MSCI EUROPE SRI S-Series 5% Capped, a Subfund of the SICAV BNP PARIBAS EASY

Class "Track Classic Capitalisation" - ISIN code LU1753045506

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The Fund is an index-tracking passively managed fund.

The Fund seeks to replicate (with a maximum tracking error* of 1%) the performance of the MSCI Europe SRI S-Series 5% Capped (NTR) index (the Index) by investing in the shares issued by companies included in the Index, respecting the Index's weightings (full replication), or in a sample of shares issued by companies included in the Index (optimised replication).

When investing in a sample of shares the Fund's tracking error may be higher.

The Index is composed of European companies selected on the basis of a minimum Environmental, Social and Corporate Governance (ESG) rating (environmental opportunity, pollution and waste, human capital, corporate governance, etc.) and based on their efforts to reduce their exposure to coal and unconventional fossil fuels, with a cap that limits a company's maximum weight within the Index to 5% on each rebalancing date. As a result, companies involved in sectors with a potentially high negative ESG impact, those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index.

The type of approach used here is Best-in-class (Best-in-class approach identifies leaders in each sector based on the best ESG practices, while avoiding those that present high levels of risk and do not comply with minimum ESG standards according to the Index administrator and its specialized partners). The extra-financial strategy of the Index may comprise methodological limitations such as the risk related to ESG investment or the Index rebalancing. Further information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the MSCI indices can be found on www.msci.com.

*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its index.

Income are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

Risk and Reward Profile

Lower risk ← Higher risk
Typically lower reward ← Typically higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be a reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?

The risk category is justified by the investment mainly in Stocks and Shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the "Investment risks" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.

Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	No
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year
