets per unit as at December 31, 2021.

The performance was calculated by us at the end of each financial period according to the "Guidelines on the calculation and publication of performance data of collective investment schemes" of May 16, 2008 (version of August 5, 2021) of the Asset Management Association Switzerland ("AMAS").

The performance given is based on historical data, which is no guide to current or future performance. Commissions and fees levied for the issue or redemption of units, as applicable, have not been taken into account in this performance calculation.

As at December 31, 2022, performances were the following:

Class	Currency	Performance for the financial year ending December 31, 2022	Performance for the financial year ending December 31, 2021	Performance for the financial year ending December 31, 2020
ONE Sustainable Fund - Global Environment				
A	EUR	-24.40%	27.97%	14.49%
B	EUR	-24.37%	28.03%	14.54%
ONE Sustainable Fund - Europe Dividend				
B	EUR	-16.62%	20.87%	9.80%

Other information to Unitholders (Unaudited Appendix III)

1. Remuneration of the Management company

The Management Company has adopted a Remuneration Policy which is in accordance with the principles established by the law of 10 May 2016, amending the law of December 17, 2010 ("the 2010 Law").

The financial year of the Management Company ends on 31 December of each year.

The table below shows the total amount of the remuneration for the financial year ended as at December 31, 2022, split into fixed and variable remuneration, paid by the Management Company to its staff.

The table has been prepared taking into consideration point 162 of section 14.1 of the ESMA remuneration guidelines relating to the confidentiality and data protection in presenting the remuneration information.

	Number of Beneficiaries	Total remuneration (EUR)	Fixed remuneration (EUR)	Variable remuneration (target or discretionary bonuses, parts remuneration) (EUR)
Total remuneration paid by the Management Company during 2022	23	5,878	3,977	1,901

Additional explanation

The beneficiaries reported are composed of the risk takers (including the 4 Conducting Officers) and the staff of the Management Company dedicated to Management Company activities for all the Funds under management, remunerated by the Management Company. In addition, the Management Company did not remunerate directly the staff of the Investment Manager, but rather ensured that the Investment Manager complies with the Remuneration Policy requirements itself.

The benefits have been attributed according to criteria such as level of seniority, hierarchic level, or other eligibility criteria, not taking into account performance criteria, and are thus excluded from the fixed or variable remuneration figures provided above.

Total fixed and variable remuneration disclosed is based on apportionment of Asset Under Management represented by the Fund.

The 2022 annual review outcome showed no exception.

There have been no changes to the adopted remuneration policy since its implementation.

Other information to Unitholders (Unaudited Appendix III) (continued)

2. Securities Financing Transactions Regulation ("SFTR")

As at December 31, 2022, the Fund is in the scope of the requirements of the Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse. Nevertheless, no corresponding transactions were carried out during the year referring to the financial statements.

3. Information of risk measurement

The sub-fund's global risk exposure is monitored by using the Commitment approach. In that respect, financial derivatives instruments are converted into their equivalent position in the underlying asset. The global risk exposure shall not exceed the sub-fund's NAV.

ONE Sustainable Fund

Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited Appendix IV)

On November 27, 2019, Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector was published (the "SFDR"). The SFDR aims to increase the harmonization of, and transparency towards the end investors with regard to, the integration of sustainability risks, the consideration of adverse sustainability impacts, the promotion of environmental or social characteristics and sustainable investment by requiring pre-contractual and ongoing disclosures to end investors.

The SFDR provides high-level definitions and distinguishes between several categorizations of products including "Article 8 products" which are financial products that promote, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices ("SFDR Article 8 Products") and "Article 9 products" which are products that have sustainable investment as their objective ("SFDR Article 9 Products").

The following sub-funds of ONE Sustainable Fund are categorized as financial products falling under the scope of the following SFDR articles as at December 31, 2022:

Sub-fund	Current SFDR categorization as at 31.12.2022
ONE Sustainable Fund - Global Environment	Article 8
ONE Sustainable Fund - Europe Dividend	Article 8

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ONE Sustainable Fund - Europe Dividend

Legal entity identifier: 222100FBPX7BMKHNND15

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: _%

☒ ☒ ☒ No

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During 2022, we applied environmental and social characteristics to the entire portfolio. We analysed sustainable strategies applied by every company. We were invested for more than 50% in best in class companies in terms of ESG rating and we excluded any investment in worst ESG ratings.

65.2% of our holdings were rated best in class by Refinitiv and 88.9% are signatories of the UN Global Compact. On a consolidate view, 96.52% of the portfolio is aligned with E/S characteristics

● **How did the sustainability indicators perform?**

The following environmental and social indicators (Best in class approach) were used to measure the attainment of the environmental or social characteristics promoted by the sub-fund:

- Assessment of the Environmental, Social and Governance ratings: 65.21% of our portfolio are rated best in class (Refinitiv database). The detail of Controversies, Environmental, Governance and Social ratings is as follow:

Our portfolio have a high score in some selected E, S and G metrics as shown below:

- Invested companies that are signatories of the UN Global Compact principles: 88.98% of our portfolio
- 91.47% of our holdings are constituents of sustainable indexes such as DJ Global Sustainability.

Please find below the SDG contribution of invested companies:

And finally you find below the carbon intensity of our portfolio (scope 1 and 2):

● **...and compared to previous periods?**

Not applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product did not consider principal adverse impacts on sustainable factors.

What were the top investments of this financial product?

Below you find our largest positions at the end of 2022:

The list includes the investments constituting **the greatest proportion** of investments of the financial product during the reference period which is: 31.12.2022

Largest positions	Allocation	Sector	Country
NOVO NORDISK	6.34%	Healthcare	Denmark
WOLTERS KLUWER	4.97%	Consumer Discretionary	Netherlands
NOVARTIS	4.67%	Healthcare	Switzerland
RELX NV	4.55%	Consumer Discretionary	United Kingdom
COLOPLAST	4.48%	Healthcare	Denmark
UNILEVER PLC	4.08%	Consumer Staple	United Kingdom
INTERTEK GROUP	4.04%	Industrials	United Kingdom
NESTE	3.90%	Energy	Finland
ATLAS COPCO	3.89%	Industrials	Sweden
CRODA INTERNATIONAL	3.79%	Materials	United Kingdom
L'OREAL	3.73%	Consumer Staple	France
RECKITT BENCKISER GROUP	3.73%	Consumer Staple	United Kingdom
VOLVO	3.73%	Consumer Discretionary	Sweden
SAP	3.70%	IT	Germany
KONE OYJ 'B'	3.59%	Industrials	Finland

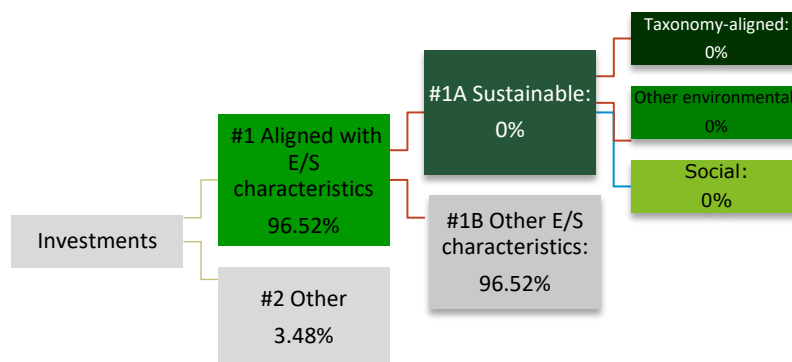

What was the proportion of sustainability-related investments?

Not applicable

● What was the asset allocation?

96.52% of investments were aligned with the announced #1B other E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Please find below our sector allocation at the end of 2022:

Reminder: Typical maximum cash and cash equivalent allocation not incorporating any environmental or social characteristics.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund promotes environmental characteristics but does not aim to invest in environmentally sustainable economic activities as defined by the EU Taxonomy.

Does the financial product invested in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

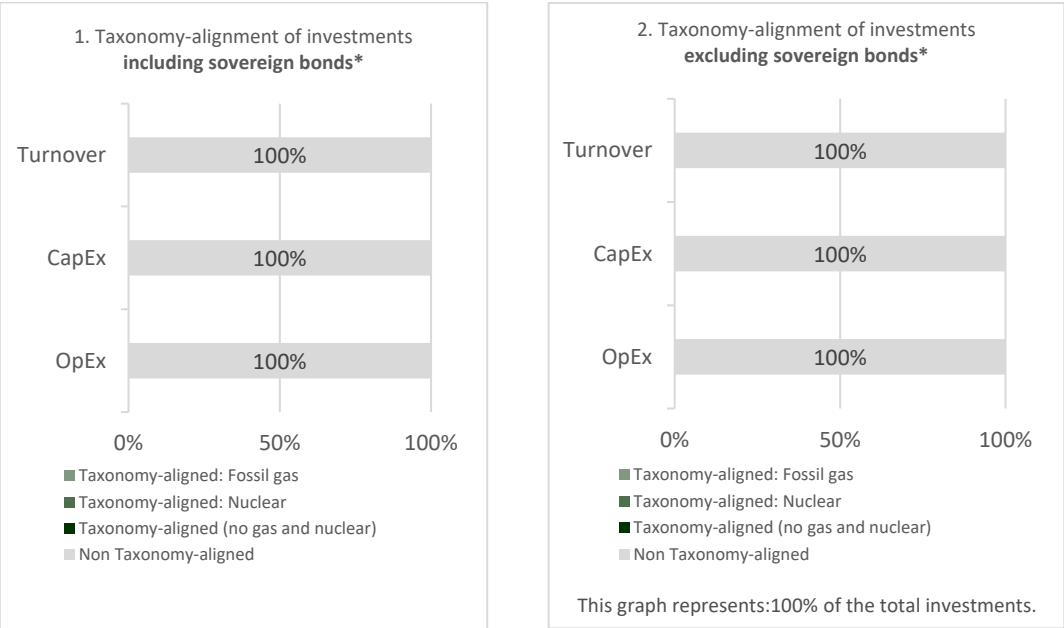

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 other" portion of the portfolio includes cash and cash equivalents. As these investments do not take into consideration ESG criteria, no minimum environmental or social safeguards will apply. The cash is held for the day-to-day operations of the fund.

This allocation was 3.48% at the end of 2022. The asset allocation of cash in the portfolio is 2%.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2022 we used a combination of responsible investment methodologies and tools across the investment process to promote E/S Characteristics. Negative screenings (Worst-in-class filters, Norms based screenings) were applied to rule companies out of the investable universe. 88.98% of our investments were made in companies that are signatories of the UN Global Compact and 65.21% have a Best in class ESG rating (Refinitiv database).

In addition, we used "ESG Integration" into investment analysis and decisions, by explicitly including material ESG issues and opportunities. A specific analysis validate whether companies have an effective sustainable strategy and we validated that no exposure to controversies in violation of the Global Compact principles was material. When relevant, we may as well engage with companies to discuss ESG issues and promote the improvement of their environmental and social characteristics. During 2022 we had no relevant issues to engage with our invested companies.

How did this financial product perform compared to the reference benchmark?

The sub-fund has no reference benchmark to determine whether it is aligned with the environmental and social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

ANNEX IV

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: _%

☒ ☒ ☒ No

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

We have invested in companies having a positive impact on the environment that is derived directly from their operational activity. The Investment Manager considered companies with good ESG ratings that are related to environmental technologies thematic (e.g. Water management, Waste management, Energy efficiency, Ecological materials, Renewable energy, Sustainable mobility, etc.).

63% of the portfolio had a Best in Class ESG Rating, 58% of the portfolio companies are signatories of the Global Compact and 60% of the portfolio was composed by companies which are a sustainable index component. On a consolidate view, 85.53% of the portfolio was aligned with E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The following indicators (Best in class approach) were used to measure the attainment of the environmental or social characteristics promoted by the sub-fund:

- Assessment of Environmental, Social and Governance ratings

The companies in the OSF - Global Environment fund are doing well in terms of environmental performance. This is a direct result of our investment process that requires companies with a positive impact on the environment. It is important to mention that none of the companies, on an ESG consolidated ratings is below C.

- Assessment of carbon intensity (scope 1 and 2)

For the calculation of the carbon impact, we take the carbon emissions data provided by Refinitiv.

Then we determine how much carbon belongs to the fund compartment, this is attributed according to the percentage of ownership (ownership in the company). We can mention that one third of the carbon impact is emitted by two companies: Air products and Saint-Gobain. (But if we take the environmental innovation rating of the two companies, 91% for Air Products and 97% for Saint-Gobain, we can note that these companies are very committed to the energy transition, a lot of effort is put in

from them and it will be these players who are bringing the answers to the energy transition.)

- Assessment of Environmental, Social and Governance ratings

The companies in the OSF - Global Environment fund are doing well in terms of environmental performance. This is a direct result of our investment process investment process that requires companies with a companies with a positive impact on the impact on the environment. It is important to mention that none of the companies, on an ESG consolidated ratings is below C.

- Assessment of carbon intensity (scope 1 and 2)

For the calculation of the carbon impact, we take the carbon emissions data provided by Refinitiv.

Then we determine how much carbon belongs to the fund compartment, this is attributed according to the percentage of ownership (ownership in the compan). We can mentioned that one third of the carbon impact is emitted by two companies: Air products and Saint-Gobain. (But if we take the environmental innovation rating of the

two companies, 91% for Air Products and 97% for Saint-Gobain, we can note that these companies are very committed to the energy transition, a lot of effort is put in from them and it will be these players who are bringing the answers to the energy transition.)

- Assessment of SDG impact of invested companies' operational activities

In addition, invested companies should generate a minimum of 20% of their revenues from environmental technologies (such as Renewable Energy, Energy efficiency, Ecological materials, Environmental chemistry and biology, Environmental advisory, Sustainable mobility, Waste management, Water management...).

Share of sales with a positive environmental impact (green share)

The definition of companies is as follows:

Support: 20 - 40 % of sales with positive environmental impact.

Mix: 40 - 80 % of sales with positive environmental impact.

Leader: 80 - 100 % of turnover with positive environmental impact.

● **...and compared to previous periods?**

Not applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

SANDVIK	Industry	2.94%	Sweden
DENSO	Discretionary Consumption	2.91%	Japan

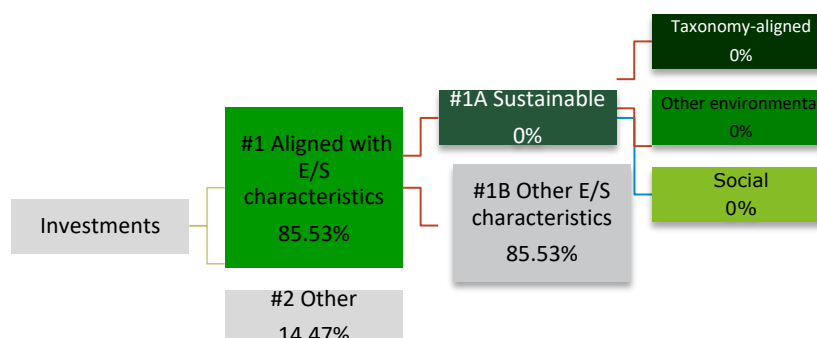

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of
investments in specific
assets.

● **What was the asset allocation?**

85.53% of investments were aligned with the announced #1B other E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The sectors for the holdings within the financial product, as at 31 December 2022, are set out below :

- Industrials : 44.40%
- Information technology : 20.26%
- Materials : 15.47%
- Discretionary consumption : 8.35%Health : 6.19%
- Energy : 3.07
- Cash 2.26%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund promotes environmental characteristics but does not aim to invest in environmentally sustainable economic activities as defined by the EU Taxonomy.

Does the financial product invested in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

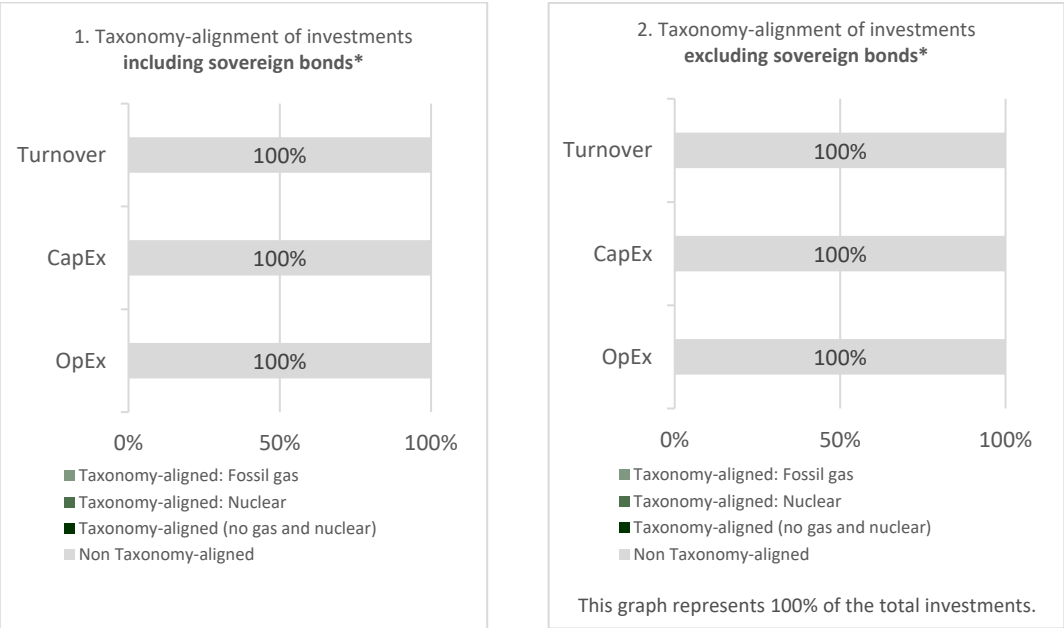

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

 **What was the share of socially sustainable investments?**

Not applicable

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The "#2 other" portion of the portfolio includes cash and cash equivalents. As these investments do not take into consideration ESG criteria, no minimum environmental or social safeguards will apply. The cash is held for the day-to-day operations of the fund.

The asset allocation of cash in the portfolio is 2%.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager has used a combination of responsible investment methodologies and tools across the investment process to promote E/S Characteristics. Negative screenings (Worst-in-class filters, Norms based screenings) were applied to rule companies out of the investable universe. In addition, the Investment Manager used "ESG Integration" into investment analysis and decisions, by explicitly including material ESG issues and opportunities. The investment managers focused on companies active in environmental technologies sectors (like Sustainable Mobility, Renewable energies, ecological materials, etc.). The sector exposition was as follow :

Companies are invested only if they have a minimum of 20% of their turnover realized with products and services related to a positive impact on the environment.

Companies were also assessed for their carbon intensity (scope 1 and 2) and the SDG impact of their operational activities. An analysis were also conducted to determine the sustainable strategy applied for their businesses and whether they

already put in place targets for carbon neutrality and a reporting of the evolution of their engagement. An evaluation of the environmental innovation score is also analysed and compared to other peers in the industry. The Investment manager may as well engage with companies to discuss ESG issues and promote the improvement of their environmental and social characteristics. No engagement were made during the period under review.

How did this financial product perform compared to the reference benchmark?

The sub-fund has no reference benchmark to determine whether it is aligned with the environmental and social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***
