### **AUDITED ANNUAL REPORT**

For the year ended 31 December 2022

### **General Information**

The information represented in this report relates to the year from 1 January 2022 to 31 December 2022. It should not be taken as an indication of the future development of Ashmore SICAV (the "Company").

The Board of Directors may establish different portfolios of assets in one or more Sub-Funds of the Company at any time to meet, in its opinion, the needs of different Shareholders. During the year under review, the Company comprised 30 Sub-Funds, namely:

- **Ashmore SICAV Emerging Markets Debt Fund**
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund
  Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets Colina Bond Fund
  Ashmore SICAV Emerging Markets China Bond Fund
  Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund
  Ashmore SICAV Emerging Markets Local Currency Bond Fund
- **Ashmore SICAV Emerging Markets Local Currency Bond Fund 2**
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund Ashmore SICAV Emerging Markets Local Currency Bonds (Broad) Fund

- Ashmore SICAV Emerging Markets Total Return ESG Fund
  Ashmore SICAV Emerging Markets Absolute Return Debt Fund
  Ashmore SICAV Emerging Markets Total Return Fund
  Ashmore SICAV Emerging Markets Total Return Fund
- Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- **Ashmore SICAV Emerging Markets Multi-Asset Fund**
- **Ashmore SICAV Emerging Markets Corporate Debt Fund**
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Investment State Short Salad Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund Ashmore SICAV Emerging Markets Frontier Equity Fund Ashmore SICAV Emerging Markets Active Equity Fund

- **Ashmore SICAV Middle East Equity Fund**
- Ashmore SICAV Emerging Markets Equity Fund
- **Ashmore SICAV Emerging Markets**
- **Ashmore SICAV Emerging Markets Equity ESG Fund**
- **Ashmore SICAV**

This report does not constitute an offer or an invitation to purchase Shares of the Sub-Funds referred to herein. Subscriptions are only valid if made on the basis of the current Prospectus and Key Investor Information Document (KIID) supplemented by the latest audited annual report. Should the reference date of the audited annual report date back more than eight months, the subscriber must also be supplied with a semi-annual report.

The figures stated in this report are historical and not necessarily indicative of future performance.

### **Investment Manager's Report**

#### **Market Review**

In Q1 2022, the Russian invasion of Ukraine dramatically altered the economic, political and investment landscapes, not just in terms of the immediate market implications for returns, but also with regards to the enormous adjustments that central banks have needed to make to control much more vicious inflation dynamics. The Russia-Ukraine war triggered a sharp sell-off in risk assets, a significant rise in energy prices and other commodities, and a brief move lower in US Treasury yields, before inflationary concerns and market expectations surrounding central bank rate hikes ultimately reasserted their influence and pushed yields higher. A weak start to the year for global equity markets in January and February, was further compounded by the Russian war in Ukraine. Global equity markets did, however, try to stage a recovery in the latter half of March. This followed the US Federal Reserve System's (Fed) first and widely anticipated rate hike of a new tightening cycle. It came with reassurances from Fed Chair Jerome Powell that the US economy was strong enough to handle higher rates and that the probability of recession was not particularly elevated. Despite the improved sentiment towards the end of the quarter, it was not sufficient to prevent global equity markets from posting their worst quarterly returns since Q2 2020. Global bond yields spent much of the quarter moving higher, aside from a temporary dip, following the immediate aftermath of the invasion.

Q2 2022 was another tough guarter for bonds and stocks. which rounded up an equally tough first half (H1): analysts at Deutsche Bank made the point that this was the worst H1 performance for US Treasuries since 1788, and the worst H1 return for the S&P 500 Index since 1962, not far behind the 1932 H1 decline. At the start of the guarter, fears of inflation and higher Fed Funds rates pummelled bond and equity markets as the war in Ukraine sent commodity prices through the roof. The roll-out of harsh COVID-19 lockdown measures in China did not help sentiment. Markets initially bottomed and rebounded in May, but heavy losses returned in June, when 2-year US Treasury yields soared by 80 basis points (bps) in the first two weeks, the Fed delivered a greater-than-expected 75 bps hike, and global equities fell by 11%. The combined effects of Fed hikes and lower asset prices amounted to a sharp tightening in financial conditions, with real economic consequences for companies and households. Very soon concerns about economic growth started to set in and some indicators started to point to a greater risk of recession by year-end.

In Q3, after a positive start in July, two consecutive monthly declines in stock prices in August and September sent global equity indices down for a third negative consecutive quarter for the first time since the global financial crisis when equity indices fell for five consecutive quarters. What stood out was the concurrent fall in global bond prices, where global indices (e.g., Global Aggregate Index) fell for the fifth consecutive quarter in September, against just two back-to-back negative quarters in the middle of 2008. The market correction was driven by a combination of upside surprises in inflation, two consecutive 75 bps rate hikes by the Fed coupled with unrelenting hawkish guidance, and a fall in business confidence indicators across the developed world. A misjudged budget in the UK and a fire sale in Gilts heaped more pressure on core government bonds towards the end of the quarter.

Q4 2022 was a very strong quarter for global bonds and equities, with positive returns across all the main asset classes and indices - closing the chapter on three consecutive quarters of across-the-board negative returns. The rally kicked off in October after US inflation surprised on the downside and the market started to price in a slower pace of rate hikes by the US Fed. This coincided with the date of China's 20th Party Congress, which led to the swift relaxation of zero COVID-19 policy measures: equity markets cheered China's re-opening, but economists soon warned of growth headwinds when millions in China got sick and household demand slumped yet again. The mild weather and soft economic data led oil and gas prices lower over the quarter. One of the standout changes in relative prices in Q4 was the drop in the value of the Dollar, as the market started discounting more rate cuts in the second half of 2023, and the rate differential with other currencies dropped accordingly.

#### Outlook

In Q3 2022, the market had just reached a trough in terms of valuation and a peak in terms of bearishness and risk premia that we are not likely to revisit in this cycle. Since the end of summer, the inflation shock to the global economy has receded, and asset prices have recovered somewhat. Of all the possible 'fixes' that we discussed, in terms of political and policy options, no sudden breakthrough came out of the G20 in Bali but two positive developments came about in November-December, which have proven quite decisive in terms of shaping the outlook positively for Emerging Markets (EM) debt in the next few months: i. the end of zero COVID-19 policy in China, and ii. the return of a less politically charged environment in the US allowing for a more gradual policy adjustment by the Fed.

### **Investment Manager's Report continued**

#### Outlook continued

China completed its U-turn on zero COVID-19 policy at a furious pace, and effective 8 January 2023, mobility restrictions for international travel were lifted and many Chinese living abroad returned home for the Lunar New Year holiday. In addition to these important steps, new economic stimulus measures and some degree of 'regulatory easing' should further spur domestic demand from very depressed levels in recent months. This has been breathing new life into a moribund Chinese equity market, and has put a stop to the slump in other regional equity markets, especially North Asian markets (Korea and Taiwan) that have been discounting weaker demand from export markets in the US and Europe, for semi-conductors notably.

Improving prospects for China come at a critical time as business confidence and new orders data in Developed Markets (DM) are flashing red, and odds of a recession are increasing in both the US and Europe. Since the start of the COVID-19 pandemic in 2020, China's cycle has decorrelated from that of the rest of the world. This now offers a great opportunity for investors to increase allocations to Asia and EM more broadly. According to the most recent International Monetary Fund (IMF) forecasts, the gap between EM and DM Gross Domestic Product (GDP) growth is likely to widen from 1.2% in 2022 to 3.6% and 3.0% in 2023 and 2024 respectively. This increase in the so-called EM growth premium has always historically offered a strong backdrop for EM asset prices.

The other positive development was the result of the US mid-term Congressional elections, where a split Congress reduced the risk of dramatic economic policy changes and lowered the pressure on the Fed to buy further insurance against the risk of inflation. The new political cycle coincides with a decrease in sequential inflation that has been surprisingly positive. Financial conditions have been easing, which is particularly important for the most levered issuers to regain access to the capital markets. The rebound in new issuance in the first week of 2023 is an earlier indication of this process and is drawing capital back into the EM debt asset class.

In summary, risks to global economic growth remain, owing to the hit to real income coming from the recent inflation surge. That said, EM will do well if they demonstrate again a growth premium versus DM. And they will do very well if the improvement in financial conditions goes at least in lockstep with the slowdown in growth that the market already expects.

### **Overview by Investment Theme**

#### **External Debt**

The External Debt theme represents US dollar denominated EM sovereign and quasi-sovereign bonds. Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan Emerging Market Bond Index Global Diversified Index (EMBI GDI), which returned -17.78% in the 12 months to 31 December 2022.

Turkey, Costa Rica, and Iraq were amongst the best performers within the JP Morgan EMBI Global Diversified Index over the period. We expected Turkey's current account to feel the impact of higher oil prices and a loss in tourism revenues, exacerbating the effect of the already high inflation level and expectations of more restrained GDP growth in the Euro region. The Central Bank continued with its unorthodox monetary policy, holding the policy rate steady at 14% in Q1 2022. However, in an environment of elevated geopolitical tension, Turkey plays a key role as a NATO member close to the Ukraine/Russia hotspot and has hosted ongoing negotiations between the two warring countries. Iraq has been a strong beneficiary of the higher oil prices over the period.

Russia, Ukraine, and Mexico were amongst the worst performers within the JP Morgan EMBI Global Diversified Index over the period. The Russian invasion of Ukraine created an extremely challenging environment for asset price performance as Russia was subject to an extreme package of economic sanctions. The sanctions had the immediate impact of restricting trading and settlement of Russian bonds, with the country ultimately excluded from the entire JP Morgan family of bond indices effective 31 March 2022, with all bond prices being written down to zero. Russia nevertheless continued to make coupon payments on its US\$ denominated debt obligations, although the US government prevented Russia from making a bond principal payment out of foreign currency reserves held by the Russian Central Bank at US financial institutions, forcing the Russian government to either pay the maturity out of the diminished pool of liquid and accessible FX reserves or to default on the bond. Ukraine's Ministry of Finance communicated to bondholders is intent to make all interest payments, as the country received sizeable financial support from both multilateral and bilateral sources, including a US\$ 15bn package approved by the US Congress, a US\$ 1.4bn Rapid Financing Instrument from the IMF and a EUR 1.2bn pledge from the EU. Ukraine remains in the JP Morgan indices. Mexico's Central Bank upgraded its growth outlook for 2022 to 3.0% from 2.7%, reflecting revised Q3 data that showed a return to pre-pandemic GDP levels. The economy continued to benefit from modest improvements in industrial production, upward momentum in tourism inflows and remittances that increased to a record-high 4.1% of GDP.

### **Investment Manager's Report continued**

### **Overview by Investment Theme** continued

### **Local Currencies and Local Currency Bonds**

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan GBI-EM Global Diversified Index, which returned -11.69% in the 12 months to 31 December 2022.

The Brazilian real, Mexican peso, Turkish lira, and Chilean peso were amongst the best performers within the JP Morgan GBI-EM Global Diversified Index over the period. Brazilian assets have underperformed recently after President-elect Lula personally negotiated a constitutional amendment with Congress to breach the expenditure ceiling by BRL 150bn to BRL 200bn to finance social programmes. This negotiation on the side lines questions the view that Lula would likely be a pragmatist when it comes to economic and fiscal matters. Orthodox fiscal policy will be necessary to conciliate the challenging task of lowering the country's deficit and debt/ GDP while keeping elevated social programmes. In Q4 2022, in yet another unorthodox move, the Central Bank of Turkey (CBT) cut its policy rate by 300 bps to 9%, more than consensus. However, the Central Bank and Treasury continue to manage the currency/rates space using a set of macroprudential measures even as inflation continued to print above 80% year-on-year (yoy). House prices rose by a yoy rate of 189.2% in October from 173.9% yoy in July as individuals borrowed money significantly below inflation to purchase an asset that often holds its real value (after adjusting for inflation). Also, the ratings agency S&P downgraded Turkey's sovereign credit rating to 'B' from 'B+', with a stable outlook, citing loose monetary policy against a backdrop of inflation around 80%.

The Russian ruble, Colombian peso, Hungarian forint, and Polish zloty were amongst the worst performers within the JP Morgan GBI-EM Global Diversified Index over the period. In Russia, the local markets remain disrupted by sanctions. The Central Bank left policy rates at 7.5% in Q4 2022. In Hungary, the Central Bank kept its policy rate at 13.0%, in line with consensus, in Q4. Consumer Price Index (CPI) inflation slowed to 1.8% month-on-month (mom) in November from 4.1% in September, lifting the yoy rate to 22.5%, 50 bps above consensus. The Hungarian labour market remains strong as the unemployment rate remained below 4% (3.8% in September).

### **Corporate Debt**

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan CEMBI Broad Diversified Index, which returned -12.26% in the 12 months to 31 December 2022.

Looking back at the full year, 2022 saw a very significant decline in net issuance compared to previous years, with only US\$ 219bn of new supply, representing a 60% decline year on year. Net financing activity remained negative in December with another US\$ -30bn of negative net supply. This brings the total year-to-date (YTD) net financing to US\$ -260bn, the highest ever on record for our markets. The gradually improving technicals in the market are creating the backdrop for better performance in 2023. All main geographical regions in EM experienced negative net supply this year, Asia remains the strongest contributor with US\$ -163bn followed by Latin America with US\$ -55bn.

Argentina, Turkey, and El Salvador were amongst the best performers within the Index over the period. Argentina has done well owing to strong performance in the energy sector and particularly from oil and gas producers. Despite the recent softening in oil prices in Q4 2022, it is still at elevated levels by historical standards, ensuring strong cash generation for EM based exporters.

Russia, China, and Mexico were amongst the worst performers within the Index over the period. The main detractors in China remain from the property sector. Even with a number of maturity extensions approved by investors, the inability of most companies in the sector to attract new sources of financing, leading inevitably to more maturity extensions, has the sector gripped in a vicious cycle. Nevertheless, late in July 2022 we finally saw some stabilisation of investor sentiment towards the sector and even a rally in some of the bonds in the last week of the month. The mortgage repayment boycott continued to spread across China, reaching over 200 projects in more than 75 cities by the end of July. This forced the Government into action announcing a new fund which is seeking to mobilise up to CNY 1tn (US\$ 148bn) in new loans to help distressed developers complete work on stalled property projects. Boycott of mortgage repayments represents a direct threat to social stability in China which explains the quick reaction by the Government this time. At the same time the industry seems to be refocusing on a more holistic approach to debt restructuring, looking for solutions covering the next three to five years. We expect several restructuring deals to be announced in the following months, providing further support to the ongoing recovery in the sector.

### **Investment Manager's Report continued**

### **Overview by Investment Theme** continued

#### **Corporate Debt** continued

We believe that net supply for 2023 is likely to remain negative, with new issuance activity staying well below historical averages. This assessment is supported by muted activity levels in Asia given the weakness in the bonds of the Chinese property sector, one of the largest sources of new supply historically. The impact of sanctions and war on Russia and Ukraine, which were frequent issuers in previous years, will further reduce supply. The strong economic recovery of 2021 has come in the face of many remaining logistical bottlenecks in the global economy resulting in higher inflation around the world. The strong push higher in interest rates by global central banks as they battle inflation expectations has resulted in significant higher cost of funding for many companies, reducing further the appetite for new US\$ funding in favour of local currency debt. This further improves the technical positioning in the US\$ corporate debt market.

### **Equities**

In EM equities, the MSCI EM Index returned -20.09%, the MSCI EM Small Cap Index returned -18.02% and the MSCI Frontier plus Select EM Index returned -15.31% in the 12 months to 31 December 2022.

In 2022, EM equities sold off on heightened risk aversion associated with geopolitical risk, reactive Fed monetary tightening and the strict zero COVID-19 enforcement policy enacted by its largest economy and stock market, China. While the upcoming outlook is set to see the global economic backdrop remain challenging, EM stock market performance is likely to behave much more positively and offers an exciting investment opportunity.

The primary near-term driver for EM performance is likely China, where we see most of the recent headwinds receding. Chinese policy is turning more accommodative as the Politburo targets improvements in economic growth, youth unemployment and business confidence. There have been policy initiatives announced to stabilise the real estate sector, the regulatory reset looks to be behind us, while geopolitical tension with Australia and the Philippines appears to be defusing.

Significantly, the speed and efficacy of moves to remobilise the Chinese population, following tight zero COVID-19 enforcement, are surprising positively which can lead to the rapid normalisation of consumption patterns. Households have accumulated significant savings that have not been impeded by higher inflationary pressure seen elsewhere in the world. In our view, this should trigger significant pent-up demand as the economy reopens to the benefit of China and her trading partners.

Risks in China remain though. In the short-term, the rise in COVID-19 infections will weigh on economic activity and they will take time to fully dissipate. We are also wary of slower developed world demand weighing on Chinese export growth and certain industries. However, sentiment is already depressed, and valuations are attractive, which should incentivise investors back to the country.

Outside of China, the forthcoming performance drivers for EM include the prospect of monetary policy stabilising and easing; domestic demand capital expenditure cycles; as well as 'themes' such as increased supply chain diversification and reshoring. While the impact, speed and magnitude of these drivers will vary by country, meaning active management remains key, the overall risk-reward has moved strongly in EM's favour.

### **Directors' Report**

The Directors submit their Report together with the Company's Statement of Net Assets, Statement of Operations and Changes in Net Assets, Schedules of Investments and related notes for the year ended 31 December 2022, which have been prepared properly, in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment.

### **The Company**

Ashmore SICAV (the "Company") is incorporated as a société anonyme (public limited company) under the laws of the Grand-Duchy of Luxembourg and qualifies as an open-ended société d'investissement à capital variable (a "SICAV") and is authorised as an undertaking for collective investment in transferable securities under part I of the law dated 17 December 2010 on undertakings for collective investment (the "Law of 2010"), as amended by the law of 10 May 2016.

During the year, no Sub-Funds were launched, 1 Sub-Fund terminated operations, 9 share classes opened and 17 share classes terminated.

The net amount received from subscriptions and redemptions during the year was an outflow of US\$3,679,609,841 and the total net assets of the Company decreased by US\$6,134,087,038.

### **Corporate Governance**

The Board of the Company has considered the principles and recommendations of the ALFI Code of Conduct for Luxembourg Investment Funds (the "Code"). The Code can be found on the Association's website: www.alfi.lu.

The Board has put in place a framework for corporate governance which it believes is suitable for an investment company and which enables the Company to comply with the requirements of the Code, which sets out principles of good governance and a code of best practice.

### The Board

The Directors of the Company are responsible for the overall administration, control and management of the Company, including the determination of the investment objective and policies of each Sub-Fund. In particular, the Directors of the Company are responsible for the monitoring and the overall supervision and control of the Management Company.

To this effect, the Board may give board recommendations to the Management Company in relation to, without limitation, the structure, promotion, administration, investment management and distribution of the Company and the contents of any documentation relating to the Company (including but not limited to, the Prospectus and any marketing material).

**Steve Hicks** is the Ashmore Group plc ("Ashmore") nominated director on a number of Ashmore fund boards. From June 2010 until January 2014, he was the Ashmore Head of Compliance. Prior thereto he was Director, Group Compliance at the London listed private equity company, 3i Group plc. During his career, Steve, who is a qualified UK lawyer, has held a number of legal and compliance roles over a period of more than 25 years.

Claude Kremer is a partner with the law firm Arendt & Medernach S.A. He holds a Masters degree in Law and History from the University of Grenoble (France) and a Masters degree in Accounting and Finance from the London School of Economics and Political Science. He was admitted to the Luxembourg Bar in 1982. He was the chairman of the Association of Luxembourg Investment Funds ("ALFI") in the period 2007-2011 and served as the president of the European Fund and Asset Management Association ("EFAMA") in the period of 2011-2013. In October 2014, Claude was elected to the Board of Directors of the International Investment Funds Association ("IIFA") which brings together 41 regional and national investment fund associations on a worldwide basis with a view to facilitating the continued growth of the investment funds sector internationally.

**Juraj Pekar** is Ashmore's Head of Fund Administration, having joined Ashmore in 2016. A key aspect of his role is the management and continued evaluation of the services and relationships between Ashmore and its outsourced providers such as fund administrators and custodians and oversight of Ashmore's fund control team. He was previously employed at BlueBay Asset Management LLP for 8 years in various fund accounting roles in its London office. He is a graduate from the University of Economics in Bratislava and has been a member of the Institute of Chartered Accountants of England and Wales since 2008.

John Gregory is Ashmore's Head of Middle Office and Information Technology, having joined Ashmore in 2010. He is responsible for Ashmore's Global Operating Model. A key aspect of his role is the management and continued evaluation of the services and relationships between Ashmore and its outsourced providers such as fund administrators, technology vendors and custodians. He was previously employed at Fidelity International for 13 years in various roles, including 4 years in Japan as Chief Operating Officer for the domestic on-shore asset management business, 3 years in Hong Kong as Chief Operating Officer for the Front Office for the Asia Pacific region and latterly, 4 years as Chief Operating Officer for the Front Office at Fidelity International headquarters in London.

### **Directors' Report continued**

Dennis Robertson retired from KPMG in September 2013 after 35 years with the firm, throughout the Middle East and London and latterly including 24 years in Luxembourg. He has acted as an audit partner on many high-profile client mandates in the investment management industry, primarily in the traditional long-only UCITS space. Apart from being an audit partner, he has held several other senior management positions within the firm in Luxembourg, including Head of the Audit practice, Chairman of the Supervisory Board and 10 years as the firm's Risk Management and Ethics and Independence Partner. He has also represented the firm on the Global Investment Management Council. He is a graduate in Accountancy and Finance from Heriot Watt University in Edinburgh and has been a member of the Institute of Chartered Accountants of Scotland since 1977. He now acts as an independent director in the investment management industry in Luxembourg and is a member of the Institut Luxembourgeois des Administrateurs.

The Board holds Board meetings at least four times a year. At the Board meetings the Directors review the management of the Company's assets and all other significant matters so as to ensure that the Directors maintain overall control and supervision of the Company's affairs. The Board is responsible for the appointment and monitoring of all service providers to the Company. The Directors are kept fully informed of investment and financial controls and other matters that are relevant to the business of the Company and should be brought to the attention of the Directors.

The Directors are responsible for ensuring that the Company's Annual Report is prepared in accordance with Luxembourg GAAP and applicable legal and regulatory requirements.

### **Internal Controls**

The Board is ultimately responsible for the Company's systems of internal control and for reviewing their effectiveness. The Board confirms that there is an ongoing process for identifying, evaluating and managing the significant risks faced by the Company. The Code requires Directors to conduct a review of the Company's systems of internal control, covering all controls, including financial, operational, compliance and risk management.

### **Compliance Statement**

During the year, the Company has complied with the principles of the Code.

#### **Notes to the Consolidated Financial Statements**

#### 1. General

Ashmore SICAV (the "Company") is incorporated as a société anonyme (public limited company) under the laws of the Grand-Duchy of Luxembourg and qualifies as an open-ended société d'investissement à capital variable (a "SICAV"). It is authorised as an undertaking for collective investment in transferable securities under part I of the law dated 17 December 2010 on undertakings for collective investment (the "Law of 2010"), as amended by the law of 10 May 2016.

The Company was incorporated under the laws of the Grand-Duchy of Luxembourg on 19 December 2002 for an unlimited period of time. It is registered under number B 90279 at the Register of Commerce at the District Court of Luxembourg.

The Memorandum and Articles of Association of the Company were published in the Mémorial, Recueil Spécial des Sociétés et Associations du Grand-Duché de Luxembourg (the "Mémorial") and filed with the Registry of the Luxembourg District Court where they may be consulted and copies may be obtained upon the payment of Registry fees.

As at 31 December 2022, the Company comprised 29 active Sub-Funds (individually the "Sub-Fund" and collectively the "Sub-Funds"):

- Ashmore SICAV Emerging Markets Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund
- · Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets China Bond Fund
- Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund
- Ashmore SICAV Emerging Markets Total Return ESG Fund
- Ashmore SICAV Emerging Markets Absolute Return Debt Fund
- Ashmore SICAV Emerging Markets Total Return Fund
- · Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- Ashmore SICAV Emerging Markets Multi-Asset Fund
- Ashmore SICAV Emerging Markets Corporate Debt Fund
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund
- Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund
- · Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund
- Ashmore SICAV Emerging Markets Frontier Equity Fund
- Ashmore SICAV Emerging Markets Active Equity Fund
- Ashmore SICAV Middle East Equity Fund
- Ashmore SICAV Emerging Markets Equity Fund
- Ashmore SICAV Emerging Markets
- Ashmore SICAV Emerging Markets Equity ESG Fund
- Ashmore SICAV

The Money Market Fund Regulation (the "Regulation") came into force in every EU member state on 21 July 2017, and took effect on 21 July 2018 for new Money Market Funds. Existing UCITS that were substantially similar to Money Market Funds as defined in the Regulation, complied with the new rules on 21 January 2019. Northern Trust Luxembourg Management Company S.A, acting as Management Company until 30 September 2019, undertook a detailed analysis of all Sub-Funds under management to identify any qualifying funds, and the implications for them. The result of the analysis was that the Ashmore SICAV 2

fell within the scope of the Regulation. The Sub-Fund qualifies as a short-term Low Volatility NAV Money Market Fund ("LVNAV").

The Company also has the ability to issue Advisory Class Shares. These are only available in US\$ and are restricted to certain distributors used by the Management Company where a fee based advisory and/or discretionary client agreement has been entered into. The distributors then purchase Shares of the Company on behalf of their clients via advisory platforms. Advisory Class Shares are also available to any other investor at the discretion of the Investment Manager, acting as a delegate and under the responsibility of the Management Company. Currently no Advisory Class Shares of the Company are in issue.

As at 31 December 2022, the active Institutional Class Shares of all the Ashmore SICAV Sub-Funds were listed on the Luxembourg Stock Exchange, with the exception of the following Share classes:

Shares denominated in AUD, CAD, CHF, DKK, EUR (with the exception of EUR unhedged), GBP (with the exception of GBP unhedged), JPY (with the exception of JPY unhedged), MXN, NOK, SEK and SGD may, at the Investment Manager's absolute discretion, be hedged with respect to currency movements in relation to their currency of denomination against the US\$. In order to achieve this, the Investment Manager may, at its absolute discretion, engage in, for the exclusive account and cost of each of these Share classes, currency forwards, currency futures, currency option transactions and currency swaps, within the investment restrictions set out in the Prospectus, in order to preserve the current AUD, CAD, CHF, DKK, EUR, GBP, JPY, MXN, NOK, SEK and SGD value of the portion, in whole or in part, of the assets attributable to the relevant AUD, CAD, CHF, DKK, EUR, GBP, JPY, MXN, NOK, SEK and SGD Share classes that are invested in US\$ denominated assets.

As at 31 December 2022, all Share classes denominated in currencies other than US\$ were hedged, with the exception of the following Share classes:

- Institutional Class Shares (EUR unhedged) Income of the Ashmore SICAV Emerging Markets Local Currency Bond Fund;
- Institutional II Class Shares (JPY unhedged) Accumulation of the Ashmore SICAV Emerging Markets Sovereign Debt Fund and the Ashmore SICAV Emerging Markets Active Equity Fund;

## 2. Principal accounting policies

a) Presentation of the consolidated financial statements

The consolidated financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment.

The consolidated financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis, except for the Sub-Fund Ashmore SICAV Emerging Markets Local Currency Bonds (Broad) Fund which terminated operations during the year.

This report is presented on the basis of the latest NAV calculated during the financial year (i.e. 30 December 2022).

#### b) Basis of consolidation

The consolidated financial statements of the Company and the financial statements of each Sub-Fund are expressed in US\$ (the "reference currency"). The Consolidated Statement of Net Assets and the Consolidated Statement of Operations and Changes in Net Assets are the sum of the individual Statements of Net Assets and the sum of the individual Statements of Operations and Changes in Net Assets of each Sub-Fund adjusted to eliminate transactions and balances between Sub-Funds.

The consolidated financial statements include all the assets, liabilities and operations of the Company. Transactions between Sub-Funds (linked to investments in other Sub-Funds of the Company) are fully eliminated on consolidation but this has no impact on the results and financial positions of the individual Sub-Funds.

#### c) NAV adjustment Swing pricing

The swing pricing mechanism may apply across all Sub-Funds with the exception of the Ashmore SICAV and any Sub-Funds that are fully invested in other Ashmore Funds.

Shares of the Sub-Funds may suffer a reduction in value as a result of subscriptions, redemptions and/or conversions in and out of the Sub-Funds due to the transaction costs incurred in the purchase and sale of the underlying investments and the spread between the buying and selling prices. This is known as "dilution". In order to counter this and to protect Shareholders' interests, the Administrator, upon instruction from the Management Company, may apply "swing pricing" as part of its valuation policy. This will mean that in certain circumstances the Administrator, upon instruction from the Management Company, may make adjustments to the calculation of the NAVs per Share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

If on any Valuation Day the aggregate transactions in Shares of a Sub-Fund result in a net increase or decrease of Shares which exceeds a threshold of 5% of such Sub-Fund's NAV (or a threshold as determined by the Board of Directors and as applicable to all transactions) for that Sub-Fund, the Administrator upon instruction from the Management Company, shall apply an alternative NAV calculation method (to include such reasonable factors as they see fit) to the NAV per Share.

#### Notes to the Consolidated Financial Statements continued

#### 2. Principal accounting policies continued

c) NAV adjustment *continued*Swing pricing *continued* 

The NAV of the Sub-Fund may, therefore, be swung by an amount equal to the actual bid or offer spread. Such adjustments may vary from Sub-Fund to Sub-Fund based on normal dealing and other costs for the particular assets in which a Sub-Fund is invested, and will not normally exceed 2% of the original NAV per Share. However, the Board of Directors may decide to increase this adjustment limit above the 2% in exceptional circumstances to protect Shareholders' interests.

More information related to the swing pricing policy of the Company is available in the Prospectus.

No swing pricing mechanism was applied to the NAVs as at 31 December 2022.

#### Fair value adjustment

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

A quantitative fair valuation model is supplied by Investment Technology Group ("ITG") to produce factors. ITG monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by ITG for equities and are applied by the Administrator to the daily NAV calculations.

As at 31 December 2022, the NAVs of equity securities were adjusted in this manner.

#### d) Valuation of investments of each Sub-Fund

Where possible, bonds are priced at bid prices, while equities are priced at the official close or last traded prices. If a security is traded on several stock exchanges, the valuation is made on the basis of the price on the main market on which the securities are traded. In the case of securities for which trading on a stock exchange is not significant, but which are bought and sold on a secondary market with regulated trading among security dealers (with the effect that the price is set on a market basis), the valuation may be based on this secondary market. Securities traded on a regulated market are valued in the same way as securities listed on a stock exchange.

Investments in open-ended funds are valued on the basis of the last available NAV of the units or shares of such funds.

Money market instruments are valued on an amortised cost basis.

Under the Regulation, the securities of a Money Market Fund shall be valued by using mark-to-market whenever possible.

Where use of mark-to-market is not possible or the market data is not of sufficient quality, securities shall be valued conservatively by using mark-to-model. Securities may be valued using the amortised cost method provided that the following criteria are met:

- the price of the security calculated in accordance with the mark-to-market method, the mark-to-model method does not deviate from the price of the security calculated in accordance with the amortised cost method by more than 10 basis points; and
- the security has a residual maturity of up to 75 days.

The amortised cost method involves valuing a security at its cost and thereafter assuming a constant amortisation (accretion) to maturity of any discount or premium regardless of the impact of fluctuating interest rates on the market value of the security or other instruments. While this method provides certainty in valuation, it may result in periods during which the value, as determined by the amortised cost method, is higher or lower than the price the Sub-Fund would receive if it sold the securities. For certain short-term transferable debt securities, the yield to a Shareholder may differ from that which could be obtained from a similar Sub-Fund which marks its portfolio of securities to market each day.

As at 31 December 2022, the Ashmore SICAV

used the mark-to-market method.

#### 2. Principal accounting policies continued

#### d) Valuation of investments of each Sub-Fund continued

Where investments are neither listed on any stock exchange nor traded on any regulated markets, these investments are valued in good faith based on information provided by any person whom the Board of Directors considers to be suitably qualified (an "Approved Person"). The Approved Persons include the Pricing Methodology & Valuation Committee of the Investment Manager and certain brokers. For more information on the fair value measurement of hard to price assets, see note 18.

#### e) Valuation of financial derivative instruments

The value of financial derivative instruments not traded on a stock exchange or other regulated market is consistently determined for each different variety of contracts as follows:

Forward currency contracts are valued at market value based on the forward rate prevailing on the valuation date of the assets. The forward rate applied is based on WM/Reuters (4 p.m. GMT).

Interest rate swaps, currency swaps, swaptions and OTC options are valued based on daily counterparty prices verified against third-party pricing agents.

Futures contracts are valued using the last available price on the exchange where the contracts are traded.

#### f) Realised gain/loss on sales of investments in securities of each Sub-Fund

Realised gains or losses on the sale of investments in securities are determined on the basis of the weighted average acquisition cost with tax lots. Investments in securities are accounted for on a trade date basis, net of any applicable tax.

#### g) Foreign currency translation

Assets and liabilities expressed in currencies other than the reference currency of each Sub-Fund have been converted into the reference currency at the foreign exchange rate prevailing as at 31 December 2022.

Income and expenses in currencies other than the reference currency of each Sub-Fund are converted into the reference currency at the foreign exchange rate ruling at the transaction date. Realised and unrealised gains or losses on foreign currency translation are accounted for in the Consolidated Statement of Operations and Changes in Net Assets.

The acquisition cost of investments expressed in currencies other than the reference currency of each Sub-Fund is converted into the reference currency at the foreign exchange rate prevailing at the date of acquisition.

The principal exchange rates applied as at 31 December 2022 were as follows:

US\$	US dollar	=	3.672650	AED	United Arab Emirates dirham
US\$	US dollar	=	5.279750	BRL	Brazilian real

US\$	US dollar	=	23,575.000000	VND	Vietnamese dong
US\$	US dollar	=	17.015000	ZAR	South African rand

#### h) Income and expenses Allocation of expenses

Expenses can be allocated in one of three ways: (i) they can be allocated to a specific Sub-Fund if they are directly incurred by the Sub-Fund, (ii) they can be split evenly or by NAV when the expenses are shared across all the Sub-Funds in the SICAV or a sub-population thereof, or (iii) they can be split in proportion to the holdings that a certain population of Sub-Funds hold in an underlying investment.

#### Income

Interest income is accrued on a daily basis net of withholding tax. Dividend income from quoted equity investments and collective investment schemes is shown net of withholding tax deducted at source and is recorded as income on the exdividend date.

All Sub-Funds account for bond and bank interest, with the exception of non-performing assets, on an effective interest rate basis.

Interest income on non-performing assets, pay-in-kind instruments ("PIK") and PIK paired with profit participating notes ("PIK/PPN") is recognised on receipt unless the Investment Manager deems it appropriate to recognise income on an accruals basis.

#### i) Repurchase agreements

Securities sold under agreements to repurchase are treated as collateralised borrowing transactions. The securities continue to be carried on the Consolidated Statement of Net Assets at market value and the related loans are carried at the amount at which the securities were sold under the agreement. The interest expense and interest income recognised under these agreements and the interest income on underlying securities are included in the Consolidated Statement of Net Assets and in the Consolidated Statement of Operations and Changes in Net Assets.

The interest expense or interest income is accrued on a daily basis.

#### i) Equalisation

Income equalisation arrangements may be applied to some or all the Sub-Funds. These measures are designed to ensure that the income per Share which is distributed or deemed distributed in respect of a distribution period is not impacted by changes in the number of Shares in issue during that period. As a consequence, the first distribution received by a Shareholder in an impacted Sub-Fund following the purchase of Shares in that Sub-Fund will represent partly participation in income received by the Sub-Fund and partly a return of capital.

#### 3. Management fees

The Investment Manager is entitled to receive from each Sub-Fund a management fee at an annual rate expressed as a percentage of the NAV of each Share class of each Sub-Fund and as determined in the Sub-Fund's Appendix of the Prospectus.

#### 3. Management fees continued

The management fees are calculated on the basis of the average NAV of the relevant class payable monthly in arrears. The annual rates applied were as follows:

	Institutional In Class Shares %	Istitutional II Class Shares %	Retail Class Shares %	Retail II Class Shares %	Z Class Shares %	Z 2 Class 3 Shares %	Z 3 Class Shares %

<sup>\*</sup> Active as at 31 December 2022.

The Investment Manager is not entitled to management fees from the Institutional III Share classes.

On 9 November 2021, the Investment Manager agreed to a fee waiver on the Ashmore SICAV 2 (pre-merger), whereby the management fee on the Institutional Class Shares would be reduced to 0.00% (nil) per annum. The fee waiver is valid for a rolling period of three consecutive calendar months from the date of the agreement unless terminated by the Investment Manager (at any time upon seven days notice by the Investment Manager, with the acknowledgement of the Company).

Effective 15 December 2022, the management fee on the Institutional Class Shares of the Ashmore SICAV was amended to 0.2% per annum.

#### 4. Depositary fees

Under the terms of the Depositary Agreement with Northern Trust Global Services SE, the fees due to the Depositary are calculated as 0.01% per annum of the Company's net assets for the execution of its duties as Custodian and Paying Agent, and 0.01% per annum of the Company's net assets for the execution of its duties as Depositary.

Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Depositary may use the services of one or more sub-custodians. The Depositary is entitled to reimbursement by the Company of reasonable out-of-pocket expenses incurred by it in performing its duties and the fees and charges of any correspondents and agents including any sub-custodians.

#### 5. Fund accounting fees

The fund accounting fees due to the Administrator are calculated as 0.02% per annum of each Sub-Fund's net assets.

#### 6. Management Company fees

The Management Company fees are calculated as 0.015% per annum of each Sub-Fund's net assets.

#### Notes to the Consolidated Financial Statements continued

#### 7. Other operating expenses

Other operating expenses represent amounts paid by the Company relating to the operations of the Sub-Funds. They include legal fees, audit fees, the cost of printing and distributing the prospectuses, Directors' fees, Directors' insurance fees, financial servicing fees, regulatory fees and other professional fees. They also include fees in connection with obtaining or maintaining any registration or authorisation of the Company with any governmental agency or stock exchange as well as the cost of publication of information, bank charges and other miscellaneous expenses.

#### Taxation

Under Luxembourg law, the Company is not subject to any taxes on income or capital gains. However, the Company is subject to the "Taxe d'abonnement" or "Subscription tax" of 0.01% per annum for all net assets attributable to Institutional, Institutional II and Institutional III, as well as any net assets in Sub-Funds whose exclusive object is collective investment in money market instruments and the placing of deposits with credit institutions; and 0.05% per annum for all net assets attributable to Retail, Retail II, Z, Z 2 and Z 3 Class Shares. This tax is payable quarterly and is calculated on the basis of the NAV of each Share class at the end of the relevant calendar quarter.

No subscription tax is paid on the assets held by the Sub-Funds in other undertakings for collective investment already subject to that tax in Luxembourg.

Exemption from subscription tax is available for Share classes which:

- are reserved for one or more Institutional Investors: and
- whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions; and
- where the weighted residual maturity of the portfolio does not exceed 90 days; and
- which have the highest possible rating of a recognised rating agency.

The Sub-Fund Ashmore SICAV is not subject to the UK reporting fund regime.

UK reporting status is granted retrospectively by the UK taxation authorities. The UK taxation authorities approved the reporting status applications for the Share classes where the Company made applications for the year ended 31 December 2021.

The current list of Share classes with UK reporting status and the effective dates when they entered into the UK reporting fund regime can be found on the hmrc.gov.uk website.

The Board of Directors intends to apply to the UK taxation authorities for UK reporting status for the year ended 31 December 2022 and for subsequent years if the Board of Directors deems it appropriate to do so.

### 9. Transaction costs

Transaction costs represent costs incurred by the Company in relation to the purchase and sale of transferable securities and costs incurred by the Company in relation to trade communication services. For further information on transaction costs, please refer to Supplementary Information – Direct transaction costs.

#### 17. Risk management

In pursuing their investment objectives, the Sub-Funds enter into investment transactions in financial instruments which give exposure to a variety of financial and operational risks, including market risk (comprising price risk, interest rate risk and currency risk), liquidity risk and credit risk. Further information on these risks and how they are mitigated is set out below.

All investment strategies are approved by the Investment Manager's Investment Committee and are minuted. Decisions are restricted by the policies contained in the Investment Committee Terms of Reference, the investment restrictions pertaining to UCITS funds, the investment restrictions pertaining to SICAVs and the investment restrictions specific to each Sub-Fund. The details of these investment restrictions are set out in the Company's Prospectus. With regard to portfolio construction, risk is monitored as an integral part of the investment decision making process. The Investment Committee also reviews risk exposure on a weekly basis and the portfolio of each Sub-Fund is monitored with regards to:

- Interest rate sensitivity, including duration
- Currency sensitivity
- Liquidity
- Volatility
- Credit

#### Notes to the Consolidated Financial Statements continued

#### 17. Risk management continued

Analysis includes:

- Global: Analysis of macro issues including global interest rates, liquidity and major events to determine portfolio duration, interest rate sensitivity and cash levels.
- Fundamental: Analysis of country macro-economic and financial fundamentals.
- Political: Analysis of country and international politics including policy dynamics as large changes result from political
  events and the understanding of incentive structures.
- Asset/Credit: Identification of fundamental value across countries globally and their respective assets.
- Technical/Market: Analysis of asset and market technicals, timing and dynamics.
- Portfolio Construction: Selection of assets using the Ashmore Portfolio Framework and adjustment of the portfolio to achieve:
  - Diversification and correlation objectives including those in relation to benchmarks;
  - Desired duration, principally through altering relative asset category proportions;
  - Desired interest rate sensitivity (through split between fixed and floating instruments);
  - Desired cash level;
  - Portfolio liquidity;
  - Conformity with the limits agreed for currency risk and portfolio volatility and the pre-specified investment restrictions.

The Sub-Funds are exposed to certain risk factors peculiar to investing in Emerging Markets. These require the consideration of matters not usually associated with investing in the securities of issuers in the developed capital markets of North America, Japan or Western Europe. The economic and political conditions in Emerging Markets differ from those in developed markets, and offer less social, political and economic stability. The value of investments in Emerging Markets may be affected by changes in exchange regulations, tax laws (including withholding taxes) or monetary policies. The absence, in many cases until relatively recently, of any move towards capital markets structures or to a free market economy means investing in Emerging Markets may be considered more risky than investing in developed markets.

# Market risk i) Price risk

The main risk arising from the financial instruments held by each Sub-Fund is price risk. All trading securities, investments and derivatives are recognised at fair value, and all changes in market conditions directly affect the results of operations of the Sub-Funds. Price risk primarily arises from uncertainty about the future prices of financial instruments held. The Investment Manager, acting in accordance with the Terms of Reference and each Sub-Fund's investment restrictions, regularly assesses the appropriate allocation of assets in order to minimise overall risks while continuing to follow the investment objectives. The investment restrictions are intended to ensure that each Sub-Fund's investments are appropriately diversified. Details of the investment portfolios as at the year-end date are disclosed in the Schedules of Investments.

#### ii) Interest rate risk

For Sub-Funds where a substantial portion of financial assets and liabilities are interest bearing, a key risk is fluctuations in the prevailing levels of market interest rates. This risk is managed through duration management and issue selection (the mix between fixed and floating instruments). Some Sub-Funds may also from time to time enter into transactions in derivative instruments and take short positions with a view to hedging the portfolio's interest rate exposure.

#### 17. Risk management continued

Market risk continued iii) Currency risk

The principal exposures to currency risk for the Sub-Funds arise from investments denominated in currencies other than US\$ and from derivative investments. The value of such investments may be affected favourably or unfavourably by fluctuations in exchange rates, notwithstanding any efforts made to hedge such fluctuations. The Sub-Funds may deal in derivative instruments and other synthetic products where investing in such vehicles would be more efficient, is required for legal, tax or regulatory reasons or would otherwise be to the advantage of the Shareholders. If, in the view of the Investment Manager, it is more efficient or cost effective, the Investment Manager may take exposure to the underlying local currency Emerging Market debt or other investments through synthetic products offered by third parties. The Investment Manager may sell investments or currencies short, including through the use of derivative instruments, in order to manage the Sub-Funds' currency risk through hedging. Details of the forward currency contracts held by the Sub-Funds at the year-end date are disclosed in note 11.

#### Liquidity risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The main liquidity risk for the Sub-Funds is the potential redemption of any Shares that Shareholders wish to sell. The Company's Prospectus provides for daily subscriptions and redemptions and it is therefore exposed to the liquidity risk of meeting Shareholder redemptions on a daily basis. The Sub-Funds mitigate this risk by holding a portion of their assets in securities that can be liquidated quickly at an amount close to fair value in order to meet liquidity requirements. The Sub-Funds also operate a Swing Pricing Policy as outlined in note 2c.

Some of the investments which the Sub-Funds may make are traded only on over-the-counter ("OTC") markets and there may not be an organised public market for such securities. The effect of this is to increase the difficulty of valuing the investments and until a market develops, certain investments may generally be illiquid. There may be no established secondary market for certain of the investments made by the Sub-Funds. Reduced secondary market liquidity may adversely affect the market price of the investments and the Sub-Funds' ability to dispose of particular investments to meet liquidity requirements or in response to specific events such as deterioration in the creditworthiness of any particular issuer. Due to the lack of adequate secondary market liquidity for certain securities, the Administrator may find it more difficult to obtain accurate security valuations for the purposes of valuing the Sub-Funds and calculating the NAVs. Valuations may only be available from a limited number of sources and may not represent firm bids for actual sales. In addition, the current or future regulatory regime may adversely affect liquidity.

#### Credit risk

The Sub-Funds are exposed to credit risk, which is the risk that a counterparty is unable to pay amounts in full when they fall due. The main concentration of credit risk for most Sub-Funds arises from investments in debt securities. The Sub-Funds are also exposed to counterparty credit risk if they invest in derivative products, and on their cash at bank and other debtor balances.

The Sub-Funds' policy to manage credit risk is to invest in debt securities that have been rated by established well-known rating agencies. The Investment Manager monitors the credit ratings of the Sub-Funds' counterparties, maintains an approved counterparty list and periodically reviews all counterparty limits. The breakdown of investments by credit rating for the Sub-Funds is disclosed in Other Information on Investments.

The Sub-Funds' financial instruments may include purchases of securities and other obligations of companies that are experiencing significant financial or business distress, including companies involved in bankruptcy or other reorganisation and liquidation proceedings. Although such purchases may result in significant returns, they involve a substantial degree of risk. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies or sovereign issuers experiencing significant business and financial distress is unusually high. There is no assurance that the Investment Manager will correctly evaluate the nature and magnitude of the various factors that could affect the prospects for a successful reorganisation or similar action. The completion of debt and/or equity exchange offers, restructurings, reorganisations, mergers, takeover offers and other transactions can be prevented or delayed, or the terms changed, by a variety of factors. If a proposed transaction appears likely not to be completed or in fact is not completed or is delayed, the market price of the investments purchased by a Sub-Fund may decline sharply and result in losses which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

#### Notes to the Consolidated Financial Statements continued

#### 17. Risk management continued

#### Credit risk continued

The administrative costs in connection with a bankruptcy or restructuring proceeding are frequently high and will be paid out of the debtor's assets prior to any return to creditors (other than out of assets or proceeds thereof, which may be subject to valid and enforceable liens and other security interests) and equity holders. In addition, certain claims that have priority by law over the claims of other creditors (for example, claims for taxes) may reduce any entitlement of the Sub-Funds. In any reorganisation or liquidation proceeding relating to a company or sovereign issuance in which a Sub-Fund invests, the Sub-Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment. Under such circumstances, the returns generated from such investments may not compensate investors adequately for the risks assumed, which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

It is frequently difficult to obtain accurate information as to the condition of distressed entities. Such investments may be adversely affected by laws relating to, among other things, fraudulent transfers and other voidable transfers or payments, lender liability and the bankruptcy court's power to disallow, reduce, subordinate or disenfranchise particular claims. The market prices of such securities are subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and offer prices of such securities may be greater than those prevailing in other securities markets.

Substantially all of the assets of the Sub-Funds are held with the Custodian which is an indirect wholly-owned subsidiary of the Northern Trust Corporation. Bankruptcy or insolvency of the Custodian may cause the Sub-Funds' rights with respect to cash and securities held by the Custodian to be delayed or limited. This risk is managed by monitoring the credit quality and financial positions of the Custodian that the Sub-Funds use. The credit rating as at 31 December 2022, of the Northern Trust Corporation was A+. Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Custodian may use the services of one or more sub-custodians.

#### Global exposure

The Management Company uses a risk management process which enables it to assess the exposure of each of the Sub-Funds to market, liquidity, counterparty and operational risks, which are material for the Sub-Fund. As part of the risk management process, the Management Company calculates the global exposure of each Sub-Fund by using either the commitment approach or the Value-at-Risk (VaR) methodology. The methodology used depends on an assessment of the risk profile of the relevant Sub-Fund resulting from its policy (including but not limited to its potential use of financial derivative instruments and features thereof) in accordance with relevant European and Luxembourg laws and regulations. In the interest of the Shareholders, the Company has determined that the Management Company will, as a default, use the commitment approach to monitor and measure the global exposure of each Sub-Fund unless otherwise specified for a particular Sub-Fund. This approach measures the global exposure related to positions in financial derivative instruments and other efficient portfolio management techniques which, unless otherwise specified for a particular Sub-Fund, may not exceed the total net value of the portfolio of the relevant Sub-Fund. The global risk on derivatives has been determined according to the commitment approach for all Sub-Funds during the reporting year from 1 January 2022 until 31 December 2022.

#### 18. Fair value measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants at the measurement date.

For certain of the Company's financial instruments, including cash at bank, repurchase agreements, amounts payable on the purchase of investments/receivable on the sale of investments, amounts receivable on subscriptions/payable on redemptions, accrued income, prepaid/accrued expenses and other receivables, their carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The Company's investments and financial derivative instruments are carried at market value which approximates fair value.

The Company classifies financial instruments within a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

**Level 1** inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

#### 18. Fair value measurement continued

**Level 2** inputs are observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including:

- quoted prices for similar assets or liabilities in active markets;
- · quoted prices for identical or similar assets or liabilities in markets that are not active;
- · inputs other than quoted prices that are observable for the asset or liability;
- · inputs that are derived principally from or corroborated by an observable market.

Level 3 inputs are unobservable inputs for the asset or liability.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgement. The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

**Investments:** Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities, certain US government and sovereign obligations, and certain money market securities. The Company does not adjust the quoted price for such instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These may include government and sovereign obligations, government agency securities, corporate bonds, and municipal and provincial obligations.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments may include private equity and real estate investments, certain loan participations, less liquid corporate debt securities (including distressed debt instruments), collateralised debt obligations and collective investment schemes. Also included in this category are government and sovereign obligations, government agency securities and corporate bonds for which independent broker prices are used and information relating to the inputs of the price models is not observable.

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

A quantitative fair valuation model is supplied by ITG to produce factors. ITG monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by ITG for equities and are applied by the Administrator to the daily NAV calculations.

As at 31 December 2022, the NAVs of equity securities were adjusted in this manner.

When observable prices are not available; e.g. if an asset does not trade regularly, the Administrator may rely on information provided by any person, firm or entity including any professional person whom the Directors consider to be suitably qualified to provide information in respect of the valuation of investments and who is approved by the Custodian (an "Approved Person"). Approved Persons may include certain brokers and the Pricing Methodology and Valuation Committee ("PMVC") of the Investment Manager.

#### Notes to the Consolidated Financial Statements continued

#### 18. Fair value measurement continued

The PMVC may, upon request, provide assistance to the Administrator in determining a methodology for valuing assets where the Administrator cannot determine a price or methodology from another source. It is the Administrator's responsibility to determine whether to use any such assistance provided by the PMVC. These assets, which are classified within Level 3, may include all asset types but are frequently 'Special Situations' type investments, typically incorporating distressed, illiquid or private investments.

For these hard-to-value investments, the methodology and models used to determine fair value are created in accordance with the International Private Equity and Venture Capital Valuation ("IPEV") guidelines. Smaller investments may be valued directly by the PMVC but material investments are valued by experienced personnel at an independent third-party valuation specialist. Such valuations are subject to review, amendment if necessary, then approval by the PMVC. The valuations are ultimately approved by the Directors and subsequently reviewed by auditors as they make up part of the NAV in the consolidated financial statements.

Valuation techniques used include the market approach, the income approach or the cost approach depending on the availability of reliable information. The market approach generally consists of using; comparable transactions, earnings before interest, tax, depreciation and amortisation ("EBITDA") multiples; or enterprise value ("EV") multiples (based on comparable public company information). The use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as deemed appropriate for liquidity, credit, market and/or other risk factors.

Inputs used in estimating the value of investments may include the original transaction price, recent transactions in the same or similar instruments, completed or pending third-party transactions in the underlying investment or comparable issuers, subsequent rounds of financing, recapitalisations and other transactions across the capital structure, offerings in the equity or debt capital markets and bids received from potential buyers.

For the determination of the NAV, Level 3 investments may be adjusted to reflect illiquidity and/or non-transferability. However, any such adjustments are typically reversed in the consolidated financial statements where it is required by the accounting standards.

The Company believes that its estimates of fair value are appropriate, however estimates and assumptions concerning the future, by definition, seldom equal the actual results and the estimated value may not be realised in a current sale or immediate settlement of the asset or liability. The use of different methodologies, assumptions or inputs would lead to different measurements of fair value and given the number of different factors affecting the estimate, specific sensitivity analysis cannot be reliably quantified.

**Financial Derivative Instruments**: Financial derivative instruments can be exchange-traded or privately negotiated OTC. Exchange-traded derivatives, such as futures contracts and exchange-traded options contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

OTC derivatives, including forwards, credit default swaps, interest rate swaps and currency swaps, are valued using observable inputs, such as quotations received from the counterparty, dealers or brokers, whenever these are available and considered reliable. In instances where models are used, the value of an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability and reliability of observable inputs. Such inputs include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. Certain OTC derivatives, such as generic forwards, swaps and options contracts, have inputs which can generally be corroborated by market data and are therefore classified within Level 2.

Those OTC derivatives that have less liquidity or for which inputs are unobservable are classified within Level 3. While the valuations of these less liquid OTC derivatives may utilise some Level 1 and/or Level 2 inputs, they also include other unobservable inputs which are considered significant to the fair value determination.

#### 18. Fair value measurement continued

The following tables present the assets and liabilities that are measured at fair value on a recurring basis as at 31 December 2022 in US\$.

### 19. Additional information concerning representation in Germany

Deutsche Bank AG, TSS post-IPO Services, Taunusanlage 12, 60325 Frankfurt am Main, acts as the German representative of the Company and carries out the function of the Company's paying agent in relation to Shares distributed in or from Germany.

### 20. Additional information concerning representation in Switzerland

The Directors have appointed BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, 8002 Zurich, as the Company's representative and paying agent for Switzerland. In accordance with Article 124 CISA, BNP PARIBAS, Paris, Zurich branch, represents the Company vis-à-vis the investors and the Swiss Financial Market Supervisory Authority FINMA. For Shares distributed in or from Switzerland, the performance place is at the BNP PARIBAS, Paris, Zurich branch address. Investors can obtain the following information free of charge from the representative at the above address: the Prospectus, the Key Investor Information Document ("KIDs") (both of which are also available for potential investors), the most recent audited annual and unaudited semi-annual reports, copies of the Articles of Incorporation and any amendments thereto, in German, and a list of the purchases and sales made on behalf of the Company. Publications in respect of the foreign collective investment scheme are made in Switzerland on the electronic platform of fundinfo AG (www.fundinfo.com). The issue and the redemption prices or the NAV together with a footnote stating that these figures are "excluding commissions" are published daily on www.fundinfo.com.

### Notes to the Consolidated Financial Statements continued

### 21. Commitments

In relation to its investments, the Company may from time to time agree to indemnify and/or pre-fund trustees or other agents, either solely or alongside other creditors on a several basis. Generally, such agreements do not have a termination date. The Directors are not aware of and do not currently expect any claims to be made against the Company under any such indemnity or pre-funding agreements.

#### 22. Significant events during the year

On 24 February 2022, Russia invaded Ukraine. The combination of the Russian invasion and the resultant sanctions imposed by the US and other governments is impacting liquidity and asset values in Russia, Ukraine and Belarus. Certain Sub-Funds continue to hold investments in Ukraine and Russia. While exposure is limited, the value and liquidity of these investments has been impacted and consequently, the performance of these Sub-Funds has been impacted.

John Gregory tendered his resignation as a Director of the Company and was replaced by Juraj Pekar. Mr. Gregory's resignation and Mr. Pekar's appointment were effective on the same date, following approval by the Commission de Surveillance du Secteur Financier (CSSF) on 20 April 2022.

There were no other significant events during the year.

#### 23. Subsequent events

Juraj Pekar tendered his resignation as a Director of the Company on 7 March 2023, he has not been replaced.

The Ashmore SICAV Emerging Markets Shariah Active Equity Fund, the Ashmore SICAV India Equity Fund, the Ashmore SICAV Emerging Markets Total Return Fund 2 and the Ashmore Emerging Markets Sovereign Debt Fund 2 are due to launch in H2 2023.

The Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund and the Ashmore SICAV Emerging Markets Total Return ESG Fund are due to close in H2 2023.

During H2 2023, it is intended to amend the investment objectives and policies of the following seven Sub-Funds of the Company: the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund 2, the Ashmore SICAV Emerging Markets Equity Fund, the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets Corporate Debt Fund and reclassify the sub-Funds from Article 6 to Article 8 pursuant to the EU Sustainable Financial Disclosure Regulation (SFDR).

There were no other significant events subsequent to the year-end date that require adjustment to, or disclosure in, the consolidated financial statements.

# **Supplementary Information (unaudited)**

### Reconciliation of differences between US GAAP and Luxembourg GAAP

FASB ASC 946-20-25 Paragraphs 7-8, Recognition – Capital Share Transactions, requires that subscriptions and redemptions received on the last valuation day of the year be included in the year-end NAV of the Sub-Funds, whereas under Luxembourg GAAP they are recorded subsequent to the year end. There are no other reconciling items between the figures in these financial statements published in accordance with Luxembourg GAAP and their equivalent published in accordance with US GAAP. A reconciliation of these differences for US\$ denominated Share classes is provided below:

	Luxembourg GAAP	Subscriptions (including equalisation)	Redemptions (including equalisation)	US GAAP
Ashmore SICAV Emerging Markets Sovereign Debt				
Fund				
Total number of shares	4,976,794	_	(1,948)	4,974,846

NAV per Share (US\$)*	173.05	173.05	_	173.05

<sup>\*</sup> As the number of Shares are shown without decimals, a decimal mismatch might occur when recalculating the NAV per Share.

The other US\$ Share classes of the Sub-Funds did not have any reconciling items between US GAAP and Luxembourg GAAP as at 31 December 2022.

### **Direct transaction costs**

In accordance with the Statement of Recommended Practice (SORP) issued by the UK Pensions Research Accountants Group (PRAG) in November 2014, as amended, direct transaction costs incurred by UK Pension Schemes must be disclosed in their annual reports. Purchases and sales of investments made by Ashmore SICAV Sub-Funds are recorded net of direct transaction costs, which are included separately in "Transaction costs" in the Consolidated Statement of Operations and Changes in Net Assets.

# **Direct transaction costs continued**

There were no direct transaction costs incurred by the other Sub-Funds during the year ended 31 December 2022.

In most instances there are no direct transaction costs on bonds, but in addition to the direct transaction costs disclosed above, indirect costs are incurred through the bid-offer spread. Investments in pooled vehicles may incur transaction costs on the purchase or sale of investments within those vehicles.

#### **Remuneration Disclosures**

Ashmore Investment Management (Ireland) Limited ("AIMIL") is authorised by the Central Bank of Ireland, as a UCITS Management Company pursuant to the Regulations European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and as an Alternative Investment Fund Managers ("AIFM") pursuant to the European Union (Alternative Investment Fund Managers Directive) Regulations, 2013, as amended, consolidated or substituted from time to time.

AlMIL, a member of the Ashmore Group plc, recognises the important role played by sound risk management in protecting its stakeholders.

The remuneration policy and remuneration principles described therein are designed to align the risk taking behaviour of staff with AIMIL's risk appetite and ensure that AIMIL is able to attract, retain and motivate highly qualified staff in order to produce long-term value creation for shareholders.

### **Remuneration Disclosures continued**

The Board of AIMIL has primary responsibility for ensuring that the ultimate goal of having sound and prudent remuneration policies and structures is not improperly circumvented.

AIMIL is not "significant" with respect to its internal organisation in the context of the UCITS Regulations and AIFM Regulations and respective ESMA Guidelines and as such has not established a remuneration committee.

AlMIL's remuneration policy applies to "identified staff" who are staff members considered to have a material impact on AlMIL's risk profile. The remuneration policy sets out in detail how AlMIL categorises staff so as to include; senior management, risk takers, control functions and other well remunerated staff who have a material impact on the risk profiles of AlMIL or of the funds which it manages.

Under the remuneration policy, remuneration consists of all forms of payments or benefits made directly by, or indirectly, but on behalf of AlMIL, in exchange for professional services rendered by staff. This includes where appropriate:

- (i) all forms of payments or benefits paid by AIMIL; and/or
- (ii) any awards of shares in AIMIL's parent company.

The remuneration policy recognises in deciding the mix between fixed and variable remuneration of identified staff, AIMIL is mindful of the need to ensure that the basic pay of staff is adequate to remunerate the professional services rendered taking into account, inter alia, the level of education, the degree of seniority, the level and expertise and skills required and that variable remuneration is an important tool to incentivise staff.

The remuneration policy provides AIMIL with flexibility such that, in years where AIMIL or indeed Ashmore Group plc performs poorly, variable remuneration may be reduced or eliminated and the capital of AIMIL can be preserved. Because AIMIL is part of a group which is an Emerging Markets focussed investment management business, its revenues may be more volatile than other non-cyclical businesses. Variable remuneration allows AIMIL to reduce the risk that its capital base is eroded due to the need to pay fixed remuneration cost should revenues decline. For these reasons, AIMIL's ratio of variable pay to fixed pay may be higher than other businesses with more steady income streams.

When establishing and applying the total remuneration, inclusive of salaries and pension benefits for identified staff, AIMIL takes into account the general principles set out in the remuneration policy in a way and to the extent that is appropriate taking into account its size, internal organisation and the nature, scope and complexity of its activities.

Following the finalisation of both AIMIL's and Ashmore Group plc's annual financial statements and after the publication of Ashmore Group plc's annual results to the market, usually during September, AIMIL shall decide what, if any, variable compensation to award identified staff taking into account a number of factors set out in the remuneration policy and applicable legislation and regulation.

The AIMIL remuneration policy is reviewed and agreed at least annually by the Board of Directors of AIMIL.

### **Delegation**

In accordance with the ESMA Guidelines, where the applicable remuneration rules would otherwise have been circumvented, AIMIL sought to ensure that affected delegates (i.e. those entities to which investment activities have been delegated) are subject to regulatory requirements on remuneration that are "equally as effective" as those applicable under the ESMA Guidelines or that appropriate contractual agreements are in place to ensure that the delegation arrangements do not circumvent the remuneration requirements contained therein.

### Remuneration

The total staff remuneration of AIMIL for the year ended 30 June 2022 was as follows:

	Number of beneficiaries	Variable remuneration	Fixed remuneration	Total remuneration
Ashmore SICAV	10	EUR 435,517	EUR 829,075	EUR 1,264,592
Total AIMIL	10	EUR 435,517	EUR 829,075	EUR 1,264,592

### **Sustainable Finance Disclosure Regulation (SFDR)**

#### **Environmental and social characteristics promoted by the ESG Sub-Funds**

The following Sub-Funds comply with Article 6 requirements: the Ashmore SICAV Emerging Markets Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets China Bond Fund, the Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund 2, the Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund, the Ashmore SICAV Emerging Markets Absolute Return Debt Fund, the Ashmore SICAV Emerging Markets Total Return Fund, the Ashmore SICAV Emerging Markets Investment Grade Total Return Fund, the Ashmore SICAV Emerging Markets Multi-Asset Fund, the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets Investment Grade SICAV Emerging Markets Asian High Yield Debt Fund, the Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund, the Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund, the Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund, the Ashmore SICAV Emerging Markets Active Equity Fund, the Ashmore SICAV Emerging Markets Investments underlying these financial and the Ashmore SICAV Emerging Markets Investments underlying these financial and the Ashmore SICAV

and the Ashmore SICAV The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities. In addition, these Sub-Funds do not consider principle adverse impacts.

The Prospectus explained the responsible investment approach adopted in relation to the Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund, the Ashmore SICAV Emerging Markets Total Return ESG Fund, the Ashmore SICAV Emerging Markets Corporate Debt ESG Fund and the Ashmore SICAV Emerging Markets Equity ESG Fund (all classified as Article 8 products). This approach entailed the application of the ESG Scoring Process (as described in the Prospectus) and the exclusion of certain industry sectors at the pre-investment stage. Over the past year, the ESG Scoring Process and the Investment Manager's industry exclusion policies have been applied as described and the Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund, the Ashmore SICAV Emerging Markets Total Return ESG Fund, the Ashmore SICAV Emerging Markets Corporate Debt ESG Fund and the Ashmore SICAV Emerging Markets Equity ESG Fund only invested in those issuers satisfying the ESG Scoring Threshold (as defined in the Prospectus) and not excluded under the Investment Manager's industry exclusion policies. These pre-investment scores and industry sector exclusions have been formally reviewed to ensure that each issuer still meets the ESG Scoring Threshold and the industry sector exclusions are still complied with.

This paragraph has been included pursuant to Article 11(1)(a) of EU Regulation (2019/2088) which requires the Management Company to describe the extent to which environmental and social characteristics of the Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund, the Ashmore SICAV Emerging Markets Total Return ESG Fund, the Ashmore SICAV Emerging Markets Corporate Debt ESG Fund and the Ashmore SICAV Emerging Markets Equity ESG Fund have been met.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund (the "Sub-Fund")

Legal entity identifier: 5493004XUAIHOLNRXQ34

# Environmental and/or social characteristics

Did this financial product have a sustai	nable investment objective?
• • Yes	• X No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are: 1) the exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria, 2) the reduction of exposure to Quasi-Sovereign issuers which are corporates operating in certain industry sectors and 3) in respect of Quasi-Sovereign issuers only, being managed to be aligned with net zero by 2050. The extent to which these characteristics were met is each explained in more detail below:

- 1) Exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria: The Sub-Fund did not invest in any issuer rated below 4 based on the application of the ESG Scoring Process (as defined below).
- Reduction of exposure to Quasi-Sovereign issuers which are corporates operating in certain industry sectors: None of the Sub-Fund's investments were in violation of the industry sector exclusion policies of Ashmore Investment Management Limited (the "Investment Manager").
- 3) In respect of Quasi-Sovereign issuers only, being managed aligned with net zero by 2050: The Sub-Fund was managed in a way which was aligned with the expectations of the Net Zero Asset Manager Initiative (NZAMI) framework in respect of investments in Quasi-Sovereign issuers which are corporates. At the present date, the framework does not include a methodology for how to apply decarbonisation targets for Sovereigns (as defined in the prospectus of Ashmore SICAV).

"ESG Scoring Process" means the scoring process of the Investment Manager whereby the Investment Manager issues a score to each issuer, based on their historical and current performance, taking into account the environmental, social or governance risks that an issuer may present, the performance of each issuer against environmental, social or governance factors that is drawn from a range of data sources. Such process of which is subject to change. The Investment Manager uses various tools to determine the most material ESG factors by industry (including Sovereigns and Quasi-Sovereigns, as applicable) by reviewing available information. The Investment Manager is a signatory of global initiatives including the United Nations supported Principles for Responsible Investment (UNPRI), and the UN Global Compact.

"Quasi-Sovereign" means an entity (including a local or regional governmental body) that is 100% guaranteed by a Sovereign or 100% directly or indirectly owned or controlled by a Sovereign.

# How did the sustainability indicators perform?

In addition, the Investment Manager considered the following issues when assessing the environmental and social characteristics of the Sub-Fund:

- 1) 100% of the Sub-Fund's investments met the ESG Scoring Threshold (as defined below) (i.e. scored a combined score of at least 4 according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores).
  - In addition, as of 31 December 2022, the overall ESG score of the Sub-Fund was 16.6 out of 30.
- 100% of the Sub-Fund's investments in Quasi-Sovereign issuers which are corporates were in compliance with the Investment Manager's industry sector exclusion policies.
- 3) The Sub-Fund's Weighted Average Carbon Intensity (WACI) in respect of Quasi-Sovereign issuers which are corporates was compliant with the interim targets for 2025 and 2030.

Quasi-Sovereigh issuers represented 3.8% of the NAV of the Sub-Fund as of 31 December 2022.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental,

social and employee matters, respect for

human rights, anti-

corruption and anti-

bribery matters.

"ESG Scoring Threshold" means issuers that score a combined score of 3 or less according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores. Issuers below this ESG Scoring Threshold are not permissible investments for the Sub-Fund. The ESG Scoring Process of the Investment Manager takes into account material ESG factors that are relevant to the specific assets in the Sub-Fund and compliant with the Investment Manager's industry exclusion policies.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager took into account the relevant indicators for principal adverse sustainability impacts in the Annex I of the RTS, having regard to their materiality. Such indicators were and are being employed in Ashmore's ESG Scoring Process which considers the relevant principal adverse sustainability impacts on sustainability factors.

## What were the top investments of this financial product?

For year ending 31 December 2022:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: [Q1 2022 – Q4 2022]

Largest investments	Sector	% Assets	Country

State of Qatar 3.75% 16/04/2030 (Regs)	SOVEREIGN	2.47	Qatar
United Mexican States 4.5% 22/04/2029	SOVEREIGN	2.44	Mexico
Rep of Chile 3.24% 06/02/2028	SOVEREIGN	2.38	Chile
Republic of Chile 2.75% 31/01/2027	SOVEREIGN	2.36	Chile

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

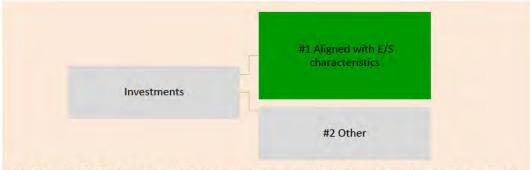

As at 31 December 2022, 90.6% of the Sub-Fund's investments exhibited the environmental and/or social characteristics promoted by the Sub-Fund in accordance with the binding elements of its investment strategy (#1 Aligned with E/S characteristics).

As at 31 December 2022, the Sub-Fund also invested 9.4% of its NAV in cash and/or hedging instruments (for such hedging instruments calculated using mark to market), which were excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

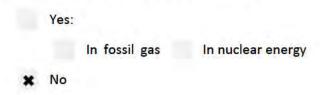

The Sub-Fund was invested in Sovereigns and Quasi-Sovereigns.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has not committed to invest in any EU Taxonomy aligned investments. The share of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy was not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

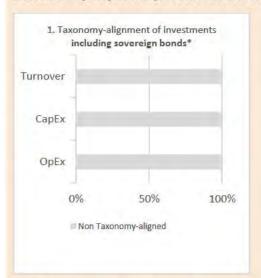

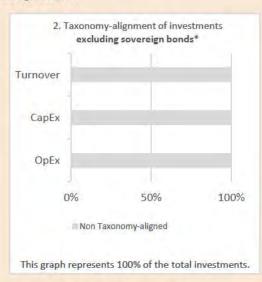

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Not applicable. The Sub-Fund has not committed to invest in any minimum share of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with an environmental objective.

What was the share of socially sustainable investments?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund, on an ancillary basis, held cash and used financial derivative instruments for the purpose of hedging ("Other Assets"). The Other Assets were excluded from the attainment of the environmental and/or social characteristics promoted by the Sub-Fund considering their nature.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For year ending 31 December 2022, the Sub-Fund:

- 1. excluded issuers rated below 4 based on the application of the ESG Scoring Process;
- 2. excluded the sectors covered by the Investment Manager's industry exclusion policies; and
- considered the interim decarbonisation target of 2025 by NZAMI signatories as it relates to Quasi-Sovereigns issuers which are corporates.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?

  Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ashmore SICAV Emerging Markets Total Return ESG Fund (the "Sub-Fund")

Legal entity identifier: 5493007TKWZ1TTJNSQ13

# Environmental and/or social characteristics

Did this financial product have a sustai	inable investment objective?
• • Yes	• X No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are: 1) the exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria, 2) the reduction of exposure to Quasi-Sovereign issuers which are corporates operating in certain industry sectors and 3) in respect of Quasi-Sovereign issuers only, being managed to be aligned with net zero by 2050. The extent to which these characteristics were met is each explained in more detail below:

- 1) Exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria: The Sub-Fund did not invest in any issuer rated below 4 based on the application of the ESG Scoring Process (as defined below).
- 2) Reduction of exposure to Corporates and Quasi-Sovereign issuers which are corporates operating in certain industry sectors: None of the Sub-Fund's investments were in violation of the industry sector exclusion policies of Ashmore Investment Management Limited (the "Investment Manager").
- 3) In respect of Corporates and Quasi-Sovereign issuers only, being managed aligned with net zero by 2050: The Sub-Fund was managed in a way which was aligned with the expectations of the Net Zero Asset Manager Initiative (NZAMI) framework in respect of investments in Quasi-Sovereign issuers which are corporates. At the present date, the framework does not include a methodology for how to apply decarbonisation targets for Sovereigns (as defined in the prospectus of Ashmore SICAV).

"ESG Scoring Process" means the scoring process of the Investment Manager whereby the Investment Manager issues a score to each issuer, based on their historical and current performance, taking into account the environmental, social or governance risks that an issuer may present, the performance of each issuer against environmental, social or governance factors that is drawn from a range of data sources. Such process of which is subject to change. The Investment Manager uses various tools to determine the most material ESG factors by industry (including Sovereigns and Quasi-Sovereigns, as applicable) by reviewing available information. The Investment Manager is a signatory of global initiatives including the United Nations supported Principles for Responsible Investment (UNPRI), and the UN Global Compact.

"Quasi-Sovereign" means an entity (including a local or regional governmental body) that is 100% guaranteed by a Sovereign or 100% directly or indirectly owned or controlled by a Sovereign.

## How did the sustainability indicators perform?

In addition, the Investment Manager considered the following issues when assessing the environmental and social characteristics of the Sub-Fund:

- 1) 100% of the Sub-Fund's investments met the ESG Scoring Threshold (as defined below) (i.e. scored a combined score of at least 4 according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores).
  - In addition, as of 31 December 2022, the overall ESG score of the Sub-Fund was 17.4 out of 30.
- 2) 100% of the Sub-Fund's investments in corporates and Quasi-Sovereign issuers which are corporates were in compliance with the Investment Manager's industry sector exclusion policies.
- 3) The Sub-Fund's Weighted Average Carbon Intensity (WACI) in respect of corporates and Quasi-Sovereign issuers which are corporates was compliant with the interim targets for 2025 and 2030.

**"ESG Scoring Threshold"** means issuers that score a combined score of 3 or less according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores. Issuers below this ESG Scoring Threshold are not permissible investments for the Sub-Fund. The ESG Scoring Process of the Investment Manager takes into account material ESG factors that are relevant to the specific assets in the Sub-Fund and compliant with the Investment Manager's industry exclusion policies.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager took into account the relevant indicators for principal adverse sustainability impacts in the Annex I of the RTS, having regard to their materiality. Such indicators were and are being employed in Ashmore's ESG Scoring Process which considers the relevant principal adverse sustainability impacts on sustainability factors.

Principal adverse

impacts are the

most significant negative impacts of

sustainability factors

social and employee matters, respect for

human rights, anti-

corruption and anti-

bribery matters.

# What was the proportion of sustainability-related investments?

### What was the asset allocation?

As at 31 December 2022, 92.51% of the Sub-Fund's investments exhibited the environmental and/or social characteristics promoted by the Sub-Fund in accordance with the binding elements of its investment strategy (#1 Aligned with E/S characteristics).

As at 31 December 2022, the Sub-Fund also invested 7.49% of its NAV in cash and/or hedging instruments (for such hedging instruments calculated using mark to market), which were excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Asset allocation describes the share of investments in specific assets. To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

## In which economic sectors were the investments made?

The Sub-Fund was invested in Sovereigns and Quasi-Sovereigns.

As at 31 December 2022, the Sub-Fund was also invested in corporates and the main sectors were Industrial, Financial, Consumer, Communications, Energy, Utiliites.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has not committed to invest in any EU Taxonomy aligned investments. The share of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy was not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

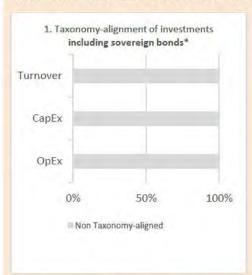

Yes:

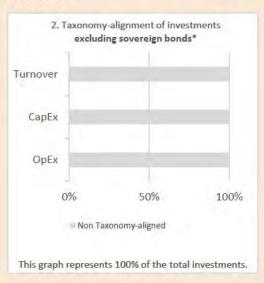

In fossil gas

In nuclear energy

\* No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable. The Sub-Fund has not committed to invest in any minimum share of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with an enviornmental objective.

sustainable

criteria for

2020/852.

environmentally sustainable economic activities under

Regulation (EU)

investments with an environmental

objective that do not take into account the

What was the share of socially sustainable investments?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund, on an ancillary basis, held cash and used financial derivative instruments for the purpose of hedging ("Other Assets"). The Other Assets were excluded from the attainment of the environmental and/or social characteristics promoted by the Sub-Fund considering their nature.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For year ending 31 December 2022, the Sub-Fund:

- excluded issuers rated below 4 based on the application of the ESG Scoring Process;
- 2. excluded the sectors covered by the Investment Manager's industry exclusion policies; and
- considered the interim decarbonisation target of 2025 by NZAMI signatories as it relates to corporates and Quasi-Sovereigns issuers which are corporates.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ashmore SICAV Emerging Markets Corporate Debt ESG Fund (the "Sub-Fund")

Legal entity identifier: 549300MM1M5BZQQ4ST04

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are: 1) the exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria, 2) the reduction of exposure to issuers which are corporates operating in certain industry sectors and 3) being managed to be aligned with net zero by 2050. The extent to which these characteristics were met is each explained in more detail below:

- 1) Exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria: The Sub-Fund did not invest in any issuer rated below 4 based on the application of the ESG Scoring Process (as defined below).
- 2) Reduction of exposure to corporates operating in certain industry sectors: None of the Sub-Fund's investments in corporates were in violation of the industry sector exclusion policies of Ashmore Investment Management Limited (the "Investment Manager").
- 3) Being managed aligned with net zero by 2050 for corporates: The Sub-Fund was managed in a way which was aligned with the expectations of the Net Zero Asset Manager Initiative (NZAMI) framework.

"ESG Scoring Process" means the scoring process of the Investment Manager whereby the Investment Manager issues a score to each issuer, based on their historical and current performance, taking into account the environmental, social or governance risks that an issuer may present, the performance of each issuer against environmental, social or governance factors that is drawn from a range of data sources. Such process of which is subject to change. The Investment Manager uses various tools to determine the most material ESG factors by industry by reviewing available information. The Investment Manager is a signatory of global initiatives including the United Nations supported Principles for Responsible Investment (UNPRI), and the UN Global Compact.

# How did the sustainability indicators perform?

In addition, the Investment Manager considered the following issues when assessing the environmental and social characteristics of the Sub-Fund:

- 1) 100% of the Sub-Fund's investments met the ESG Scoring Threshold (as defined below) (i.e. scored a combined score of at least 4 according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores).
  - In addition, as of 31 December 2022, the overall ESG score of the Sub-Fund was 19.4 out of 30.
- 2) 100% of the Sub-Fund's investments in corporates were in compliance with the Investment Manager's industry sector exclusion policies.
- 3) The Sub-Fund's Weighted Average Carbon Intensity (WACI) was compliant with the interim targets for 2025 and 2030.

"ESG Scoring Threshold" means issuers that score a combined score of 3 or less according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores. Issuers below this ESG Scoring Threshold are not permissible investments for the Sub-Fund. The ESG Scoring Process of the Investment Manager takes into account material ESG factors that are relevant to the specific assets in the Sub-Fund and compliant with the Investment Manager's industry exclusion policies.

### ...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager took into account the relevant indicators for principal adverse sustainability impacts in the Annex I of the RTS, having regard to their materiality. Such indicators were and are being employed in Ashmore's ESG Scoring Process which considers the relevant principal adverse sustainability impacts on sustainability factors.

## What were the top investments of this financial product?

# What was the proportion of sustainability-related investments?

# What was the asset allocation?

As at 31 December 2022, 93.92% of the Sub-Fund's investments exhibited the environmental and/or social characteristics promoted by the Sub-Fund in accordance with the binding elements of its investment strategy (#1 Aligned with E/S characteristics).

As at 31 December 2022, the Sub-Fund also invested 6.08% of its NAV in cash and/or hedging instruments (for such hedging instruments calculated using mark to market), which were excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

# Asset allocation describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### In which economic sectors were the investments made?

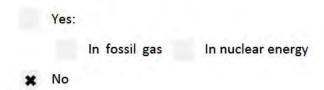

As at 31 December 2022, the Sub-Fund was invested in Industrial, Financial, Consumer, Energy, Basic materials, Utilities, Energy, Government, Technology and Communications sectors.

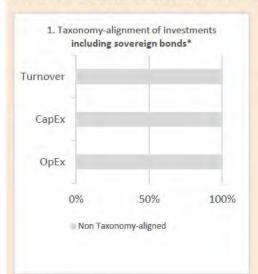

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

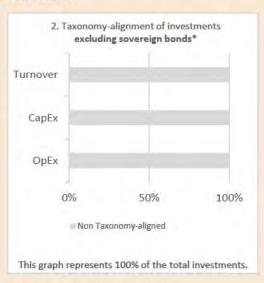

The Sub-Fund has not committed to invest in any EU Taxonomy aligned investments. The share of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy was not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. #### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ashmore SICAV Emerging Markets Equity ESG Fund (the "Sub-Fund")

Legal entity identifier: 5493005RC0WXXY1B2D63

# Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective? It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable investments with a social objective: %

companies follow good governance practices. The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

Sustainable investment means

an investment in an economic activity

that contributes to an environmental or social objective,

provided that the investment does not significantly harm any environmental or

social objective and

that the investee

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are: 1) the exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria, 2) the reduction of exposure to issuers which are corporates operating in certain industry sectors and 3) being managed to be aligned with net zero by 2050. The extent to which these characteristics were met is each explained in more detail below:

- 1) Exclusion of issuers having low ESG scores using Ashmore's proprietary ESG scoring criteria: The Sub-Fund did not invest in any issuer rated below 4 based on the application of the ESG Scoring Process (as defined below).
- 2) Reduction of exposure to corporates operating in certain industry sectors: None of the Sub-Fund's investments in corporates were in violation of the industry sector exclusion policies of Ashmore Investment Management Limited (the "Investment Manager").
- 3) Being managed aligned with net zero by 2050 for corporates: The Sub-Fund was managed in a way which was aligned with the expectations of the Net Zero Asset Manager Initiative (NZAMI) framework.

"ESG Scoring Process" means the scoring process of the Investment Manager whereby the Investment Manager issues a score to each issuer, based on their historical and current performance, taking into account the environmental, social or governance risks that an issuer may present, the performance of each issuer against environmental, social or governance factors that is drawn from a range of data sources. Such process of which is subject to change. The Investment Manager uses various tools to determine the most material ESG factors by industry by reviewing available information. The Investment Manager is a signatory of global initiatives including the United Nations supported Principles for Responsible Investment (UNPRI), and the UN Global Compact.

# How did the sustainability indicators perform?

In addition, the Investment Manager considered the following issues when assessing the environmental and social characteristics of the Sub-Fund:

- 1) 100% of the Sub-Fund's investments met the ESG Scoring Threshold (as defined below) (i.e. scored a combined score of at least 4 according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores).
  - In addition, as of 31 December 2022, the overall ESG score of the Sub-Fund was 19.6 out of 30.
- 2) 100% of the Sub-Fund's investments in corporates were in compliance with the Investment Manager's industry sector exclusion policies.
- 3) The Sub-Fund's Weighted Average Carbon Intensity (WACI) was compliant with the interim targets for 2025 and 2030.

**"ESG Scoring Threshold"** means issuers that score a combined score of 3 or less according to the ESG Scoring Process on any of the "E", "S" or "G" combined scores. Issuers below this ESG Scoring Threshold are not permissible investments for the Sub-Fund. The ESG Scoring Process of the Investment Manager takes into account material ESG factors that are relevant to the specific assets in the Sub-Fund and compliant with the Investment Manager's industry exclusion policies.

### ...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager took into account the relevant indicators for principal adverse sustainability impacts in the Annex I of the RTS, having regard to their materiality. Such indicators were and are being employed in Ashmore's ESG Scoring Process which considers the relevant principal adverse sustainability impacts on sustainability factors.

# What was the proportion of sustainability-related investments?

# What was the asset allocation?

As at 31 December 2022, 77.6% of the Sub-Fund's investments exhibited the environmental and/or social characteristics promoted by the Sub-Fund in accordance with the binding elements of its investment strategy (#1 Aligned with E/S characteristics).

As at 31 December 2022, the Sub-Fund also invested 22.24% of its NAV in cash and/or hedging instruments (for such hedging instruments calculated using mark to market), which were excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

# Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### In which economic sectors were the investments made?

As at 31 December 2022, the Sub-Fund was invested in Industrial, Financial, Consumer, Energy, Basic materials, Utilities, Energy, Technology and Communications sectors.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund has not committed to invest in any EU Taxonomy aligned investments. The share of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy was not applicable.

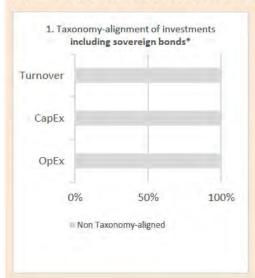

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

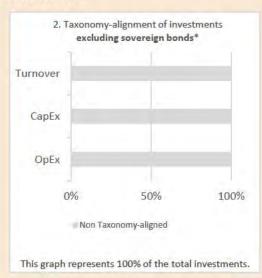

In nuclear energy

\* No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable. The Sub-Fund has not committed to invest in any minimum share of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

environmentally sustainable economic

activities under Regulation (EU)

investments with an

take into account the

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with an enviornmental objective.

What was the share of socially sustainable investments?

Not applicable. The Sub-Fund has not committed to invest in any sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund, on an ancillary basis, held cash and used financial derivative instruments for the purpose of hedging ("Other Assets"). The Other Assets were excluded from the attainment of the environmental and/or social characteristics promoted by the Sub-Fund considering their nature.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For year ending 31 December 2022, the Sub-Fund:

- 1. excluded issuers rated below 4 based on the application of the ESG Scoring Process;
- 2. excluded the sectors covered by the Investment Manager's industry exclusion policies; and
- considered the interim decarbonisation target of 2025 by NZAMI signatories as it related to corporates.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

# Report of the Réviseur d'Entreprises Agréé

To the Shareholders of Ashmore SICAV 10 rue du Château d'Eau L – 3364 Leudelange Grand-Duchy of Luxembourg

### Report on the audit of the financial statements

### **Opinion**

We have audited the financial statements of Ashmore SICAV and each of its Sub-Funds (the "Fund"), which comprise the Consolidated Statement of Net Assets and the Schedules of Investments as at 31 December 2022 and the Consolidated Statement of Operations and Changes in Net Assets for the year then ended, and Notes to the Consolidated Financial Statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and each of its Sub-Funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### **Basis for opinion**

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « "Responsibilities of réviseur d'entreprises agréé" for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

# Valuation and existence of the investment portfolios (Refer to note 2d)

Why the matter was considered to be one of the most significant to the audit?

The investment portfolios at market value represent between 54.62% and 102.27% of total net assets (by value) as at 31 December 2022 depending on Sub-Fund, and are considered to be the key driver of the Fund's performance. The market values of the majority of the Fund's investments are based on quoted prices in active markets or observable inputs. Accordingly, the valuations of investments in securities are considered to be a key audit matter due to the significance of the balances to the financial statements as a whole.

How the matter was addressed in our audit?

We have performed the following procedures:

- for the majority of the investments we compared the valuation of the investments in the portfolios as at year end to valuations recalculated using externally quoted prices and for the other remaining investments, where quoted prices were unavailable, we verified that the valuations were performed in accordance with the valuation policies described in note 2d; and
- agreed holdings in the Schedule of Investments as at year end to independently received depositary confirmations.

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

# Report of the Réviseur d'Entreprises Agréé

# Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its Sub-Funds or to cease operations, or has no realistic alternative but to do so.

# Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation  $N^{\circ}$  537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its Sub-Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its Sub-Funds to cease to continue as a going concern.
- Evaluate the overall presentation structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

### Report on other legal and regulatory requirements

We have been appointed as "réviseur d'entreprises agréé" by the General Meeting of the shareholders on 27 April 2022 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 20 years.

We confirm that the prohibited non-audit services referred to in the EU Regulation No 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.
