## What is this product?

<b>Type</b>	FCP Teil I Gesetz von 2010
<b>Term</b>	The Fund was established for an indefinite period. However, it may be wound up at any time if it is no longer possible to manage the Fund efficiently or if a change in the economic and/or political environment makes it necessary to wind it up.
<b>Objectives</b>	The sub-fund's objective is to achieve continuous capital appreciation and earnings over the long term by investing in European bond and equities markets. In order to achieve this, the sub-fund invests on the basis of a dynamic, risk-adjusted investment concept. The aim of the concept is a participation of up to 75% of the sub-fund's assets in the performance of the European bond markets and a participation of up to 60% of the sub-fund's assets in the performance of the European equity markets. At least 50% of the net assets of the sub-fund shall be invested in equities listed on a stock exchange or admitted to, or traded on, regulated markets within the meaning of Directive 2004/39/EC of the European Parliament and of the Council of 21 April 2004 on markets in financial instruments and which are not units or shares in a UCI. For the sub-fund's assets, a realised volatility of between 7 and 10% is intended (the "target volatility"). Within these parameters, the selection of the individual assets is the responsibility of the fund management. To achieve the objective, the risk is monitored constantly and actively managed, ensured by means of sound risk management. The investment policy is implemented by trading in equities, bonds (government bonds preferred), money market instruments and/or the purchase of units in other UCITS/UCI (and in particular ETFs). Up to 100% of the sub-fund's net asset value may be invested in equities, bonds and/or money market instruments. Furthermore, up to 100% of the sub-fund's net asset value may be invested in units of other UCITS or up to 30% in other UCI. The sub-fund uses derivatives only for hedging purposes. Derivatives are financial instruments, the value of which depends on the performance of an underlying asset, such as a security, index or interest rate.
<b>Target retail investor group</b>	The UCITS is intended for private clients, professional clients and eligible counterparties that pursue the objective of asset accumulation/optimisation. This UCITS is a product for investors with general knowledge of and/or experience with financial products. Prospective investors may incur financial losses and do not value capital protection. <b>Other information:</b> The fund's depository is Hauck Aufhäuser Lampe Privatbank AG, Niederlassung Luxemburg. The prospectus and the current annual and semi-annual reports, the current unit prices and further information on the fund can be found free of charge in German or English at <a href="http://www.hal-privatbank.com">www.hal-privatbank.com</a> .

## What are the risks and what could I get in return?

### Risk Indicator

We have classified this product in risk class 3 on a scale of 1 to 7, where 3 corresponds to medium-low risk class.

The risk of potential losses from future performance is classified as medium-low. In adverse market conditions, it is unlikely that the ability of the Hauck & Aufhäuser Fund Services S.A. to pay you will be affected.

The product may be exposed to further risks that are not reflected in the global risk indicator. Please refer to the sales prospectus for more information.

This product does not include any protection from future market performance so you could lose some or all of your investment

The global risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to repay you.

### Performance Scenarios

The figures shown include all the costs of the product itself, (where applicable) [but may not include all the costs that you pay to your advisor or distributor, and includes the costs of your advisor or distributor]. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The final amount you receive from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of The product / a suitable benchmark over the last years. Markets could develop very differently in the future.

### What are the costs?

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have made the following assumptions:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

		If you exit after 1 year	If you exit after 5 year(s)
Total costs		476.67 EUR	803.72 EUR
Impact on return (RIY) per year		4.77 %	1.44 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.56% before costs and 2.12% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. This person will inform you of the amount.

**Composition of costs**
