What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth of 3-month TIBOR +4% per annum before fees have been deducted* by investing in a diversified range of assets and markets worldwide. The fund aims to provide a volatility (a measure of how much the returns of a fund varies over a year) of 5-7% per annum.

*For the target return after fees for each share class please visit the Schroder webpage:

<https://www.schroders.com/en/lu/private-investor/investing-with-us/after-fees-performance-targets/>

The fund is actively managed and invests directly in equities, bonds, money market investments and/or currencies, or indirectly through open-ended investment funds and exchange traded funds worldwide. Bonds may also include sub-investment grade bonds (being bonds with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The fund has a maximum exposure of 30% to equities and at least 70% of its assets denominated in or hedged back into Japanese yen at all times.

The fund may invest indirectly in real estate and commodities through transferable securities (including REITs), derivatives, open-ended investment funds, ETFs and investment trusts which invest in such asset classes.

The fund may also hold cash.

The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against its target benchmark, being to achieve 3-month TIBOR +4% per annum per annum, and its volatility objective of 5-7% per annum. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of a benchmark. Please see appendix III of the fund's prospectus for further details.

The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class pays an annual distribution at a variable rate based on gross investment income.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		JPY 1000000	
		If you exit after 1 year	If you exit after 3 years

The Favourable scenario occurred for an investment between 12 2018 to 12 2021

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- JPY 1 000 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	JPY 8527	JPY 27195
Annual cost impact (*)	0.9%	0.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2,6 % before costs and 1,7 % after costs.
