What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of PWM Funds, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration. However if the net assets of the sub-fund are at any time below EUR 5 million or the equivalent thereof in the currency of the relevant sub-fund, or if a change in the economic or political situation relating to the sub-fund would justify such liquidation or if it is required by the interests of the shareholders of the sub-fund, the board of directors may decide to liquidate the sub-fund and redeem all outstanding shares.

OBJECTIVES

Objectives and investment policy

The objective of the Sub-Fund is to provide a long-term, risk adjusted capital appreciation, through investments in a diversified portfolio of investment funds / undertakings for collective investment (UCIs) that should have relatively low correlation with traditional asset classes.

The Sub-Fund will mainly invest in UCIs offering an exposure to debt securities (including money market instruments) of any type.

These UCIs may make use of or offer an exposure to fixed-income or debt securities, without constraint on credit rating, maturity, that include among others, medium and long-term bonds, floating-rate notes, all types of asset-backed securities, convertible bonds.

Exposure of the underlying UCIs will not be limited to a geographic sector (including emerging countries), a particular sector of economic activity or a given currency. However, depending on market conditions, this exposure may be focused on one country or on a limited number of countries and/or one economic activity sector and/or one currency.

On marginal basis, the Sub-Fund may invest in any other type of eligible assets, such as (direct investment in) debt securities, money market instruments, cash and UCIs other than those above-mentioned.

However, the Sub-Fund intends to be ultimately exposed, through investments into UCIs, to a maximum of

- 10% of its net assets to distressed and defaulted debt securities;
- 49% of its net assets to high yield debt securities;
- 20% of its net assets to contingent convertible bonds.

If the investment manager deems it necessary and in the best interest of the shareholders, on a temporary basis, the Sub-Fund may hold up to 100% of its net assets in liquidities, including deposits, money market instruments, and money market UCIs.

Derivatives For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-the-counter.

Nevertheless, in normal market conditions, the investment manager intends to use listed options and futures offering an exposure to debt securities and currency derivatives.

Benchmark The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

Dividend Policy This Class distributes income. Dividend distributions are planned.

Share Class Currency The currency of the Class is GBP.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

The return of the product is determined using the Net Asset Value (the "NAV") calculated by the Central administration. This return depends mainly on the market value fluctuations of the underlying investments.

INTENDED RETAIL INVESTORS

The product is reserved for institutional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and for receiving regular income and who wish to hold their investment over 3 years.

OTHER INFORMATION

Depository Pictet & Cie (Europe) S.A. (the "Depository").

Asset segregation The assets and liabilities of each sub-fund are segregated by law, which means that the performance of the assets in other sub-funds does not influence the performance of your investment.

Dealing The net asset value for this Class is calculated on the basis of the pricing as of each Friday ("the Valuation Day"). The cut-off time to submit subscription and/or redemption orders is 4 p.m., Luxembourg time on the Luxembourg business day preceding the relevant Valuation Day.

Switching Shareholders may apply for any shares of any sub-funds to be converted into shares of another sub-fund, provided that the conditions for accessing the target class or sub-fund are fulfilled with respect to this Sub-Fund, on the basis of their respective Net Asset Value calculated on the Valuation Day following receipt of the conversion request. The redemption and subscription costs connected with the conversion may be charged to the shareholder as indicated in the prospectus. For more details about how to switch between sub-funds, please refer to the prospectus.

Additional Information More detailed information on this Sub-Fund, such as the prospectus, other classes, the key information, the latest Net Asset Value, the articles of incorporation as well as the latest annual and semi-annual report, can be obtained free of charge, in English, from the central administrator, the distributors, the Management Company or online at www.fundsquare.net.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if your cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period (RHP): Example investment		3 years GBP 10,000		
		If you exit after 1 year	If you exit after 3 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	GBP 8,280	GBP 7,320	
	Average return each year	-17.2%	-9.9%	
Unfavourable scenario	What you might get back after costs	GBP 8,620	GBP 8,720	This type of scenario occurred for an investment in the proxy then the product between April 2017 and April 2020.
	Average return each year	-13.8%	-4.5%	
Moderate scenario	What you might get back after costs	GBP 9,050	GBP 9,160	This type of scenario occurred for an investment in the proxy then the product between September 2014 and September 2017.
	Average return each year	-9.5%	-2.9%	
Favourable scenario	What you might get back after costs	GBP 9,700	GBP 9,850	This type of scenario occurred for an investment in the proxy between August 2013 and August 2016.
	Average return each year	-3.0%	-0.5%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundPartner Solutions (Europe) S.A. is unable to pay out?

The Management Company is not making any payment to you in relation to this Sub-Fund and you would still be paid in case of a default from the Management Company.

The Sub-Fund's assets are held with a separate company, the Depositary, so the Sub-Fund's ability to pay out would not be affected by the insolvency of the Management Company. However, in the event of the Depositary's insolvency, or its delegates, the Sub-Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Sub-Fund. The Depositary will also be liable to the Sub-Fund or its investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations (subject to certain limitations).

If the Sub-Fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

There is no compensation or guarantee scheme protecting you from a default of the Depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested

Investment of GBP 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 1,214	GBP 1,589
Annual cost impact (*)	12.1%	5.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and -2.9% after costs.
