

This document provides key investor information about this fund ("Fund"). It is not marketing material. The information is required by law to help investors understand the nature and the risks of investing in this Fund. Investors are advised to read it so to make an informed decision about whether to invest.

Green Ash Global High Yield a Subfund of Woodman SICAV

Management Company
Share Class
ISIN

MultiConcept Fund Management S.A., Luxembourg
I cap. USD
LU1692346551

Objectives and investment policy

The Fund is actively managed without reference to any benchmark. The investment objective of the Woodman Green Ash Global High Yield Fund is to combine income with capital growth. The Fund will mainly invest, either directly or indirectly via shares or units of Target Funds, in securities such as, but not limited to, high yield fixed rate bonds, floating rate notes, convertible bonds and contingent convertible securities. The Fund invests worldwide without being limited to a specific currency or rating of the issuer. The Fund will actively invest

in securities rated below investment grade and is allowed to invest in distressed instruments and defaulted securities. In order to reach its objective, the Fund can use structured products and derivative instruments to protect against movements in currencies and security prices and for efficient portfolio management. The investor can buy or sell shares on a daily basis (Luxembourg bank business days). This Share Class does not make regular distributions.

Risk and reward profile

Risk profile

The Fund's risk and reward profile shows the variations in value an investment in this Fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

Why is the Fund in the specific category?

Investments in bonds are affected by changes in interest rates, the size of the market segment, the currency allocation, the economic sector and the credit quality of the bonds. The Fund holds investments with generally lower credit quality and has exposure to currency risk. The use of derivatives may lead to leverage and to an amplified reaction to market movements. The particularly active management of the Fund may lead to frequent changes of the Fund's risk profile. The Fund may have a low degree of issuer diversification which makes it more vulnerable.

Are there any other particular risks?

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Credit risk:** Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments have considerable credit risk.
- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- **Counterparty risk:** Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Fund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- **Event risk:** In the case a trigger event occurs contingent capital is converted into equity or written down and thus may lose substantially in value.
- **Operational risk:** Deficient processes, technical failures or catastrophic events may cause losses.
- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- **Sustainability risks:** Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

Charges

One-off charges taken before or after the investment	
Entry charge	5.00%
Exit charge	Not applicable
This is the maximum amount that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.24%
Charges debited to the Fund under certain specific conditions	
Performance fee	Not applicable

Charges debited to investors are used to pay for the cost of running the Fund, including marketing and distribution costs. These charges reduce the potential growth of the investment.

The **entry** and **exit charges** shown are the maximum figures that can be charged to the investor. Investors may obtain the fees effectively applied from their individual financial adviser or distributor.

The **ongoing charges** figure is based on last year's expenses for the year ending December 31, 2020. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking.

Past performance

Performance disclaimer

Please note that performance in the past is not a reliable indicator of future results.
