

FRONTIER MARKETS – I DD CLASS (EUR),

a sub-fund of Global Evolution Funds

ISIN: LU1209899100

The fund is managed by Global Evolution Manco S.A. (the "management company").

Objectives and Investment Policy

The investment objective of the sub-fund is to create returns. To achieve the investment objective the sub-fund invests mainly in traditional transferable securities like hard currency debt securities (typically denominated in USD) and local currency fixed income securities issued by sovereigns, supra-nationals and/or multilaterals in Frontier Markets and a range of foreign exchange instruments.

The sub-fund is actively managed. The sub-fund does not compare its performance against any reference index. It may freely select the securities that it will invest in.

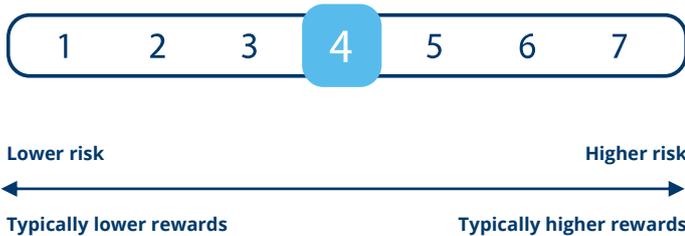

The sub-fund may perform derivative trades in order to hedge positions or to increase its returns. Within this scope, the choice of the individual assets is performed by the investment manager of the subfund.

Income of the sub-fund shall be distributed; the sub-fund may pay interim dividends.

Recommendation: this sub-fund may not be appropriate for investors who plan to withdraw their money within a period of less than 3 years.

Investors may subscribe, convert and redeem shares every bank business day in Luxembourg, except on the 24th of December of each year and Good Friday, no later than noon (Luxembourg time) on the relevant valuation day.

Risk and Reward Profile

This indicator relies on historic data and may not be a reliable indication of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 4 because its share value fluctuates moderately and therefore the chance of profit but also the risk of loss can be moderate.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section "Risks of Investment" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- **Credit risks:** The sub-fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- **Currency markets risk:** The sub-fund is investing its assets in the international currency markets and is therefore exposed both to the increased opportunity and the increased risk of loss resulting from changes in exchange rates.

- **Risks from the use of derivatives:** The sub-fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- **Liquidity Risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- **Custody risks:** The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breaches duties of due care or engages in abusive conduct.
- **Operational risks:** The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.
- **High Yield risks:** Some funds may invest in high yielding debt instruments where the level of income may be relatively high (compared to investment grade debt instruments); however, the risk of depreciation and realisation of capital losses on such debt instruments held will be significantly higher than on lower yielding debt instruments.
- **Emerging Countries risks:** The price of these securities may be more volatile than those of securities in more developed markets. As a result, there may be a greater risk of price fluctuation or of the suspension of redemptions in such funds, compared to funds investing in more mature markets. This volatility may stem from political and economic factors and be further increased by legal, liquidity, settlement and currency risk factors.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.	
Charges taken from the fund over a year:	
Ongoing charge	1.45%
Charges taken from the fund under certain specific conditions:	
Performance fee	10.00%*
* 10.00% of the outperformance subject to a High Water Mark.	
In the last financial year, the performance fee amounted to:	0.88%

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial adviser.

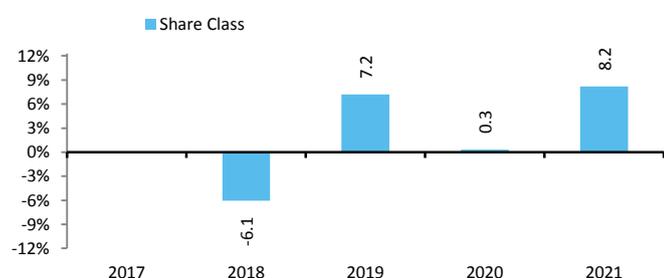

The Ongoing Charges figure is based on expenses for the year ending 31 December 2021.

This figure may vary from year to year. The following fees are excluded:

- Performance fees
- Portfolio transaction costs (costs from the purchase and sale of assets except in the case of an entry / exit charge paid by the sub-fund when buying or selling units in another fund).

Additional information about charges can be found in "Appendix III – Sub-Fund Details" of the prospectus.

Past Performance

Past performance is not a guarantee for future returns. In this calculation, all costs and fees with the exception of the entry charge have been deducted.

The sub-fund was set up on 2010-12-15.

This share class was launched on 2017-11-24.

The past performance was calculated in EUR.
