Wellington Global Quality Growth Fund

JPY S Ac

Wellington Global Quality Growth Fund (the "Fund") a Fund of Wellington Management Funds (Luxembourg) (the "Umbrella Fund")

ISIN: LU1387223339

Management company: Wellington Luxembourg S.à r.l.

OBJECTIVES AND INVESTMENT POLICY

- The Fund seeks long-term total returns (capital appreciation and income).
- The Fund will be actively managed against the MSCI All Country World Index (the "Index"), investing primarily in companies globally which are selected using a balance of growth, valuation, capital return and quality criteria. The Fund will be unconstrained across sector, industry and country globally including emerging markets. The Index is market capitalisation weighted and designed to measure the equity market performance of developed and emerging markets.
- The Fund will invest in shares and other securities with equity characteristics such as depositary receipts. The Fund may invest either directly or via derivatives.
- While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.
- The Index may be considered during portfolio construction and is used for performance comparison and weighted average carbon intensity purposes. Fund securities may be components of the Index but are not expected to have similar weightings. The Investment Manager may limit the extent that security weightings differ from the Index but this should not be expected to limit the Fund's ability to achieve long-term total returns in excess of the Index.

- Any income allocated to the Unit class from the Fund is reinvested.
- Units can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.
- This Fund may not be appropriate for investors who plan to withdraw their money within five years.
- The currency of this Unit class is different to the base currency of the Fund and so the performance of the Unit class will be subject to the impact of the movement of the exchange rate between the currencies.
- The Fund will support certain environmental characteristics by maintaining a carbon footprint (weighted average intensity) that is at least 25% lower than the Index.

The indicator is not a measure of the risk of capital loss, but a measure of the previous ups and downs in value of the Fund. It is based on historical data and may not be a reliable indicator of the Fund's future risk profile. If the Fund has been in operation for less than 5 years, representative history, such as a comparable Unit class or index, may have been used to create the indicator.

- The indicator may shift over time and is not a target or guarantee.
- The lowest category does not represent a risk-free investment.
- The Fund is classified as a 6 as over the past 5 years the average amount by which returns varied each year was equal to or above 15% and less than 25%.
