General information

GENERAL

All information concerning the SICAV is published in newspapers designated by the Board of Directors and, if required by law, in the Mémorial, the official gazette of Luxembourg, and deposited with the Registrar of the Luxembourg District Court.

The marketing of the SICAV may give rise to the remuneration of distributors as stated in the prospectus. These distributors are entities of the Edmond de Rothschild Group, like for example Edmond de Rothschild Asset Management (France) which consequently receives up to 50% of Management and Distribution fees and 20% of performance/outperformance fees.

The articles of incorporation have been deposited with the Registrar of the Luxembourg District Court, where they are available for inspection and where copies may be obtained.

The issue and redemption prices of shares of each Sub-Fund are made public at the registered office of the SICAV, where the annual and semiannual reports may be obtained.

Investors residing in Germany can receive, free of charge, from the German Payments and Information Office the prospectus, the articles of association of the investment company and the most recent report on activities and insofar as subsequently published, also the latest semi-annual report, as well as requesting the net asset value per share, the current issue, exchange and redemption prices of the shares and all other financial information about the SICAV which is available to the shareholders from the registered office of the investment company.

The issue and redemption prices of the shares of each Sub-Fund as well as other communications to the shareholders are published in the "Bundesanzeiger".

Subscriptions cannot be received on the basis of this financial report. Subscriptions are valid only if made on the basis of the current prospectus, supplemented by the latest annual report and the most recent semi-annual report if published thereafter.

The Management Company draws the attention of investors to the fact that before subscribing to any Shares, investors may consult the key investor information document ("KIID") for the Share Classes, available from the website www.edmond-de-rothschild.com. A paper copy of the key investor information may also be obtained free of charge from the registered office of the Management Company, the Global Distributor or from intermediaries who are part of the distribution network.

NET ASSET VALUE PER SHARE

For all the QUAM Sub-Funds, the net asset value of the shares is calculated on each business day in Luxembourg.

For the Sub-Fund EDMOND DE ROTHSCHILD FUND - CHINA, the net asset value of the shares is calculated on each day on which banks are generally open for business in Luxembourg and in France and any other day on which the French and the Chinese financial markets are open (official calendar of EURONEXT PARIS S.A. and the Hong Kong Stock Exchange) is a Valuation Day.

For the Sub-Funds EDMOND DE ROTHSCHILD FUND - BIG DATA and EDMOND DE ROTHSCHILD FUND - US VALUE the net asset value of the shares is calculated on each day on which banks are generally open for business in Luxembourg, in France and any other day on which the French and the American financial markets are open (official calendar of NYSE and EURONEXT PARIS S.A.) is a Valuation Day.

For the Sub-Fund EDMOND DE ROTHSCHILD FUND - GLOBAL CONVERTIBLES the net asset value of the shares is calculated on each day on which banks are generally open for business in Luxembourg, the United States and in France and any other day on which the French and the American financial markets are open (official calendar of NYSE and EURONEXT PARIS S.A.) is a Valuation Day.

For the Sub-Fund EDMOND DE ROTHSCHILD FUND - ASEAN EQUITY, the net asset value is calculated on each day on which banks are generally open for business in Luxembourg and in France and any other day on which the French financial markets and Hong Kong financial markets are open (official calendar of EURONEXT PARIS S.A. and the Hong Kong Stock Exchange) is a Valuation Day.

For all other Sub-Funds the net asset value of the shares is calculated on each day on which banks are generally open for business in Luxembourg and in France and any other day on which the French financial markets are open (official calendar of EURONEXT PARIS S.A.) is a Valuation Day.

For all Sub-Funds, the Net Asset Value:

- is not calculated on Good Friday or December 24 (Christmas Eve)
- is calculated and published on the first Business Day following the relevant Valuation Day (the "NAV calculation day").

In establishing the audited annual report and the unaudited semi-annual report, the Company will, for each Sub-Fund, carry out an additional valuation of its securities' portfolio by using for this purpose the closing prices of the same day. As such and if necessary, at the closing date of the Financial Year and the semester, the Company will carry out two determinations of the Net Asset Value of the Sub-Funds concerned, one based on the principle of the securities' portfolio valued at the last available rates at the moment of the determination of the price applicable to subscriptions, redemptions and conversions processed on this date, and the other based on the principle of the securities' portfolio valued at the closing prices of the same day and intended to be published in the annual revised report and in the non-revised semi-annual report.

If the September 30 and/or the March 31 are not bank working days in Luxembourg, a net asset value per share will be calculated for each Sub-Fund on the base of the last closing prices at the same day.

General information

RISK MANAGEMENT

The method used for the determination of the global exposure is the commitment approach for all Sub-Funds except for the Sub-Funds Emerging Bonds, Bond Allocation and Emerging Sovereign for which the absolute VaR approach is applied.

The Sub-Funds' VaR may not exceed 20% of the Sub-Funds' net assets value as defined by the Law and in the prospectus. The calculation method for the leverage is the sum of the notionals of all the derivatives, including the derivatives used for hedging purposes.

The Prospectus dated March 2023 disclosed the levels of expected leverage that are the following:

- Emerging Bonds:
 - Sum of the notional: 500% of the net asset value of the Sub-Fund
- Bond Allocation:
 Sum of the notional: 2,000% of the net asset value of the Sub-Fund
- Emerging Sovereign:
 - Sum of the notional: 500% of the net asset value of the Sub-Fund

However, under certain circumstances the level of leverage might exceed the aforementioned level.

Use of leverage (Sum of the notionals) in % TNA from 1 April 2022 to 31 March 2023:

Sub-Fund	Average	Minimum	Maximum
Edmond de Rothschild Fund- Emerging Bonds	159.04	118.68	396.07
Edmond de Rothschild Fund- Bond Allocation	336.89	67.54	1175.91
Edmond de Rothschild Fund- Emerging Sovereign	210.38	131.74	462.77

Absolute Value-at-Risk in % TNA from 1 April 2022 to 31 March 2023:

Sub-Fund	Average	Minimum	Maximum
Edmond de Rothschild Fund- Emerging Bonds	8.66	6.02	10.58
Edmond de Rothschild Fund- Bond Allocation	3.14	1.41	5.85
Edmond de Rothschild Fund- Emerging Sovereign	7.20	5.77	9.02

Model and inputs for the VaR approach: Historical Value at Risk Confidence interval (one-tailed) 99% VaR Horizon / holding period 1 month (20 business days) Data history / effective observation period 1 year Daily computation

Investment Managers' reports

MARKET COMMENT (31/03/2022-31/03/2023)

In order to avoid a severe recession and long-term supply disruptions in 2020, a massive fiscal response supported by an exceptionally accommodative monetary policy resulted in an abrupt return in 2022 to levels of inflation not seen since the early 1980s. In this volatile context, the consumer price index peaked at 9.1% YoY in the US and at 10.7% in the eurozone during the period. The stalemate in the Russia-Ukraine conflict, which created a devastating human crisis, led to significant market turmoil, exacerbating the inflationary shocks. Commodity prices were affected across the board, with the oil price (WTI) hitting a high of US\$115 at the start of the period. In line with the monetary tightening initiated at the start of the return of war to the European continent, the central banks, following the lead of the Federal Reserve, implemented sharp hikes in key interest rates in order to curb inflation. The Fed and the ECB therefore continued to raise their key rates at a historical pace. US and German 10-year yields were thus significantly impacted by these increases, and reached highs of 4.25% and 2.75% respectively over the period.

In line with the start of 2022, financial markets worldwide and the main asset classes all suffered significant losses initially. The sharp rise in bond yields continued to negatively impact long-term assets such as equities. China, faced with a new rise in Covid cases, adopted a strict health policy that caused an abrupt slowdown in its economic activity. The MSCI All Country World Index, for example, continued the trajectory to close 2022 down -10.1% compared with the start of the period. Meanwhile, the NASDAQ, made up of long-duration US tech stocks, slumped by nearly 26%. Over this latter time period, high-yield securities went against the trend of recent years by clearly outperforming growth stocks, developing in the direction of a style rotation. Credit spreads continued to widen in a context of intense volatility. The Markit iTraxx Europe Crossover (credit spread of European high-yield companies) widened by 400 basis points over the period, to end at 650 points. On the forex market, the US dollar continued to strengthen, and even broke through euro parity in the last few months of 2022.

However, the main negative factors that affected the market over the first six months of the period started to lose their impact in the last quarter of 2022, thanks to macroeconomic data that remained very resilient. The reopening of the Chinese economy following the easing of its zero-Covid policy, the surprising resilience of US demand and the faster-than-expected adjustment of Europe to higher energy costs, combined with higher consumption than anticipated, encouraged a return to investor optimism. These factors together fuelled a significant increase in the appetite for risk assets and allowed volatility to stabilise. Global indices rebounded sharply at the start of 2023, with the NASDAQ posting its best monthly performance in January (+10.7%) since 2001 and the MSCI ACWI gaining more than 6.7% over the month. The reporting season amplified this trend, thanks to particularly encouraging results showing considerable resilience. On the basis of this solid economic data, forecasts of terminal rates were respectively revised down for both the FED and the ECB, with markets even positioning for a possible new monetary policy pivot during the course of 2023. More recently, these optimistic prospects were countered by major difficulties in the banking sector, reviving fears on the financial markets. The pressure on the banking system in March thus triggered a return to intense volatility following the preceding period of calm. The upward momentum was halted, penalised by the failure of three regional banks in the US and the ensuing problems of Crédit Suisse in Europe. Volatility rose sharply, while interest rate expectations were largely influenced by the events, with the ECB suggesting that further rate hikes were necessary, albeit a a slower pace. The solidity of the structural base of the European banking sector and reassuring public announcements nevertheless stabilised the sector in Europe at the end of the period, notably easing concerns over systemic risk.

The persistence of solid macroeconomic data, along with the recent events in the banking sector, revived expectations of a recession in the United States and in Europe during the course of 2023. Disinflation, as perceived by the markets, will nevertheless not necessarily pursue a straightforward course. In the United States, the credit tightening is starting to be felt. The central bank's arsenal remains solid, but the prospect of a transition towards a period of limited recession now seems likelier. In the light of this new information, the markets revised down their interest rate expectations in the US and Europe at the end of the period. They now anticipated terminal rates of approximately 3.75% in Europe and 5% in the US. On the forex market, the US dollar continued to weaken, a trend that had started at the end of 2022, mainly due to the diverging interest rate forecasts between the Fed and the ECB. On the other hand, emerging markets benefited considerably from the return of China onto the world stage following its reopening, thus boosting demand.

1. Edmond de Rothschild Fund - Europe Convertibles

Over the period from March 31, 2022 to March 31, 2023, the Edmond de Rothschild Fund - Europe Convertibles Sub-fund posted a performance of Class I EUR -3.64% versus -3.29% for its benchmark, the Refinitiv Europe Focus Hedged CBI in Euro.

During the first six months, the markets were marked by high inflation, a rise in interest rates in both dollars and euros, a credit crunch and a fall in the equity markets with a return of volatility. During this period, the asset class suffered from the triple correlation between rates, credit and equities. The Europe Convertible Sub-fund slightly underperformed its index.

Nevertheless, the asset class was able to benefit from the rebound of the equity market in the second half of the year with a rebound of more than 10% of the Sub-fund outperforming its benchmark.

The management team took advantage of specific situations such as the buyback of the Edmond de Rothschild Fund convertible. 0% 2024.

In this volatile environment, the primary market in Europe remained relatively quiet with just under 5 billion issues in 2022 compared to 16 billion in 2021. However, the outlook for issuance in 2023 should be more favorable.

2. Edmond de Rothschild Fund - Global Convertibles

Edmond de Rothschild Fund - Global Convertibles signed a return of -9.46% on the institutional share (class I EUR between the 31/03/2022 and the 31/03/2023 while its benchmark (Refinitiv Global Focus Hedged) printed a return of -9.94%.

No asset class was spared from the general market correction in 2022, sparked by rising interest rates at the fastest rates in decades. Global convertibles performance was close to that of equity indices such as MSCI World or bond indices such as US IG corporate bonds.

It is important to explain this performance by the risk factors: the year was atypical, global convertibles suffered simultaneously from a quadruple correlation: equity, credit, rates and valuation, which created a market dislocation. This market dislocation is also a source of opportunities. After this market dislocation, the asset class is more attractive as offers a rate and credit carry with still a low duration.

In addition to equity stress, convertible bonds faced credit stress as well in 2022, particularly in the first half. In the first half of the year, convertibles bonds downside support suffered as rapidly rising interest rates and widening credit spreads weighed on bond values, and resulted in a breakdown of their main characteristic, the asymmetric returns.

However, as credit spreads stabilized in the second half of the year, convertible bonds valuation found support, allowing the Sub-fund to improve its convexity relative to the equity market.

In terms of sector performance, in this period, energy was by far the best performing sector, followed by utilities and materials-a reflection of the strength in commodities in the inflation-driven market. However, the weights of these sectors in the convertibles bond space are quite limited, resulting on a minimal impact on top-line returns.

In contrast, consumer discretionary, media, and tech (the sector most represented in global convertible bonds) make up nearly half of the market, and as a result, they dragged significantly on performance.

In the context of high rate volatility, credit and equity market correction, the primary market slowed down significantly. At year-end total global issuance was \$40bn, the weakest year on record for global convertibles.

3. Edmond de Rothschild Fund - Crossover Credit

EUR I class

The period under review can be divided into two distinct sub-periods. From April to mid-October, central banks worldwide were caught short by the acceleration in inflationary pressure. In reaction, they adopted more restrictive monetary policies by rapidly raising their interest rates and signalling their intention to reduce their balance sheets.

Interest rate curves rose and steepened as a result. By way of example, over the period the 10-year US Treasury rate increased from 2.42% to 4.24% and the 2-year rate from 2.41% to 4.61%.

With this historically rapid rate hike cycle, credit spreads widened sharply to reflect the fears of a hard landing of the global economy. US investment grade spreads increased from 136 bps to 186 bps for JP Morgan's JULI index. The annual yield of this index rose from 3.89% to 6.28%, causing heavy losses in bond portfolios.

In the second part of the year, the macroeconomic outlook improved. Consumption in the United States and Europe proved to be resilient in a context of high inflation. Furthermore, the favourable weather conditions made it possible to avoid energy rationing, which would have greatly penalised industry, particularly in Europe. Credit spreads thus narrowed and interest rates dropped. Against this backdrop the Sub-fund recovered nearly 55% of its negative performance in mid-October.

Over the observation period the Sub-fund recorded a performance of -5.54% versus -5.67% for its composite benchmark.

4. Edmond de Rothschild Fund - Emerging Bonds

From March 31st, 2022 to April 1st, 2023, the Sub-fund posted a net Sub-fund performance of -18.1% (EUR hedged I Share class) versus the J.P. Morgan's EMBI Global's -8.9% (EUR Hedged).

Last year was a challenging year for our asset class. Overall, fixed income as a whole suffered from the increase in US treasuries, pressured by worsening inflation post-COVID exacerbated by commodity prices as a result of the conflict in Ukraine. Specifically, the US Treasury 10 year increased over 1.0 percentage points from 2.36% to 3.45% during the period, peaking at over 4.2% in October 2022. In addition, Emerging Markets had additional headwinds due to the deterioration in global sentiment as illustrated by the strengthening of the US Dollar. The technical picture was dreadful with over \$80bn of outflows for Emerging Markets fixed income as an asset class in the 2022 calendar year.

Diving deeper in the universe's return breakdown, the IG sub-index (-8.2% in USD underperformed the HY sub-index (-7.6% in USD) during the period due to the increase in rates. On a spread basis, IG was wider by only 1bp while HY widened by over 130bp. Noteworthy is that the BB and B segment actually tightened 12bp and 7bp, respectively, while the CCC and below bucket widened by almost 1,000bp. On a regional basis, Asia and Africa were the underperformers (-9.5% and -9.4%, respectively, in USD). On the other hand, Middle East fared the best on a relative basis, returning -5.8% in USD. Regarding specific countries, certain idiosyncratic stories were top performers like El Salvador (+15.3% in USD) and Tunisia (+10.1% in USD), while others like Ukraine (-51.2% in USD) and Lebanon (-51.4% in USD) were at the bottom. Note that universe's performances uses the J.P. Morgan EMBIG Diversified as a proxy.

Edmond de Rothschild Fund - Emerging Bonds' performance during this period was mainly driven by Ukraine on the back of the conflict. Overall, Ukrainian sovereign bonds more than halved in this period, while the Sub-fund had over 5.8% of exposure as of the end of March 2022. Another key driver was the performance of both Venezuela and Argentina as the Sub-fund had 14.4% and 12.1%, respectively, as of the end of March 2022. Specifically, Venezuela bonds underperformed the benchmark by almost 10 percentage points given the deterioration in risk sentiment globally and lack of sufficient catalysts locally. Exposure to Africa and CCCs and below-rated bonds were also contributors to the underperformance. As highlighted above, Africa was one of the biggest underperformers within Emerging Markets, which ultimately negatively impacted the Sub-fund's CDS did somewhat mitigate these factors.

The average credit rating of the portfolio increased from CCC+ from the end of March 2022 to B as of early April 2023 on the back of a reduction in exposure to Venezuela and Argentina as well as an increase in IG positions, particularly Eastern Europe. Regarding modified duration, the Sub-fund increased from 5.2 to 6.0 as the global risks shifted from inflation to recession fears during the period. At the same time, Assets under Management decreased from over US\$41mm to around \$15mm due to outflows on the back of the challenges described above.

5. Edmond de Rothschild Fund - Emerging Credit

During the period under review, US dollar-denominated emerging corporate debt markets were characterized by an environment split into two distinct periods: a generally negative period until the end of August and a period of sustained recovery from the end of October to the end of March. The period under review was marked by constant volatility in US interest rates linked to the expectations and actions of the US Federal Reserve in its fight against rising inflation. However, in this environment, the emerging corporate debt market showed significant resilience and performed in line with its developed market fixed income counterparts.

In the credit segment, high yield bonds (+0.2%) slightly outperformed the investment grade segment (-2.9%). Short- and medium-duration bonds outperformed those with longer maturities.

At the regional level, all regions showed negative performance of -6.34% over the period, with the exception of Europe (+7.8%), which benefited from the strong recovery in Ukraine after the shock of the beginning of 2022. Asia was down by 1.3%, Latin America by 3.8%, Africa by 2.3% and the Middle East by 1.4%.

The sectors were also negatively oriented: -0.3% for Financials, -0.4% for Metals & Mining, -2.5% for Oil & Gas, -3.6% for Transportation and - 4.8% for Real Estate.

In this environment, the Sub-fund recorded a negative performance of -3.6% over the period, slightly below that of its benchmark (-1.5%). In terms of our country allocation, our strongest convictions contributed unevenly to performance. Argentina made a significant positive contribution (+1.7%). Ukraine and Turkey also contributed positively (+0.4%) to performance, as did Chile. Brazil, notably through the Transportation and Infrastructure sectors, made a negative contribution, as did our allocation to Nigeria, Peru and the Colombian oil and banking sectors.

In addition, our strong underweight in the Chinese market, particularly in Real Estate, was favorable given the underperformance of this sector over the period.

The Sub-fund 's net assets decreased from \$588 million to \$359 million at the end of the period, in line with the trend observed in the asset class during the period under review.

6. Edmond de Rothschild Fund - Investment Grade Credit

2022-2023 Annual report (01/04/2022 - 31/03/2023) EUR I class

The period under review can be divided into two distinct sub-periods. From April to mid-October, central banks worldwide were caught short by the acceleration in inflationary pressure. In reaction, they adopted more restrictive monetary policies by rapidly raising their interest rates and signalling their intention to reduce their balance sheets.

Interest rate curves rose and steepened as a result. By way of example, over the period the 10-year US Treasury rate increased from 2.42% to 4.24% and the 2-year rate from 2.41% to 4.61%.

With this historically rapid rate hike cycle, credit spreads widened sharply to reflect the fears of a hard landing of the global economy. US investment grade spreads increased from 136 bps to 186 bps for JP Morgan's JULI index. The annual yield of this index rose from 3.89% to 6.28%, causing heavy losses in bond portfolios.

In the second part of the year, the macroeconomic outlook improved. Consumption in the United States and Europe proved to be resilient in a context of high inflation. Furthermore, the favourable weather conditions made it possible to avoid energy rationing, which Sub-fund would have greatly penalised industry, particularly in Europe. Credit spreads thus narrowed and interest rates dropped. Against this backdrop the Sub-fund recovered nearly 40% of its negative performance in mid-October.

During the period the Sub-fund recorded a performance of -9.33% for the I unit in euro, compared with -4.47% for the linked index. The main reason for the underperformance was the long average duration of the Sub-fund compared to its benchmark. In order to better reflect the Sub-fund's strategy, the decision was made to change the index in the last quarter of 2022, opting for Bloomberg Global Aggregate Corporate, which is the benchmark index for the category and for rival Sub-funds.

7. Edmond de Rothschild Fund - Euro High Yield

Compartiment	Gérant 1	Gérant 2
EDMOND DE ROTHSCHILD FUND - EURO HIGH YIELD	Léo ABELLARD	Alexis FORET

2022 was dark year for bonds overall driven by a sum of negative factors including but not limited to the resurgence of geopolitical risk in Europe, the rise in inflation due to both energy price surge and covid reopening, central banks aggressively raising rates to fight the former, and credit spread premium widening across the credit spectrum. As a result bonds total return were deeply negative and corporate issuers acted quite cautiously limiting their new issuance of bonds in an environment where cost of debt was rising fast. Q4 was a turning point with inflation fears receding as US CPI started to go down. The disinflation trend started then made the central bank pivot timing closer than expected, boosted risk assets and fueled bond rally through credit spread tightening across ratings.

The 1Y rolling performance of Edmond de Rothschild Fund - Euro High Yield on the I is a modest -4.11% (versus -4.33 on index) but is a tale of two story whereby the Sub-fund lost in absolute performance on both impacts from rates and Credit spreads until 13th October. At that point the Sub-fund reached -10.3% and since then experienced a sharp rally of +6.9% until end of March driving total return totaling to an annualized negative 4.11%.

Gross of fees, the Sub-fund posted -3.36% vs -4.33%. The relative gross outperformance of +0.98% can be broken down under three main sub factors:

IR rates : 1.19% as we were underweight throughout the year Carry : -1.10% due to our cautious positioning Spreads : +0.77% due to our Beta underweight in a widening market

As end of March with a carry of close to 7% gross of fees and focusing on the belly of HY with an average rating of BB- the Sub-fund is wellpositioned to benefit from the carry strategy and the reopening of the credit markets. The fading recession fears is in that respect a good catalyst for the Sub-fund as evidenced by the recent inflows in the target dated Sub-funds underlying investors had been reallocating to spread assets from Q4 2022 to Q1 2023.

8. Edmond de Rothschild Fund - Bond Allocation

Over the period, the Sub-funds posted a performance of -6.47% (I EUR share class) versus -9.66% for its reference index. The Sub-fund outperformed by 319 basis points, mainly due to a modified duration lower than that of its benchmark. Faced with a sharp increase in inflation trend, central banks turned hawkish and adopted more restrictive monetary policies, notably by raising interest rates. We positioned Edmond de Rothschild Fund - Bond Allocation at the low end of its range (-2 to +8 years) of modified duration (i.e. between 0 and 3 years) without going negative on modified duration, because even though we had significantly reduced our position on spread duration, we still had a position. Later in the fourth quarter, our modified duration increased, before being significantly reduced in December when rates rebounded strongly after the November rally. In 2023, we began to identify entry points for increasing our modified duration – from the low level reached at the end of December – as we considered that the terminal rates of central bank policies were beginning to be fairly valued.

Against this backdrop of geopolitical tensions and deteriorating financial conditions (hawkish stance of central bankers), our spread duration exposure was reduced until the end of the third quarter, when spread widening started to become cheap. Our exposure to spread duration was increased in order to achieve a yield of c.6% on our investments, with a preference for Investment Grade corporates, High Yield corporates, sub-financial debt and EM sovereign debt. We then maintained this global positioning outside of tactical positioning adjustments, believing it to offer an attractive yield in line with our expectations and the overall increase in our modified duration positioning.

9. Edmond de Rothschild Fund - Emerging Sovereign

From March 31st, 2022 to April 1st, 2023, the Sub-fund posted a net Sub-fund performance of -14.52% (EUR hedged I Share class) versus the J.P. Morgan's EMBIG Diversified's -9.9% (EUR Hedged).

Last year was a challenging year for our asset class. Overall, fixed income as a whole suffered from the increase in US treasuries, pressured by worsening inflation post-COVID exacerbated by commodity prices as a result of the conflict in Ukraine. Specifically, the US Treasury 10 year increased over 1.0 percentage points from 2.36% to 3.45% during the period, peaking at over 4.2% in October 2022. In addition, Emerging Markets had additional headwinds due to the deterioration in global sentiment as illustrated by the strengthening of the US Dollar. The technical picture was dreadful with over \$80bn of outflows for Emerging Markets fixed income as an asset class in the 2022 calendar year.

Diving deeper in the EMBIG Diversified's return breakdown, the IG sub-index (-8.2% in USD underperformed the HY sub-index (-7.6% in USD) during the period due to the increase in rates. On a spread basis, IG was wider by only 1bp while HY widened by over 130bp. Noteworthy is that the BB and B segment actually tightened 12bp and 7bp, respectively, while the CCC and below bucket widened by almost 1,000bp. On a regional basis, Asia and Africa were the underperformers (-9.5% and -9.4%, respectively, in USD). On the other hand, Middle East fared the best on a relative basis, returning -5.8% in USD. Regarding specific countries, certain idiosyncratic stories were top performers like El Salvador (+15.3% in USD) and Tunisia (+10.1% in USD), while others like Ukraine (-51.2% in USD) and Lebanon (-51.4% in USD) were at the bottom.

Edmond de Rothschild Fund - Emerging Sovereign's performance during this period was mainly driven by Ukraine on the back of the conflict. Overall, Ukrainian sovereign bonds more than halved in this period, while the Sub-fund had over 4% of exposure as of the end of March 2022. Exposure to Africa (over 30%, including Egypt as of the end of March 2022) was also a material driver. As highlighted above, Africa was one of the biggest underperformers within Emerging Markets, which ultimately negatively impacted the Sub-fund's performance. Additionally, the Sub-fund's OW in the CCC and below segment, especially stories like Ghana and Sri Lanka and Zambia, was also a negative contributor. On the positive side, certain hedges like CDS did somewhat mitigate these factors.

The average credit rating of the portfolio increased from B+ from the end of March 2022 to BB- as of early April 2023 as the exposure to IG increased, particularly to Eastern Europe. Regarding modified duration, the Sub-fund increased from 6.8 to 7.3 as the global risks shifted from inflation to recession fears during the period. At the same time, Assets under Management decreased from over US\$180mn to less than \$50mn due to outflows on the back of the challenges described above.

10. Edmond de Rothschild Fund - Income Europe

Over the period, the Sub-fund recorded a negative performance of -3.78% (IA EUR unit).

Over the period, the weight of the equity portfolio was 28.5% and posted a gross performance of +5.0%. The biggest positive contributions were Total (+30 bps), Deutsche Telekom (+25 bps) and Novo Nordisk (+25 bps) while the main negative contributions were Vonovia (-17 bps), Equinor (-23 bps) and Cofinimmo (-24 bps). Hedging via options or equity index futures caused net exposure to the equity markets to vary between 23.2% at the start of the period and 16% at the end of the period, the lowest point in the year. We continually reduced equity exposure as the probability of recession, albeit moderate, increased in our macro scenario. The expected dividend yield stood at 4.58% at the end of the period, compared with 4.03% at end March 2022. At the end of March 2023, the equity portfolio remained focused on quality stocks with a defensive bias Our biggest exposure to financials overall). Given the overall direction of the equity markets over the year, hedging represented a cost over the period, bringing the net contribution of the equity allocation, after hedging, to +75 bps.

On the credit side, we increased the average quality of the portfolio over the year, and gradually extended the duration, both via direct investments and towards the end of the period via interest rate futures, in order to benefit from the more attractive levels of rates, both in absolute terms and considering that sensitivity to rates once again represented an attractive inverse correlation to risky assets in the event of a macroeconomic deterioration, following a year in which the usual correlation had been disrupted by the rise in inflation. The sensitivity of the Sub-fund in relation to its bond portion therefore increased from 3.09 to 4.38 at the end of the period. In this context, we increased the credit portion from 62% in March 2022 to 66% in March 2023. Within this portion we reduced the HY corporate component from 30% to 20% and increased the IG corporate

component from 4% to 16% over the period. The subordinated financial debt and hybrid corporate portions remained stable overall, taking into consideration the attractive yield levels compared to the real risk of extension. We also introduced a short duration strategy (with a 40% HY/60% IG profile) for 4% via a UCITS investment. Over the period, the HY and subordinate financials represented the two main negative contributions with -104 bps and -143 bps respectively. Following equivalent performances in 2022, we note a strong divergence at the expense of financials against the backdrop of the failures of the US regional banks and Crédit Suisse at the end of the period. The Sub-fund had no exposure to these issuers.

11. Edmond de Rothschild Fund - Europe Synergy

The Sub-fund's performance (2.25%) was in line with its benchmark index over the whole period, and performed better in the first quarter of 2023. The presence of large stocks with a reward profile, particularly sought after in a context of instability on the markets, was therefore judicious. The stock selection in Telecoms was especially favourable. Deutsche Telekom was thus boosted by its US subsidiary T-Mobile, which reported results that exceeded expectations, and KPN demonstrated its defensive quality. In healthcare, Sanofi was supported at the end of the period by its flagship product Dupixent, which met its primary criteria in its phase 3 clinical trial, with the group announcing that its treatment could become the first biological medicine to treat chronic obstructive pulmonary disease. We also mention Spie, which benefited from its favourable exposure to electrification and energy efficiency trends. Conversely, in Capital Goods, Signify suffered from the downward revision of its cash flow and earnings outlook for 2022, after the supply chain disruptions, inflation and foreign exchange effects weighed on its performance in the second quarter. The portfolio was also impacted in relative terms by the absence of some large cyclical stocks, such as Siemens and Safran. In the Materials sector, Stora Enso saw its share price drop sharply due to the negative trend of pulp prices. In payment services, Nexi fell in November following a Q3 publication that was badly received by the market and the disposal of the stake by Intesa SanPaolo.

Over the period, the management team made profits regularly on stocks that had performed well, such as Burberry, Shell and Aixtron, as well as on Banco BPM and Bankinter in the banking sector. The lower probability of a merger scenario led the management team to reduce its position in Spie and take profits. The divestment of the position in Worldline was initiated. The position in UMG (a spin-off of Vivendi), which did not meet the eligibility criteria of the strategy and had an ESG rating that was too low, was sold, as was the position in Vivendi itself, after its recent good performance. A holding was built up in Sandvik following its sharp decline at the start of 2022 and after reassuring quarterly results. The position in Ericsson was sold in favour of strengthening Deutsche Telekom. These movements improved the overall ESG rating of the portfolio, due especially to the current controversy surrounding Ericsson. Lastly, as part of the consolidation of its core markets, Liberty Global announced the end of the period for the purchase of minority interests in its Belgian subsidiary Telenet, which it has controlled since 2007 and in which it already held 59% of the capital. The offer was made with a 59% premium.

12. Edmond de Rothschild Fund - Strategic Emerging

During the period of March 2022 to March 2023, the Edmond de Rothschild Fund - Strategic Emerging went down by 13.5% versus MSCI EM 8.55%.

In 2022 marked a volatile year for emerging market. It started with Russia's invasion to Ukraine, soaring energy and food prices. Massive US/EU sanctions followed. Fed, as expected hiked interest rates (with FOMC Powell delivering a hawkish speech of "higher for longer"). Bond yields spiked. Adding to that the geopolitical tension between US and China escalated, following several sanctions in the tech sector. Korea and Taiwan had been negatively affected, not only by the increasing uncertainties on the geopolitical side, weaker Chinese economy, but also on the strong correction of semiconductor prices, after a strong inventory building during the covid-19 period.

Following its policy of zero-covid, China Government announced several covid-19 lock downs throughout the year. The Chinese real estate gained the headlines, after developers' financial problems. Finally, in October, after the 20th Party Congress reelected Xi Jinping confirmed to his third consecutive mandate, the Chinese Government decided to reopen its economy earlier than expected, by relaxing its zero covid policy. In 4Q22, Emerging Market rebounded strongly on this news, driven by the Chinese market.

India market benefited from the geopolitical situation, as US/EU sanctioned Russian oil, India was able to buy cheaper oil. That was key to prevent Indian inflation, albeit at higher level due to higher food prices, inflation was contained at the level of 6-7%. RBI increased interest rates, as most of EM Central Banks, Moreover, the supply chain diversification, China plus one strategy also benefited India, bringing higher investments, especially in the electronics sector. Apple started the assemblage of its Iphone in India not only to exports, but also to its domestic market.

The Latam region benefited from higher commodity prices, and lower political risk. The inflation in the region also increased strongly, taking Central Banks to hike interest rates. Mexico benefitted from stronger than expected growth due to US resilient economy and tight labor market, which drove remittances to a record level. Mexico, just like India, also has been benefiting from nearshoring strategy, gaining market share in US imports and receiving higher direct investments.

Positioning and main portfolio movements:

The mains contributors to the Sub-fund performance were companies that benefited from:1) the reopening after covid ; 2) from supply chain diversification and 3) energy transition: OMA, Mexican airport in Monterey, an industrial area close to US border saw its traffic bouncing back. Ctrip, Chinese on-line travel agency; and LG Chem, a Korean battery producer. The main detractors of the Sub-fund were Natura, Banco Santander and Alibaba, companies severely affected by the higher inflation environment, Chinese economy slowdown and geopolitical situation.

The Sub-fund position in Mexico (OW); in Saudi Arabia (UW) and United Arab Emirates (UW) contributed positively to its performance, while China (UW) and India (OW) were detractors. In terms of sectors, the industrials (OW), materials (UW) and Real Estate (UW) had a positive contribution but not enough to offset the negative contribution from energy (UW); consumer discretionary (OW) and staples (OW).

During the period, we added companies such as: Yadea (electrical scooter producer in China, related to energy transition theme; Grupo Traxion, Mexico logistic, related to nearshoring; and Mahindra & Mahindra a car producer in India, related to energy transition theme as well. We strengthened the tech sector in Korea and in Taiwan; Samsung, Hynix and TSMC. We reduced the financial sector AIA; BCA and Banorte. <u>Outlook</u>

EDMOND DE ROTHSCHILD FUND

We are constructive on Emerging Markets in relative terms. Emerging Markets have started their tightening cycle earlier. Despite FED ongoing tightening, the cycle has been done to a large extent. China's reopening is an important tailwind for Emerging Markets, especially in Asia. Korea also benefits from US renewables policy (IRA) and tech sector cycle bottoming out. In India, we are slightly OW, neutral due to high valuation. Mexico profits from nearshoring and US tight labor market. In China, concerning the real estate sector, we assume that the government will manage the downturn and avoid the systematic risk. We remain market weight on China, due to geopolitical concerns. We are OW on Korea and tech sector due to discounted valuation. We are OW LatAm, we took some profits on bank sector, due to valuation, and increased consumption sector. We remain UW on Middle East. The strategic core positions stood at 70% of the Sub-fund while inflection positions stood at 30% of the Sub-fund.

Name	Performance
Edmond de Rothschild Fund - Strategic Emerging Part A in EUR	-13.77% as per A EUR versus -8.55% MSCI EM

13. Edmond de Rothschild Fund - US Value

Name	Performance	
Edmond de Rothschild Fund - US Value	-1.83%	

Edmond de Rothschild Fund - US Value (I-EUR Proforma) outperformed its benchmark over the period from 31/03/2022 to 31/03/2023 and recorded a performance of -1.83% (compared with -8.24% for the Russel 1000 Value). The main contributors to the Sub-fund's performance were the companies in the energy sector, which represent one of the Sub-fund's largest overweightings. In oil services we note the case of **Valaris**, which benefits from the renewed interest and strong positive trends in the offshore oil and gas sector, and in producer companies: **Hess** has benefited from the re-rating of the entire sector despite the drop in oil and gas spot prices. We can also mention the very good performance of our cyclical consumer companies, which despite an unfavourable environment and the threat of recession, have benefited from a significant re-rating after valuations at the start of the period that had priced in the most pessimistic scenarios (**Pulte, Las Vegas Sands, Coty, Strategic Education**). In healthcare, our exposure was very positive and supported the Sub-fund's performance (**Merck**). Lastly, we note several good performances in the industrial sector following better-than-expected results (**Caterpillar**) and a reassuring outlook with increased prospects for growth in the order book (**General Electric**).

Conversely, the Sub-fund suffered from the weak performance of financials following the failure of the three US regional banks, which sent a wave of panic across the banking and insurance sector. This was notably what explained the poor performances of **Allstate**, **American International**, **Citigroup and Bank of America**. Medical equipment and service companies also dented our performance as they suffered from sharp contraction of multiples over the period combined with operational problems (**CVS Health, Brookdale Senior**).

Over the period under review we mainly reinforced our exposure to health stocks (which we consider attractive as they have both defensive and value characteristics) and sold several cyclical stocks (notably financials). The Sub-fund's performance was nevertheless heavily impacted by the failures of the regional banks (despite the fact that we did not have any in the portfolio) and we reinforced to a certain extent our cyclical exposures, which suffered the most at the time.

14. Edmond de Rothschild Fund - Healthcare

Our stock selection enabled us to significantly outperform our index over the year ending March 31st, 2023 (perf -0.65%).

Large biotechs were strong contributors, including Gilead, Biogen and Seagen which was acquired by Pfizer. Performance also benefited from our selection of Pharma names like Merck & Co and Lilly. Our limited exposure to the richly valued Medtech segment that faced headwinds in the period was also favorable. Nevertheless, let's mention the strong performance of dental player Align Technology. On the other hand, we experienced some temporary disappointments including the decline of Brookdale Senior Living, due to staff shortage, inflation and slow occupancy rate recovery and Baxter. Main new positions in the portfolio include Novartis (underappreciated innovative pharma company), Novo Nordisk (diabetes leader at the forefront of the future obesity market), Siemens Healthineers (leader in radiology) and Biomarin (orphan diseases player involved in gene therapy in hemophilia A). In the period we sold Labcorp, Teleflex, Perrigo and Stericycle.

After proving its resilience in an uncertain macroeconomic environment in 2022, the healthcare sector experienced one of its worst relative performances in Q1 23. The return of investor optimism about the economy and the reopening of China has favored technology stocks at the expense of defensive stocks, particularly healthcare stocks that performed well in 2022. The MSCI ACWI Healthcare (net total return in EUR) ended the period 1.8% lower.

In that context, large profitable biotechs (+1% in EUR) and Pharma (+0%) were the best performers in the year ending March 31st. The adoption of the Inflation Reduction Act framed the impact on drug prices and lowered the risk of further far-reaching reforms.

Services ended the period lower (-6%). US health insurers in particular were penalized by prospects of a higher utilization (higher healthcare costs) in a post-Covid context.

Medtech (-11%) and Life Science and Tools (-12%), two of the most expensive sub-sectors experienced a multiple compression driven by higher interest rates and cost inflation.

Early stage biotechs (-14%) and Healthcare Tech companies (-20%), typically long duration assets, were also impacted by higher interest rates as well as tighter financing conditions following several record years of public offerings.

M&A returned to the forefront in late 2022/early 2023 (Pfizer/Seagen for 43 Md\$, Amgen/Horizon for 27 Md\$, J&J/Abiomed for 16Md\$). Finally, the sector kept on delivering transforming innovations including new treatment for Alzheimer, a first proof of concept for mRNA in Cancer (Moderna's Personnalized Cancer Vaccine in Melanoma) or the first European approval of a gene therapy against hemophilia A.

15. Edmond de Rothschild Fund - Equity Opportunities

Over the period last ended, the benchmark index (MSCI World Net Total Return) fell by 4.8%, impacted by persistently high inflation in the US and a more aggressive stance by the Fed. Against this backdrop, the Edmond de Rothschild Fund - Equity Opportunities Sub-fund was down by 5.2% (I EUR class), underperforming its benchmark by 40 bps. The Sub-fund benefited from its overexposure to the energy sector (Schlumberger, ConocoPhillips), which saw its performance fuelled by the oil price and the resumption of spending in the oil services sector. Likewise, the overweighting of European stocks in the portfolio positively impacted the relative performance of the Sub-fund (the SXXP rose 3.4% over the period last ended).

Stock picking remained the main performance driver for the Sub-fund. In this respect, we note the very positive contributions of Sailpoint (+100 bps), SAP (+68 bps) and Vinci (+50 bps).

Conversely, some stocks had a negative impact on the Sub-fund, such as Brookdale (-134 bps), Baxter (-146 bps) and First Republic Bank (-217 bps). The portfolio is focused on companies that could benefit from an improvement in their competitive environment. The opening of a new macroeconomic sequence, with less government support, is set to accelerate the movement and favour sector leaders. This is why the Sub-fund has retained Amadeus, Brookdale and China Overseas, for example. Edmond de Rothschild Fund - Equity Opportunities also invests in companies helping countries to achieve their objectives in terms of independence or economic sovereignty.

This is the case for companies such as Visa, ConocoPhillips, Thalès and Airbus. The portfolio is composed of companies that could benefit from specific performance divers (Stericycle, Radnet, Mastec), which should offset the impact of the macroeconomic environment. More generally, we maintain a particularly disciplined approach to the valuation multiples of portfolio companies.

16. Edmond de Rothschild Fund - China

For the year ended March 2023, the Edmond de Rothschild Fund - China Sub-fund recorded a drop of 3.4% in euro, an underperformance of 75 basis points compated with its benchmark. The absence of exposure to the energy and State bank sectors penalised us. Conversely, our stock picking in the consumer, Internet and industrial sectors contributed positively to relative performance.

Over the period, the Sub-fund overweighted the consumer discretionary (36% of the portfolio), communications (16% of the portfolio) and healthcare (8% of the portfolio) sectors, which we had reinforced during the year. We continue to underexpose the financial and commodities sectors and we do not have positions in the energy and utilities sectors due to our ESG commitment. Quality stocks with high capacity for innovation, with a post-Covid resumption of activity or in an under-penetrated market segment, continue to be our main positions.

The top three portfolio convictions to fully benefit from the rebound of the Chinese economy were Tencent, Alibaba and Meituan (23% of the Subfund in March 2023). However, these securities experienced an extremely volatile year due to the strict zero-Covid policy and geopolitical tensions, despite a gradual easing of the regulatory context. Although the Internet is probably no longer the long-term driver of the Chinese economy, we believe that these companies could post significant growth in earnings in 2023, with the return of consumer confidence. In addition to optimistic prospects for the start of the year, their valuation levels remained attractive. We therefore maintain our strong positions on these three stocks, as well as on Bilibili, PDD and Weimob. Health stocks also delivered good performances thanks to better prospects of growth following the reopening. Conversely, our positions in the real estate and construction materials sectors did not perform well. However, several data point to signs of a recovery; we therefore anticipate an acceleration in growth in real estate transactions over the coming quarters. The Chinese economy is thus set to continue its recovery in 2023 and the new growth drivers-technology, new energies, automation etc.-should play an important long-term role despite persistent geopolitical tensions.

With favourable liquidity conditions, the stabilisation of the real estate market and the return of corporate earnings growth, we expect a better absolute performance for Chinese equities for the rest of 2023. The valuation of the Chinese market remains attractive in absolute and relative terms, given its growth profile for the next two years. A re-rating could take place in the near future if geopolitical tensions stabilise at current levels.

17. Edmond de Rothschild Fund - Big Data

Over the period under review, the Sub-fund dropped slightly in absolute terms (-2.11% for the I unit compared with -4.78% for its benchmark), but outperformed relatively to its benchmark. This performance was above all driven by our stock selection in the technology and communications services sectors, which more than offset the effect of the sector allocation, which was particularly penalising for performance, but intrinsic to the Sub-fund's investment process. At least 50% of our investments are structurally linked to companies in the area of infrastructure and big data analysis.

The M&A transactions concerning Zendesk, Telenet and ForgeRock boosted the portfolio in this context. We do not expect a repeat of these transaction volumes with such significant premiums. However, these transactions are a reminder of the strategic nature of the companies operating at the core of this field. Another noteworthy event, our against-the-trend reinforcement of exposure to European stocks from September onwards, widened our distance from the benchmark, but contributed to our performance in the period under review. This overweighting aimed to take advantage of both the weak euro, which improves the competitiveness of the eurozone's technology players, and the more attractive valuations than those across the Atlantic.

18. Edmond de Rothschild Fund - Asean Equity

The Sub-fund was relatively flat in a stable range. Sub-fund's price oscillations were generally within single-digit percentages. (perf -5.78%) Domestic demand outperformed externally-oriented countries and sectors. Indonesia and Consumer Discretionary were the best performing country and sector respectively while Philippines and Materials performed the weakest.

Market direction and volatility was relatively subdued because opposing macro dynamics neutralized each other. Domestic growth recovery from post-pandemic reopening was offset by global inflation risk and tightening global liquidity from Fed rate hikes and quantitative tightening. Market earnings growth from domestic demand recovery was offset by market derating from higher interest rates.

19. Edmond de Rothschild Fund - Equity Euro Core

The performance of the strategy closed the financial year slightly lower than its benchmark (5.54%), having been penalised in the second half of the period. However, stock selection was particularly favourable in Capital Goods, with Dassault Aviation and Thales, which benefited greatly from the increase in military spending related to the geopolitical tensions and the war in Ukraine. The exposure to the recovery of air traffic via Airbus was also positive. However, the absence of Siemens, the biggest weighting in the sector in the index, was costly in relative terms. Stock selection was also very favourable in Pharmacy, particularly in the case of Novo Nordisk, which posted very solid growth in sales, especially through its main franchise GLP-1, which is very well positioned on diabetes and obesity. The absence of real estate also helped in the current context of rising rates. As for Spie, it benefited from its favourable exposure to the electrification and energy efficiency trends. Finally, we would also point to our stock selection in Telecoms, with Deutsche Telekom, boosted by its US subsidiary T-Mobile, which reported results exceeding expectations, and KPN, which demonstrated its defensive quality. Conversely, we were penalised by the absence of Luxury stocks, which notably benefited from the reopening of China and publications that demonstrated their resilience. In Media, the announcement of an agreement on the increase in the stake in Ubisoft by Chinese company Tencent reduced the speculative appeal of the share. The group also issued a profit warning in January, due to a weaker sales trend than expected at the end of 2022 and the start of 2023. JC Decaux, sold off during the period, was also penalised by its exposure to China (20% of sales) over the holding period. Lastly, in the banking segment, despite a favourable overweighting that has a positive impact on the net interest margin of banks in the current context of rising rates, our selection of more qualitative players (BNP Paribas, Crédit Agricole) underperformed Southern European stocks. Likewise, while the overweighting of energy was positive, our position in GTT underperformed oil stocks over the period, despite the entry of Repsol. Highlights:

Repsol entered the portfolio in June, given its exposure to gas in the US, refining margins at historic highs and a strong upturn of margins in its petrochemical activity, allowing for strong free cash flow generation. Reciprocally, SoftwareOne was sold off, as the company has poor prospects in the post-Covid context, with margins under pressure and a low valuation that we do not consider provides protection. We also sold Faurecia, which despite a high-quality management team has not seen a pick-up in volumes and has a leveraged balance sheet, which is not ideal in the current context. In exchange, Airbus was reinforced, since it benefits from a continuing favourable commercial momentum, as was Allianz on the back of the agreement reached with the US regulator concerning controversial funds. We also took advantage of the market upturn to sell Worldline, which still harbours a lot of uncertainties over its structural challenges, in particular in the context of a possible slowdown in consumption post the reopening in Europe. On the other hand, some quality cyclical names were reinforced (Airbus, Stellantis, Schneider and Dassault Systèmes). In November, we benefited from the upturn that took place at the start of Q4 to sell JC Decaux, as the slowdown in spending of advertisers in Europe may not be offset by the prospects linked to the reopening of China, in our view. Furthermore, the positive impact of digital on margins does not appear obvious to us, and the valuation remains demanding. Lastly, we also took profits on stocks that had performed well, such as FinecoBank, Total, Novo Nordisk and Thalès in February 2023.

20. Edmond de Rothschild Fund - Human Capital

Over the period last ended (1 April 2022 to 31 March 2023), the benchmark (MSCI ACWI USD) fell by 7.4%. The performance was -6.39%. 2022 had indeed been marked by a sharp drop on the equity markets fuelled by persistent inflation and the resultant shift in monetary policy. Against this backdrop, the Edmond de Rothschild Fund - Human Capital Sub-fund was down 8.5% (K USD class), underperforming its benchmark by 1.1%. 2022 was characterised by the biggest bear market for the bond asset class in more than 30 years. This ended up massively penalising the shares of companies with long duration profiles, and specifically "growth" and "quality". The Edmond de Rothschild Fund - Human Capital Sub-fund is very sensitive to the "quality" cohort, as companies that pay particular attention to the training and well-being of their employees are generally those operating with high margins, solid balance sheets and a long-term strategic vision, all of which are characteristics typical of high-quality companies. The Edmond de Rothschild Fund - Human Capital Sub-fund thus suffered from this sensitivity, which entirely explains its underperformance. The quality of the stock picking was able to partially offset the negative impact of such factor and sector exposures (Edmond de Rothschild HC is also overweight in technology). We note in particular the goot contribution of stocks such as New Oriental (contributing 133 bps), Merck (85bps) and Schlumberger (66bps). We also note that the positive contributions to the performance come from both the "business model" component and the "best practices" component, which reflects the relevance of the management's philosophy.

We expect a marked deceleration in the US economy in the upcoming months. It is set to suffer from the backlash of the reduction in households' budgetary leeway with the end of the savings surplus and the first effects of the rate hikes implemented in 2022. The portfolio is composed of companies with specific strong stories that should be able to withstand more difficult macroeconomic conditions From a factor point of view, a monetary policy change by the Fed could also play in favour of our focusing on quality companies.

21. Edmond de Rothschild - Quam 5

For the second quarter of 2022 the portfolio allocation reduced gradually the active risk by lowering the exposure in fixed income and equity and continued under-weighting fixed income and equity during Q3 (maintaining weights between 5%-10% for fixed income and 21%-25% for equities). In the timeframe the Sub-fund suffered from the rise of interest rates and from the fragility of equity sector. The dynamic nature of the Sub-fund 's strategy allowed it to adapt swiftly to changing market conditions. By closely monitoring and evaluating the prevailing economic landscape, the Sub-fund 's quantitative models and algorithms identified the need for a higher allocation to money market instruments.

During the final quarter of 2022 the allocation was on a risk off mode until December. As the fed hikes and the sideways bear market of 2022 continued the model minimized exposure to equities and fixed income assets. Finally starting from December 2022 the portfolio adds more active risk both in equities as well as in fixed income as the attractive yields and the surprising resilience of the equity markets offer good investing opportunities.

Over the period 31.03.2022 . 31.03.2023 the Sub-fund registered a negative performance of -5.12% (share A-EUR).

The allocation to money market instruments played a crucial role in reducing portfolio risk and enhancing overall stability. In adverse market conditions, such as increased volatility, economic uncertainty, or unexpected events, money market instruments provide a safe haven, preserving capital and providing liquidity.

The Sub-fund 's use of these instruments allowed it to navigate through turbulent periods and maintain a defensive position when needed. Overall, the Sub-fund's allocation driven by its quantitative models and algorithms, proved to be a strategic response to the prevailing adverse market conditions.

EDMOND DE ROTHSCHILD FUND

This dynamic strategy allowed the Sub-fund to adapt to changing market dynamics, reduce portfolio risk, and safeguard investor capital while seizing opportunities

The information stated in the report is historical and is not representative of future results.

Audit report

To the Shareholders of Edmond de Rothschild Fund

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Edmond de Rothschild Fund (the "Fund") and of each of its sub-funds as at 31 March 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 March 2023;
- the statement of investments in securities and other net assets as at 31 March 2023;
- the combined statement of operations for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

 $[\]label{eq:pricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg T: +352 494848 1, F: +352 494848 2900, www.pwc.lu$

Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256) R.C.S. Luxembourg B 65 477 - TVA LU25482518

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other notes to the financial statements

1 - General information

EDMOND DE ROTHSCHILD FUND ("the SICAV") is an investment company with variable capital (Société d'Investissement à Capital Variable) with multiple sub-funds formed as a limited liability company under the Law of August 10, 1915 and authorised pursuant to Part I of the amended Law of December 17, 2010.

The SICAV was incorporated on June 15, 2000 under the name of R FUND for an unlimited duration. The SICAV was renamed LCF ROTHSCHILD FUND on October 4, 2000 and EDMOND DE ROTHSCHILD FUND on December 31, 2003. The Articles were amended for the last time on July 28, 2015 and the deed of amendment was published in the Memorial on October 6, 2015. These documents are available for inspection at the Registry of Trade and Companies in Luxembourg, and copies may be obtained on request upon payment of the administrative costs as determined by Grand-Ducal Regulation. The SICAV is registered with the Registry of Trade and Companies in Luxembourg under number B 76441.

As at March 31, 2023, the SICAV includes the following Sub-Funds:

Bond Sub-Funds

Strategy Sub-Fund

- EDMOND DE ROTHSCHILD FUND - QUAM 5

The main objective of the SICAV is to preserve the capital in real terms and ensure the growth of its assets. Obviously, no guarantee is given that this objective will be achieved.

The SICAV intends to achieve this objective by the active management of the Sub-Funds which can be divided into four categories. The first category concentrates exclusively on bonds. The second category concerns exclusively stocks and shares. The third category invests both in international bonds and equities. Lastly, the fourth category offers specifically profiled investments in terms of risk/return or a combination of both in the makeup of its portfolio.

Generally speaking, the Sub-Funds' portfolios consist of transferable securities, without restriction or limitation as to industrial, economic or geographical diversification, unless otherwise specifically defined in the investment policy of each Sub-Fund offered.

Shares are issued in registered form for each Sub-Fund. Fractions of shares are issued with four decimal places.

The Management Company may create within each Sub-Fund different Classes of Shares whose assets are commonly invested pursuant to the specific investment policy of the relevant Sub-Fund. Such Classes are distinguished by their fee structure, their distribution policy, their liquidity, and the minimum subscription applicable to them (this list is not exhaustive). The features of the relevant Classes issued within each Sub-Fund are as set out in the relevant Data Sheets.

The Classes in certain Sub-Funds may themselves be divided into a number of Sub-Classes, each with a different valuation currency by a decision of the Board. Investors' attention is drawn to the fact that depending upon the foreign exchange risk hedging operations put in place or not for each

Other notes to the financial statements

1 - General information

Sub-Class (hedged Sub-Classes are denominated "(H)"), investors are exposed to the risk that the Net Asset Value of any Sub-Class denominated in a given valuation currency may change unfavourably in comparison with that of a Sub-Class denominated in a different valuation currency. It is nevertheless stipulated that the expenses related to any financial instruments that may be employed in foreign exchange risk hedging operations for the Sub-Class in question are allocated exclusively to that Sub-Class.

In order to ensure efficient management, the Board of Directors may decide in accordance with the Articles to manage all or a part of the assets of one or more Sub-Funds together with those of other Sub-Funds (the pooling technique), or to co-manage the entirety or part of the assets with, if necessary, the exception of a reserve in cash, of one or several Sub-Funds together with the assets of other Luxembourg investment funds, or of one or more sub-funds of other Luxembourg investment funds (the Party or Parties to the Assets under Co-Management) for which the Depositary has been designated as the depositary bank. The Co-Management of the relevant assets shall be carried out in accordance with the respective investment policies of the Parties to the Assets under Co-Management, where each pursues identical or comparable objectives (the assets so co-managed or pooled being the Assets under Co-Management). The Parties to the Assets under Co-Management shall only participate in any such pooling or co-management arrangements authorised by their own individual Prospectuses, and in compliance with their own specific investment restrictions.

Each Party to the Assets under Co-Management will participate in the Assets under Co-Management in proportion to their contribution to the Assets under Co-Management. The assets shall be attributed to each Party to the Assets under Co-Management in proportion to their contribution to the Assets under Co-Management.

The rights of each Party to the Assets under Co-Management which take part shall be applicable to each of the lines of investment of such Assets under Co-Management.

Such Assets under Co-Management shall be constituted by the transfer of cash or, if appropriate, other assets of each of the Parties to the Assets under Co-Management. Subsequently, the Board may proceed regularly to make transfers to the Assets under Co-Management. The Assets may equally be transferred back to one of the Parties to the Assets under Co-Management up to the value of the holding of that Party to the Assets under Co-Management.

Dividends, interest, and other distributions which are by nature earnings generated within the context of the Asset Co-Management shall be due to each of the Parties to the Assets under Co-Management in proportion to their holding. Such earnings may be retained by the Party to the Assets under Co-Management with a holding, or be reinvested in the Assets under Co-Management.

All of the costs and expenses incurred with the context of the Co-Management of Assets shall be debited from the Assets under Co-Management. Such costs and expenses shall be attributed to each Party to the Assets under Co-Management in proportion to the rights of each in respect of the Assets under Co-Management.

In the event of a breach of the investment restrictions affecting a Sub-Fund, when such Sub-Fund is a Party to the Assets under Co-Management, the Board of Directors shall, even if the Management Company or, if applicable, the Manager has observed the investment restrictions by applying them to the Assets under Co-Management in question, require that the Management Company or, if applicable, the Manager reduces the investments in question in proportion to the holding of the Sub-Fund in question in the Assets under Co-Management or, if appropriate, shall reduce the holding in the Assets under Co-Management in question such that the investment restrictions are observed in respect of that Sub-Fund.

In the event that the SICAV is dissolved or if the Board of Directors decides without the required notice to withdraw the holding of the SICAV or of a Sub-Fund in the Assets under Co-Management, the Assets under Co-Management shall be allocated to the Parties to the Assets under Co-Management, each in proportion to their holding in the Assets under Co-Management Investors should be aware of the fact that such Assets under Co-Management are employed solely in order to ensure effective management insofar as all of the Parties to the Assets under Co-Management have the same depositary bank. The Assets under Co-Management do not constitute distinct legal entities and are not directly accessible to investors. Nevertheless, the assets and liabilities of each of the Sub-Funds shall at all times be separate and identifiable.

2 - Principal accounting policies

2.1 - Presentation of the financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern basis of accounting.

Other notes to the financial statements

2 - Principal accounting policies

2.2 - Portfolio valuation

All securities listed on an official stock exchange or on any other regulated market, operating regularly, recognised and open to the public are valued at the last price known in Luxembourg on the valuation day and, if the security is traded on several markets, on the basis of the last known price on the main market of this security. If the last known price is not representative, the valuation is based on the fair value at which it is expected it can be sold, as determined with prudence and in good faith by the Board of Directors.

Unlisted securities or securities not traded on a stock exchange or any other regulated market, operating regularly, recognised and open to the public, are valued based on the fair value at which it is expected they can be sold, as determined with prudence and in good faith by the Board of Directors.

The value of money market instruments are valued by the amortised cost method, which approximates market values. At maturity the difference with the purchase price is disclosed under interest on bonds.

Shares or units of undertakings for collective investment are valued on the basis of their last available net asset value.

2.3 - Net realised profits or losses on sales of investments

Realised gains or losses on sales of investments are calculated on the basis of average cost of investments sold.

2.4 - Foreign currency translation

The accounts of all the Sub-Funds of the SICAV are kept in EUR, except the accounts of the Sub-Funds EDMOND DE ROTHSCHILD FUND - EMERGING CREDIT, EDMOND DE ROTHSCHILD FUND - EMERGING SOVEREIGN, EDMOND DE ROTHSCHILD FUND - ASEAN EQUITY that are kept in USD.

The financial statements of the Sub-Funds are expressed in the above-mentioned currencies. Bank accounts, other net assets/(liabilities) as well as the valuation value of the portfolio securities that are expressed in a currency other than the currency of the Sub-Fund were converted to the applicable currency at the exchange rates prevailing on March 31, 2023.

Income and fees in currencies other than the currency of each Sub-Fund were converted to the applicable currency at the exchange rates prevailing on the transaction date.

Values expressed in any other currency than the reference currency of the Sub-Fund in question will be converted using the mean rate of exchange of the currency concerned.

The cost of investments in securities in currencies other than the currency of the Sub-Fund is converted to the currency of the Sub-Fund at the exchange rate prevailing on the purchase date.

Exchanges rates as at March 31, 2023:

2 - Principal accounting policies

2.5 - Combined financial statements

The various positions of the combined financial statements of the SICAV are equal to the sum of the various corresponding positions in the financial statements of each Sub-Fund and are expressed in euros (EUR).

The combined cost of investments in securities for the SICAV is equal to the sum of the cost of investments in securities of each Sub-Fund converted to EUR at the exchange rate prevailing on March 31, 2023.

The figures presented in the financial statements tables may in some cases show non-significant differences due to the use of rounding. These differences do not affect in any way the fair view of the financial statements of the Fund.

As at March 31, 2023, the total of cross Sub-Funds' investment amounts to 58,145,288.57 EUR and therefore total combined net asset value at the level of the SICAV at year-end without cross-investment would amount to 6,419,214,940.45 EUR.

	—	58,145,288.57

2.6 - Valuation of options contracts

The liquidating value of options contracts traded on exchanges or on Regulated markets is based upon the last available prices of these contracts on exchanges and regulated markets on which the particular options contracts are traded. For the details of outstanding options contracts, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments.

2.7 - Valuation of forward foreign exchange contracts

Unmatured forward foreign exchange contracts are valued by reference to the forward exchange rate prevailing on the remaining life of the contract. The resulting unrealised profit or loss is recorded in the statement of changes in net assets. For the details of outstanding forward foreign exchange contracts, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments.

2.8 - Valuation of futures contracts

Futures contracts are valued based on their closing price the previous day on the market concerned. Prices used are settlement prices on forward markets.

For the details of outstanding futures contracts, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments.

2.9 - Valuation of swaps

Swaps are valued at their fair market value based upon the last known price of the underlying asset.

CDS are marked to model daily based upon spread of the market makers and the change in value, if any, is recorded as "Change in net unrealised appreciation or depreciation on swaps" in the statement of operations and changes in net assets. Any payment received or paid to initiate a contract is recorded as a liability or asset in the statement of net assets. When the swap contract is terminated early, the SICAV records a realised gain or loss for any payments received or paid.

For the details of outstanding swaps contracts, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments.

2 - Principal accounting policies

2.10 - Dividend and interest income

Dividends are taken into account on the date upon which the relevant investments are first listed as ex-dividend. Interest income is accrued on a daily basis. Income is recorded net of withholding tax, if any.

2.11 - Transaction fees

The total amount of transaction fees is included in the statement of operations and changes in net assets and includes Correspondent's expenses and Brokerage fees.

2.12 - Abbreviations used in securities portfolios

In the statements of investments in securities and other net assets, the abbreviations refer to :

- XX: Perpetual bonds
- S: Semi-annual Q: Quarterly M: Monthly
- A: Annual
- U: Zero coupon bond
- CV: Convertible Bond

3 - Management of the SICAV

The Board of Directors is responsible for the management and the control including the determination of each Sub-Fund's investment policy.

Pursuant to a management company agreement entered into with effect from September 1, 2013, the Board of Directors of the SICAV has appointed Edmond de Rothschild Asset Management (Luxembourg) as Management Company responsible, on a day-to-day basis and under the supervision of the Board of Directors, for the provision of administration, investment management and marketing services in respect of all the Sub-Funds with the possibility to delegate part or all of such functions to third parties.

The Management Company was incorporated as a société anonyme on July 25, 2002 and its articles of incorporation were amended for the last time on December 29, 2014 and published in the Mémorial on February 20, 2015. The Management Company is registered with the Register of Commerce and Companies in Luxembourg under number B 88 591. The Management Company has been authorised by the CSSF to pursue its object, which consists of exercising the business of a management company under the provisions of Chapter 15 of the Law of 2010.

4 - Investment Managers

The Management Company has appointed, at the request and with the consent of the SICAV, Edmond de Rothschild Asset Management (France), Paris, Edmond de Rothschild (Suisse) S.A., Geneva and Samsung Asset Management (Hong Kong) Limited (the Investment Managers), as investment managers of certain Sub-Funds, as described in the relevant Data Sheets of the Prospectus.

Each Investment Manager is in charge of the day-to-day management of (all or portion of) the assets of the Sub-Funds for which it has been appointed as investment manager and deals in the relevant investments on account of the relevant Sub-Funds on a discretionary, subject to and in accordance with instructions received from the Management Company from time to time, and in accordance with each Sub-Fund's investment objective, policy and restrictions.

With the consent of the SICAV and the Management Company, each Investment Manager may delegate its investment management function to third parties in respect of one or more Sub-Funds for which it has been appointed as investment manager, in which case such delegation will be described in the relevant Data Sheet.

Each Investment Manager may, on its own responsibility, appoint one or more investment advisors for each Sub-Fund for which it has been appointed as investment manager. Their mission will be to advise it on investment opportunities and obtain assistance for the Sub-Funds whose assets it manages. The investment advisor(s) appointed by an Investment Manager are paid by the relevant Investment Manager.

Edmond de Rothschild Asset Management (France) is a 99.99% subsidiary of Edmond de Rothschild (France), Paris, which is a French commercial bank, belonging to the Edmond de Rothschild Group. Edmond de Rothschild Asset Management (France) is registered in the Register of Companies under the number 332 652 536. Edmond de Rothschild Asset Management (France) received its authorisation as an investment firm active in portfolio management in April 15, 2004 from the Financial Markets Authority (AMF) in France, under the number GP04000015. The share capital of Edmond de Rothschild Asset Management (France) is EUR 11,033,769 and is fully paid up. Edmond de Rothschild Asset Management (France) is active in asset management for both private and institutional investors.

Edmond de Rothschild (Suisse) S.A., Geneva is a Société Anonyme incorporated under Swiss law and domiciled at 18 Rue de Hesse, CH - 1204

4 - Investment Managers

Geneva. The company's purpose is to run a banking business, in particular private banking for private and institutional clients, both in Switzerland and in other countries.

Samsung Asset Management (Hong Kong) Limited, is a limited liability company incorporated in Hong Kong on 1 November 2007. In application of the ESMA Guidelines on performance fees (ESMA34-39-992) and Circular CSSF 20/764, the table below displays the actual amount of performance fees charged by each relevant Share Class and the percentage of these fees based on the Share Class Net Asset Value ("NAV"). Only the Share Classes for which performance fees have been charged are shown below.

Sub-funds	Share Class	ISIN Code	Sub- fund currency	Amount of performance fees as at 31/03/2023 (in Sub-fund currency)	Average NAV of the Share Class (in Sub-fund currency)	% in the Share Class average NAV

6 - Depositary and Central Administration

Edmond de Rothschild (Europe) has been appointed by the SICAV, in accordance with the Depositary Agreement, as domiciliary and depositary bank of the SICAV for the supervision/oversight (surveillance) of all assets of the SICAV, including those that are not entrusted to, or kept in safe custody by, the Depositary, as well as for the custody/safekeeping (conservation) of the assets of the SICAV that are entrusted to, or kept in safe custody by, the Depositary and the operations concerning the day-to-day administration of such assets. This agreement has been replaced by a Depositary Bank Agreement dated February 25, 2015 entered into force on January 1, 2015.

A new Depositary Bank Agreement between Edmond de Rothschild (Europe), Edmond de Rothschild Asset Management (Luxembourg) and the SICAV entered into force on December 12, 2016.

By an agreement entered into force for an unlimited duration, the Central Administration Agreement, Edmond de Rothschild (Europe) has been appointed, at the request and with the consent of the SICAV, as the SICAV's Administrative Agent, Registrar and Transfer Agent and Paying Agent (collectively, the "Central Administration"). Further to a transfer of activity, Edmond de Rothschild Asset Management (Luxembourg) has been appointed as Central Administration pursuant to a Central Administration Agreement dated February 25, 2015 coming into force on January 1, 2015.

The Central Administration is in charge of processing of the issue, redemption and conversion of the SICAV's shares and settlement arrangements thereof, keeping the register of the SICAV's shareholders, calculating the net asset value per share, maintaining the records and other general functions as more fully described in the Central Administration Agreement.

The Central Administration may delegate, with the prior consent of the Management Company and subject to the approval of the CSSF, part or all of its administrative functions and duties to a sub-contractor, which, having regard to the nature of the functions and duties to be delegated, must be qualified and capable of undertaking the duties in question.

The Depositary Bank's commission and the Central Administration's commission based on the total net assets of each Sub-Fund (excluding the sub-depositary fees) is set at a maximum of 0.30% per annum.

Any sub-contractor of the Central Administration is paid by the Administrative Agent out of its own remuneration.

7 - Commissions on subscriptions/redemptions

The issue of Shares takes place every Valuation Day. The Shares may be subscribed with the Transfer Agent or the Global Distributor or sales agents or distributors. Investors should note that the redemption price of the Shares is based on the Net Asset Value per Share which may significantly vary over time and that therefore, the redemption price may be higher than, equal to, or lower than the price at which the Shares were acquired by the shareholder at the time of their subscription.

All shareholders who have subscribed to Shares in the SICAV may, at any time, request the redemption of all or part of their Shares.

Requests for conversion should be sent to the Transfer Agent, the Global Distributor, the sales agents or distributors at its registered office in Luxembourg.

8 - Subscription tax ("Taxe d'abonnement")

Under the terms of the legislation in force and current practice, the SICAV is not subject to any tax on income or capital gains in Luxembourg. Similarly, the dividends paid by the SICAV are not affected by any tax at source in Luxembourg. On the other hand, each of the Sub-Funds is subject to the subscription tax, an annual tax on its assets, and is calculated and payable quarterly on the basis of the Net Asset Value of the SICAV at the end of each quarter.

Nevertheless, this tax is not assessed on the SICAV's assets that have been invested in other Investment Funds set up in Luxembourg. Moreover, the issue of Shares is not subject to any stamp duty or other tax in Luxembourg.

Some of the revenues of the portfolio of the SICAV in the form of dividends and interest may be subject to tax at various rates, withheld at source in the countries in which they arise.

The subscription tax rate is as follows:

- Classes A/B/C/CR/CRD/L/LD/LP/R/RS:0.05%
- Classes CRM/D/E/I/IA/ID/J/K/KD/M/N/N1/N2/O/P/S/T/TD: 0.01%

9 - Other tax matters

CLAIM PROCEDURE FOR WITHHOLDING TAX

In several jurisdictions in the European Union, historically, the withholding tax treatment of the dividends paid by companies in their domiciliation country depended on whether the dividends were paid to foreign or domestic entities. Therefore, when dividends were paid to a foreign entity, they were sometimes subject to a withholding tax that led to a different tax treatment which infringed the principles of the free capital flows and thus, contrary to the European Union law. Several decisions from the European Union Court of Justice and in France of the French State Council have been taken in favor of the foreign residents. Since 2014, Edmond de Rothschild Asset Management (France) filed, for the funds that it managed, claims for the reimbursement of the withholding tax paid on dividends received from foreign companies when the reimbursement perspectives were favorable to the funds and the amounts in question material compared to the costs of proceedings. As the claims follow litigation procedures with the tax authorities, the result and the length of these procedures are uncertain. The reimbursement (i.e. amount and interests as the case may be) that may be obtained is not guarantee. The filing of the claims is processed by a law firm that levies a fix fee per country, per fund, per year of claim. Upon reimbursement, the law firm levies a success fee.

10 - Dividend distributions

11 - Swing pricing

The Sub-Funds may suffer dilution of the net asset value per Share due to investors buying or selling Shares at a price that does not take into account dealing and other costs arising when the Investment Manager makes or sells investments to accommodate cash inflows or outflows.

To mitigate the effects of dilution and protect the interests of Shareholders, the Board may, at its discretion, adjust the Net Asset Value depending on whether or not a Sub-Fund is in a net subscription position or in a net redemption position on such Valuation Day.

The dilution adjustment will involve adding to, when the Sub-Fund is in a net subscription position exceeding a predefined threshold (swing threshold), and deducting from, when the Sub-Fund is in a net redemption position exceeding a predefined threshold, the Net Asset Value such figure as the Board considers represents an appropriate figure to meet duties, charges and spreads. In particular, the Net Asset Value of the relevant Sub-Fund will be adjusted (upwards or downwards) by an amount which reflects the estimated fiscal charges, dealing costs that may be incurred by the Sub-Fund and the estimated bid/offer spread of the assets in which the Sub-Fund invests. As certain stock markets and jurisdictions may have different charging structures on the buy and sell sides, the resulting adjustment may be different for net inflows than for net outflows. In exceptional market circumstances (higher market volatility, drying-up of liquidity, widening of the spread, etc.), the adjustment may be temporarily increased beyond the standard factor level but the decision to make such an increase must be duly justified and must take into account the best interest of the investors. Adjustments will however be limited to a maximum of 2% of the then applicable Net Asset Value.

Application of swing pricing mechanism is supported by a circular resolution signed by the Board of Directors of the fund, indicating the scope of application of the above-mentioned mechanism, the swing factor and the net capital activity threshold related to each sub fund in scope of this mechanism (The NAV is swung only when a predetermined net capital activity threshold (the swing threshold) is exceeded at each dealing day).

During the year, this mechanism has been applied only to the following Sub-Funds: EDMOND DE ROTHSCHILD FUND - EQUITY OPPORTUNITIES EDMOND DE ROTHSCHILD FUND - EQUITY OPPORTUNITIES EDMOND DE ROTHSCHILD FUND - EQUITY EURO CORE EDMOND DE ROTHSCHILD FUND - EQUITY EURO CORE EDMOND DE ROTHSCHILD FUND - HEALTHCARE EDMOND DE ROTHSCHILD FUND - BIG DATA EDMOND DE ROTHSCHILD FUND - BIG DATA EDMOND DE ROTHSCHILD FUND - ASEAN EQUITY EDMOND DE ROTHSCHILD FUND - CHINA EDMOND DE ROTHSCHILD FUND - STRATEGIC EMERGING EDMOND DE ROTHSCHILD FUND - CHINA EDMOND DE ROTHSCHILD FUND - CHOSOVER CREDIT EDMOND DE ROTHSCHILD FUND - CROSSOVER CREDIT EDMOND DE ROTHSCHILD FUND - EUROPE SYNERGY EDMOND DE ROTHSCHILD FUND - EURO HIGH YIELD EDMOND DE ROTHSCHILD FUND - HUMAN CAPITAL.

12 - Other income

This caption is composed of extourned accrual amounts regarding the performance fee.

Other notes to the financial statements

13 - Illiquid assets

HUA HAN HEALTH INDUSTRY HOLDINGS LTD (write-down 100%) - Edmond de Rothschild Fund - China

Shares of the company have been delisted on December 14, 2020 after being suspended from trading since September 26, 2016 due to potential fraud and a delay in the release of annual results.

EdRAML, as Management Company of Edmond de Rothschild Fund, with the consent of the Board of Directors, decided to write-down the position according to the available information. Hence, the discount has gradually increased from 20% on NAV 18.11.16 to 100% since NAV 26.11.20.

YANDEX NV (write-down 100%) - Edmond de Rothschild Fund - Strategic Emerging

Trading of shares of this Russian technology company has been suspended since February 28, 2022 on the NASDAQ such as other companies with material operations in Russia.

EdRAML, as Management Company of Edmond de Rothschild Fund, with the consent of the Board of Directors, decided to apply a 100% writedown on the position since NAV 08.03.22.

OGX AUSTRIA REGS DEF 8.375 12-22 01/04S (write-down 100%) – Edmond de Rothschild Fund - Emerging Bonds

OGX PETROLEO E GAS DEF 8.50 11-18 01/06S (write-down 100%) – Edmond de Rothschild Fund - Emerging Bonds These bonds were issued by the Brazilian oil and gas company OGX, which defaulted in 2013. As these bonds were deemed worthless, EdRAML as Management Company of Edmond de Rothschild Fund, with the consent of the Board of Directors, decided to apply a 100% write-down on these bonds since NAV 29.03.23.

PROVINCE DE CORDOBA 0.00 19-XX 31/12U (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds PROVINCE DE CORDOBA 0.00 19-XX XX/XXU (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds PROVINCE DE CORDOBA 0.00 19-XX XX/XXU (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds PROVINCE DE CORDOBA 0.00 19-XX 31/12U (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds PROVINCE DE CORDOBA 7.125 16-26 27/10Q (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds PROVINCE DE CORDOBA 7.125 16-26 27/10Q (write-down 30%) – Edmond de Rothschild Fund - Emerging Bonds

These securities are dummy codes created to materialize pending payments (nominal and interests) of the bond PROVINCE CORDOBA - 7.125 % Debt 2016-27.10.26 Class I (ISIN: ARPCDB320099) affected by restrictions in Argentina.

EdRAML as Management Company of Edmond de Rothschild Fund, with the consent of the Board of Directors, decided to apply a 30% write-down on these securities since NAV 23.02.23.

14 - Delegation

Edmond de Rothschild Asset Management (Luxembourg) and Edmond de Rothschild (Europe) may delegate all or part of their functions and duties to a sub-contractor which, having regard to the nature of the functions and duties to be delegated, must be qualified and capable of undertaking the duties in question.

15 - Changes in the composition of securities portfolio

A copy of the statement of changes in the portfolio of each Sub-Fund may be obtained free of charge from the registered office of the SICAV as well as from the German Payment and Information Office.

16 - Significant events during the year

UKRAINE / RUSSIA CRISIS

- On 24th February 2022, Russian forces advanced into Ukraine, launching a *large-scale military invasion*. The conflict continues with both political and economic implications in addition to the human tragedy. In an attempt to deter the Russian advances, the EU, the NATO countries, including the United States have imposed and are continuing to impose severe sanctions, notably, on the Russian economy. This situation has *increased valuation, liquidity and market risks* for securities issued by Ukrainian and Russian issuers and, to a lesser extent, Belarussian issuers. As of the date of this communication, the resolution of this event and the potential impact on the Fund continues to be uncertain. The evolution of this situation continues to be closely monitored, with the support of the Investment Management entities.
- Exposures to above mentioned countries are monitored by the Management Company and the Investment Managers on an ongoing basis since the beginning of the conflict. The table below highlights the net direct & indirect exposures if any, greater than or equal to 5% of the TNA, as at 31/03/2023, to concerned countries. Please note that below exposures are determined based on the "country of risk", which may differ from the methodology considered to determine the geographical exposures disclosed in the financial statements :

Russian Exposure No direct & indirect exposure greater than or equal to 5% of the TNA as at 31/03/2023

Ukrainian Exposure					
Sub Fund	Fund Currency	% TNA - Net Direct & Indirect (through Derivatives, if any) Exposure to Ukraine (31/03/2023)			
EDMOND DE ROTHSCHILD FUND - EMERGING BONDS	EUR	5.72%			
EDMOND DE ROTHSCHILD FUND - EMERGING CREDIT	USD	9.30%			

Belarusian Exposure	
No exposure as at 31/03/2023	

17 - Subsequent events

The Board of Directors has decided to merge, with effect as of 19 July 2023, the sub-fund Edmond de Rothschild Fund - Crossover Credit into the sub-fund Edmond de Rothschild SICAV - Corporate Hybrid Bonds, a sub-fund of the french société d'investissement à capital variable (open-ended investment company) Edmond de Rothschild SICAV.

EDMOND DE ROTHSCHILD FUND Additional unaudited information

Remuneration policy

Remuneration of the Management Company 1.

In accordance with applicable legislation, the Management Company has developed a remuneration policy which:

- Aims to maintain a policy that is compatible with sound and effective risk management in order not to lead to excessive risk taking;
- Takes into account the principles governing the client and investor protection when services are delivered; .
- Aims to manage and reduce potential or actual conflicts of interest within the Management Company among its different activities, and between managed UCIs and their managers.

The remuneration policy of the Management Company is available on the website: www.edmond-de-rothschild.com.

For the period from 1 January 2022 to 31 December 2022, the tables below indicate:

a) The total remuneration split in fixed remuneration³ and variable remuneration⁴ paid or payable by the Management Company to its employees and the number of beneficiaries.

Type of employees of the Management Company	Number of Beneficiaries	Fixed Remuneration ³ EUR	Variable Remuneration ⁴ EUR
Identified Staff ¹	37	4,969,373	1,549,450
Employees of the Management Company (Identified Staff ¹ included)	148	13,731,863	2,004,350

A pro-rata allocation of total remuneration (fixed remuneration³ and variable remuneration⁴) paid or payable to employees of the b) Management Company (including Identified Staff1) by reference to the average Net Asset Value of the Company when compared to the average net assets of all AIF's and UCITS managed by the Management Company.

Remuneration EUR	
2,318,746	

Remuneration of the Delegates² 2.

A pro-rata allocation of total remuneration (fixed remuneration³ and variable remuneration⁴) paid to the Identified Staff¹ of the a) Delegates² as reported to the Management Company by the Delegates² by reference to the portion of the assets managed by the Delegates² for the Company when compared to their total assets under management.

Delegates ²	Number of Identified	Fixed Remuneration ³	Variable Remuneration ⁴
	Staff ¹	EUR	EUR
EDRAM France	83	2,731,930	2,309,659

Further to the implementation of the 2022 remuneration policy, no significant irregularities were identified. As well, to date, no major changes have been made to the remuneration policy.

1) Identified Staff corresponds to the categories of staff of the Management Company and the Delegates² defined in their remuneration policies in accordance with the legislations in force.

 Delegates means the entities to which the Management Company has delegated portfolio management functions.
 Fixed remuneration means the total of fixed salaries, including 13th month pays and business bonuses, as well as various contractual allowances.

4) Variable remuneration means performance-related bonuses (recorded in the annual accounts of the Management Company as at 31 December 2022 and paid to the employees in March 2023), as well as legal and extra-legal transactional compensations

Securities Financing Transactions Regulation (SFTR) Disclosures

The SICAV may employ instruments falling into the scope of the SFTR (including Repurchase Transaction and Total Return Swap) in such proportion of assets as disclosed in the prospectus of the SICAV. The SICAV does holds such instruments at the date of this report :

Revenue component and expenditure component of the Fund includes interests, dividends, realised and change in unrealised on TOTAL RETURN SWAPS.

Information for Swiss investors

1. General information :

Edmond de Rothschild (Suisse) S.A. has been authorized by the Swiss Financial Market Supervisory Authority FINMA as Swiss representative of the Sub-funds of the SICAV for the offer in Switzerland to non-qualified investors and also acts as paying agent of the Sub-funds of the SICAV.

The prospectus, the Key Investors Information Document (KIID), the articles of incorporation, the annual and semi-annual reports of the SICAV, as well as the list of the purchases and sales which the SICAV has undertaken during the period, may be obtained, on simple request and free of charge, from the Swiss representative.

2. Total Expense Ratio (TER) :

The Total Expense Ratio (TER) as at March 31, 2023 for each Sub-Fund is calculated in accordance with the recommendations of the "SFAMA" guideline, approved by the FINMA and is included under the statistical information of each Sub-Fund.

As at September 25, 2020, the SFAMA ("Swiss Funds & Asset Management Association") merged with AMP ("Asset Management Platform") to become the AMAS ("Asset Management Association Switzerland").

The Total Expense Ratio (TER) represents the ratio of the total expenses, except transactions fees, annually supported by the Fund for each Sub-Fund. The TER should be calculated as follows:

TER = Total charges of the Sub-Fund's/Average net asset value of the Sub-Fund. Average net asset value of the Sub-Fund = Amount of net assets over the year / Observation's number.

If a collective investment scheme invests at least 10% of its net assets, as a fund of funds, in other collective investment schemes (target funds) which publish a TER within the meaning of the present guidelines, a composite (synthetic) TER of the fund of funds is to be calculated as of the closing date of the financial year or the end of the first half of the financial year. This corresponds to the sum of:

- the prorated TER of the individual target funds, weighted on the basis of their proportion in the net assets of the fund of funds as of the closing date,
- the issue and redemption commissions of the target funds actually paid, and
- the TER of the fund of funds minus the reimbursements received from the target funds during the reporting period.

If any of the target funds does not publish a TER pursuant to the present guidelines, the following procedure must be followed when disclosing the costs incurred by the fund of funds:

- Reference must be made to the fact that no composite (synthetic) TER can be determined for the respective portion of the fund of funds.
- A composite (synthetic) value must be indicated for the overall costs that the fund of funds is expected to incur.
- To this end:
 - o a truncated (synthetic) TER is calculated which weighted on the basis of the fund of funds' investment proportion includes the TERs of all target funds for which the TER is determined as per the present guidelines (i.e. target funds with TER), and
 - to this are added for each of the other target funds (i.e. target funds without TER) the issue and redemption commissions plus as precise as possible an estimate of the upper limit of the costs relevant for the TER. This value - weighted on the basis of the target funds' weighting in the fund of funds - must include the maximum management fee and the most recent performance-related management fee available for this target fund.

For the Sub-Funds launched during the period, the Total Expense Ratio (TER) is not presented as it is not representative.

SFDR (Unaudited)

Articles 6:

To meet the SFDR disclosure requirements, the Management Company identifies and analyses Sustainability Risks as part of its risk management process. The Sub-Funds do not promote environmental, social or governance characteristics but the security selection process includes a negative filter to exclude companies that contribute to the production of controversial weapons in compliance with international conventions in this area as well as companies that are exposed to activities related to thermal coal or tobacco in accordance with the exclusion policy of Edmond de Rothschild Group, which is available on its website. Although the inclusion of a Sustainability Risk analysis could help to develop a risk-adjusted return in the long term, the Investment Manager considers that these elements are not essential for generating a return for investors in line with the Sub-funds' investment objectives. Sustainability Risks may not be considered by the Investment Manager to be relevant because Sustainability Risks are not (a) systematically integrated by the relevant Investment objectives of the Sub-Fund, and/or (b) a core part of the investment strategy of the Sub-Fund, due to the nature of the investment objectives of the Sub-Fund. However it cannot be excluded that among other counterparties or sectors in which such Sub-fund will invest may have bigger exposure to such Sustainability Risks than others. An ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-fund's investment. Sustainability Risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks. The underlying investments of the Sub-Funds which are considered, by default, as Sub-Funds falling under article 6 of the SFDR do not take into account the European Union criteria for environmentally sustainable conomic activities, in the context of the Taxonomy

Legal entity identifier: 549300TOG8HTHD7K8O31

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

	•• Yes	• X No
is n ıf	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.54% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EUTaveneemy
s. a 5.	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 17.55 versus 20.14 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk));
- portfolio coverage of 96.68%;
- portfolio climate alignment 4.03°C vs 3.62°C for the universe;
- GHG emissions intensity (scopes 1,2 and 3): portfolio 121.55, universe 176.19 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested);

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf Based on this approach, the sub-fund has reached its objectives with 48.57% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Qiagen N.V 17/12/2027	7/12/2027 Health Care		United States
CLNXSM 0 1/2 07/05/28	Communication Services	4.29%	Spain

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

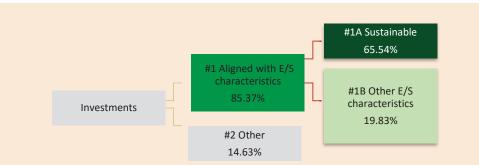

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23:

Asset allocation describes the share of investments in specific assets.

- 85.37% of the net assets in securities aligned with E/S characteristics;
- 65.54% of the net assets in sustainable investments;
- 14.63% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Information Technology	22.32
Consumer Discretionary	19.03
Communication Services	14.37
Industrials	12.39
Healthcare	6.86
Materials	6.
Real Estate	1.9
Consumer Staples	1.8
Financials	1.7
Energy	1.2
Utilities	0.5
Fixed Income Derivatives	0.1
Misc. (Mutual Funds)	0.1
Miscellaneous (Index)	0.0

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

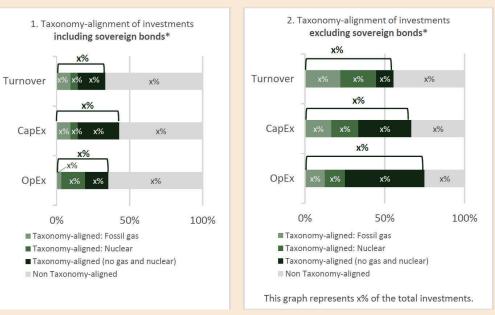

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0%	
CapEx – 0%	
OpEx – 0%	

What was the share of investments made in transitional and enabling activities?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

sustainable

economic activities

under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 65.54% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.03.23: 14.63% of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (3.46%);
- Deposits, money market instruments, money market funds and derivatives (11.17%);

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Global Convertibles

Legal entity identifier: 549300DXJZIDYFZU5F59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.27% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 20.67 versus 23.91 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 99.16%
- portfolio climate alignment 4.01°C vs 3.93°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 71.43, universe 143.37 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf Based on this approach, the sub-fund has reached its objectives with 52.27% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As of 31.03.23:

- 88.65 of the net assets in securities aligned with E/S characteristics;
- 52.27% of the net assets in sustainable investments;
- 11.35% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did this financial product have a sustainable investment objective?

• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.33% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio MSCI ESG rating 9.79 versus 9.63 for the universe (ESG score: source MSCI; ESG risk score on a scale from 0 (highest risk) to 10 (lowest risk))
- portfolio coverage of 85.28% (High Yield portfolio) and 100% (Investment Grade portfolio)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. Based on this approach, the sub-fund has reached its objectives with 31.33% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
TRAGSA 5.55 11/01/28	Energy	3.07%	Colombia
SIMHBZ 5.2 01/26/31	Industrials	2.52%	Brazil
AZULBZ 7 1/4 06/15/26	Industrials	2.46%	Brazil
ETINL 9 1/2 04/18/24	Financials	2.45%	Togo
PAMPAR 9 1/8 04/15/29	Utilities	2.24%	Argentina
GRUPOS 5 1/2 04/29/26	Financials	2.21%	Colombia
VOTORA 7 1/4 04/05/41	Industrials	2.21%	Brazil

BUEAIR 7 1/2 06/01/27	Agency	2.03%	Argentina

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

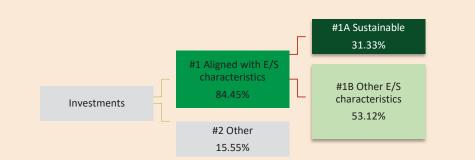

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23:

- 84.45% of the net assets in securities aligned with E/S characteristics;
- 31.33% of the net assets in sustainable investments;
- 15.55% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Utilities & Energy	23.03
Basic Materials	14.05
Discretionary Services	13.87
Financials - Banking Services	10.98
Consumer Staples	7.81
Financials and financial services	4.76
Sovereign - Government guaranteed	4.08
External Government Debt	3.49
Telecommunication Services	2.35
Real Estate	2.27
Tech, elec, telecom equipments	2.22
Automobile	2.11
Chemicals	1.95
Supranational	1.77
Consumer goods	1.4
Consumer discretionary	1.27

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

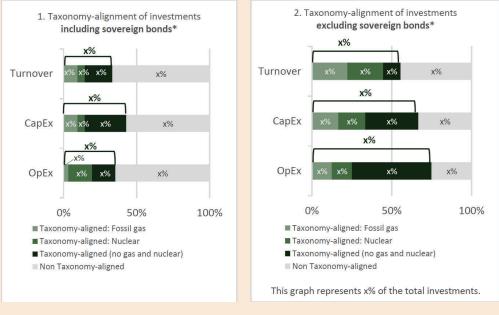

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

CapEx – 0%

Turnover – 0%

OpEx – 0%

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 31.33% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.03.23: 15.55% of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or nonconventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (12.46%);
- Deposits, money market instruments, money market funds and derivatives (3.09%);

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?
 Not applicable

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Investment Grade Credit

Legal entity identifier: 549300IK8810DNVC4N19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.75% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 19.36 versus 22.37 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 96.64%
- portfolio climate alignment 2.64°C vs 3.35°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 133.18, universe 168.34 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 50.75% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23:

• 91.04% of the net assets in securities aligned with E/S characteristics;

- 50.75% of the net assets in sustainable investments;
- 8.96% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets. In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Financials - Banking Services	19.95
Utilities & Energy	9.13
Telecommunication Services	8.25
Consumer Discretionary	5.75
Financials and financial services	5.6

Real Estate	5.28
Consumer Staples	4.89
Healthcare	4.31
External - Government Debt	4.08
Automobile	3.84
Sovereign - Government guaranteed	3.52
Discretionary Services	3.39
Financials - Insurance	2.59
Consumer goods	2.41
Media	2.3
Chemicals	2.15
Supranational	1.14

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes			
		In fossil gas	In nuclear energy	
×	No			

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

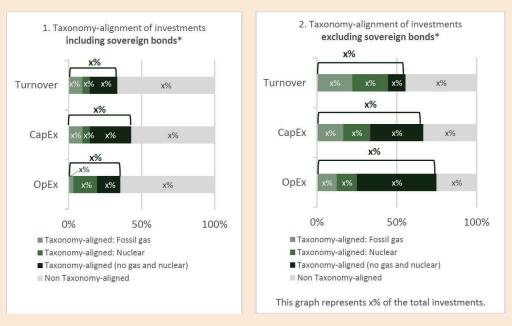

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0%	
CapEx – 0%	
OpEx – 0%	

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 50.75% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" as of 31.03.23, 8.96% of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (3.17%);
- Deposits, money market instruments, money market funds and derivatives (5.79%).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Euro High Yield

Legal entity identifier: 549300V1MKSWQ4H1U298

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.57% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 20.75 versus 21.51 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk));
- portfolio coverage of 80.92%;
- portfolio climate alignment 2.81°C vs 3.11°C for the universe;
- GHG emissions intensity (scopes 1,2 and 3): portfolio 220.50, universe 262.03 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested);

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 29.57% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

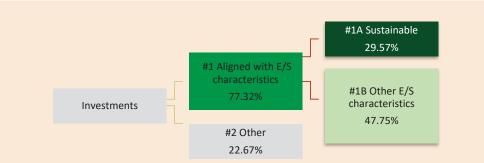

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23:

Asset allocation describes the share of investments in specific assets.

- 77.32% of the net assets in securities aligned with E/S characteristics;
- 29.57% of the net assets in sustainable investments;
- 22.67% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Discretionary Services	20.92
Telecommunication Services	15.55
Utilities & Energy	14.38
Automobile	10.11
Media	5.84
Consumer goods	5.59
Consumer Staples	5.22
Healthcare	3.89
Consumer Discretionary	3.19
Chemicals	2.94
Real Estate	2.82
Tech, elec, telecom equipments	2.69
Basic Materials	1.89
Others	0.48

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes		
		In fossil gas	In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional

activities are activities for which

low-carbon alternatives are not yet available and among others have

greenhouse gas

emission levels corresponding to the best performance.

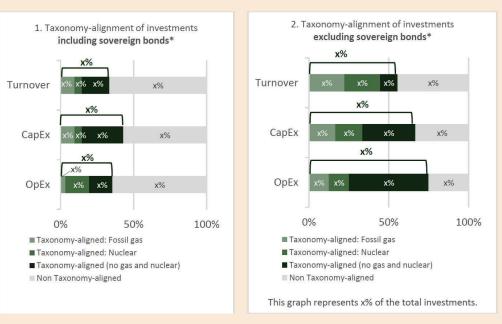

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational
 expenditure
 (OpEx) reflects the
 green operational
 activities of
 investee
 companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0%	
CapEx – 0%	
OpEx – 0%	

What was the share of investments made in transitional and enabling activities?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 29.57% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.03.23: 22.67% of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or nonconventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (18.30%);
- Deposits, money market instruments, money market funds and derivatives (4.37%);

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark? Not applicable
- How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Bond Allocation

Legal entity identifier: 2221009YB0HYOC3FXE55

Environmental and/or social characteristics

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

practices.

investment means an investment in an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

•• Yes	• No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.10% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Did this financial product have a sustainable investment objective?

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 22.22 versus 24.69 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 95.18%
- portfolio climate alignment 2.80°C vs 3.63°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 265.19, universe 306.08 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards. The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 61.10% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BTPS 0 04/01/26	Govies	2.56%	Italy

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23 (in % of net assets):

- 88.85% of the net assets in securities aligned with E/S characteristics;
- 61.10% of the net assets in sustainable investments;
- 11.14% of the net assets in # Other.

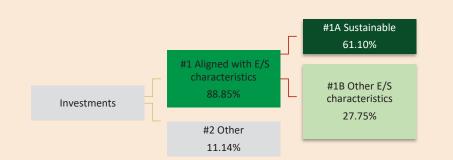

Asset allocation describes the share of investments in specific assets. To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As of 31.03.23

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Income Europe

Legal entity identifier: 54930023U7P1EPTME560

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
 It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.54% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 18.95 versus 20.51 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 92.53%
- portfolio climate alignment 2.70°C vs 2.60°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 165.26, universe 188.85 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

…and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained. The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 65.64% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

- How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Europe Synergy

Legal entity identifier: 549300GRL1F9671VH742

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 88.32% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the

investment does not significantly harm any environmental or social objective and

that the investee companies follow good governance

practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 18.99 versus 20.32 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk));
- portfolio coverage of 100%;
- portfolio climate alignment 2.90°C vs 2.75°C for the universe;
- GHG emissions intensity (scopes 1,2 and 3): portfolio 222.41, universe 191.50 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested);

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf Based on this approach, the sub-fund has reached its objectives with 88.32% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

3

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-de-rothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Deutsche Telekom AG	Communication Services	4.51%	Germany
Sanofi	Health Care	4.50%	France
Koninklijke KPN NV	Communication Services	4.35%	Netherlan ds
Banco BPM SpA	Financials	4.32%	Italy
Carrefour SA	Consumer Staples	3.91%	France
SPIE SA	Industrials	3.83%	France
Shell PLC	Energy	3.70%	Netherlan ds
EDP - Energias de Portugal SA	Utilities	3.63%	Portugal
Reckitt Benckiser Group PLC	Consumer Staples	3.57%	United Kingdom
Informa PLC	Communication Services	3.47%	United Kingdom

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

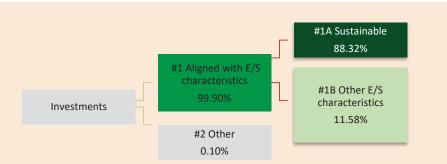

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23:

 99.90% the net assets in securities aligned with E/S characteristics (securities having a Sustainalytics notation inferior or equal to 30);

- 88.32% of the net assets in sustainable investments;
- 0.10% of the net assets in # Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To comply with the

EU Taxonomy, the

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

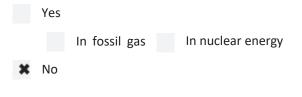

As of 31.03.23

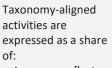

Sector	Allocation
Consumer Discretionary	17.77
Industrials	15.5
Consumer discretionary	12.31
Financials	11.44
Materials	10.08
Healthcare	8.92
Consumer Staples	7.86
Information Technology	7.49
Utilities	6.04
Energy	2.49

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

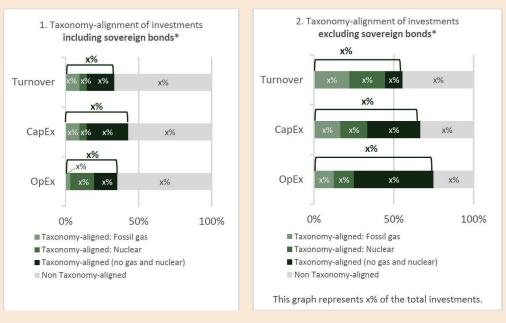

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0% CapEx – 0% OpEx – 0%

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are

The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 88.32% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.03.23: 0.10% of of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or nonconventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (0%);
- Deposits, money market instruments, money market funds and derivatives (0.10%);

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Strategic Emerging

Legal entity identifier: 5493009IIE9V4PS6PS73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.53% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio Sustainalytics ESG rating 22.54 versus 25.17 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 100%
- portfolio climate alignment 3.53°C vs 3.74°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 103.46, universe 222.04 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product

are attained.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 35.53% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

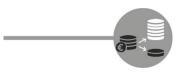

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

Product name: EdR Fund – US Value

Legal entity identifier: 549300VNTCF8O2IPR503

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	• No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.05% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio MSCI ESG rating 11.54 versus 11.07 for the universe (ESG score: source MSCI; ESG risk score on a scale from 0 (highest risk) to 10 (lowest risk))
- portfolio coverage of 100%
- portfolio climate alignment 4.36°C vs 3.91°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 353.68, universe 159.72 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 58.05% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.

How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

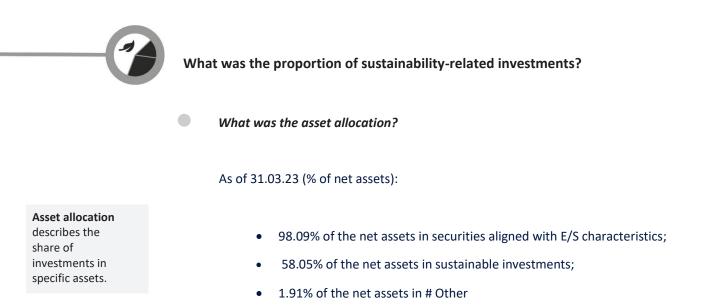

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Healthcare	23.76
Energy	22.39
Financials	13.64
Communication Services	9.52
Industrials	8.51
Materials	7.22
Consumer discretionary	6.47
Information Technology	4.4
Consumer Staples	1.26

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional activities are

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

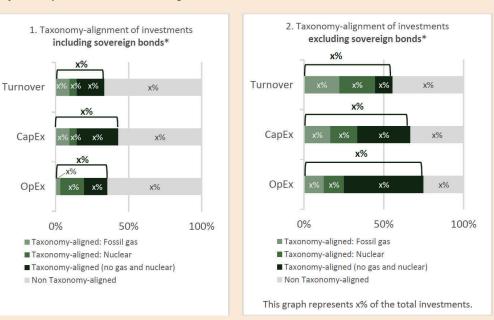

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

 capital
 expenditure
 (CapEx) shows the green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.

 operational expenditure (OpEx) reflects the green operational activities of investee companies.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Healthcare

Legal entity identifier: 549300S489MUGD5R2H22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.71% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

The UCITS promotes environmental and social characteristics identified by our ESG analysis model, and which are included in our analyzes upstream of the selection of securities and has a follow-up on indicators including internal and external ESG

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ratings, a monitoring the level of controversies, alignment with the trajectory of the Paris agreements or the intensity of carbon emissions.

How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 21.81 versus 21.94 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk));

- portfolio coverage of 98.55%;
- portfolio climate alignment 2.73°C vs 2.89°C for the universe;

- GHG emissions intensity (scopes 1,2 and 3): portfolio 29.11, universe 51.38 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested).

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

…and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf Based on this approach, the sub-fund has reached its objectives with 71.71% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Moreover, and in accordance with the SRI label, the bottom 20% of our universe is excluded, as well as the most severe controversies, limiting any adverse impacts.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-de-rothschild.com under the "Fund Center" tab.

The list includes the investments constituting **the** greatest proportion of investments of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

What were the top investments of this financial product?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 24.87 versus 27.25 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk));
- portfolio coverage of 100%;
- portfolio climate alignment 3.51°C vs 3.84°C for the investment universe;
- GHG emissions intensity (scopes 1,2 and 3): portfolio 108.12, universe 201.21 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested);

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 17.38% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

Product name: EdR Fund – Big Data

Legal entity identifier: 549300W3YO0S1LN24T56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

•• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.45% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 18.67 versus 21.33 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 97.76%
- portfolio climate alignment 3.83°C vs 3.58°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 83.72, universe 139.51 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

…and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 51.45% of the net assets invested in sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

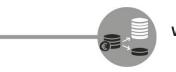

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

Largest investments	Sector	% Assets	Country
NetApp Inc	Information Technology	3.98%	United States
Akamai Technologies Inc	Information Technology	3.76%	United States
Alphabet Inc	Communication Services	3.76%	United States
Schlumberger NV	Energy	3.66%	United States
Orange SA	Communication Services	3.65%	France
AXA SA	Financials	3.56%	France
Banco Bilbao Vizcaya Argentaria SA	Financials	3.52%	Spain
Verizon Communications Inc	Communication Services	3.40%	United States
Bank of America Corp	Financials	3.20%	United States
Match Group Inc	Communication Services	3.04%	United States

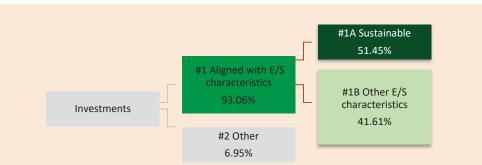

What was the proportion of sustainability-related investments?

What was the asset allocation?

As of 31.03.23 (% of net assets):

- 93.06% of the net assets in securities aligned with E/S characteristics
- 51.45% of the net assets in sustainable investments;
- 6.95% of the net assets in # Other.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

As of 31.03.23

Sector	Allocation
Software & Services	26.04
Communication Services	23.17
Financials	10.96
Healthcare	6.85
Semiconductor & Semicond. Equip.	6.81
Industrials	6.11
Technology Hardware	5.16
Consumer Discretionary	4.06
Energy	3.62
Real Estate	2.10
Materials	0.42

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an vironmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

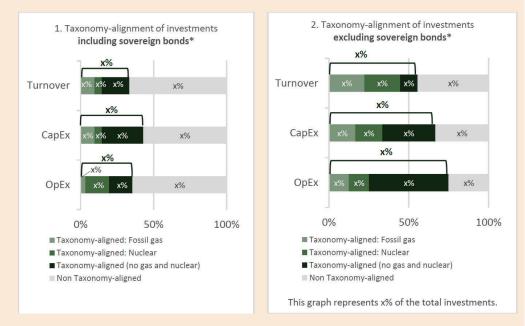

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0%

Taxonomy-aligned activities are expressed as a share of:

 turnover reflects the "greenness" of investee companies today.

capital expenditure (CapEx) shows the

green investments made by investee companies, relevant for a transition to a green economy.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

CapEx - 0%

OpEx – 0%

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 51.45% of the net assets as of 31.03.23.

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" as of 31.03.23, 6.95% of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (2.13%);
- Deposits, money market instruments, money market funds and derivatives (4.82%).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark? Not applicable
- How did this financial product perform compared with the broad market index? Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Equity Euro Core

Legal entity identifier: 549300ANFMAL3Q0ZQ254

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

•• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.96% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

practices.

an investment in an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

How did the sustainability indicators perform?

As of 31.03.23:

- portfolio ESG rating 59.36 versus 58.66 for the universe (ESG score on a scale from 0 (worst) to 100 (best);
- portfolio coverage of 96.84%;
- portfolio climate alignment 3.28°C vs 2.69°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 210.96, universe 188.10 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested);

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 90.96% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
 - How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

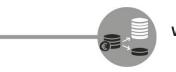

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

What were the top investments of this financial product?

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: EdR Fund – Human Capital

Legal entity identifier: 5493002QMPORE32PZL42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

• Yes	• X No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.87% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm

any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes Environmental and Social characteristics identified by our ESG framework, such as :

- Environmental : environmental strategy, energy consumption, greenhouse gas emissions, water, waste, pollution, green impact
- Social: working conditions, human resources management, social impact, relationship with stakeholders, health and safety.

The Fund seeks particular alignment with the Decent Work and Economic Growth Well Being United Nations Sustainable Development Goals (SDG 8).

• How did the sustainability indicators perform?

During the period under review, the Sub-Fund invested in securities of a universe reduced of 20% of the worst ESG ratings.

As of 31.03.23:

- portfolio Sustainalytics ESG rating 16.66 versus 21.75 for the universe (ESG score: source Sustainalytics; ESG risk score on a scale from 0 (lowest risk) to 100 (highest risk))
- portfolio coverage of 100%
- portfolio climate alignment 3.31°C vs 3.60°C for the universe
- GHG emissions intensity (scopes 1,2 and 3): portfolio 115.83, universe 147.49 (Source : Carbon4 Finance ; GHG emissions intensity scopes 1,2 and 3 (retreated) tons CO2 per million Euros invested)

Moreover, 0% of the portfolio was invested in companies that contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy.

…and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The sustainable investments of the fund aim at contributing positively to one or more sustainable development goals of the United Nations (SDGs), in the environmental, social or societal space, while not causing significant harm and respecting minimum governance standards.

The description of the sustainable investment methodology defined by Edmond de Rothschild Asset Management (France) is available on the asset management company's website :

https://www.edmond-de-rothschild.com/SiteCollectionDocuments/Responsibleinvestment/OUR%20ENGAGEMENT/FR/EdRAM-Definition-et-methodologie-Investissement-durable.pdf

Based on this approach, the sub-fund has reached its objectives with 74.87% of sustainable investments as of 31.03.23.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments made by the Sub-fund ensure that they do not cause significant harm to a sustainable investment objective, in particular:

- by applying the Edmond de Rothschild Group's exclusion policy which includes controversial weapons, tobacco, thermal coal and unconventional fossil fuels,
- by ensuring that it does not invest in companies that violate the UN Global Compact.
- How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators are integrated in the fund's investment process, and are also part of our ESG rating model and in our definition of sustainable investment (see the description of the sustainable investment methodology available on the website). They are integrated into portfolio monitoring tools and monitored by the Investment team and the Risk Department. Moreover, and in accordance with the SRI label, the bottom 20% of our universe is excluded, as well as the most severe controversies, limiting any adverse impacts.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment manager selected sustainable investments in accordance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by excluding any company that violates the UN Global Compact principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the sub-fund takes into account the main negative impacts on sustainability factors by first applying Edmond de Rothschild Asset Management's (France) exclusion policy, notably concerning thermal coal and controversial weapons. The main negative impacts are also taken into consideration in the framework of the proprietary or external ESG analysis of issuers and impact the Environmental and Social scores as well as the overall ESG rating.

The sub-fund's periodic reports presenting, in accordance with Article 11 of Regulation (EU) 2019/2088, the so-called SFDR Regulation, in particular the extent to which environmental or social characteristics are respected, are available on the website www.edmond-derothschild.com under the "Fund Center" tab.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2022 – 31/03/2023

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover – 0%	
CapEx – 0%	
OpEx – 0%	

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852. The share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy was 74.87% of the net assets as of 31.03.23.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.03.23: 3.85% of of the net assets with notably:

- Securities without ESG rating, but still do not contribute to the production of controversial weapons, in accordance with relevant international conventions, as well as companies exposed to thermal coal, tobacco activities or non-conventional fossil energies activities, in accordance with the Edmond de Rothschild Group's exclusion policy (0%);
- Deposits, money market instruments, money market funds and derivatives (3.85%);

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The percentage of sustainable investment is monitored by the Risk Department via the investment management and control tool.

We also have dashboards that enable us to monitor climate and ESG indicators, such as the portfolio's CO2 footprint or temperature, exposure to the various United Nations Sustainable Development Goals, and the environmental and social ratings of investments. Our tools provide a consolidated view of the portfolio, as well as an issuer-by-issuer analysis. Our proprietary and/or externally sourced ESG analysis also assigns a score to each of the environmental and social themes promoted by the fund.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark? Not applicable
- How did this financial product perform compared with the broad market index?
 Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
