

BOND ALLOCATION (the "Sub-Fund"), a Sub-Fund of EDMOND DE ROTHSCHILD FUND (the "Fund")

Share Class A CHF H (the "Class") - LU1426148802

Management Company : Edmond de Rothschild Asset Management (Luxembourg)

Objectives and Investment Policy

Investment objective: The Sub-Fund's objective is to offer an annualised performance exceeding the Index composed of 50% of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index and 50% of the Bloomberg Barclays Euro Aggregate Treasury Total Return Index over the investment period. Environmental, social and governance (ESG) criteria are one of the components subject to management, although their weighting in the final decision is not defined beforehand.

Benchmark index: 50% Bloomberg Barclays Euro-Aggregate Corporate (EUR) + 50% Bloomberg Barclays Euro-Aggregate Treasury (EUR)

The Sub-Fund is actively managed and is not designed to track the Index. Therefore, the composition of the portfolio holdings is not constrained by the composition of the Index and the deviation of portfolio holdings from the Index may be significant.

Investment policy: The investment approach of the Sub-Fund combines both top-down and bottom-up factors. As such the Sub-Fund benefits from the complementary skills of the Investment Manager, combining relevant macroeconomic analysis with specific bond picking skills in each fixed income market segment. The Sub-Fund may invest up to 110% of its net assets in debt securities and Money Market Instruments of any kind, from all geographical areas.

The cumulative exposure to non-investment grade debt securities (high yield securities) with a credit rating below BBB- (Standard and Poor's or an equivalent rating assigned by another independent agency, or a deemed equivalent internal rating attributed by the Investment Manager for non-rated securities) and to debt securities issued by public or private entities located in Emerging Countries will not exceed 70% of the Sub-Fund's net assets. However, the cumulative exposure to non-investment grade corporate bonds and emerging markets debt securities will not exceed 50% of the Sub-Fund's net assets. The Sub-Fund may also invest in Distressed Securities up to 5% of its net assets. High yield securities are speculative and present a higher risk of default than investment grade bonds. The remainder of the Sub-Fund's portfolio will be invested in debt securities with a minimum long-term rating of BBB- or a short-term rating of A-3 (Standard and Poor's or an equivalent rating assigned by another independent agency, or a deemed equivalent internal rating attributed by the Investment Manager for non-rated securities). Subject to a limit of 10%, the Sub-Fund may be exposed to equity markets through its potential exposure to Convertible Bonds and in exceptional cases resulting from the restructuring of securities held in the portfolio. In case of conversion or restructuring, the Sub-Fund may temporarily hold equities up to 10% of its net assets which would be sold off as soon as possible in the best interest of shareholders. Up to 20% of the Sub-Fund's net assets may be invested in Contingent Convertible Bonds. The Sub-Fund may hold up to 100% of its net assets in securities issued in currencies other than the euro. The currency risk resulting from these investments will be systematically hedged. Nevertheless, a residual exposure may remain. The Sub-Fund's Modified Duration may vary from -2 to 8.

The Sub-Fund may use financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purpose of hedging. These instruments may include, but are not limited to:

Futures options - Credit options, Interest rate options - Currency options, Forward rate agreements - Currency swaps, Interest rate futures - Inflation swaps, Interest rates swaps, Currency forward, Single-name Credit Default Swap, Swaptions - Index Credit Default Swap, Bond ETF options, Total Return Swaps, Bond futures.

Strategies that will be implemented through the use of financial derivative instruments:

General hedging of certain risks (interest rate, credit, currency), Exposure to interest rate and credit, Reconstitution of a synthetic exposure to assets and risks (interest rate, credit), Increase in exposure to the market, Duration positioning: active management of the duration of the aggregate portfolio as well as of specific yield curves. Typically increasing the duration on a given region/segment on which a decrease in bond yields is expected and conversely reducing the duration to a given region/segment on which an increase in bond yields is expected, Yield curve positioning: yield curve strategies in order to benefit from the difference in evolution of yields for different maturities and from nonparallel shifts in the yield curve (steepening / flattening), Curvature positioning: curvature strategies in order to benefit from a deformation and a movement in the shape of a yield curve.

These strategies, due to the use of derivatives, may potentially induce a relatively high leverage as further described in section XV below. The strategies will however remain consistent with applicable risk diversification rules.

The Sub-Fund will enter into TRS and SFT (repurchase transactions only) for such percentage of its net assets. The Sub-Fund may invest up to 100% of its net assets in securities with embedded derivatives. The strategy for the use of securities with embedded derivatives is the same as that described for the use of derivatives. Up to the limit of 10% of its net assets, the Sub-Fund may invest in units or shares of UCITS or other Investment Funds.

The level of leverages is not expected to be in excess of 2,000% of the net asset value of the Sub-Fund.

The Sub-Class will be hedged against the EUR/CHF exchange rate fluctuation.

Recommended holding period of 3 years

Frequency of share buying or selling: Every Luxembourg and France bank business day except for Good Friday, 24 December (Christmas Eve) and the days on which the French markets are closed (official calendar of Euronext Paris S.A.) for orders received by the transfer agent on each NAV calculation day before 12:30 p.m. and processed on the basis of that day's net asset value.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The definition of the risk and reward category is based on the historical performance data and/or the risk limit indicated in the Sub-Fund's investment policy. It may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown may change over time. Category 1 does not mean that an investment is risk-free. Investors should note that the Sub-Fund is not guaranteed or capital protected.

This Sub-Fund is rated in category 3, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy", as well as the currency of the unit.

Significant risks not taken into account in this indicator:

Credit risk : When a significant level of investment is made in debt securities.

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices quoted and the execution of orders at desired prices.

Impact of techniques such as derivative contracts : The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk : Where a Fund is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk : The Sub-Fund may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.
