What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Sub-Fund seeks to outperform the 25% MSCI World NR EUR + 25 MSCI Europe NR EUR + 50% Bloomberg Euro Govt Inflation Linked 1-10 years composite index calculated dividends reinvested, over the recommended investment period, while protecting the capital during adverse periods through opportunistic management and flexible asset allocation. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

The Sub-Fund is managed taking into consideration responsible and sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. Additional information on SRI strategy may be obtained in the prospectus of the Sub-fund. The Sub-Fund's investment strategy relies on active discretionary management using a stock picking policy. This policy is all based on fundamental analysis developed through main investment criteria such as market assessment, issuer's financial structure, management quality, issuer's market position or regular contacts with issuers. The Management Company can use different methods to detect future investment returns as valuation metrics (PE, EV/EBIT, FCF yield, dividend yield...), sum of the parts or discounted cash-flows. The Sub-Fund will be invested either in equities, bonds or money market instruments by adapting the investment strategy to the economic situation and the Management Company's expectations.

Up to 100% of its net assets, the Sub-Fund can be exposed to shares of issuers in all market capitalisation without geographical constraint. Shares of issuers with capitalisation below 1 billion euros may not exceed 10% of net assets. The part of investment in shares of companies having their registered office in emerging countries (such as but not limited to Asian countries except Japan or South America, etc.) may account up to 20% of net assets.

The Sub-Fund may invest up to 70% of its net assets, in fixed income securities and money market instruments from issues of the public or private sector, depending on market opportunities without any constraint in terms of rating or duration. Nevertheless, investment in non "Investment Grade" or non-rated debt securities (i.e. which have a Standard & Poor's rating below A-3 short-term rating or BBB- long-term rating or equivalent) may not exceed 30% of its net assets. The Management Company shall not solely base its investment decisions, risk assessment on the ratings assigned by independent rating agencies but shall also proceed to its own analysis of credit.

The Sub-Fund may invest up to 10% of its net assets in securities which qualify as distressed securities (i.e. which have a Standard & Poor's notation equivalent or below CCC long-term rating or equivalent). In all cases, the Sub-Fund will not invest in securities which qualify as "in default" at the time of the investment or during their lifetime in the portfolio. Fixed income securities which may be downgraded as "in default" will be disposed of as soon as possible with due regards to interest of shareholders. The Sub-Fund may invest in securities with embedded derivatives such as convertible bonds and up to 5% of its net assets in contingent convertibles bonds.

Up to 10% of its net assets, the Sub-Fund may invest in units and/or shares of UCITS and/or other UCIs including ETFs.

In order to achieve the investment objective, the Sub-Fund may also invest up to 100% of its net assets in financial derivative instruments for the purpose of hedging or increasing equity exposure, interest rate risk or currency risk without seeking exposure.

The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment		5 years EUR 10 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs Average return each year	EUR 7 120 -28.8%	EUR 5 400 -11.6%	
Unfavourable scenario	What you might get back after costs Average return each year	EUR 8 600 -14.0%	EUR 9 630 -0.8%	This type of scenario occurred for an investment in the product between December 2021 and August 2023.
Moderate scenario	What you might get back after costs Average return each year	EUR 10 420 4.2%	EUR 11 490 2.8%	This type of scenario occurred for an investment in the product between March 2017 and March 2022.
Favourable scenario	What you might get back after costs Average return each year	EUR 12 110 21.1%	EUR 13 220 5.7%	This type of scenario occurred for an investment in the product between June 2016 and June 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 303	EUR 832
Annual cost impact (*)	3.0%	1.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 2.8% after costs.
