Additional information Securities Financing Transaction (continued)

Securities Lending (continued)

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point. The Fund's securities lending transactions have open maturity.

Settlement and clearing

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re-use of collateral

Non cash collateral, received in a securities lending transaction may not be sold, re-invested or pledged. Cash collateral received from such transactions is re-used in a reverse repurchase transaction.

Safekeeping of collateral

Collateral received

J.P. Morgan SE, as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The J.P. Morgan SE is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the fund and the securities lending agent. Details of this split are disclosed in notes to the financial statements on pages 170. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets from pages 100 to 130.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP Global Premium Equities
Legal entity identifier: 2138001L9IU6WM5R6H47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1549 agenda items at 108 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.15% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 4.36% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 7.53% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 10.52% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.32% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 16 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 16 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon footprint of the fund was better than that of the reference index.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Conservative Equities
Legal entity identifier: 213800OYIDN8AF8MZF04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2080 agenda items at 147 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 31.29%, 80.83% and 28.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.78 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.72% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.02% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 12.68% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 46.5 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -42.36%, 80.83% and 28.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 8 cases. PAI 2, table 1: Carbon footprint 8 cases. PAI 3, table 1: GHG intensity of investee companies 8 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 8 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 8 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 8 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and

Sustainability disclosures (unaudited)

- Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	2.29	United States
Merck & Co Inc	Pharmaceuticals	1.97	United States
Johnson & Johnson	Pharmaceuticals	1.86	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

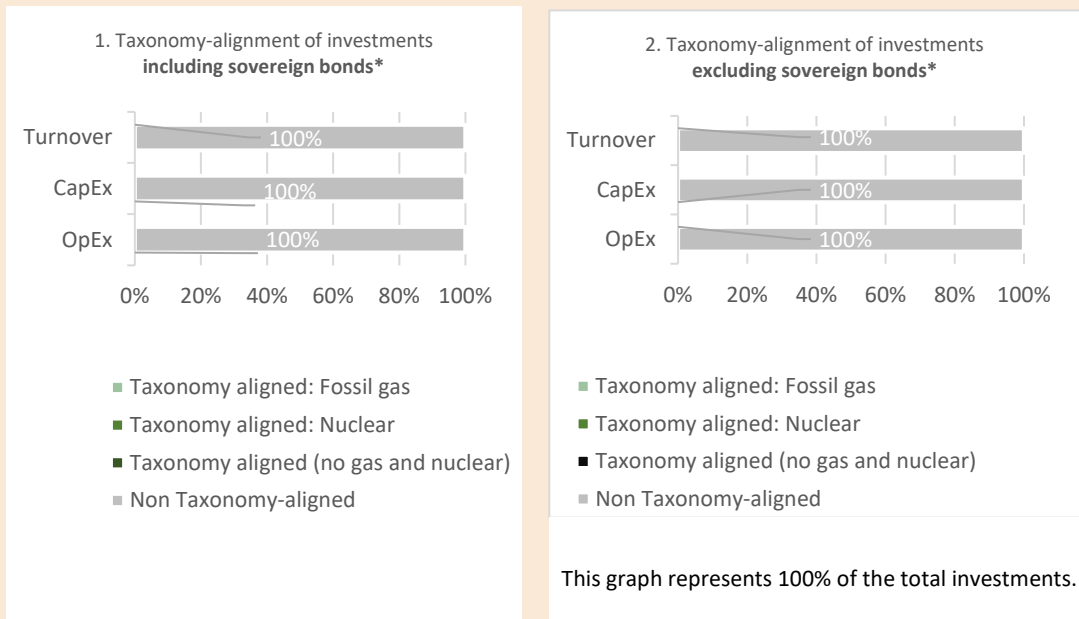

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory

Sustainability disclosures (unaudited)

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Global Stars Equities
Legal entity identifier: 213800STHRWFUJPF10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 81.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 667 agenda items at 44 shareholders' meetings.
2. The portfolio contained on average 5.92% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 74.83%, 90.21% and 89.18% better than the general market index.
6. The sub-fund's weighted average ESG score was 17.47 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable

Sustainability disclosures (unaudited)

investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the

Sustainability disclosures (unaudited)

following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 5.33% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.58% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 14 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 93.95%, 90.21% and 89.18% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 24 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap

Sustainability disclosures (unaudited)

2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	5.95	United States
AstraZeneca PLC	Pharmaceuticals	5.26	United Kingdom

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

76.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, we have over half of our holdings under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Emerging Stars Equities
Legal entity identifier: 213800QZQKHD6N2CO791

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 625 agenda items at 61 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.01% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.98% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.96% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, none of the holdings has an elevated sustainability risk.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Emerging Markets Equities
Legal entity identifier: 213800G7572JDNM7PW92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.3% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1236 agenda items at 124 shareholders' meetings.
2. The portfolio contained on average 3.59% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 2.77% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.99% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.45% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.07% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.94% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 20 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 8 cases. PAI 2, table 1: Carbon footprint 8 cases. PAI 3, table 1: GHG intensity of investee companies 8 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 8 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 8 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 8 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

67.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 20 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Active Equities
Legal entity identifier: 21380047HP5WHXG9ER08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3485 agenda items at 374 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 16.63%, 72.38% and 49.38% better than the general market index.
5. The sub-fund's weighted average ESG score was 24.92 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.85% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.25% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.85% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.01% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 137.7 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 26.01%, 72.38% and 49.38% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 20 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 2 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and

Sustainability disclosures (unaudited)

- Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	5.38	Taiwan
Tencent Holdings Ltd	Interactive Media & Services	3.24	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Sustainability disclosures (unaudited)

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

57.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 20 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Momentum Equities
Legal entity identifier: 213800UIRPLXU9EX9K84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 8.67%, 79.41% and 89.94% better than the general market index.
4. The sub-fund's weighted average ESG score was 21.71 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.4% of the net assets, compared to 4.98% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.24% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.22% of the net assets, compared to 0.39% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 61.9 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 29.92%, 79.41% and 89.94% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 11 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
LVMH Moët Hennessy Louis Vuitton SE	Textiles, Apparel & Luxury Goods	1.82	France
Merck & Co Inc	Pharmaceuticals	1.51	United States
Costco Wholesale Corp	Food & Staples Retailing	1.49	United States
EOG Resources Inc	Oil, Gas & Consumable Fuels	1.47	United States
AutoZone Inc	Specialty Retail	1.34	United States
Broadcom Inc	Semiconductors & Semiconductor Equipment	1.33	United States
Fortinet Inc	Software	1.16	United States
Synopsys Inc	Software	1.13	United States
Hermès International	Textiles, Apparel & Luxury Goods	1.09	France
Novo Nordisk A/S	Pharmaceuticals	1.09	Denmark
Keysight Technologies Inc	Electronic Equipment, Instruments & Components	1.06	United States
Paychex Inc	IT Services	0.99	United States
Hershey Co/The	Food Products	0.99	United States
Gartner Inc	IT Services	0.95	United States
Nutrien Ltd	Chemicals	0.91	Canada

What was the proportion of sustainability-related investments?

98.8%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:
 In fossil gas In nuclear energy
 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

58.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 11 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Sustainable Enhanced Index Equities

Legal entity identifier: 213800XPIJOYMY8KOZ42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
5. The sub-fund's weighted average ESG score was at least 10% better than that of the general market index.
6. The sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 10844 agenda items at 729 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 34.48%, 23.14% and 47.76% better than the general market index.
5. The sub-fund's weighted average ESG score was 19.11 against 21.48 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.93% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.99% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.32% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 36.3 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 26.88%, 23.14% and 47.76% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 65 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 5 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	4.26	United States
Microsoft Corp	Software	3.52	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

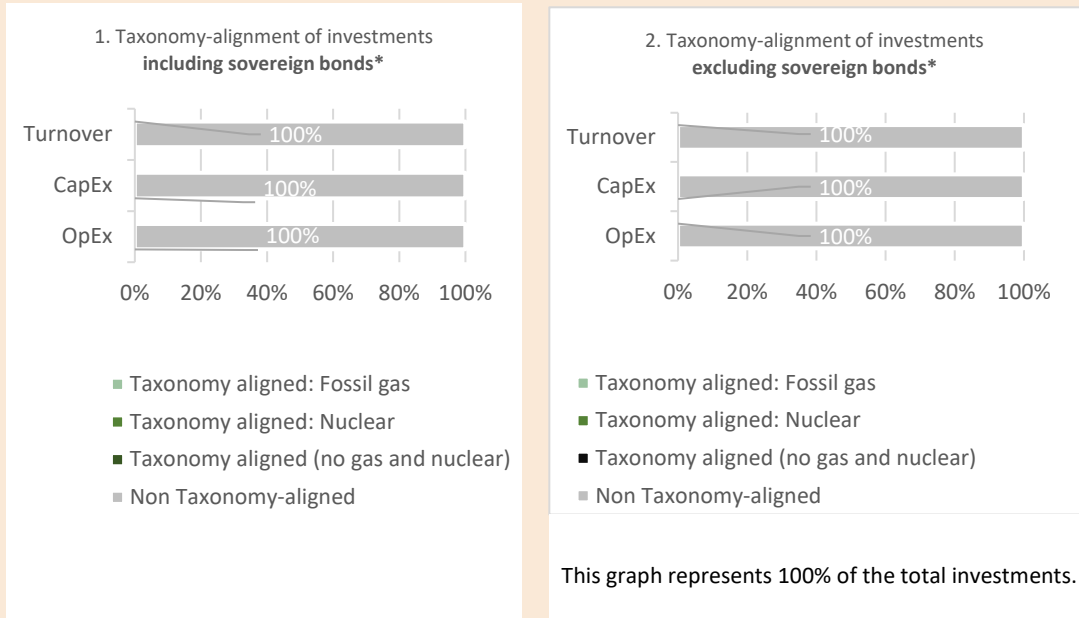

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 65 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Enhanced Index Equities
Legal entity identifier: 213800STP25QHMJ2GM65

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.6% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 8393 agenda items at 856 shareholders' meetings.
2. The portfolio contained on average 0.76% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.84%, 17.33% and 7.52% better than the general market index.
5. The sub-fund's weighted average ESG score was 24.88 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

- Pre-investment, the following principal adverse impacts on sustainability factors were considered:
- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.19% of the net assets, compared to 0.96% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.28% of the net assets, compared to 0.39% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.06% of the net assets, compared to 0.93% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.51% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 142.3 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -230.69%, 17.33% and 7.52% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 42 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 12 cases. PAI 2, table 1: Carbon footprint 12 cases. PAI 3, table 1: GHG intensity of investee companies 12 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 12 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 12 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 12 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 4 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 4 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

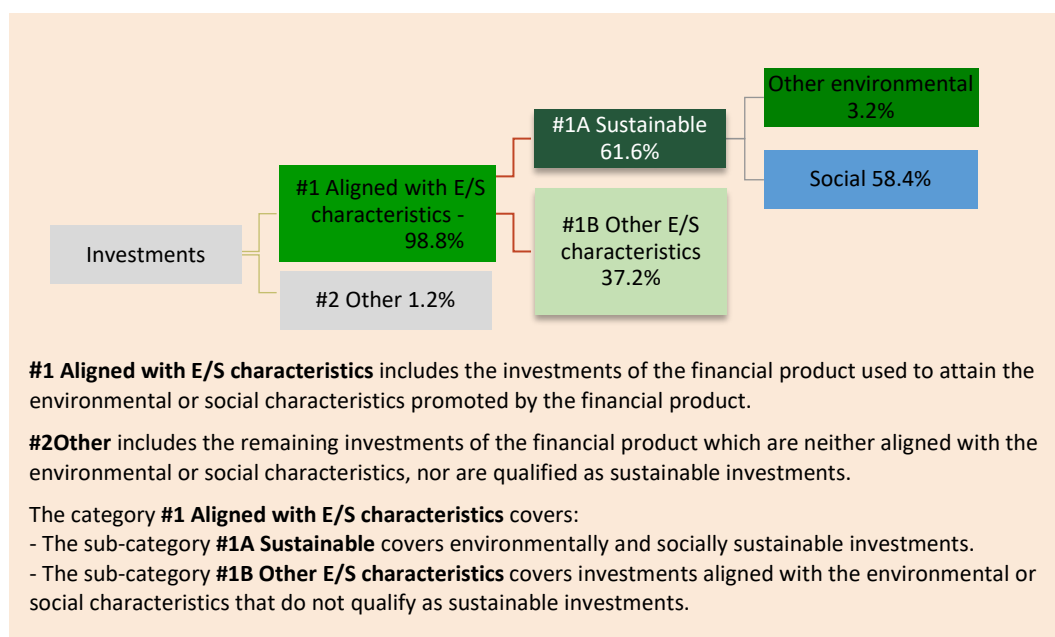

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Ltd	Semiconductors & Semiconductor Equipment	6.14	Taiwan
Tencent Holdings Ltd	Interactive Media & Services	3.82	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

58.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 42 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Conservative Equities
Legal entity identifier: 213800KLJOYPGHWQQA07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66.6% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3518 agenda items at 340 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 56.09%, 23.66% and 83.34% better than the general market index.
5. The sub-fund's weighted average ESG score was 24.93 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.93% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.34% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.23% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.02% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 72.5 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 93.91%, 23.66% and 83.34% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Samsung Electronics Co Ltd	Technology Hardware, Storage & Peripherals	2.32	South Korea

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

64.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Value Equities
Legal entity identifier: 2138008GOSJ2FFNDBA15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2699 agenda items at 206 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.70%, 76.93% and 5.14% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.73 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 5.15% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 11.41% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.58% of the benchmark
 - Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 58.5 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -28.12%, 76.93% and 5.14% better than the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
 - Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 7 cases. PAI 2, table 1: Carbon footprint 7 cases. PAI 3, table 1: GHG intensity of investee companies 7 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 7 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 7 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 7 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

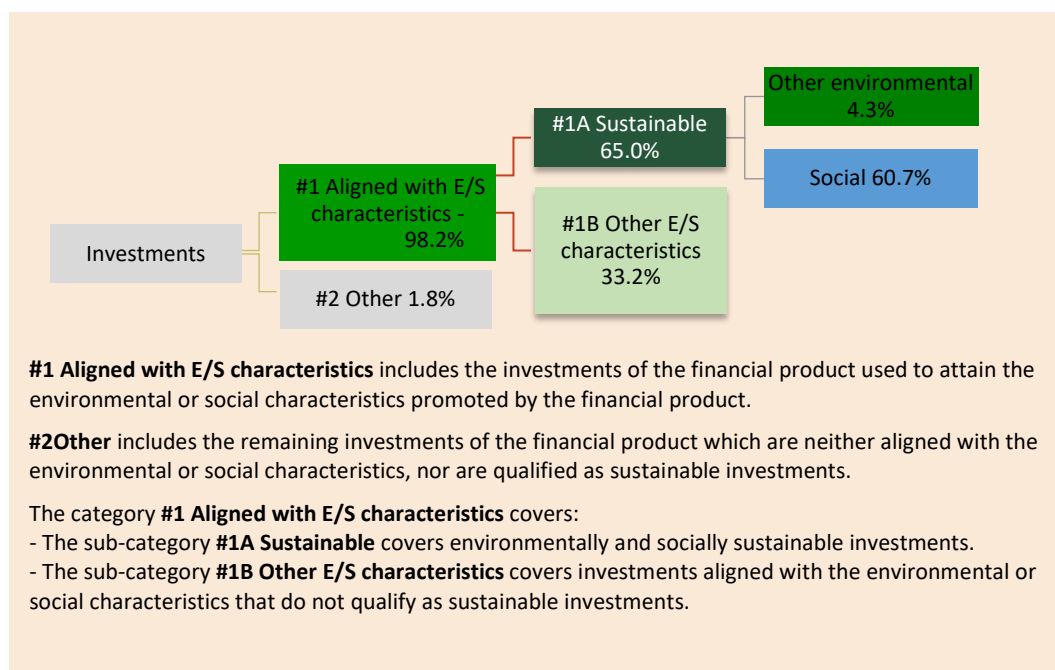

Largest investments	Sector	% Assets	Country
Bristol-Myers Squibb Co	Pharmaceuticals	2.02	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Multi-Factor Equities
Legal entity identifier: 2138004BTUICV15VA168

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 6032 agenda items at 454 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 20.38%, 78.95% and 51.10% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.89 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.17% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.58% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 44.1 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 20.66%, 78.95% and 51.1% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 38 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 10 cases. PAI 2, table 1: Carbon footprint 10 cases. PAI 3, table 1: GHG intensity of investee companies 10 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 10 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 10 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 10 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	1.30	United States
Pfizer Inc	Pharmaceuticals	0.94	United States
AutoZone Inc	Specialty Retail	0.88	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 38 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Sustainable Active Equities
Legal entity identifier: 549300CZ8S23ZD8TW786

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
5. The sub-fund's weighted average ESG score was at least 10% better than that of the general market index.
6. The sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3239 agenda items at 348 shareholders' meetings.
2. The portfolio contained on average 3.17% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 53.21%, 90.20% and 85.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 22.45 against 25.23 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.79% of the net assets, compared to 2.88% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.11% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.52% of the net assets, compared to 2.93% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.7% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 77.3 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 48.17%, 90.2% and 85.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	5.66	Taiwan

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 50% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Conservative Equities
Legal entity identifier: 213800WBAS5AB8ING173

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2309 agenda items at 162 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.90%, 18.89% and 14.50% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.33 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.94% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 12.37% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.24% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 47.7 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -29.52%, 18.89% and 14.5% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 7 cases. PAI 2, table 1: Carbon footprint 7 cases. PAI 3, table 1: GHG intensity of investee companies 7 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 7 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 7 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 7 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	2.47	United States
Merck & Co Inc	Pharmaceuticals	1.89	United States
Pfizer Inc	Pharmaceuticals	1.72	United States
Johnson & Johnson	Pharmaceuticals	1.68	United States
Royal Bank of Canada	Banks	1.67	Canada
Verizon Communications Inc	Diversified Telecommunication Services	1.66	United States
Nestle SA	Food Products	1.66	Switzerland

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

62.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Active Equities
Legal entity identifier: 213800IXA2GLSM2Z7310

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3403 agenda items at 239 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 8.14%, 35.49% and 37.33% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.11 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.52% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.77% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.24% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 50.9 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 29.09%, 35.49% and 37.33% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 32 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 6 cases. PAI 2, table 1: Carbon footprint 6 cases. PAI 3, table 1: GHG intensity of investee companies 6 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 6 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 6 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 6 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

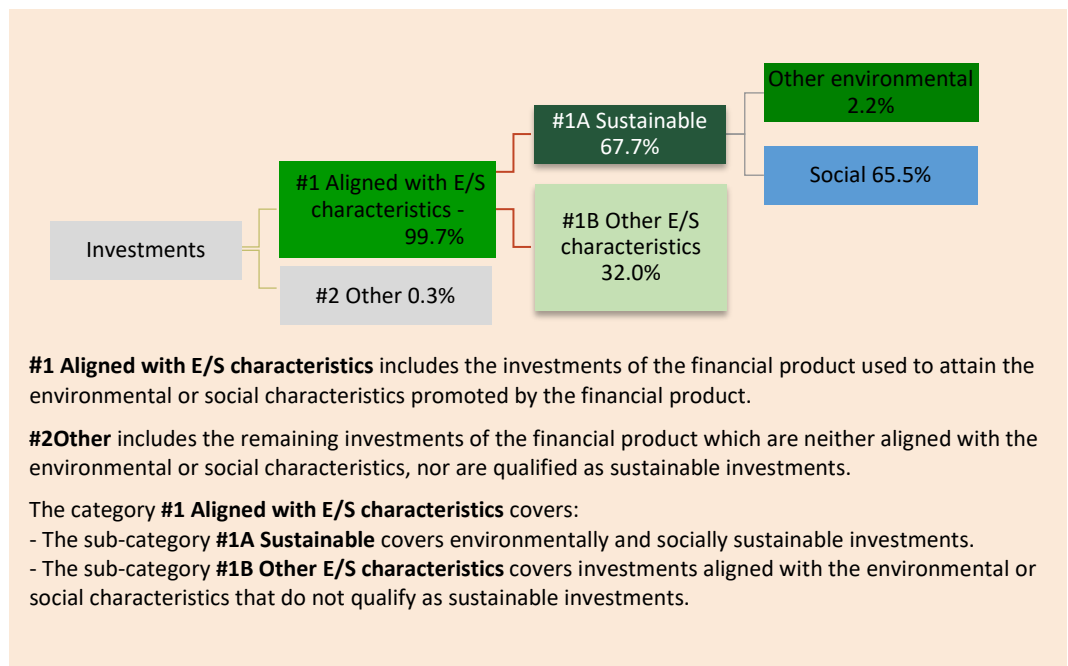

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	3.81	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 32 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Customized Emerging Markets Enhanced Index Equities I

Legal entity identifier: 213800789L405A9NK030

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.45% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 11.04%, 14.77% and 3.97% better than the general market index.
4. The sub-fund's weighted average ESG score was 24.96 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.32% of the net assets, compared to 3.84% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.48% of the net assets, compared to 1.5% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.91% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.22% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 147 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 24.53%, 14.77% and 3.97% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 52 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 14 cases. PAI 2, table 1: Carbon footprint 14 cases. PAI 3, table 1: GHG intensity of investee companies 14 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 14 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 14 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 14 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 5 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 5 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 5 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	6.13	Taiwan

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

■ Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

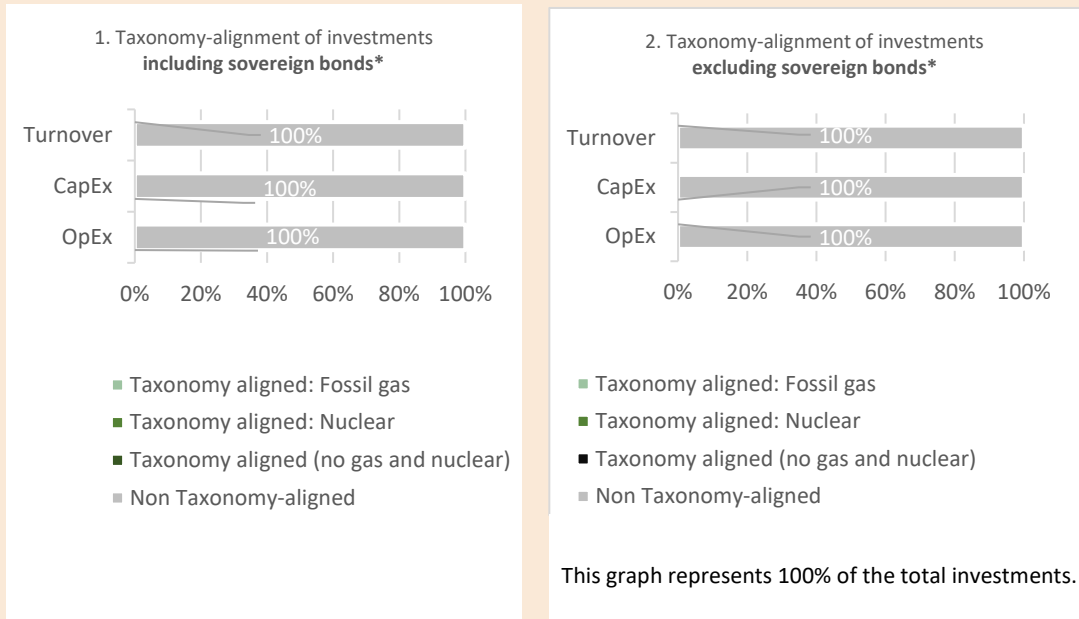

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

56.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 52 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Quality Equities
Legal entity identifier: 2138007QXX6VPXTZMR14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2407 agenda items at 188 shareholders' meetings.
2. The portfolio contained on average 0.41% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 67.84%, 96.73% and 78.83% better than the general market index.
5. The sub-fund's weighted average ESG score was 19.55 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.05% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.13% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 21.8 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 76.04%, 96.73% and 78.83% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM QI Global SDG & Climate Conservative Equities

Legal entity identifier: 213800BVPSWSGDFYVC36

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 61.4%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 37.3%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 24.2% better than as of 31 December 2021. Both at the start and at the end of the reporting period, the carbon footprint was better than MSCI All Country World Climate Paris Aligned Benchmark.

91.9% of the investments of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs).

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 2259 agenda items at 167 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 1.88% better than the MSCI All Country World Climate Paris Aligned Benchmark.
5. The Sub-fund's weighted score for the carbon (scope level 1, 2 and 3), water and waste footprint were respectively 76.09%, 97.70% and 73.82% better than the general market index.
6. The sub-fund's weighted average ESG score was 18.72 against 21.90 for the general market index.
7. 0.00% of the companies held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.
8. "

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI All Country World Climate Paris Aligned Benchmark and investments with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

Sustainability disclosures (unaudited)

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4.

Sustainability disclosures (unaudited)

Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.25% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark

Sustainability disclosures (unaudited)

- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.89% of the net assets, compared to 8.90% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.32% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 104.2 tCO₂ per million EUR, compared to 106.2 tCO₂ per million EUR for the MSCI All Country World Climate Paris Aligned Benchmark.
 - Water and waste indicators (PAI 8-9, Table 1). The scores for water and waste were respectively 98.6% and 65.7% better than the general market index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 9 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - All indicators related to Climate and other environment-related indicators (PAI 1-13, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Merck & Co Inc	Pharmaceuticals	1.96%	United States
Novartis AG	Pharmaceuticals	1.77%	Switzerland

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

61.4%. This concerns investments that are either part of the MSCI All Country World Climate Paris Aligned Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

37.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Paris Aligned Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 1.88% better than the MSCI All Country World Climate Paris Aligned Benchmark.

● How did this financial product perform compared with the reference benchmark?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Conservative Equities	18.7	91.9%	104.2
MSCI All Country World Climate Paris Aligned Index	20.2	75.4%	106.2

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Conservative Equities	18.7	91.9%	104.2
MSCI All Country World Index	21.9	64.2%	436.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Enhanced Index Equities
Legal entity identifier: 213800W6NOMU3QTJAP16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.2% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 5.66%, 15.16% and 28.49% better than the general market index.
4. The sub-fund's weighted average ESG score was 21.23 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.71% of the net assets, compared to 5.12% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 9.45% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.02% of the net assets, compared to 0.24% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 52.3 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 1.07%, 15.16% and 28.49% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 91 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 18 cases. PAI 2, table 1: Carbon footprint 18 cases. PAI 3, table 1: GHG intensity of investee companies 18 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 18 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 18 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 18 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 3 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 2 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 2 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	4.53	United States
Microsoft Corp	Software	3.56	United States
Amazon.com Inc	Internet & Direct Marketing Retail	1.96	United States
Alphabet Inc (Class A)	Interactive Media & Services	1.42	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 91 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Emerging Stars Equities
Legal entity identifier: 2138000ZKXE3LA1XDP06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 80.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 820 agenda items at 81 shareholders' meetings.
2. The portfolio contained on average 4.73% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 73.58%, 90.23% and 91.67% better than the general market index.
6. The sub-fund's weighted average ESG score was 21.23 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable

Sustainability disclosures (unaudited)

investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the

Sustainability disclosures (unaudited)

following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.88% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.04% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

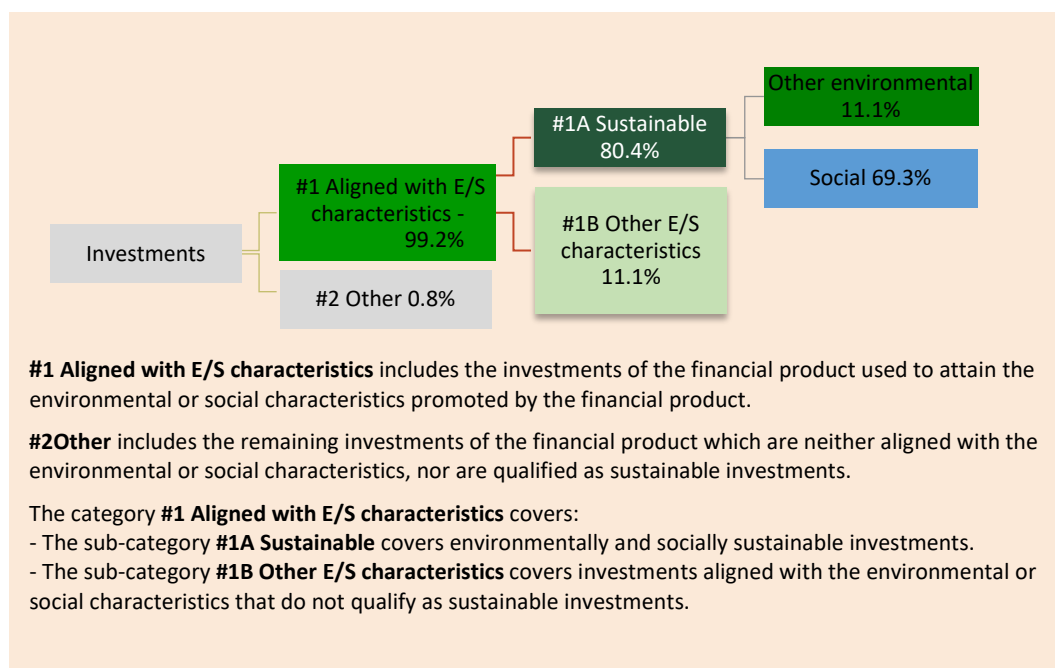

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	7.63	Taiwan

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

11.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

69.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Sustainable Enhanced Index Equities

Legal entity identifier: 213800F1WPR2PVBY1880

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
5. The sub-fund's weighted average ESG score was at least 10% better than that of the general market index.
6. The sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 9052 agenda items at 891 shareholders' meetings.
2. The portfolio contained on average 11.05% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 38.46%, 42.81% and 26.12% better than the general market index.
5. The sub-fund's weighted average ESG score was 22.48 against 25.23 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable

Sustainability disclosures (unaudited)

investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the

Sustainability disclosures (unaudited)

following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.16% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.08% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.23% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 101.7 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 71.94%, 42.81% and 26.12% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 25 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

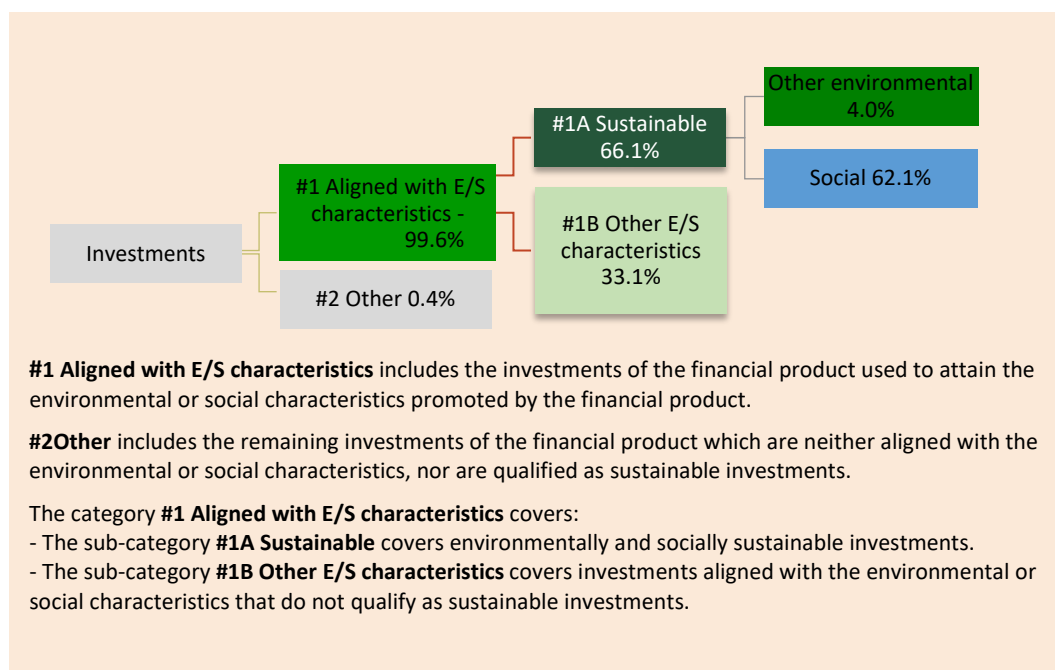

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	6.18	Taiwan

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

62.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 25 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Equities

Legal entity identifier: 213800NVKQZ68I4DWL83

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 8.8%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 87.1%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

100% of the companies in portfolio held a medium or high positive SDG score (+2 or +3) based on the internally developed SDG framework. 95.9% of the assets of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs). The average SDG score of the portfolio was 2.0361.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 769 agenda items at 48 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.

Sustainability disclosures (unaudited)

3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00% of the companies held a medium or high positive SDG score (+2 or +3) based on the internally developed SDG framework.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and

Sustainability disclosures (unaudited)

Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.

- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 2.0361.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	4.95%	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

8.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

87.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Engagement Equities
Legal entity identifier: 2138007Y9W8ZMOEUOL93

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.6% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund actively engaged with 100% of the corporate holdings in the portfolio, typically for a period of 3 to 5 years. The engagement trajectories are assessed annually, considering the progress of pre-determined objectives that focus on contributing to specific sub targets of the SDGs. Once the company in scope falls out of the universe as a result of (a) a successful engagement (resulting in

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

SDG scores of +2, +3) or (b) an unsuccessful engagement, then a selling strategy will be designed for divestment.

3. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
4. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
5. The sub-fund was solely invested in companies that hold a -1, 0 (zero) or positive SDG score. The Sub-fund excludes all high or medium negative SDG scores (-3 or -2) and all high or medium positive SDG scores (+3 or +2) based on the internally developed SDG Framework.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 699 agenda items at 44 shareholders' meetings.
2. The Sub-fund actively engaged with 100% of the corporate holdings in the portfolio, typically for a period of 3 to 5 years. The engagement trajectories are assessed annually, considering the progress of pre-determined objectives that focus on contributing to specific sub targets of the SDGs. Once the company in scope falls out of the universe as a result of (a) a successful engagement (resulting in SDG scores of +2, +3) or (b) an unsuccessful engagement, then a selling strategy will be designed for divestment.
3. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
4. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
5. 100.00% of the companies (on average) held a SDG score of -1, 0 (zero) or +1 based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons

Sustainability disclosures (unaudited)

that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.5% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.84% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.59% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 36 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	5.67	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

57.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 36 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM QI Global SDG & Climate Beta Equities

Legal entity identifier: 213800PTYQMOZRCQMR91

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** 77.5%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 21.2%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 23.9% better than as of 31 December 2021. Both at the start and at the end of the reporting period, the carbon footprint was better than the MSCI All Country World Climate Paris Aligned Benchmark.

84.2% of the investments of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs).

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 21 agenda items at 3 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 1.5% better than the MSCI All Country World Climate Paris Aligned Benchmark.
5. The Sub-fund's weighted score for the carbon (scope level 1, 2 and 3), water and waste footprint were respectively 76.00%, 75.27% and 26.94% better than the general market index.
6. The sub-fund's weighted average ESG score was 19.51 against 21.90 for the general market index.
7. 0.00% of the companies held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI All Country World Climate Paris Aligned Benchmark and investments with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

Sustainability disclosures (unaudited)

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4.

Sustainability disclosures (unaudited)

Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered: Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.64% of the net assets, compared to 4.98% of the benchmark

Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark

Sustainability disclosures (unaudited)

Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 4.6% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark

- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 104.6 tCO₂ per million EUR, compared to 106.2 tCO₂ per million EUR for the MSCI All Country World Climate Paris Aligned Benchmark.
 - Water and waste indicators (PAI 8-9, Table 1). The scores for water and waste were respectively 85.3% and 4.8% better than the general market index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 74 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 5 cases. PAI 13, table 1: Board gender diversity 5 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

77.5%. This concerns investments that are either part of the MSCI All Country World Paris Aligned Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

21.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Paris Aligned Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 1.50% better than the Paris Aligned Benchmark.

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Beta Equities	19.5	84.2	104.6
MSCI All Country World Climate Paris Aligned Index	20.2	75.4%	106.2

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Beta Equities	19.5	84.2	104.6
MSCI All Country World Index	21.9	64.2%	436.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Quantum Equities
Legal entity identifier: 2138009S4X65QC6GSJ11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The sub-fund was launched in November 2022, so no votes were casted on behalf of the sub-fund yet.
2. The portfolio contained on average 0.07% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 21.16%, 53.91% and 4.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.05 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.03% of the net assets, compared to 5.65% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 10.44% of the net assets, compared to 9.6% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.35% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 43.7 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -8.73%, 53.91% and 4.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 36 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 10 cases. PAI 2, table 1: Carbon footprint 10 cases. PAI 3, table 1: GHG intensity of investee companies 10 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 10 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 10 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 10 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	4.55	United States
Microsoft Corp	Software	3.82	United States

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 36 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Asia-Pacific Equities
Legal entity identifier: 213800R6QI6SB393PI50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.6% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1087 agenda items at 108 shareholders' meetings.
2. The portfolio contained on average 0.09% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 3.48% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.53% of the net assets, compared to 2.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.11% of the net assets, compared to 0.56% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.24% of the net assets, compared to 4.56% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.11% of the net assets, compared to 0.67% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.3 compared to 0.3 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

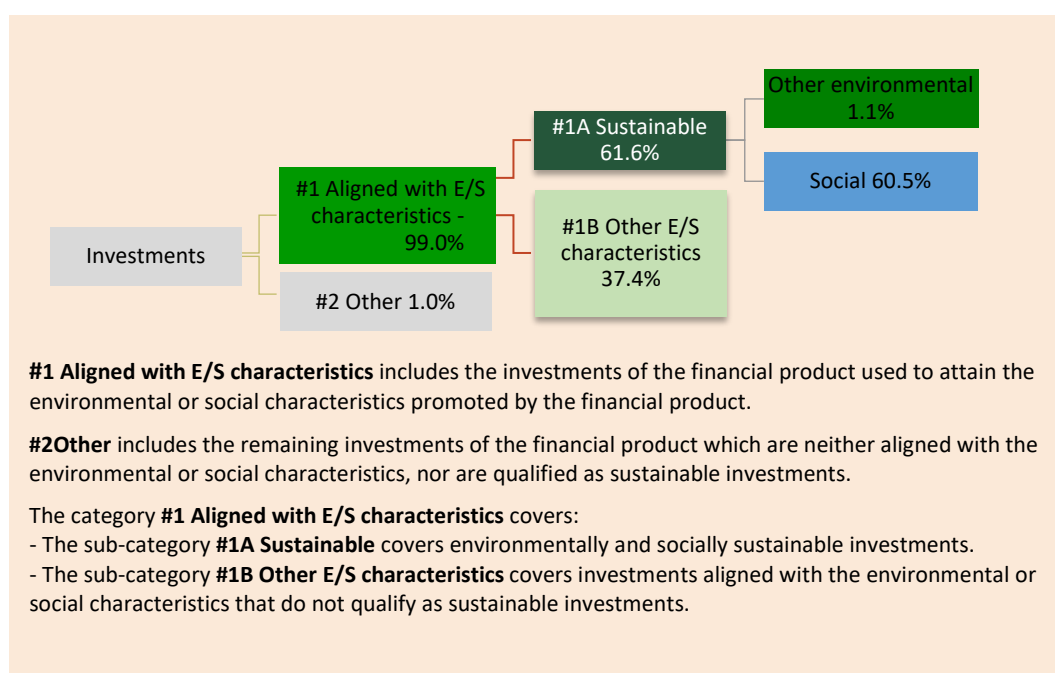

Largest investments	Sector	% Assets	Country
Samsung Electronics Co Ltd	Technology Hardware, Storage & Peripherals	3.71	South Korea

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

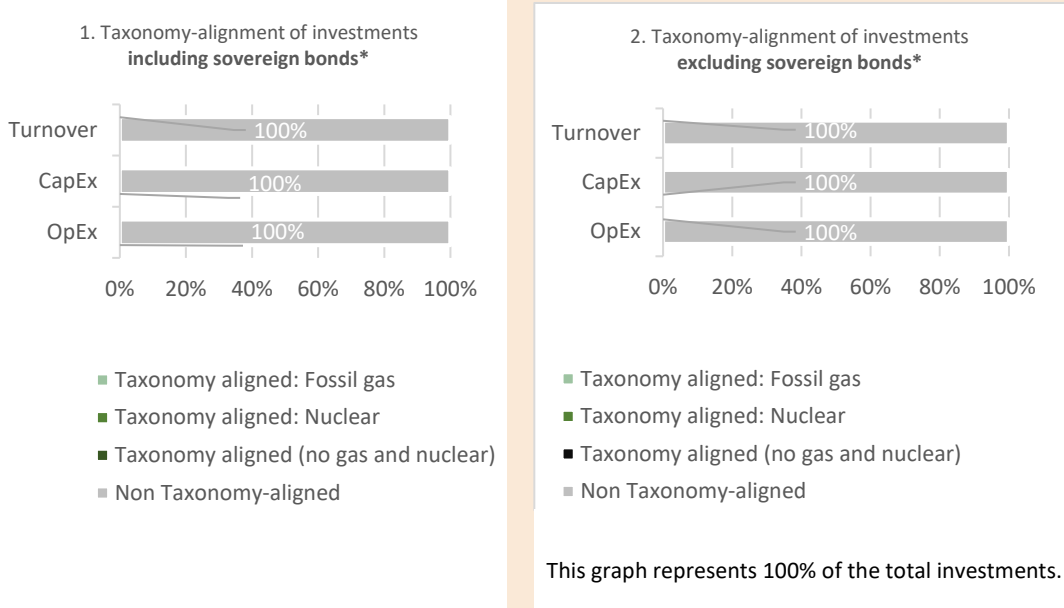

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable European Stars Equities
Legal entity identifier: 21380089E1HSI8JRUS47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.
7. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 786 agenda items at 36 shareholders' meetings.
2. The portfolio contained on average 0.26% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 65.54%, 87.48% and 85.06% better than the general market index.
6. The sub-fund's weighted average ESG score was 17.21 against 20.43 for the general market index.
7. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons

Sustainability disclosures (unaudited)

that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.75% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.27% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.49% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.7 compared to 0.7 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI European Conservative Equities
Legal entity identifier: 2138001XRMBVMGLO9954

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2239 agenda items at 128 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.03%, 62.62% and 67.30% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.32 against 20.43 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 8.45% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 14.45% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.35% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 62.5 tCO₂ per million EUR, compared to 71.9 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 10.61%, 62.62% and 67.3% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Average exposure in % over the reporting period

1.41

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI US Conservative Equities
Legal entity identifier: 549300LR6OB223QXB617

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1425 agenda items at 103 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 3.62%, 85.19% and 32.79% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.80 against 21.62 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.24% of the net assets, compared to 5.27% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 8.09% of the net assets, compared to 8.22% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 2.13% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 46.2 tCO₂ per million EUR, compared to 48 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 1.54%, 85.19% and 32.79% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 15 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

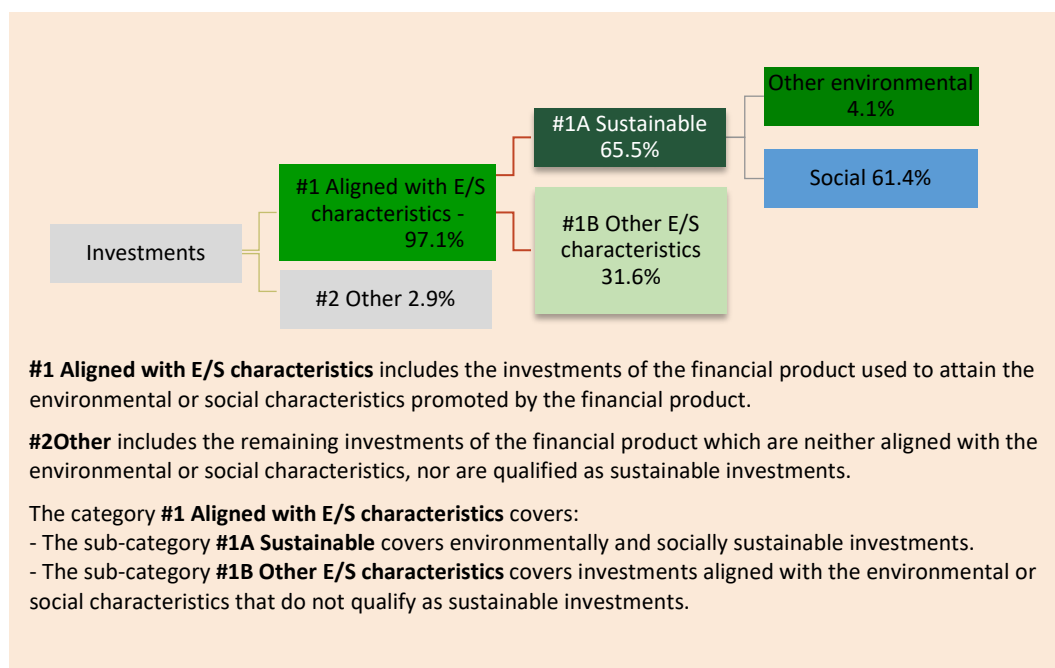

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	3.18	United States
Merck & Co Inc	Pharmaceuticals	2.70	United States
PepsiCo Inc	Beverages	2.65	United States
Johnson & Johnson	Pharmaceuticals	2.64	United States
Pfizer Inc	Pharmaceuticals	2.49	United States
Procter & Gamble Co/The	Household Products	2.47	United States
Royal Bank of Canada	Banks	2.38	Canada

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 15 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Premium Equities
Legal entity identifier: 213800NHT998V29TM914

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.8% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1947 agenda items at 138 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 2.02% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 58.48% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.68% of the net assets, compared to 7.86% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 8.88% of the net assets, compared to 9.15% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.56% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

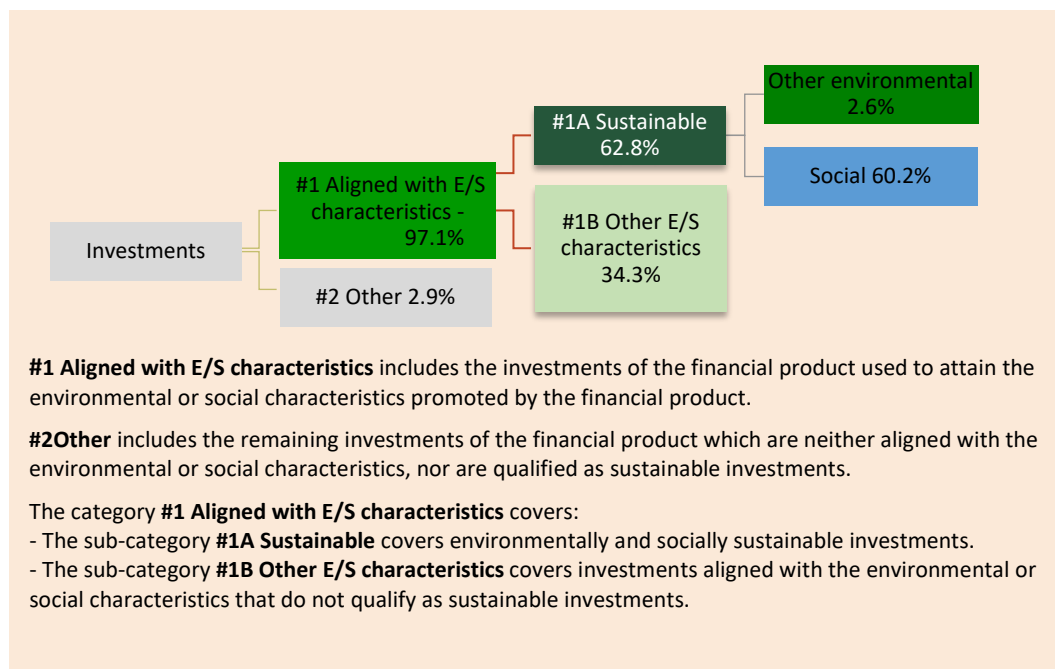

Largest investments	Sector	% Assets	Country
Johnson & Johnson	Pharmaceuticals	3.27	United States
AbbVie Inc	Biotechnology	2.10	United States

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 50% better than the benchmark.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Chinese Equities
Legal entity identifier: 213800TJUGS6VH4REL60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 905 agenda items at 81 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 4.28% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.45% of the net assets, compared to 2.23% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.2% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.08% of the net assets, compared to 0.09% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

- **What was the share of investments made in transitional and enabling activities?**

0%.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

3.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

- **What was the share of socially sustainable investments?**

61.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 6 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Indian Equities
Legal entity identifier: 213800F2XL8JYTUE403

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 693 agenda items at 124 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 7.03% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.32% of the net assets, compared to 7.53% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.63% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.12% of the net assets, compared to 4.87% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 6.43% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.3 compared to 0.3 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

Sustainability disclosures (unaudited)

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

63.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Asian Stars Equities
Legal entity identifier: 213800G5JUR75POVU193

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 582 agenda items at 66 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 6.34% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.63% of the net assets, compared to 3.07% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 2.78% of the net assets, compared to 0.59% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.55% of the net assets, compared to 1.91% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.05% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Bank Mandiri Persero Tbk PT	Banks	4.86	Indonesia

Hotels, Restaurants & Leisure	0.06
Cash and other instruments	1.11

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Asian Stars Equities
Legal entity identifier: 213800C3QE3BF5TD6K08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 719 agenda items at 75 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 79.99%, 25.62% and 51.86% better than the general market index.
6. The sub-fund's weighted average ESG score was 23.00 against 24.07 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.11% of the net assets, compared to 3.07% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.59% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 1.91% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.13% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.
 -

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Large Cap Equities
Legal entity identifier: 213800JOQ7MWBS9GH642

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1222 agenda items at 82 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.83% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 22.70% better than that of the general market index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 9.75% of the net assets, compared to 7.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.43% of the net assets, compared to 9.73% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.55% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

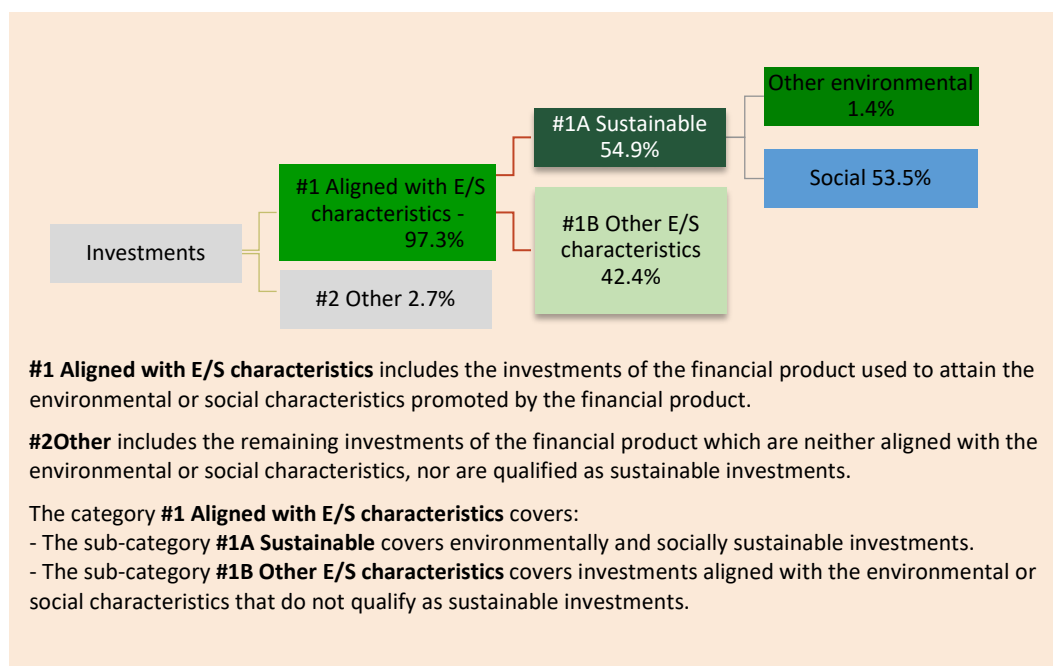

Largest investments	Sector	% Assets	Country
Johnson & Johnson	Pharmaceuticals	4.09	United States

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

53.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Select Opportunities Equities
Legal entity identifier: 213800YIJJ667CDPK983

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1827 agenda items at 141 shareholders' meetings.
2. The portfolio contained on average 0.06% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.67% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 41.59% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 7.81% of the net assets, compared to 7.03% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.95% of the net assets, compared to 1.33% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.4 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

44.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 40% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Chinese A-share Equities
Legal entity identifier: 213800GE9C6GVRJ3AM62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 25% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1579 agenda items at 157 shareholders' meetings.
2. The portfolio contained on average 1.16% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 12.57% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted average ESG score was 31.05 against 32.63 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.81% of the net assets, compared to 2.57% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.64% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.84% of the net assets, compared to 0.27% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

 In fossil gas In nuclear energy

 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

45.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 6838 agenda items at 773 shareholders' meetings.
2. The portfolio contained on average 0.27% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 40.57%, 63.22% and 71.95% better than the general market index.
5. The sub-fund's weighted average ESG score was 31.75 against 32.63 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.59% of the net assets, compared to 2.57% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.57% of the net assets, compared to 0.64% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.48% of the net assets, compared to 0.27% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 107.3 tCO₂ per million EUR, compared to 180.5 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -74.52%, 63.22% and 71.95% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Kweichow Moutai Co Ltd	Beverages	5.37	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

49.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Chinese A-share Conservative Equities
Legal entity identifier: 213800XWLW8UPEKC9R39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.1% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.69% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 37.30%, 2.46% and 66.85% better than the general market index.
4. The sub-fund's weighted average ESG score was 31.40 against 32.63 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via engagement under the engagement program "Responsible Executive Remuneration".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability disclosures (unaudited)

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.48% of the net assets, compared to 2.57% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.45% of the net assets, compared to 0.64% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0.27% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 15076788.03% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 113.2 tCO₂ per million EUR, compared to 180.5 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 100%, 2.46% and 66.85% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

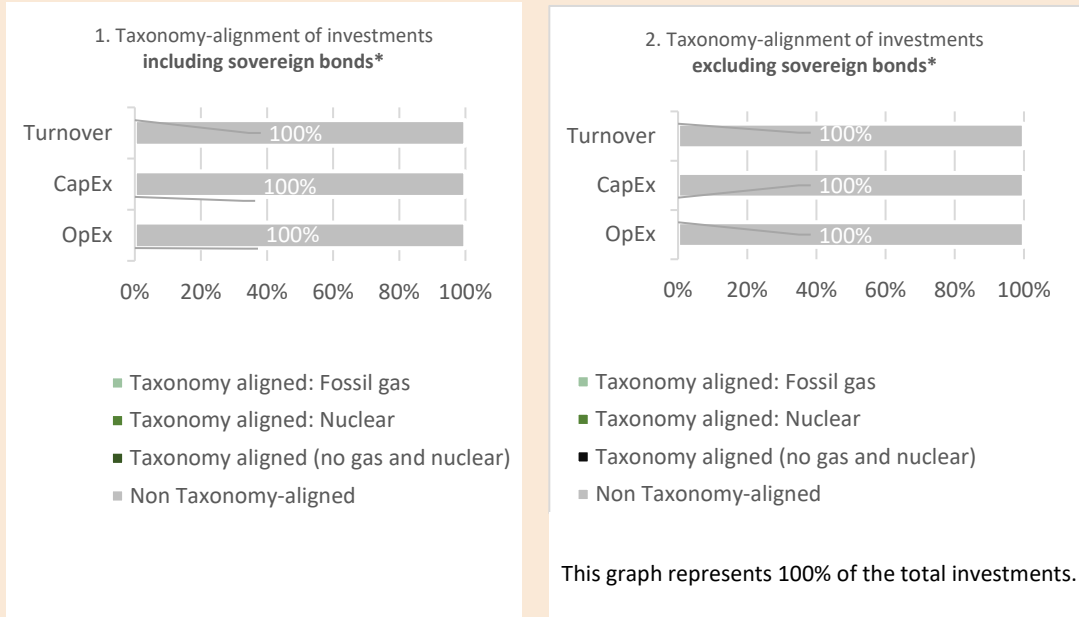

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI European Value Equities
Legal entity identifier: 213800SX488DS47PZG42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 1.09% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 3.93%, 58.43% and 25.94% better than the general market index.
4. The sub-fund's weighted average ESG score was 19.85 against 20.43 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 12.42% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 15.88% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.33% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 69 tCO₂ per million EUR, compared to 71.9 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 1.81%, 58.43% and 25.94% better than the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)

Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 11 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

62.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 11 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds – RobecoSAM QI US Climate Beta Equities

Legal entity identifier: 2138002ROX4K9YH3D187

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** 85.8%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 14.0%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope 1, 2 and 3) as of 31 December 2022 was 3.4% better than MSCI US Climate Paris Aligned Benchmark.

89.9% of the investments of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs).

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainability indicators perform?***

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 3.43% better than the MSCI US Climate Paris Aligned Benchmark.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 85.13%, 90.35% and 51.93% better than the general market index.
5. The sub-fund's weighted average ESG score was 19.12 against 21.61 for the general market index.
6. 0.00% of the companies held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI US Climate Paris Aligned Benchmark and investments with with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of

Sustainability disclosures (unaudited)

- activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global

Sustainability disclosures (unaudited)

Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.33% of the net assets, compared to 4.82% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.78% of the net assets, compared to 8.28% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.58% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:

Sustainability disclosures (unaudited)

- The Carbon footprint (PAI 2, Table 1) of the portfolio was 65.25 tCO₂ per million EUR, compared to 67.57 tCO₂ per million EUR for the MSCI US Climate Paris Aligned Benchmark.
- Water and waste indicators (PAI 8-9, Table 1). The scores for water and waste were respectively 38.42% and 56.90% better than the general market index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 32 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 12, table 1: Unadjusted gender pay gap 4 cases. PAI 13, table 1: Board gender diversity 4 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

■ Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

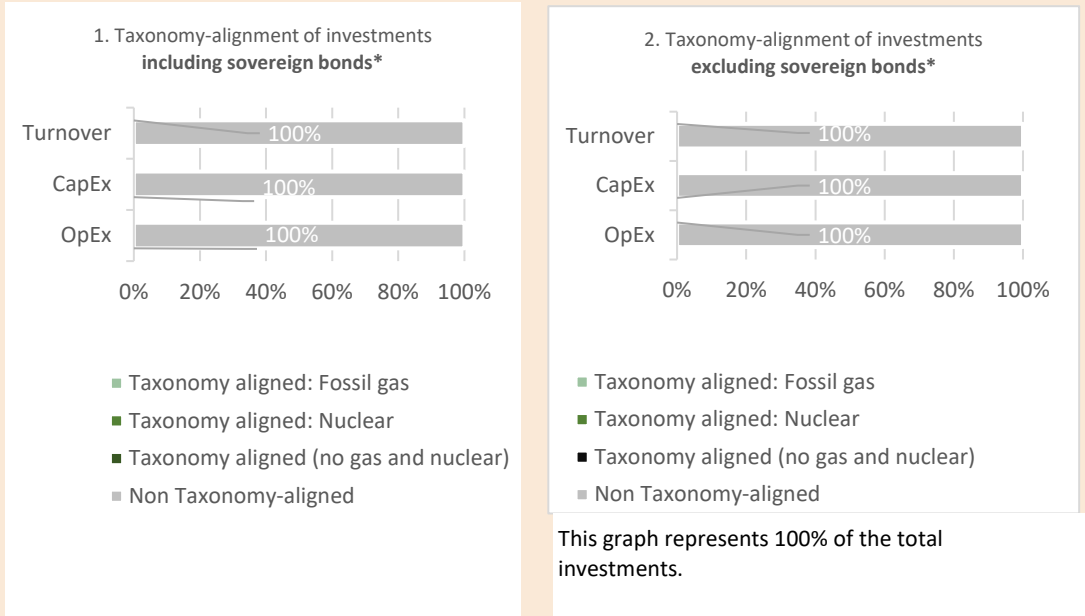

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

85.8%. This concerns investments that are either part of the MSCI US Climate Paris Aligned Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

14.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 32 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the MSCI US Climate Paris Aligned Index.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 77.32% better than the Paris Aligned Benchmark.

● How did this financial product perform compared with the reference benchmark?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM US Climate Beta Equities	19.1	84.7%	65.3
MSCI US Climate Paris Aligned Index	20.1	80.9%	67.7

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM US Climate Beta Equities	19.1	84.7%	65.3

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI European Active Equities
Legal entity identifier: 213800SATZYOKMAPLJ87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 5.95%, 25.31% and 25.53% better than the general market index.
4. The sub-fund's weighted average ESG score was 20.14 against 20.43 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

Sustainability disclosures (unaudited)

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 5.94% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 16.57% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.52% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 67.6 tCO₂ per million EUR, compared to 71.9 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -2.49%, 25.31% and 25.53% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 31 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

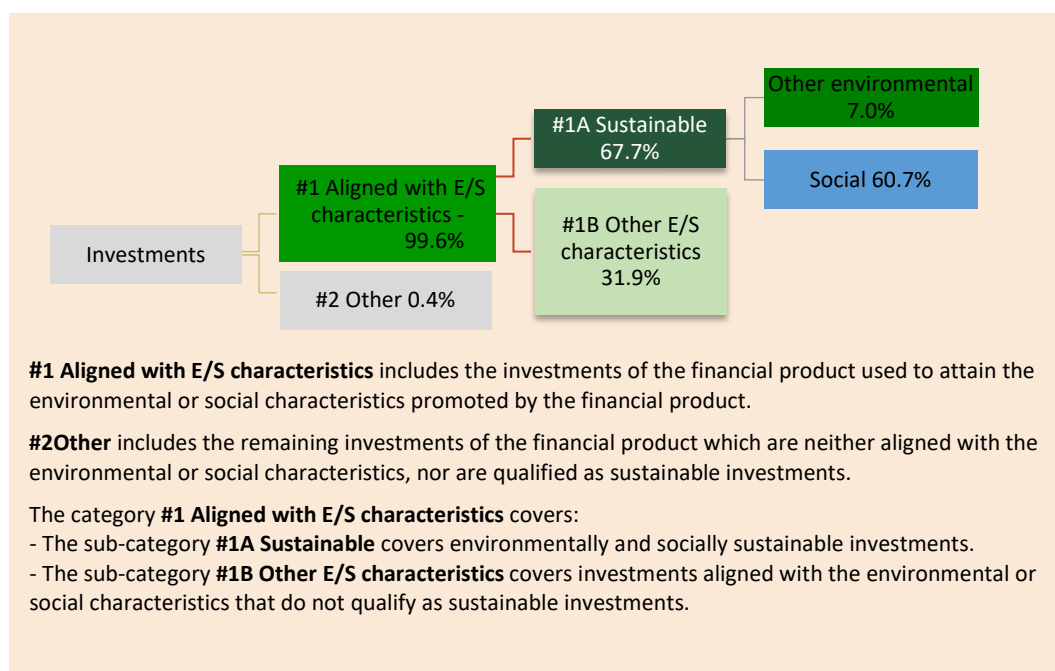

Largest investments	Sector	% Assets	Country
Nestle SA	Food Products	3.46	Switzerland

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 31 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco New World Financials
Legal entity identifier: 213800WE9J7OV8DOET07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 83.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1023 agenda items at 81 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.07% of the net assets, compared to 0.42% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
AIA Group Ltd	Insurance	3.30	Hong Kong
Morgan Stanley	Capital Markets	2.97	United States
S&P Global Inc	Capital Markets	2.66	United States

Thrifts & Mortgage Finance	0.10
Cash and other instruments	0.64

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

83.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Property Equities
Legal entity identifier: 2138003BSHS5NJ9EBX10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 677 agenda items at 58 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 34.80%, 31.66% and 26.93% better than the general market index.
6. The sub-fund's weighted average ESG score was 12.51 against 13.99 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.04% of the net assets, compared to 0.04% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0.74% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.4 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Prologis Inc	Equity Real Estate Investment Trusts (REITs)	6.84	United States
Equinix Inc	Equity Real Estate Investment Trusts (REITs)	5.63	United States
Extra Space Storage Inc	Equity Real Estate Investment Trusts (REITs)	3.75	United States
AvalonBay Communities Inc	Equity Real Estate Investment Trusts (REITs)	3.63	United States
Kimco Realty Corp	Equity Real Estate Investment Trusts (REITs)	3.25	United States
Alexandria Real Estate Equities Inc	Equity Real Estate Investment Trusts (REITs)	3.09	United States

Diversified Telecommunication Services	0.91
IT Services	0.48
Professional Services	0.17
Cash and other instruments	2.92

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

13.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

52.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 2 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Global Consumer Trends
Legal entity identifier: 213800PFG7CLST9A1742

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 603 agenda items at 45 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted average ESG score was 20.32 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.1% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.09% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 16872643.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

71.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco MegaTrends
Legal entity identifier: 2138006ECAW1JTN4V89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 80.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 761 agenda items at 57 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.42% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.93% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.42% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Digital Innovations
Legal entity identifier: 213800WH91CRLWH4AL56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 91.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 679 agenda items at 49 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.41% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.39% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.01% of the net assets, compared to 0.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

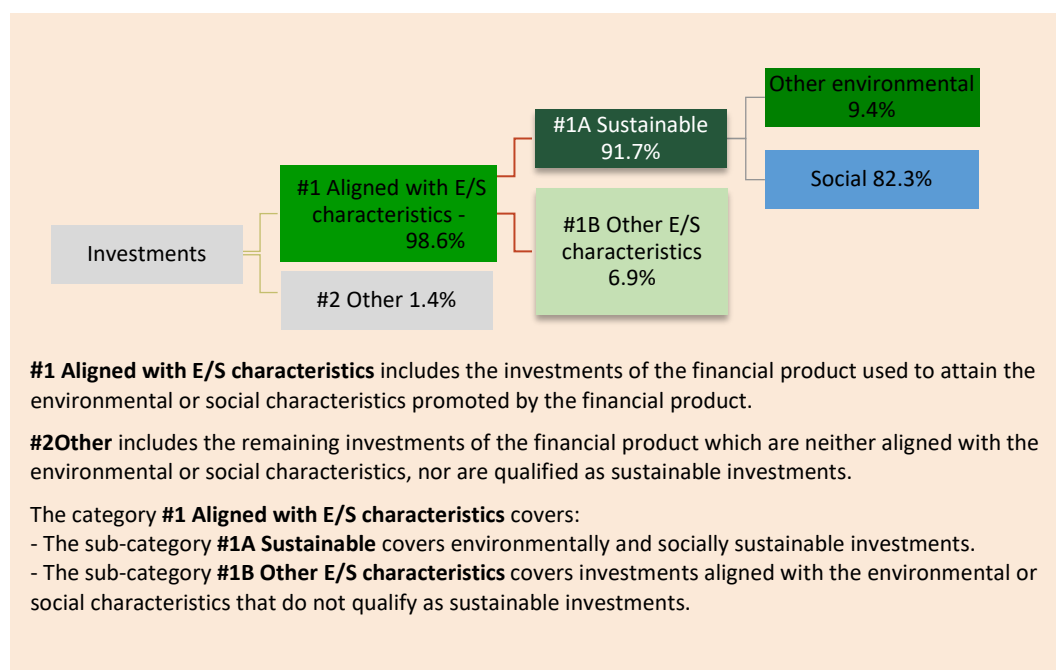

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	3.79	United States
Analog Devices Inc	Semiconductors & Semiconductor Equipment	3.22	United States
Fortinet Inc	Software	3.19	United States
Keysight Technologies Inc	Electronic Equipment, Instruments & Components	3.19	United States
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	3.12	Taiwan
Capgemini SE	IT Services	3.08	France
Palo Alto Networks Inc	Software	3.00	United States
Zebra Technologies Corp	Electronic Equipment, Instruments & Components	2.87	United States
Informa PLC	Media	2.86	United Kingdom
Salesforce Inc	Software	2.70	United States
Emerson Electric Co	Electrical Equipment	2.61	United States
Samsung Electronics Co Ltd	Technology Hardware, Storage & Peripherals	2.57	South Korea
Infineon Technologies AG	Semiconductors & Semiconductor Equipment	2.44	Germany
Siemens AG	Industrial Conglomerates	2.37	Germany
PTC Inc	Software	2.32	United States

What was the proportion of sustainability-related investments?

98.6%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Not applicable	0.00
Other sectors	
Software	28.19
Semiconductors & Semiconductor Equipment	13.47

Electrical Equipment	9.50
IT Services	7.96
Equity Real Estate Investment Trusts (REITs)	5.23
Communications Equipment	3.64
Air Freight & Logistics	2.99
Media	2.86
Technology Hardware, Storage & Peripherals	2.57
Machinery	2.44
Industrial Conglomerates	2.37
Auto Components	1.84
Diversified Telecommunication Services	1.21
Health Care Equipment & Supplies	1.10
Health Care Technology	1.01
Cash and other instruments	1.47

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

82.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco FinTech
Legal entity identifier: 213800XVWPYZAY58YG68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 694 agenda items at 70 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.05% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 4 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

82.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 4 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Circular Economy Equities

Legal entity identifier: 21380076KKDPDXSFG955

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 24.2%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 71.6%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund's sustainable investment objective is: to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy. The sustainable investment objective was attained by mainly investing in companies that advanced the following United Nations Sustainable Development Goals (SDGs): 6 companies in portfolio had a positive score on Zero Hunger (SDG 2), 14 companies in portfolio had a positive score on Good health and well-being (SDG 3), 12 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 23 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 10 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 11 companies in portfolio had a positive score on Responsible consumption and production (SDG 12).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 696 agenda items at 55 shareholders' meetings.
2. The portfolio contained on average 0.68% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and

Sustainability disclosures (unaudited)

Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.5668.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

24.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

Sustainability disclosures (unaudited)

71.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. All investments in the sub-fund had a neutral or positive SDG score based on the internally developed SDG framework.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Smart Energy Equities

Legal entity identifier: 213800XOKIZRP1SLWA28

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 33.8%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 64.1%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund aimed to further the transformation and decarbonization of the global energy sector. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 25 companies in portfolio had a positive score on Affordable and clean energy goal (SDG 7), 18 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 28 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 10 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 14 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 31.6% better than the Custom Bloomberg Climate Transition Benchmark.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 680 agenda items at 56 shareholders' meetings.
2. The portfolio contained on average 0.80% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 31.61% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **"How did the sustainable investments not cause significant harm to any sustainable investment objective?"**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the

Sustainability disclosures (unaudited)

- exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

Sustainability disclosures (unaudited)

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council

Sustainability disclosures (unaudited)

Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.8777.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

Sustainability disclosures (unaudited)

- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 4 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco’s performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
ON Semiconductor Corp	Semiconductors &	4.17%	United States

Cash and other instruments	1.60

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

33.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

64.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 4 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 31.61% better than the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared with the reference benchmark?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Energy Equities	97.9%	505.8
Custom Bloomberg Climate Transition Benchmark	77.0%	739.6

How did this financial product perform compared with the broad market index?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Energy Equities	97.9%	505.8
MSCI World Index	65.1%	437.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Smart Materials Equities

Legal entity identifier: 213800HUVXY434VECO29

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 33.3%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 62.5%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund aim to help mitigate the resource scarcity challenge within industries while supporting economic growth. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 12 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 28 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 16 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11), 12 companies in portfolio had a positive score on Responsible consumption and production (SDG 12) and 9 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 9.3% better than the Custom Bloomberg Climate Transition Benchmark.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 613 agenda items at 52 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 9.33% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of

Sustainability disclosures (unaudited)

- activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global

Sustainability disclosures (unaudited)

Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.891.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period:
PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Onto Innovation Inc	Semiconductors & Software	4.71%	United States
PTC Inc	Software	4.49%	United States
Sociedad Quimica y Minera	Chemicals	3.63%	Chile

TopBuild Corp	Household	2.72%	United States
Cie de Saint-Gobain	Building Products	2.60%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What was the proportion of sustainability-related investments?

95.8%

What was the asset allocation?

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Chemicals	25.71
Semiconductors & Semiconductor Equipment	11.66
Electronic Equipment, Instruments & Components	11.61
Software	9.23
Building Products	7.98
Electrical Equipment	7.04
Metals & Mining	6.44
Commercial Services & Supplies	4.66
Machinery	4.12
Life Sciences Tools & Services	3.62
Distributors	2.94
Household Durables	2.72
Professional Services	0.39
Cash and other instruments	1.87

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

33.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

62.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 9.33% better than the Custom Climate Transition Benchmark.

● How did this financial product perform compared with the reference benchmark?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Materials Equities	95.8%	670.6
Custom Bloomber Climate Transition Benchmark	77.0%	739.6

● How did this financial product perform compared with the broad market index?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Materials Equities	95.8%	670.6
MSCI world index	65.1%	437.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Smart Mobility Equities

Legal entity identifier: 21380025AXSQN7Y4RV82

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** 29.8%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 66.1%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the Sub-fund aim to support the transformation and decarbonization of the global transportation sector. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 14 companies in portfolio had a positive score on Affordable and clean energy goal (SDG 7), 18 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 21 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 12 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 9 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 34.6% better than the Custom Bloomberg Climate Transition Benchmark.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainability indicators perform?***

1. On behalf of the sub-funds votes, were cast on 613 agenda items at 52 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 34.60% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of

Sustainability disclosures (unaudited)

- activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global

Sustainability disclosures (unaudited)

Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.688.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco’s performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
ON Semiconductor Corp	Semiconductors &	4.73%	United States
Sociedad Quimica y Minera	Chemicals	4.56%	Chile
Albemarle Corp	Chemicals	4.37%	United States
Schneider Electric SE	Electrical	3.92%	France
Analog Devices Inc	Semiconductors &	3.86%	United States
NXP Semiconductors NV	Semiconductors &	3.54%	United States
Delta Electronics Inc	Electronic	3.53%	Taiwan

Household Durables	1.07
Oil, Gas & Consumable Fuels	0.23
Cash and other instruments	2.91

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

29.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 5 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 34.60% better than the Custom Bloomberg Climate Transition Benchmark.

● How did this financial product perform compared with the reference benchmark?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Mobility Equities	95.9%	483.7
Custom Bloomberg Climate Transition Benchmark	77.0%	739.6

● How did this financial product perform compared with the broad market index?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Mobility Equities	95.9%	483.7
MSCI world index	65.1%	437.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Sustainable Healthy Living Equities

Legal entity identifier: 213800KMESITUG55WI14

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 18.6%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 77.2%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments contributed to the Sustainable Development Goals, promoting good health and well-being and contributed to an efficient healthcare system. 89.1% of the assets were invested in companies with a positive score on Good Health and Well Being (SDG 3). The financial product did not take into account the EU criteria for environmentally sustainable economic activities. The sub-fund did make sustainable investments with a social objective.

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 621 agenda items at 42 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to

Sustainability disclosures (unaudited)

mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Sustainability disclosures (unaudited)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

"Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.8565.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments **Sector** **% Assets** **Country**

Largest investments	Sector	% Assets	Country
UnitedHealth Group Inc	Health Care	4.04%	United States
Boston Scientific Corp	Health Care	4.04%	United States
CVS Health Corp	Health Care	3.68%	United States
Alcon Inc	Health Care	3.47%	Switzerland
Roche Holding AG	Pharmaceuticals	3.30%	Switzerland

Specialty Retail	0.26
Cash and other instruments	3.32

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

18.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

77.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. All investments in the sub-fund had a neutral or positive SDG score based on the internally developed SDG framework.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Sustainable Water Equities

Legal entity identifier: 2138006TSIFH5ZD97319

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 14.0%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 75.9%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund helped to mitigate the global challenges related to scarcity, quality, and allocation of water. The sustainable investment objective is attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 13 companies in portfolio had a positive score on Good health and well-being (SDG 3), 31 companies in portfolio had a positive score on Clean water and sanitation (SDG 6), 36 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 25 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 13 companies in portfolio had a positive score on Responsible consumption and production (SDG 12), and 7 companies in portfolio had a positive score on Life below water (SDG 14).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainability indicators perform?***

1. On behalf of the sub-funds votes, were cast on 959 agenda items at 75 shareholders' meetings.
2. The portfolio contained on average 1.87% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and

Sustainability disclosures (unaudited)

exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.

Sustainability disclosures (unaudited)

- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.7426.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:

At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were

Sustainability disclosures (unaudited)

active on portfolio holdings, during the reporting period: PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Avantor Inc	Life Sciences Tools	4.67%	United States
Thermo Fisher Scientific Inc	Life Sciences Tools	4.55%	United States
Danaher Corp	Life Sciences Tools	4.29%	United States
PerkinElmer Inc	Life Sciences Tools	4.15%	United States
Pentair PLC	Machinery	3.87%	United States
Geberit AG	Building Products	3.53%	Switzerland
A O Smith Corp	Building Products	3.44%	United States
Ecolab Inc	Chemicals	3.05%	United States
Agilent Technologies Inc	Life Sciences Tools	2.60%	United States
Veolia Environnement SA	Multi-Utilities	2.52%	France
Ferguson PLC	Trading Companies	2.14%	United Kingdom
Haier Smart Home Co Ltd	Household	1.89%	China
International Flavors & Guangdong Investment Ltd	Chemicals	1.87%	United States
Masco Corp	Water Utilities	1.87%	China
	Building Products	1.84%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What was the proportion of sustainability-related investments?

97.2%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sector	Average exposure in % over the reporting period
Life Sciences Tools & Services	21.88
Machinery	17.82
Building Products	15.50
Chemicals	10.60
Water Utilities	5.23
Household Durables	4.44
Construction & Engineering	4.15
Software	3.92
Trading Companies & Distributors	3.88
Electronic Equipment, Instruments & Components	2.80
Multi-Utilities	2.52
Commercial Services & Supplies	2.29
Professional Services	2.18
Distributors	0.78
Specialty Retail	0.48
Internet & Direct Marketing Retail	0.06
Cash and other instruments	1.47

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

14.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

75.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments with a neutral scores under Robeco’s proprietary SDG Framework and the use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global Gender Equality Equities
Legal entity identifier: 213800FAEA843S2ACV24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 90.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund invested a minimum of 66.7% in companies with a Gender Equality score of 50 or higher.
3. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

4. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.
5. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
6. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 882 agenda items at 53 shareholders' meetings.
2. The sub-fund invested 15.09% of its assets in companies with a Gender Equality score of 50 or higher.
3. The portfolio contained on average 1.64% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. 97.07 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
6. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.22% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.2% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 15.2 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 35.05%, 88.99% and 95.06% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 24 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

85.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 24 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Next Digital Billion
Legal entity identifier: 213800MRQK7VNZMYS210

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 409 agenda items at 48 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 4.83% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.04% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.01% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 35.2%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 60.3%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund supported the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce Biodiversity threats or restore natural habitats. The foregoing is implemented by mainly invested in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): 21 companies in portfolio had a positive score on Good health and well-being (SDG 3), 10 companies in portfolio had a positive score on Industry, Innovation and infrastructure (SDG 9), 13 companies in portfolio had a positive score on Responsible consumption and production (SDG 12), 11 companies in portfolio had a positive score on Life below water (SDG 14) and 12 companies in portfolio had a positive score on Life on Land (SDG 15).

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

● **How did the sustainability indicators perform?**

1. The sub-fund was launched in November 2022, so no votes were casted on behalf of the sub-fund yet.
2. The sub-fund engaged with 28.57% of the holdings in portfolio
3. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. 99.01 % of the assets were invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and

Sustainability disclosures (unaudited)

Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.4961.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 9 cases. PAI 8,

Sustainability disclosures (unaudited)

table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
AECOM	Construction &	5.10%	United States
Unilever PLC	Personal Products	5.05%	United Kingdom
Kering SA	Textiles, Apparel &	4.99%	France
Kimberly-Clark Corp	Household	4.46%	United States
Leroy Seafood Group ASA	Food Products	4.07%	Norway
Takuma Co Ltd	Machinery	4.04%	Japan
Darling Ingredients Inc	Food Products	4.03%	United States
Sika AG	Chemicals	3.87%	Switzerland
Axfood AB	Food & Staples	3.27%	Sweden
Beiersdorf AG	Personal Products	3.25%	Germany
Waters Corp	Life Sciences Tools	3.08%	United States
Veolia Environnement SA	Multi-Utilities	2.98%	France
Danone SA	Food Products	2.89%	France
Colgate-Palmolive Co	Household	2.87%	United States
Valmont Industries Inc	Construction &	2.84%	United States

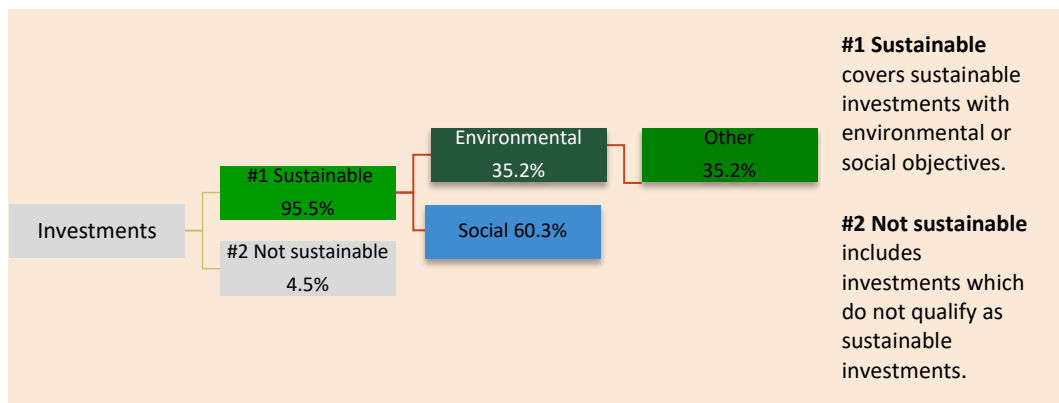

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

95.5%

What was the asset allocation?

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Food Products	22.12
Personal Products	12.01
Construction & Engineering	8.97
Household Products	7.96
Machinery	7.27
Textiles, Apparel & Luxury Goods	6.76
Chemicals	6.48
Life Sciences Tools & Services	4.54
Commercial Services & Supplies	4.33
Food & Staples Retailing	4.26

Auto Components	1.95
Multiline Retail	1.12
Containers & Packaging	1.05
Cash and other instruments	3.57

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

35.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Net Zero 2050 Climate Equities

Legal entity identifier: 213800T59KJ3I92BUA65

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 81.6%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 14.1%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 0.6% better than the MSCI World Climate Change Index.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 75 agenda items at 6 shareholders' meetings.
2. The sub-fund invested 91.20% of its assets in companies with an established Net Zero target by 2050 or earlier.
3. The portfolio contained on average 1.48% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 0.60% better than that of the MSCI World Climate Change Index.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI World Climate Change Benchmark and investments with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste.

Sustainability disclosures (unaudited)

When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear

Sustainability disclosures (unaudited)

weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.83% of the net assets, compared to 1.28% of the broad market index.
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.04% of the broad market index.
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 4.27% of the net assets, compared to 8.14% of the broad market index. The consideration of this PAI is currently restricted to applying exclusions to palm oil

Sustainability disclosures (unaudited)

producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the broad market index.
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 141.1 tCO₂ per million EUR, compared to 141.9 tCO₂ per million EUR for the MSCI World Climate Change Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

81.6%. This concerns investments that are either part of the MSCI World Climate Change Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

14.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Paris Aligned Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 0.6% better than the MSCI World Climate Change Index.

How did this financial product perform compared with the reference benchmark?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Net Zero 2050 Climate Equities	18.6	91.4%	141.1
MSCI World Climate Change Index	20.0	74.5%	141.9

How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Net Zero 2050 Climate Equities	18.6	91.4%	141.1
MSCI world index (net return in EUR)	21.5	65.1%	403.4

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco High Yield Bonds
Legal entity identifier: 21380044N3COGER50K12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.2% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 4.88% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 4.87% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 10.47% of the net assets, compared to 11.49% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.42% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.61% of the net assets, compared to 2.41% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.03% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes: In fossil gas In nuclear energy

No

Average exposure in % over the reporting period

0.17

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

43.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 4.87% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Global Credits
Legal entity identifier: 5493003I7YFQHV1J8E29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.84% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 11.47% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.1% of the net assets, compared to 6.87% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.22% of the net assets, compared to 4.48% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.25% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 29 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

63.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 11.47% of the assets were invested in green bonds.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor Credits
Legal entity identifier: 2138004NM2KLQ7YMDZ55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 12.43%, 66.11% and 79.10% better than the general market index.
4. The sub-fund's weighted average ESG score was 22.59 against 22.94 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 16.66% of the net assets, compared to 6.87% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.04% of the net assets, compared to 4.48% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:

Sustainability disclosures (unaudited)

- All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
- Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 18 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

99.5%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	17.14
Natural Gas	0.48
Other sectors	
Consumer Non Cyclical	17.43
Banking	15.73
Technology	8.67
Consumer Cyclical	8.54
Insurance	7.04
Communications	6.92
Owned No Guarantee	4.06
Basic Industry	3.00
Capital Goods	2.81
Transportation	2.59
Electric	1.09
Utility Other	0.63
Brokerage, Asset Managers, Exchanges	0.41
Industrial Other	0.25
Cash and other instruments	3.20

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

58.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 18 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor Bonds
Legal entity identifier: 2138009INGIOSX2F6B58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 18.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The sub-fund's weighted carbon emissions per capita of the government bonds in portfolio was better than that of the government bonds in the general market index.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score of corporate bonds in the portfolio was better than those of corporate bonds in the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.
7. The sub-fund's weighted average Country Sustainability Ranking was better than the average ranking of the index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted carbon emissions per capita of the government bonds in portfolio was 22.42% better than that of the government bonds in the general market index.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 22.42%, 85.99% and 11.18% better than the corporate bonds in the general market index.
6. The sub-fund's weighted average ESG score was 22.48 against 22.05 for the general market index.
7. The sub-fund's weighted average Country Sustainability Ranking was 7.51 against 7.02 for the average ranking of the index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy,

Sustainability disclosures (unaudited)

society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Sustainability disclosures (unaudited)

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 15.35% of the net assets, compared to 4.71% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.14% of the benchmark

Sustainability disclosures (unaudited)

- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.84% of the net assets, compared to 3.4% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.16% of the benchmark
- Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Utility Other	0.28
Brokerage, Asset Managers, Exchanges	0.11
Financial Other	0.04
Cash and other instruments	6.59

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

16.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Global Credits - Short Maturity
Legal entity identifier: 2138001CC7H5L9AYFW22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 8.69% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.54% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.02% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.37% of the net assets, compared to 3.61% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.2% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

68.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 8.69% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Corporate Hybrid Bonds
Legal entity identifier: 213800KXAXX8MJC82S52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 1.25% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 7.50% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 20.69% of the net assets, compared to 19.61% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 34.14% of the net assets, compared to 24.43% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
5.625 BHP BILLITON FINANCE LTD 22-OCT-2079	Basic Industry	3.31	Australia
3.250 ENGIE SA (Perp)	Natural Gas	3.24	France
4.800 NEXTERA ENERGY CAPITAL 01-DEC-2077	Electric	3.08	United States
3.375 ENI SPA (Perp)	Energy	2.96	Italy
5.000 ORANGE SA (Perp)	Communications	2.58	France
1.874 IBERDROLA INTL BV (Perp)	Electric	2.54	Spain
1.875 ENEL SPA (Perp)	Electric	2.47	Italy

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.1%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	19.03
Natural Gas	4.76
Other sectors	
Electric	18.29
Communications	9.82
Consumer Non Cyclical	8.61
Treasuries	7.99
Owned No Guarantee	7.10
Consumer Cyclical	6.31
Basic Industry	5.59
Banking	2.96
Industrial Other	2.42
Insurance	1.20
Local Authorities	0.92
Cash and other instruments	5.01

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

- **What was the share of investments made in transitional and enabling activities?**

0%.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

13.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

- **What was the share of socially sustainable investments?**

36.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 2 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 7.50% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor High Yield
Legal entity identifier: 213800AQVRERU8HLMD03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.9% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 22.89%, 38.18% and 70.29% better than the general market index.
4. The sub-fund's weighted average ESG score was 23.89 against 26.11 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 18.65% of the net assets, compared to 11.85% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.41% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.98% of the net assets, compared to 3.26% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:

Sustainability disclosures (unaudited)

- The Carbon footprint (PAI 2, Table 1) of the portfolio was 118.5 tCO₂ per million EUR, compared to 153.7 tCO₂ per million EUR for the benchmark.
- Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 69.87%, 38.18% and 70.29% better than the benchmark.
- Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Communications	14.58
Consumer Non Cyclical	9.09
Basic Industry	8.80
Capital Goods	7.97
Technology	7.11
Transportation	3.72
Electric	2.90
Industrial Other	2.51
Owned No Guarantee	0.04
Cash and other instruments	3.40

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

42.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM SDG Credit Income
Legal entity identifier: 213800T791CO7EB3NL58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.7% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.49% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 90.74 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 6.80% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.2418.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 11 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.9%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Natural Gas	0.08
Energy	0.05
Other sectors	
Banking	28.03
Insurance	17.97
Basic Industry	10.44
Communications	8.28
Consumer Cyclical	5.39
Capital Goods	5.30
Treasuries	4.28
Owned No Guarantee	3.15
Technology	3.02
Consumer Non Cyclical	2.72
Financial Other	1.44
Supranational	1.27
Transportation	1.20
Electric	1.04
REITS	0.97
Non-Agency CMBS	0.16
Cash and other instruments	5.22

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

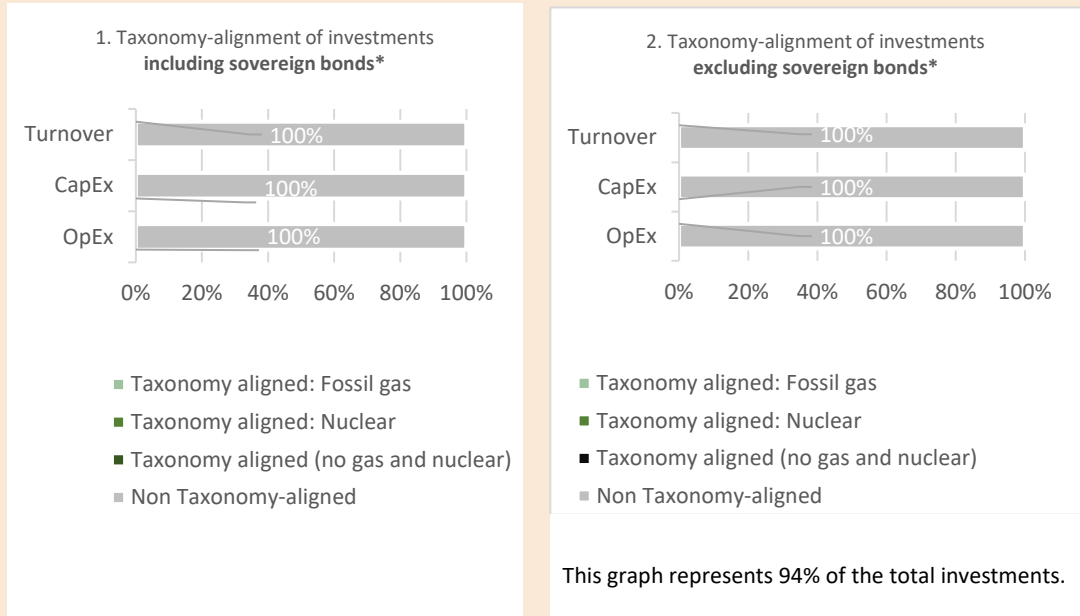

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 11 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 6.80% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Credits
Legal entity identifier: 213800CKSU373L6J3U62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.4% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 1.76% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 92.40 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 13.52% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.2383.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 21 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- ✗ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

70.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 21 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 13.52% of the assets were invested in green bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM SDG High Yield Bonds
Legal entity identifier: 2138004EB4XIM39VFW48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.95% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 100.00 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 5.51% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.1509.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets Country
TENET HEALTHCARE CORP	Consumer Non Cyclical	0.92 United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 6 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 5.51% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds – RobecoSAM Global Green Bonds

Legal entity identifier: 213800TZF6IC5ZUI3146

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 92.6%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 1.8%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sub-fund invested 94.4% of its asset in green bonds, social bond, sustainable bonds and sustainability linke bonds. With this investments, the sub-fund contributed to environmental goals.

● **How did the sustainability indicators perform?**

1. The portfolio contained on average 4.42% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.

Sustainability disclosures (unaudited)

2. The sub-fund invested 90.15% of its assets in green bonds, social bond, sustainable bonds and sustainability linked bonds.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments that are either Green, Social or Sustainable Bonds, significant harm is avoided by the application of Green Bonds Principles. For a large share of Green, Social and Sustainable bonds, Robeco adds an extra assessment on sustainability factors by applying Robeco's Green Bonds Framework or Social Bond Framework. Via these frameworks, the following adverse impacts were directly considered:

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

Furthermore, post investment, the following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant

Sustainability disclosures (unaudited)

negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Pre-investment, green, social and sustainable bonds were assessed via Robeco's Green Bond Framework and Social Framework, as well as via Robeco's SDG Framework. These Framework directly and indirectly assess PAI indicators. The percentage green, social and sustainability linked bonds in portfolio was 90.15%.
- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3942.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-13, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

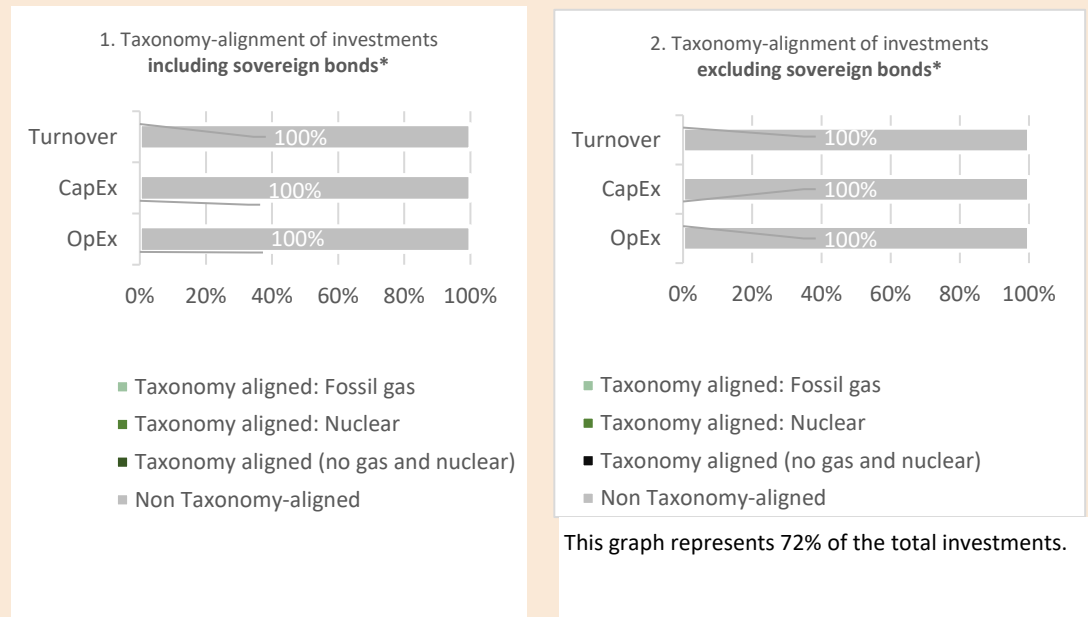

- Yes:
 - In fossil gas
 - In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

92.6%. This concerns investments in green bonds, sustainable bonds and sustainability linked bonds.

What was the share of socially sustainable investments?

1.8%. This concerns investments in social bonds.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 5 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 94.4% of the sub-funds’ assets were invested in green bonds, social bonds, sustainable bonds and sustainability linked bonds.

How did this financial product perform compared to the reference sustainable benchmark?

● **How did the reference benchmark differ from a broad market index?**

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for eligibility and inclusion of green bonds.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

96.5% of the sub-fund’s investments were green bonds, social bonds, sustainable bonds or sustainability linked bonds compared to .99.6% for the Bloomberg MSCI Global Green Bond Index.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

- ***How did this financial product perform compared with the reference benchmark?***

	% green bonds
RobecoSAM Global Green Bonds	92.2%
Bloomberg MSCI Global Green Bond Index	99.6%

- ***How did this financial product perform compared with the broad market index?***

	% green bonds
RobecoSAM Global Green Bonds	92.2%
Bloomberg Global-Aggregate Index	2.9%

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Robeco Capital Growth Funds - RobecoSAM Climate Global Credits

Legal entity identifier: 213800LB657HDJBI4637

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 79.9% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 8.8%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 24.5% better than the Solactive Paris Aligned Global Corporate Index.

The sub-fund invested 94.4% of its asset in green bonds, social bond, sustainable bonds and sustainability linked bonds. With this investments, the sub-fund contributed to environmental goals.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 23.85% better than the Solactive Paris Aligned Global Corporate Index.
4. The sub-fund invested 12.71% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the Solactive Paris Aligned Global Corporate Index and investments with a positive SDG score are classified as sustainable investment. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco

Sustainability disclosures (unaudited)

deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.89% of the net assets, compared to 0.36% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.93% of the net assets, compared to 2.82% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 269.69 tCO₂ per million EUR, compared to 357.25 tCO₂ per million EUR for the Solactive Paris Aligned Global Corporate Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 15 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco’s performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments **Sector** **% Assets** **Country**

Largest investments	Sector	% Assets	Country
United States Treasury Bill	Treasuries	1.83%	United States
Deutsche Bank AG	Banking	1.72%	Germany
Swedbank AB	Banking	1.68%	Sweden
HSBC Holdings PLC	Banking	1.71%	United Kingdom

Public Sector Loans	0.14
Mortgage Assets	0.09
Government Guarantee	0.06
Cash and other instruments	6.64

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

79.9%. This concerns investments that are either part of the Solactive Paris Aligned Global Corporate Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

8.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 15 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Solactive Paris Aligned Global Corporate Index.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 24.51% better than the Solactive Paris Aligned Global Corporate Index.

● How did this financial product perform compared with the reference benchmark?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Credits	269.69	12.7%
Solactive Paris Aligned Global Corporate Index	357.25	4.3%

● How did this financial product perform compared with the broad market index?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Credits	269.69	12.7%
Bloomberg Global-Aggregate Index	366.92	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Climate Global Bonds
Legal entity identifier: 213800QNYW5DK72HBQ97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon emissions per capita was equal to or better than that of the Paris Aware Benchmark
4. The sub-fund invested a minimum of 2.5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. The Sub-fund's weighted carbon emissions per capita was 26.31% better than that of the Solactive Paris Aware Global Aggregate Index.
4. The sub-fund invested 10.58% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the Solactive Paris Aware Global Aggregate Index and investments with a positive SDG score are classified as sustainable investment. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion

Sustainability disclosures (unaudited)

of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for

Sustainability disclosures (unaudited)

breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.89% of the net assets, compared to 0.36% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.23% of the net assets, compared to 2.82% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.3% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:

Sustainability disclosures (unaudited)

- The Carbon footprint (PAI 2, Table 1) of the portfolio was 239.26 tCO₂ per million EUR, compared to 325.61 tCO₂ per million EUR for the Solactive Paris Aware Global Aggregate Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Cash and other instruments Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.1%. This concerns investments that are either part of the Solactive Paris Aware Global Aggregate Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

17.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 10.58% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 26.52% better than the Solactive Paris Aware Global Aggregate Index.

- **How did this financial product perform compared with the reference benchmark?**

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Bonds	239.26	10.6%
Solactive Paris Aware Global Aggregate Index	325.61	1.8%

- **How did this financial product perform compared with the broad market index?**

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Bonds	239.26	10.6%
Bloomberg Global-Aggregate Index	366.92	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM QI Global SDG & Climate Multi-Factor Credits

Legal entity identifier: 213800RF9TE5E4ZIIN66

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 78.9%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 19.3%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 8.1% better than the Solactive Paris Aligned Global Corporate Index.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

How did the sustainability indicators perform?

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.

Sustainability disclosures (unaudited)

2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 8.40% better than the Paris Aligned Benchmark.
4. The Sub-fund's weighted score for the carbon (scope level 1, 2 and 3), water and waste footprint were respectively 8.13%, 44.62% and 37.86% better than the Solactive Paris Aligned Global Corporate Index.
5. The sub-fund's weighted average ESG score was 20.78 against 21.47 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the Solactive Paris Aligned Global Corporate Index and investments with a positive SDG score are classified as sustainable investment. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards,

Sustainability disclosures (unaudited)

United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.39% of the net assets, compared to 0.35% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.63% of the net assets, compared to 2.81% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 328.19 tCO₂ per million EUR, compared to 357.25 tCO₂ per million EUR for the Solactive Paris Aligned Global Corporate Index.
 - Water and waste indicators (PAI 8-9, Table 1). The scores for water and waste were respectively

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
AT&T Inc	Communications	2.38%	United States
HSBC Holdings PLC	Banking	1.81%	United Kingdom

Transportation	1.05
Industrial Other	0.95
Natural Gas	0.34
Cash and other instruments	3.52

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

78.9%. This concerns investments that are either part of the Solactive Paris Aligned Global Corporate Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

19.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Solactive Paris Aligned Global Corporate Index.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 8.31% better than the Solactive Paris Aligned Global Corporate Index.

● How did this financial product perform compared with the reference benchmark?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Multi-Factor Credits	328.19
Solactive Paris Aligned Global Corporate Index.	357.25

● How did this financial product perform compared with the broad market index?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Multi-Factor Credits	328.19
Bloomberg Global-Aggregate Index	366.92

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Emerging Credits
Legal entity identifier: 5493008QKCFW6Q0H681

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. For corporate bond investments, at least 80% of the Sub-fund was invested in companies with a neutral or positive SDG score. No more than 20% was invested in a holding with a low-negative score. The average company SDG score of the Sub-fund is greater than zero.
5. For corporate bond investments, the Sub-fund excluded all high or medium negative SDG scores (-3 or -2).
6. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 11.15% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 2.68% of the holdings in portfolio had an elevated sustainability risk profile.
4. 88.18% of the companies (on average) held a neutral or positive SDG score. Overall the average SDG score of the sub-fund was 81.53 based on the internally developed SDG framework.
5. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.
6. The sub-fund invested 18.34% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.4447.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 9 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

68.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 9 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 18.39% of the assets were invested in green bonds.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
3. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.
4. The sub-fund's portfolio had a minimum weighted average score of at least 6.5 on Robeco's Country Sustainability Ranking.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. The Sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
3. The sub-fund invested 24.18% of its assets in green, social, sustainable and/or sustainability-linked bonds.
4. The sub-fund's portfolio had a minimum weighted average score of 7.79 on Robeco's Country Sustainability Ranking.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 15, table 1 regarding green house gas intensity was considered via engagement. Robeco monitors a set of country data on climate performance. These include GHG intensity (such as CO₂/GDP), CO₂ per capita data, emission trends and policy metrics. This dataset has been incorporated in the Country Sustainability Ranking, which is used for the fundamental analysis of government bonds.
- PAI 16, table 1 regarding investee countries subject to social violations was considered via exclusions. The PRS political risk data, used for the measurement of this indicator, are an important component of Robeco's Country Sustainability Ranking. The PRS internal conflict score is used as an instrument to detect countries that run the risk of getting involved in serious internal conflict. The PRS metric is based on three components: civil disorder, terrorism, and civil war.
- PAI 17, table 2 regarding the share of securities not issued under Union legislation on environmentally sustainable bonds was considered via targets in relation to investments in green, social, sustainable and sustainable linked bonds.
- PAI 21, table 3 regarding the average corruption score was considered by setting targets on the country sustainability ranking (CSR).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Sustainability disclosures (unaudited)

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- As part of Country Sustainability ranking, used for The Fundamental analysis of bonds, the following PAIs were considered:
 - Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 14.1% better than the benchmark.
 - Table 1, PAI 16: 0% of the assets was invested in countries subject to social violations.
 - In addition, the Fund has Environmental and Social promoting characteristics in relation to:
 - Table 2, PAI 17: The Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard was 64.46%.
 - Table 3, PAI 21: The average Corruption score was 2% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 14.1% better than the benchmark.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What was the proportion of sustainability-related investments?

97.9%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● **In which economic sectors were the investments made?**

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Not applicable	0.00
Other sectors	
Treasuries	73.26
Supranational	8.51
Government Guarantee	6.64
Owned No Guarantee	5.74
Local Authorities	3.08
Sovereign	0.13
Cash and other instruments	2.64

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

19.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 24.18% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Euro Credit Bonds
Legal entity identifier: 213800CVNA3PA3BONW52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The sub-fund invested 13.41% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.99% of the net assets, compared to 4.66% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.77% of the net assets, compared to 4.7% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 18 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Cash and other instruments

2.94

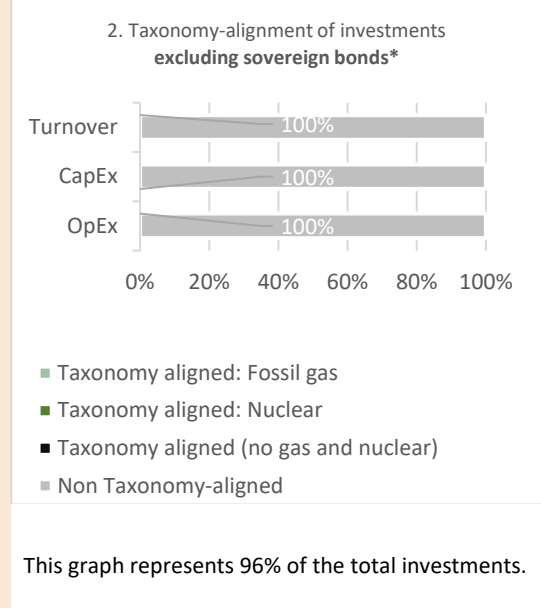

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 18 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 13.41% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco All Strategy Euro Bonds
Legal entity identifier: 213800PDS63NUN165C09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
5. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.
6. The sub-fund's portfolio had a minimum weighted average score of at least 6 on Robeco's Country Sustainability Ranking.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The Sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
5. The sub-fund invested 19.71% of its assets in green, social, sustainable and/or sustainability-linked bonds.
6. The sub-fund's portfolio had a minimum weighted average score of 7.94 on Robeco's Country Sustainability Ranking.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue

Sustainability disclosures (unaudited)

positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8.

Sustainability disclosures (unaudited)

Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 15, table 1 regarding green house gas intensity was considered via engagement. Robeco monitors a set of country data on climate performance. These include GHG intensity (such as CO₂/GDP), CO₂ per capita data, emission trends and policy metrics. This dataset has been incorporated in the Country Sustainability Ranking, which is used for the fundamental analysis of government bonds.
- PAI 16, table 1 regarding investee countries subject to social violations was considered via exclusions. The PRS political risk data, used for the measurement of this indicator, are an important component of Robeco's Country Sustainability Ranking. The PRS internal conflict score is used as an instrument to detect countries that run the risk of getting involved in serious internal conflict. The PRS metric is based on three components: civil disorder, terrorism, and civil war.
- PAI 17, table 2 regarding the share of securities not issued under Union legislation on environmentally sustainable bonds was considered via targets in relation to investments in green, social, sustainable and sustainable linked bonds.
- PAI 21, table 3 regarding the average corruption score was considered by setting targets on the country sustainability ranking (CSR).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o As part of Country Sustainability ranking, used for The Fundamental analysis of bonds, the following PAIs were considered:
 - Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 15% better than the benchmark.
 - Table 1, PAI 16: 0% of the assets was invested in countries subject to social violations.
 - In addition, the Fund has Environmental and Social promoting characteristics in relation to:
 - Table 2, PAI 17: The Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard was 69.22%.
 - Table 3, PAI 21: The average Corruption score was 3.8% better than the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 15% better than the benchmark.

What were the top investments of this financial product?

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.9% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.38% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The sub-fund invested 9.47% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.95% of the net assets, compared to 3.05% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.3% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.21% of the net assets, compared to 0.36% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
3.875 TELEFONICA EUROPE BV (Perp)	Communications	1.64	Spain

Financial Other	0.85
Owned No Guarantee	0.44
REITS	0.24
Brokerage, Asset Managers, Exchanges	0.11
Cash and other instruments	3.94

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

17.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

52.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 9.47% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Asian Bonds
Legal entity identifier: 21380096HMIZ4YU8CM47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. For corporate bond investments, at least 80% of the Sub-fund was invested in companies with a neutral or positive SDG score. No more than 20% was invested in a holding with a low-negative score. The average company SDG score of the Sub-fund is greater than zero.
5. For corporate bond investments, the Sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. 85.39% of the companies (on average) held a neutral or positive SDG score. Overall the average SDG score of the sub-fund was 76.02 based on the internally developed SDG framework.
5. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3314.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

99.5%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Natural Gas	1.74
Energy	0.52
Other sectors	
Banking	16.07
Owned No Guarantee	15.62
Technology	10.26
Treasuries	10.01
Communications	8.69
Consumer Cyclical	8.62
Basic Industry	5.32
Insurance	4.24
Financial Other	4.04
Sovereign	3.96
Electric	2.84
Capital Goods	2.35
Industrial Other	1.83
Transportation	1.80
Consumer Non Cyclical	0.65
Cash and other instruments	1.45

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, over 80% of the holdings had a neutral or positive SDG score.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Euro SDG Credits
Legal entity identifier: 213800MQYJBFHGNZW597

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 2.47% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 93.53 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 19.18% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3115.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 16 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

70.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 16 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 19.18% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Financial Institutions Bonds
Legal entity identifier: 213800M7K3R9AYOXVL19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84.1% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained on average 2.76% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 6.59% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.27% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
4.375 MAPFRE SA 31-MAR-2047	Insurance	1.98	Spain
4.032 BNP PARIBAS CARDIF (Perp)	Insurance	1.93	France
4.250 ACHMEA BV (Perp)	Insurance	1.89	Netherlands

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

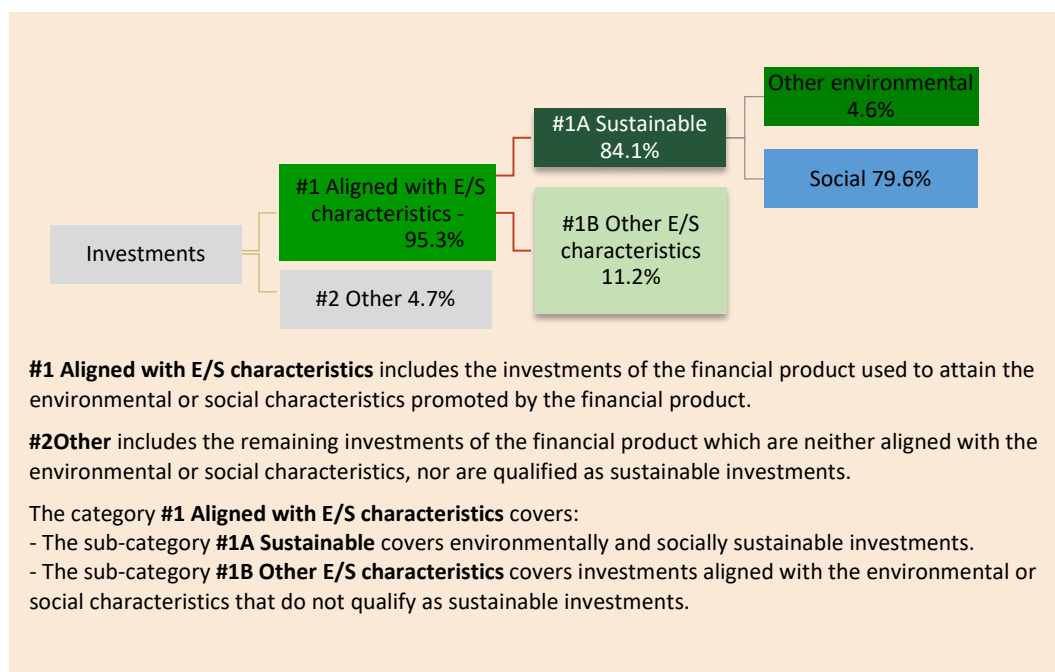

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.3%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Not applicable	0.00
Other sectors	Average exposure in % over the reporting period
Banking	48.59
Insurance	42.42
Treasuries	4.42
Financial Other	0.78
Owned No Guarantee	0.06
Cash and other instruments	3.72

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

79.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 6.59% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Investment Grade Corporate Bonds
Legal entity identifier: 213800ZDFG81MWTU5M51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The sub-fund invested 8.94% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on

Sustainability disclosures (unaudited)

such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.

- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks

Sustainability disclosures (unaudited)

whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.41% of the net assets, compared to 8.29% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 11.18% of the net assets, compared to 9.75% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.1% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1:

Sustainability disclosures (unaudited)

Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
1.375 DEUTSCHE TELEKOM INT FIN 30-JAN-2027	Communications	2.04	Germany
0.500 THERMO FISHER SCIENTIFIC 01-MAR-2028	Consumer Non Cyclical	1.86	United States

What was the proportion of sustainability-related investments?

95.6%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	6.16
Natural Gas	1.86
Other sectors	
Consumer Non Cyclical	30.10
Consumer Cyclical	15.92
Communications	11.39
Owned No Guarantee	6.11
Technology	6.05
Electric	5.65
Treasuries	4.32
Basic Industry	4.31
Transportation	1.21
Capital Goods	1.20
Industrial Other	1.07
Local Authorities	0.66
Cash and other instruments	3.99

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

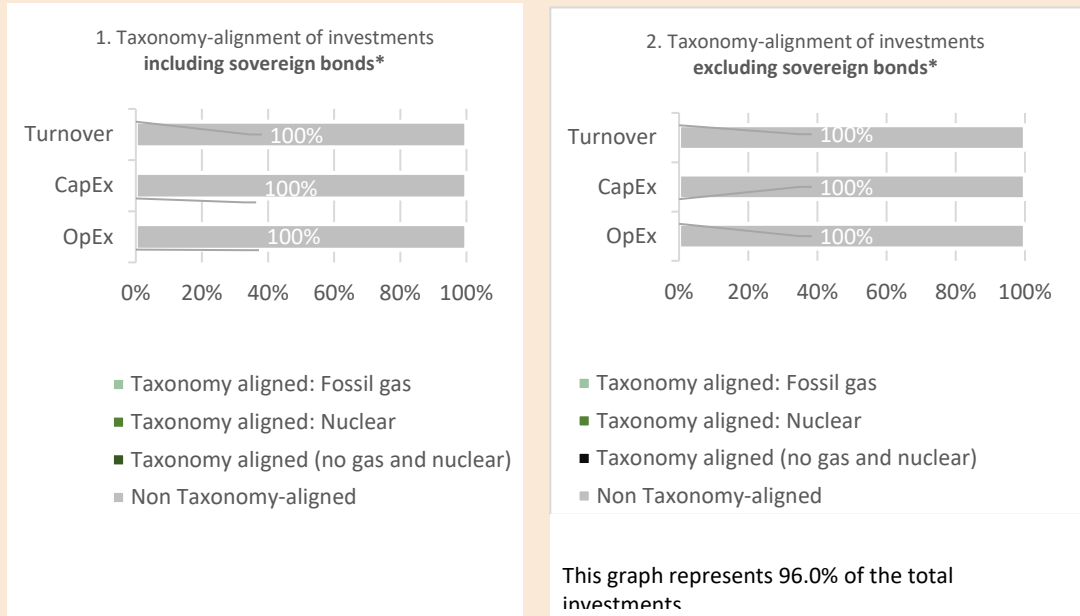

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

49.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 8.94% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM US Green Bonds

Legal entity identifier: 213800N8SFP1LXXF4380

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 88.6%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 3.1%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund invested 91.7% of its asset in green bonds, social bond, sustainable bonds and sustainability linke bonds. With this investments, the sub-fund contributed to environmental goals.

How did the sustainability indicators perform?

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.

Sustainability disclosures (unaudited)

3. The sub-fund invested 91.67% of its assets in green bonds, social bond, sustainable bonds and sustainability linke bonds.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

For sustainable investments that are either Green, Social or Sustainable Bonds, significant harm is avoided by the application of Green Bonds Principles. For a large share of Green, Social and Sustainable bonds, Robeco adds an extra assessment on sustainability factors by applying Robeco's Green Bonds Framework or Social Bond Framework. Via these frameworks, the following adverse impacts were directly considered:

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

Furthermore, post investment, the following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant

Sustainability disclosures (unaudited)

negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Pre-investment, green, social and sustainable bonds were assessed via Robeco's Green Bond Framework and Social Framework, as well as via Robeco's SDG Framework. These Framework directly and indirectly assess PAI indicators. The percentage green, social and sustainability linked bonds in portfolio was 91.67%.
- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.6642.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

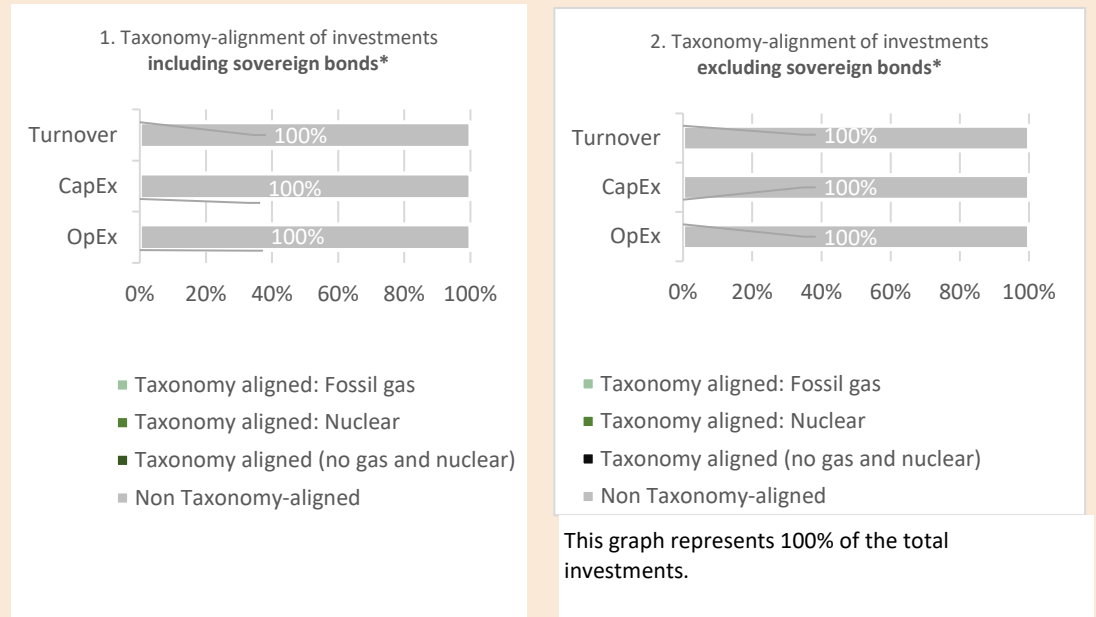

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

88.6%. This concerns investments in green bonds, sustainable bonds and sustainability linked bonds.

What was the share of socially sustainable investments?

3.1%. This concerns investments in social bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 91.7% of the sub-funds’ assets were invested in green bonds, social bonds, sustainable bonds and sustainability linked bonds.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for eligibility and inclusion of green bonds.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

91.7% of the sub-fund’s investments were green bonds, social bonds, sustainable bonds or sustainability linked bonds compared to .99.1% for the Bloomberg MSCI USD Green Bond Index.

● How did this financial product perform compared with the reference benchmark?

	% green bonds
RobecoSAM US Green Bonds	91.7%
Bloomberg MSCI USD Green Bond Index	99.1%

● How did this financial product perform compared with the broad market index?

	% green bonds
RobecoSAM US Green Bonds	91.7%
Bloomberg Global-Aggregate Index	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Multi Factor Absolute Return
Legal entity identifier: 213800AERXVYQM6ZR607

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 28.76%, 83.25% and 67.00% better than the general market index.
4. The sub-fund's weighted average ESG score was 20.12 against 21.92 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.56% of the net assets, compared to 4.93% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.21% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.36% of the net assets, compared to 8.23% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.37% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 39.5 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 22.73%, 83.25% and 67% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 45 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 3 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 3 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
GOLDMAN SACHS Commodity certificate	Commodities	3.98	United States
3.750 NETHERLANDS GOVERNMENT 15-JAN-2023	Treasuries	2.41	The Netherlands

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

54.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 45 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.
