## What are the risks and what could I get in return?

### Risk Indicator:

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Please refer to the Fund's prospectus for a full list of risks which can affect the overall fund value.

### Performance Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years  
Example investment: EUR 10,000  
Scenarios

If you exit after 1 year

If you exit after 3 years

Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

## What happens if ING Solutions Investment Management S.A. is unable to pay out?

The Fund's assets and liabilities are segregated from those of ING Solutions Investment Management S.A. Therefore, the Fund's ability to pay out would not be affected in case of insolvency or default of ING Solutions Investment Management S.A.

A potential loss is not covered by an investor compensation or protection scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time:

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

If you exit after 1 year

If you exit after 3 years

<b>Total costs</b>	347 EUR	478 EUR
<b>Annual cost impact (*)</b>	3.5%	1.6% per year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 2.6% after costs.

### Composition of Costs:

#### One-off costs upon entry or exit

If you exit after 1 year
