Unaudited Semi-Annual Report
As at December 31, 2023

No subscriptions should be made on the basis of the financial report alone. Subscriptions should only be made on the basis of the current Prospectus supplemented by the latest Annual Report and the latest Semi-Annual Report, if published thereafter.

Performance data shown represents past performance and is not a guarantee of future results. More recent performance may be lower or higher. Principal value and returns fluctuate over time (including as a result of currency fluctuations) so that Shares, when redeemed, will be worth more or less than their original cost. Performance shown is net of all Fund expenses, but does not include the effect of sales charges or correspondent bank charges, and assumes reinvestment of distributions. If such charges were included, returns would have been lower. Performance for other Share classes will be more or less depending on differences in fees and sales charges. For periods when certain Share classes were unsubscribed or not yet created (the "inactive Share classes"), performance is imputed using the actual performance of the Fund's active Share class which has been determined by the management company as having the closest characteristics to such inactive Share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active Share class into the currency of quotation of the inactive Share class. The quoted performance for such inactive Share class is the result of an indicative calculation.

Unless otherwise indicated, all defined terms used herein shall have the same meaning as set out in the Prospectus of the Umbrella Fund.

b) Method of calculation

The value of each Fund's assets shall be determined as follows:

- a. *Securities and money market instruments traded on exchanges and Regulated Markets* – last closing price (unless the Management Company believes that an occurrence after the publication of the last market price and before any Fund next calculates its net asset value will materially affect the security's value. In that case, the security may be fair valued at the time the Administrative Agent determines its net asset value by or pursuant to procedures approved by the Management Company.
- b. *Securities and money market instruments not traded on a Regulated Market (other than short-term money market instruments)* – based upon valuations provided by pricing vendors, which valuations are determined based on normal, institutional-size trading of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders.
- c. *Short-term money market instruments (with remaining maturities of 60 days or less)* – amortized cost (which approximates market value under normal conditions).
- d. *Futures, options and forwards* – unrealized gain or loss on the contract using current settlement price. When a settlement price is not used, future and forward contracts will be valued at their fair value as determined pursuant to procedures approved by the Management Company, as used on a consistent basis.
- e. *Shares of open-ended funds* – last published net asset value.

b) Method of calculation (continued)

- f. *Cash on hand or deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received* – full amount, unless in any case such amount is unlikely to be paid or received in full, in which case the value thereof is arrived at after the Management Company or its agent makes such discount as it may consider appropriate in such case to reflect the true value thereof.
- g. *Credit Default Swaps (CDS), Credit Default Index Swaps (CDX), Interest Rate Swaps (IRS), Total Return Rate Swaps (TRRS) and Inflation Swaps (INF)* – Swaps are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty. Realised appreciation/(depreciation) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of changes in net assets respectively under the heading “Net realised appreciation/(depreciation) on swaps” and “Change in net unrealised appreciation/(depreciation) on swaps”.
- h. *Repurchase agreements* – the Fund may enter into repurchase agreement transactions and may act either as purchaser or seller in repurchase agreement transactions or a series of continuing repurchase transactions under restrictions described in Prospectus. Securities that are the subject of repurchase agreement are included in the Statement of Investments. Changes in unrealised appreciation / (depreciation) as a result thereof are included in the statement of changes in net assets respectively under “Net realised appreciation / (depreciation) on sales of investments” and “Change in net unrealised appreciation / (depreciation) on repurchase agreement”.
- i. *All other assets* – fair market value as determined pursuant to procedures approved by the SICAV.

c) Foreign exchange translation

The value of all assets and liabilities not expressed in the Reference Currency of a Fund will be converted into the Reference Currency of such Fund at rates last quoted by any major bank.

The exchange rate used as at December 31, 2023:

1 EUR = 1.104650 USD

d) Swing Pricing Adjustment

Subscriptions and redemptions can potentially have a dilutive effect on the Funds’ NAVs per share and be detrimental to long term investors as a result of the costs, bid-offer spreads or other losses that are incurred by the SICAV in relation to the trades undertaken by the Management Company. In order to protect the interest of existing Shareholders, the Management Company may decide to introduce a Swing Pricing mechanism for any Fund.

If, for the Funds listed below, net subscriptions or net redemptions on any calculation day exceeds a certain threshold (“the Swing Threshold”), the net asset value per share will be adjusted respectively upwards or downwards by a Swing Factor. Swing Thresholds and Swing Factors are determined and reviewed on a periodic basis by the Management Company.

The Swing Factor is set by the Management Company to reflect estimated dealing and other costs, and may not exceed 2% of the original net asset value.

The volatility of the Funds' net asset values may not reflect the true portfolio performance, and therefore might deviate from the Funds' benchmark as a consequence of the application of the Swing Pricing mechanism. Performance fees, if any, are calculated on the basis of the net asset value before the application of Swing Pricing adjustments.
