Wellington Management Funds (Luxembourg)

General information to Unitholders

Structure of Wellington Management Funds (Luxembourg) (the “Umbrella Fund”)

The Umbrella Fund is an open-ended investment fund organised initially under Part I of the Luxembourg Law of March 30, 1988 as an unincorporated mutual investment fund (fonds commun de placement) and is authorised under Part I of the Luxembourg Law of December 17, 2010, as amended (the “2010 Law”).

The Umbrella Fund is managed by Wellington Luxembourg S.à r.l. (the “Management Company”), an entity which was incorporated under the laws of Luxembourg on August 30, 1991 under the form of a société en commandite par actions (S.C.A.), which was then converted to a société anonyme (S.A.) on October 31, 2006 and subsequently converted into a société à responsabilité limitée (S.à r.l.) on December 5, 2014. Wellington Luxembourg S.à r.l. acts as the Management Company of the Umbrella Fund, pursuant to Management Regulations approved by the Management Company (the “Management Regulations”).

The Umbrella Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) under Article 1(2) of the UCITS Directive (the “Directive”), and may therefore be offered for sale in European Union (“EU”) Member States (subject to registration in countries other than Luxembourg). In addition, applications to register the Umbrella Fund may be made in other countries.

As at June 30, 2020, the Umbrella Fund consists of sixteen funded funds (the “Funds”):

- Wellington Asia Technology Fund
- Wellington Asian Opportunities Fund
- Wellington Climate Strategy Fund
- Wellington Downside Alpha Opportunities Fund
- Wellington Emerging Markets Research Equity Fund
- Wellington Global Health Care Long-Short Fund
- Wellington Global Innovation Fund
- Wellington Global Opportunities Equity Fund
- Wellington Global Quality Growth Fund
- Wellington Global Research Equity Fund
- Wellington Global Select Capital Appreciation Equity Fund
- Wellington Strategic European Equity Long-Short Fund
- Wellington US Equity Long-Short Fund
- Wellington US Research Equity Fund
- Wellington Global Total Return Fund (UCITS)
- Wellington Opportunistic Emerging Market Debt II Fund

The Management Regulations

The Management Regulations for the Umbrella Fund were stipulated by the Management Company on April 15, 1994. The Management Regulations were published in the Mémorial of May 17, 1994 and were deposited with the Register of the Tribunal d’Arrondissement of Luxembourg on April 19, 1994. These Management Regulations have been amended several times, most recently on July 24, 2020.

For all Unitholders

The Management Regulations, the Prospectus, the Key Investor Information Documents (“KIID”), the unaudited semi-annual reports, audited annual reports along with information concerning issue and repurchase prices, the statement of changes in the composition of the investment portfolio and the financial situation of the Umbrella Fund can be requested directly from Wellington Luxembourg S.à r.l. at the registered office of the Management Company of the Umbrella Fund or by telephoning (352)-464010-1.

Financial information concerning the Umbrella Fund shall be available at the registered office of the Management Company and from State Street Bank International GmbH, Zweigniederlassung Luxembourg every bank working day in Luxembourg.

Notices to Unitholders

All notices to Unitholders shall be sent, in accordance with the instructions held on the account, to the Unitholders at the address inscribed in the register of Unitholders. In addition, the Management Company may decide to inform the Unitholders by other means.

Wellington Management Funds (Luxembourg)

General information to Unitholders (continued)

For Swiss investors

BNP Paribas Securities Services, Paris, (“BNP Paribas”) succursale de Zürich, Selnaustrasse 16, 8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent of the Umbrella Fund. The Management Regulations, the Prospectus, the Key Investor Information Documents, the unaudited semi-annual reports, the audited annual reports and the statement of changes in the composition of the investment portfolio can be obtained free of charge from BNP Paribas.

The Management Company or the Umbrella Fund and its agent may pay retrocessions as remuneration for distribution activity in respect of Funds units in or from Switzerland. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge. In respect of the units distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland.

Specific information for investors in the Federal Republic of Germany

Wellington Management Europe GmbH, Bockenheimer Landstraße 43-47, 60325 Frankfurt am Main, Germany, is the German Information Agent of the Umbrella Fund. The Management Regulations, the Prospectus, the Key Investor Information Documents, the unaudited semi-annual reports, and the audited annual reports can be obtained free of charge in hard copy form from the German Information Agent. The statement of changes in the composition of the investment portfolio is also available free of charge upon request at the office of the German Information Agent.

The Umbrella Fund does not issue printed individual certificates. Applications for the redemptions and conversion of units may be submitted either electronically through an approved method or by fax to State Street Bank International GmbH, Zweigniederlassung Luxembourg, the Transfer Agent of the Fund, who will arrange for the payments or conversions to be effected.

In addition, the Issue and Redemption prices as well as the conversion prices are available free of charge at the Management Company and the Administrator on the business day following the dealing day at 5:00 p.m. Luxembourg time and published daily on www.fundinfo.com.

Any notices to the Unitholders will be sent to the Unitholders in Germany via letter or e-mail, as requested by the Unitholder in their Account Opening Agreement.

According to §298 (2) of the Investment Code (KAGB), the notices to the Unitholders will additionally be published in Germany in the Federal Gazette (www.bundesanzeiger.de) in the following cases:

- suspension of the redemptions of the units,
- termination of the management of the Umbrella Fund or its liquidation, with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool, any amendments to the management regulations which are inconstant
- merger of any Fund with one or more other Funds and,
- the change of the Fund into a Feeder Fund or the modification of a Master Fund.

For UK investors

Her Majesty's Revenue and Customs has confirmed the fiscal transparency of the Umbrella Fund for UK investors. Therefore, UK investors invested in class S GBP 0%, class S GBP 15%, class T GBP 0% and class T GBP 15% that satisfy certain documentation requirements may be able to claim a reduction in the rate of US dividend withholding tax under the US-UK income tax treaty to the same extent as if they had invested directly in the item giving rise to US tax. The Umbrella Fund has been advised that the proper interpretation of section 6114 of the US tax code currently requires that UK investors invested in class S GBP 0%, class S GBP 15%, class T GBP 0% and class T GBP 15% file a US tax return disclosing their claim for exemption from certain US dividend withholding tax under the US-UK income tax treaty.

Wellington Management Funds (Luxembourg)

Report of the Management Company

June 30, 2020

The Management Company hereby presents the unaudited semi-annual report of the Umbrella Fund covering the period from January 01, 2020 to June 30, 2020.

State Street Bank International GmbH, Zweigniederlassung Luxembourg serves as a Depositary, Administrator, Registrar and Transfer Agent and Paying Agent of the Umbrella Fund.

Corporate governance and ALFI (the Association of the Luxembourg Fund Industry)

Code of conduct

The preparation of the financial statements of the Umbrella Fund is carried out by State Street Bank International GmbH, Zweigniederlassung Luxembourg, as Administrator under the supervision of the Board of Managers of the Management Company (the "Managers"). In accordance with the Luxembourg laws and regulations, the Managers have contracted with the Management Company to put procedures in place to ensure that appropriate internal controls relevant to accounting records, including the preparation and fair presentation of the financial statements, are in place at the Umbrella Fund's service providers, and otherwise to exercise oversight with respect to accounting estimates or judgments made in connection with the preparation of the financial statements. The Managers are satisfied that they have fully complied with these requirements.

The Managers are responsible for ensuring that a high level of corporate governance is met and consider that the Umbrella Fund has complied with the best practices in the Luxembourg funds industry.

In particular, the Managers have adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance.

The Managers meet at least four times a year and ensure that the Management Company maintains high standards of integrity and control in the Umbrella Fund's operations and that it possesses adequate governance and means of control as Luxembourg laws and regulation demand.

The Managers consider that the Umbrella Fund has complied with the principles of the Code in all material aspects throughout the financial period ended June 30, 2020. The Managers undertake an semi-annual review of ongoing compliance with the principles of the Code.

Effects of Health Crises and Other Force Majeure Events

Health crises, such as pandemic and epidemic diseases, as well as other catastrophes that interrupt the expected course of events, such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have and may in the future have an adverse effect on clients' investments and the Investment Manager's operations. For example, any preventative or protective actions that governments may take in respect of such diseases or events may result in periods of business disruption, inability to obtain raw materials, supplies and component parts, and reduced or disrupted operations for client portfolio companies. In addition, under such circumstances the operations, including functions such as trading and valuation, of the Investment Manager and other service providers could be reduced, delayed, suspended or otherwise disrupted. Further, the occurrence and pendency of such diseases or events could adversely affect the economies and financial markets either in specific countries or worldwide.

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in the equity securities of technology and technology related companies listed or operating in the Asia region.

The investment approach uses bottom up, company specific analysis to invest in publicly traded securities of companies domiciled in the Asia region that the Investment Manager believes will benefit from the region's growing importance in the technology sector. These include securities of companies involved in the design and/or manufacture of semiconductors, semiconductor equipment, electronics, software and technology services, as well as technology related companies in other sectors. The Investment Manager carries out rigorous fundamental research to identify companies with characteristics such as a sustainable competitive advantage, strong management team, successful product strategy and a track record of execution policies that favor Unitholders. The Investment Manager will also consider valuation metrics such as price to earnings ratios and strong cash flows. Portfolio holdings will typically possess many of these characteristics and will be continually evaluated and sold if there is a material change, for example management turnover, deteriorating financial performance or where the shares appear over-priced relative to earnings expectations.

Although the Fund is not constructed relative to a benchmark, the MSCI All Country Asia Pacific Information Technology Index (the "Index") will serve as a reference benchmark and is used to provide market context. The Index is designed to measure performance of the Asian technology equity market.

The Fund will primarily invest, directly or indirectly through the use of Foreign Direct Investments ("FDIs") within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed-ended Real Estate Investment Trusts ("REITs"), exchange-traded funds ("ETFs") and other Undertakings for Collective Investments ("UCIs"). The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Regulation S securities are those offered outside the United States without registration under the United States Securities Act of 1933 (as amended)). The Fund may invest in China A shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy.

The Fund takes an unconstrained approach investing in technology companies across the capitalization spectrum in developed and emerging markets in the Asia region (including Asia Pacific), with sector and country allocations an outcome of the stock selection process. The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations, although the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington Asian Opportunities Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in companies listed or operating in the Asia ex Japan region.

The Fund is an unconstrained approach which invests in companies across the capitalization spectrum in developed and emerging markets in the Asia ex Japan region, focusing on the identification of undervalued franchises. The Fund is constructed on a bottom-up, company specific basis and investment decisions are based on considerations of both upside return and downside risk. Sector and country allocations are an outcome of the stock selection process. This evaluation includes assessments of financial strength and management credibility.

Although the Fund is not constructed relative to a benchmark, the MSCI All Country Asia Ex Japan Index (the "Index") will serve as a reference benchmark and is used to provide market context. The Index is designed to measure large- and mid-cap equity market performance across Asian markets (excluding Japan).

The Fund will invest primarily in equity securities of companies with market caps in excess of USD 500 million, including common stocks, depository receipts (such as ADRs, GDRs and European Depository Receipts ("EDR")), shares in REITs constituted as Closed End Funds, similar liquid equity equivalents, and equity derivatives such as futures and options which may be used for investment purposes and for efficient portfolio management including hedging against risk. The Fund will invest primarily in companies domiciled in countries in the Asia ex Japan region, however typically up to 15% of the Fund may be invested in companies domiciled outside of the Asia ex Japan region. Cash holdings are generally limited to 10%. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Asian Opportunities Fund launched on December 20, 2010 with an S USD class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in the equity securities issued by companies worldwide that the Investment Manager believes are most directly addressing environmental sustainability or climate risks through their products, service or capital.

The investment approach combines fundamental bottom up analysis that focuses on a company's ability to deliver a potential "double bottom line" by evaluating a company's environmental stewardship (sustainability return) and then its capital stewardship (financial investment return). In assessing a company's environmental stewardship, the Investment Manager segments the investment opportunity set into major categories, including low carbon electricity, low carbon transport, water and resources management, energy efficiency/management. The Investment Manager focuses, in particular, on whether the company's products, services or capital provide for decarbonization (climate change mitigation) or resource efficiency (climate change adaptation) and resiliency (climate change adaptation). The Investment Manager's analysis of a company's sustainability impact and intrinsic values determines the investment decision and relative size of each holding. The Investment Manager carries out bottom-up, company specific analysis using valuation metrics such as price to earnings, price to book ratios, enterprise value to Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA") and perceived intrinsic value to assess companies against current market security prices and broader market sentiment. Security selection decisions will be based primarily on in-depth fundamental analysis, but holdings will be continually evaluated to ensure allocations to various sectors and themes are consistent with top-down macroeconomic views.

Although the Fund is not constructed relative to a benchmark, the MSCI All Country World Index (the "Index") will serve as a reference benchmark and is used to provide market context. The Index is market capitalization weighted and is designed to measure equity market performance of developed and emerging markets.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products which facilitate exposure to eligible underlying assets (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed-ended REITs, ETFs and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)). The Fund may invest in China A shares traded via Stock Connect. The Fund may invest up to a maximum of 20% of net assets in debt securities which the Investment Manager perceives to be consistent with the investment approach such as green bonds, which are classified as debt instruments from which proceeds are used to fund projects or activities with environmental and/or climate benefits.

The Fund may also invest in other securities including, for example, ETFs qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents, all as deemed by the Investment Manager to be consistent with the investment discipline.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy.

The Fund takes an unconstrained approach to investing in companies across the capitalization spectrum in developed and emerging markets, with sector and country allocations an outcome of the stock selection process. The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations, although the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in equity securities issued by companies worldwide.

The Investment Manager combines multiple independent and complementary investment approaches that, when combined together, the Investment Manager believes will decline less than the market (as represented by the MSCI All Country World Index) when stocks fall while aiming to keep pace when markets rise. The Investment Manager believes this approach has the potential to generate long-term total returns by seeking to preserve capital in weak markets which may allow for better long-term appreciation of capital due to the effect of compounding.

In order to identify individual approaches with the potential to outperform the market in adverse ('downside') market environments, the Investment Manager reviews a broad and diverse range of equity strategies. The screening process is both qualitative and quantitative. Qualitatively, the emphasis is on approaches with differentiated investment philosophies where the Investment Manager is comfortable investing in concentrated portfolios that emphasise their specific area of expertise. Quantitative research is carried out on each approach, covering characteristics such as the investment universe, market-cap orientation, investment style and potential overlap of different approaches. In aggregate, the Investment Manager tends to focus on strategies that aim to have high active share (e.g. not constructed to look like a benchmark) and tracking risk (e.g. not constructed to perform like a benchmark). While the Fund is not constructed relative to a benchmark, the Investment Manager seeks underlying approaches that are designed to outperform their benchmarks and that the Investment Manager believes will have the ability to outperform (i.e. generate alpha) in adverse market environments. In combining approaches, the Investment Manager utilises a number of proprietary portfolio construction and risk management tools. These include factor-based analysis (which seeks to analyse the portfolio based on common characteristics such as quality, growth, value, momentum, volatility and other factors) scenario analysis, risk contribution and a broad range of fundamental metrics.

Although the Fund is not constructed relative to a benchmark, the MSCI All Country World Index (the "Index") will serve as a reference benchmark and is used to provide market context. The Index is market capitalisation weighted and is designed to measure equity market performance of developed and emerging markets.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, investments in Real Estate Investment Trusts (REITs), exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)). The Fund may invest in China A Shares traded via Stock Connect.

The Fund may also invest in other securities including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents, all as deemed by the Investment Manager to be consistent with the investment discipline.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy.

The Fund takes an unconstrained approach to investing in companies across the capitalisation spectrum in developed and emerging markets, with sector and country allocations an outcome of the stock selection process. The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations, although the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington Emerging Markets Research Equity Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the MSCI Emerging Markets Index (the "Index"), seeking to achieve the objective by principally investing either directly or indirectly, in equity and equity-related securities issued by companies located in emerging market countries. The Index is designed to measure large- and mid-cap equity market performance across global emerging markets.

The investment approach uses bottom-up stock selection based on fundamental research, with both the country allocation and the selection of individual investments at the discretion of the individual global industry analysts. The Fund, over time, will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics will reflect the nature of the underlying stock selections.

The Fund may invest a portion of its assets in equity securities of issuers that, while not domiciled in emerging market countries, have or will have substantial assets in emerging market countries or derive or expect to derive a substantial portion of their total revenues from either goods or services produced in, or sales made in, emerging market countries.

The Fund may invest in locally-listed common stocks and securities traded in over-the-counter markets, depositary receipts (such as ADRs, EDRs, GDRs, and American Depositary Shares ("ADSs")).

The Fund may also invest in other permissible investments, such as real estate securities, convertible bonds, preferred stock, rights, warrants, ETFs, as well as debt securities, cash and cash equivalents, and derivative instruments which may be used for investment purposes and for efficient portfolio management including hedging against risk, all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

In addition, in order to gain efficient investment exposure to issuers in certain countries or geographic regions, the Fund may invest in market-access products.

The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations, although the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 30% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Emerging Markets Research Equity Fund launched on June 3, 2014 with an S USD class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2020

Wellington Management Funds (Luxembourg)

Wellington Global Health Care Long-Short Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term capital appreciation.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing via long and short positions primarily in the equity and equity related securities of companies that derive a major portion of profits or anticipated profits from the health care or related sectors globally.

The Fund's investment approach is based primarily on proprietary, bottom-up fundamental research conducted by the Investment Manager's global health care team and global industry analysts. The Fund is managed using a team-based approach in which specialist Fund managers generate investment ideas within an assigned investment universe corresponding to their specific areas of expertise within health care. The Fund seeks to invest in attractively valued companies with differentiated products and services that materially enhance the current standard of care or offer more efficient ways of delivering health care to consumers. The Fund will establish short positions in companies or sectors deemed unattractive by the portfolio management team. The Investment Manager may also use short positions to hedge market volatility.

Health care sub-sectors, market capitalizations and geographic exposures are unconstrained and will fluctuate based on the Investment Manager's views of market opportunities. The Fund will invest in pharmaceutical, biotechnology, medical technology and health services companies and related sectors globally, which may from time to time include exposure to emerging markets. The Fund will typically include securities of issuers with market capitalizations in excess of USD 500 million at the time of initial investment. At times, the Fund's assets may be concentrated in one or more health care sub-sectors. The Fund will employ leverage, through FDIs, such that its total gross exposure (i.e., long exposure plus absolute value of short exposure) will typically exceed 100% of net assets. At other times, for defensive purposes, the Fund may maintain a low total gross exposure and hold a significant portion of its assets in cash, deposits or money market instruments. The Fund's overall net exposure will fluctuate based on the Investment Manager's views of market opportunities, but it is expected the Fund will typically be net long.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, shares, preferred stock, warrants, dividend-right certificates, shares of closed-ended REITS and depositary receipts qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law, ETFs and other UCIs. It may also invest in other securities where the Investment Manager perceives there are opportunities to enhance capital appreciation, including but not limited to, debt, interest rate and credit securities, currencies, convertible bonds, indices, cash and cash equivalents, as deemed by the Investment Manager to be consistent with the investment approach. Long and short positions will be established in ETFs qualifying as UCIs within the meaning of the 2010 Law, for both hedging and investment purposes. No more than 5% of net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over the counter derivative instruments for investment purposes and for efficient portfolio management including hedging against risk, including swaps, futures, options, forwards and other UCITS-eligible derivatives. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy. Long positions may be held through a combination of direct investment and/or derivative instruments, and short positions will be held through derivative positions. The use of derivatives forms an important part of the investment strategy and the Fund is expected to have significant exposures to cash and/or liquid fixed income securities for collateral purposes.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value. It is expected that the Fund will generally incur leverage at a rate of between 0% - 300% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Global Health Care Long-Short Fund (continued)

Investment Manager's report (continued)

June 30, 2020

Performance

The Wellington Global Health Care Long-Short Fund launched on March 18, 2015 with D USD, N EUR (hedged), N USD, S EUR (hedged) and S USD classes. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2020					
	6 Mths	1 Year	3 Years	5 Years	Since Inception	
Class D USD	(4.96%)	6.89%	0.69%	2.97%	3.37%	March 18, 2015
Class N USD	(4.60%)	7.61%	1.47%	3.64%	4.04%	March 18, 2015
Class S USD	(4.58%)	7.71%	1.89%	4.02%	4.40%	March 18, 2015
Class N EUR (hedged)	(5.49%)	5.77%	(0.74%)	1.92%	2.38%	March 18, 2015
Class S EUR (hedged)	(5.49%)	5.75%	(0.59%)	2.06%	2.54%	March 18, 2015
Class N GBP (hedged-distributing)	(5.44%)	6.44%	N/A	N/A	0.65%	June 20, 2018
Class S GBP (hedged-distributing)	(5.42%)	6.38%	N/A	N/A	0.97%	October 03, 2018

The Fund is a Non-benchmark relative strategy.

Fund returns are net of fees and expenses.

Returns for periods greater than one year are annualised.

All classes are accumulating and unhedged unless otherwise noted.

The figures stated in this report are historical and not necessarily indicative of current or future performance.

Investment Objective & Policy

The investment objective of the Fund is to seek long-term capital appreciation.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing primarily in equity securities issued by companies worldwide including emerging markets.

The Fund's investment approach is based on the view that investment opportunities can be found independent of global growth and the economic cycle by focusing on i) innovative companies that the Investment Manager believes have the potential to create new or disrupt existing industries, and ii) secular trends/structural growth opportunities. The investment process involves ongoing collaboration with the Investment Manager's global industry analysts to identify areas of innovation and high potential for growth within their industries. The Fund's holdings are selected based on rigorous bottom up fundamental research, in addition to consideration of the impact of macroeconomic trends, such as consolidation, regulation, and industry convergence, that can influence future investment returns. The investment strategy for the Fund focuses on a long time horizon (up to 10 years) as many of the investment themes may be nascent and take time to develop.

Although the Fund is not constructed relative to a benchmark, the MSCI All Country World Index (the "Index") will serve as a reference benchmark and is used to provide market context. The Index is market capitalization weighted and is designed to measure equity market performance of developed and emerging markets.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed-ended REITS, ETFs and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities including, for example, ETFs qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents, all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund invests in an unconstrained manner and may at times be concentrated by geographical region or industry sector. The Fund may invest in securities of small and mid-cap companies, as well as large cap companies and the Fund characteristics may vary widely as investment themes and stock selections change. The Fund will be denominated in US Dollars but may have exposure to various currencies and will not normally be hedged against currency fluctuations, however the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington Global Opportunities Equity Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the MSCI All Country World Index (the "Index"), seeking to achieve the objective by principally investing in equity securities issued by companies worldwide. The Index is market capitalization weighted and designed to measure the equity market performance of developed and emerging markets.

The Fund's investment approach is based on bottom-up, fundamental research. The Investment Manager builds on the extensive research resources of the Investment Manager to develop insights about companies, utilizing a clear understanding of industry and macroeconomic trends. The Fund will be well diversified, and will generally invest in mid to large capitalization companies.

The Fund will invest, either directly or indirectly, in equity and other securities with equity characteristics, including, for example, shares, preferred stock, warrants, dividend-right certificates, shares of REITs constituted as Closed End Funds and depositary receipts issued by companies worldwide.

The Fund may also invest in other securities including, for example, convertible bonds, exchange traded funds qualifying as UCIs within the meaning of the 2010 Law, and debt securities (not exceeding 20% of the net assets of the Fund), cash and cash equivalents, and derivatives for investment purposes and for efficient portfolio management including hedging against risk, all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations although the Investment Manager may employ currency hedging to seek to protect or enhance the US Dollar value of the Fund's holdings when it believes it is advisable to do so.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 50% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Global Opportunities Equity Fund launched on February 12, 2010 with a T JPY class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2020					
	6 Mths	1 Year	3 Years	5 Years	Since Inception	
Class S USD	(0.76%)	5.21%	6.06%	6.09%	10.22%	November 07, 2011

Wellington Management Funds (Luxembourg)

Wellington Global Quality Growth Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the MSCI All Country World Index (the "Index"), seeking to achieve the objective by investing primarily in equity securities issued by companies worldwide. The Index is market capitalization weighted and designed to measure the equity market performance of developed and emerging markets.

The Fund's investment emphasizes approach a balance of growth, valuation, capital return and quality criteria in selecting stocks. The Investment Manager employs a bottom-up investment approach and security selection is unconstrained by country, sector or industry.

The Fund may invest in common stock and depositary receipts, real estate securities, preferred stock, rights, warrants, ETFs, as well as debt securities, including convertible bonds, cash and cash equivalents, and derivative instruments issued by companies worldwide. No more than 5% of net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

For investment purposes and for efficient portfolio management including hedging against risk, the Fund may invest in ETFs and derivative instruments, including, but not limited to, forward contracts, futures contracts, options contracts and swaps. In addition, in order to gain efficient investment exposure to issuers in certain countries or geographic regions, the Fund may invest in market-access products. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations, although currency hedging may be employed to seek to protect or enhance investments at the discretion of the Investment Manager.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 30% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Global Quality Growth Fund launched on May 25, 2011 with an S USD class. The table overleaf details the performance of all funded classes within the Fund.

Wellington Management Funds (Luxembourg)

Wellington Global Research Equity Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the MSCI World Index (the "Index"), seeking to achieve the objective by principally investing in equity securities issued by companies worldwide. The Index is market capitalization weighted and is designed to measure equity market performance of developed markets.

The Fund will be actively managed by the global industry analysts in the Research Department of the Investment Manager, under the oversight of a portfolio coordinator. The investment approach uses bottom-up stock selection based on fundamental research, with both the country allocation and the selection of individual investments at the discretion of the individual global industry analysts. The Fund, over time, will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics will reflect the nature of the underlying stock selections. Turnover is expected to be moderate to high.

The diversified approach of the Fund will typically produce a level of risk or variability equal to or above that of the Index. Divergence from country weightings of the Index may produce returns significantly different than those experienced in a Fund which replicates the Index.

The Fund will invest either directly or indirectly, in equity and other securities with equity characteristics including, for example, shares and dividend-right certificates as well as in warrants on such securities issued by companies worldwide. The Fund may also invest in derivatives for investment purposes and for efficient portfolio management including hedging against risk.

The Fund will normally be fully invested in equity securities. It generally will be diversified relative to the global equity market by issuer and will be represented in all broad economic sectors. Allocation of assets of Fund to each analyst will normally conform approximately to the Index weighting for that analyst's area of coverage. Allocation of assets by country is a result of the analysts' security selection, and there is no effort to conform to country weightings of the Index. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations although the Investment Manager may employ currency hedging to seek to protect or enhance the US Dollar value of the Fund's holdings when it believes it is advisable to do so.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 30% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington Global Select Capital Appreciation Equity Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term capital appreciation.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by principally investing in equity securities issued by companies worldwide that the Investment Manager believes have significant capital appreciation potential.

The Investment Manager's investment approach is based primarily on proprietary, bottom-up fundamental research conducted by the Investment Manager's capital appreciation team and global industry analysts. The Investment Manager's security selection is unconstrained as to style, region, country, sector, industry or market capitalization. The Fund will include securities of small and mid-cap companies, as well as large cap companies. Fund characteristics may vary widely as investment strategies and stock selections change.

The Fund will invest, either directly or indirectly, in equity and other securities with equity characteristics, including, for example, shares, preferred stock, warrants, dividend right certificates, shares of REITs constituted as Closed End Funds and depositary receipts, issued by companies worldwide.

The Fund may also invest in other securities including, for example, convertible bonds, exchange traded funds qualifying as UCIs within the meaning of the 2010 Law, and debt securities (not exceeding 20% of the net assets of the Fund), cash and cash equivalents, and derivative instruments for investment purposes and for efficient portfolio management including hedging against risk, all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund will be denominated in US Dollars and normally will not be hedged against currency fluctuations although the Investment Manager may employ currency hedging to seek to protect or enhance the US Dollar value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Global Select Capital Appreciation Equity Fund launched on July 30, 2008. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2020					
	6 Mths	1 Year	3 Years	5 Years	Since Inception*	
Class T USD	1.64%	9.53%	12.06%	9.86%	N/A	June 10, 2009
MSCI All Country World Index	(5.77%)	2.84%	6.70%	6.90%	N/A	
Class S USD	1.16%	8.48%	10.99%	8.78%	10.47%	July 30, 2010
MSCI All Country World Index	(5.77%)	2.84%	6.70%	6.90%	9.18%	
Class S EUR	1.12%	10.01%	11.57%	8.67%	13.18%	February 15, 2012
MSCI All Country World Index EUR	(5.82%)	4.28%	7.25%	6.73%	10.89%	

Returns are net of fees and expenses.

Returns for periods of greater than one year are annualised.

All classes are accumulating and unhedged unless otherwise noted.

The figures stated in this report are historical and not necessarily indicative of future performance.

* The since inception total return is not disclosed for classes aged 10 years and more.

Wellington Management Funds (Luxembourg)

Wellington Strategic European Equity Long-Short Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term capital appreciation.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing via long and short positions primarily in equity and equity related securities of companies incorporated or operating in developed European markets. The Fund will primarily focus on Europe although it has the flexibility to invest globally, in both developed and emerging markets.

The Fund's investment approach is based primarily on proprietary, bottom-up fundamental research conducted by the Investment Manager. The Investment Manager will establish long positions in companies where a structural growth driver has been identified, a strong competitive advantage has been established and where the relative valuation is attractive. Conversely, short positions will be established where the Investment Manager believes companies are overvalued due to a lack of these attributes. The Investment Manager may also use short positions to hedge market volatility.

Sector and market capitalization exposures are unconstrained and will fluctuate based on the Investment Manager's views of market opportunities. At times, the Fund's assets may be concentrated in one or more sectors. The Fund will typically include securities of companies with market capitalizations in excess of USD 500 million at the time of initial investment. The Fund will employ leverage, through FDIs, such that its total gross exposure (i.e., long exposure plus absolute value of short exposure) will typically exceed 100% of net assets. At times, for defensive purposes, the Fund may maintain a low gross exposure and hold a significant portion of its assets in cash, deposits or money market instruments. The Fund's overall net exposure will fluctuate based on the Investment Manager's views of market opportunities, but it is expected the Fund will typically be net long.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, shares, preferred stock, warrants, dividend-right certificates, shares of closed-ended REITS and depository receipts qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law, ETFs and other UCIs. It may also invest in other securities where the Investment Manager perceives there are opportunities to enhance capital appreciation including, but not limited to, debt, interest rate and credit securities, mortgage-backed and asset-backed securities (however for a percentage not exceeding 20% of the Fund's net assets), commodities (in particular through eligible financial indices within the meaning of article 9 of the Grand Ducal regulation dated February 8, 2008 or eligible transferable securities within the meaning of article 41(1) of the 2010 Law not embedding any derivatives), currencies, convertible bonds, indices, cash and cash equivalents, as deemed by the Investment Manager to be consistent with the investment approach. The Investment Manager will not acquire physical commodities directly, nor will it invest directly in any derivative that has physical commodities as an underlying asset. Long and short positions may be established in ETFs qualifying as UCIs within the meaning of the 2010 Law, for both hedging and investment purposes. The Fund may hold private placements, comprising those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)). No more than 5% of net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments for investment purposes and for efficient portfolio management including hedging against risk, including swaps, futures, options, forwards and other UCITS-eligible derivatives. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy. Long positions may be held through a combination of direct investment and/or derivative instruments, and short positions will be held through derivative positions. The use of derivatives forms an important part of the investment strategy and the Fund is expected to have significant exposures to cash and/or liquid fixed income securities for collateral purposes.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 400% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington US Equity Long-Short Fund

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek long-term capital appreciation.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing via long and short positions primarily in the equity and equity related securities of companies incorporated or exercising a predominant part of their economic activities in the US. The Fund will primarily focus on the US although it has the flexibility to invest globally, including emerging markets.

The Fund's investment approach is based primarily on proprietary, bottom-up fundamental research conducted by the Investment Manager, but may also be informed by top-down themes. The Fund will establish long positions in companies or sectors with expected high appreciation potential, and short positions in companies or sectors deemed unattractive by the Investment Manager. The Investment Manager may also use short positions to hedge market volatility.

Sector and market capitalization exposures are unconstrained and will fluctuate based on the Investment Manager's views of market opportunities. The Fund will typically include securities of issuers with market capitalizations in excess of USD 500 million at the time of initial investment. The Fund may participate in initial public offerings below this threshold. At times, the Fund's assets may be concentrated in one or more sectors. The Fund will employ leverage, through FDIs, such that its total gross exposure (i.e., long exposure plus absolute value of short exposure) will typically exceed 100% of net assets. At other times, for defensive purposes, the Fund may maintain a low total gross exposure and hold a significant portion of its assets in cash, deposits or money market instruments. The Fund's overall net exposure will fluctuate based on the Investment Manager's views of market opportunities, but it is expected the Fund will typically be net long.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, shares, preferred stock, warrants, dividend-right certificates, shares of closed-ended REITS and depositary receipts qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law, ETFs and other UCIs. It may also invest in other securities where the Investment Manager perceives there are opportunities to enhance capital appreciation including, but not limited to, debt, interest rate and credit securities, mortgage-backed and asset-backed securities (however for a percentage not exceeding 20% of the Fund's net assets), commodities (in particular through eligible financial indices within the meaning of article 9 of the Grand Ducal regulation dated February 8, 2008 or eligible transferable securities within the meaning of article 41(1) of the 2010 Law not embedding any derivatives), currencies, convertible bonds, indices, cash and cash equivalents, as deemed by the Investment Manager to be consistent with the investment approach. The Investment Manager will not acquire physical commodities directly, nor will it invest directly in any derivative that has physical commodities as an underlying asset. Long and short positions will be established in ETFs qualifying as UCIs within the meaning of the 2010 Law, for both hedging and investment purposes. No more than 5% of net asset value of the Fund will be invested in non-listed and non traded collective investment schemes. The Fund may invest up to 10% of net asset value in China A shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments for investment purposes and for efficient portfolio management including hedging against risk, including swaps, futures, options, forwards and other UCITS-eligible derivatives. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy. Long positions may be held through a combination of direct investment and/or derivative instruments, and short positions will be held through derivative positions. The use of derivatives forms an important part of the investment strategy and the Fund is expected to have significant exposures to cash and/or liquid fixed income securities for collateral purposes.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 300% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the S&P 500 Index (the "Index"), seeking to achieve the objective by principally investing in equity securities issued by companies incorporated or exercising a predominant part of their economic activities in the US. The Index is a market annualised on weighted index of 500 stocks and is designed to measure the performance of the broader US economy.

The Fund will be actively managed by the fundamental industry analysts in the Research Department of the Investment Manager, under the oversight of a portfolio coordinator. The investment approach uses bottom-up stock selection based on fundamental research, with the selection of individual investments at the discretion of the individual industry analysts. The Fund, over time, will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics will reflect the nature of the underlying stock selections. Turnover is expected to be moderate to high.

The Fund will invest either directly or indirectly, in equity and other securities with equity characteristics, such as shares, dividend-right certificates or warrants, on such securities issued by companies incorporated or exercising a predominant part of their economic activities in the US. The Fund may invest in derivatives for investment purposes and for efficient portfolio management including hedging against risk, and may also invest up to 10% of the Fund's assets in equities and other securities with equity characteristics and rights of non-US companies including depository receipts and market access products (comprising warrants on equities, options on equities and equity swaps).

The Fund will generally be diversified relative to the general US equity market by issuer and will be represented in all broad economic sectors. Within broad sectors, industry weightings will be determined by the analysts' selections, and some industries may not be represented in the Fund at all times.

The Fund's diversified approach will typically produce a level of risk or variability equal to or above that of the general US equity market. Divergence from the relative S&P industry weightings may produce returns significantly different than those experienced by investment in a market index Fund.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 30% of net asset value through the use of FDIs, although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Wellington Management Funds (Luxembourg)

Wellington Global Total Return Fund (UCITS)

Investment Manager's report

June 30, 2020

Investment Objective & Policy

The investment objective of the Fund is to seek absolute returns above a cash benchmark over the medium to long term.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing, either directly or indirectly, in a range of fixed income asset classes.

The ICE Bank of America Merrill Lynch USD LIBOR 3-Month Constant Maturity Total Return Index (the "Index") will serve as the cash benchmark and is used to calculate the performance fee as disclosed in the relevant performance fee section. The Index is based on the assumed purchase of a synthetic instrument having 3 months to maturity and with a coupon equal to the closing quote for 3-Month LIBOR. That issue is sold the following day (priced at a yield equal to the current day closing 3-Month LIBOR rate) and is rolled into a new 3-Month instrument. The Index, therefore, will always have a constant maturity equal to exactly 3 months.

The Fund allocates its assets across multiple fixed income alpha sources, such as fundamentally based macro, model-based quantitative and bottom-up credit. Alpha sources may be added or eliminated by the Investment Manager in the future without advance Unitholder notice or approval.

The Investment Manager looks to identify a diversified set of independent investment ideas, to efficiently allocate capital to those investment ideas and to manage portfolio risk within a multimanager team construct. The combination of independent alpha sources will be diversified across investment styles (e.g. fundamental versus quantitative), market sectors, investment themes, strategies and time horizons, ensuring that the Fund is not dependent upon any single source to drive returns.

Allocations to each alpha source are sized to meet the return objective, risk tolerance, and guidelines of the aggregate Fund. The impact of each investment strategy on the Fund's aggregate risk profile is individually and collectively evaluated, with special attention paid to its correlation with other investment strategies and contribution to macro factor sensitivities.

The Fund will invest primarily in debt instruments issued by government, agency, and supranational issuers; mortgage-, commercial mortgage-, and asset-backed securities; corporate and REITs (constituted as Closed End Funds) debt; credit-linked, index-linked, convertible and capital securities; as well as other debt securities, both fixed- and floating-rate, including forward contracts on such securities. These debt obligations may be denominated in US Dollars or other currencies. Further these debt obligations may include investments in contingent capital and contingent convertible securities, but any such exposures will not exceed 10% of the net asset value of the Fund. The Fund may hold equity securities, where they are the result of a corporate action or debt restructuring. The Fund may also hold cash and cash equivalents in multiple currencies without restriction. Repurchase, reverse repurchase, and dollar roll transactions are permitted. The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments, including interest rate, credit, index, and currency futures; currency, interest rate, total rate of return, and credit default swaps; currency, bond, and swap options; deliverable and non deliverable currency forward contracts; warrants; "to-be announced" (TBA) securities qualifying as Transferable Securities in compliance with Luxembourg law; and other derivative instruments, and may hold outright short positions via derivative instruments for hedging purposes and otherwise in pursuit of the Fund (UCITS)'s investment objective.

The approach uses a wide range of FDIs to implement active positions and for hedging purposes. Primary derivative instruments employed to express interest rate and credit strategies include bond futures, bond forwards, interest rates swaps and credit default swaps. Primary derivative instruments employed to express currency strategies include currency forwards and options.

Typical positions expressing the interest rate and credit strategies will involve either outright or relative value exposure on a given government or credit issuer or interest rate. Long interest rate and credit exposures are achieved mainly through buying securities or by gaining similar exposure through the use of a derivative instrument such as a bond future, interest rate swap or credit default swap. Short interest rate exposures in the investment process are achieved through the use of FDIs such as bond futures, bond forwards and interest rate swaps. Typical positions expressing the Investment Managers currency strategies will involve long exposure in one currency and subsequent short exposure in another currency. Long and short currency exposure is achieved mainly through the use of FDIs such as currency forwards and currency options. The use of liquid derivative instruments to express these positions can lead to significant gross leverage exposure, particularly when the derivative usage requires high levels of notionals to build the desired level of exposure.

Wellington Management Funds (Luxembourg)

Wellington Global Total Return Fund (UCITS) (continued)

Investment Manager's report (continued)

June 30, 2020

Investment Objective & Policy (continued)

The Fund's investments will represent a broad credit spectrum, including issues rated below investment-grade. Mortgage-, commercial mortgage-, and asset-backed securities only will be acquired if rated at least investment grade, i.e. Baa3 by Moody's, BBB- by S&P, or BBB- by Fitch or an equivalent internal rating by the Investment Manager. In case of two different ratings, the lower rating shall be decisive. In case of three or more different ratings, the lower rating of the two best ratings shall be decisive. The Investment Manager will under no circumstances rely exclusively or automatically on external ratings in determining the credit risk of a financial instrument, and in addition the Investment Manager will perform its own credit assessment with respect to each investment.

Any securities which fall below the minimum required rating following acquisition will be sold within six months from the downgrading, unless the rating is upgraded within that period.

Net exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of Fund assets at the time of purchase.

Net Credit Exposure to securities within the ranges of Baa1-Baa3 for Moody's, or BBB+ and BBB for S&P and Fitch will not represent more than 50% of Fund assets at the time of purchase. This restriction does not apply to securities issued or guaranteed by member countries of the OECD and/or securities issued by their agencies, government-sponsored corporations, or subdivisions thereof; or by supranational community, regional, or world institutions and organizations. Net Credit Exposure to securities rated below investment-grade will not represent more than 20% of Fund assets at the time of purchase.

The Fund will be denominated in US Dollars. Currency exposure will be taken on an opportunistic basis. Currency exposure including cross-currency positions, which are not related to the Fund's bond and cash equivalent positions, may be assumed.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value.

On average the expected leverage will generally be around 2000% of net asset value through the use of FDIs, but may be above this on an exceptional basis in particular due to high numbers of offsetting positions or temporary investments in short term interest rates via derivatives. In order to be consistent with current regulatory guidance on leverage disclosure, leverage is calculated as the sum of all the notionals of all FDIs. This calculation includes the notional exposure associated with FDIs but does not include the underlying investments of the Fund which make up 100% of total net assets. Where FDIs are used for hedging purposes or are themselves hedged against equal and opposite trades, the sum of gross notional values of FDIs may not reflect the true economic risk of the Fund. Due to the high leverage of this Fund, unitholders should also refer to the relevant risk warnings in the sections "Risk Factors" and "All Funds".

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Global Total Return Fund (UCITS) launched on May 31, 2011. The table below details the performance of all funded classes within the Fund.

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund against the JP Morgan Emerging Markets Bond Index Global ex CCC (the "Index"), seeking to achieve the objective primarily through investment in a diversified portfolio of emerging markets debt securities and currency instruments. The Index tracks total returns for US Dollar-denominated debt instruments, both fixed and floating, issued by emerging market sovereign and quasi-sovereign entities that are rated above CCC.

The Fund will invest either directly or indirectly through FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008; FDIs will primarily provide exposure to emerging markets, fixed income securities and currencies, and may be used for both investment purposes and for efficient portfolio management including hedging against risk. The Fund may invest, in the same manner, in bonds issued by sovereign, quasi-sovereign agency, supranational and sub national government issuers; mortgage-, commercial mortgage-, and asset-backed securities; corporate debt; convertible securities, loan participation securities that qualify as an eligible investment for the Fund; sukuk (financial instruments with cash flows similar to conventional bonds that are structured to comply with Islamic law), warrants, global depositary notes and credit and index linked securities (which are debt securities of companies whose interest payments and/or payment at maturity depend on the performance of one or more underlying credit exposures or market indices). These debt obligations may include investments in contingent capital and contingent convertible securities, but any such exposures will not exceed 10% of the net asset value of the Fund. In addition, it may invest up to 10% of its net assets in bank loan assignments that qualify as money market instruments. A particular credit-linked security's underlying credit exposure may be to a sovereign, quasi-sovereign or corporate issuer. Underlying index exposures may be to an index tied to a country's economic exposure, debt or currency. In each case, the underlying credit or index exposure will be consistent with the Fund's investment objective and policies. The Fund may also invest in structured notes (such structured notes shall give exposure to underlying fixed income securities on an unleveraged basis), market-access products as well as other debt securities issued by public or private issuers, both fixed- and floating- rate, including forward contracts on such securities and forward rate agreements. The Fund may hold equity securities, where they are the result of a corporate action or debt restructuring.

Currency exposure to multiple currencies will be taken on an opportunistic basis. Currency exposure to both emerging markets and developed countries, including cross-currency positions, which are not related to the Fund's bond and cash equivalent positions, will be assumed.

The Fund will generally be diversified by country, currency and issuer but may hold concentrated positions from time to time. Exposure to a single sovereign issuer may not exceed 20% of Fund assets at time of purchase. Exposure to a single non-government issuer may not exceed 5% of Fund assets at the time of purchase.

Furthermore, net exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of Fund assets at the time of purchase.

Investments will be drawn from the broad credit spectrum. The Fund may acquire securities, including credit linked notes or mortgage-, commercial mortgage- and asset-backed securities if rated at least investment grade, i.e. Baa3 by Moody's, BBB- by S&P, or BBB- by Fitch, or an equivalent internal rating by the Investment Manager. High-yield securities may be acquired if they have a rating of at least speculative grade, i.e. B3 by Moody's, B- by S&P, or B- by Fitch, or an equivalent internal rating by the Investment Manager. In case of two different ratings, the lower rating shall be decisive. In case of three or more different ratings, the lower rating of the two best ratings shall be decisive. The Investment Manager will under no circumstances rely exclusively or automatically on external ratings in determining the credit risk of a financial instrument, and in addition the Investment Manager will perform its own credit assessment with respect to each investment.

Any securities which fall below the minimum required rating following acquisition will be sold within six months from the downgrading, unless the rating is upgraded within that period.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

The use of financial derivative instruments will result in the creation of leverage. The level of leverage (calculated as the sum of all the gross notional of all FDIs but not including the underlying investments of the Fund which make up 100% of total net assets) is not expected to be in excess of 200% of the net asset value under normal circumstances (largely due to the use of forward contracts for currency hedging purposes), but investors should note the possibility of higher levels of leverage in certain circumstances. In order to be consistent with current regulatory guidance on leverage disclosure, these figures are calculated using the sum of the gross notional of each FDIs. Where FDIs are used for hedging purposes or are themselves hedged against equal and opposite trades, this calculation may not reflect the true economic risk of the Fund.

Wellington Management Funds (Luxembourg)

Wellington Opportunistic Emerging Market Debt II Fund (continued)

Investment Manager's report (continued)
June 30, 2020

Investment Objective & Policy (continued)

If the expected level of leverage were calculated on this basis (taking into account any netting of foreign exchange forward contracts) the level of leverage would be expected to be significantly lower and generally between 0 - 200% of the net asset value.

Overview

The Fund has been managed in accordance with its investment objective and policy as defined in the Prospectus. The full investment objective and policy are disclosed verbatim in the previous section.

Performance

The Wellington Opportunistic Emerging Market Debt II Fund launched on October 15, 2012 with an S EUR (hedged-distributing) class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					
	Periods ended June 30, 2020					
	<i>6 Mths</i>	<i>1 Year</i>	<i>3 Years</i>	<i>5 Years</i>	<i>Since Inception</i>	<i>Inception Date</i>
Class S EUR (hedged-distributing)	(1.25%)	1.42%	1.64%	3.44%	2.71%	October 15, 2012
JPM EMBI Global ex CCC Hedged to EUR	(1.56%)	0.88%	1.71%	3.01%	2.41%	

Fund returns are net of fees and expenses as adjusted for re-investment of distribution.

Returns for periods of greater than one year are annualised.

All classes are accumulating and unhedged unless otherwise noted.

The figures stated in this report are historical and not necessarily indicative of future performance.

June 30, 2020

1. Significant events during the period

(a) Unit classes launched or liquidated during the period

Details of unit classes launched and liquidated during the period ended June 30, 2020 are listed in the relevant Investment Manager's Reports.

(b) Market volatility associated with the COVID-19 pandemic

The first six months of 2020 has seen a sharp increase in the volatility of all financial markets due to the COVID-19 pandemic. The Managers of the Management Company are actively monitoring the situation and, with the support of the Investment Manager, continue to successfully manage the Funds' assets within investment and risk parameters that have been established. The Managers will continue to review the situation in order to navigate the Umbrella Funds through this period of heightened uncertainty.

2. Summary of significant accounting policies

(a) Presentation of financial statements

The financial statements are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investments in Transferable Securities.

(b) Valuation of the investments in securities

The assets of the Umbrella Fund are valued as follows:

Transferable securities that are listed or dealt on an official stock exchange or dealt on another regulated market, which operates regularly and is recognised and open to the public, are valued on the basis of the latest available closing price. If the same security is quoted on several markets, the last available price of the main market for this security is used.

For non-quoted assets or assets not traded or dealt in on any stock exchange or other regulated market, as well as for quoted or non-quoted assets on such other market for which no valuation price is available, or assets for which the quoted prices are not representative of the fair market value, the value thereof shall be determined prudently and in good faith by the Management Company on the basis of foreseeable purchase and sale prices.

Money market instruments with a remaining maturity of less than ninety days at the time of purchase or securities which applicable interest rate or reference interest rate is adjusted at least every ninety days are valued on the basis of their nominal value plus accrued interest thereon based on the number of business days which have elapsed.

In the case of a discount or a premium fixed income instrument, the value of the instrument, based on the net acquisition cost, is gradually adjusted upward or downward, as the case may be, to the redemption price, considering the business days within the period plus accrued interest, if any.

Liquid assets are valued at their nominal value plus accrued interest or on an amortised cost basis.

Units in open-ended Undertakings for Collective Investments are valued at their last determined available price.

(c) Net realised appreciation/(depreciation) on sales of securities

The net realised appreciation/(depreciation) on sales of securities is calculated on the basis of the average cost of the securities sold.

(d) Foreign exchange translations

The combined financial statements are expressed in US Dollars and the financial statements of the Funds are expressed in the relevant base currency. The net assets of a Fund that is denominated in another currency than US Dollars is translated into US Dollars at the exchange rate prevailing at the financial period end. The average exchange rate for the period is used to translate the foreign currency amounts in the statement of operations and changes in net assets into US Dollars for the combined financial statements.

Bank accounts, market value of the investment portfolios, and other assets or liabilities expressed in currencies other than the base currency of the relevant Fund are translated into the base currency of the relevant Fund at applicable exchange rates prevailing at the end of the period.

Wellington Management Funds (Luxembourg)

Notes to the financial statements (continued)

June 30, 2020

2. Summary of significant accounting policies (continued)

(d) Foreign exchange translations (continued)

Dividends are converted using currency exchange rates prevailing at the ex-dividend date.

Other income and expenses expressed in currencies other than the base currency of the relevant Fund are translated into the base currency of the relevant Fund at the applicable exchange rates prevailing at payment date or at the exchange rates prevailing at the end of the period if they are accrued.

Realised and unrealised foreign exchange appreciations or depreciations are included in the combined statement of operations and changes in net assets.

At June 30, 2020 the Umbrella Fund applied the following foreign exchange rates to US Dollars:

AUD	1.4524	JPY	107.8850
BRL	5.4908	KES	106.5500
CAD	1.3620	KRW	1,202.8500
CHF	0.9476	MXN	23.1070
CLP	820.6000	MYR	4.2850
CNH	7.0678	NOK	9.6470
CNY	7.0741	NZD	1.5534
COP	3,739.2800	PEN	3.5355
CZK	23.7213	PHP	49.8250
DKK	6.6360	PLN	3.9557
EUR	0.8904	RUB	71.2544
GBP	0.8093	SEK	9.3167
HKD	7.7505	SGD	1.3951
HUF	315.5768	THB	30.9075
IDR	14,285.0000	TRY	6.8548
ILS	3.4610	TWD	29.5045
INR	75.5038	ZAR	17.3750

(e) Cost of investment securities

The cost of investment securities expressed in currencies other than the base currency of the relevant Fund is translated into the base currency of the relevant Fund at the exchange rate prevailing at the transaction date.

(f) Dividend and interest income

Dividend income is recorded on the ex-dividend date and is shown net of non-recoverable withholding taxes. Interest income (including amortization of premium and discount) is accrued daily.

(g) Financial derivative instruments

Realised appreciation or depreciation and change in unrealised appreciation or depreciation are recorded under 'Net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' and under 'Net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' in the combined statement of operations and changes in net assets respectively.

(i) Forward foreign exchange contracts

The unrealised appreciations or depreciations on open forward foreign exchange contracts are calculated as the difference between the contracted rate and the rate to close out the contract. Realised profit or loss includes net appreciations or depreciations on forward foreign exchange contracts which have been settled or offset by other contracts with the same counterparty.

(ii) Future contracts

Initial margin deposits are made to the broker upon entering into future contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised appreciations or depreciations by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised depreciations or appreciations are incurred. When the contract is closed, a realised appreciation or depreciation is recorded.

June 30, 2020

2. Summary of significant accounting policies (continued)

(g) *Financial derivative instruments (continued)*

(ii) *Future contracts (continued)*

This realised appreciation or depreciation is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Margin accounts are currently recorded under 'Margin cash held with/ due to brokers' in the combined statement of net assets.

(iii) *Options purchased and options written*

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased.

Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realised depreciations. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Fund.

When an option is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation.

If a written put option is exercised, the premium reduces the cost basis of the security, foreign currency or index purchased by the relevant Fund.

Options purchased are recorded under "Investment in options purchased at market value" and options written are recorded under "Investment in options written at market value" in the combined statement of net assets.

Over the Counter options ("OTC options") are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

(iv) *Swaptions*

A swaption is an option (see Note 2g(iii)) that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised depreciations. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

When a swaption is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation.

(v) *Swaps*

The change in the value of the swap is reported within 'Investment in swaps at market value' in the combined statement of net assets, until termination of the contract when it is realised.

Periodic interest payments to be paid or received are accrued on a daily basis and included in interest income or interest expense. Premiums paid or received when entering into the agreement are recorded at cost and reflected under either 'Receivable from brokers' or 'Payable to brokers' in the combined statement of net assets.

June 30, 2020

2. Summary of significant accounting policies (continued)

(g) *Financial derivative instruments (continued)*

(v) *Swaps (continued)*

- Credit default swaps

The buyer of protection in a credit default swap agreement is obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

- Interest rate swaps

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

- Total return swaps

The Funds may enter into total return swap contracts in which the relevant Fund and the counterparties agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index, commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices.

(h) *Reverse repurchase agreements*

The Funds may invest in reverse repurchase agreements which are short-term investments in which the Funds acquire ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price.

Reverse repurchase agreements are fully collateralised by the seller in an amount not less than the proceeds due. A reverse repurchase agreement is similar in effect to a loan given by the Funds to the seller collateralised by securities. The Funds do not record the purchase of the securities received but do record the reverse repurchase agreement as if it were a loan. The Funds carry reverse repurchase agreements at cost, which combined with accrued interest, approximates market value.

(i) *Swing pricing*

A Fund may suffer "dilution" of its net asset value per unit because the price at which investors subscribe or redeem units of the Fund does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate the cash inflows or outflows related to these subscriptions or redemptions.

In order to counter this impact, a swing pricing mechanism may be applied to protect the interest of the Unitholders of the Funds. If on any valuation point on any dealing day, the aggregate net transactions in units for a Fund exceed a pre-determined threshold, as determined by the Management Company from time to time, the net asset value may be adjusted upwards or downwards to reflect net inflows and net outflows respectively.

The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment is not expected to exceed 3% of the original net asset value per unit. In any other cases where there are net subscriptions or redemptions in the Fund and the Management Company reasonably believes that imposing a swing price is in the best interests of existing Unitholders, the Management Company may, at its discretion, impose one. Any adjustments to net inflows and outflows are included in the combined statement of operations and changes in net assets, being added to the proceeds from subscriptions and deducted from redemptions.

(j) *Collateral*

In order to limit counterparty risk the Umbrella Fund put a collateralisation process in place. Broker cash received as collateral for financial derivative instruments transactions is recorded as an asset on the combined statement of net assets under "Cash collateral received from brokers" and a related liability to repay the collateral is disclosed as "Cash collateral due to brokers".

A Fund's assets may be deposited with brokers by or on behalf of the Fund for collateral purposes. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the statement of net assets. Cash pledged by the Funds as collateral is recognised on the combined statement of net assets as "Cash collateral deposited with brokers".

June 30, 2020

2. Summary of significant accounting policies (continued)

(k) Capital gains tax

No tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Funds, however, the Funds may incur foreign taxes on capital gains upon realization of their assets.

3. Charges and expenses

(a) Investment management fees

An Investment Management Agreement ("IMA") was entered into for the Funds for an indefinite period of time between the Management Company and the Investment Manager.

The Investment Manager shall be paid an investment management fee out of the assets of each of the Funds. The investment management fee is calculated as a percentage of the daily net assets attributable to the relevant unit class, accrued daily in the net asset value of the relevant unit class and paid quarterly in arrears at the annual rates.

In addition to the investment management fee, a performance fee will also be payable in respect of certain Funds as described in further detail in the Performance fee section (Note 3d).

The investment management fee rates applicable to each of the unit classes are outlined later (Note 3e).

(b) Distribution fees

This fee is calculated as a percentage of the average net asset value attributable to the respective units and is payable on a quarterly basis to financial intermediaries.

The distribution fee is paid to intermediaries holding these unit classes to compensate them for distribution and Unitholder services provided to underlying beneficial owners of these Units. Investors considering investing via an intermediary should be aware of these fees and the potential for conflicts of interest that they create where, for example, an intermediary might be incentivised to recommend a particular Fund, or unit class within a Fund, that has a higher distribution fee.

The distribution fee rates applicable to each of the unit classes are outlined later (Note 3e).

(c) Administrative fee

The Management Company shall be paid an administrative fee out of the assets of each of the Funds attributable to the relevant unit classes. This administrative fee is calculated as a percentage of the daily net assets of that unit class, accrued daily in the net asset value of the relevant unit class and paid monthly in arrears. The administrative fee rate will vary across Funds and unit classes reflecting the differing expenses of such Funds and/or unit classes but the maximum administrative fee that is paid shall not exceed 0.25% per annum for all unit classes with the exception of unit classes D, N, DL, G and NE where the maximum administrative fee that is paid shall not exceed 0.40% per annum.

The purpose of the administrative fee is to provide a fixed rate of fees which covers the expenses of the Funds which expenses might otherwise be subject to fluctuation over time. The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds had chosen to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon giving not less than 1 month notice to affected Unitholders.

The administrative fees are fixed which means that the Management Company, or other Wellington Management affiliate elected by the Management Company will bear any costs and expenses incurred by the relevant unit classes in any period in excess of the administrative fee charged to the unit classes. The Management Company will at all times be entitled to receive the entire amount of the administrative fee paid to it and retain the portion which exceeds the actual operating expenses incurred by the relevant unit classes during the period, if any. The Management Company in its discretion may choose to waive a portion of the administrative fee at any time where the Management Company considers it appropriate to do so taking into account the level of assets in a particular Fund. Further the Management Company may instruct the Umbrella Fund to pay a portion of the administrative fee directly out of the assets of the Funds to any third party service providers. In such case the administrative fee due to the Management Company will be reduced by the same amount.

June 30, 2020

3. Charges and expenses (continued)

(c) Administrative fee (continued)

The administrative fee covers the following expenses, if applicable to the relevant unit class:

- Depositary fees and reasonable out of pocket expenses;
- Administrator fees and reasonable out of pocket expenses;
- Transfer Agent fees and reasonable out of pocket expenses;
- Management Company fees relating to the provision, procuring, overseeing and/or monitoring of various services to the Umbrella Fund and the Funds by the Management Company and its affiliates, including, but not limited to, administrative, domiciliary, corporate, company secretarial, risk management, regulatory compliance and reporting services and fees incurred by affiliates of the Management Company and payable to third parties providing infrastructure and other support services;
- fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred, including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third parties service providers, and the provision of additional marketing support ;
- fees of Managers of the Management Company who are not employed by affiliates of the Management Company as well as reasonable out of pocket expenses incurred in discharging their Management Company duties;
- Auditor's fees and reasonable out of pocket expenses;
- professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other advisers or third party support services) that may be incurred by the Management Company, the Depositary, the correspondents or the Administrator while acting in the interest of the Unitholders;
- the cost of taking out and maintaining any insurance policy in relation to the Umbrella Fund, the Management Company and/or the Managers;
- the Luxembourg tax d'abonnement being 0.05% per annum for class CD1 units, class CD2 units, class D units, class N units , class DL units, class EN units, class ED units and class NE units or 0.01% per annum for class S units, class G units, class J units, class E units, class SP units, class SF units, class Q units and class T units;
- any start-up costs associated with the creation of a new Fund or class and the offer of its units;
- the costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Umbrella Fund, including, without limitation, , the prospectus (as well as any amendments or supplements), Key Investor Information Documents, Fact sheets, websites, annual and semi-annual reports or other documents as may be required under the Management Regulations or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing units of the Umbrella Fund (including any paying agents', lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of Funds;
- fees payable to third parties for class currency management services in relation to the execution of currency hedging transactions for hedged unit classes.

The following expenses are not covered by the administrative fee and will be paid by the Umbrella Fund out of the assets of each Fund:

- investment management fees;
- performance fees;
- all taxes (including, without limitation, all income and franchise taxes but excluding the Luxembourg tax d'abonnement), levies, duties or similar charge which may be due on or with respect to the assets and the income of the Umbrella Fund;
- all costs (including brokerage fees) of purchasing or selling assets of the Umbrella Fund including but not limited to brokerage charges, subscription and redemption charges, anti-dilution levies, implicit transactions costs, costs associated with execution/trading or settlement platforms, costs associated with derivative use and any losses incurred in connection therewith are for the account of the relevant Fund;
- the costs of borrowing including interest expenses;
- any extraordinary expenses, such as litigation (for instance, fees connected with the filing of class action lawsuits), exceptional measures, particularly, legal, business or tax expert appraisals or legal proceedings undertaken to protect unitholders' interests and all similar charges and expenses.

Such fees, duties and charges will be charged to a Fund or unit class in respect of which they were incurred or, where an expense is not considered by the Managers to be attributable to any one Fund, the expense will be allocated by the Managers with the approval of the Depositary, in such manner and on such basis as the Managers in their discretion deem fair and equitable.

The administrative fee rates applicable to each of the unit classes of each of the Funds are outlined later (Note 3e).

Wellington Management Funds (Luxembourg)

Notes to the financial statements (continued)

June 30, 2020

3. Charges and expenses (continued)

(d) Performance fees

In addition to the base investment management fee, certain unit classes of certain Funds may also charge a performance fee, calculated based on the unit class' net return (net of the Fund's base investment management fee and operating expenses but gross of any distribution fee applicable). The performance period is generally the Fund's fiscal year (January 1 – December 31), but may also refer to periods from the launch of a unit class to the fiscal year-end or from the previous fiscal year-end to the closure of a unit class.

The performance fee is accrued daily in the net asset value of each relevant unit class, is crystallised at the Fund's fiscal year-end and is calculated based on the current year's units, except a) where the Fund or a unit class closes on a different date or b) on any dealing day (other than the last valuation date of the year) in which there is a reduction in the number of units in a unit class. In these circumstances any accrued performance fee with respect to such units will crystallise on that dealing day and will then become payable to the Investment Manager.

The mechanisms employed in respect of performance fees are detailed for each relevant Fund below.

Fund name	Performance benchmark	High Water Mark	Unit class	Performance fee
Wellington Global Health Care Long-Short Fund	N/A	Yes	S, D, DL, N	15%
Wellington Strategic European Equity Long-Short Fund	N/A	Yes	S, D, DL, N, E	20%
Wellington US Equity Long-Short Fund	N/A	Yes	S, D, DL, N, E, ED, EN	15%
Wellington US Research Equity Fund	S&P 500 Index	N/A	SP	20%
Wellington Global Total Return Fund (UCITS)	ICE Bank of America Merrill Lynch USD Libor 3-month Constant Maturity Total Return Index	Yes	S, D, DL, N	20%

In respect to hedged classes the performance benchmark is expressed hedged to the denomination currency of the relevant unit class.

For further information on performance fees, please refer to the Prospectus.

(e) Summary of fee rates per unit class and Total Expense Ratios (TER)

The investment management fees, distribution fees, administrative fee and ongoing charges rates (which is the sum of those three fee types) applicable to each of the unit classes of each of the Funds for the financial period ended June 30, 2020 are outlined below. Details of unit class launches and closures during the financial period ended June 30, 2020 are listed in the relevant Investment Manager's Report.

Ongoing charges are equivalent to the total expense ratios calculated for the twelve months ended June 30, 2020. Total Expense Ratios have been calculated in accordance with the Swiss Funds & Asset Management Association guidelines dated May 16, 2008.

All percentages are unchanged from December 31, 2019 unless otherwise stated.

4. Transaction costs

Transaction costs are the costs incurred by a Fund in connection with transactions on its portfolio of investments. These costs are both incremental and directly attributable to the acquisition, issue or disposal of financial assets and liabilities, with incremental costs being those that would not have been incurred if the Fund had not entered into the transaction. These costs comprise fees and commissions paid to agents, advisers, brokers and dealers, in addition to any taxes associated with the transaction.

Transaction costs for each Fund for the period ended June 30, 2020 are disclosed below:

Fund		Brokerage Cost	Local Market Taxes	Total
Wellington Asia Technology Fund	USD	29,830	59,263	89,093
Wellington Asian Opportunities Fund	USD	578,602	603,231	1,181,833
Wellington Climate Strategy Fund	USD	35,392	29,540	64,932
Wellington Downside Alpha Opportunities Fund	USD	46,162	34,286	80,448
Wellington Emerging Markets Research Equity Fund	USD	1,276,402	895,725	2,172,127
Wellington Global Health Care Long-Short Fund	USD	28,363	2,961	31,324

These amounts are included in 'net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' and in 'net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' in the statement of operations and changes in net assets.

5. Total return swaps

As at June 30, 2020 the Funds held the following total return swaps:

(a) *Wellington Asia Technology Fund*

(i) *Total return equity swaps*

As at June 30, 2020 the Fund held the following total return equity swaps under the counterparties listed below.

For long equity swap positions, the Fund receives the return on the underlying equities in exchange for an interest payment, the terms of which will vary by dealer and market. For short equity swap positions, the Fund receives payment of interest, the terms of which will vary by dealer and market, and pays the return generated by the underlying equity. Underlying positions may change on a daily basis as determined by the Investment Manager.

Sector

Notional amount	CCY	Sector name	Termination date	Market value USD	% net assets
Goldman Sachs					
234,017	USD	Industrials	30/04/2021	(58,972)	(0.05)

A positive notional amount indicates that the Fund receives the return generated by the underlying assets. A negative notional amount indicates that the Fund pays the return generated by the underlying assets.

(ii) Total return equity swaps

As at June 30, 2020 the Fund held the following total return equity swaps under the counterparties listed below.

For long equity swap positions, the Fund receives the return on the underlying equities in exchange for an interest payment, the terms of which will vary by dealer and market. For short equity swap positions, the Fund receives payment of interest, the terms of which will vary by dealer and market, and pays the return generated by the underlying equity. Underlying positions may change on a daily basis as determined by the Investment Manager.

Wellington US Research Equity Fund	0.01	In/Out
Wellington Global Total Return Fund (UCITS)	0.25	In only
Wellington Opportunistic Emerging Market Debt II Fund	1.10	In only

As at June 30, 2020, no swing pricing was applied to any of the Funds.

8. Subsequent events

A sharp increase in the volatility of all financial markets has been observed since February 2020 due to the COVID-19 pandemic triggering increased market risk and altering the liquidity of several markets. The Managers of the Management Company are actively monitoring the situation and, with the support of the Investment Manager, continue to manage the Funds' assets in accordance with their risk profile. The Managers will continue to review the situation in order to navigate the Umbrella Funds through this period of heightened uncertainty.

Wellington Management Funds (Luxembourg)

Appendix 1 – Securities Financing Transactions Regulation ("SFTR")

June 30, 2020

The SFTR introduces, inter alia, reporting requirements for securities financing transactions ("SFTs") and total return swaps. Article 13 of SFTR, which sets out the information to be included in semi-annual reports, came into effect on January 13, 2017 and impacted Funds reporting after this date.

A Securities Financing Transaction is defined as per Article 3 (11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at June 30, 2020, the Funds held reverse repurchase agreements and total return swaps which are types of securities in scope for the SFTR semi-annual report Disclosure Requirements.

With the exception of data relating to returns and costs, all data shown below reflects positions held as at June 30, 2020.

a. Market Value

The amount of assets across all SFTs and total return swaps as at June 30, 2020 is as follows:

Wellington Asia Technology Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	2,309,000	1.85%
Total return swaps	723,047	0.58%

Wellington Climate Strategy Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	4,187,000	6.24%

Wellington Emerging Markets Research Equity Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	26,055,000	1.95%

Wellington Global Health Care Long-Short Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	3,833,000	3.67%
Total return swaps	1,003,181,905	962.23%

Wellington Global Innovation Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	7,693,000	6.29%
Total return swaps	4,700,155	3.84%

Wellington Global Opportunities Equity Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	9,698,000	2.35%

Wellington Global Select Capital Appreciation Equity Fund

Type of asset	Amount USD*	% of AUM**
Reverse repurchase agreements	979,000	1.42%

Remuneration Policy

Overview

In accordance with the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016, which came into force on March 21, 2016 and the guidance published by the European Securities and Markets Authority (“the UCITS Regulations”), the Wellington Luxembourg S.à r.l. (“WLSARL”) has adopted a UCITS compliant remuneration policy which restricts the structure and form of remuneration to certain categories of staff. Under the UCITS Regulations, WLSARL is required to establish and apply remuneration policies and practices that are consistent with and promote sound and effective risk management and do not encourage risk taking which is inconsistent with the risk profile or constitution of the funds managed.

Introduction

WLSARL, a member of the Wellington group of companies (the “Wellington Group”), believes that its employees should be remunerated in a manner that (i) is fair and rewards achievement over time, (ii) is consistent with and promotes sound and effective risk management (and discourages inappropriate risk-taking), (iii) is in line with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and (iv) aligns the interests of WLSARL staff with those of the Funds WLSARL manages (the “Funds”) and the underlying fund investors. These beliefs are consistent with the remuneration principles applied throughout the Wellington Group, which manages assets for a wide range of clients and for commingled Funds in a variety of structures and domiciles.

This document sets out (i) the principles on which WLSARL’s remuneration policy (the “Policy”) is based, (ii) WLSARL’s remuneration policy, and (iii) WLSARL’s practices aimed at ensuring that its remuneration approach is consistent with applicable regulatory requirements and the above-mentioned principles.

Application of the Policy

Compliance with regulatory requirements

WLSARL manages undertakings for collective investment in transferable securities (“UCITS”) governed by Part I of the Luxembourg law of December 17, 2010 on undertakings for collective investment (the “UCI Law”) and alternative investment funds (the “AIFs”), the management of which is governed by the Luxembourg law of July 12, 2013 on Alternative Investment Fund Managers (the “AIFM Law”). Consistent with the remuneration requirements of the AIFM Law and UCI Law, including Section 5.5.9 of CSSF Circular 18/698 (“the Circular”), WLSARL applies remuneration policies, practices, and procedures that are consistent with and promote sound, prudent and effective risk management and do not encourage inappropriate risk-taking. Furthermore, these policies and practices are designed to ensure that conflicts of interest are prevented or appropriately managed.

Overall application of this policy

This Policy and the practices described below shall be applied in a flexible way that (i) is consistent with applicable employment and privacy laws, including pre-existing employment contracts and other obligations of the Wellington Group to its staff, (ii) aligns with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and the interests of the Funds and investors in the Funds, (iii) is appropriate given the size, internal organisation, nature, and complexity of the business of WLSARL and the Funds, and (iv) takes into account individual circumstances. Remuneration will not be paid through vehicles or methods that facilitate the avoidance of the requirements of the Alternative Investment Fund Managers Directive (“AIFMD”) or Undertakings for Collective Investment in Transferable Securities Directive (“UCITS Directive”). Remuneration paid in accordance with this Policy will relate directly to Wellington Group’s overall financial performance, and a covered individual’s achievement in the performance of the duties assigned to them.

Specific requirements (including the payout process rules) may not be applied (a) where they are not believed to be proportionate (given the factors listed above) or to promote regulatory objectives, and/or (b) based “disapplication” standards or thresholds applicable in Luxembourg or other Member States, provided such requirements are not believed necessary to (i) promote sound and effective risk management, (ii) act in the best interests of WLSARL or the Funds or (iii) reward individual and functional team achievement.

Where staff are subject to remuneration rules from multiple remuneration regimes, the remuneration rules shall be applied pro rata based on the activities carried out under each regime or, if there is a conflict between the rules, the rules will be applied that are deemed more effective for achieving the outcomes both of discouraging excessive risk taking and of aligning the interests of the relevant individuals with those of the investors in the Funds they manage.

Wellington Management Funds (Luxembourg)

Appendix 2 – Remuneration policy (continued)

for the period ended June 30, 2020

Remuneration Policy (continued)

Application of the Policy (continued)

Independence

The remuneration of employees involved in control functions will be determined as independently as possible from the business units controlled by the control functions and in accordance with the achievement of the objectives linked to the relevant functions.

Identified Staff

The general principles set forth in this Policy apply to all WLSARL staff, however, the payout process below applies only to WLSARL staff, including senior management, risk-takers, control functions, and any employees receiving total remuneration that takes them into the same bracket as senior management and risk-takers whose professional activities have a material impact on the risk profiles of WLSARL or the Funds (collectively "Identified Staff"). In order to arrive at the universe of Identified Staff, WLSARL will determine whether the activities of each member of staff, senior management or the delegates could have a significant impact on WLSARL's results, WLSARL's balance sheet, or the performance of the Funds. WLSARL may also consider other relevant factors. The Conducting Officer responsible for Human Resources will inform the relevant individuals of their classification as Identified Staff.

Relevant remuneration

This Policy applies to all forms of payment of salaries, discretionary payments, and pension benefits by WLSARL or by a Fund to Identified Staff, including any transfer of Funds' shares/units, in relation to services rendered by Identified Staff for the benefit of the applicable Funds. This Policy does not apply to payments from other Wellington Group entities (including partnership distributions), but the Wellington Group will not design remuneration practices intended to circumvent the requirements of the UCI Law or the AIFM Law, related ESMA Guidelines and the Circular.

Policy Specifics

The following provisions are designed to ensure compliance with the remuneration requirements of the AIFM Law and the UCI Law and with related directives, regulation, and guidance:

Guarantees and early termination

WLSARL will not normally offer guaranteed bonuses, and will only do so in connection with hiring new staff. WLSARL will not offer guarantees in excess of one year. WLSARL will not make payments related to early termination of a contract, except as required by law.

Performance assessment

When assessing performance for the purposes of determining remuneration, WLSARL will assess the performance of the individual (including by reference to non-financial criteria) and the function or business unit concerned, along with the overall results of WLSARL. Fund performance will be assessed in a multi-year framework appropriate to the life cycle of the AIFs, or the holding period recommended to investors in the UCITS, to ensure that the assessment is based on longer-term performance and that the payment of performance-based compensation is spread over a period taking into account the redemption policy of the AIFs or the holding period recommended to investors in the UCITS and their investment risks. The measurement of performance used to calculate variable remuneration (or to calculate the size of pools available for variable remuneration) will include adjustment mechanisms for relevant current and future risks.

Bonus withholding and claw-back

Should it be proved that an employee took excessive risks or breached WLSARL's compliance rules or any regulations, no bonus will be paid to that employee and clawback proceedings may be invoked in relation to bonuses paid during prior periods.

The Board of Managers of WLSARL will be able to require employees to repay all or part of any bonus that has been paid for performance based on data which was subsequently proven to be fraudulent or subject to a material error or misstatement.

Payout Process

1. Fixed/variable balance: The fixed and variable components of remuneration will be appropriately balanced, and the fixed compensation component will represent a sufficiently high proportion of total compensation to allow for a flexible policy (e.g. payment of no variable remuneration in any given year). Variable remuneration will only be paid if it is sustainable given the overall financial situation of WLSARL and of the Wellington Group combined and justified given the performance of the business unit, the Funds, and the individuals concerned.

Wellington Management Funds (Luxembourg)

Appendix 2 – Remuneration policy (continued)

for the period ended June 30, 2020

Remuneration Policy (continued)

Policy Specifics (continued)

Payout Process (continued)

2. Variable remuneration in shares or units: Subject to the legal structure of the Funds and their rules or instruments of incorporation, a substantial portion (at least 50%) of variable remuneration will consist of units or shares of the Funds concerned or unit/share-linked non-cash instruments, unless the management of AIFs or UCITS (as applicable) accounts for less than half of the portfolios managed by WLSARL, in which case the 50% minimum shall not apply. The instruments granted in accordance with the above will be subject to an appropriate retention policy, designed to align the Identified Staffs' incentives with the interests of the Funds.

3. Variable remuneration deferral:

- A substantial portion (at least 40%) of the variable remuneration will be deferred over an appropriate period, in view of the life cycles and redemption policies of the AIFs or the recommended investment holding period of the UCITS concerned, and will be aligned with the nature of the risks of the Funds in question.
- This period shall be at least three to five years for AIFs or three years for UCITS, unless the life cycle of the AIFs concerned is shorter, and vesting will occur no faster than on a pro-rata basis.
- If variable remuneration is particularly high, at least 60% will be deferred.
- Variable remuneration will generally be considerably reduced where negative financial performance of WLSARL, the Funds it manages occurs, taking into account current compensation and reductions in payouts previously earned.

4. Discretionary pension benefits: If WLSARL is aware of Identified Staff leaving WLSARL before retirement, discretionary pension benefits will be held by WLSARL for a period of five years in the form of shares or sharelinked instruments. Otherwise, discretionary pension benefits shall be paid in the form of shares or sharelinked instruments, subject to a five-year retention period.

5. Hedging: Identified Staff subject to the payout process rules must undertake not to use personal hedging or remuneration-related insurance to undermine the risk-alignment effects of their remuneration arrangements.

Delegates

When delegating portfolio management or risk management activities and where the remuneration rules would otherwise be circumvented, WLSARL will ensure that (i) the delegates are subject to regulatory requirements on remuneration deemed equally effective as those applicable under the European Securities and Markets Authority ("ESMA") Guidelines on Sound Remuneration Policies Under the AIFMD and UCITS (ESMA/2016/579 and ESMA/2016/575) (the "ESMA Guidelines") or (ii) appropriate contractual arrangements are put in place to ensure that there is no circumvention of the remuneration rules set out in the ESMA Guidelines. This practice adopted by WLSARL is in line with Sub-section 6.3.2.2, paragraph 495, of the Circular.

Responsibility and oversight

According to the Circular, the Executive Committee of Conducting Officers ("the Executive Committee") is responsible for establishing and applying the Policy. The Board of the Management Company ("the Board") and the Executive Committee are responsible for establishing and applying the Policy. The Policy shall be reviewed and updated at least annually, and more frequently as needed, and as applicable will be submitted to the Executive Committee and the Board for approval at least annually. This Policy will be subject to central and independent internal review by the Internal Auditor for compliance at least annually.

Remuneration committee

On the basis of proportionality given the number of employees of the WLSARL, WLSARL is not intending to establish a remuneration committee. WLSARL will establish a remuneration committee if at any point it deems such establishment proportionate to oversee the implementation of this Policy with respect to decisions with risk implications relating to WLSARL and the Funds managed by WLSARL.

for the period ended June 30, 2020

Remuneration Policy (continued)

Adoption and Annual Review

WLSARL's remuneration policy was adopted by the Board of Managers on November 15, 2015 for adoption on January 1, 2016. The policy was updated in February 2020.

The Board of Managers is satisfied that WLSARL's remuneration policies are designed to be consistent with the UCITS Regulations.

Remuneration for the period ended June 30, 2020

On November 28, 2016, WLSARL was appointed to act as the Management Company of Wellington Management Funds (Luxembourg) II in addition to acting as the Management Company of Wellington Management Funds (Luxembourg). On December 31, 2019, WLSARL was also appointed to act as the Management Company of Wellington Management Funds (Luxembourg) III SICAV. At the same time, Wellington Luxembourg S.à r.l. was also appointed as Alternative Investment Fund Manager to all Funds in the Wellington Management Funds (Luxembourg) II and Wellington Management Funds (Luxembourg) II SICAV Umbrella Funds.
