Copies of the Annual Report including audited Financial Statements for the year ended 31 March 2024 may be obtained from the Registered Office of M&G (Lux) Investment Funds 1 at 16, Boulevard Royal L-2449 Luxembourg, The Grand Duchy of Luxembourg.

No subscription can be made solely on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus accompanied by the Key Investor Information Document(s) and the most recently published Annual Report including audited Financial Statements, or the most recent unaudited semi-annual report, if published thereafter.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, investors are not certain to make a profit on their investments and may lose money.

# Management and administration

The Board of Directors of M&G (Lux) Investment Funds 1 (the 'Board' or its 'Directors') presents its Annual Report and audited Financial Statements for the year ended 31 March 2024.

Please note that an explanation of key investment terminology is available on our website at [mandg.com/private-investor/glossary](http://mandg.com/private-investor/glossary). A printed copy of the glossary is available upon request by calling customer services and administration as shown within the 'Investor information' section of this report.

## Fund information

M&G (Lux) Investment Funds 1 (the 'Fund') is an Open-Ended Investment Company incorporated under the laws of The Grand Duchy of Luxembourg as a *Société d'Investissement à Capital Variable* (SICAV) in accordance with the provision of part 1 of the law dated 17 December 2010 on undertakings for Collective Investment, as amended (the 'UCI Law').

The Fund is authorised and regulated by the *Commission de Surveillance du Secteur Financier* (CSSF) under the laws of the The Grand Duchy of Luxembourg. The Fund was incorporated on 29 November 2016 and is an Undertaking for Collective Investment in Transferable Securities (UCITS) scheme under part 1 of the UCI Law.

The Fund is an umbrella fund designed to offer investors access to a variety of investment strategies through a range of separate sub-funds. Each sub-fund represents a separate portfolio of assets.

The Fund's principal activity is to carry on business as a SICAV. The Fund is structured as an umbrella fund, and different sub-funds may be established by the Board from time to time with the approval of the CSSF.

Under Luxembourg law, the Fund is itself a legal entity, and the assets and liabilities of each sub-fund are segregated from one another and invested in accordance with the investment objectives and investment policies applicable to each sub-fund. Shareholders are not liable for the debts of the respective sub-fund. A Shareholder is not liable to make

any further payment to the respective sub-fund after payment has been made in full for the purchase of shares.

Each sub-fund may offer more than one class of shares. Each share class may have different features with respect to its criteria for subscription (including eligibility requirements), redemption, minimum holding, fee structure, currency, hedging policy and distribution policy (further information on share classes is fully described in the Fund's Prospectus).

## Board of Directors

As at the financial year ended 31 March 2024, and up to the date of this report, the following individuals were appointed as Directors of the Fund:

P R Jelfs, L J Mumford, N Wells<sup>a</sup>, S van Dootingh<sup>a</sup>, Y Wagner<sup>a</sup>

<sup>a</sup> Independent Director

# Directors' Report

## Directors of the Fund

### Philip Jelfs

Mr Jelfs has been a director of the Fund since inception. He joined M&G in 2006 and now is Global Head of Product. He is responsible for products throughout the product life-cycle. He is also a Director of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Jelfs has an honours degree in Geography & War Studies from Kings College, London University and an MBA.

### Laurence Mumford

Mr Mumford has been a director of the Fund since inception and is Chair of the Fund Board. He is Distribution Governance Director and currently Chair of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Mumford is a member of the Investment Association's Investment Funds Committee which aims to facilitate strategic understanding and issue resolutions across the industry. Mr Mumford is a chartered accountant and joined M&G in 2000 having previously worked at PricewaterhouseCoopers.

### Susanne van Dootinhg – Independent Director

Ms van Dootinhg has been an independent non-executive director of the Fund since 12 February 2019. Ms van Dootinhg is an independent non-executive director of several Luxembourg domiciled investment funds and management companies. Ms van Dootinhg was previously at State Street Global Advisors (SSGA) from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy EMEA. Prior to this she held various senior positions at SSGA in Global Product Development and Global Fixed Income Strategy. Before joining SSGA in 2002 she was a fixed income strategist and portfolio manager at Fortis Investment Management, Barclays Global Investors, and ABN AMRO Asset Management.

### Yves Wagner – Independent Director

Dr. Wagner has been an independent non-executive director of the Fund since inception. Dr. Wagner started his non-academic career with Banque Générale du Luxembourg where he became Director of Asset Management, before becoming the Chief Executive Officer and Board member of Fortis Investments, Luxembourg. He founded 'The Directors' Office' and is today an independent director for several financial institutions. He has been an advisor to the Luxembourg School of Finance (LSF), a business school of the University of Luxembourg.

Dr. Wagner holds a '*Doctorat ès Sciences Economiques*' (PhD) from the University of Aix-Marseille III, France.

Dr. Wagner was for many years the Chairman of the Luxembourg Society of Financial Analysts (ALGAFI) and Board Member of the European Federation of Financial Analysts Societies (EFFAS).

### Nadya Wells – Independent Director

Ms Wells has over 25 years' experience as a long-term investor and governance specialist. Latterly she spent 13 years with the Capital Group, as a portfolio manager and investment analyst with a focus on EMEA markets until 2014. Prior to that she was a portfolio manager at Invesco Asset Management investing in Eastern Europe in closed end funds until 1999. She started her career with EY in management consulting. She holds an MBA from INSEAD, an MA from Oxford University and an MSc from the University of Geneva.

# Directors' Report

## Directors' responsibilities

The Directors are responsible for the overall management and control of the Fund in accordance with the Articles. The Directors are further responsible for the implementation of each sub-fund's investment objective and policies, as well as for oversight of the administration and operations of each sub-fund.

The Directors shall have the broadest powers to act in any circumstances on behalf of the Fund, subject to the powers reserved by law to the Shareholders.

The following persons have been appointed as Directors of the Fund:

**Philip Jelfs**, Director.

**Laurence Mumford**, Director.

**Susanne van Dootingh**, Independent Director.

**Yves Wagner**, Independent Director.

**Nadya Wells**, Independent Director.

The Directors may appoint one or more committees, authorised delegates or agents to act on their behalf.

## Delegation of functions

### Management Company

The Fund has appointed M&G Luxembourg S.A., pursuant to the Management Agreement, to serve as its management company within the meaning of the UCI Law.

The Management Company performs certain functions, subject to the overall supervision of the Directors, for the provision of investment management services, administrative services and marketing services to the Fund.

The Management Company acts as the management company of the Fund under the freedom to provide services organised by the UCITS Directive. In accordance with the relevant provisions of the UCI Law, the Management Company will be required to comply with the CSSF Rules (being the rules of the Management Company's 'home member state' for the

purposes of the UCI Law) in relation to the organisation of the Management Company, including its delegation arrangements, risk management procedures, prudential rules and supervision, applicable prudential rules regarding the Management Company's management of UCITS authorised under the UCITS Directive and the Management Company's reporting requirements. The Management Company shall comply with the UCI Law as regards the constitution and functioning of the Fund.

The Fund has appointed the Management Company as its corporate and domiciliary agent. The Management Company will be responsible for the domiciliation of the Fund and will perform, inter alia, the functions as foreseen in the Luxembourg law of 31 May 1999 on the domiciliation of companies, as amended from time to time, and, in particular, allow the Fund to establish its registered office at the registered office of the Management Company, and provide facilities necessary for the meetings of the Fund's Directors, officers and/or of the Shareholders of the Fund.

### Distributor

M&G Luxembourg S.A. acts as the distributor of Shares.

### Investment manager

The Management Company has appointed M&G Investment Management Limited as investment manager to manage and invest the assets of the sub-funds pursuant to their respective investment objectives and policies.

The Investment Manager was appointed pursuant to the Investment Management Agreement. Under the Investment Management Agreement, the Investment Manager has full discretion, subject to the overall review and control of the Management Company and the Directors, to purchase and sell securities and otherwise to manage the assets of the Fund on a discretionary basis. The Investment Manager is also entitled to delegate investment management under the terms set out in the Investment Management Agreement.

# Directors' Report

## Registrar and transfer agent

The Management Company has appointed CACEIS Investor Services Bank S.A. as registrar and transfer agent of the Fund on behalf of the Board of Directors.

Under the Registrar and Transfer Agency Agreement, the registrar and transfer agent is responsible for processing the issue, redemption and transfer of shares, as well as for the keeping of the register of Shareholders, subject to the overall review and control of the Management Company and the Directors.

## Administrator

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as the Administrator of the Fund on behalf of the Board of Directors. The Administrator will carry out certain administrative duties related to the administration of the Fund, including the calculation of the Net Asset Value of the shares and the provision of accounting services to the Fund, subject to the overall review and control of the Management Company and the Directors.

## Hedging services

The Management Company has appointed State Street Europe Limited to undertake certain currency hedging functions in respect of Currency Hedged Share Classes.

## Depositary

The Management Company in conjunction with the Board of Directors has appointed State Street Bank International GmbH, Luxembourg Branch as the Depositary.

The Depositary shall perform all of the duties and obligations of a depositary under the UCITS Directive and the Luxembourg implementing laws and regulations with respect to each sub-fund.

The Depositary has been entrusted with the following main functions:

- ensuring that the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with applicable law and the Articles;
- ensuring that the value of the shares is calculated in accordance with applicable law and the Articles;
- carrying out the instructions of the Management Company or the Fund (as the case may be), unless such instructions conflict with applicable law or the Articles;
- ensuring that, in transactions involving the assets of the Fund, any consideration is remitted to the Fund within the usual time limits;
- ensuring that the income of the Fund is applied in accordance with applicable law and the Articles;
- monitoring and oversight of the Fund's cash and cashflows in accordance with the UCITS Directive and the Luxembourg implementing laws and regulations; and
- safe-keeping of the Fund's assets, including the safe-keeping of financial instruments that can be held in custody and ownership verification and record-keeping in relation to other assets.

## Fair Valuation and liquidity

As noted in the important information section, financial markets have been impacted by the invasion of Ukraine. Within the portfolios a small number of Russian securities are held. These securities were fair valued by the Board of Directors and marked as such in the statement of investments. The holding of these securities has not impacted the liquidity of the sub-funds and has not raised any going concern issues for the Fund.

There have not been any significant difficulties in valuing the portfolio during and since the year end.

# Directors' Report

## Directors' statement

This report has been prepared in accordance with the requirements of the UCITS Directive 2009/65/EC of the European Parliament and Council of 13 July 2009.

# Independent Auditor's Report

## Independent Auditor's Report to the shareholders of M&G (Lux) Investment Funds 1

### Opinion

We have audited the financial statements of M&G (Lux) Investment Funds 1 (the 'Fund') and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at 31 March 2024, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 March 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the 'Law of 23 July 2016') and with International Standards on Auditing ('ISAs') as adopted for Luxembourg by the 'Commission de Surveillance du Secteur Financier' ('CSSF'). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the 'responsibilities of the *réviseur d'entreprises agréé* for the audit of the financial statements' section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ('IESBA Code') as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We

believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

# Independent Auditor's Report

## Responsibilities of the 'réviseur d'entreprises agréé' for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the 'réviseur d'entreprises agréé' that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the 'réviseur d'entreprises agréé' to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the 'réviseur d'entreprises agréé'. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# Market review

Financial markets experienced bouts of turbulence and swings in sentiment during the 12-month review period. Investors' changing views on the macroeconomic outlook and the direction of interest rates, in particular, drove significant volatility in asset prices. Market narratives oscillated between various scenarios, such as economic recession, 'higher for longer' interest rates and the prospect of rate cuts.

Despite the changeable backdrop, global equity markets registered healthy gains in the 12 months, recovering strongly from the declines in 2022. This was arguably due to the resilience of the global economy and the fact that the widely anticipated recession did not materialise.

Bond markets had a more challenging time, as central banks continued to hike interest rates in their efforts to bring inflation under control. Despite a powerful rally in bond prices at the end of 2023 when policymakers indicated that rates had potentially peaked, US government bonds (Treasuries) ended the period in negative territory.

The battle against inflation remained the main focus for investors during the review period. Although inflationary pressures in advanced economies broadly eased, helped by falling food and energy prices, inflation remained above central banks' targets.

Inflation also continued to slow in the eurozone where it came in at 2.6% in February 2024, heading towards the European Central Bank's 2% target.

Against this background, there was a growing expectation that major central banks had reached or were close to the peak in the rate tightening cycle. The European Central Bank raised rates to a record high of 4.0% in September but indicated that it was the final hike in this cycle.

Even the Bank of Japan (BoJ) joined in the rate-hiking process. It ended its negative interest rate policy as it increased rates for the first time in 17 years from -0.1% to a range of 0%-0.1% following a jump in consumer prices and wages.

On the other hand, Switzerland's central bank became the first developed market central bank to kick off the rate easing cycle, reducing its key interest rate by 25 basis points to 1.5% in March.

From the summer onwards, the prospect that central banks might keep interest rates at elevated levels for a prolonged period to bring inflation down – the 'higher for longer' scenario – unsettled investors. Developed market government bond markets experienced a sharp sell-off and global stock markets also fell steeply in this environment, with weak economic data contributing to the pessimistic environment.

Although geopolitical risks increased following the attack on Israel by Hamas in October, investors' mood brightened considerably in the final two months of the year. Encouraging inflation data and indications that the Fed's rate hiking cycle had ended sparked a powerful two-month rally in bond and equity markets. Growing optimism about a 'soft landing' and the prospect of rate cuts in 2024 buoyed investor risk appetite and saw bond and equities prices recover from earlier weakness.

There was one last twist in the first quarter of 2024. The bond market rally faded as robust economic data in the US and elevated inflation saw investors push back their timing of potential rate cuts by central banks. On the other hand, equity markets continued to climb, with stockmarkets in the US and Japan reaching record highs.

Against this backdrop, the MSCI AC World Index gained 23.8% in the 12 months (in US dollars), with the US one of the best-performing markets. Much of the gains on Wall Street were driven by a handful of big technology and 'growth' stocks, the so-called 'Magnificent Seven' – Apple, Microsoft, Alphabet, Amazon, Tesla, Meta and NVIDIA. Several of these stocks benefited from the buzz around artificial intelligence (AI) and helped the technology-focused Nasdaq Composite Index rise 35%.

# Market review

Japan's stockmarket also had a strong 12 months, driven by optimism that corporate governance reforms might lead to improved shareholder returns and signs that Japan might be emerging from decades of deflation. European equities registered double-digit returns as well, led by stocks in Italy and Spain.

In contrast, Asia ex Japan and emerging market equities underperformed their developed market counterparts, principally due to weakness in China. However, Latin America was a bright spot in emerging markets, with share prices in Brazil, Mexico and Peru rallying. Argentina's stockmarket soared after Javier Milei's victory in the presidential election. India and Taiwan also bucked the downward trend in Asia.

From a sector perspective, there was a wide divergence of returns. Information technology, and semiconductor stocks, in particular, delivered healthy returns driven by excitement about AI. Communication services and financials also outperformed the broader market. Conversely, defensive areas such as consumer staples and healthcare were among the weakest sectors. Real estate and utilities, two areas which are perceived to be sensitive to interest rates, were laggards too.

In the bond markets, investors' changing expectations for interest rates during the period caused considerable volatility. The rally at the end of 2023 fuelled by the Fed's policy 'pivot' towards rate cuts helped bond prices recover from losses earlier in the period. In a dramatic turnaround, the Bloomberg Global Aggregate Index of government and corporate debt ended the year up 0.5% (in US dollars), having been down about 4% in mid-October.

Corporate bonds outperformed government debt, with the riskier high yield debt delivering the strongest returns (11.1%). Emerging market bonds also made healthy gains, with US dollar-denominated debt outperforming local currency bonds, which were hurt by the strength of the US dollar.

M&G Investment Management Limited  
31 March 2024

# Investment review

## For the period from 1 April 2023 until 3 November 2023

The sub-fund was closed on 3 November 2023 following investor notification.

### Fund positioning

Prior to closure in November, the sub-fund held around 20% in short-dated corporate bonds; 12% in long-dated corporate bonds and almost 16% in government bonds. Within the corporate bond allocation, banking and financial services continued to be favoured.

The sub-fund was cautiously positioned in terms of its duration stance (meaning, it kept duration relatively short, as generally bonds with longer duration are more sensitive to changes in interest rates), as we felt the persistent inflationary backdrop could put further pressure on yields.

### Performance review

The period up until sub-fund closure was generally a calmer time for bond markets, compared with the start of 2023 when we narrowly avoided a banking crisis with the collapse of Silicon Valley Bank in the US. Nevertheless, central banks continued to raise interest rates at most of their meetings which was detrimental for global bond prices. Concern over rising US debt issuance, and ratings agency Fitch's downgrading of the US economy's credit rating from AAA to AA+, were also negative for markets.

Meanwhile, core year-on-year inflation measures indicated an easing in many economies. The European Central Bank (ECB) continued to hike interest rates in September, with the deposit rate reaching an all-time high of 4%. Whilst the US Federal Reserve and Bank of England both kept rates steady in September, market participants pushed out the likely timing of any rate cuts.

Between the start of the review period and the 3 November 2023 when it closed, the sub-fund delivered a mix of negative and positive total returns (the combination of capital growth and income) and was behind the 3-month EURIBOR + 2.5% across all its euro share classes in the period under review. In other

currencies, the sub-fund's share classes were behind the respective benchmarks as well.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Wolfgang Bauer

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

# Investment review

## For the year ended 31 March 2024

### Performance review

Asia ex Japan equities delivered a positive return during the period under review. However, there were notable differences in the performances between countries. India and Taiwan outperformed, while China and Hong Kong ended the period in negative territory. As a result, the MSCI AC Asia Pacific ex Japan Index lagged global indices in US dollar terms.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of the MSCI AC Asia Pacific ex Japan Net Return Index across some of its share classes in the period under review. The index returned 5.91% in euro terms and 5.28% in US dollar terms over the same period.

Relative outperformance was mainly driven by favourable stock selection, notably our choices in South Korea. Key contributors to relative performance included subsidiaries of South Korean conglomerates Hyundai and Samsung. Hyundai Motor, Samsung Life, Samsung Fire & Marine Insurance, and Samsung Electronics were among the top 10 contributors during the period under review. Other notable contributors were China-based Yangzijiang Shipbuilding and KB Financial Group, a leading financial services holding company based in Seoul.

The South Korean government's 'Corporate Value-Up Programme' offers incentives for listed companies to conduct corporate reforms, potentially boosting shareholder returns, for example via higher dividend payouts. Our holdings in these 'Value-Up' names witnessed double-digit returns in their share prices, in US dollar terms. Hyundai Motor's share price also benefited from plans to list its Indian business on the dynamic Indian equity markets.

Elsewhere, Yangzijiang, China's largest privately owned shipyard, has received accreditation to manufacture large-scale LNG (liquid natural gas) ships and is benefiting from a strong pipeline of new large-scale container orders. We believe better-priced orders,

along with falling steel prices and a weaker Chinese yuan bode well for its margins.

The leading detractors were mainly from China, notably Hainan Meilan International Airport, online retailer JD.com, online real estate agency KE Holdings, and Pacific Basin Shipping. Indian financial services company HDFC Bank completed the top five list.

Shares in domestically-focused Chinese companies fell on fears about the strength of consumer spending in the post-COVID-19 environment and problems in the property sector, while transportation companies face the headwind of slowing global growth.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We employ a bottom-up stock picking approach to make longer-term investments, although returns may be enhanced by opportunistic positioning given the risk/reward profile of the stock.

Our aim is for stock selection to be the main driver of performance, rather than any particular theme or investment style.

Early in the review period, we initiated a number of new positions including Mineral Resources, Infosys and China Tower. In addition to iron-ore, Australian mining company Mineral Resources also owns and operates lithium mines in Western Australia. Currently, there is an increasing demand for electric vehicles (EV) and energy storage systems using lithium-ion batteries. We believe there might be a bottleneck in the EV industry for lithium and therefore, the company offers the prospect of high returns on invested capital over the medium term. We used weakness in the share price to buy into the company.

We also initiated holdings in Indian banks, Bandhan Bank and HDFC Bank (our fifth-largest holding), WH Group, the world's largest pork producer, clothing manufacturer Crystal International and BYD, a manufacturer of electric and hybrid vehicles. The

# Investment review

company is currently leading in EV battery technology. Other names included LG Chemical and Venture Corporation.

We exited a number of positions, notably in China Construction Bank, Tech Mahindra, Indian plastic company Supreme Industries, electronics company VTech and Brambles. We exited Australian logistic business Brambles after some good performance.

## Outlook

Despite considerable intra-quarter volatility, Asian markets ended the first quarter of 2024 modestly higher. Arguably, the greatest source of political uncertainty for the region in 2024 comes from the US Presidential election. A change of president in the Oval Office could make Asian exporters vulnerable to new or higher tariffs on their operations. That said, the region has become more resilient since Donald Trump's 2016 victory – regional trade practices and operations have evolved and companies have been diversifying activities away from China to mitigate risk. Indeed, the exporters we own in the portfolio have been carefully picked so that they are less vulnerable to new or higher tariffs on their operations.

## David Perrett

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch <sup>a</sup> % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class
<b>Euro</b>						
Class 'A' Accumulation	+5.7	+2.2	+4.7	+7.7	28.11.01	26.10.18
Class 'C' Accumulation	+6.5	+3.0	+5.5	+8.4	28.11.01	26.10.18
Class 'CI' Accumulation	+6.6	+3.0	+5.5	+8.4	28.11.01	06.11.18
<b>US dollar</b>						
Class 'A' Accumulation	+4.9	-0.6	+3.8	+8.0	19.12.08	26.10.18
Class 'C' Accumulation	+6.4	+0.4	+4.8	+8.9	19.12.08	26.10.18

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Asian Fund, which includes UK taxes but excludes entry and exit charges. The M&G Asian Fund is a UK authorised sub-fund which launched on 14 September 1973 and its non-Sterling share classes merged into M&G (Lux) Asian Fund on 26 October 2018.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equity markets generally performed strongly in the period under review. This was due to a combination of factors, including economic growth, signs of easing inflation and hopes of impending interest rate cuts.

Fears that interest rates would remain higher for longer in the autumn and ongoing geopolitical issues all triggered dips in market performance during the course of the period. However, share prices jumped in December after the Fed indicated that rate cuts were likely in 2024.

The tech sector played a crucial role in buoying equity markets. In 2023, the 'Magnificent Seven' mega cap tech stocks delivered exponential returns, largely due to excitement about AI. Some of the big tech names continued to perform well into the first quarter of 2024: NVIDIA's shares soared in February after the company released an exceptional earnings report, further stoking investor enthusiasm about artificial intelligence (AI).

Against this backdrop, the sub-fund delivered a positive return, but underperformed its benchmark, the MSCI World Net Return Index, which returned 25.11% (in US dollars) and 25.86% (in euros) over the period. The sub-fund's above-benchmark position in healthcare and lack of exposure to technology proved detrimental to relative performance. Stock picking in healthcare also dented relative returns. In contrast, stock picking in materials, consumer staples and industrials boosted relative performance.

Key detractors from relative performance included gene-sequencing company Illumina, laboratory operator Quest Diagnostics and medical equipment manufacturer Thermo Fisher. In the period under review, Illumina continued to be plagued by issues connected to its acquisition of cancer-screening start-up Grail.

The top contributors to relative performance were Novo Nordisk and Ecolab. Novo Nordisk has become one of Europe's most valuable companies following

exponential demand for its weight-loss drug, Wegovy and diabetes medication, Ozempic.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the course of the period, the sub-fund opened a position in pharmaceutical and laboratory equipment manufacturer Sartorius Stedim. In our view, Sartorius Stedim is one of the highest-quality business models in the healthcare sector.

We closed our position in Marlowe during the period. Marlowe is a roll-up of business-to-business safety, risk and compliance services. Changes in the debt capital markets led us to believe the roll-up model would be increasingly tested.

### ESG engagements

We met Danish pharmaceutical company ALK-Abelló to ensure it was on track to have its near-term climate goals validated by the Science Based Targets initiative (SBTi). We suggested that the business disclose its strategy for achieving these targets and that variable remuneration be tied into milestones. The company confirmed that it was at the last stage of the finalisation process for its 2030 target; this will then need approval from the board before being submitted to the SBTi. The company is seeking to simplify its non-financial remuneration KPIs; in doing so, it will consider embedding climate targets into this KPI framework.

We liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI).

Last year, we met Oxford Nanopore to verify whether it had effective policies and procedures in place to avoid misuse of its equipment, particularly in China and Tibet. In early 2024, we followed up on this meeting. We asked the company to release a public statement about where it will not sell its products and also suggested

# Investment review

that the business provide further training to its operations staff to clearly explain why sales restrictions are in place. We believe this would lead to better enforcement.

## Outlook

For the first year since the pandemic, COVID-19-related revenues will be negligible for the healthcare industry in 2024. However, the impact of the pandemic continues to unwind in a few ways. We expect the inventory destocking cycle in the life science and tools sector to conclude in the coming quarters. The biotech funding landscape is gaining momentum after some of the toughest conditions in decades. Meanwhile, healthcare systems continue to work through record patient backlogs.

As exemplified by our investment in Sartorius Stedim, we try to take advantage of cyclical or short-term opportunities where a business becomes available at a price below our estimate of its intrinsic value. We continue to believe in the long-term outlook for winners such as Novo Nordisk, but also prudently trim holdings as valuations bake in more future success. We are comfortable with the concentrated nature of the portfolio and remain confident in the high quality of the companies in which we invest.

## Jasveet Brar

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equity markets generally performed strongly in the period under review. This was due to a combination of factors, including economic growth, signs of easing inflation and hopes of impending interest rate cuts.

Fears that interest rates would remain higher for longer in the autumn and ongoing geopolitical issues all triggered dips in market performance during the course of the period. However, share prices jumped in December after the Fed indicated that rate cuts were likely in 2024.

The tech sector played a crucial role in buoying equity markets. In 2023, the 'Magnificent Seven' mega cap tech stocks delivered exponential returns, largely due to excitement about artificial intelligence (AI). Some of the big tech names continued to perform well into the first quarter of 2024: NVIDIA's shares soared in February after the company released an exceptional earnings report, further stoking investor enthusiasm about AI.

Against this backdrop, the sub-fund delivered a positive return but lagged its benchmark the MSCI World Net Return Index which returned 25.86% (in euros), 22.45% (in sterling) and 25.11% (in US dollars). Stock selection in technology, industrials and utilities proved particularly detrimental to relative returns. The sub-fund's above-benchmark position in utilities and materials also had a negative impact on relative performance. In contrast, stock picking in materials boosted relative returns, as did the sub-fund's lack of exposure to healthcare.

Key detractors from relative performance included SolarEdge, Ceres Power and Enphase Energy. The poor share price performance of both SolarEdge and Enphase Energy reflects a beleaguered solar market. High interest rates (dampening demand for solar projects) and reduced incentives in California have dented the solar industry.

The top contributors to relative performance were Trex and Horiba. The former manufactures wood-alternative

outdoor living products while the latter makes precision instruments for analysis and measurement.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We made a number of changes to the portfolio during the period, opening positions in Elia Group, Kurita Water, Trimble, Intertek, American Water Works, Synopsys and Verbund. Kurita provides water treatment systems to process industries. It has laid out four quantifiable impact goals that it aims to achieve by the end of 2028. These pertain to water wastage, water intensity, customer CO2 emissions and the reach of its business. As a provider of assurance, testing, inspection and certification (ATIC) services, Intertek helps to certify processes in areas such as biodegradability of packaging, biofuel testing, wastewater management, air quality and emissions. It also provides branded Sustainability Certification. American Water Works has a high-quality, growing asset base which is helping to improve the residential water system in the US. Meanwhile, Synopsys is a leading provider of design tools for semiconductor chips, including tools to optimise the energy efficiency of chips.

We sold our positions in Brookfield Renewables, Rockwool, Atlantica Sustainable Infrastructure, Weyerhaeuser, UniFirst and Boralex. Brookfield announced the acquisition of Westinghouse, a supplier of tech, services and products to the nuclear industry. We viewed Westinghouse as in breach of the sub-fund's exclusion on companies involved in nuclear-based power generation and therefore exited our position in Brookfield. Recent results from UniFirst have raised questions about its business model, leading us to look for opportunities elsewhere in the clean technology space.

### Engagement activities

During the course of the period, we engaged with a number of companies on environmental, social and governance issues. We met German industrial gases company Linde to encourage it to publish a Scope

# Investment review

3 inventory, particularly in relation to use of its products. We also urged the company to publish Scope 3 reduction targets. We further discussed calculation of its Scope 4 emissions and suggested that it disclose how its capex aligns with its carbon reduction strategy. The company has now published a Scope 3 inventory, with targets to follow. On the governance side, we recommended that Linde increase female representation at board level.

We also encouraged US-listed online marketplace eBay to more explicitly link remuneration KPIs to sustainability targets. In response to our suggestion that it set a net zero target, the company confirmed that it would be doing so and that it planned to seek SBTi validation for this.

We discussed two key issues with Johnson Controls. The first pertained to a cyberattack carried out on the company last year. In light of this, we wanted to ensure that the business had implemented the requisite systems, controls and procedures to limit damage in case of any future attack. Secondly, we wished to verify that the company was no longer exposed to perfluoroalkyl and polyfluoroalkyl substances (PFAS), often termed 'forever chemicals'.

The company asserted that the cyberattack prompted it to review and strengthen its risk mitigation strategy. It has also hired a new chief information officer and chief technology officer, further bolstering cybersecurity at the business.

Unfortunately, Johnson Controls is currently the subject of a class action connected to PFAS contamination. The action relates to a product whose chemical composition had been mandated by the US government. The company confirmed that is now selling a compliant version of the product and that nothing else that it sells contains PFAS.

## Outlook

Clean technology shares have traced the shape of the theoretical 'Gartner hype cycle' fairly closely over the past few years, with forward indicators now suggesting a more stable and lucrative period ahead. The years 2020-21 marked the 'peak of inflated expectations' with

equity markets expecting aggressive growth rates to last in perpetuity, supported by blockbuster policy announcements (such as the US Inflation Reduction Act) and a low global interest rate regime.

More recently, 2022-23 has corresponded to the 'trough of disillusionment': higher interest rates impacted both equity valuations and end-demand for consumer products such as solar panels, leading to widespread destocking and questions about the pace of the energy transition as a whole. We see growing evidence that this period of uncertainty is coming to an end and that we are about to embark on a multi-year upcycle in many clean technology end-markets.

Firstly, the headline policy measures are now solidifying. Secondly, destocking is coming to an end and lead indicators in areas such as US residential solar and European EV charging show that demand is clearly improving. Finally, consumer-financing costs are likely to ease as central bank rate cuts come through.

## Michael Rae

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equity markets generally performed strongly during the period under review. This was due to a combination of factors, including economic growth, signs of easing inflation and hopes of impending interest rate cuts.

Fears that interest rates would remain higher for longer in the autumn of 2023 and ongoing geopolitical issues all triggered dips in market performance during the course of the period. However, share prices jumped in December after the Fed indicated that rate cuts were likely in 2024.

The tech sector played a crucial role in buoying equity markets. In 2023, the 'Magnificent Seven' mega cap tech stocks delivered exponential returns, largely due to excitement about AI. Some of the big tech names continued to perform well into the first quarter of 2024: NVIDIA's shares soared in February after the company released an exceptional earnings report, further stoking investor enthusiasm about artificial intelligence (AI).

Against this backdrop, the M&G (Lux) Diversity and Inclusion Fund delivered a positive return, but lagged its benchmark, the MSCI ACWI Net Return Index, which returned 23.95% (in euros) and 23.22% (in US dollars). Stock selection in technology, consumer discretionary and healthcare proved particularly detrimental to relative returns. The sub-fund's below-benchmark position in technology also dented relative performance. In contrast, stock picking in consumer staples and industrials boosted relative returns, as did the sub-fund's lack of exposure to materials.

Key detractors from relative performance were HDFC Bank, Pets at Home and Illumina. Two announcements from the Competition and Markets Authority (CMA) contributed to Pets at Home's poor share price performance over the period. In September, the CMA announced a review of veterinary service fees while in March it initiated a formal investigation into the

veterinary industry. One of the CMA's key concerns is that customers are paying too much for treatment.

The top contributors to relative performance were Bank of Georgia, MSA Safety and Schneider Electric. In February, Bank of Georgia's share price rose after it announced its intention to acquire Armenian bank, Ameriabank.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the period under review, we opened a position in Bank Rakyat Indonesia. Bank Rakyat promotes financial inclusion, primarily by providing microlending services to underserved communities. We also opened positions in technology conglomerate Siemens and German semiconductor manufacturer Infineon.

### ESG engagements

In light of the merger between Indian mortgage provider HDFC and HDFC Bank, we sought to confirm that the newly formed entity would continue to pursue existing climate pledges. We liaised with HDFC Bank, asking for information on a range of issues including the group's climate strategy, its commitment to publishing science-based targets and its lending policies for different sectors. The bank confirmed that the new entity will work towards net zero. Science-based targets will be contemplated once net zero targets have been implemented.

We suggested that Katitas set more ambitious climate goals: we proposed that it set absolute reduction targets and Scope 3 targets (after it has calculated its Scope 3 emissions). We further asked the company to have these targets validated by the Science Based Targets initiative (SBTi). The company confirmed that it is working with an external consultant to work out its Scope 3 emissions and expects to complete the process by 2025.

We met UK retailer WH Smith to ask it to publish milestones in its roadmap for achieving emission reduction targets. We asked it to tie some executive

# Investment review

remuneration into reaching these milestones. We also reiterated our suggestion that its workforce be paid in line with the real living wage. We believe this would act as a retention mechanism.

## Outlook

We continue to invest in high-quality businesses with solid moats. These companies' pricing power, competitive advantages and defensive business models put them in a strong position amid a subdued macroeconomic backdrop and market uncertainty in 2024. Even for portfolios with limited turnover, like ours, market volatility has offered opportunities to initiate new positions in attractive impactful or sustainability companies; this has further enhanced diversification and balance within the diversity and inclusion portfolio.

We remain confident in the quality of the companies in which we invest and continue to be optimistic about their ability to generate long-term value, while also investing in companies that have demonstrable gender and/or ethnic diversity, or which facilitate social equality.

## Thembeke Stemela

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

The M&G (Lux) Dynamic Allocation Fund delivered a positive total return (the combination of capital growth and income) across all its share classes.

The sub-fund is actively managed and has no benchmark. Investors can assess the performance of the sub-fund by its objective to provide a combination of capital growth and income of 5-10% on average per year over any 3-year period.

The 12-month period under review saw strong gains for stockmarkets around the world, particularly in the second half. Investor sentiment was bolstered by the easing of inflationary pressures, optimism about forthcoming rate cuts by central banks and a potential economic 'soft landing'. The technology sector performed very strongly, with companies seen as beneficiaries of the growth in artificial intelligence the standout performers.

Within fixed income, shorter-dated developed market sovereign bonds, generally delivered a small positive total return, but performance of long-dated bonds (particularly in the UK and US) was held back a little, by fears interest rates would stay 'higher for longer'.

Elsewhere, emerging market sovereign bonds (particularly hard currency) and investment grade and high yield corporate bonds recorded stronger gains. In general, these bonds benefited from their higher yields, a tightening of spreads and lower duration versus government bonds.

The sub-fund posted a positive total return (the combination of capital growth and income) in the reporting period. Equities drove the positive performance, led by holdings in Europe and Japan and a basket of bank shares. Shares in miners and a short position in the S&P 500 Index weighed on performance.

Holdings in emerging market sovereign bonds and corporate bonds were also profitable. Within developed market government bonds, UK gilts aided performance

but US Treasuries were a drag on returns. Cash holdings also contributed to returns.

### Investment activities

Early in the review period, we added exposure to 10-year UK government bonds. In our view, price weakness had presented an attractive entry point, enabling us to adjust our duration towards neutral and diversify away from US Treasuries. We also sold an M&G (Lux) Emerging Markets Hard Currency Bond Fund, freeing up capacity to invest in other sub-funds.

In July 2023, we reduced holdings in US bank stocks and increased exposure to long-dated US government bonds. This reversed a trade initiated in March, since when, bank equity had markedly outperformed Treasuries. Later, we further reduced the focus on financials by selling our Japanese banks, again reinvesting the proceeds in long-dated Treasuries. At the same time we also slightly increased short exposure to the US stockmarket as we felt it remained overvalued to other markets.

In October 2023, given the uncertainty in markets at the time, we reduced portfolio risk by decreasing the allocation to equities and increasing bonds. We closed our position in Taiwan, trimmed Germany and increased short exposure to the US. We reinvested the proceeds in long-dated UK government bonds. After a pronounced sell-off, gilts seemed to offer a good yield and potential diversification in the event of negative economic news. Later in the fourth quarter, after the dramatic rally in bond markets, we trimmed our holdings of long-dated US Treasuries, to reduce the US dollar concentration at the long end of our bond position.

In early 2024, we increased the sub-fund's exposure to Chinese equities, by adding to holdings in China H-shares and Hong Kong equities. Very negative investor sentiment had driven valuations to historically attractive levels, which were not necessarily justified by fundamentals in our view.

# Investment review

## Outlook

Central banks seem broadly comfortable with the path of inflation, but don't want to cut while economic growth remains strong. Bond markets now appear to have priced in a significant portion of this and we believe offer attractive real yields and potential diversification, if growth falters.

Equity valuations look demanding in places (most notably the US), but do not seem detached from earnings. We continue to prefer areas with lower valuations and a higher margin of safety. Europe has been a standout performer year-to-date but continues to look attractive on a global basis.

## Craig Moran and Steven Andrew

Co-sub-fund managers

Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

State Street Bank and Trust Company	0	335	0	0
State Street Bank and Trust Company, London Branch	0	232	0	0
UBS AG London	0	222	0	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

# Investment review

## For the year ended 31 March 2024

### Performance review

Emerging market (EM) debt posted solid returns during the review period, largely due to a powerful year-end rally in the fourth quarter of 2023 amid market expectations of interest rate cuts in developed markets (DM).

EMs, however, continue to be ahead of DM central banks in terms of their monetary easing cycle. After increasing their interest rates early to combat inflation, well ahead of their DM peers, EMs have embarked on reducing interest rates, and in some cases, quite aggressively.

Despite markets scaling back their expectations for rate cuts in 2024 of late, EM debt, notably the hard currency segment, recovered amid a broad risk-on environment. High yield (HY) bonds outperformed investment grade markets. The 2024 year-to-date performance of local currency segment has lagged hard currency, being held back by a strengthening US dollar. Notwithstanding this, local currency outperformed for much of 2023.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of its benchmark across most of its share classes in the period under review. The sub-fund's benchmark is a composite index consisting of 1/3 JPM Emerging Markets Bond (EMBI) Global Diversified Index, 1/3 JPM Corporate EMBI (CEMBI) Broad Diversified Index, and 1/3 JPM GBI-EM Global Diversified Index. The benchmark returned 9.12% in euros and 8.47% in US dollars over the review period.

The sub-fund's credit and yield curve positioning contributed positively. While favourable country allocation was the main driver of outperformance, this was partially offset by deduction from security selection. Our currency exposure also marginally contributed to performance.

Our above-benchmark exposure, and security selection, in Argentina and the Dominican Republic added the most value as did our last remaining exposure to Russia which we fully sold down in the latter stages of the

reporting period. Conversely, our underweights to Chile, the Philippines and Thailand detracted from performance as did our underweights to lower rated countries such as Pakistan which rallied heavily towards the end of the reporting period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

In hard currency sovereigns, we purchased a number of new issues from Central Eastern European countries such as Romania, Serbia, and Poland. In the autumn of 2023, we participated in new offerings from quasi-sovereign entities such as DP World and First Abu Dhabi Bank. Later, we also purchased new government bonds from Paraguay, Benin, Turkey and Kenya, with the latter returning to the market after a number of years out.

In the secondary market, we added to our holdings in Colombia, Barbados, and the Dominican Republic. In Turkey, we increased exposure following positive fundamental trends post-election and a more orthodox monetary policy from the central bank. On the other hand, we de-risked, where appropriate to do so, by selling HY names such as Albania which begun to look expensive with our view not being overly bullish.

Within local currency sovereigns, we added to our holdings in Poland, Chile and Colombia but reduced our position in the Czech Republic. In March, we bought Egyptian sovereigns following a sharp devaluation in the currency and a large interest rate hike.

In corporate bonds, we bought new issues from the likes of OTP Bank, SK Telecom, Minerva and Hunt Oil. In the second half of the review period, we took some profits in HY names which had outperformed.

### Outlook

Despite some uncertainty over geopolitical risk, we feel the broader picture is still favourable for EMs in 2024. Economies have been surprisingly resilient: first adapting to high inflation post-COVID and then to higher interest rates.

## Investment review

With the Federal Reserve expected to cut interest rates in 2024, despite US inflation appearing stickier than expected, we believe there is cause for optimism in EM debt, provided the US dollar does not strengthen any further and risk aversion remains subdued.

While the double-digit returns we saw in 2023 may not be replicated again, EM debt still offers compelling opportunities, in our view, especially for investors facing reinvestment risk from short-dated bonds.

### **Claudia Calich and Charles de Quinsonas**

Co-sub-fund managers

On 1 March 2024 Charles de Quinsonas was appointed co-sub-fund manager.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

<sup>a</sup> Illiquid.

<sup>b</sup> Defaulted bond.

<sup>c</sup> Fair valued.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures	
	Forward currency contracts US\$'000	Collateral held as cash US\$'000
Citigroup Global Markets Limited	199	0
HSBC Bank Plc	0	353
National Australia Bank Ltd	2,565	0
State Street Bank and Trust Company	8	3,722
UBS AG London	234	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 17 September 2018 is that of the relevant Merged Share Class of the M&G Emerging Markets Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G Emerging Markets Bond Fund is a UK authorised sub-fund which launched on 15 October 1999 and its non-Sterling share classes merged into M&G (Lux) Emerging Markets Bond Fund on 7 December 2018.

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

Emerging market (EM) debt posted solid returns during the review period, largely due to a powerful year-end rally in the fourth quarter of 2023 amid market expectations of interest rate cuts in developed markets (DM).

EMs, however, continue to be ahead of DM central banks in terms of their monetary easing cycle. After raising interest rates early to combat inflation, well ahead of their DM peers, EM central banks have embarked on reducing interest rates, and in some cases, quite aggressively.

Despite markets scaling back their expectations for rate cuts in 2024 of late, EM debt, notably the hard currency (HC) segment, recovered amid a broad risk-on environment. High yield (HY) bonds, those rated below investment grade as they are considered to be riskier, outperformed investment grade markets which reflects the broad spread tightening seen across the market.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of the JPM EMBI Global Diversified Index across all of its share classes in the period under review. The benchmark returned 11.94% in euros and 11.28% in US dollars over the period.

The sub-fund's credit and yield curve positioning contributed positively to relative performance. While country allocation was the biggest driver of outperformance, this was partially offset by security selection.

Our above-benchmark (overweight) exposure and security selection in Argentina and Ukraine added to relative returns, as did our off-benchmark exposure to Venezuela which rallied significantly following US sanctions being lifted. Conversely, our underweights in Pakistan, Chile and Peru detracted the most with the former rallying heavily towards the end of the year.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

There were no major changes to the sub-fund's positioning during the period, with HC bonds making up around 95% of assets. We maintained an overweight exposure to the high yield portion of the HC segment. The sub-fund also has a small off-benchmark exposure to local currency bonds.

In HC sovereigns, we started the period by participating in new US dollar-denominated issues from Mauritius Commercial bank and Magyar Export-Import Bank. In 2024, there was a noticeable pickup in primary market activity and we participated in new sovereign issues from several countries including Panama, Serbia and Suriname.

In the secondary market, we added to our holdings in the Dominican Republic, Jamaica and Suriname. We also increased our holdings in off-benchmark euro-denominated bonds from Romania and Serbia. In August, we re-established a position in Montenegro following signs of a more positive outlook for the country. In contrast, we reduced exposure to Guatemala and closed our position in Pakistan earlier in reporting period.

In corporate bonds, we bought new issues including Energean, Dar Al Arkan, Ecopetrol, Anglo American and SK Hynix. In the secondary market, we added to our holdings in companies such as Minerva, WE Soda and Turkish banks. Towards the end of the review period, we reduced credit risk by selling HY names which had performed well recently, such as Mexican cement producer Cemex.

As part of our off-benchmark exposure to local currency bonds, we added Egyptian bonds following the recent devaluation in the currency.

### Outlook

Despite some uncertainty over geopolitical risk, we feel the broader picture is still favourable for EMs in 2024. Economies have been surprisingly resilient: first

## Investment review

adapting to high inflation post-COVID and then to higher interest rates.

With the Federal Reserve expected to cut interest rates in 2024, despite US inflation appearing stickier than expected, we believe there is cause for optimism in EM debt, provided the US dollar does not strengthen any further and risk aversion remains subdued.

While the double-digit returns we saw in 2023 may not be replicated again, EM debt still offers compelling opportunities, in our view, especially for investors facing reinvestment risk from short-dated bonds.

### **Claudia Calich and Charles de Quinsonas**

Co-sub-fund managers

On 1 March 2024 Charles de Quinsonas was appointed co-sub-fund manager.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

<sup>a</sup> Defaulted bond.

<sup>b</sup> Fair valued.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures
	Forward currency contracts US\$'000
Barclays Bank London	2
National Australia Bank Ltd	93
State Street Bank and Trust Company	1

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>

## For the year ended 31 March 2024

### Performance review

The period under review can be broken into three main phases for the sub-fund: an initial stage of relative calm in markets from the start of the period until the summer, a bout of episodic volatility emerging from bond markets in the second half of 2023, and an episode in Chinese equity markets in the early months of 2024. 'Episodes' are typically phases of excess volatility in markets which create opportunities for the strategy to buy into panic or sell into complacency.

The sub-fund was patiently positioned in the initial phase, generating modest positive return from a deliberately diversified portfolio. In the second phase there were initial losses at the sub-fund level as bond market weakness became extended, but adding long exposures as yields rose allowed the sub-fund to perform particularly well in the last two months of 2023. Returns in the early months of 2024 were relatively muted, with losses from long duration exposure being partially offset by gains from the portfolio's equity theme and currency positions.

The sub-fund generated a positive return over the period as a whole but underperformed the benchmark, which returned 7.91% in euros and 9.67% in US dollars over the same period. The main positive contributors were long exposures to German and emerging market government bonds added in response to the bond episode, short exposure to the euro and Japanese yen versus high carry currencies, and long exposure to banking sector equity in Europe and the US.

There were losses from long exposure to US long-dated Treasuries, and short exposure to the US equity market held as part of a relative value theme (though the contribution from that theme was positive overall). Weakness in the Turkish lira and Chilean peso also proved detrimental.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activity

The sub-fund began the period with a diversified and less aggressively positioned portfolio, reflecting an environment in which valuations appeared relatively normal and volatility was muted. Modest long exposure to US long dated Treasuries was held alongside a relative value equity theme made up of short exposure to the US market against long exposure elsewhere, and a currency basket reflecting a preference for diversified high carry currencies versus short exposure to low carry counterparts.

From the summer onward the main shift in the portfolio was increasing long duration exposure as the bond sell intensified. Long bond exposures were increased and diversified across regions and across the curve. Long duration in portfolio reached a peak exposure of 14 years in early November. As yields subsequently declined sharply, duration was reduced later in November 2023, while emerging market bond positions would be closed in March 2024 following some strong gains. The sub-fund finished the period with duration close to 7 years.

At the same time as bond duration had been increased in early November, the portfolio had moved to a net long position in aggregate equity, while retaining short exposure to the US. This net long was increased in December, and more significantly in January, as long exposure was added to Chinese and Hong Kong equity markets following episodic declines. Following strong gains in those markets, this China theme was reduced and the portfolio ended the period with 10% long exposure to the theme.

Exposure to a currency carry basket was held throughout the period but was reduced and rebalanced modestly as the carry on offer on long positions declined and short exposures such as the Yen weakened significantly. These shifts benefited the sub-fund but reduced the attractiveness of the theme from a value standpoint.

# Investment review

## Outlook

The valuation of risk assets, signs of return-seeking behaviour, and a general lack of volatility suggest that investors are far more comfortable with risk than they have been for much of the past two years. While the environment is not so extreme as to constitute a bubble, and the fundamental backdrop remains supportive, it does seem that there is very little compensation for risks of adverse scenarios.

The pricing of US and other government bonds also suggests that prevailing sentiment is unconcerned about either the risks of further increases in inflation, or a material future growth declines. In the case of the latter, the high real yields on offer at present suggest that there is scope for fixed income assets to do well should the current growth optimism be challenged.

One notable exception to this relaxed sentiment has been the Chinese equity market, which has displayed signs of panic, and provided an opportunity for the episode strategy in January 2024. After several years of extremely surprising macro and market developments, similar tactical opportunities for the sub-fund could emerge should the current consensus be shocked again.

## David Fishwick

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product

do not take into account the EU criteria for environmentally sustainable economic activities.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 26 October 2018 is that of the relevant Merged Share Class of the M&G Episode Macro Fund, which includes UK taxes but excludes entry and exit charges. The M&G Episode Macro Fund is a UK authorised sub-fund which launched on 3 June 2010 and its non-Sterling share classes merged into M&G (Lux) Episode Macro Fund on 26 October 2018.

<sup>b</sup> Not annualised.

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

The global fixed income market, including European corporate bonds, delivered solid returns in the period under review, as inflation moderated, and major central banks reached the end of their tightening cycle. European corporate bonds outperformed their US counterparts, and European high-yield issuers delivered superior returns when compared with investment grade.

Bond investor sentiment improved significantly amidst a broad market rally at the end of 2023. Indications of a dovish pivot in monetary policy from the US Federal Reserve sparked a powerful two-month rally in core government bonds, benefiting all segments of the fixed income market.

The rally in bond markets at the end of 2023 faded in the first quarter of 2024 as investors pushed back their timing for potential interest rate cuts by central banks. The European Central Bank (ECB) remained cautious regarding interest rate cuts at its March meeting. Markets are still pricing in three cuts this year, as inflation data continues to cool.

Over the review period, the sub-fund primarily held investment grade corporate bonds (86% of the sub-fund at the end of the period), which outperformed government bonds (3% of the sub-fund). The sub-fund's focus is on European corporate bonds: while marginally weaker than their UK counterparts, European corporate bonds broadly outperformed the US market in the period under review. High-yield corporate bonds brought greater returns than their investment grade counterparts.

Banks, which typically perform well in a high-interest environment, make up a significant proportion of the sub-fund's investments, followed by utilities: the largest individual issuers are French banks Crédit Agricole and Banque Federative du Crédit Mutuel. BBB was the sub-fund's largest credit rating exposure at the end of the period.

The sub-fund delivered positive returns across all share classes for the period under review and outperformed its benchmark, which returned 6.78% in euros and 4.46% in US dollars over the same period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

The sub-fund follows a dynamic, diversified investment approach, considering macroeconomic, asset, sector, geographic and stock-level factors. From 15 February 2023, the sub-fund's objective, investment policy and strategy were updated to introduce a set of environmental, social and governance (ESG) exclusions.

We continue to monitor and adjust the sub-fund's duration (a measure of its sensitivity to interest rates): at the end of the period, the sub-fund's duration was slightly longer than the benchmark, therefore slightly more sensitive to changes in interest rates.

Flows into corporate bonds have been supported by all-in yields, but at current valuations excess returns look more challenging. We continue to see some value in investment grade credit spreads at current levels, which in our view still offers sufficient compensation for the risk of default. We have increased the credit quality of the portfolio in anticipation of a deterioration in macroeconomic conditions.

Sector-wise, we are constructive on financials, structured credit and REITs on a name-by-name basis. We remain underweight consumer sensitive sectors - autos, basic industries and consumer goods - on concerns about tight spreads and consumer balance sheets deteriorating.

### Outlook

The macroeconomic environment remains supportive for European investment grade corporate bonds, in our view. Inflationary pressures are slowly easing, while economies are growing, albeit at a slower pace. Yields remain historically high and rate cuts are now expected later this year, which should be supportive for fixed income investments in general.

# Investment review

High-yield spreads remain unexciting, but yields are still attractive, in our view, with scope for absolute returns and carry. With moderate rate cuts, contained spreads and a mild default environment, the asset class could still deliver high-single-digit returns over 12 months.

## Stefan Isaacs and Matthew Russell

Co-sub-fund managers

At the start of the review period Gareth Jandrell was co-sub-fund manager. He was replaced on 1 January 2024 by Matthew Russell.

Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

<sup>a</sup> Fair valued.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures		
	Forward currency contracts €'000	Futures €'000	Collateral held as cash €'000
Bank of America Merrill Lynch	0	11	0
Barclays Bank London	2	0	800
Merrill Lynch Pierce Fenner + Smith Inc	3	0	0
State Street Bank and Trust Company	17	0	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

The global fixed income market, including European corporate bonds, delivered solid returns in the period under review, as inflation moderated, and major central banks reached the end of their tightening cycle. European corporate bonds outperformed their US counterparts, and European high-yield issuers delivered superior returns when compared with investment grade. Inflation-linked government bonds Europe ended the period in negative territory.

Over the review period, the sub-fund primarily held a range of fixed interest securities whose returns behave in a similar way to inflation. The sub-fund had a strong bias towards higher-quality investment grade issuers. Over half of the sub-fund was invested in sovereign bonds, while there was also material exposure to the banking sector and mortgage-backed securities.

The sub-fund delivered positive returns across all share classes for the period under review and outperformed its benchmark, the Eurostat Eurozone Harmonised Index of Consumer Prices, which rose by 1.85% over the same period. The sub-fund's duration positioning (a measure of the sub-fund's sensitivity to interest rates) and credit selection were the main drivers of the positive relative performance. This more than offset the negative impact of the weaker performance from our holdings in index-linked bonds.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

Early in the period, we bought some attractive new issues in the primary market, including bonds from Kraft Heinz and National Australia Bank. We also sold a well-performing US dollar bond from telecommunications group AT&T. As the period progressed, we focused on reducing credit risk and reduced exposure to some bonds we felt were trading tight compared to their fundamentals: these included Volkswagen and Bank of Nova Scotia.

Later in the period, with credit spreads tightening (meaning a smaller difference in yield between different-quality bonds of the same maturity date), we continued reducing risk. We trimmed exposure to some good performers including carmaker Volkswagen and banks Santander, Lloyds and BNP.

As eurozone inflation moves towards its 2% target, inflation-linked bonds still provide value, in our view. As well as protecting against long-term inflation risks, eurozone inflation-linked bonds are issued with a 'deflation floor' to prevent losses in the case of deflation. The floor means that, if the bond's price falls below its par value because of deflation, investors still receive the par value at maturity.

### Outlook

Inflation is on a downward trajectory, and we expect this trend to continue to slow down as the effects of restrictive monetary policy impact economic activity. That being said, we are not discounting the possibility of inflation reaccelerating again at some point, and therefore continue to monitor inflationary trends closely and retain inflation protection in the portfolio.

Looking forward, we believe that the sharp rise in interest rates will start to impact the real economy. This increases the likelihood of a consumption-led recession, which could be brought forward by an event such as stress within commercial real estate. The severity of the recession will be dictated by the resilience of the labour market, which has remained tight thus far.

### Matthew Russell and Ben Lord

Co-sub-fund managers

On 5 February 2024 Ben Lord was appointed co-sub-fund manager. Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

# Investment review

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch <sup>a</sup> % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class
<b>Euro</b>						
Class 'A' Accumulation	+4.1	+2.8	+2.3	+1.6	16.09.10	16.03.18
Class 'C' Accumulation	+4.4	+3.2	+2.8	+2.1	16.09.10	16.03.18
Class 'CI' Accumulation	+4.5	+3.2	+2.8	+2.1	16.09.10	16.03.18
<b>Swiss franc</b>						
Class 'A-H' Accumulation	+1.8	+1.7	+1.5	+0.5	28.09.12	16.03.18
Class 'C-H' Accumulation	+2.2	+2.1	+2.0	+1.0	28.09.12	16.03.18

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 16 March 2018 is that of the relevant Merged Share Class of the M&G European Inflation Linked Corporate Bond Fund, which includes UK taxes but excludes entry and exit charges. The M&G European Inflation Linked Corporate Bond Fund is a UK authorised sub-fund which launched on 16 September 2010 and its non-Sterling share classes merged into M&G (Lux) European Inflation Linked Corporate Bond Fund on 16 March 2018.

# Investment review

## For the year ended 31 March 2024

### Performance review

European shares made gains in the review period, but lagged the broader global and US indices. It was not plain sailing though, with European stocks stumbling during the first half of the period as inflation concerns lingered, prompting the European Central Bank to raise rates to a record 4%. Nevertheless, European equities made a strong recovery from November onwards as global equity markets rallied, fuelled by signs of easing inflation and a dovish pivot from the US Federal Reserve.

Value stocks performed broadly in line with the European market during the 12 months. Value stocks outperformed for a large part of 2023, supported by expectations that the economy will have to endure a 'higher-for-longer' interest rate environment, making strong balance sheets particularly important. However, value stocks lost some appeal towards the end of 2023, as hopes that interest rates have peaked prompted rotation into more growth areas of the market.

All of the sub-fund's share classes outperformed the benchmark MSCI Europe Net Return Index, which returned 14.79% in euros and 14.11% in US dollars over the period. Exposure to the consumer discretionary sector drove the outperformance mainly due to strong stock picking; a favourable below benchmark (underweight) exposure also contributed somewhat. The sub-fund's underweight and positive stock selection in consumer staples also helped relative performance, as did stock picking in utilities and industrials. Conversely, the underexposure to information technology proved to be the biggest drag on performance. Stock selection in materials and financials were also a detractor.

German defence contractor Rheinmetall was the largest contributor to sub-fund outperformance as its shares rallied, supported by increased military spending in the wake of the conflict in Ukraine. Not holding Nestlé also proved beneficial as the shares stumbled on lower-than-expected revenue growth. Our overweight in carmaker Stellantis also boosted relative returns as its

shares posted stellar performance on the back of strong sales growth.

Conversely, the sub-fund's lack of exposure to pharmaceutical group Novo Nordisk – which performed well due to the success of its weight loss drugs – hindered relative returns. Not holding ASML also detracted from relative performance, as demand for semiconductors remained robust. Our holding in French supermarket Carrefour also took from performance; its shares underperformed on a weak sales outlook.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We added a number of new positions during the 12 months, reflecting opportunities across different industries and countries. We started a new holding in Daimler Trucks – the market leader globally in heavy trucks – as the valuation opportunity arose. We also initiated a new holding in Vivendi, putting capital to work in a stable, underappreciated stock. Other additions included German affordable housing company LEG Immobilien, Nexans, Drax Group, Storebrand, Inchape, Smith & Nephew and Commerzbank. We also scaled up existing positions in lenders UBS, BNP Paribas, CaixaBank and Bank of Ireland, insurer Direct Line, oil giant Shell, Orange and pharmaceutical company AstraZeneca, among others.

Notable sales included pharmaceutical firm Novartis. We recycled the proceeds into Roche as we believe the company is more attractively valued. We also exited German chemicals and consumer group Henkel, Mobico (formerly National Express group), Haleon and NKT.

### Outlook

We remain excited about the future as the European market appears very cheap in both absolute and relative terms, in our view. We believe Europe is trading at all time discounts compared to the US (even after adjusting for sectoral differences), and within Europe itself, the value style appears to be at an all-time

# Investment review

discount to growth style. Furthermore we believe we have been able to construct a portfolio that is cheaper than the broader European market as measured by the MSCI Europe, our benchmark. In our view, we have done so without making any sacrifices on return. So far in 2024 we have already added five new names, as we see many opportunities in the market.

## Richard Halle

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

# Investment review

## For the period from 7 November 2023 (launch date of the sub-fund) to 31 March 2024

### Performance review

Inflation declined steadily during the first half of the period under review, prompting central banks to pause the cycle of interest rate rises and ultimately signal rate cuts in 2024. Investors grew optimistic about a soft landing for major economies, sparking a powerful two-month rally across most asset classes at the end of the calendar year.

Towards the end of 2023, government bond yields fell substantially, and their value rose accordingly. UK government bonds (gilts) performed particularly well. Corporate bonds also gained, and credit spreads tightened as investor confidence returned (credit spreads reflect the yield differential between a corporate bond and the corresponding government bond with the same maturity).

The rally in bond markets at the end of 2023 faded in the first quarter of 2024 as investors pushed back their timing for potential interest rate cuts by central banks. The 10-year US Treasury yield ended the period at 4.2%. The prices of 10-year German bunds and UK gilts fell as well.

Corporate bonds fared slightly better, however. Corporate bond issuance was notable with US\$606 billion worth of US dollar bonds issued during the first quarter of 2024. Within credit, high yield outperformed investment grade thanks to its lower interest rate sensitivity and easier financial conditions.

The sub-fund launched on 7 November 2023. It adopts a 'buy-and-maintain' strategy, meaning that it expects to hold to maturity the majority of the debt securities in the sub-fund. The investment process combines a value-focused approach with macroeconomic, asset-specific, sector and geographic considerations. The sub-fund holds around 73% in investment grade corporate bonds and 22% in high yields bonds.

### Outlook

We believe the macroeconomic environment remains supportive for investment grade credit. Inflationary pressures are slowly easing while economies are growing, albeit at a slower pace. Yields remain close to historically high, and rate cuts are now expected in 2024, which should be supportive for fixed income investments in general. While spreads may not appear historically attractive, we believe the positive macroeconomic environment makes this asset class appealing to investors.

In high yield, spread levels remain unexciting, but yields are still attractive, with scope for absolute returns and carry. With moderate rate cuts, contained spreads, and a mild default environment, we believe the asset class could still deliver positive returns over the next 12 months.

### Stefan Isaacs

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>					
Class 'P' Accumulation	n/a	n/a	n/a	+1.8 <sup>a</sup>	07.11.23
Class 'W' Accumulation	n/a	n/a	n/a	+1.9 <sup>a</sup>	07.11.23
Class 'WI' Accumulation	n/a	n/a	n/a	+2.0 <sup>a</sup>	07.11.23

<sup>a</sup> Not annualised.

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

### Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding as at 31.03.24	NAV per share as at 31.03.24	TER <sup>a</sup> (%) as at 31.03.24
<b>Euro</b>		€	
Class 'P' Accumulation	2,611,654.007	101.7766	0.80

Class 'WI' Accumulation	1,446,751.316	101.9505	0.36

<sup>a</sup> Includes charges from underlying investments. Please see the relevant Key Investor Information Document for a more reliable estimate of future charges (available from our website at [mandg.lu](http://mandg.lu)).

<b>NAV at sub-fund level</b>	<b>31.03.24</b> <b>€'000</b>
Net assets	434,313
Swing pricing adjustment (see note 10)	(620)
<b>Swing net assets</b>	<b>433,693</b>

# Investment review

## For the period from 27 September 2023 (launch date of the sub-fund) to 31 March 2024

### Performance review

Inflation declined steadily during the first half of the period under review, prompting central banks to pause the cycle of interest rate rises and ultimately signal rate cuts in 2024. Investors grew optimistic about a soft landing for major economies, sparking a powerful two-month rally across most asset classes at the end of the calendar year.

Towards the end of 2023, government bond yields fell substantially, and their value rose accordingly. UK government bonds (gilts) performed particularly well. Corporate bonds also gained, and credit spreads tightened as investor confidence returned (credit spreads reflect the yield differential between a corporate bond and the corresponding government bond with the same maturity, and indicate investors' appetite for risk).

The rally in bond markets at the end of 2023 faded in the first quarter of 2024 as investors pushed back their timing for potential interest rate cuts by central banks. The 10-year US Treasury yield ended the period at 4.2%. The prices of 10-year German bunds and UK gilts fell as well.

Corporate bonds fared slightly better, however. Corporate bond issuance was notable with US\$606 billion worth of US dollar bonds issued during the first quarter of 2024. Within credit, high yield outperformed investment grade thanks to its lower interest rate sensitivity and easier financial conditions.

The sub-fund launched on 27 September 2023. It adopts a 'buy-and-maintain' strategy, meaning that it expects to hold to maturity the majority of the debt securities in the sub-fund. The investment process combines a value-focused approach with macroeconomic, asset-specific, sector and geographic considerations. The sub-fund holds around 80% in investment grade corporate bonds and 20% in high yields bonds.

### Outlook

We believe the macroeconomic environment remains supportive for investment grade credit. Inflationary pressures are slowly easing while economies are growing, albeit at a slower pace. Yields remain close to historically high, and rate cuts are now expected in 2024, which should be supportive for fixed income investments in general. While spreads may not appear historically attractive, we believe the positive macroeconomic environment makes this asset class appealing to investors.

In high yield, spread levels remain unexciting but yields are still attractive with scope for absolute returns and carry. With moderate rate cuts, contained spreads, and a mild default environment, we believe the asset class could still deliver positive returns over the next 12 months.

### Wolfgang Bauer

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures	
	Forward currency contracts €'000	Collateral held as cash €'000
Citigroup Global Markets Limited	0	280
Merrill Lynch Pierce Fenner + Smith Inc	2	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>					
Class 'WI' Distribution	n/a	n/a	n/a	+4.2 <sup>a</sup>	27.09.23

<sup>a</sup> Not annualised.

# Financial highlights

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the period from 9 November 2023 (launch date of the sub-fund) to 31 March 2024

### Performance review

The period under review, from the sub-fund's launch on 9 November 2023 to 31 March 2024, saw global stockmarkets overall post strong returns. Investor sentiment was bolstered by an easing of inflationary pressures, optimism over potential interest rate cuts in 2024 by the world's major central banks and evidence of an economic 'soft landing'.

A powerful rally in stockmarkets in the final two months of 2023 continued into 2024, when the US stockmarket registered its best first quarter in five years, driven partly by the continued appetite for artificial intelligence-related stocks.

The sub-fund aims to provide a higher total return (capital growth plus income) than that of the global equity market over any 5-year period, while applying environmental, social and governance (ESG) criteria.

### Investment activities

The sub-fund managers aim to identify long-term disruptive technological innovations associated with the artificial intelligence trend in their early stages. From the sub-fund's investment universe, the managers identify investment opportunities in the following three categories:

- Artificial Intelligence Enablers – companies providing key underlying artificial intelligence (AI) technology enabling AI services. Current holdings include NVIDIA, Tokyo Electron and SK Hynix;
- Artificial Intelligence Providers – companies providing AI services and products to end users. Current holdings include Meta, Microsoft and Apple;

- Artificial Intelligence Beneficiaries – companies that are receiving meaningful benefit from their use of AI that is expected to drive valuations over the long term. Current holdings include Visa, JP Morgan and Toyota Motor.

The sub-fund may allocate to these three categories in any proportions, but does not typically expect to hold more than 50% of its net asset value in any one category. The weightings in each category currently (as at 26 March 2024) are approximately 30% in Enablers, 40% Providers and 30% Beneficiaries. The sub-fund is expected to have between 50 and 70 holdings.

In this context, artificial intelligence refers to the development or use by a business of computer systems that perform tasks previously requiring human intelligence such as decision-making or audio or visual identification or perception. The investment approach combines research and financial analysis of individual companies.

The sub-fund managers seek to identify well-managed companies whose long-term prospects are not fully appreciated by the stock market. The managers' engagement with technical experts and executive management is a key part of the investment approach.

The expected key drivers of return are: the selection of AI themes over the lifecycle of a disruptive technology, security selection, and risk sizing and managing.

### Outlook

At around 50% in terms of weighting, technology holdings represent the most significant sector in the portfolio. Within technology, around a fifth of the portfolio is made of semiconductor companies. The 'chip' sector had a stellar first quarter in 2024, driven by the secular growth for AI, as well as a recovery in other end markets. We expect this strong demand for semiconductors to continue.

While regulations, such as the EU's Artificial Intelligence Act (aimed at protecting fundamental rights, democracy, the rule of law and environmental sustainability), could be seen as limiting the growth potential of AI, we prefer to take the view that the

## Investment review

regulations are validation of the potential huge impact AI will have on the global economy. In our opinion, proactive regulation is positive for the broad adoption for AI.

In the US, we believe that the presidential election should not have a major impact on the current policy towards the semiconductor industry. Firstly, the US has already restricted access to semiconductor technology to China under both the Trump and Biden administrations. Secondly, subsidies and support for semiconductor manufacturing in the US (which has bi-partisan support), is in both the interests of national security and helps mitigate supply-chain risks.

Whilst there is the possibility of increased regulation on the wider technology sector going forward, we believe that the leading technology companies can make adjustments to satisfy regulations that are not overly burdensome and so maintain their growth potential.

### Jeffrey Lin

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Investment review

## For the year ended 31 March 2024

### Performance review

The 12-month period under review saw strong gains for stockmarkets around the world, particularly in the second half. Investor sentiment was bolstered by the easing of inflationary pressures, optimism about hoped-for cuts in interest rates by central banks and a potential economic 'soft landing'. The technology sector posted very strong returns, with companies seen as being at the forefront of the growth in artificial intelligence the standout performers.

Within fixed income, shorter-dated developed market sovereign bonds generally delivered a small positive total return, but performance of long-dated bonds (particularly in the UK and US) was held back a little by fears interest rates would stay higher for longer than previously anticipated.

Elsewhere, emerging market sovereign bonds (particularly hard currency) and investment grade and high yield corporate bonds recorded stronger gains. In general, these bonds benefited from their higher yields, a tightening of credit spreads – which indicates increased investor appetite for risk – and having a lower duration versus government bonds.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of the Refinitiv Global Focus Convertible Index across some of its share classes in the period under review. The index returned 6.51% in euro terms and the hedged index returned 7.91% in US dollar terms over the same period.

Relative performance was supported by holdings in convertibles issued by Bharti Airtel, Uber Technologies and Cyber Ark Software; an equity holding in Uber also added value. Profit at India-based telecommunications services company Bharti Airtel is benefiting from strong growth in its 5G network. Uber, a platform that connects consumers with providers of ride and delivery services, reported its first annual profit, which sent its shares and convertible bond higher. Cyber Ark was a

beneficiary of the rally in technology shares on the back of AI (artificial intelligence) euphoria.

Conversely, holdings in convertibles issued by Jazz Pharmaceuticals, H World and technology company ST Microelectronics held back relative returns. Disappointing financial results weighed on convertibles from Jazz Pharmaceuticals, whilst H World underperformed in common with other Chinese stocks, as the slowing Chinese economy weighed on sentiment.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We were active in adjusting the positioning of the portfolio, buying what we believed were attractively priced convertibles while reducing or selling those that no longer satisfied our selection criteria.

In April, we invested in a new convertible from SK Hynix, a South Korean semiconductor manufacturer, where we felt both the convertible and underlying equity were better value than STMicroelectronics convertibles. Accordingly we sold one of our STM convertible positions.

At the start of the second half of 2023, we bought a convertible from SolarEdge Technologies, after the underperformance of renewable energy made the shares look better value to us. We also bought a new convertible from Italian oil services group Saipem.

In September, we invested in four recently-issued US convertibles, from data storage provider Seagate Technologies, precision power equipment supplier Advanced Energy Industries, medical device manufacturer Shockwave Medical and Amphastar Pharmaceuticals. To make room for these, we disposed of convertibles from Qiagen, ESR, Snap, Airbnb, Nova and ON Semiconductor.

Later, we sold an equity stake in Palo Alto Networks after strong performance and bought three new, in our opinion attractively priced issues – from Uber and Spirit Aerosystems and an existing issue from Lenovo.

# Investment review

We also sold an equity holding in Airbnb, taking advantage of a significant rally in its share price and began a holding in a convertible from Merit Medical Systems. In addition, we closed the sub-fund's positions in bonds exchangeable into Mercedes and Siemens.

In the latter stages of the review period, we closed the sub-fund's positions in convertibles issued by FEMSA and Winnebago. We also switched out of a convertible issued by Lyft, into another issued by the US ride-hailing company, but with a longer maturity and lower strike price.

## Outlook

Central banks seem broadly comfortable with the path of inflation, but don't want to cut interest rates while economic growth remains strong. Bond markets now appear to have priced in a significant portion of this and we believe offer attractive real yields and potential diversification, if growth falters.

Equity valuations look demanding in places (most notably the US), but do not seem detached from earnings. We continue to prefer areas with lower valuations and a higher margin of safety. Europe has been a standout performer year-to-date, but continues to look attractive on a global basis.

## Léonard Vinville

Sub-fund manager

Investment review information as at 31 March 2024.

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 9 November 2018 is that of the relevant Merged Share Class of the M&G Global Convertibles Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Convertibles Fund is a UK authorised sub-fund which launched on 13 July 2007 and its non-Sterling share classes merged into M&G (Lux) Global Convertibles Fund on 7 December 2018.

# Investment review

## For the year ended 31 March 2024

### Performance review

Overall, it was a positive period for global bond markets, as inflation moderated and major central banks reached the end of their tightening cycles. Sentiment improved significantly amid a broad market rally at the end of 2023. Indications of a dovish pivot in monetary policy from the US Federal Reserve sparked a powerful two-month rally in core government bonds, benefiting all segments of the fixed income market. The start of 2024 has been more challenging for bonds, as the strength of the US economy, coupled with hot inflation, resulted in investors dialling back expectations for the number of interest rate cuts this year.

Against this backdrop, the sub-fund delivered strong positive returns but underperformed its benchmark, the Bloomberg Global Aggregate Corporate Bond Index, which returned 3.76% in euros and 5.89% in US dollars. The main negative detractor from performance was asset allocation, with the sub-fund's lack of exposure to energy and real estate and underweight in telecoms being laggards for the sub-fund. On a more positive note, security selection supported performance, with tobacco names BAT Industries and Philip Morris delivering strong returns. Duration positioning was also a positive contributor.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the summer of 2023, we started to sell 10-year corporate bonds and move into 5-year bonds, where better yields were on offer. We had been long in corporate credit versus the index in the 10-year space for some time, so it felt prudent to reduce this 10-year above benchmark (overweight) position and to close out a longstanding below benchmark (underweight) in 5-year corporates.

In the autumn, we continued to reduce risk at the sub-fund level, including selling some tier 2 bonds during September and buying into new selected new issues

where pricing was favourable. Our preference was the 3–5-year part of the curve.

At the start of 2024, we added to our credit exposure given heavy issuance and attractive new issue premiums on offer. The US dollar and sterling markets were at historic tightness, so we reduced exposure and remained underweight, given that coupons did not adequately compensate investors for the risk. We continued to invest in banks and utilities where valuations were relatively more attractive.

Towards the end of the period under review, we moved US dollar duration back to neutral and increased euro and sterling duration. The US dollar has been exceptionally strong and so expectations for rate cuts are being pushed out. We feel that the Bank of England and European Central Bank may well cut rates first, and want to be in a position to benefit should this scenario materialise.

### Outlook

Looking ahead, we think the main opportunity remains in duration and we retain a long position here. We believe that the more likely scenario for this year is not a soft landing, but a slowdown followed by central banks cutting interest rates. Therefore, we want to be exposed to government bonds that have longer duration, which we would expect to perform well in such a scenario. We continue to favour the front end of the yield curve, with the 2–10-year part of the curve the focus of our attention. This is the case in all regions and is true in terms of both government yields and credit spreads.

### Ben Lord and Mario Eisenegger

Co-sub-fund managers

On 1 January 2024 Mario Eisenegger was appointed co-sub-fund manager. Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

# Investment review

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures			
	Swaps US\$'000	Forward currency contracts US\$'000	Futures US\$'000	Collateral held as cash US\$'000
Bank of America Merrill Lynch	0	0	130	0
Barclays Bank London	171	0	0	3,220
BNP Paribas	10	0	0	0
Citigroup Global Markets Limited	0	3	0	0
Goldman Sachs International	0	6	0	0
Merrill Lynch Pierce Fenner + Smith Inc	0	13	0	0
Standard Chartered Bank	0	220	0	0
State Street Bank and Trust Company	0	2	0	0
UBS AG London	0	120	0	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch <sup>a</sup> % pa	Launch date of the OEIC merged share class	Launch date of the sub-fund share class

# Investment review

## For the year ended 31 March 2024

### Performance review

The sub-fund underperformed the MSCI ACWI Net Return Index, which returned 23.95% in euros and 23.22% in US dollars. Not owning NVIDIA, whose share price tripled during the 12 months under review, provided the biggest drag on performance relative to the benchmark. We see more attractively valued opportunities elsewhere in the technology sector.

Sector allocation detracted, not helped by an overweight position in materials. Methanex, a methanol producer, moved sideways in a rising market. We are optimistic about the prospects for cash generation against a backdrop of strong methanol prices and the stock remains a core holding. Trinseo declined due to concerns about balance sheet risk, having missed the opportunity to sell a business before the operating environment turned sour. The specialty materials company secured a refinancing deal in September, but this positive development was unable to improve sentiment. We continue to believe that the shares are significantly undervalued.

abrdn and VF Corp led the laggards in financials and consumer discretionary, respectively, as both companies faced tough trading conditions. Takeda Pharmaceutical and Bristol Myers Squibb drifted lower in an out-of-favour healthcare sector.

Stock selection added value in technology, with the strongest contribution from Broadcom. The semiconductor stock doubled as a potential beneficiary of the structural growth in artificial intelligence (AI). Microsoft also delivered impressive gains.

Pandora rallied strongly as the Danish jewellery company demonstrated consistency in its profitable growth strategy, while Lundin Mining gathered momentum towards the end of the review period with the tailwind of a higher copper price.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

The sub-fund's weighting in financials increased with two new holdings: NN Group, a Dutch life insurer, and CME Group, the owner and operator of derivatives exchanges. In Asia, we continued to build our position in DBS Group, the Singaporean bank, and sold AIA Group, the Hong Kong-based insurer. We also reduced JPMorgan Chase in US banks.

The sub-fund gained exposure to utilities after we bought NextEra Energy. The US company, which claims to be the world's largest generator of renewable energy by way of wind and solar, plays a pivotal role in the energy transition, and a period of extreme weakness triggered by concerns about interest-rate sensitivity provided an attractive entry point.

We bought Meta Platforms after the owner of Facebook announced its maiden dividend. We believe that the strong momentum in operating performance can continue and support a rapidly rising dividend, a scenario which is not adequately reflected in an undemanding valuation, in our view. We reduced Microsoft and Broadcom into strength to manage their position size. We also sold KLA Corp and ASML after the semiconductor stocks rallied strongly.

Home Depot, the best-in-class operator in the US home improvement market, was the final purchase during the review period. We are optimistic about the prospect of continued market share gains in a large and fragmented industry. Elsewhere in consumer discretionary, we bought more VF Corp on weakness and sold Adidas into strength.

The sub-fund's energy exposure increased as we added to Keyera. We sold our legacy holding in Prosafe, which accounted for a negligible part of the portfolio. We also exited ABB and Accelleron Industries in industrials.

Unilever and Colgate-Palmolive provided a source of cash in consumer staples. In healthcare, we sold Novartis and bought more Roche and Bristol Myers.

### Outlook

We remain resolutely focused on dividend growth as a compelling strategy over the long term, without losing

# Investment review

sight of the reality that the global economy faces challenging times ahead. Dividend cuts will be inevitable for companies not equipped with the financial armoury to withstand a cyclical downturn. Balance sheet strength is a key consideration in our company research to ensure that dividends are sustainable in the current climate. We take comfort from the fact that many of our holdings are carrying net cash.

Despite the macroeconomic uncertainties in the short term, we are excited by the long-term opportunities being presented by a polarised market. The negative sentiment towards some areas is creating attractive entry points, in our view, for some world class companies with rock-solid balance sheets and excellent long-term growth potential. Being selective will be paramount. Capitalising on these opportunities will ultimately determine performance in the years to come and we remain optimistic about the future.

## Stuart Rhodes

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Emerging market equities recorded a positive return in US dollar terms over the past 12 months. Concerns over the health of the Chinese economy, along with sentiment over the direction of developed market interest rates, hindered performance before the rebound towards the end of 2023. Slowing inflation in core economies, combined with dovish rhetoric from the US Federal Reserve (Fed), fuelled hopes that global interest rates may have reached their peak. More recently, however, investors scaled back hopes of imminent rate cuts following robust economic growth in the US.

Overall, emerging market stocks lagged their developed market peers, held back by the underperformance of China. While this impacted the likes of Thailand and Malaysia, some of the other Asian markets delivered solid returns on their exposure to technology stocks. Turkey was a standout performer over the review period, as markets welcomed the apparent return of monetary policy orthodoxy. In Latin America, some markets posted strong gains, particularly shares in Argentina which responded positively to the election of Javier Milei as president.

Against this backdrop, the sub-fund finished ahead of the benchmark over the period, which returned 8.80% in euros and 8.15% in US dollars. Our overweight position and favourable stock selection in South Korea were key drivers of the outperformance. Stock picking in China also added value, as did our underweight exposure to the country. The sale of Russian retailer X5 (which had been written down to zero), also contributed to relative returns.

By contrast, the below-benchmark exposure to the strongly performing Indian market was a detractor. At the sector level, consumer staples was most beneficial for relative returns mainly due to stock selection. Stock picking in financials was the main laggard.

Lack of exposure to select Chinese stocks dominated relative performance. For instance, zero-weights in

high-profile consumer-orientated stocks, such as Tencent and Meituan, were among the largest contributors to relative performance. By contrast, key detractors included the holding in Chinese consumer giant Alibaba Group and off-benchmark exposure to Chinese technology firm Baidu and biotech firm BeiGene. Exposure to South Korean companies boosted relative performance, with SK Square, Hana Financial and Samsung Fire & Marine Life all adding value.

### Investment activity

We took advantage of the market weakness and entered several new positions at what we felt were attractive prices. We initiated a holding in Chinese e-commerce firm JD.com, car distributor Inchcape, which has significant exposure to fast-growing developing economies and Energean, an exploration and production firm which operates major gas fields across the Mediterranean. Other sizeable new positions included miner Anglo American.

Meanwhile, we sold our positions in China Petroleum, Hollysys Automation and Chicony Electronics, among others.

### Outlook

Emerging markets have struggled more recently on disappointment that US interest rate cuts may not happen as quickly as investors had hoped. However, we remain positive on the asset class as global interest rates have more than likely peaked and we expect earnings growth to recover. The fragility of the Chinese economy has also weighed on sentiment. However, the emerging market complex as a whole remains undervalued and under-owned, which has led to attractive valuations, in our view.

Meanwhile, key geopolitical issues (Russia-Ukraine, Middle East and China-Taiwan) remain unresolved and the upcoming US elections are not helping to ease the uncertainty on this front. However, these factors are very hard to price. Rather than focus on the events specifically, we prefer to concentrate our efforts on diligently analysing companies from a bottom-up perspective and seek to take advantage of any market dislocation in valuations.

# Investment review

## Michael Bourke

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the period from 1 April 2023 until 27 July 2023

The sub-fund was closed on 27 July 2023 following investor notification.

### Fund positioning

The M&G (Lux) Global Enhanced Equity Premia Fund is an active equity sub-fund, using a dynamic multi-factor investing approach. Factor investing is based on the premise that a significant portion of returns over time can be explained by the excess return generated by stocks that reflect certain characteristics, or risk factors.

Based on analysis of simulated past returns, stocks with exposure to these risk factors (attractive valuation, high quality, positive momentum, low volatility and small company size) have historically tended to deliver superior risk-adjusted returns.

From the start of the review period to the sub-fund's closure, the sub-fund maintained an elevated exposure to the value and momentum factors (ie, above the 'typical' 20% weighting). The above-average exposure to cheap value provided a modest tailwind to the strategy, while positive exposures to high quality and low volatility detracted.

### Performance review

Stockmarkets recorded a positive return over the period up until the sub-fund's closure, benefiting from improving investor risk appetite, despite concerns that higher global interest rates (which have been raised to tame inflation) might tip some economies into recession. However, economic activity and labour markets, in particular, proved resilient during the review period.

Against this background, the sub-fund delivered a positive total return (the combination of capital growth and income) across all its share classes in all currencies between the start of the review period until 27 July 2023 when the sub-fund closed, but was behind its benchmark the MSCI ACWI Net Return Index.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

There was minimal variation in performance of the underlying factors during the review period. Value marginally outperformed, while there was some modest underperformance in the low volatility and high-quality factors. The high momentum and small size factors performed in line with the market over the period.

### Gautam Samarth

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class up to close date 27 July 2023

# Investment review

## For the year ended 31 March 2024

### Performance review

The sub-fund delivered a positive return during the review period. High-yield bonds outperformed government and investment grade, reflecting their lower sensitivity to interest rates. Central banks raised rates at the start of the period, extending a run of hikes, to fight inflation. They then held rates at elevated levels as prices cooled. Optimism about the pace of cuts faded toward the end of the period.

These macroeconomic conditions favoured floating rate notes (FRNs) as variable coupon payments offer protection against higher interest rates. Similarly, they are beneficial when there is uncertainty about how quickly rates will fall.

The sub-fund underperformed its benchmark during the review period, which returned which returned 12.27% in euros and 14.29% in US dollars. Security selection, driven by the sub-fund's defensive stance, weighed on performance. Yield curve positioning and asset allocation were beneficial.

At the sector level, avoiding banking was detrimental to relative performance, along with below benchmark positions (underweights) and security picks in financial services and transportation. Our use of high yield credit default swap indices was a boost, as were above benchmark positions (overweights) and selections in services and automotives.

SGL Group was the biggest detractor among securities. The logistics company posted a decline in full-year revenue due to lower rates and volumes. Not holding Loarre Investments, which is tied to Spanish soccer's La Liga, was also detrimental, along with an underweight position in PrestigeBidco, the parent of online fashion retailer BestSecret. Overweights in vending machine operator Selecta and German retailer HSE boosted relative performance.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

New deals that we participated in during the year included offerings by UK hotel operator Travelodge (TVL finance), chemicals maker Monitchem, and pharmaceutical companies Bormioli and Cheplapharm. We also bought into sales by software provider Cedacri, building systems installer Assemblin and UK food retailer Iceland.

A new-issue from packaging business Guala also joined the portfolio, along with notes sold by construction machinery business Kapla, telecoms provider United Group and jewellery retailer Goldstory. We also bought bonds issued by coffee-machine maker Evoca, cardboard packaging maker Reno De Medici and transport business SGL Group. Across the year, we took part in two sales by lottery operator Lottomatica and two by gaming company Cirsa.

Early in the year, we reduced exposure to debt collectors via sales in the secondary market. We later took advantage of market strength to trim holdings in online education provider Multiversity (Paganini BidCo), Evoca, UK pub chain Stonegate, Selecta and German wood products maker Pflleiderer. We pared debt collector Garfunkelux on refinancing concerns.

### Outlook

The focus in the year ahead will likely be on when central banks begin to reduce interest rates and how quickly. Expectations for rate cuts in the US have receded because of strong economic growth and slower-than-expected declines in inflation. A slower pace of rate cuts and inverted yield curves will support floating rate notes (FRNs) which will continue providing variable coupon payments.

In high-yield, all-in yields are attractive, even with tight spreads. Strong returns are possible in an environment of moderate rate cuts, contained spreads and mild defaults. Technicals are supportive with money coming into the market and light issuance. Fundamentals are also holding up, with higher quality names able to refinance. Future rate cuts could help struggling sectors, such as real estate.

## Investment review

Economic and issuer-specific risks remain, which bolsters the case for active management. We maintain a cautious stance, shunning distressed names and favouring issuers that are non-cyclical and less leveraged. We also avoid debt collectors, real estate and homebuilders on concerns about fundamentals and still-high borrowing costs.

### James Tomlins, Lu Yu and Stefan Isaacs

Co-sub-fund managers

On 5 February 2024 Lu Yu and Stefan Isaacs were appointed co-sub-fund managers.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

<sup>a</sup> Defaulted bond.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures			
	Swaps US\$'000	Forward currency contracts US\$'000	Collateral held as cash US\$'000	Collateral held as security US\$'000
Barclays Bank London	6,675	0	31,285	0
Merrill Lynch Pierce Fenner + Smith Inc	0	781	0	0
Standard Chartered Bank	0	10	0	0
State Street Bank and Trust Company	0	64	0	766
State Street Bank and Trust Company, London Branch	0	6,595	0	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 13 September 2018 is that of the relevant Merged Share Class of the M&G Global Floating Rate High Yield Fund, which includes UK taxes but excludes entry and exit charges. The M&G Global Floating Rate High Yield Fund is a UK authorised sub-fund which launched on 11 September 2014 and its non-Sterling share classes merged into M&G (Lux) Global Floating Rate High Yield Fund on 7 December 2018.

<sup>b</sup> Not annualised.

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global bonds generally delivered solid returns in the period under review, as inflation moderated and major central banks reached the end of their tightening cycle. Sentiment improved significantly amidst a broad market rally at the end of 2023. Indications of a dovish pivot in monetary policy (interest rate cuts) from the US Federal Reserve sparked a powerful two-month rally in core government bonds, benefiting all segments of the fixed income market.

Despite some weakness in core government bonds during the first quarter of 2024, high yield (HY) bonds continued on their positive trajectory, helped by strong technical elements. Global HY bonds outperformed investment grade corporate bonds and sovereign bonds during the period under review.

Against this backdrop, the sub-fund delivered a positive return, but underperformed its benchmark, the ICE BofAML Global High Yield Index USD Hedged, which returned 9.36% in euros and 11.60% in US dollars.

The sub-fund's performance was hampered by its credit positioning. Both sector allocation and security selection detracted from relative performance. Our marginal underweight in banking and above-benchmark exposure to media and leisure contributed positively to performance, as did favourable security selection in these sectors.

Conversely, our picks in retail, utilities and financial services weighed on relative performance. Being underweight in the last two sectors also proved unhelpful.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

There was an active flow of new issues from a range of sectors, especially during the second half of the review period. HY corporate issuers took advantage of easing financial conditions to refinance existing debt. We

participated in a number of deals including from energy firms Matador Resources, Apache and Talos from the US. Other deals included American Airlines, and oil and gas firm Permian Resources.

Our deals in Europe included Italian architecture firm International Design Group, chemical firms Montichem and Calderys, Novo Banco and Intesa Sanpaolo (financials), Norwegian oil and gas company Var Energi and French telecommunications firm Iliad. In the UK, we bought new bonds from Travelodge, Aston Martin, Pinewood Media and Heathrow.

In the secondary market, we trimmed some US cyclical exposure, and instead added higher-quality names such as Darling, Charter and Ford. We also trimmed distressed telecommunications firm Altice in late 2023, which had reported mixed results.

We exited a number of names including United Airlines, Rolls Royce and Macy's. At the end of the period, we closed our positions in selected below-benchmark holdings including Sweden's SBB.

We increased our holdings in a number of industries including healthcare, partly financed by reducing our position in Ford, which has been fully upgraded back to investment grade.

### Outlook

High yield corporate issuers' fundamentals have, so far, held up reasonably well. This is largely thanks to buoyant consumption and pre-emptive corporate refinancings that have enabled issuers to lengthen their maturity profile at attractive rates.

Nevertheless, as developed economies slow and the impact of higher interest rates starts biting into corporate balance sheets, we would expect to see an uptick in default rates. Our base case scenario remains that of a mild default cycle, which would not be too damaging for the corporate sector.

As HY markets continue to see inflows and issuances remain light as compared to previous years, technical elements (supply/demand imbalances and attractive all-in yields) continue to contain credit spreads. Against a backdrop of moderate interest rate cuts, contained

# Investment review

spreads and a mild default environment, the asset class could still deliver good returns over the next 12 months, in our view.

## Stefan Isaacs and Luke Coha

Co-sub-fund managers

At the start of the review period James Tomlins was co-sub-fund manager. He was replaced on 15 January 2024 by Luke Coha.

Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Between 1 April 2023 (the start of the review period) and 31 March 2024, the M&G (Lux) Global Listed Infrastructure Fund posted mixed returns (the combination of income and growth of capital) across its share classes and underperformed its benchmark, the MSCI ACWI Net Return Index, which returned 23.95% in euros and 23.22% in US dollars.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Global stocks rallied in the 12 months under review, fuelled by gains for US technology giants, such as NVIDIA and Microsoft. These shares surged because of optimism about the potential for artificial intelligence (AI). Still, the so-called 'Magnificent Seven' splintered towards the end of the period, with Apple and Tesla, in particular, suffering declines. The technology gains meant that the US was a star market in the review period. Japan also outperformed, with the Nikkei surpassing its previous peak, set in 1989. Europe lagged, with the UK underperforming Germany and France in sterling terms. Emerging markets and Asia ex-Japan were both held back by weakness in China.

The AI excitement meant that information technology was the best performing sector in the MSCI ACWI index during the review period; however, the industry is outside of the sub-fund's remit. Communications services and financials also outperformed. Consumer staples was the biggest laggard as inflation squeezed shoppers' purchasing power. Utilities and real estate were also underperformers, partly because high interest rates dented profit expectations. This was a significant headwind for listed infrastructure strategies.

Against this backdrop, the sub-fund underperformed the MSCI ACWI Net Return Index, with utilities and real estate being the biggest detractors at the sector level. The lack of exposure to technology also weighed on

returns. The sub-fund benefited from not owning stocks in consumer staples, healthcare and consumer discretionary.

At the stock level, NextEra Energy Partners was the biggest drag on the sub-fund's relative performance. Shares of the renewable energy provider tumbled after the company lowered its distributions growth target because of high interest rates. Telecom tower owner Crown Castle was a detractor amid declines for revenue and net income. Wind-turbine operator Ørsted also weighed on returns partly due to a writedown caused by the abandonment of two offshore wind farms in the US. Positions in green-energy provider AES and gold company Franco-Nevada also dented relative performance, along with a lack of exposure to chipmaker NVIDIA.

The sub-fund benefited from not holding Apple, Tesla and Tencent, three once-high flying technology-related stocks. An overweight position in Oneok boosted performance as the natural gas company expanded its operations, raised its dividends and announced a share buyback. PrairieSky Royalty was similarly beneficial, aided by a higher dividend and an increase in royalty-generating oil production. Ferrovial was another boost to active returns, partly because of higher revenues from North American highways. The construction company also plans to list shares in the US to broaden its investor base.

### Investment activities

The sub-fund took advantage of attractive entry points for infrastructure businesses generating reliable and growing cashflows in the period. Still, it mainly pursues a low turnover, buy-and-hold strategy.

We entered into a position in Japanese port operator Kamigumi in June, our first investment in the country. The position was exited in January following a review of ESG-related exclusions rules in the sub-fund prospectus, particularly with regards to changes in sustainability regulations.

In August, we initiated a holding in Getlink, the owner and operator of the Eurotunnel. The following month, we opened a position in oil pipeline operator Enbridge,

# Investment review

taking advantage of a dip in its share partly caused by new issuance for acquisitions.

Our exits during the year include Hong Kong subway operator MTR and Brazilian toll road company CCR. We also sold our holdings in Singaporean fibre-optic network operator NetLink because of slow dividend growth. In November, we divested US railroad Union Pacific, partly to sub-fund investment in another US rail company, CSX.

## Outlook

Despite the recent challenging backdrop for listed infrastructure, we remain highly enthused by the opportunities in the asset class. The combination of decarbonisation, digitalisation and demographics are driving structural changes that can only be met with significant investment in real assets.

The market has been focused on the undeniably strong earnings power in US technology; but achieving the potential productivity gains these companies promise can only be harnessed with sustainable energy sources, secure supply chains, state of the art data centres and communications networks.

Recent activity in the private infrastructure space has helped to cement our view that this asset class will continue to attract capital. The unceasing drive towards electrification of the economy, re-shoring and enhanced resource security, as well as demographic change with urban migration, along with the need for real income growth – lead us to believe that listed infrastructure has a bright future.

Our companies are broadly delivering as we would have hoped; growing their earnings and dividends whilst continuing to invest in future growth. The valuations we feel do not fully reflect that execution and delivery. We continue to believe that listed infrastructure can continue to offer compounding income growth with economic resilience and inflation protection.

## Alex Araujo

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

Overall, it was a challenging period for global bond markets as central banks continued to keep interest rates elevated. Sentiment improved significantly amidst a broad market rally at the end of 2023, as inflation moderated, and as the market anticipated that major central banks were reaching the end of their tightening cycles. Indications of a dovish pivot in monetary policy from the US Federal Reserve sparked a powerful two-month rally in core government bonds, benefiting all segments of the fixed income market. The start of 2024 has been more challenging for bonds, as the strength of the US economy, coupled with hot inflation, resulted in investors dialling back expectations for the number of interest rate cuts this year.

Against this backdrop, the sub-fund underperformed its benchmark, the Bloomberg Global Aggregate Index, which returned 1.09% in euros and 0.49% in US dollars. Currency exposure was negative for relative returns; however, this was partially offset by actively managing the sub-fund's sensitivity to movements in interest rates (also known as duration, and measured in years). Our holdings in Mexican, Columbian, and Brazilian government bonds made strong positive contributions towards returns, while Japanese government bonds detracted.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

At the start of the period, we marginally increased the portfolio's duration, remaining underweight investment grade credit and selectively adding to assets on price weakness. For example, we took advantage of a selloff in South African rates and currency to add to South African government bonds.

In the summer, we de-risked by selling out of some investment grade names, including Italian energy utility, Enel, and UK property developer Hammerson. Similarly, we also reduced credit risk in our high yield holdings by

buying credit protection via credit default swap indices. We remained underweight credit as we felt the tight spreads offered little upside in the uncertain environment.

Towards the end of 2023, we took advantage of the weakness in longer dated yields and furthered the sub-fund's duration and yield curve steepener position by adding to 30-year US Treasuries, UK government bonds (gilts) and German bunds through trimming shorter dated allocations.

As the period under review came to an end, we continued to reduce credit risk and increased protection through CDX IG to reduce overall investment grade risk.

### Outlook

Looking ahead, we think the main opportunity remains in duration and retain a long position here. We believe that the more likely scenario for this year is not a soft landing, but a slowdown followed by central banks cutting interest rates. Therefore, we want to be exposed to government bonds that have longer duration, which we would expect to perform well in such a scenario.

### Jim Leaviss and Eva Sun-Wai

Co-sub-fund managers

On 5 February 2024 Eva Sun-Wai was appointed co-sub-fund manager. Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

<sup>a</sup> Fair valued.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures			
	Forward currency contracts US\$'000	Futures US\$'000	Collateral held as cash US\$'000	Collateral held as security US\$'000
Bank of America Merrill Lynch	0	182	0	0
Barclays Bank London	0	0	12,195	0
Citigroup Global Markets Limited	494	0	0	0
HSBC Bank Plc	415	0	0	0
Standard Chartered Bank	67	0	0	0
State Street Bank and Trust Company	1	0	0	2,459
UBS AG London	216	0	0	2,731

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

The M&G (Lux) Global Maxima Fund delivered a positive total return (the combination of capital growth and income) across all its share classes, but lagged its benchmark the MSCI ACWI Net Return Index, which returned 23.95% in euros and 23.22% in US dollars.

The 12-month period under review saw strong gains for stockmarkets around the world, particularly in the second half. Investor sentiment was bolstered by the easing of inflationary pressures, optimism about forthcoming rate cuts by central banks and a potential economic 'soft landing'. The technology sector performed very strongly, with companies seen as beneficiaries of the growth in artificial intelligence the standout performers.

The sub-fund is an active equity fund, which uses machine-learning models – a type of artificial intelligence – to select stocks. Oversight of stock selections is provided by the sub-fund management team, and the decision whether to include a security in the portfolio is taken by the sub-fund manager.

The term 'artificial intelligence' refers to the broad study of developing algorithms to imitate human cognitive functions (such as pattern recognition). Machine learning is a subset of artificial intelligence that does not rely on a pre-defined set of rules developed by humans in order to make decisions or predictions. Rather, machine learning techniques 'learn' these rules from historic data and apply these learned rules to the real world to assist decision-making.

Over time, the success of our machine-learning models is determined by the percentage of stocks they pick that outperform (hit rate), along with the magnitude of the outperformance (skew). The skew is measured as the difference between the average outperformance of the winning stock bets and the average underperformance of the losing stock bets.

The sub-fund's hit rate was in was around 48%, below the expected 50% threshold, resulting in

underperformance versus its benchmark. Skew was modestly positive, partially offsetting the drag from the poor hit rate.

While the sub-fund is constrained to limit active industry and country exposures, style exposure can vary over time and have an impact on returns. Over the course of the review period, the sub-fund's style positioning was a modest drag on performance, with exposure to smaller size companies being the main detractor.

### Investment activity

We apply a systematic bottom-up stock picking approach, driven by quantitative analysis of individual companies. We use a proprietary database and proprietary machine-learning models to help identify stocks that we expect to outperform the global equities market. The sub-fund management team has experience of managing quantitative equity strategies and is supported by a team of data scientists.

The methodology uses vast amounts of data about companies to establish whether there is an identifiable pattern to outperforming stocks. Rather than relying on individuals to discover investment opportunities, the approach relies on machine learning for idea generation.

From the sub-fund's investable universe of global equities, each stock is assessed on its likelihood of outperforming the global equity market. We then use our judgement, along with feedback from our in-house team of research analysts, to determine which stocks to include in the sub-fund. The result is a high-conviction portfolio of between 50 and 100 stocks.

As part of the portfolio construction process, differences between the sub-fund's country and industry weightings compared to those of the index are constrained.

There were no material changes to the portfolio from a country or industry exposure perspective over the review period. The portfolio has a positive exposure to smaller size, high volatility and cheap value styles, while

# Investment review

maintaining relatively neutral exposures to growth and momentum styles.

## Outlook

The past two years have seen a significant repricing of financial assets as the market grapples with the changing macroeconomic backdrop. Many of the factors that enabled stable and robust economic growth over the decades leading up to the COVID-19 pandemic remain in place, such as rapid technological advancement and a generally capital-friendly regime, in developed markets.

However, there are other factors, especially on the policy front pertaining to Western governments' use of fiscal spending and rising societal goals, which can have the effect of dampening some of the other disinflationary forces at play. While bond markets have adjusted to reflect the potential for structurally higher inflation, stockmarkets have taken a benign view of any such regime shift that might affect future corporate profitability.

There remains a possibility of renewed pressure on stockmarket multiples similar to the events witnessed in 2022, should investors start to believe that interest rate pressure can have a more lasting effect on economic growth.

In such an environment, a strategy such as that employed in the M&G (Lux) Global Maxima Fund, which is able to focus on mispricing opportunities independent of country, industry or value/growth styles, can be quite attractive in generating differentiated returns.

## Gautam Samarth

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>

# Investment review

## For the year ended 31 March 2024

### Performance review

Global stockmarkets generally performed strongly during the period under review. This was due to a combination of factors, including economic growth, signs of easing inflation and hopes of impending interest rate cuts.

Fears that interest rates would remain higher for longer in the autumn of 2023 and ongoing geopolitical issues all triggered dips in market performance during the course of the period. However, share prices jumped in December after the Fed indicated that rate cuts were likely in 2024.

The tech sector played a crucial role in buoying stockmarkets. In 2023, the so-called 'Magnificent Seven' mega cap tech stocks (Alphabet, Amazon, Apple, Meta, Microsoft, NVIDIA and Tesla) delivered stellar returns, largely due to excitement about artificial intelligence (AI). Some of the big tech names continued to perform well into the first quarter of 2024: NVIDIA's shares soared in February after the company released an exceptional earnings report, further stoking investor enthusiasm about AI.

Against this backdrop, the sub-fund delivered a positive return, but lagged its benchmark, the MSCI World Net Return Index, which returned 25.86% (in EUR) and 25.11% (in USD) over the period. Stock selection in technology, industrials and consumer discretionary dented relative returns. The sub-fund's below-benchmark position in technology also had a negative impact on relative performance. In contrast, stock picking in healthcare and materials boosted relative performance, as did the sub-fund's below-benchmark position in utilities.

Key detractors from relative performance included SolarEdge and WH Smith. SolarEdge's poor share price performance over the period reflects a beleaguered solar market. High interest rates (dampening demand for solar projects) and reduced incentives in California have dented the solar industry.

The top contributors to relative performance were Manhattan Associates, Tokio Marine and Novo Nordisk. Novo Nordisk has become one of Europe's most valuable companies following exponential demand for its weight-loss drug, Wegovy and diabetes medication, Ozempic.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the period under review, we sold our holding in uniform rental company UniFirst after the company's estimated emission intensity rose above our threshold. As the company does not report its actual emissions and failed to set a science-based target for emission reduction, we felt it was no longer compatible with our alignment to the Paris Agreement's goals. We also decided to close our position in Danish pharma company ALK-Abelló.

We added SolarEdge and Siemens to the sub-fund. SolarEdge enjoys a strong market position in solar inverters for power optimisation. We believe that Siemens offers a significant margin of safety (the difference between the current share price and what we believe to be the intrinsic value of the company). We also opened a position in Danish energy company Ørsted, taking advantage of its recent share price weakness. We believe that potential developments such as favourable policy measures and the easing of supply issues could benefit the company.

### ESG engagements

During the period, we engaged with a number of companies on environmental, social and governance issues. We encouraged US-listed online marketplace eBay to more explicitly link remuneration KPIs to sustainability targets. In response to our suggestion that it set a net zero target, the company confirmed that it would be doing so and that it planned to seek SBTi validation for this.

We met Danish pharmaceutical company Novo Nordisk to establish whether it had appropriate processes and

# Investment review

checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI).

We discussed two key issues with Johnson Controls International. The first pertained to a cyberattack carried out on the company last year. In light of this, we wanted to ensure that the business had implemented the requisite systems, controls and procedures to limit damage in case of any future attack. Secondly, we wanted to verify that the company was no longer exposed to perfluoroalkyl and polyfluoroalkyl substances (PFAS), often termed 'forever chemicals'.

Johnson Controls asserted that the cyberattack prompted it to review and strengthen its risk mitigation strategy. It has also hired a new chief information officer and chief technology officer, further bolstering cybersecurity at the business. The company is currently the subject of a class action connected to PFAS contamination. The action relates to a product whose chemical composition had been mandated by the US government. The company confirmed that it is now selling a compliant version of the product and that none of its other products contain PFAS.

## Outlook

We are comfortable with the balance of the sub-fund having tweaked it slightly, redirecting capital from some of our top performers to contrarian opportunities, such as Ørsted, SolarEdge and Siemens, which is trading at a discount to both comparable alternatives and our estimate of its intrinsic value.

This does not mean we are calling for a shift in market leadership or favouring a particular style. We simply continue to pursue our longstanding strategy of maintaining a concentrated and balanced portfolio of high-quality companies, while looking to increase holdings or add new stocks which, in our view, offer a significant margin of safety.

We still have faith in the long-term outlook for those companies we see as winners, such as Novo Nordisk, Schneider Electric, and Manhattan Associates.

However, we also prudently trim holdings as valuations bake in more future success.

## John William Olsen

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equities rallied in the review period helped by large-cap technology companies in the US surging on optimism about artificial intelligence. Stocks and corporate bonds also got a boost from confidence that central banks would be able to cool inflation and cut interest rates without causing deep recessions. Global government bonds sold off because of higher rates.

Equities made a positive contribution to sub-fund performance over the year, helped by our decision to reduce exposure in early August to a slight net negative, and by outperformance of holdings in Asia. US banks also fuelled returns as the sector rebounded from a regional banking crisis centred on the failure of Silicon Valley Bank.

Government bond holdings were beneficial with positive returns from Brazil, Mexico, and the UK. Investments in US Treasury futures weighed on performance.

Cash investments contributed positively, reflecting high yields. Corporate bonds also drove returns, particularly holdings in M&G credit sub-funds. Options and alternative investments, which include infrastructure investment trusts, were detrimental.

### Investment activities

Across the course of the year, we notably increased our exposure to government bonds. This particularly included US Treasuries, where we moved to positive exposure from negative. At the start of the period, for instance, we added US ultralong Treasury futures (contracts with terms of at least 25 years) for diversification and an attractive real yield. We later boosted exposure to 5-year and 10-year bonds. We increased duration risk significantly over the period, partly by adding UK government bonds (gilts).

We increased exposure overall in corporate bonds, with additions in high-yield outweighing declines in investment grade. Our high-yield exposure was zero at the start of the review period. Equity exposure fell over the year, mainly due to more negative exposure in North

America and reduced exposure to Asia ex. Japan. We added in emerging markets, Europe and the UK.

We maintain a significant allocation to cash for flexibility and attractive yields.

### Outlook

Global economies and financial markets in 2024 will likely be shaped by inflation, interest rates and a series of elections, most notably in the US.

The path of inflation and interest rates are interlinked, as central bankers have used higher borrowing costs to help bring down the pace of price increases. They have had some success, without quite getting inflation back to target. This ongoing challenge has dented optimism about when interest-rate cuts may begin, and how fast they will be, which has contributed to recent weakness in bonds. More optimistically, the challenge also reflects sustained strength in the economy and fading recession fears.

Concerns about government debt levels have also weighed on sovereign bonds, and largess from candidates in this year's elections will do little to help. US presidential candidates are no exception, and this is helping to foster questions about the long-term sustainability of US debt levels, even with the benefit that the country gets from having the de facto global reserve currency. Still, these concerns are long-term risks, and we remain constructive on US Treasuries. We also expect opportunities amid volatility around the election.

The strategy of the sub-fund remains focused on generating a positive, above-cash return for investors with relatively low volatility. We continue to dynamically evaluate exposures, and to seek opportunities on both a medium-term and tactical basis.

# Investment review

## Tristan Hanson

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equities recorded positive returns over the review period with much of the performance delivered in the latter part of 2023. In the earlier part of the review period, markets were dragged down by concerns over the impact of high interest rates before signs of moderating inflation led to a strong rebound at the end of the year. Global equities rallied strongly on optimism that peak interest rates had been reached and that rate cuts would come sooner than originally predicted. Early in the new year, however, investors scaled back hopes of imminent rate cuts as various data releases continued to suggest economic resilience in the US. Nevertheless, global equities finished the review period on a strong footing following solid corporate earnings results and on optimism that global central banks had engineered a soft economic landing.

Against this backdrop, the sub-fund delivered a positive return but underperformed its benchmark, across all its share classes. The benchmark, the MSCI ACWI Net Return Index returned 23.95% in euros and 23.22% in US dollars. Sector allocation detracted from relative returns due partly to the sub-fund's underweight to the strongly performing technology sector. Overweight exposure to real estate, a sector that was hurt by rising interest rates during 2023, was also detrimental. Conversely, above-market exposure to the more resilient consumer staples sector benefited relative performance.

Stock selection was negative for relative returns. The sub-fund's zero-weight to technology giant NVIDIA, which rallied significantly on developments in artificial intelligence, was among the main detractors. Elsewhere, weakness across the materials sector hurt our overweight position in Franco Nevada, a Canadian royalties company exposed to mining projects. By contrast, top contributors to relative performance included the sub-fund's zero weight in Apple, which fell following a lacklustre sales forecast, and overweight exposure to Qualcomm which benefited from demand for semiconductors.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

Over the review period, we initiated several new holdings which were complementary to the portfolio's ESG approach and trading at attractive valuations. Within energy, we bought into New Fortress Energy and Enbridge, recycling the proceeds from PepsiCo and ONEOK. Oracle and Qualcomm were added in the technology sector which were partly funded by our divestments from L'Oréal, Nokia, Weichai Power and Unilever. Elsewhere, we added to our utilities overweight with new positions in APA Group Units and Hidroelectrica via the renewable power generator's initial public offering. We used the proceeds from Italian utilities group Enel to initiate a position in Ecolab, which specialises in water treatment and hygiene across a variety of industries. Meanwhile, we sold Air Products and Chemicals and started a new position in Israeli autonomous driving company Mobileye in anticipation of the medium-term product pipeline and margin rebuild. Meanwhile profit taking in Infineon Technologies resulted in our overweight reducing to a more neutral position. Other significant sales included the divestment from Walt Disney.

### Outlook

Given the elevated volatility, continued conflict in the Middle East and an election year for multiple countries, we remain highly selective, focusing on companies with robust cashflows, strong balance sheets and trading at conservative valuations.

An area that we feel is becoming increasingly attractive is renewable energy, which suffered last year on concerns around inflation implications for long-term project economics and the potential impact of 2024 elections on government policies that currently support this space. So far this year, however, we have seen inflation levels moderate and renewable energy companies begin to negotiate inflation-linked contracts to help manage rising costs and high levels of borrowing against long project lead times. Meanwhile,

# Investment review

governments across the world have continued to be supportive of green investments given the ambitious targets around national decarbonisation goals. As a result, we believe valuations among renewables now provide a good margin of safety, but recognise that sentiment for the sector may remain volatile as almost 60% of the world's democratic population heads for the polls this year.

## Alex Araujo

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Investment review

## For the year ended 31 March 2024

### Performance review

The M&G (Lux) Income Allocation Fund delivered a positive total return (the combination of capital growth and income) across all its share classes.

The sub-fund is actively managed and it has no benchmark. Investors can assess the performance of the sub-fund by its objective to provide a growing level of income and capital growth of 2-4% per annum, both measured over any three year period.

The 12-month period under review saw strong gains for stockmarkets around the world, particularly in the second half. Investor sentiment was bolstered by the easing of inflationary pressures, optimism about forthcoming rate cuts by central banks and a potential economic 'soft landing'. The technology sector performed very strongly, with companies seen as beneficiaries of the growth in artificial intelligence the standout performers.

Within fixed income, shorter-dated developed market sovereign bonds, generally delivered a small positive total return, but performance of long-dated bonds (particularly in the UK and US) was held back a little, by fears interest rates would stay 'higher for longer'.

Elsewhere, emerging market sovereign bonds (particularly hard currency) and investment grade and high yield corporate bonds recorded stronger gains. In general, these bonds benefited from their higher yields, a tightening of spreads and lower duration versus government bonds.

The sub-fund posted a positive total return (the combination of capital growth and income) in the reporting period. Equities drove the positive performance, led by holdings in the US and Japan.

Holdings in developed market sovereign bonds delivered mixed returns, with US Treasuries costing some performance, but UK gilts delivered gains. Holdings in emerging market sovereign bonds were also profitable. However, currency hedging was a drag

on performance, as a significant part of the portfolio is hedged back into euros.

### Investment activities

Early in the review period, we made several changes to the portfolio, seeking to take advantage of the higher yields available. To optimise income generation, we reduced our overweight positions in global financial equities and added to other sectors. After the good performance of the Japanese stockmarket, we reduced our overweight position in the country.

We also diversified our government bond exposure by country and maturity by introducing positions in German and UK bonds, while trimming US Treasuries. Our exposure to emerging market government bonds was also adjusted markedly.

In July, as part of a process to optimise income, we switched out of some stocks that had paid their annual dividends into other shares with similar characteristics but still to pay. The aim was to generate more distributable income while leaving the overall positioning and risk profile little changed. Later we rebalanced our holdings of emerging market bonds in response to the steep inversion of yield curves, which meant we could get higher yields from shorter-dated bonds. Finally, at the end of the period, we sold all our corporate bonds as, their credit spreads had remained resilient despite the rise in cash yields.

Early in the fourth quarter of 2024, we attempted to remove some risk from the portfolio by reducing the allocation to equities, while increasing exposure to bonds. In November, we diversified government bond exposure by adding 5-year bonds from Germany, the UK and US while selling our Treasury bills, which were classified as cash. Towards the end of the quarter, we removed the sub-fund's short S&P 500 position.

In January 2024, we began a new position in Hong Kong and Hong Kong-listed Chinese equities. The growing valuation discount of Hong Kong/China shares, to what we see as fundamental value, offers an attractive total return proposition, in our view. In March, we sold our positions in US, UK and German 5-year

# Investment review

sovereign bonds and recycled the proceeds into short duration high yield credit.

## Outlook

Central banks seem broadly comfortable with the path of inflation, but don't want to cut while economic growth remains strong. Bond markets now appear to have priced in a significant portion of this and we believe offer attractive real yields and potential diversification, if growth falters.

Equity valuations look demanding in places (most notably the US), but do not seem detached from earnings. We continue to prefer areas with lower valuations and a higher margin of safety. Europe has been a standout performer year-to-date but continues to look attractive on a global basis.

## Steven Andrew and Stefano Amato

Co-sub-fund managers

Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

<sup>a</sup> Fair valued.

<sup>b</sup> As part of the sub-fund merger between the M&G (Lux) Income Allocation Fund and M&G (Lux) Emerging Markets Income Opportunities Fund on 6 May 2022, two sanctioned Russian-listed securities were transferred into the beneficial ownership of the M&G (Lux) Income Allocation Fund. As both sub-funds have been prohibited from selling these assets, they have remained in a custody account of M&G (Lux) Emerging Markets Income Opportunities Fund.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures	
	Forward currency contracts €'000	Futures €'000
Bank of America Merrill Lynch	0	89
Barclays Bank London	159	0
Citigroup Global Markets Limited	29	0
HSBC Bank Plc	1,424	0
Merrill Lynch Pierce Fenner + Smith Inc	245	0
Royal Bank of Canada, London Branch	48	0
State Street Bank and Trust Company	1,713	0
State Street Bank and Trust Company, London Branch	248	0
UBS AG London	138	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 16 January 2018 is that of the relevant Merged Share Class of the M&G Income Allocation Fund, which includes UK taxes but excludes entry and exit charges. The M&G Income Allocation Fund is a UK authorised sub-fund which launched on 7 November 2013 and its non-Sterling share classes merged into M&G (Lux) Income Allocation Fund on 16 March 2018.

# Investment review

## For the year ended 31 March 2024

### Performance review

The period under review saw a strong rebound in global equities. Most major equity markets registered strong gains, with the US and Japan outperforming other regions. China was the only notable exception to this positive trend. Japanese equities posted robust double-digit returns in euro terms, and marginally outperformed the MSCI World Index.

Japanese stockmarkets rallied strongly from late October onwards and ended 2023 with a powerful two-month rally. Despite weaker-than-expected economic growth, Japanese equities continued their strong performance in 2024 as further weakness in the Japanese yen provided a tailwind for export-oriented companies.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of the MSCI Japan Net Return Index across all of its share classes in the period under review. The index returned 26.5% in euro terms and 25.8% in US dollar terms over the period.

Both sector allocation and security selection contributed positively to relative performance. Our above-benchmark exposure and favourable stock selection in industrials added the most value. Conversely, our underweight and unfavourable stock picking in technology detracted the most from relative returns.

At the stock level, top contributors included our holdings in machine maker Toyota Industries, Mitsubishi UFJ Financial and NEC. The leading detractors were biotechnology firm PeptiDream, Seven & I Holdings and recruitment agency DIP Corporation.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

Throughout the year, we continued to identify and initiate new positions in companies where we feel we have a differentiated view of the risk of ownership.

Our aim is for stock selection to be the main driver of performance, rather than any particular theme or investment style.

In May 2023, we began a new position in materials and electronics business Taiyo Yuden, taking advantage of weakness in its share price to invest at an attractive valuation, in our view. Towards the end of the year, we initiated holdings in automotive supplier Aisin Corp, which is part of Toyota, and diversified industrial group AGC. We believe AGC is well-positioned to benefit from structural growth in the semiconductor sector.

In January 2024, we established a new position in Panasonic, a leading electronics manufacturer in Japan and globally. The company is a diversified conglomerate, and we feel that Panasonic is another shining example of a self-help driven earnings story, similar to Hitachi.

Over the period, we exited a number of positions including beverage company Kirin Holdings, advertising agency Dentsu, and technology consulting firm BIPROGY.

### Outlook

2023 was the strongest year in a decade for the Japanese equity market. Looking ahead, we need to acknowledge the valuation expansion that has occurred in Japan over the past year or so, as a result of the exceptionally strong rally in Japanese equities. Today, the excessive undervaluation has been removed from many large-cap stocks. Having said that, we believe the long-term opportunity from corporate restructuring and balance-sheet reform remains firmly intact and the pace of reform continues to accelerate.

# Investment review

## Carl Vine

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global stocks rallied in the year under review, aided by gains for US technology giants amid optimism about the prospects for artificial intelligence. Japanese shares were notable performers, with the Nikkei index setting a new high for the first time since 1989. Smaller Japanese companies also advanced, helped by the weak yen boosting export earnings.

The sub-fund posted positive returns in the period and outperformed its benchmark across its hedged share classes. It lagged the benchmark across its unhedged share classes. Index returns over the period were 18.4% in euro terms, 17.7% in US dollars and 16.0% in Swiss francs.

Security selection was beneficial for relative returns, though this was offset by detractor from sector allocation. Consumer discretionary provided the sub-fund's best active returns at the sector level, with stock picks outweighing a drag from an overweight position. An underweight in consumer staples and an overweight in real estate were also beneficial, along with security selection in both sectors. Industrials was the biggest drag on relative performance due to unfavourable security selection. Relative performance was also hindered by an underweight position and selection in technology.

An off-benchmark position in Trial Holdings was the biggest active contributor among stocks. The discount retailer surged following its IPO in March 2024.

A holding in Toyota Industries were also beneficial as the machinery-maker boosted sales and profits, aided by the weaker yen and cost-cutting. Real estate company Ichigo was another positive contributor, partly because of gains following the announcement of a stock buyback.

Recruitment company DIP was the biggest drag on relative performance after a reduction in its earnings guidance. Biotech PeptiDream also weighed on returns, along with beauty company Axxzia. Axxzia is a small-

cap company that is not widely understood by the market and, we believe, has significant growth potential.

Rohm, a manufacturer of semiconductor testing equipment and electronic measuring devices, was a further detractor. In our view, the market may be undervaluing the structural growth that lies ahead in Rohm's silicon carbide franchise.

### Investment activity

We were active throughout the year in both opening and closing positions, as we looked to take advantage of opportunities in the market.

Notable additions during the year included Ichigo. We have engaged with management at the company with the aim of enhancing shareholder value. We bought into Trial at the time of its IPO and invested in Net One Systems after its shares sold off, providing an attractive entry point. We added Nomura, following significant underperformance and because we feel management is now more focused on streamlining its global operations.

Other purchases included Seven & I Holdings, Taiyo Yuden and Panasonic. Seven & I, is the holding company of 7-eleven, Japan's largest convenience store operator, and we feel optimistic about the company's growth prospects. We began a new position in materials and electronics business Taiyo Yuden, taking advantage of weakness in its share price to invest at an attractive valuation, in our view. In January 2024, we established a new position in Panasonic, a leading electronics manufacturer in Japan and globally. The company is a diversified conglomerate, and we feel that Panasonic is another shining example of a self-help driven earnings story, similar to Hitachi.

Over the review period, we exited a number of positions including beverage company Kirin Holdings, advertising agency Dentsu, and technology consulting firm BIPROGY. We also sold the position in Rakuten Bank in November 2023, after its shares rallied sharply following its initial public offering, in which we were an anchor investor.

# Investment review

## Outlook

2023 was the strongest year in a decade for the Japanese equity market. Looking ahead, we need to acknowledge the valuation expansion that has occurred in Japan over the past year or so, as a result of the exceptionally strong rally in Japanese equities. Today, the excessive undervaluation has been removed from many stocks. Having said that, we believe the long-term opportunity from corporate restructuring and balance-sheet reform remains firmly intact and the pace of reform continues to accelerate.

## Carl Vine

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. # Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the period from 1 April 2023 until 10 November 2023

The sub-fund reached maturity and was closed during the period.

### Fund positioning

Prior to closure in November, the sub-fund was invested in a range of M&G sub-funds, across equities, fixed income and multi assets, which were a reflection of the M&G multi asset team's asset views. In terms of underlying asset exposure, the largest weightings were in developed market government bonds, corporate bonds, global equities and emerging market government bonds. The sub-fund also held cash.

### Performance review

The M&G (Lux) Multi Asset 2023 Fund delivered a negative total return (the combination of capital growth and income) across its share classes in the period up until sub-fund closure.

The sub-fund is actively managed and has no benchmark.

Financial markets were mixed at the start of the review period, with equity markets, broadly, benefiting from improving risk appetite, whereas sovereign bonds struggled as major central banks continued to raise interest rates to curb high inflation.

However, the prospect of higher for longer interest rates was a significant drag on financial markets over the summer months. But from late-October onwards there was a major rally across equities and bonds, as declining inflation led investors to grow increasingly confident there would be meaningful interest rate cuts in 2024.

The sub-fund posted a negative total return (the combination of capital growth and income) in the period up until sub-fund closure. Holdings in developed market government bonds, particularly US Treasuries and UK government bonds (gilts) were the main drag on performance. However, some exposure to high yield corporate debt was more supportive to performance.

Within equities, some holdings in US and Japanese equities were beneficial to performance.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Craig Moran

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class up to close date 13 December 2023

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

## For the year ended 31 March 2024

### Performance review

The sub-fund delivered positive returns across its share classes but underperformed the benchmark in a rising market dominated by a new economy elite. The benchmark returned 30.05% in euros and 29.27% in US dollars. The limited exposure to NVIDIA and Meta Platforms provided the biggest drag on performance relative to the benchmark. The zero weighting in Amazon.com also provided a headwind.

Air Products and Chemicals fell as investors took a sceptical view on the company's ability to deliver on its strategic plan. American Tower and Rexford Industrial Realty, which are both structured as real estate investment trusts (REITs), declined owing to concerns about interest-rate sensitivity.

Stock selection added value in technology, with the strongest contribution from Broadcom. The semiconductor stock doubled as a potential beneficiary of the structural growth in artificial intelligence (AI). Lam Research and KLA Corp also delivered impressive returns in semiconductors, while Microsoft outperformed in software.

JPMorgan Chase, Progressive Corp and Mastercard led the gains in financials.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

Trane Technologies, Rollins and Sherwin-Williams were added to the portfolio as potential beneficiaries of a recovery in the housing market, with the prospect of structural growth and cyclical growth which is not fully appreciated by the market, in our view. The sub-fund's exposure to industrials was boosted by the new purchase of Canadian Pacific Kansas City, a railroads company.

The weighting in financials increased with two new holdings: Progressive Corp and Ares Management. The

residual holding in First Republic Bank was sold. VF Corp provided a source of cash in consumer discretionary.

We invested in Meta Platforms after the owner of Facebook announced its maiden dividend. We believe that the strong momentum in operating performance can continue and support a rapidly rising dividend, a scenario which we think is not adequately reflected in an undemanding valuation. Meta also provides a welcome addition to Microsoft and Broadcom, which have played a crucial role in providing portfolio protection during new economy rallies. We reduced Microsoft and Broadcom into strength to manage their position size.

CDW joined the list of technology holdings. We also bought NVIDIA but exited the position after the standard bearer for AI jumped more than 40%. We sold KLA after the semiconductor stock rallied strongly.

In defensive sectors, the exposure to healthcare increased, helped by the new purchase of AbbVie. We also bought more UnitedHealth and Thermo Fisher Scientific. We added to NextEra Energy and Rexford in utilities and real estate, respectively. By contrast, the weighting in consumer staples was reduced to zero following the sale of Sysco, Mondelez International, Estee Lauder and Costco Wholesale.

### Outlook

The dominance of the new economy has provided a significant headwind for dividend strategies, but we have been keen to point out that the growth characteristics of this narrow elite are not unique. We see plenty of growth opportunities in a variety of sectors, with valuations which in many cases are far more attractive.

From a macroeconomic perspective, market expectations have shifted dramatically. Fears of rampant inflation have been quickly replaced by a broad consensus that interest rates have peaked, and that the Federal Reserve will embark upon a series of interest-rate cuts to deliver a soft landing. The narrative of 'higher for longer' has shifted from 'how high?' to 'how long?' with implications for investment opportunities.

## Investment review

We have been focusing our attention on companies hurt by rising rates, but not higher rates, with a particular focus on companies exposed to a potential recovery in the housing market. We are also excited about quality companies, where valuations were, until recently, the cheapest they have ever been.

We continue to be encouraged by the dividend increases we are seeing across the portfolio, and remain resolute in our belief that the majority of our holdings can sustain dividend growth in the 5-15% range over the long term, while offering an attractive yield. We are undeterred in our pursuit of dividend growth and remain committed to its viability not only as a source of rising income, but also as a total return strategy in the US market over the long term.

### John Weavers

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

US stocks rallied in the review period and outperformed global indices as optimism about artificial intelligence (AI) sparked gains for mega-cap technology stocks, such as Meta, Microsoft and NVIDIA. Waning inflation concerns and expectations that the Federal Reserve (Fed) would start to lower interest rates bolstered the broader market.

The AI focus and an end to interest-rate hikes favoured growth stocks over value across the majority of the past 12 months. Value shares benefited in the first quarter of 2024 as expectations about the timing of interest rate cuts receded.

The sub-fund's value focus meant that it underperformed its benchmark, the S&P 500 Net Total Return Index, which returned 30.05% in euros and 29.27% in US dollars over the period. Both our below benchmark position (underweight) and stock selection in technology detracted from relative performance. Stock selection in the healthcare was also a notable detractor. On the other hand, our stock selection in Industrials was the greatest contributor to relative performance. Our above benchmark position (overweight) to financials and our selection in communication services also proved to be beneficial for relative performance.

At a stock level, not holding NVIDIA, Amazon and Microsoft as a result of our value investment style were the biggest detractors from the sub-fund's relative performance. An overweight in agricultural chemical maker FMC impacted returns amid declines in earnings, partly caused by distributors working through excess stock. An overweight in energy company AES was also a drag amid lower earnings and concerns about borrowing costs.

Conversely, not holding Apple boosted relative performance after its shares faltered amid regulatory concerns, sluggish growth and slowing iPhone sales in China. On this theme of the 'Magnificent Seven' (a group of high-performing technology stocks), not

holding Tesla and Alphabet was also beneficial for performance; and an overweight position in Facebook owner Meta was favourable as the stock gained on AI optimism. Separately, Constellation Energy was another positive after forecasting strong long-term profit growth

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We added a number of new positions during the 12 months, starting with PayPal and semiconductor equipment maker Amkor Technologies in April. Both companies had strong balance sheets and appealing valuations. We later entered a position in broker Charles Schwab following a sell-off stemming from the US regional banking crisis.

Further additions were made during periods of market weakness, including clothes maker VF Corp., industrial giant 3M, consumer health company Kenvue, retailer Best Buy, miner Champion Iron and crude oil tanker operator DHT Holdings. Other additions included Fabrinet, Lowes, Qualcomm, Spirit Aerosystems and Zimmer Biomet.

Exits during the 12 months included cashing in profits from medical devices manufacturer Stryker, delivery company FedEx, General Electric and KLA. We sold tanker operator Euronav following a quasi-takeover, and DXC Technology, Truist Financial and Tyson Foods.

### Outlook

We are witnessing a growing valuation gap in the US between the most expensive and the least expensive segments in the market, and this attractive opportunity set is being seen across the full spectrum of sectors. We believe this is a great environment for bottom-up value stock pickers to identify those companies at the cheaper end of the market with good growth profiles.

The future path of interest rates will likely be a key driver for US stocks in the year ahead, as sticky inflation dents hopes for rapid cuts by the Fed. Sustained high borrowing costs traditionally dent growth stocks by

# Investment review

eroding the value of future profits. By contrast, value stocks tend to perform better as investors receive dividends straightaway.

Economic growth in the US has so far weathered higher interest rates, providing a further boost to stocks. Concerns about a recession have faded away amid high employment numbers and resilient consumer spending.

Market risks include any rebound in inflation, potentially stemming from uncertainty in the Middle East boosting oil prices. That could deter the Fed from cutting rates, and potentially even spur more hikes, which could derail the economy.

## **Daniel White**

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Fixed income investments delivered mixed performance in the 12 months under review. Shifting expectations around inflation and interest rates brought some volatility for government bonds, but corporate and high yield bonds proved more resilient.

The period began relatively calmly, although UK government bonds (gilts) underperformed after inflation surprised to the upside. However, volatility returned in the summer, as persistently high core inflation and resilient macroeconomic data in the US saw the Federal Reserve turn more hawkish. Concerns over higher-for-longer interest rates pushed government up bond yields, and their prices fell accordingly.

Sentiment improved towards the end of 2023. With inflation falling steadily, central banks began signalling interest rate cuts on the horizon, raising hopes of a soft landing for major economies. Both fixed income and equity markets got a welcome boost, rallying strongly throughout November and December.

However, the first quarter of 2024 forced investors to adjust their expectations, as sticky US inflation and stronger-than-expected economic data delayed the prospect of rate cuts. Again, government bonds suffered most, with yields on US treasuries, German bunds and UK gilts all rising.

Corporate bonds, on the other hand, fared better throughout the period. Demand remained high, and tightening credit spreads (the yield differential between a corporate bond and the corresponding government bond with the same maturity) demonstrated investor confidence in the macroeconomic environment. Investment grade bonds delivered positive returns, but were outperformed by riskier high yield investments.

Over the review period, the M&G (Lux) Optimal Income Fund delivered a strong positive total return (the combination of income and capital growth) across all its share classes, outperforming its benchmark. The benchmark is a composite index equally weighted

across the Bloomberg Global Agg Corporate Index EUR Hedged, the Bloomberg Global High Yield Index EUR Hedged and the Bloomberg Global Treasury Index EUR Hedged, representing the global corporate bond market, the global high yield bond market and the global government bond market. This returned 5.39% in euros and 7.51% in US dollars over the period.

Our duration positioning was the main driver of outperformance during the period under review, with the duration impact of our sterling holdings particularly positive.

Within credit, asset allocation and security selection also contributed.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We gradually lengthened sub-fund duration (a measure of its sensitivity to interest rates) during the review period, in anticipation of falling inflation and slow-but-steady growth. In October, duration exceeded the benchmark for the first time in about 10 years, and we maintain that long positioning across euros, sterling and US dollars. We added gilts and US treasuries at various points when prices fell, but reduced exposure to better-performing German bunds. We also added government bonds from selected countries including New Zealand, South Africa, Ivory Coast, Morocco, Hungary and Poland.

We remained cautious in credit, preferring to pare risk and increase quality given tightening credit spreads. Early in the period, we participated in new issues from EDF, AT&T and Olympus Water. Later additions included International Design Group, IHG, Piraeus, Southern Water, ASR, Crédit Agricole, Nestlé and UBS. We sold some well-performing investment grade bonds, and others where spreads looked historically tight (an AT&T hybrid, an ultra-long-dated EDF bond and a US dollar bond from Deutsche Telekom). We reduced our high yield exposure during the period, investing the profits in higher-quality bonds.

# Investment review

While financial companies still make up a significant portion of the portfolio, we did trim exposure to these, capitalising on strong performance. We also became more selective, switching from some US banks to lower-risk European names.

The sub-fund can hold up to 20% in equities if these offer better value, but our exposure reduced to zero in November with the sale of Adecco shares. Later, we added VW and Bristol Myers Squibb, as declining yields presented select opportunities.

## Outlook

Overall, we maintain a portfolio of high-quality assets with a long duration exposure as we anticipate that interest rates will decrease in response to a lower inflation environment and slow but positive economic growth. The downside risk of higher rates appears limited, as central banks have already implemented significant tightening measures and are unlikely to raise rates much further from current levels. On the other hand, if inflation and growth unexpectedly fall short, there is significant potential for rates to decrease, which would benefit the portfolio, in our view.

The macroeconomic environment remains supportive for investment grade corporate bonds, in our opinion. Inflationary pressures are slowly easing while economies are growing, albeit at a slower pace. Yields remain historically high, and rate cuts are now expected in 2024, which should be supportive for fixed income investments in general. While spreads may not appear historically attractive, we believe the positive macroeconomic environment makes this asset class attractive for investors.

In high yield, spread levels remain unexciting, but yields are still attractive, with scope for absolute returns and carry. With moderate rate cuts, contained spreads, and a mild default environment, we believe the asset class could still deliver positive returns over the next 12 months.

## Richard Woolnough and Stefan Isaacs

Co-sub-fund managers

On 5 February 2024 Stefan Isaacs was appointed co-sub-fund manager. Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures			
	Swaps €'000	Forward currency contracts €'000	Futures €'000	Collateral held as cash €'000
Bank of America Merrill Lynch	0	0	1,391	0
Barclays Bank London	149,035	0	0	337,508
BNP Paribas	0	2,708	0	0
Citigroup Global Markets Limited	0	0	0	4,996
HSBC Bank Plc	0	0	0	681
JPMorgan London	0	0	0	20
Merrill Lynch Pierce Fenner + Smith Inc	0	284	0	0
National Australia Bank Ltd	0	65	0	0
State Street Bank and Trust Company	0	12,540	0	6,686
State Street Bank and Trust Company, London Branch	0	1	0	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

<sup>a</sup> Sub-fund performance before the launch of the sub-fund on 5 September 2018 is that of the relevant Merged Share Class of the M&G Optimal Income Fund, which includes UK taxes but excludes entry and exit charges. The M&G Optimal Income Fund is a UK authorised sub-fund which launched on 8 December 2006 and its non-Sterling share classes merged into M&G (Lux) Optimal Income Fund on 8 March 2019.

<sup>b</sup> Not annualised.

<sup>c</sup> Returns are up to 28 November 2023 the close date of the share class.

# Financial highlights

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

European stockmarkets generally performed strongly during the period under review. This was due to a combination of factors, including signs of easing inflation, hopes of impending interest rate cuts and excitement about artificial intelligence (AI).

Fears that interest rates would remain higher for longer in the autumn of 2023 and ongoing geopolitical issues all triggered dips in market performance during the course of the period.

Against this backdrop, the sub-fund delivered a positive return and outperformed its benchmark, the MSCI Europe Net Return Index, which returned 14.79% (in euro terms) and 14.11% (in US dollar terms). Stock selection in healthcare, communication services and financials boosted relative returns. The sub-fund's above-benchmark position in industrials also had a positive impact on relative performance. In contrast, stock selection in industrials and consumer discretionary dented relative returns, as did the sub-fund's above-benchmark position in communication services.

The top contributors to relative performance were Bank of Georgia and Novo Nordisk. Novo Nordisk has become one of Europe's most valuable companies following exponential demand for its weight-loss drug, Wegovy and diabetes medication, Ozempic.

Key detractors from relative performance included Pets at Home, DSV and WH Smith. Two announcements from the Competition and Markets Authority (CMA) contributed to Pets at Home's poor share price performance over the period. In September, the CMA announced a review of veterinary service fees while in March it initiated a formal investigation into the veterinary industry. One of the CMA's key concerns is that customers are paying too much for treatment.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the period, we added Danish energy company, Ørsted, to the sub-fund, taking advantage of its recent share price weakness. We believe that potential developments such as favourable policy measures and the easing of supply issues could be advantageous for the company.

We also opened a position in Siemens. Excitement about some of Siemens' competitors is growing; the stock therefore seems a good choice from a relative value perspective. We also believe that Siemens offers a significant margin of safety (the difference between the current share price and what we believe to be the intrinsic value of the company).

### ESG engagements

During the course of the period, we engaged with a number of companies on environmental, social and governance issues. We met Danish pharmaceutical company ALK-Abelló to ensure it was on track to have its near-term climate goals validated by the Science Based Targets initiative (SBTi). We suggested that the business disclose its strategy for achieving these targets and that variable remuneration be tied into milestones. The company confirmed that it was at the last stage of the finalisation process for its 2030 target; this will then need approval from the board before being submitted to the SBTi. The company is seeking to simplify its non-financial remuneration KPIs; in doing so, it will consider embedding climate targets into this KPI framework.

We liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We encouraged Novo Nordisk to publish a roadmap detailing its engagement efforts with suppliers. Furthermore, we suggested that it provide forward-looking milestones on its path to decarbonisation and that it disclose emissions connected to its supply of plastic.

# Investment review

We met UK retailer WH Smith to ask it to publish milestones in its roadmap for achieving emission reduction targets. We asked it to tie some executive remuneration into reaching these milestones. We also reiterated our suggestion that its workforce be paid in line with the real living wage. We believe this would act as a retention mechanism.

## Outlook

We are comfortable with the balance of the sub-fund having tweaked it slightly, redirecting capital from some of our top performers to contrarian opportunities, such as Ørsted and Siemens, which is trading at a discount to comparative alternatives and our estimate of its intrinsic value.

This does not mean we are calling for a shift in market leadership or favouring a particular style. We simply continue to pursue our longstanding strategy of maintaining a concentrated and balanced portfolio of high-quality companies, while looking to add to stocks offering a significant margin of safety.

We still have faith in the long-term outlook for those companies we consider winners, such as Novo Nordisk and Schneider Electric. However, we also prudently trim holdings as valuations bake in more future success.

## John William Olsen

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Global equity markets generally performed strongly in the period under review. This was due to a combination of factors, including economic growth, signs of easing inflation and hopes of impending interest rate cuts.

Fears that interest rates would remain higher for longer in the autumn and ongoing geopolitical issues all triggered dips in market performance during the course of the period. However, share prices jumped in December after the Fed indicated that rate cuts were likely in 2024.

The tech sector played a crucial role in buoying equity markets. In 2023, the 'Magnificent Seven' mega cap tech stocks delivered exponential returns, largely due to excitement about artificial intelligence (AI). Some of the big tech names continued to perform well into the first quarter of 2024: NVIDIA's shares soared in February after the company released an exceptional earnings report, further stoking investor enthusiasm about AI.

Against this backdrop, the sub-fund delivered a positive return, but underperformed its benchmark, the MSCI ACWI Net Return Index, which returned 23.95% (in euros) and 23.22% (in US dollars). Stock selection in technology proved particularly detrimental to relative performance. To a lesser extent, stock picking in healthcare and utilities also hurt relative returns. The sub-fund's overweight to healthcare had a further negative impact on relative performance. In contrast, the sub-fund's lack of exposure to consumer staples boosted relative returns, as did stock picking in materials.

Key detractors from relative performance included SolarEdge, HDFC Bank and onsemi. SolarEdge's poor share price performance over the period reflects a beleaguered solar market. High interest rates (dampening demand for solar projects) and reduced incentives in California have dented the solar industry.

The top contributors to relative performance were Bank of Georgia, Horiba and Novo Nordisk. Novo Nordisk has become one of Europe's most valuable companies

following exponential demand for its weight-loss drug, Wegovy and diabetes medication, Ozempic.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

During the reporting period, we took out positions in Bank Rakyat Indonesia and Autodesk. Bank Rakyat Indonesia facilitates social inclusion by providing microlending services to underserved communities. Autodesk, a 3D designs and engineering software company, helps its users make better-informed decisions by creating, visualising and simulating object designs before they are applied. We also sold our entire position in Rockwool during the period; this was a result of its deteriorating fundamentals and our wavering belief in the long-term strength of its business model.

### ESG engagements

We met Danish pharmaceutical company ALK-Abelló to ensure it was on track to have its near-term climate goals validated by the Science Based Targets initiative (SBTi). We suggested that the business disclose its strategy for achieving these targets and that variable remuneration be tied into milestones. The company confirmed that it was at the last stage of the finalisation process for its 2030 target; this will then need approval from the board before being submitted to the SBTi. The company is seeking to simplify its non-financial remuneration KPIs; in doing so, it will consider embedding climate targets into this KPI framework.

We liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI).

We met semiconductor manufacturer onsemi to discuss its decarbonisation plans. We urged the company to have its targets validated by the Science Based Targets initiative (SBTi). We also encouraged it to align long-term executive remuneration with these targets. We

# Investment review

proposed that the company disclose emissions avoided through use of its products in order to demonstrate its positive impact. The company has published its Scope 3 emissions across 12 categories and is developing a climate transition plan.

Last year, we met Oxford Nanopore to verify whether it had effective policies and procedures in place to avoid misuse of its equipment, particularly in China and Tibet. In early 2024, we followed up on this meeting. We asked the company to release a public statement about where it will not sell its products and also suggested that the business provide further training to its operations staff to clearly explain why sales restrictions are in place. We believe this would lead to better enforcement.

## Outlook

We are comfortable with the sub-fund balance and have not felt a need to make major changes. The relative value of the sub-fund now seems even clearer to us as certain parts of the market have become more stretched.

As usual, we are reluctant to make definitive comments on market direction, or which styles will work in the near term. However, we note that there has been a de-rating of the portfolio relative to the benchmark – where certain groups of large-cap stocks are looking increasingly stretched, in our view. We believe that our positive impact companies generally offer good long-term growth prospects. We note that sentiment on many stocks in both the healthcare and renewables sectors is still muted; this should offer a better margin of safety (the difference between the current share price and what we believe to be the intrinsic value of the company) for the portfolio as a whole.

## John William Olsen

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Investment review

## For the year ended 31 March 2024

### Performance review

Global bond markets experienced heightened volatility during the period under review. Sentiment improved significantly amidst a broad market rally at the end of 2023, as inflation moderated, and as the market anticipated that major central banks were reaching the end of their tightening cycles. Despite some weakness in core government bonds during the first quarter of 2024, investment grade (IG) bonds ended the period with positive returns, helped by strong demand for the asset class. Short-dated IG bonds, with less than three years until maturity, also registered a positive return. These bonds have a lower duration (sensitivity to changes in interest rates).

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was ahead of the Markit iBoxx EUR Corporates 1-3 year Index across all of its share classes in the period under review. The index returned 4.75% in euro terms and 6.67% in US dollars over the same period.

The biggest driver of outperformance was the sub-fund's yield curve positioning, particularly our above benchmark (overweight) exposure to sterling and US dollar-denominated bonds.

Our credit positioning also contributed positively. At the sector level, our off-benchmark allocations to securitised debt and credit default swap (CDS) positions added value. However, the sub-fund's below benchmark (underweight) exposure to the industrial and financial sectors weighed on relative returns.

During the review period, the sub-fund maintained a low duration positioning of about 1.6 years, while its credit spread duration (sensitivity to changes in credit worthiness) averaged around 2.8 years over the period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

In the second quarter of 2023, we reduced our credit risk by selling some higher risk bonds and trimming our high yield (HY) CDS index positions (HY bonds have lower credit ratings and are therefore considered riskier). Furthermore, we marginally increased the credit quality at a sub-fund level by adding higher-rated IG bonds.

In July, we closed our remaining additional-tier 1 (AT1s) bond positions, which had rebounded from the lows reached during the failure of Swiss lender Credit Suisse in March.

As credit spreads tightened over the summer, we sold a range of bonds (corporates, financials, HY, and covered bonds) and closed some IG CDS index positions.

In government bonds, we reduced our holdings in UK government bonds (gilts).

In September, we preferred financials bonds to corporates due to the more aggressive spread tightening seen in the new issuances of the latter. Within financials, we focused on senior bonds, including covered bonds which typically carry lower credit risks.

Towards the end of the year, we continued to reduce credit risk, closing our position in French telecommunications firm Iliad, and our remaining HY CDS index positions. However, we still held on to two split bond-rated issuers: Banco Sabadell and Ford Motor.

In 2024, we closed relatively short IG bonds such as Mercedes-Benz Group and EssilorLuxottica.

In the primary market, we participated in new issues including those from Worldline, Bimbo Bakeries, Thames Water, Booking.com and some UK building societies. We also added new senior debt from UK and European banks as well as some AAA-rated residential mortgage-backed securities (RMBS).

### Outlook

As we move into 2024, the macroeconomic environment remains supportive for the IG market.

## Investment review

Inflationary pressures are slowly easing, while economies are growing, albeit at a slower pace. With interest rate cuts widely expected in 2024, this should also be a tailwind for fixed income markets in general.

With a relatively lower duration profile, the short-dated corporate bond asset class should provide a lower-volatility return profile compared against longer-dated bonds in the event that we see further volatility in bond yields.

The extra compensation for investing in corporate bonds from credit spreads has diminished in recent months. In our view, this in turn should lead investors to adopt a more cautious approach and favour higher quality companies, such as those in the IG universe. Moreover, the overall yield offered by this asset class remains historically appealing.

We believe active investors can continue to capitalise on market dislocations to mitigate tighter credit spreads and potentially achieve a better performance.

### Matthew Russell and Ben Lord

Co-sub-fund managers

On 5 February 2024 Ben Lord was appointed co-sub-fund manager.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

In order to ensure that European investors outside the UK had the opportunity to remain invested in M&G's sub-fund strategies, M&G proposed the mergers of non-Sterling share classes in a selection of its UK sub-funds ('the Merging Funds') into equivalent sub-funds within M&G (Lux) Investment Funds 1 ('the Receiving Funds'). Following successful extraordinary resolutions at shareholder meetings on 5 October 2018, the mergers of the non-Sterling share classes of the UK OEIC's took place on various dates prior to 29 March 2019. The past performance of the merged share class has been carried over to the equivalent SICAV share classes.

The performance table below shows the original launch dates of the share classes in the UK 'Merging Funds' in the column headed 'Launch date of the merged share class'. The launch dates of the share classes in the equivalent sub-funds within M&G (Lux) Investment Funds 1 are provided in the column headed 'Launch date of the SICAV share class'. The figure shown in the column headed 'Since performance start date' is calculated from the launch date of the merged share class, where available. 'n/a' in the launch date column for the merged share class indicates that no merged share class existed prior to the launch of the SICAV share class. In this case, the 'since performance start date' is the launch date of the SICAV share class.

The following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. For periods under a year the rate of return is calculated on an absolute basis.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

Most markets posted positive returns in the year ending 31 March 2024, with equities proving a standout performer. Core government bonds were one notable exception, seeing declines over the period. Early in the year, deteriorating global business confidence and sticky core inflation kept uncertainty elevated. Later on, fears of imminent policy tightening dissipated as investors seized on slower US payroll growth and larger-than-expected falls in inflation, helping most risk markets to finish 2023 on a high note.

Investors scaled back their interest rate cut expectations in January following the release of encouraging economic data in the US and a pick-up in inflation in the eurozone and UK. Signs emerged that equity/bond price behaviour has finally decoupled, as major equity indices continued to be resilient despite ongoing interest rate pressure. The optimism returned in March, as the US Federal Reserve (Fed) signalled its intention to make multiple interest rate cuts this year.

Against this backdrop, the sub-fund posted positive returns over the period, with gains driven by our allocation to equities. Over the 12 months, the sub-fund's volatility declined compared to the previous year but tracked higher than expectations over three and five years, reflecting the volatility seen in the markets over the period. Over the past three years, annualised volatility was 9.26% (Euro Class 'A' Accumulation shares). Over five years annualised it was 10.34% versus expected volatility of 4-9%.

Within equities, holdings of US and European shares contributed the most. In the US, tech equities drove performance, buoyed by excitement surrounding the emergence of AI opportunities in the sector. There were also notable contributions from our 'positive impact' equity investments, supported by the prospect of easing financing costs.

The sub-fund's bond investments proved marginally detrimental in aggregate. We made losses on US Treasuries as yields widened (prices fell) amid the Fed's

rate increases. Conversely, our holdings in German bunds and UK gilts added value. Corporate bond investments made fractional losses, with gains in Europe and emerging markets not fully offsetting negative contributions from the US. Lastly, the sub-fund's holdings in Colombian sovereign green bonds provided a material contribution over the period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

In April, we initiated new positions in sovereign green bonds from the UK, Italy and Germany as yields stabilised following the US bank turmoil in March. At the same time, we reduced equity risk by switching into some lower beta names. In June, we removed an overweight exposure to Japanese equities while taking some profits in Colombian green sovereign bonds.

Despite our cautious positioning, we remained fully invested and thus able to participate in November's rally. In the bond space, we reduced exposure towards long-dated US paper in favour of a more balanced exposure across the yield curve and across countries.

In January, we scaled up our allocation to Hong Kong and China equities having closely watched the growing levels of pessimism in the asset class. We also seized a valuation opportunity to add new positive impact names, including EDP Renovaveis, Enphase and Vestas.

In March, we further reduced our holdings of US Treasuries and emerging markets sovereign bonds in favour of German bunds, while using excess cash to increase the overall US dollar exposure. We also recalibrated our positive impact equity holdings to bring the portfolio's exposure up to date with the latest recommendations from the impact investing team.

### Outlook

Market volatility is likely to persist in the months ahead, given the recent resilience of US macroeconomic data and its potential to put pressure on inflation and interest rate expectations.

# Investment review

Nevertheless, we remain constructive on US Treasuries. We believe that 2024 might bring about potentially more conducive conditions for short-term spikes in US yields – and likely therefore in other government bonds as well – which could present us with investment opportunities to purchase these assets and increase our holdings at potentially attractive levels.

As usual, we expect that keeping things in perspective and exercising judgment will once again be key to successfully managing the portfolio through periods of high volatility.

## **Maria Municchi**

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

<sup>a</sup> Fair valued.

<sup>b</sup> As part of the sub-fund merger between the M&G (Lux) Sustainable Allocation Fund and M&G (Lux) Conservative Allocation Fund on 21 October 2022, two sanctioned Russian-listed securities were transferred into the beneficial ownership of the M&G (Lux) Sustainable Allocation Fund. As both sub-funds have been prohibited from selling these assets, they have remained in a custody account of M&G (Lux) Conservative Allocation Fund.

All securities are on an official stock exchange listing except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

The accompanying notes to the financial statements are an integral part of these financial statements.

# Counterparty exposure

## Counterparty exposure

Counterparty	Counterparty exposures	
	Forward currency contracts €'000	Futures €'000
Bank of America Merrill Lynch	0	28
Barclays Bank London	327	0
HSBC Bank Plc	13	0
JPMorgan London	11	0
State Street Bank and Trust Company	27	0
State Street Bank and Trust Company, London Branch	141	0

Exposure represents the sub-fund's exposure to that counterparty.

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

Emerging market (EM) debt posted solid returns during the review period, largely due to a powerful year-end rally in the fourth quarter of 2023 amid market expectations of interest rate cuts in developed markets (DM).

EMs, however, continue to be ahead of DM central banks in terms of their monetary easing cycle. After raising their interest rates early to combat inflation, well ahead of their DM peers, EMs have embarked on reducing interest rates, and in some cases, quite aggressively.

Despite markets repricing lower the prospect of rate cuts in 2024 of late, EM debt, notably the hard currency (HC) segment, recovered amid a broad risk-on environment. High yield (HY) bonds, those rated below investment grade (IG) as they are considered to be riskier, outperformed IG markets.

Against this backdrop, the sub-fund delivered a positive total return (the combination of capital growth and income) and was behind the JPM CEMBI Broad Diversified Index across its euro and US dollar share classes, but ahead in its sterling share classes, in the period under review. The index returned 9.82% in euros, 9.17% in US dollars and 6.85% in sterling over the period.

At the country level, our holdings in Mexico added the most value due to our above-benchmark positioning and strong security selection. In contrast, our underweight in Macau detracted the most.

At the sector level, the sub-fund's overweights and security selection in banking and technology (including electronics) contributed positively. On the other hand, underweights in energy, leisure and basic industry weighed on performance, though our choices in these sectors partially outweighed the deduction from sector allocation.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

In the primary market, we participated in new banking issues including those from Mauritius Commercial Bank, Abu Dhabi Commercial Bank, as well as quasi-sovereign banks, First Abu Dhabi Bank and Hungary's OTP Bank. In September, we moved from an underweight to a neutral position in Turkey, following a return to more orthodox monetary policy by the Turkish Central Bank, by participating in new issues from the banking sector such as Yapı Kredi and The Industrial Development Bank of Turkey. In addition, we bought new bonds from other sectors including household appliances company Arçelik and WE Soda, a leading producer of natural soda ash.

We also increased our exposure to Chilean telecommunications firm VTR and French mining company Eramet, among others. Towards the end of the year, we rebalanced the sub-fund's positioning towards HY bonds by reducing a number of high-quality names such as Taiwanese semiconductor firm TSMC and mining company Anglo American.

We exited DME Airport and Celara following good performance. On the other hand, we reduced, or exited, several positions over valuation concerns such as Cemex, Woori Bank and Česká spořitelna, one of the biggest banks in the Czech Republic. In India, we reduced our large above-benchmark exposure to renewables by selling some names such as ReNew.

### Outlook

Despite some uncertainty over geopolitical risk, we feel the broader picture is still favourable for EMs in 2024. Economies have been surprisingly resilient: first adapting to high inflation post-COVID and then to higher interest rates.

With the Federal Reserve expected to cut interest rates in 2024, despite US inflation appearing stickier than expected, we believe there is cause for optimism in EM

## Investment review

debt, provided the US dollar does not strengthen any further and risk aversion remains subdued.

In terms of EM corporate debt, we believe that corporate fundamentals are in a good state. EM companies have much less debt, and leverage, than their DM counterparts across both the IG and HY segments. This resilience has helped EM corporates, with expected defaults now behind the highs of 2022 and 2023, and with much of the significant idiosyncratic stories ie Russia, Ukraine, China Real Estate now settling.

While the double-digit returns we saw in 2023 may not be replicated again, EM debt still offers compelling opportunities, in our view, especially for investors facing reinvestment risk from short-dated bonds.

### **Charles de Quinsonas and Nick Smallwood**

Co-sub-fund managers

On 1 March 2024 Nick Smallwood was appointed co-sub-fund manager.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

# Investment review

## For the year ended 31 March 2024

### Performance review

Global bonds generally delivered solid returns in the period under review, as inflation moderated and major central banks reached the end of their tightening cycle. Sentiment improved significantly amidst a broad market rally at the end of 2023. Indications of a dovish pivot in monetary policy (interest rate cuts) from the US Federal Reserve sparked a powerful two-month rally in core government bonds, benefiting all segments of the fixed income market.

Despite some weakness in core government bonds during the first quarter of 2024, high yield (HY) bonds continued on their positive trajectory, helped by strong technical elements. Meanwhile, fears of recession faded amid strong macroeconomic data, notably in the US. Global high yield bonds outperformed investment grade credit and sovereign bonds during the period under review.

Against this backdrop, the sub-fund delivered positive total returns (the combination of capital growth and income) across its share classes, with mixed relative returns against its benchmark index, the Bloomberg MSCI Global HY Corporate ESG BB+ Sustainable SRI Bond Index, which returned 8.45% in euros and 10.64% in US dollars in the period under review.

While duration positioning made a positive contribution to relative performance, credit selection was a drag on relative returns.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

There was an active flow of new issues from a range of sectors, especially during the second half of the review period. In the first half of the review period, we participated in a number of deals including from beauty company Coty, Sunnova Energy, Forward Air and American Airlines.

In Europe, we participated in new issues from Intesa Sanpaolo (financials) and France's telecommunications firm Iliad. In the UK, we bought new bonds from Aston Martin, Pinewood, British Telecommunications and Heathrow Funding. Elsewhere, we participated in new deals from Japanese firm Rakuten and Australian miner Mineral Resources.

In the secondary market, we trimmed some cyclical exposure (for example homebuilder KB Home, and retailer Ocado), and instead added higher-quality names such as Darling Ingredients and Charter Communications. We also trimmed distressed telecommunications firm Altice France, which reported mixed results and Ford Motors, after it was fully upgraded back to investment grade. We sold our holdings in Sprint, Virgin Media, and Macy's.

In 2024, we increased our holdings in healthcare firm (Owens & Minor) and telecommunication companies (Virgin Media and Telecom Italia) while reducing our underweight in real estate. We added real estate investment trusts (REITs) MPT Operating Partnership and Sweden's SBB.

In March, we closed our positions in Burger King (good performance) and SBB (ratings downgrade).

### Outlook

HY corporate issuers' fundamentals have, so far, held up reasonably well. This is largely thanks to buoyant consumption and pre-emptive corporate refinancings that have enabled issuers to lengthen their maturity profile at attractive rates.

Nevertheless, as developed economies slow down and the impact of higher interest rates starts biting into corporate balance sheets, we would expect to see an uptick in default rates. Our base case scenario remains that of a mild default cycle, which would not be too damaging for the corporate sector.

As HY markets continue to see inflows and issuances remain light as compared to previous years, technical elements (supply/demand imbalances and attractive all-in yields) continue to support credit spread containment. Against a backdrop of moderate interest

# Investment review

rate cuts, contained spreads and a mild default environment, in our view, the asset class could still deliver good returns over the next 12 months.

## James Tomlins and Lu Yu

Co-sub-fund managers

At the start the review period Stefan Isaacs was co-sub-fund manager. He was replaced on 15 January 2024 by Lu Yu.

Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

# Investment review

## For the year ended 31 March 2024

### Performance review

The start of the reporting period in April 2023 saw a more subdued month, following the banking sector turmoil in March, with most asset classes trading in a fairly narrow band and ended the month close to where they began. Inflation remained front of mind for investors and continued to show resilience across developed markets, leading to European sovereign bonds underperforming during the month, with UK gilts in particular performing poorly following March CPI inflation data of 10.1%.

As the quarter progressed, the focus remained on inflation and interest rates in the developed economies. The Federal Reserve (Fed), ECB and Bank of England did not disappoint relative to expectations, with each delivering further increases in official interest rates during May. Fed Chair Powell, in an attempt to manage expectations, maintained 'some additional policy firming may be appropriate' – the equivocal nature of the statement was interpreted by the market that the end of the hiking cycle was approaching.

Overall, inflation and expectations of future interest rates continued to provide the backdrop for markets, with significant dispersion of corporate spreads continuing to be a feature of credit markets.

Towards the end of the quarter June was a less eventful month for financial markets than April and May, with lower volatility and tightening credit spreads. Rates did move higher following sticky inflation prints, hawkish central bank sentiment and data that continues to look generally strong despite some uncertainty. Risk assets were overall well behaved however, with spread tightening and income making up for the rates sell-off within most corporate debt asset classes. While the Fed paused its rate hikes, it kept sentiment hawkish and signalled further rate hikes to come. The ECB hiked in line with expectations, while the BoE effected a higher than expected hike of 50bps after UK inflation continued to surprise to the upside, being the highest in the G7.

Higher rates for longer was the main rhetoric from central banks across the major developed markets in Q3. Labour and manufacturing economic data outperformed expectations in the United States whilst the Federal Reserve (Fed) opted to only hike rates once during the quarter. In contrast, the European Central Bank (ECB) raised policy rates in July and September, reaching a deposit rate of 4% for the first time in its history. European inflation has been stubbornly entrenched above the ECB's target range but has been on a negative trajectory this year. The Bank of England enacted a 25 basis point hike amidst indications of improving consumer confidence and high, but better than expected, inflation data.

The bond market sell off in the United States was the largest story of the third quarter. Yields on ten year treasury bonds briefly reached yields (4.69%) not seen since 2007. This has been attributed to markets accepting Fed Chair Jay Powell's claims that interest rates will remain elevated for a prolonged period of time. Fitch downgraded the US from AAA to AA+ due to growing government debt and expected fiscal deterioration over the next three years. Eurozone annual inflation fell to 4.3% by the end of the quarter and many market participants now expect that the ECB has completed its monetary tightening cycle.

The fourth quarter began with concerns over geopolitical risk following conflict breaking out in the Middle East and fears that this may spread into the wider region, which led to a risk off tone. The economic data continued to come in relatively strong, particularly from the US, adding to fears of higher rates for longer. November and December saw a major rally in markets off the back of fresh hopes of a soft landing and potential central bank cuts on the horizon. The rally was triggered initially by dovish tones from the FOMC meeting at the start of November, followed by the Fed's December dot plot which took investors by surprise with a far more dovish tone of 75bps of rate cuts being signalled for 2024. In turn, investors' expectations for inflation returning to target without a recession grew and this rhetoric was further supported by economic data through to year end.

## Investment review

Europe saw a similar story, with supportive data and ECB cuts being largely priced in by April 2024. Inflation continues to trend in the right direction, reflecting the decline in the money supply.

During the first quarter of 2024, higher US inflation prints and more hawkish comments from the Fed combined with the positive growth data for the US economy (+3.4% in Q4 23), provided a positive backdrop for risk assets, notably equities and high yield. Eurozone and UK inflation continued their downward trajectory, albeit the slower pace and renewed uncertainty of moving back to official target levels in the near term saw the market unwind some of the rate cut expectations. With inflation proving persistent, timing of initial cuts in official rates moved out from Q1 to mid-year.

Separately, March 2024 also saw two significant milestones: (i) the Bank of Japan ending their negative interest rate policy, and (ii) the Swiss National Bank being the first G10 currency to cut rates this cycle, with a 25bp cut in their policy rate to 1.50%. Overall yields remained historically high at the end of the sub-fund year, and the outlook for interest rates less certain in major economies.

### Portfolio activity

Early in the reporting period the market remained unsettled by the banking sector turbulence of March, which ultimately saw the takeover of Credit Suisse by UBS. In this environment bank debt cheapened, and the sub-fund added to risk in this area. The sub-fund manager increased exposure to senior financials which appeared attractive relative to non-financials, and selective Tier 2 bonds where spreads had decompressed relative to senior bonds.

The manager favoured European national champion banks, and those with a strong presence in their domestic markets, and included names such as Arion Banki, BFCM and Caixabank. The sub-fund also reduced risk through decreasing exposure to areas of the market which had performed well, including selective industrials and utilities, whilst increasing exposure to real estate names where valuations

appeared attractive given the underlying (mis)perception of their credit fundamentals. Against the prevailing backdrop of an expected recession, European interest rates remained at levels that we believed were not fully reflective of the risks; consequently we increased our exposure to Germany and Italy early in the reporting period.

As rates continued to rise in the US we maintained our exposure to short dated bonds as the yield curve inversion became more pronounced, shortening the duration of our US TIPS position in July. The sub-fund also added to exposure in Dollar-bloc government markets, adding to Canadian holdings and adding a small position in New Zealand bonds. During the summer months European debt markets remained relatively flat whilst US bonds sold off which was a small negative for performance. Credit spreads tightened marginally across markets, with the exception of European High Yield which saw a modest widening; overall credit gains outweighed the small drag from interest rate positioning.

In September markets refocused on interest rate and inflation expectations once again, and the manager added to positions in longer dated bonds in the UK, Australia and Germany. In the US, short maturity positions in US Treasuries were increased as the yield curve inversion offered a compelling opportunity. In credit markets the sub-fund focused on reducing exposure to higher beta areas of the market, which no longer offered sufficient compensation for risk. This primarily included high yield issuers, corporate hybrids and investment grade bonds. Financial bonds still remained a source of value compared to other sectors – particularly lower Tier 2 debt, where we purchased bonds issued by Uniqa Insurance Group, and in September the manager added selective Additional Tier 1 bonds issued by well-capitalised European Banks which traded at attractive levels, including LBBW, Deutsche Bank and Belfius Banque.

The final months of the year saw significant interest rate volatility, driven by the perception that US interest rates would fall aggressively in the new year, prompted by the dovish comments from Federal Reserve Chair

# Investment review

Powell, and reflected in the FOMC minutes published in December. The sub-fund was positioned to benefit from the rally, and gradually reduced interest rate exposures in major markets over the balance of the year and into the first quarter of the new year. Investment Grade credit performed strongly in this environment with spreads tightening, led by higher beta names, cyclicals, financials and BBB rate industrials. All in yields remained historically high, offering a positive real yield for investors. The sub-fund continued to steadily de-risk into the market strength as spreads tightened across sectors, particularly in the second half of the quarter. Opportunities were also added on a stock specific basis.

Overall, Financial bonds continued to remain a source of value compared to other sectors – predominantly European banking names. The sub-fund remained active in the primary market into year end, increasing exposure to selective names across sectors such as AIB, International Design Group (Consumer Goods), Tapestry (Retail), Sogecap (Insurance Tier 2) and Southern Water.

Moving into the new year, expectations of official interest rate reductions were steadily unwound, as central bankers sought to regain control of the narrative. Rising interest rate expectations were negative for interest rate positioning, but credit continued to benefit from tighter spreads and an attractively priced new issuance pipeline. The sub-fund continued to de-risk, taking profits in issuers and sectors that had delivered strong performance (such as Real Estate, high yield industrials and subordinated financials) and recycling proceeds into more liquid defensive assets. Specifically the manager reduced exposure to hybrid debt of real estate issuers such as Castellum, Unibail and Balder, subordinated debt of Allianz and Engie, as well as reducing exposure to broader industrials that had performed strongly.

At the end of the reporting period, the aggregate interest rate exposure of the sub-fund was marginally greater than at the start of the period, with UK gilt exposure accounting for the majority of the difference. Credit risk was reduced steadily though the final

months of the reporting period, ending towards the lower band of risk that we have experienced with this strategy; the sub-fund holdings of higher quality lower yielding defensive assets increased over the period, giving the sub-fund the ability to move rapidly to take advantage of future opportunities.

## Outlook

The sub-fund remains well positioned to capture opportunities that may arise from bond market volatility in both the interest rate and credit markets. The flexible opportunity set and global reach of the analyst team ensures that we have clear insight and visibility of issuer risks, and the highly diversified nature of the sub-fund minimises the impact of any unforeseen credit events. Looking forward, increased volatility in markets seems likely, with expected cuts in central bank official interest rates, and the inflation outlook in the major economies being the key variables. An active approach will be essential in this environment. From one side, the falling inflation environment has stalled and the strength of the economy (notably in the US) with buoyant growth and near full employment argues for no change in rates near term. However, in Europe, the risk of a recession remains elevated as growth falls in most key member countries. It is at these points of inflection that policy errors often occur: the sub-fund stands ready to take advantage of attractively priced credit opportunities and to benefit from short term volatility in the interest rate markets.

## Jim Leaviss, Richard Ryan and Eva Sun-Wai

Co-sub-fund managers

On 5 February 2024 Eva Sun-Wai was appointed co-sub-fund manager. Investment review information as at 31 March 2024.

Employees of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

# Investment review

## For the year ended 31 March 2024

### Performance review

The sub-fund delivered a positive return but lagged its benchmark, the Morningstar EUR Aggressive Allocation – Global sector, which returned 6.40% over the period. As the sub-fund launched in December 2021, it is less than five years old and we therefore cannot report on volatility over five years.

Global markets recorded positive returns over the review period with much of the performance delivered in the latter part of 2023. In the earlier part of the review period, most asset classes were dragged down by concerns over the impact of high interest rates before signs of moderating inflation led to a strong rebound at the end of the year. Equities and bonds rebounded on optimism that peak interest rates had been reached and that rate cuts would come sooner than originally predicted. Early in the new year, however, investors scaled back hopes of imminent rate cuts as various data releases continued to suggest economic resilience in the US. Government bonds weakened in response. In contrast, corporate bonds and equities continued to record solid returns, buoyed by good corporate earnings results and optimism that global central banks had engineered a soft economic landing. Elsewhere, infrastructure assets, particularly those linked to renewable energy, performed poorly on concerns around the impact of high interest rates on long-term project cash flows.

Against this backdrop, the sub-fund's large allocation to US equity markets was the best contributor to returns. Exposure to credit also delivered a positive contribution while smaller allocations to government bonds and infrastructure detracted from performance.

Turning to regional equity allocations, the three main US exposures – technology, financials and positive impact – delivered positive contributions. Within technology, the semi-conductor companies benefited from investor enthusiasm around developments in artificial intelligence, while the various positions in financials were relatively resilient amid the negative sentiment over interest rate rises. Conversely, the sub-fund's

positive impact stocks rebounded towards the end of the review period on the prospects of moderating interest rates. In Europe, stock selection was particularly strong in Germany which helped mitigate the exposure to clean energy companies which suffered over concerns around the impact of rising costs versus capital-intensive projects with long lead times. Turning to Asia ex-Japan, allocation to Taiwanese stocks helped mitigate exposure to weak Hong Kong markets. The sub-fund's more modest exposure to Japan also contributed to total returns.

Within corporate bonds, high yield credit remained relatively resilient during the anxiety around the impact of high interest rates, but participated in the market rebound and the optimism over improved prospects for global economic growth. Investment grade credit was also positive. By contrast, both developed and emerging government bond markets detracted from total returns. Markets were dragged down by the aggressive rate hiking cycle before selling off again during the first quarter of 2024 on disappointment that interest rate cuts were not as forthcoming as originally hoped. The sub-fund's exposure to interest rate-sensitive renewables infrastructure assets also hurt performance.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

Beyond periodic portfolio rebalancing, we made little change to asset allocation over the review period, with the majority of the sub-fund remaining exposed to equities. We did, however, slightly increase our sovereign bond exposure, mainly through UK government bonds (gilts), as markets looked oversold last year. Also in the earlier part of the review period, we took partial profits from our Colombian green sovereign bond position and reduced our Japanese equity overweight down to a neutral position following a relative valuation decision. Towards the end of 2023, we trimmed equity risk mainly through European banks and other financials. The market rally at the end of the year

## Investment review

prompted us to sell some of our exposure to longer-dated US government bonds. Early in 2024, we deployed these proceeds into new positions in positive impact names such as EDP Renovaveis, Enphase and Vestas which were trading at attractive levels.

### Outlook

Given the elevated volatility, continued conflict in the Middle East and an election year for multiple countries, we remain highly selective, focusing on companies with robust cashflows, strong balance sheets and trading at conservative valuations.

An area that we feel is becoming increasingly attractive is renewable energy, which suffered last year on concerns around inflation implications for long-term project economics and the potential impact of 2024 elections on government policies that currently support this space. So far this year, however, we have seen inflation levels moderate and renewable energy companies begin to negotiate inflation-linked contracts to help manage rising costs and high levels of borrowing against long project lead times. Meanwhile, governments across the world have continued to be supportive of green investments given the ambitious targets around national decarbonisation goals. As a result, we believe valuations among renewables now provide a good margin of safety, but recognise that sentiment for the sector may remain volatile as almost 60% of the world's democratic population heads for the polls this year.

### Maria Municchi

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 9 fund under SFDR. Information related to the sustainable investments of the sub-fund required to be disclosed under SFDR is available in Annex 1.

# Statement of investments

# Financial highlights

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>					
Class 'LI' Accumulation	+7.8	n/a	n/a	-2.0	07.12.21

# Financial highlights

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

### Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding		NAV per share		TER <sup>a</sup> (%)

# Investment review

## For the year ended 31 March 2024

### Performance review

Fixed income investments delivered a mixed performance in the 12 months under review. Shifting expectations around inflation and interest rates brought some volatility for government bonds, but corporate and high-yield bonds proved more resilient.

The period began relatively calmly although UK government bonds (gilts) underperformed after inflation surprised to the upside. However, volatility returned in the summer as persistently high core inflation and resilient macroeconomic data in the US led the Federal Reserve to take a more hawkish stance. Concerns that interest rates would remain higher for longer pushed up government bond yields, and their prices fell accordingly.

Sentiment improved towards the end of 2023. With inflation falling steadily, central banks began signalling interest rate cuts on the horizon, raising hopes of a soft landing for major economies. Both fixed income and equity markets received a welcome boost, rallying strongly throughout November and December.

However, the first quarter of 2024 forced investors to adjust their expectations as sticky US inflation and stronger-than-expected economic data delayed the prospect of rate cuts. Again, government bonds suffered most, with yields on US Treasuries, German bunds and UK gilts all rising.

On the other hand, corporate bonds fared better throughout the period. Demand remained robust, and tightening credit spreads (the yield differential between a corporate bond and the corresponding government bond with the same maturity) reflected investor confidence in the macroeconomic environment. Investment grade bonds delivered positive returns, but were outperformed by riskier high-yield investments.

Over the review period, the M&G (Lux) Sustainable Optimal Income Bond Fund delivered a positive total return (the combination of income and capital growth) across all its share classes, many of which outperformed its benchmark. Its benchmark is a

composite index equally weighted across the Bloomberg MSCI Global Agg Treasury ESG BB+ Sustainable SRI Bond Index EUR Hedged, Bloomberg MSCI Global Agg Corporate ESG BB+ Sustainable SRI Bond Index EUR Hedged and Bloomberg MSCI Global High Yield ESG BB+ Sustainable SRI Bond Index EUR Hedged. This returned 5.26% in euros and 7.39% in US dollars over the period.

Our duration positioning was the main driver of outperformance during the period under review, with the duration impact of our sterling holdings particularly positive. In terms of credit, our holdings in financials and GBP investment grade corporates boosted sub-fund performance over the period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Investment activities

We gradually lengthened sub-fund duration (a measure of sensitivity to interest rates) during the review period, in anticipation of falling inflation and slow-but-steady growth. We added gilts and US Treasuries at various points when prices fell, but reduced exposure to better-performing German bunds. We also added government bonds from selected countries including Hungary, France, Italy, New Zealand and Poland.

We remained cautious in credit, preferring to limit risk and increase quality given tightening credit spreads. Early in the period, we participated in new issues from Allianz, AT&T and Australia's Sydney Airport. Later additions included Morgan Stanley, Nestlé, Santander and Australia Pacific Airports. We reduced our exposure to bonds that have performed strongly in recent years; for example, we sold an AT&T hybrid bond and long-dated GDP Suez bond. We reduced our high yield exposure during the period, investing the profits in higher-quality bonds.

While financial companies still make up a significant portion of the portfolio, we trimmed exposure to these, capitalising on strong performance.

# Investment review

## Outlook

Overall, we maintain a portfolio of high-quality assets with a long duration exposure: we anticipate that interest rates will decrease in response to a lower-inflation environment and slow but positive economic growth. The downside risk of higher rates appears limited as central banks have already implemented significant tightening measures and are unlikely to raise rates much further from current levels. On the other hand, if inflation and growth unexpectedly fall short, there is significant potential for rates to decrease, which would benefit the portfolio, in our view.

The macroeconomic environment remains supportive for investment grade corporate bonds, in our opinion. Inflationary pressures are slowly easing while economies are growing, albeit at a slower pace. Yields remain historically high, and rate cuts are now expected in 2024, which should be supportive for fixed income investments in general. While spreads may not appear attractive on a historical basis, we think the positive macroeconomic environment makes this asset class particularly appealing to investors.

In high yield, spread levels remain unexciting, but yields are still attractive, with scope for absolute returns and carry. With moderate rate cuts, contained spreads, and a mild default environment, we believe the asset class could still deliver positive returns over the next 12 months.

## Richard Woolnough, Anjulie Rusius and Stefan Isaacs

Co-sub-fund managers

On 5 February 2024 Anjulie Rusius and Stefan Isaacs were appointed co-sub-fund managers.

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>

# Investment review

## For the period from 16 November 2023 (launch date of the sub-fund) to 31 March 2024

### Performance review

As the M&G (Lux) TAP Global Listed Infrastructure Fund launched on 16 November 2023 we do not have 12 months performance to report.

Global stocks rallied in the period under review, fuelled by gains for US technology giants, such as NVIDIA and Microsoft. These shares surged because of optimism about the potential for artificial intelligence (AI). Still, the so-called 'Magnificent Seven' splintered towards the end of the period, with Apple and Tesla, in particular, suffering declines. The technology gains meant that the US was a star market in the review period. Japan also outperformed, with the Nikkei surpassing its previous peak, set in 1989. Europe lagged, with the UK underperforming Germany and France in sterling terms. Emerging markets and Asia ex-Japan were both held back by weakness in China.

The AI excitement meant that information technology was the best performing sector in the MSCI ACWI index during the review period; however, the industry is outside of the sub-fund's remit. Communications services and financials also outperformed. Consumer staples was the biggest laggard as inflation squeezed shoppers' purchasing power. Utilities and real estate were also underperformers, partly because high interest rates dented profit expectations. This was a significant headwind for listed infrastructure strategies.

As at the end of the period, the sub-fund held large above-benchmark exposures to real estate and utilities and large below-benchmark exposures to information technology, consumer discretionary and healthcare stocks. Its exposure to real estate is gained through its holdings in real estate investment trusts such as Alexandria, American Tower and Crown Castle. Utilities names include AES, American Waterworks, Nextera, National Grid and Edison International. The sub-fund also held an above-benchmark exposure to energy

through its holdings in names such as natural gas company Oneok, Gibson Energy, Keyera and Enbridge.

### Investment activities

The sub-fund pursues a low turnover, buy-and-hold strategy.

### Outlook

Despite the recent challenging backdrop for listed infrastructure, we remain highly enthused by the opportunities in the asset class. The combination of decarbonisation, digitalisation and demographics are driving structural changes that can only be met with significant investment in real assets.

The market has been focused on the undeniably strong earnings power in US technology; but achieving the potential productivity gains these companies promise can only be harnessed with sustainable energy sources, secure supply chains, state of the art data centres and communications networks.

Recent activity in the private infrastructure space has helped to cement our view that this asset class will continue to attract capital. The unceasing drive towards electrification of the economy, re-shoring and enhanced resource security, as well as demographic change with urban migration, along with the need for real income growth – lead us to believe that listed infrastructure has a bright future.

Our companies are broadly delivering as we would have hoped; growing their earnings and dividends whilst continuing to invest in future growth. The valuations we feel do not fully reflect that execution and delivery. We continue to believe that listed infrastructure can continue to offer compounding income growth with economic resilience and inflation protection.

# Investment review

## Alex Araujo

Sub-fund manager

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>Euro</b>					
Class 'CI' Accumulation	n/a	n/a	n/a	+7.8 <sup>a</sup>	16.11.23

<sup>a</sup> Not annualised.

# Financial highlights

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

### Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding as at 31.03.24	NAV per share as at 31.03.24	TER <sup>a</sup> (%) as at 31.03.24
<b>Euro</b>		€	
Class 'CI' Accumulation	4,395,905.750	10.7809	1.30

<sup>a</sup> Includes charges from underlying investments. Please see the relevant Key Investor Information Document for a more reliable estimate of future charges (available from our website at mandg.lu).

NAV at sub-fund level	31.03.24 US\$'000
Net assets	51,110
Swing pricing adjustment (see note 10)	n/a
<b>Swing net assets</b>	<b>51,110</b>

# Investment review

## For the period from 19 March 2024 (launch date of the sub-fund) to 31 March 2024

### Performance review

The sub-fund aims to provide a higher total return (capital growth and income) than that of the US investment grade corporate bond market, as represented by the ICE BofA US Corporate Index, over any 5-year period, while applying environmental, social and governance (ESG) criteria.

It seeks to make these investments using an exclusionary approach, as described in the prospectus. At least 70% of the sub-fund is invested in corporate bonds denominated in, or hedged to US dollars, whose issuers may be located in any country, including emerging markets.

The sub-fund will typically invest directly, but may also take positions via derivative instruments. The manager applies a flexible investment approach, seeking to take advantage of relative value opportunities.

Most stockmarkets and bond markets around the world ended the first quarter in high spirits, posting gains in March. Several stockmarkets hit all-time highs, while developed market sovereign bonds recorded their first monthly gain of 2024.

In the US, the Dow Jones got to within a whisker of 40,000 and in Japan the Nikkei 225 passed through 40,000 for the first time. In terms of sectors, energy, mining stocks and financials featured particularly strongly.

More 'dovish' comments from some central banks proved to be a positive backdrop for sovereign bonds. Spreads continuing to tighten, provided further support for investment grade bonds and within emerging markets, hard currency sovereign bonds outperformed local currency markets.

In the US, Federal Reserve Chair Jerome Powell said the central bank was not far from reaching the confidence it needs that 'inflation is moving sustainably down to 2%'. Meanwhile, confidence among investors that the

European Central Bank (ECB) will cut interest rates this June increased after the ECB's monetary policy meeting. The ECB left rates unchanged, but revised its forecast as to when inflation will get back to its 2% target, to 2025, rather than 2026.

In the currency markets, the US dollar generally strengthened against most major currencies in the month, whilst the yen weakened, despite the Bank of Japan (BoJ) ending its negative interest rate policy. The BoJ raised interest rates, for the first time since 2007.

The first quarter of 2024 saw investment grade (IG) corporate bond new issuance reach record levels. Spreads continued to tighten in March, supported by the markets' perception that the Fed would maintain three rate cuts this year – despite the recent increase in inflationary pressures. As in prior months, the asset class continues to provide historically elevated levels of yield, with the USD IG index yield at 5.4%.

Throughout March, higher-beta names continued to outperform, and credit curves flattened. Among ratings, BBBs generally outperformed higher quality categories, while cyclicals outperformed non-cyclicals.

### Outlook

We believe the macroeconomic environment remains supportive for the asset class. Inflationary pressures are slowly easing, while economies are growing, albeit at a slower pace. Yields remain historically high, and rate cuts are now expected in 2024, which should be supportive for fixed income investments in general. We believe active investors can continue to capitalise on market dislocations, mitigating the impact of tighter spreads and potentially achieving better performance.

### Erica Tully, Anthony Balestrieri and Nikhill Patel

Co-sub-fund managers

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

# Investment review

## **Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation**

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>US dollar</b>					
Class 'A' Accumulation	n/a	n/a	n/a	+0.8 <sup>a</sup>	19.03.24
Class 'A' Distribution	n/a	n/a	n/a	+0.8 <sup>a</sup>	19.03.24

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

### Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding as at 31.03.24	NAV per share as at 31.03.24	TER <sup>a</sup> (%) as at 31.03.24
<b>US dollar</b>		<b>US\$</b>

Swing pricing adjustment (see note 10)	176
<b>Swing net assets</b>	<b>75,796</b>

# Investment review

## For the period from 21 March 2024 (launch date of the sub-fund) to 31 March 2024

### Performance review

The sub-fund aims to provide a higher total return (capital growth and income) than that of the US high yield corporate bond market, as represented by the ICE BofA US High Yield Constrained Index over any 5-year period, while applying environmental, social and governance (ESG) criteria.

It seeks to make these investments using an exclusionary approach, as described in the prospectus. At least 80% of the sub-fund is invested in high yield corporate bonds denominated in US dollars or hedged to US dollars, whose issuers may be located in any country, including emerging markets.

The sub-fund will typically invest directly, but may also take positions via derivative instruments. High yield corporate bonds typically pay higher rates of interest to compensate investors for the greater risk of default. The sub-fund manager will seek to provide exposure to a broad range of issuers across a variety of industrial sectors.

Most stockmarkets and bond markets around the world ended the first quarter in high spirits, posting gains in March. Several stockmarkets hit all-time highs, while developed market sovereign bonds recorded their first monthly gain of 2024.

In the US, the Dow Jones got to within a whisker of 40,000 and in Japan the Nikkei 225 passed through 40,000 for the first time. In terms of sectors, energy, mining stocks and financials featured particularly strongly.

More 'dovish' comments from some central banks proved to be a positive backdrop for sovereign bonds. Spreads continuing to tighten, provided further support for investment grade bonds and within emerging markets, hard currency sovereign bonds outperformed local currency markets.

In the US, Federal Reserve Chair Jerome Powell said the central bank was not far from reaching the confidence it needs that 'inflation is moving sustainably down to 2%'. Meanwhile, confidence among investors that the European Central Bank (ECB) will cut interest rates this June increased after the ECB's monetary policy meeting. The ECB left rates unchanged, but revised its forecast as to when inflation will get back to its 2% target, to 2025, rather than 2026.

In the currency markets, the US dollar generally strengthened against most major currencies in the month, whilst the yen weakened, despite the Bank of Japan (BoJ) ending its negative interest rate policy. The BoJ raised interest rates, for the first time since 2007.

March saw solid performance from the high yield (HY) market, with global HY delivering 1.1% during the month, taking year-to-date returns to 2.0%. Most sectors delivered solid performance in the month, aside from telecommunications and cable, which were down 2% and 0.1% respectively. It was the busiest quarter for HY issuance in over two years; however, the pace moderated during March and is expected to continue along this trajectory going forward. US HY returned 1.2% in March and 1.5% year to date.

### Outlook

High yield corporate issuers' fundamentals have, so far, held up reasonably well. This is largely thanks to buoyant consumption and pre-emptive corporate refinancings that have enabled issuers to lengthen their maturity profile at attractive rates.

Nevertheless, as developed economies slow and the impact of higher interest rates starts biting into corporate balance sheets, we would expect to see an uptick in default rates. Our base-case scenario remains that of a mild default cycle, which would not be too damaging for the corporate sector. As HY markets continue to see inflows and issuances remain light as compared to previous years, technical elements (supply/demand imbalances and attractive all-in yields) continue to contain credit spreads. Against a backdrop of moderate interest rate cuts, contained spreads and a

# Investment review

mild default environment, the asset class could still deliver good returns over the next 12 months, in our view.

**Nikhil Patel, Erica Tully and Anthony Balestrieri**

Co-sub-fund managers

Investment review information as at 31 March 2024.

Employee of M&G FA Limited which is an associate of M&G Luxembourg S.A.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

## Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

## Sub-fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

### Long-term performance by share class as at 31 March 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
<b>US dollar</b>					
Class 'A' Accumulation	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'A' Distribution	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'C' Accumulation	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'C' Distribution	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'CI' Accumulation	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'CI' Distribution	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24
Class 'LI' Accumulation	n/a	n/a	n/a	+0.1 <sup>a</sup>	21.03.24

<sup>a</sup> Not annualised.

# Financial highlights

## Shares in issue, Net Asset Values (NAV) and Total Expense Ratios (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 6 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 March 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 10 to the Financial Statements (also known as the price per share) at 31 March 2024 and Total Expense Ratios (TER) for the year ended to 31 March 2024.

### Shares in issue, Net Asset Values and Total Expense Ratios

	Shares outstanding as at 31.03.24	NAV per share as at 31.03.24	TER <sup>a</sup> (%) as at 31.03.24
<b>US dollar</b>		<b>US\$</b>	
Class 'A' Accumulation	1,001.000	10.0120	1.77 <sup>b</sup>
Class 'A' Distribution	1,000.000	10.0120	1.77 <sup>b</sup>
Class 'C' Accumulation	1,003.000	10.0132	1.18 <sup>b</sup>
Class 'C' Distribution	1,002.000	10.0132	1.18 <sup>b</sup>
Class 'CI' Accumulation	4,601.000	10.0141	0.68 <sup>b</sup>
Class 'CI' Distribution	4,600.000	10.0141	0.68 <sup>b</sup>
Class 'LI' Accumulation	7,504,602.000	10.0146	0.43 <sup>b</sup>

<sup>a</sup> Includes charges from underlying investments. Please see the relevant Key Investor Information Document for a more reliable estimate of future charges (available from our website at mandg.lu).

<sup>b</sup> This sub-fund was launched 21 March 2024, therefore expenses have been annualised. As a result, the reported expense ratios may differ from the ongoing charges figures disclosed in the Key Investor Information Document which are produced on an ex-ante basis to provide a more reliable estimate of future charges.

NAV at sub-fund level	31.03.24 US\$'000
Net assets	74,984
Swing pricing adjustment (see note 10)	304
<b>Swing net assets</b>	<b>75,288</b>

# Notes to the financial statements

## 1 Basis of preparation

These financial statements have been prepared and presented in accordance with generally accepted accounting principles in Luxembourg and with the legal and regulatory requirements relating to the preparation and presentation of the financial statements as prescribed by the Luxembourg authorities for Luxembourg investment funds including the following significant accounting policies.

The financial statements have been prepared under a going concern assumption as deemed appropriate by the Management Company.

As indicated in Note 14, M&G (Lux) Global Enhanced Equity Premia Fund was liquidated on 27 July 2023, M&G (Lux) Absolute Return Bond Fund was liquidated on 3 November 2023 and M&G (Lux) Multi Asset 2023 Fund matured on 13 December 2023. As such, the financial statements for M&G (Lux) Global Enhanced Equity Premia Fund, M&G (Lux) Absolute Return Bond Fund and M&G (Lux) Multi Asset 2023 Fund have been prepared on a non-going concern basis. The application of the non-going concern basis of accounting has not led to material adjustments to the sub-funds' published net asset values.

## 2 Summary of significant accounting policies

### a) Base currency

The combined financial statements of the Fund are expressed in euros, at the exchange rate at 28 March 2024, the base currency of M&G (Lux) Investment Funds 1. The financial statements of each sub-fund are expressed in the sub-funds' base currency.

### b) Exchange rates

Transactions in currencies other than each sub-fund's base currency are translated at the rate of exchange ruling on the date of the transaction. Assets and liabilities are translated into each sub-fund's base currency at the rate of exchange ruling at the sub-fund's valuation point on 28 March 2024 being the last business day of the accounting year:

1 Euro € = 1.661581417 Australian dollar (AU\$)

1 Euro € = 8.438706853 Hong Kong dollar (HK\$)

1 Euro € = 1.457255108 Singapore dollar (SG\$)

1 Euro € = 20.551206408 South African rand (ZAR)

1 Euro € = 11.532994628 Swedish krona (SEK)

1 Euro € = 0.976751861 Swiss franc (CHF)

1 Euro € = 0.855063914 UK sterling (£)

1 Euro € = 1.078449664 US dollar (US\$)

1 Japanese yen ¥ = 0.006125967 Euro (€)

1 Japanese yen ¥ = 0.005983550 Swiss franc (CHF)

1 Japanese yen ¥ = 0.005238093 UK sterling (£)

1 Japanese yen ¥ = 0.006606547 US dollar (US\$)

1 US dollar \$ = 1.540713000 Australian dollar (AU\$)

1 US dollar \$ = 0.927257000 Euro (€)

# Notes to the financial statements

1 US dollar \$ = 7.824850000 Hong Kong dollar (HK\$)

1 US dollar \$ = 151.365000000 Japanese yen (¥)

1 US dollar \$ = 10.848450000 Norwegian krone (NOK)

1 US dollar \$ = 1.351250000 Singapore dollar (SG\$)

1 US dollar \$ = 19.056250000 South African rand (ZAR)

1 US dollar \$ = 10.694050000 Swedish krona (SEK)

1 US dollar \$ = 0.905700000 Swiss franc (CHF)

1 US dollar \$ = 0.792864000 UK sterling (£)

## c) Investments – recognition and valuation

All investments are initially recognised at the transaction price net of direct transaction costs (excluding accrued interest).

Realised gains and losses on sales of investments are determined on the basis of the average cost method where applicable. Investment cost is adjusted by the amortisation of premiums and accretion of discounts on a straight line basis. It includes the net amount received, excluding any interest treated as income, from derivative instruments.

Unrealised gains or losses on investments are determined by reference to the opening and closing valuation of investments and includes surpluses or deficits arising from unsettled derivative contracts.

At the end of the reporting year all investments have been valued using the prices and the portfolio holdings determined on 28 March 2024, at the last valuation point of the accounting year.

The methods of determining value for the principal classes of investment are:

- Equities and debt securities which are traded on an active market are included at the mid price (the mid point between the quoted bid and offer prices), excluding any accrued interest in respect of bonds.
- Collective investment schemes are included at either the mid of their cancellation and creation prices for dual priced funds or their single price for single priced funds.
- Other equities and debt securities which are unquoted or not actively traded on a quoted market are included at a value estimated by the Administrator and under policies and procedures approved and overseen by the Board of Directors using an appropriate valuation technique, excluding any accrued interest in respect of bonds.
- Exchange traded futures and options are included at either their single price or, if separate buying and selling prices are quoted, the average of the two prices.
- Over the counter equity options, credit default swaps, interest rate swaps, asset swaps and inflation swaps are included at a value provided by S&P Global Valuations Limited, an independent credit derivative price provider. Their value excludes any accrued interest in respect of derivatives where the interest is income in nature.
- Forward currency contracts, for share class hedging and investment, are included at a value determined by reference to current forward exchange rates for contracts with similar maturity profiles.
- Cash and amounts held in current, deposit, and margin accounts and in other time-related deposits shall be valued at their nominal value.

# Notes to the financial statements

## d) Recognition of income and expenses

- Dividends and any withholding tax, including ordinary stock dividends and special dividends, from equity investments are recognised when the security is quoted ex-dividend.
- Distributions from collective investment schemes, including any equalisation, are recognised when the scheme is priced ex-distribution.
- Interest income from debt securities is recognised daily on an accruals basis and includes the amortisation of premiums and accretion of discounts on a straight line basis.
- Income from derivatives is recognised on an accruals basis.
- Fixed deposit, money market deposit and bank interest are recognised daily on an accruals basis.
- Underwriting commission is recognised when the issue takes place.
- Fee rebates from investing in other collective investment schemes are recognised on an accruals basis.
- Expenses are recognised on an accruals basis.
- Luxembourg subscription tax (*taxe d'abonnement*) is recognised daily on an accruals basis.

## e) Allocation of returns to share classes

The annual management charge, *taxe d'abonnement*, any share class hedging returns and associated share class hedging charges are directly attributable to individual share classes. All other returns are apportioned to each sub-fund's share classes pro-rata to the value of the net assets of the relevant share class on the day that the income or expenses are recognised.

The Fund operates income equalisation arrangements with a view to ensuring that the level of income accrued within a sub-fund is not affected by the issue, conversion or redemption of sub-fund shares during an accounting year.

The Directors operate a policy of 'swing pricing' where a swing price adjustment may be added to the net asset value per share to determine the price at which shares may be issued or redeemed. The swing price adjustment protects existing shareholders from the dilutive effect of direct and indirect portfolio dealing costs incurred when investments are bought or sold in response to net flows of money into or out of the sub-funds from investors buying and selling shares in the sub-funds.

## f) Performance fee

In respect of certain sub-funds and certain share classes, the Management Company is entitled to receive from the net assets of each sub-fund or share class an annual performance fee which, if applicable, will be calculated and accrued each Valuation Day and payable to the Investment Manager annually in arrears at the end of an annual accounting period.

The performance fee is calculated based on a percentage of the increase in the Net Asset Value per share of each relevant share class above both its High Water Mark and Hurdle as described in the Prospectus (Appendix 2) for M&G (Lux) Investment Funds 1.

The rate at which the performance fee shall be applied (the 'Performance Fee Rate') for each share class and the Hurdle are set out in the 'Performance Fees' section of the relevant Fund Supplement in the Prospectus for M&G (Lux) Investment Funds 1.

# Notes to the financial statements

Sub-fund	Amount of performance fee in sub-fund's currency	Percentage of average shareclass TNA
<b>M&amp;G (Lux) Episode Macro Fund</b>		
<b>Euro</b>		
Class 'T-H' Accumulation	1,124	0.00%

Class 'T-H' Accumulation	141	0.00%
<b>US dollar</b>		
Class 'T' Accumulation	9,957	0.06%
Class 'TI' Accumulation	62,004	0.06%

### 3 Distribution policy

Distribution shares may pay distributions to Shareholders, whereas Accumulation shares will instead accumulate all earnings pertaining to the relevant share class for the benefit of the Accumulation Shareholders. Distribution payments are made in the relevant share class currency.

The Directors will exercise their discretion to determine whether or not to declare a distribution in respect of Distribution shares. Distributions may be paid out of investment income, capital gains or capital at the discretion of the Directors. Distributions and their frequency are disclosed in note 13 of this report.

Unless detailed below, the distribution policy for all sub-funds and distribution share classes is to distribute all investment income gross of expenses.

The following distribution share classes distribute an amount or fixed percentage of the Net Asset Value per Share. Where the amount of investment income earned is not sufficient to meet this fixed amount or fixed percentage, a fixed Distribution Share Class may be required to make a payment out of capital. The Directors will periodically review fixed Distribution Share Classes policies and reserve the right to make changes to the distribution rate in cases where maintaining it may adversely impact the respective sub-funds or the Shareholders. The details of such fixed Distribution Shares are available on the M&G website.

In order to conduct a controlled dividend flow to shareholders, the below sub-funds interim distributions will be at the sub-fund manager's discretion, up to the maximum of the distributable income available for the period.

M&G (Lux) North American Dividend Fund

## 4 Transaction costs

Direct portfolio transaction costs include broker execution commission and taxes and are incremental costs that are directly attributable to the transaction. Indirect portfolio transaction costs represent the difference between the buying and selling prices of the sub-fund's investments (portfolio dealing spread); some types of investment, such as fixed interest securities, have no direct transaction costs and only the portfolio dealing spread is paid. Transaction costs are incorporated as part of realised gain/(loss) in the Statement of operations and changes in net assets.

<sup>f</sup> For the period from 19 March 2024 (launch date of the sub-fund) until 31 March 2024.

## 5 Operating charges

Operating charges included in the Total Expense Ratio (TER) calculation include payments made to M&G and to providers independent of M&G:

- **Investment management:** Charge paid to M&G for investment management of the sub-fund (also known as Annual Management Charge).
- **Performance fee:** Performance fee paid (payable) to M&G based on performance of the applicable share class.
- **Administration:** Charge paid to M&G for administration services in addition to investment management – any surplus from this charge will be retained by M&G.  
Please note that this does not apply to M&G (Lux) Fixed Maturity Bond Fund 2, M&G (Lux) Fixed Maturity Bond Fund 3, M&G (Lux) Multi Asset 2023 Fund and M&G (Lux) Sustainable Macro Flexible Credit Fund, which carry a Single Charge.
- **Share class hedging:** Charge paid to M&G for currency hedging services to minimise exchange rate risk for the share class.

# Notes to the financial statements

- **Oversight and other independent services:** Charges paid to providers independent of M&G for services which include depositary, custody and audit. From 1 October 2020, audit fees and custody transaction charges are paid by the Management Company for any sub-fund where the NAV has been lower than €200m ('Threshold'). The Management Company reviews the Net Asset Value of the sub-funds at the end of each quarter. If at the end of two consecutive quarters a sub-fund's Net Asset Value is:
  - below the Threshold: the audit fees and custody transaction charges will be borne by the Management Company and excluded from the calculation of the Net Asset Value of the sub-fund.
  - above the Threshold: the audit fees and custody transaction charges will be included in the calculation of the Net Asset.
- **Taxation in Luxembourg:** Under current legislation, investors that are not resident in Luxembourg are not subject to capital gains or income tax, unless they have a permanent establishment in Luxembourg to which the share capital of the Fund is allocated. Retail share classes of the Fund are subject to a tax (*taxe d'abonnement*) of 0.05% per annum and institutional share classes of 0.01%.
- **Ongoing charges from underlying funds:** Ongoing charges on holdings in underlying funds that are not rebated. Where a sub-fund invests in collective investment schemes that are also managed by the Management Company (or an associate), the Management Company will rebate the Annual Management Charge and Administration Fee of the underlying collective investment scheme.

The operating charges paid by each share class of the sub-funds are shown in the Total Expense Ratio (TER) tables. Operating charges do not include portfolio transaction costs or any entry and exit charges also known as initial and redemption charges. The charging structures of the share classes may differ, and therefore the operating charges may differ. For each sub-fund there may be a difference between ongoing charges and TER figures, please see the relevant Key Investor Information Document for a more reliable estimate of future charges (available from our website at [mandg.lu](http://mandg.lu)).

For M&G (Lux) Episode Macro Fund, the operating charges and performance fees are paid by the applicable share class. The charges do not include portfolio transaction costs or any entry and exit charges (also known as initial and redemption charges). The charging structures of the applicable share classes may differ, and therefore the operating charges and performance fees may differ. For further details of performance fee calculations please refer to the most recent Visa Stamped Prospectus approved by the CSSF on 18 March 2024.

M&G (Lux) Fixed Maturity Bond Fund 2, M&G (Lux) Fixed Maturity Bond Fund 3, M&G (Lux) Multi Asset 2023 Fund and M&G (Lux) Sustainable Macro Flexible Credit Fund, the Management Company takes a 'Single Charge' from each Share Class of the sub-fund to cover its duties, as well as operating, administration and oversight costs associated with the sub-fund. Such charge will be calculated and taken into account daily ('Single Charge'). For additional information on Single Charge, please refer to the Prospectus which is available on our website at [mandg.lu](http://mandg.lu)

## 6 Annual management, administration and share class hedging charges

Annual management charges are set out in the table below. In addition, there is an administration charge of 0.15% per share class. A Share class hedging charge of 0.01%-0.055% will apply to hedged share classes. These charges are accrued daily based on the net asset value of each share class. Any amounts outstanding at the year end are disclosed in the Statement of net assets.

Please note that the following table lists the available share classes. Each share class further contains an accumulation and distribution option.

## Notes to the financial statements

<sup>m</sup> Up to 1.00%.

<sup>n</sup> Up to 1.20%.

<sup>o</sup> Up to 1.35%.

## Administration Charge

From 1 October 2020, a discount was introduced on the administration charge based on a sub-fund's Net Asset value (NAV), as shown in the table below. The sub-funds' administration charge is currently up to 0.15% per annum.

Sub-fund NAV	Discount	Buffer <sup>a</sup>	Discount removed/reduced <sup>b</sup>
€ 0-1.25bn	nil	n/a	n/a
€ 1.25-2.50bn	0.02%	€ 125m	€ 1.125bn
€ 2.50-3.75bn	0.04%	€ 125m	€ 2.375bn
€ 3.75-5.00bn	0.06%	€ 125m	€ 3.625bn
€ 5.00-6.25bn	0.08%	€ 125m	€ 4.875bn
€ 6.25-7.50bn	0.10%	€ 250m	€ 6.000bn
More than € 7.50bn	0.12%	€ 250m	€ 7.250bn

<sup>a</sup> Applied in case of reducing sub-fund NAV.

<sup>b</sup> When a sub-fund NAV falls below.

Please note that this change does not apply to the M&G (Lux) Fixed Maturity Bond Fund 2, M&G (Lux) Fixed Maturity Bond Fund 3, M&G (Lux) Multi Asset 2023 Fund and M&G (Lux) Sustainable Macro Flexible Credit Fund, which carry a Single Charge.

# Notes to the financial statements

## 7 Depositary, safe custody and custody transaction charges

The Depositary takes a charge from each sub-fund as payment for its duties as depositary. The Depositary's charge is based on the NAV of each sub-fund, and in normal circumstances, the fees payable to the Depositary for its provision of services shall be subject to a maximum of 1 basis point.

The Depositary also receives a fee in relation to the safe-keeping of each sub-fund's assets (safe custody charges) and a fee in relation to processing transactions (custody transaction charges). The safe custody charge is a range between 0.00005% and 0.4% of the asset values and custody transaction charges range between €5 and €100 per transaction.

The Depositary's charge is calculated and taken into account daily on the same basis as described above for the Annual Management Charge. The safe custody charges and custody transaction charges are accrued daily.

## 8 Directors' fees

The Directors are entitled to receive fees of €50,000 per director per annum, which are paid by the Management Company. Philip Jelfs and Laurence Mumford have waived their entitlement to Directors' fees. The Management Company shall also reimburse certain expenses of the Directors, in accordance with the Articles, out of the Administration Charge.

## 9 Taxes

### Luxembourg

The Fund is, in principle, liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its NAV, such tax being payable quarterly on the basis of the value of the aggregate net assets of the Fund at the end of the relevant calendar quarter.

This rate is reduced to 0.01% per annum for:

- Undertakings whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions;
- Undertakings whose sole object is the collective investment in deposits with credit institutions; and
- Individual sub-funds of UCIs with multiple sub-funds, as well as for individual classes of securities issued within a UCI or within a sub-fund of a UCI with multiple sub-funds, provided that the securities of such sub-funds or classes are reserved to one or more institutional investors.

As from 1 January 2021, the Fund or its individual sub-funds, may benefit from reduced subscription tax rates depending on the value of the relevant sub-fund's net assets invested in economic activities that qualify as environmentally sustainable within the meaning of Article 3 of the Taxonomy Regulation (the 'Qualifying Activities'), except for the proportion of net assets of the Fund or its individual sub-funds invested in fossil gas and/or nuclear energy related activities. The reduced subscription tax rates would be of:

- 0.04% if at least 5% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities;
- 0.03% if at least 20% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities;
- 0.02% if at least 35% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities; and

# Notes to the financial statements

- 0.01% if at least 50% of the total net assets of the Fund, or of its individual sub-funds, are invested in Qualifying Activities.

The subscription tax rates mentioned above would only apply to the net assets invested in Qualifying Activities.

In addition, exemptions are available from the subscription tax where:

- the value of the assets represented by units held in other UCIs, provided such units have already been subject to the subscription tax;
- UCIs reserved for Institutional Investors invested in money market instruments and deposits with credit institutions whose weighted residual portfolio maturity does not exceed 90 days and that have obtained the highest possible rating from a recognised rating agency;
- UCIs whose securities are reserved for retirement pension schemes;
- UCIs whose main objective is the investment in microfinance institutions;
- UCIs which securities are listed or traded and whose exclusive object is to replicate the performance of one or more indices.

The table below shows the *taxe d'abonnement* applicable to each share class.

## Other transaction taxes

Other jurisdictions may impose taxes, financial transactions taxes (FTT) or other transaction taxes on certain assets held by the sub-funds (for example, UK stamp duty, French FTT).

# Notes to the financial statements

## Withholding tax

Dividends, capital gains and interest received by the sub-fund on its investments may be subject to withholding taxes in the countries of origin which are generally irrecoverable as the sub-fund itself is exempt from income tax.

## 10 Swing pricing

Investments are bought or sold by a sub-fund when changes are made to the investment portfolio and in response to net flows of money into or out of the sub-funds from investors buying and selling shares in the sub-funds.

To protect existing investors, the Directors operate a policy of swing pricing. This policy gives the Directors the power to apply a 'swing price adjustment' to the Net Asset Value per share so that portfolio transaction costs incurred as a result of investors buying and selling shares in the sub-funds can be recovered from those investors through the price they pay or receive.

A swing price adjustment may be applied in the event that the daily net subscriptions or net redemptions exceed a predetermined threshold set by the Directors.

The published share price/NAV per share inclusive of the swing pricing adjustment is disclosed in the net asset values and total expense ratio table included within the Financial highlights section of each sub-fund. The swing price adjustment is not recognised in the Statement of net assets or the Statement of operations and changes in net assets.

Swing price adjustments received through buying and selling shares is included in the net in/outflows in the Statement of operations and changes in net assets.

Under normal market conditions, the adjustment will never be larger than 2% of what the NAV would otherwise be on any given Valuation Day. This adjustment may however be significantly higher and beyond the maximum threshold during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress. The price adjustment applicable to a specific sub-fund is available on request from the Management Company at its registered office.

## 11 Transactions with connected persons by cross-investment

M&G Luxembourg S.A., as the Management Company, is a related party. Details of charges payable to M&G Luxembourg S.A. in respect of annual management, administration and share class hedging charges are disclosed in note 6. Amounts paid are disclosed in the Statement of operations and changes in net assets and amounts due at the year end are disclosed in the Statement of net assets.

As at 31 March 2024, the M&G (Lux) Dynamic Allocation Fund sub-fund invested in shares of the sub-funds M&G (Lux) Global Convertibles Fund, M&G (Lux) Global Emerging Markets Fund and M&G (Lux) Sustainable Emerging Markets Corporate Bond Fund. The value of the shares held amounts to €56,858,760 and represents 2.77% of the net assets of the sub-fund M&G (Lux) Dynamic Allocation Fund.

As at 31 March 2024, the M&G (Lux) Global Maxima Fund sub-fund invested in shares of the sub-fund M&G Global Property Fund. The value of the shares held amounts to US\$1,600,276 and represents 0.69% of the net assets of the sub-fund M&G (Lux) Global Maxima Fund.

As at 31 March 2024, the M&G (Lux) Global Target Return Fund sub-fund invested in shares of the sub-funds M&G Short Dated Corporate Bond Fund and M&G Total Return Credit Investment Fund. The value of the shares held amounts to €2,656,169 and represents 6.33% of the net assets of the sub-fund M&G (Lux) Global Target Return Fund.

# Notes to the financial statements

The impact of the cross investment transactions has not been eliminated from the combined Statement of net assets and Statement of operations and changes in net assets.

There are no other related parties.

## 12 Cash collateral

The sub-funds trade derivatives with a range of counterparties. The counterparties to the derivatives and amount held as collateral are shown in counterparty exposure tables under the statement of investments of each sub-fund.

## 14 Events occurred during the year

RBC Investor Services Bank S.A. changed its name to CACEIS Investor Services Bank S.A. on 3 July 2023.

The M&G (Lux) Global Enhanced Equity Premia Fund was liquidated on 27 July 2023. As at 31 March 2024, a cash balance of US\$25,764 remained on the sub-fund, which will be distributed to shareholders. As at year end, five illiquid securities remained unsold in custody. Three of these assets are currently under sanctions, and as a result, there are no public markets available for selling the securities. Consequently, these securities have been fair valued at zero as of year-end.

Predetermined yield of fixed share classes offered by M&G (Lux) Emerging Markets Bond Fund and M&G (Lux) Optimal Income Fund was increased in August 2023 as follows:

Sub-fund	Previous %	Current %
<b>M&amp;G (Lux) Emerging Markets Bond Fund</b>		
<b>South African rand</b>		
Class 'A-H M F1' Distribution	12	15
Class 'X-H M F1' Distribution	12	15
<b>US dollar</b>		
Class 'A M F' Distribution	9	12
Class 'X M F' Distribution	9	12
<b>M&amp;G (Lux) Optimal Income Fund</b>

<b>US dollar</b>		
Class 'A-H M F' Distribution	6	7
Class 'A-H M F1' Distribution	4	7
Class 'X-H M F' Distribution	6	7

M&G (Lux) Fixed Maturity Bond Fund 3 was launched on 27 September 2023.

# Notes to the financial statements

M&G (Lux) Absolute Return Bond Fund was liquidated on 3 November 2023. As at 31 March 2024, a cash balance of €12,857 remained on the sub-fund, which will be distributed to shareholders.

M&G (Lux) Fixed Maturity Bond Fund 2 was launched on 7 November 2023.

M&G (Lux) Global Artificial Intelligence Fund was launched on 9 November 2023.

M&G (Lux) TAP Global Listed Infrastructure Fund was launched on 16 November 2023.

M&G (Lux) Multi Asset 2023 Fund matured on 13 December 2023.

Predetermined yield of fixed share classes offered by M&G (Lux) Optimal Income Fund was decreased in February 2024 as follows:

Sub-fund	Previous %	Current %
<b>M&amp;G (Lux) Optimal Income Fund</b>		
<b>Singapore dollar</b>		
Class 'A-H M F1' Distribution	7	6
<b>US dollar</b>		
Class 'A-H M F1' Distribution	7	6

M&G (Lux) US Corporate Bond Fund was launched on 19 March 2024.

M&G (Lux) US High Yield Bond Fund was launched on 21 March 2024.

## 15 Subsequent events

The M&G (Lux) Fixed Maturity Bond Fund 1 was launched on 16 April 2024.

The M&G (Lux) Fixed Maturity Bond Fund was launched on 20 May 2024.

On 29 May 2024 M&G (Lux) Global Corporate Bond Fund changed its Investment Objective and Policy, Strategy and EU Sustainable Finance Disclosure Regulation. A reduction on Annual Management Charge and addition of Jamie Hamilton as co-sub-fund manager took place. The sub-fund also changed its name to M&G (Lux) Global Credit Investment Fund. Investors should refer to the Prospectus which is available on our website at [mandg.lu](http://mandg.lu)

On 26 June 2024 M&G (Lux) Emerging Markets Bond Fund and M&G (Lux) Emerging Markets Hard Currency Bond Fund changed its Investment Objectives and Policies, Strategies and EU Sustainable Finance Disclosure Regulations, investors should refer to the Prospectus which is available on our website at [mandg.lu](http://mandg.lu)

# Risk management policies (unaudited)

The sub-funds' investment activities expose them to various types of risk which are associated with the financial instruments and markets in which they invest.

These financial statements are designed to enable users to evaluate the nature and extent of those risks and how they are managed.

## Market risk

Market risk is the risk of loss resulting from fluctuations in the market value of positions in a sub-fund's portfolio attributable to changes in market variables, such as interest rates, foreign exchange rates, equity and commodity prices or an issuer's creditworthiness.

In measuring and monitoring market risk, the global exposure of a sub-fund is calculated on a daily basis, using a 'commitment' approach or 'Value at Risk' (VaR) approach.

### 'Commitment' approach

The commitment approach is applied for sub-funds investing only in traditional asset classes, namely equities, fixed income, money market instruments and collective investment schemes.

In addition, the approach is applied for sub-funds which use or intend to use derivatives or instruments embedding derivatives, but only for efficient portfolio management purposes, or in a simple way not necessarily restricted to efficient portfolio management.

Under the commitment approach the global exposure of sub-funds is measured and monitored using a commitment (adjusted notional) methodology.

### 'Value at Risk' approach

There are two forms of VaR approaches, absolute and relative, which are described below:

#### Absolute VaR

The absolute VaR is used where a sub-fund seeks to estimate the potential loss it could experience in a month (20 trading days) under normal market

conditions. The requirement is that, 99% of the time, such sub-fund's worst outcome is no worse than a 20% decline in NAV.

### Relative VaR

The relative VaR of a sub-fund is expressed as a multiple of a benchmark or reference portfolio and cannot, under the same circumstances as above, exceed twice the VaR of the relevant benchmark or reference portfolio.

The table below shows sub-funds using the 'commitment' approach and those using the VaR approach:

Sub-fund	Global exposure approach
M&G (Lux) Absolute Return Bond Fund	Absolute VaR
M&G (Lux) Asian Fund	Commitment
M&G (Lux) Better Health Solutions Fund	Commitment
M&G (Lux) Climate Solutions Fund	Commitment

## VaR limit

When VaR is calculated as a percentage of the net asset value to assess a sub-fund's market risk, it may not be greater than the VaR limit set for the sub-fund.

For the financial year from 1 April 2023 to 31 March 2024 the tables below show the VaR limits set for the sub-funds, together with the lowest, highest and average VaR (note these numbers are actual absolute and relative VaR numbers and do not represent utilisation levels of the regulatory limit) calculated for each sub-fund during the year.

For the year to 31 March 2024	Absolute VaR			
	VaR limit %	Lowest %	Highest %	Average %
M&G (Lux) Absolute Return Bond Fund <sup>a</sup>	3.33	0.01	6.01	1.67
M&G (Lux) Dynamic Allocation Fund	18.00	3.84	5.15	4.63
M&G (Lux) Episode Macro Fund	20.00	1.32	8.53	3.92
M&G (Lux) European Inflation Linked Corporate Bond Fund	10.00	1.25	2.10	1.64
M&G (Lux) Fixed Maturity Bond Fund 2 <sup>b</sup>	13.00	0.42	0.71	0.57
M&G (Lux) Fixed Maturity Bond Fund 3 <sup>c</sup>	16.00	0.63	1.40	0.97
M&G (Lux) Global Macro Bond Fund	20.00	5.74	6.71	6.32
M&G (Lux) Global Target Return Fund	6.00	1.12	3.51	1.97
M&G (Lux) Income Allocation Fund	16.00	3.33	5.84	4.86

## Leverage risk

Derivatives can be used by the sub-fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, positive or negative movement in markets may have a more significant effect on the net asset value of the sub-fund.

Derivatives can also be employed to hedge exposure. Consequently, higher derivative usage will not necessarily imply a higher level of risk for the sub-fund.

For sub-funds using VaR approaches we disclose the level of this leverage employed during the financial reporting year on a 'sum of notionals' basis. The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial year from 1 April 2023 to 31 March 2024 are shown in the table below. Please note that not all the sub-funds were in existence for the whole financial year and therefore the data is only calculated from their respective launch dates (see footnote below table).

For the year to 31 March 2024 <sup>a</sup>	Lowest	Highest	Average

# Other regulatory disclosures (unaudited)

## Remuneration

The below disclosure is made in accordance with Undertakings for Collective Investments in Transferable Securities ('UCITS') V and the Guidelines on sound remuneration policies under the UCITS issued by the European Securities and Markets Authority ('ESMA Guidelines').

M&G Luxembourg S.A. (the 'UCITS Management Company') is subject to a remuneration policy which is consistent with the principles outlined in the ESMA Guidelines.

The remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of employees is in line with the risk policies and objectives of the UCITS funds managed by the UCITS Management Company. Further details of the remuneration policy can be found here: [mandgplc.com/our-business/mandg-investments/mandg-investments-business-policies](http://mandgplc.com/our-business/mandg-investments/mandg-investments-business-policies). The remuneration policy and its implementation is reviewed on an annual basis, or more frequently where required, and is approved by the M&G plc Board Remuneration Committee. The most recent review found no fundamental issues with no material changes made to the policy.

M&G Luxembourg S.A. is required under UCITS law to make quantitative disclosures of remuneration. These disclosures are made in line with M&G's interpretation of currently available guidance on quantitative remuneration disclosures. As market or regulatory guidance evolves, M&G may consider it appropriate to make changes to the way in which quantitative disclosures are calculated.

The 'Identified Staff' of M&G Luxembourg S.A. are those who could have a material impact on the risk profile of M&G Luxembourg S.A. or the UCITS funds it manages and generally includes senior management, risk takers and control functions. 'Identified Staff' typically provide both UCITS and non-UCITS related services and have a number of areas of responsibility. Therefore, only the portion of remuneration for those individuals' services which may be attributable to UCITS

is included in the remuneration figures disclosed. Accordingly the figures are not representative of any individual's actual remuneration. The information needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

The amounts shown below reflect payments made in respect of the calendar year 1 January 2023 to 31 December 2023.

	Fixed Remuneration €'000	Variable Remuneration €'000	Total €'000	Beneficiaries

## Securities Financing Transactions Regulation (SFTR)

Under the Securities Financing Transactions Regulation ('SFTR'), the Fund is required to disclose certain information in relation to its use of Securities Financing Transactions ('SFTs') including Total Return Swaps ('TRSs'). SFTs include various types of transactions, however, the Fund is currently only permitted to enter into TRSs, and only in relation to the following sub-funds:

- M&G (Lux) Dynamic Allocation Fund
- M&G (Lux) Emerging Markets Bond Fund
- M&G (Lux) Emerging Markets Hard Currency Bond Fund
- M&G (Lux) Episode Macro Fund
- M&G (Lux) Euro Corporate Bond Fund

During the year from 1 April 2023 to 31 March 2024 no sub-funds entered into Total Return Swaps.

## Swiss investor information

For sub-funds registered in Switzerland FINMA requires to disclose the Total Expense Ratio (TER).

For these sub-funds the TERs are disclosed in the 'Shares in issue, Net Asset Values and Total Expense Ratios' table that can be found in each sub-fund's financial highlights section.

# Annex 1: Sustainable Finance Disclosure Regulation (unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Asian Fund  
**Legal Entity Identifier:** 5493000RHSL7KYFYW10

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective. No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics. The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and

"Other" Investments.

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

Both of these tests were met. The comparison of the Fund's Score with the investment universe can be seen in the table below. The Fund's ESG Score was 6.24 which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	6.24 ESG Score	98.75%	95.82%
Portfolio weighted average ESG score for the Investment Universe	6.13 ESG Score	100.00%	98.42%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	6.01 ESG Score	98.17%	96.03%
Portfolio weighted average ESG score for the Investment Universe	5.99 ESG Score	98.90%	49.66%

● **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reporting period at 52.10% was lower than the previous reporting period, when it was 57.78%. As it did in the previous reporting period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was higher than in the last reporting period, as can be seen in the table above. As it did in the previous reporting period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of at least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 6.24.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	7.46%	TW
SAMSUNG ELECTRONICS LTD	Manufacturing	5.32%	KR
TENCENT HOLDINGS LTD	Information and communication	3.20%	CN
DBS GROUP HOLDINGS LTD	Financial and insurance activities	2.96%	SG
BHP GROUP LTD	Mining and quarrying	2.69%	AU
AMCOR CDI PLC	Manufacturing	2.16%	AU
HDFC BANK LTD	Financial and insurance activities	2.10%	IN
PACIFIC BASIN SHIPPING LTD	Transportation and storage	2.01%	HK
NATIONAL AUSTRALIA BANK LTD	Financial and insurance activities	1.98%	AU
ALIBABA GROUP HOLDING LTD	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.95%	CN
JD.COM CLASS A INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.95%	CN
ANZ GROUP HOLDINGS LTD	Financial and insurance activities	1.93%	AU
AIA GROUP LTD	Financial and insurance activities	1.90%	HK
KB FINANCIAL GROUP INC	Financial and insurance activities	1.75%	KR
WOODSIDE ENERGY GROUP LTD	Mining and quarrying	1.70%	AU

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.02% of NAV as at 31 March 2024. This comprised 52.10% of NAV in sustainable investments, and the remaining 46.92% of NAV in investments with other environmental and/or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 34.06% related to investments with other environmental characteristics, and 18.04% related to socially sustainable investments.

0.98% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	34.60%
Financial and insurance activities	27.68%
Information and communication	8.33%
Wholesale and retail trade; repair of motor vehicles and motorcycles	6.83%
Transportation and storage	5.80%
Mining and quarrying	5.48%
Construction	4.70%
Electricity, gas, steam and air conditioning supply	1.97%
Accommodation and food service activities	1.58%
Other	1.31%
Real estate activities	1.28%
Professional, scientific and technical activities	0.43%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 0% while climate change adaptation contributed 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reporting period was 0% and was therefore the same as in the previous reporting period when it was also 0%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34.06%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 18.04%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, derivatives and currency derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

No minimum environmental or social safeguards are applied to FX derivatives. The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Better Health Solutions Fund  
**Legal Entity Identifier:** 254900DW70X08JEEMU71

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 97.84%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that deliver solutions to address better health and well-being, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

The majority of portfolio companies (representing 87.92% of the fund's Net Asset Value) aligned most closely with SDG 3: Good health and well-being, as might be expected from an investment fund focusing on better health and well-being outcomes.

Some of the fund's investee companies contributed to SDG 8: Decent work and economic growth, for example, Amerisafe. Amerisafe specialises in workers' compensation insurance for small and medium-sized companies in

hazardous industries.

In the reference period, 8.61% of the fund's NAV aligned with SDG 8: Decent work and economic growth.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG2 Zero Hunger	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG3 Good Health and Wellbeing	88.39%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG6 Clean Water and Sanitation	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 Sustainable Cities	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 Responsible Consumption and Production	0%	100%	98.05%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG8 Decent Work and Economic Growth	6.45%	100%	98.05%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG2 - Zero Hunger	0%	100%	99.93%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG3 - Good Health and Wellbeing	87.92%	100%	97.38%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG6 - Clean Water and Sanitation	0%	100%	99.93%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 - Sustainable Cities	0%	100%	97.38%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 - Responsible Consumption and Production	0%	100%	99.93%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG8 - Decent Work and Economic Growth	8.61%	100%	99.93%

● **...and compared to previous periods?**

In the reference period, 87.92% of the fund's NAV was invested in companies contributing to SDG 3: Good health and wellbeing. This is a slight decrease on the previous reporting period's figure of 88.39%.

In the last reporting period, 6.45% of the fund's investments contributed to SDG 8: Decent work and economic growth. This figure rose to 8.61% in the reference period.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions. The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
NOVO NORDISK CLASS B	Manufacturing	8.71%	DK

SHIMANO INC	Manufacturing	2.99%	JP

### What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in social sustainable investments, in pursuit of the social sustainable investment objective.

As of 31 March 2024, 97.84% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. The fund did not commit to invest in investments aligned to the EU Taxonomy, and 0% of the sustainable investments were aligned to the EU Taxonomy. 0% related to investments with environmental objectives while 97.84% related to investments with a social objective.

2.16% of the Fund was composed of "not sustainable" investments (cash).

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	69.28%
Financial and insurance activities	8.39%
Human health and social work activities	6.78%
Professional, scientific and technical activities	4.60%
Construction	3.69%
Information and communication	3.37%
Other	2.10%
Arts, entertainment and recreation	0.83%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.68%
Administrative and support service activities	0.27%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 0%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities over the period was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During both the reference period and the previous reporting period, the fund held 0% in taxonomy-aligned investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0%. This compares to a minimum percentage commitment of 0% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 97.84%. This compares to a minimum percentage commitment of 80% stated in the Fund's precontractual disclosure.

- **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund has invested in companies that deliver solutions to address better health and well-being. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, we liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We believe Novo Nordisk is doing all it can to prevent abuse of Wegovy.

In 2023, we met Oxford Nanopore to verify whether it had effective policies and procedures in place to avoid misuse of its equipment, particularly in China and Tibet. In early 2024, we followed up on this meeting. We asked the company to release a public statement about where it will not sell its products and also suggested that the business provide further training to its operations staff to clearly explain why sales restrictions are in place.

In our previous meeting with the company, it confirmed that it tends to lease out its products. This means it has greater visibility on usage and better access to data. The products do not work (even when sold) without Oxford Nanopore's software. Products also collect telemetry data which means product locations can be tracked.

In our follow-up meeting, Oxford Nanopore once again stressed that it has restrictions in place when it comes to use of its products by police forces and the military. It asserted that in many regions which are potentially controversial, it is primarily health NGOs that use its equipment. It therefore would not want to stop selling into these areas. The company will consider our request for a more developed public policy explaining its terms and conditions for product use and will also think about enhancing the training provided to those working in operations. The company also confirmed that its bioethics committee has now met five or six times.

### **How did this financial product perform compared to the reference sustainable benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Climate Solutions Fund - EUR A Accumulation shares  
**Legal Entity Identifier:** LU2226639461

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:** 96.05%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that deliver solutions to the challenge of climate change, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 13.40%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is

available.

Notably, 15.71% of the fund's Net Asset Value (NAV) was invested in companies providing solutions to the climate challenge while 67.64% of NAV was invested in companies that have a net positive effect on carbon emissions (these companies are deemed to remove more potential carbon emissions than they produce). The fund also invested 66.64% of NAV in companies that have committed to setting or have set science-based targets. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG7 - Affordable and Clean Energy	17.44%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG9 Industry, Innovation and Infrastructure	32.95%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 Sustainable Cities	10.54%	97.92%	98.41%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG15 Life on Land	3.08%	97.92%	98.41%
Percentage (%) of NAV with ratified Science Based Targets (SBTs)	44.64%	97.92%	61.81%
% of CO2 emissions with Science Based Targets (SBTs)	71.90% tCO2e	96.33%	59.09%
Percentage (%) of NAV committed to Science Based Targets (SBTs)	9.21%	97.92%	61.81%
Percentage (%) of NAV participating in Task Force on Climate Related Financial Disclosures (TCFD) reporting	67.42%	97.92%	95.33%
Percentage (%) of NAV in investments with net positive carbon emissions (i.e. investments that are considered to remove more potential carbon emissions than they produce)	87.10%	97.92%	98.41%
Percentage (%) of NAV in Climate Solutions companies	20.81%	96.33%	100%
Total renewable energy produced (megawatt hours)	3335.53 Mwh	97.92%	12.48%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 Responsible Consumption and Production	20.24%	97.92%	98.41%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG7 - Affordable and Clean Energy	12.93%	100%	85.86%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG9 - Industry, Innovation and Infrastructure	36.24%	100%	99.73%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG11 - Sustainable Cities	5.63%	100%	85.86%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG15 - Life on Land	0%	100%	99.73%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	50.91%	100%	81.74%
% of CO2 emissions with Science Based Targets (SBTs)	74.47% tCO2e	97.01%	84.31%
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	15.73%	100%	81.74%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	72.73%	100%	95.44%
Percentage (%) of NAV in investments with net positive carbon emissions (i.e. investments that are considered to remove more potential carbon emissions than they produce)	67.64%	100%	99.73%
Percentage (%) of NAV in Climate Solutions companies	15.71%	97.01%	100%
Total renewable energy produced (megawatt hours)	52899500 Mwh	100%	1.94%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG12 - Responsible Consumption and Production	24.59%	100%	99.73%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **...and compared to previous periods?**

In the reference period, 15.71% of the fund was invested in climate solutions companies. This reflects a decrease on the previous reporting period's figure which was 20.81%.

During the reference period, 67.64% of NAV was invested in companies that have a net positive effect on carbon emissions (investments that are considered to remove more potential carbon emissions than they produce), a decrease on the previous reporting period's figure of 87.10%.

In the previous reporting period, 53.85% of NAV was held in companies that have committed to setting or have set science-based targets. In the reference period, this figure increased to 66.64%.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
LINDE PLC	Manufacturing	5.90%	GB
REPUBLIC SERVICES INC	Water supply; sewerage, waste management and remediation activities	5.63%	US
EQUINIX REIT INC	Information and communication	4.85%	US
SCHNEIDER ELECTRIC	Manufacturing	4.79%	FR
ON SEMICONDUCTOR CORP	Manufacturing	4.59%	US
ANSYS INC	Information and communication	4.21%	US
BALL CORP	Manufacturing	3.96%	US
TREX INC	Manufacturing	3.70%	US
AUTODESK INC	Information and communication	3.63%	US
ELIA GROUP SA	Electricity, gas, steam and air conditioning supply	3.62%	BE
BRAMBLES LTD	Manufacturing	3.12%	AU
TOMRA SYSTEMS	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.99%	NO
BEFESA SA	Water supply; sewerage, waste management and remediation activities	2.98%	LU
INTERTEK GROUP PLC	Professional, scientific and technical activities	2.98%	GB
ENPHASE ENERGY INC	Manufacturing	2.79%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective.

As of 31 March 2024, 96.05% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 13.63% of the sustainable investments were aligned to the EU Taxonomy. 82.42% related to investments with other environmental objectives.

3.95% of the Fund was composed of "not sustainable" investments (cash).

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	51.59%
Information and communication	15.46%
Water supply; sewerage, waste management and remediation activities	11.34%
Electricity, gas, steam and air conditioning supply	9.29%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.02%
Other	2.99%
Professional, scientific and technical activities	2.98%
Other service activities	1.34%

- **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 13.63% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 13.40%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	13.40%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 1.24% while the share of the Fund's investments made in enabling activities was 8.31% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	1.24%
Share of Enabling Activities	8.31%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 13.63% in taxonomy-aligned investments. This is an increase on the previous reporting period's figure which was 13.42%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 82.42%.

This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund has invested in companies that deliver solutions to the challenge of climate change. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, we met German industrial gases company Linde to encourage it to publish a Scope 3 inventory, particularly in relation to use of its products. We also urged the company to publish Scope 3 reduction targets. We further discussed calculation of its Scope 4 emissions and suggested that it disclose how its capex aligns with its carbon reduction strategy. The company has now published a Scope 3 inventory, with targets to follow.

We also encouraged US-listed online marketplace eBay to more explicitly link remuneration KPIs to sustainability targets. In response to our suggestion that it set a net zero target, the company confirmed that it would be doing so and that it planned to seek SBTi validation for this.

We discussed two key issues with Johnson Controls. The first pertained to a cyberattack carried out on the company in 2023. In light of this, we wanted to ensure that the business had implemented the requisite systems, controls and procedures to limit damage in case of any future attack. Secondly, we wished to verify that the company was no longer exposed to perfluoroalkyl and polyfluoroalkyl substances (PFAS), often termed “forever chemicals”.

The company asserted that the cyberattack prompted it to review and strengthen its risk mitigation strategy. It has also hired a new chief information officer and chief technology officer, further bolstering cybersecurity at the business.

Unfortunately, Johnson Controls is currently the subject of a class action connected to PFAS contamination. The action relates to a product whose chemical composition had been mandated by the US government. The company confirmed that is now selling a compliant version of the product and that nothing else that it sells contains PFAS.

### **How did this financial product perform compared to the reference sustainable benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### **How did the reference benchmark differ from a broad market index?**

N/A.

#### **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform compared with the reference benchmark?**  
N/A.
- **How did this financial product perform compared with the broad market index?**  
N/A.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Diversity and Inclusion Fund  
**Legal Entity Identifier:** 254900YIO1LVTNZ3KH90

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 96.63%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

### Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Companies representing 79.84% of the fund's Net Asset Value reported board gender diversity greater than 30%. This is a requirement for those companies we class as 'diversity' companies (it is not, however, a requirement for 'inclusion' companies). We will engage with 'diversity' companies whose board gender diversity falls below 30% to find out what measures will be taken to improve this in the quickest and smoothest fashion possible.

It is worth highlighting that the coverage numbers tend to be lower for indicators pertaining to ethnic diversity

representation at board level and diversity at leadership level, and annual changes to these; this is because there is less data availability in this area. This data is supplied by investee companies, and although we have seen improvements in disclosure in recent years, there is further to go. Importantly, certain investee companies also operate in regions where the disclosure of workforce ethnicity information is restricted. However, where possible, we are prioritising engaging with investee companies on the theme of improving disclosure of data on gender and ethnic minority representation.

Investee companies also contributed towards a range of United Nations Sustainable Development Goals (SDGs), including SDG 5: Gender equality, SDG 8: Decent work and economic growth, and SDG 9: Industry, innovation and infrastructure.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Year-on-Year Change of women on the board	0%	96.73%	49.12%
Year-on-Year Change of women in leadership roles	0.59%	96.73%	57.26%
Year-on-Year Change of ethnic diversity on the board	0%	96.73%	27.02%
Year-on-Year Change of ethnic diversity in leadership roles	-	96.73%	0%
Percentage (%) NAV with board gender diversity (more than 30%), as reported by the company	81.53%	98.40%	96.75%
Percentage (%) NAV with board ethnic diversity (more than 30%), as reported by the company	14.15%	98.40%	51.55%
Percentage (%) NAV considered by the Investment Manager to have leadership diversity, based on data reported by the company	-	98.40%	0%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG3 Good Health and Wellbeing	10.59%	98.40%	98.32%

Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG4 - Quality Education	1.62%	100%	95.33%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG5 - Gender Equality	4.62%	100%	99.79%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG8 - Decent Work and Economic Growth	9.43%	100%	99.79%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG9 - Industry, Innovation and Infrastructure	13.15%	100%	99.79%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG10 - Reduced Inequalities	4.27%	100%	99.79%
Percentage (%) of NAV in investments aligned to United Nations Sustainable Development Goals ("SDGs"): SDG16 - Peace, Justice and Strong Institutions	0%	100%	99.79%
Year-on-Year Change of women on the board	0.19%	96.63%	49.44%

- **...and compared to previous periods?**

In the reference period, 79.84% of the fund's NAV was invested in companies that reported board gender diversity greater than 30%. This is a slight decrease on the previous reporting period's figure which was 81.53%.

During the reference period the percentage of the fund's NAV aligned to UN SDG 5: Gender equality increased slightly to 4.62% (from 4.43% in the previous reporting period). Similarly, the percentage of NAV aligned to SDG 8: Decent work and economic growth rose to 9.43%, from 8.92% in the previous reporting period. During the period, the percentage of NAV aligned to SDG 9: Industry, innovation and infrastructure also increased to 13.15% from 10.41% in the previous reporting period.

However, the percentage of NAV aligned to SDG 10: Reduced inequalities fell to 4.27% from 6.69% in the previous reporting period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information and communication	5.02%	US
SCHNEIDER ELECTRIC	Manufacturing	4.22%	FR
VISA INC CLASS A	Financial and insurance activities	3.84%	US
AIB GROUP PLC	Financial and insurance activities	3.82%	IE
ANSYS INC	Information and communication	3.79%	US

RELX PLC	Information and communication	3.71%	GB
QUEST DIAGNOSTICS INC	Human health and social work activities	3.64%	US
BANK OF GEORGIA GROUP PLC	Financial and insurance activities	3.56%	GE
HDFC BANK ADR REPRESENTING THREE L	Financial and insurance activities	3.55%	IN
MSA SAFETY INC	Manufacturing	3.50%	US
INTACT FINANCIAL CORP	Financial and insurance activities	3.43%	CA
COCHLEAR LTD	Manufacturing	3.32%	AU
COLGATE-PALMOLIVE	Manufacturing	3.28%	US
UNILEVER PLC	Manufacturing	3.22%	GB

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% of the Fund to be invested in social sustainable investments, in pursuit of the social sustainable investment objective.

As of 31 March 2024, 96.63% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. The fund did not commit to invest in investments aligned to the EU Taxonomy: 0% of the sustainable investments were aligned to the EU Taxonomy and 0% related to investments with environmental objectives. 96.63% related to investments with a social objective.

3.37% of the Fund was composed of "not sustainable" investments (cash).

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	29.73%
Information and communication	21.98%
Financial and insurance activities	19.73%
Wholesale and retail trade; repair of motor vehicles and motorcycles	10.29%
Human health and social work activities	8.26%
Other	3.37%
Administrative and support service activities	2.84%
Construction	2.12%
Water supply; sewerage, waste management and remediation activities	1.67%

- **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 0.87%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.87%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Over the period, the share of the Fund's investments made in transitional activities was 0% while the share of the Fund's investments made in enabling activities was 0.87%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.87%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During both the reference period and the previous reporting period, the fund held 0% in taxonomy-aligned investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0%. This compares to a minimum percentage commitment of 0% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 96.63%. This compares to a minimum percentage commitment of 80% stated in the Fund's precontractual disclosure.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund has invested in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, in light of the merger between Indian mortgage provider HDFC and HDFC Bank, we sought to confirm that the newly formed entity would continue to pursue existing climate pledges. We liaised with HDFC Bank, asking for information on a range of issues including the group's climate strategy, its commitment to publishing science-based targets and its lending policies for different sectors. The bank confirmed that the new entity will work towards net zero. Science-based targets will be contemplated once net zero targets have been implemented. In terms of its approach to different sectors, and in particular high-polluting industries, the bank confirmed that it would devise a strategy on this issue. It plans to spend the next two years working out the strategy, seeking to implement a policy by 2025/26.

We met UK retailer WH Smith to ask it to publish milestones in its roadmap for achieving emission reduction targets. We proposed that it tie some executive remuneration into reaching these milestones. The company understood our rationale for seeking the publication of milestones (it would allow us to ensure the company was on track to meeting its targets) and said it would think about the request. At the time of our meeting, WH Smith was going into its three-year remuneration policy review. The company stated that it was considering enhancing chief executives' packages so that they are more competitive.

We also reiterated our suggestion that WH Smith's workforce be paid in line with the real living wage. The company asserted that it was currently paying at a premium to the statutory minimum wage. It stated that bringing salaries in line with the real living wage could have an impact on profitability and potentially result in store closures. We were clear that we did not want our suggestion on this issue to have unintended consequences; we proposed that employees move on to a real living wage equivalent after completing training, which takes three to six months. We think this could act as a tool for recruitment and retention. The company said it would consider our proposals, but takes the view that wage increases are more of a gradual evolution. It has hired a new chief people officer, who is putting a new people strategy in place.

### **How did this financial product perform compared to the reference sustainable benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### **● How did the reference benchmark differ from a broad market index?**

N/A

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Dynamic Allocation Fund  
**Legal Entity Identifier:** 549300PZ80BI5Q8OS924

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.68% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	0.32%	100.00%

- **...and compared to previous periods?**

The Fund sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reference period, as they did in the previous reporting period.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 73.68% in sustainable investments in this reference period. This is slightly higher than it was in the previous reference period, when it was 71.33%.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 89.76% of NAV as at 31 March 2024. This comprised 73.68% of NAV in sustainable investments, and the remaining 16.21% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.03% were aligned to the EU Taxonomy. 38.02% related to investments with other environmental characteristics, and 35.62% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

## What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Public administration and defence; compulsory social security	52.61%
Financial and insurance activities	25.24%
Manufacturing	6.16%
Other	4.83%
Mining and quarrying	2.41%
Information and communication	2.39%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.53%
Real estate activities	1.03%
Transportation and storage	0.94%
Electricity, gas, steam and air conditioning supply	0.71%
Human health and social work activities	0.64%
Construction	0.35%
Administrative and support service activities	0.32%
Professional, scientific and technical activities	0.31%
Accommodation and food service activities	0.19%
Water supply; sewerage, waste management and remediation activities	0.19%
Activities of extraterritorial organisations and bodies	0.06%
Arts, entertainment and recreation	0.05%
Education	0.01%
Other service activities	0.01%
Agriculture, forestry and fishing	0.00%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.03%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it.

Climate change mitigation accounted for 0.27% while climate change adaptation accounted for 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.27%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0.01% and in enabling activities was 0.04% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.01%
Share of Enabling Activities	0.04%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of the Fund's investments that were aligned with the EU taxonomy was lower than in the previous reference period when it was 0.12%.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38.02%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 35.62%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, collectives, interest rate and FX derivatives and similar derivatives. No safeguards were applied.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.71% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	3.13%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	2.77%	100.00%
Percentage (%) of NAV held in excluded investments	-	-	0.00%

- **...and compared to previous periods?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach in this reference period as it did in the previous period.

As it did in the previous reference period, in this reference period it held 0% of ABS below the Investment Manager's threshold for alignment.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 76.71% in sustainable investments in the current reference period, higher than the percentage it held in the previous reference period (72.06%).

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

#### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
CIFCE 5X (A)	Other	1.17%	IE
BERKSHIRE HATHAWAY INC	Financial and insurance activities	1.09%	US

WAL-MART STORES INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.78%	US

### What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

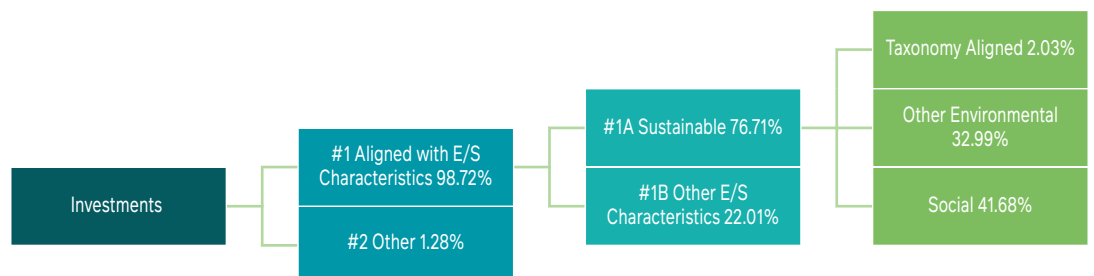

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.72% of NAV as at 31 March 2024. This comprised 76.71% of NAV in sustainable investments, and the remaining 22.01% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 2.03% were aligned to the EU Taxonomy, while 32.99% related to investments with other environmental characteristics, and 41.68% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	65.70%
Manufacturing	7.36%
Electricity, gas, steam and air conditioning supply	6.81%
Information and communication	4.74%
Other	4.73%
Real estate activities	4.06%
Public administration and defence; compulsory social security	3.04%
Administrative and support service activities	1.35%
Transportation and storage	0.97%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.79%
Professional, scientific and technical activities	0.23%
Accommodation and food service activities	0.11%
Mining and quarrying	0.06%
Construction	0.03%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 2.03%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 1.61% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0.03%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.61%
Climate Change Adaptation	0.03%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.12% and to enabling activities was 0.85%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.12%
Share of Enabling Activities	0.85%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was higher than it was in the previous reference period. In the previous reference period, the share was 0.96%, compared to 2.03% in this reference period.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32.99%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 41.68%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, currency derivatives, derivatives and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) European Inflation Linked Corporate Bond Fund  
**Legal Entity Identifier:** 549300405AQ08G7LRC37

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.12% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance)

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	13.34%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	12.90%	100.00%
percentage (%) of NAV held in excluded investments	-	100.00%	0.00%

- **...and compared to previous periods?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach in this reference period as it did in the previous period. As it did in the previous reference period, in this reference period it held 0% of ABS below the Investment Manager's threshold for alignment.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 74.12% in sustainable investments in the current reference period, slightly lower than the percentage it held in the previous reference period (76.34%).

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

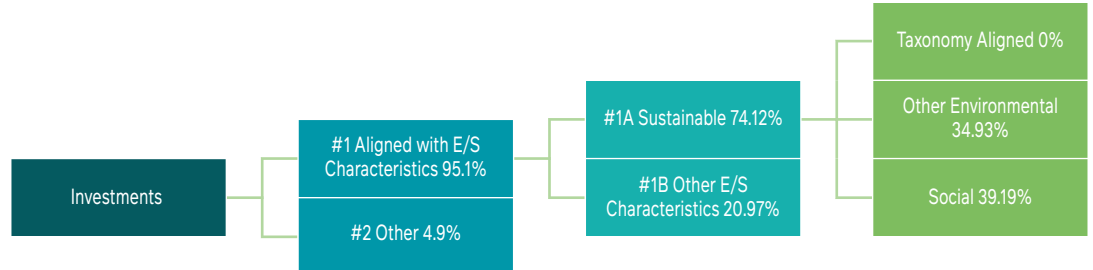

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.1% of NAV as at 31 March 2024. This comprised 74.12% of NAV in sustainable investments, and the remaining 20.97% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 34.93% related to investments with other environmental characteristics, and 39.19% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Public administration and defence; compulsory social security	53.21%
Financial and insurance activities	27.20%
Other	15.27%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.20%
Manufacturing	0.97%
Electricity, gas, steam and air conditioning supply	0.83%
Real estate activities	0.66%
Information and communication	0.63%
Transportation and storage	0.03%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.26% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.26%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and to enabling activities was 0.19%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.19%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly lower than it was in the previous reference period. In the previous reference period, the share was 0.07%, compared to 0% in this reference period.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34.93%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 39.19%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for normal liquidity purposes. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Product Name:** M&G (Lux) European Strategic Value Fund  
**Legal Entity Identifier:** 549300F39NTGOM8EIX97

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.16% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 7.37, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	7.37 ESG Score	96.99%	95.65%
Portfolio weighted average ESG score for the Investment Universe	7.86 ESG Score	100.00%	98.21%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	7.33 ESG Score	94.88%	97.14%
Portfolio weighted average ESG score for the Investment Universe	7.89 ESG Score	96.56%	49.41%

- **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 67.16% was higher than the previous reference period, when it was 62.98%. As it did last in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was slightly higher than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 7.37.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
SHELL PLC	Mining and quarrying	3.72%	NL
TOTALENERGIES	Manufacturing	3.68%	FR
TESCO PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.03%	GB
GLAXOSMITHKLINE	Manufacturing	2.81%	GB
SIEMENS N AG	Information and communication	2.70%	DE
KONINKLIJKE AHOLD DELHAIZE NV	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.65%	NL
ROCHE HOLDING PAR AG	Manufacturing	2.52%	CH
UBS GROUP AG	Financial and insurance activities	2.47%	CH
UCB SA	Manufacturing	2.46%	BE
STELLANTIS NV	Manufacturing	2.40%	GB
ASTRAZENECA PLC	Manufacturing	2.38%	GB
CARREFOUR SA	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.38%	FR
CAIXABANK SA	Financial and insurance activities	2.26%	ES
BANK OF IRELAND GROUP PLC	Financial and insurance activities	2.17%	IE
ERSTE GROUP BANK AG	Financial and insurance activities	2.12%	AT

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.48% of NAV as at 31 March 2024. This comprised 67.16% of NAV in sustainable investments, and the remaining 32.32% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 3.7% were aligned to the EU Taxonomy, 27.45% related to investments with other environmental characteristics, and 36.01% related to socially sustainable investments.

0.52% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	42.34%
Financial and insurance activities	18.22%
Wholesale and retail trade; repair of motor vehicles and motorcycles	12.54%
Information and communication	5.87%
Electricity, gas, steam and air conditioning supply	5.45%
Mining and quarrying	5.44%
Other	3.00%
Transportation and storage	2.76%
Administrative and support service activities	1.43%
Real estate activities	1.37%
Human health and social work activities	0.63%
Construction	0.53%
Accommodation and food service activities	0.43%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 3.7%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data. The percentage of contribution from climate change mitigation was 4.79% while climate change adaptation contributed 0.35%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	4.79%
Climate Change Adaptation	0.35%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

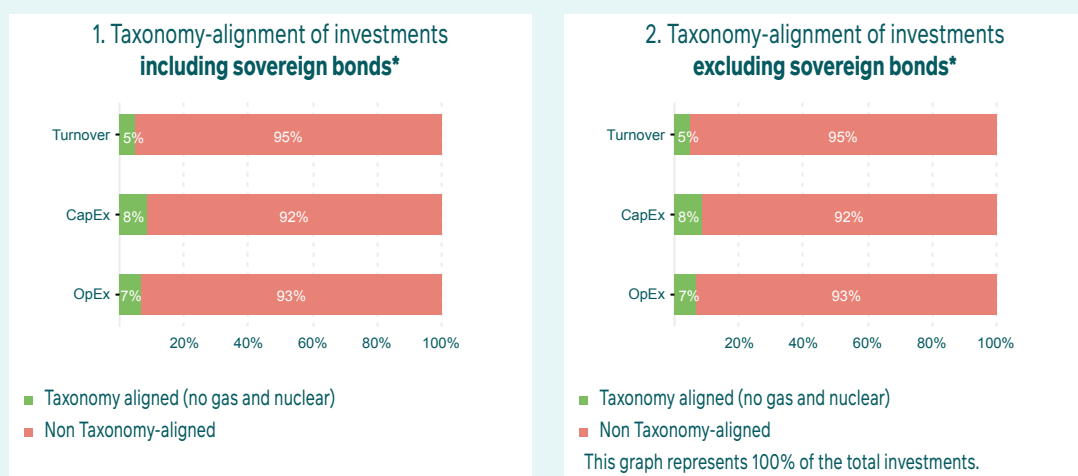

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 1.14% and in enabling activities 1.83%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	1.14%
Share of Enabling Activities	1.83%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 3.7% and was therefore higher than in the previous reference period when it was 0.95%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27.45%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 36.01%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, money market funds and securitized assets as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Investment Funds 1 - M&G (Lux) Fixed Maturity Bond Fund 2  
**Legal Entity Identifier:** 25490071LIN2XSPDBQ92

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.9% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance). All investments purchased for the Fund were in compliance with the Fund's exclusionary approach save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives. Of the Fund's sustainable investments, 0.64% were taxonomy aligned: 0.99% were aligned to climate change mitigation and 0% to climate change adaptation.

The share of the Fund's investments with an environmental objective that were not aligned with the EU taxonomy was 30.17%. 41.09% of the Fund's sustainable investments contributed to social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests. In addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 07/11/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
BNP PARIBAS CARDIF SA	Financial and insurance activities	2.24%	FR
FORD MOTOR CREDIT COMPANY LLC	Financial and insurance activities	2.24%	US
TRATON FINANCE LUXEMBOURG SA	Financial and insurance activities	2.21%	LU
NATWEST MARKETS PLC	Financial and insurance activities	2.11%	GB
LOGICOR FINANCING SARL	Financial and insurance activities	2.07%	IE
BANCA MONTE DEI PASCHI DI SIENA SP	Financial and insurance activities	2.05%	IT
AMERICAN TOWER CORPORATION	Real estate activities	2.03%	US
VONOVIA FINANCE BV	Financial and insurance activities	2.02%	NL

### What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.89% of NAV as at 31 March 2024. This comprised 71.90% of NAV in sustainable investments, and the remaining 27.99% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.64% were aligned to the EU Taxonomy. 30.17% related to investments with other environmental characteristics, and 41.09% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	68.43%
Real estate activities	10.05%
Information and communication	5.60%
Manufacturing	5.52%
Administrative and support service activities	3.75%
Transportation and storage	2.46%
Human health and social work activities	1.11%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.97%
Public administration and defence; compulsory social security	0.90%
Professional, scientific and technical activities	0.56%
Construction	0.49%
Other	0.15%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. Of the Fund's sustainable investments with an environmental objective, 0.64% were taxonomy aligned: 0.99% were aligned to climate change mitigation and 0% to climate change adaptation.

This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.99%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund’s investments made in transitional activities was 0% and in enabling activities was 0.20%. This compares to a minimum percentage commitment of 0% stated in the Fund’s precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.20%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The product is not yet able to provide comparison to a previous reporting period as this is the product’s first SFDR Level 2 Periodic Report disclosure. The product will provide historic comparison in the next Periodic Report.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of the Fund's investments with an environmental objective that were not aligned with the EU taxonomy was 30.17%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of the Fund's socially sustainable investments was 41.09%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund held cash, near cash and securitised assets as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied where such instruments are held as "Other" investments.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social objectives.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Investment Funds 1 - M&G (Lux) Fixed Maturity Bond Fund 3  
**Legal Entity Identifier:** 254900L6XPV7TWBQ2J18

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.47% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance). All investments purchased for the Fund were in compliance with the Fund's exclusionary approach save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives. Of the Fund's sustainable investments with an environmental objective, 1.13% were taxonomy aligned: 0.97% were aligned to climate change mitigation and 0.16% to climate change adaptation.

The share of the Fund's investments with an environmental objective that were not aligned with the EU taxonomy was 37.45%. 30.89% of the Fund's sustainable investments contributed to social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests. In addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 27/09/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
UK CONV GILT	Public administration and defence; compulsory social security	3.03%	GB
TREASURY NOTE	Public administration and defence; compulsory social security	2.98%	US
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	2.96%	FR
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.66%	DE
ITALY (REPUBLIC OF)	Public administration and defence; compulsory social security	0.65%	IT
UNICREDIT SPA	Financial and insurance activities	0.51%	IT
INTESA SANPAOLO SPA	Financial and insurance activities	0.51%	IT
NATIONWIDE BUILDING SOCIETY FX-FRN	Financial and insurance activities	0.49%	GB

CNP ASSURANCES	Financial and insurance activities	0.42%	FR
EQUITABLE FINANCIAL LIFE GLOBAL FU	Financial and insurance activities	0.42%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

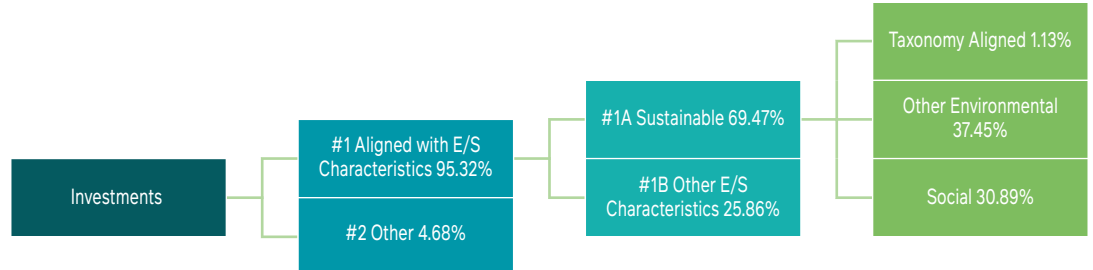

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.32% of NAV as at 31 March 2024. This comprised 69.47% of NAV in sustainable investments, and the remaining 25.86% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 1.13% were aligned to the EU Taxonomy. 37.45% related to investments with other environmental characteristics, and 30.89% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	50.08%
Public administration and defence; compulsory social security	11.28%
Manufacturing	10.41%
Information and communication	5.70%
Electricity, gas, steam and air conditioning supply	4.58%
Real estate activities	4.22%
Transportation and storage	3.51%
Other	2.34%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.54%
Administrative and support service activities	1.42%
Professional, scientific and technical activities	1.41%
Construction	1.08%
Human health and social work activities	0.81%
Water supply; sewerage, waste management and remediation activities	0.73%
Accommodation and food service activities	0.41%
Mining and quarrying	0.41%
Other service activities	0.07%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. Of the Fund's sustainable investments with an environmental objective, 1.13% were taxonomy aligned: 0.97% were aligned to climate change mitigation and 0.16% to climate change adaptation.

This percentage is determined by taking the quarter-end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.97%
Climate Change Adaptation	0.16%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund’s investments made in transitional activities was 0.12% and in enabling activities was 0.37%. This compares to a minimum percentage commitment of 0% stated in the Fund’s precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.12%
Share of Enabling Activities	0.37%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The product is not yet able to provide comparison to a previous reporting period as this is the product’s first SFDR Level 2 Periodic Report disclosure. The product will provide historic comparison in the next Periodic Report

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of the Fund's investments with an environmental objective that were not aligned with the EU taxonomy was 37.45%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of the Fund's socially sustainable investments was 30.89%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund held cash, near cash, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied where such instruments are held as "Other" investments.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social objectives.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Investment Funds 1 - M&G (Lux) Global Artificial Intelligence Fund  
**Legal Entity Identifier:** 2549009CK115415K4617

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 83.06% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below): The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating. In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics. The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance). The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the fund ESG Score was 7.23, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714). Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
As at -			
Portfolio weighted average ESG score for the fund	7.23 ESG Score	97.80%	97.66%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 83.06% in sustainable investments in the current reference period.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions. The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 09/11/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
NVIDIA CORP	Manufacturing	3.95%	US
MICROSOFT CORP	Information and communication	3.57%	US

MICRON TECHNOLOGY INC	Manufacturing	2.38%	US
TESLA INC	Manufacturing	2.16%	US
JPMORGAN CHASE	Financial and insurance activities	2.13%	US
VISA INC CLASS A	Financial and insurance activities	2.12%	US
TOKYO ELECTRON LTD	Manufacturing	2.03%	JP
CISCO SYSTEMS INC	Manufacturing	2.03%	US
SK HYNIX INC	Manufacturing	2.02%	KR
WALMART INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.88%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 0% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.78% of NAV as at 31 March 2024. This comprised 83.06% of NAV in sustainable investments, and the remaining 54.10% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.27% was aligned to the EU Taxonomy. 13.72% related to investments with other environmental characteristics, and 28.69% related to socially sustainable investments.

3.22% of the fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.27%.

This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it.

The percentage of contribution from climate change mitigation was 0.29% while climate change adaptation contributed 0%.

The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.29%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.29%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.29%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The product is not yet able to provide comparison to a previous reporting period as this is the product's first SFDR Level 2 Periodic Report disclosure. The product will provide historic comparison in the next Periodic Report

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 50.79%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 29.79%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social objectives.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Product Name:** M&G (Lux) Global Convertibles Fund  
**Legal Entity Identifier:** 549300DZSWWWBBRWLT54

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.1% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period. The Fund committed to maintain a weighted average ESG

by the financial product are attained.

rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 6.29, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714). Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	6.29 ESG Score	98.01%	92.22%
Portfolio weighted average ESG score for the Investment Universe	6.12 ESG Score	100.00%	93.49%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	6.26 ESG Score	96.80%	92.53%
Portfolio weighted average ESG score for the Investment Universe	5.91 ESG Score	98.27%	46.28%

● **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reporting period at 63.10% was higher than the previous reporting period, when it was 61.59%. As in the previous reporting period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was slightly higher than the previous reporting period, as can be seen in the table above. As it did in the previous reporting period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 6.29.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
PRYSMIAN SPA	Manufacturing	3.49%	IT
BOX INC	Information and communication	2.97%	US
AKAMAI TECHNOLOGIES INC	Information and communication	2.90%	US
JPMORGAN CHASE FINANCIAL COMPANY L	Financial and insurance activities	2.66%	US
CELLNEX TELECOM SA	Information and communication	2.50%	ES
JAZZ INVESTMENTS I LTD	Financial and insurance activities	2.50%	BM
BNP PARIBAS SA	Financial and insurance activities	2.46%	FR
SOUTHWEST AIRLINES CO	Transportation and storage	2.40%	US
MEITUAN	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.37%	CN
SEAGATE TECHNOLOGY HDD HOLDINGS	Manufacturing	2.18%	KY
STMICROELECTRONICS NV	Manufacturing	2.01%	NL
HUAZHU GROUP LTD	Accommodation and food service activities	1.91%	KY
RAG-STIFTUNG	Financial and insurance activities	1.87%	DE
MACOM TECHNOLOGY SOLUTIONS HOLDING	Manufacturing	1.86%	US
UBER TECHNOLOGIES INC	Information and communication	1.72%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

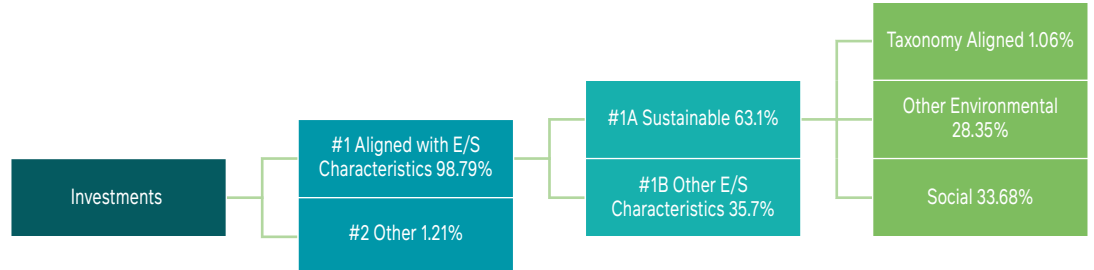

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.79% of NAV as at 31 March 2024. This comprised 63.10% of NAV in sustainable investments, and the remaining 35.70% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 1.06% were aligned to the EU Taxonomy, 28.35% related to investments with other environmental characteristics, and 33.68% related to socially sustainable investments.

1.21% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	28.48%
Financial and insurance activities	19.68%
Information and communication	19.50%
Wholesale and retail trade; repair of motor vehicles and motorcycles	8.94%
Transportation and storage	5.73%
Professional, scientific and technical activities	3.03%
Construction	2.42%
Accommodation and food service activities	2.18%
Real estate activities	2.09%
Arts, entertainment and recreation	1.97%
Other	1.83%
Mining and quarrying	1.78%
Administrative and support service activities	0.90%
Electricity, gas, steam and air conditioning supply	0.76%
Education	0.71%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 1.06%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution from climate change mitigation was 0.97% while climate change adaptation contributed 0.10%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.97%
Climate Change Adaptation	0.10%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.00% and in enabling activities 0.89%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.89%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reporting period was 1.06% and was therefore higher than in the previous reporting period when it was 0.47%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28.35%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 33.68%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, money market funds and derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### How did the reference benchmark differ from a broad market index?

N/A

#### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Global Dividend Fund  
**Legal Entity Identifier:** 549300TRK90WIUZI3612

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.76% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### • How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 7.55, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	7.55 ESG Score	98.22%	100.00%
Portfolio weighted average ESG score for the Investment Universe	6.78 ESG Score	99.98%	98.89%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	7.55 ESG Score	96.47%	99.85%
Portfolio weighted average ESG score for the Investment Universe	6.79 ESG Score	98.36%	49.67%

● **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 68.76% was lower than the previous reference period, when it was 82.74 %. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score was the same as the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 7.55.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
METHANEX CORP	Manufacturing	7.37%	CA
BROADCOM INC	Manufacturing	6.64%	US
KEYERA CORP	Wholesale and retail trade; repair of motor vehicles and motorcycles	5.86%	CA

MEDTRONIC PLC	Manufacturing	2.75%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.94% of NAV as at 31 March 2024. This comprised 68.76% of NAV in sustainable investments, and the remaining 29.18% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.77% were aligned to the EU Taxonomy, 28.52% related to investments with other environmental characteristics, and 39.47% related to socially sustainable investments.

2.06% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	57.26%
Financial and insurance activities	15.12%
Wholesale and retail trade; repair of motor vehicles and motorcycles	13.35%
Information and communication	8.79%
Mining and quarrying	2.80%
Other	1.78%
Electricity, gas, steam and air conditioning supply	0.91%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.77%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 0.79% while climate change adaptation contributed 0.0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.79%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.79%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.79%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 0.77% and was therefore higher than in the previous reference period when it was 0.73%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28.52%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 39.47%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### How did the reference benchmark differ from a broad market index?

N/A

#### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Global Emerging Markets Fund  
**Legal Entity Identifier:** 54930005JJ2DZTKZDJ63

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.1% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reporting period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

Both of these tests were met as the Fund's ESG Score was 6.38 which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	6.38 ESG Score	97.28%	91.15%
Portfolio weighted average ESG score for the Investment Universe	5.61 ESG Score	100.00%	98.84%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	5.95 ESG Score	98.04%	91.74%
Portfolio weighted average ESG score for the Investment Universe	5.47 ESG Score	98.74%	49.69%

- **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reporting period at 54.10% was lower than the previous reporting period, when it was 64.53%. As it did in the previous reporting period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was higher than in the last reporting period, as can be seen in the table above. As it did in the previous reporting period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of at least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 6.38.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
SAMSUNG ELECTRONICS LTD	Manufacturing	6.23%	KR
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	4.21%	TW
ALIBABA GROUP HOLDING ADR REPRESENTATIVE	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.19%	CN
FIBRA UNO ADMINISTRACION REIT SA	Financial and insurance activities	2.62%	MX
SAMSUNG FIRE & MARINE INSURANCE LTD	Financial and insurance activities	2.45%	KR
COMPANHIA CONCESSIONES RODOVIARIAS S	Transportation and storage	2.26%	BR
HANA FINANCIAL GROUP INC	Financial and insurance activities	2.22%	KR
NASPERS LIMITED N LTD	Information and communication	2.20%	ZA
FAR EAST HORIZON LTD	Financial and insurance activities	2.09%	HK
BAIDU ADS REPTG INC CLASS A	Other	2.05%	CN
CHINA CONSTRUCTION BANK CORP H	Financial and insurance activities	2.04%	CN
PING AN INSURANCE (GROUP) CO OF CH	Financial and insurance activities	2.03%	CN
HDFC BANK LTD	Financial and insurance activities	2.00%	IN
SHINHAN FINANCIAL GROUP LTD	Financial and insurance activities	1.96%	KR
TECK RESOURCES SUBORDINATE VOTING	Mining and quarrying	1.83%	CA

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.72% of NAV as at 31 March 2024. This comprised 54.10% of NAV in sustainable investments, and the remaining 41.62% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 39.20% related to investments with other environmental characteristics, and 14.90% related to socially sustainable investments.

4.28% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	31.39%
Manufacturing	31.18%
Wholesale and retail trade; repair of motor vehicles and motorcycles	9.90%
Mining and quarrying	6.30%
Information and communication	5.34%
Electricity, gas, steam and air conditioning supply	3.65%
Other	2.72%
Transportation and storage	2.40%
Administrative and support service activities	2.21%
Construction	2.09%
Real estate activities	1.86%
Professional, scientific and technical activities	0.91%
Education	0.06%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 0% while climate change adaptation contributed 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reporting period was 0% and was therefore the same as in the previous reporting period when it was also 0%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 39.20%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 14.90%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

No minimum environmental or social safeguards are applied to FX derivatives. The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A

- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Global Listed Infrastructure Fund  
**Legal Entity Identifier:** 222100K85SU14IF7PW30

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.63% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and it made investments that are SDG-aligned (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes ("Exclusionary Approach").

The Fund considered the UN Sustainable Development Goals (SDGs) as part of its investment process and the sustainability themes considered by the Investment Manager are based on the SDGs as a relevant framework to measure contribution to sustainability factors ("SDG-alignment"). 79.28% of the Fund's investments by value were SDG-aligned. 99.02% of the Fund's investments by value were in investments considered by the Investment Manager to be related to sustainability themes.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and SDG-alignment were met at all times during the reporting period.

by the financial product are attained.

Please see the below table for an overview of the Funds' performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of investments by value that is SDG-aligned	79.28 %	100.00%	99.79%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of investments by value that is SDG-aligned	81.11 %	100.00%	99.72%

- **...and compared to previous periods?**

The percentage of investments by value that was SDG-aligned in this reference period was slightly lower than in the last reference period (79.28% versus 81.11%).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 57.63% in sustainable investments in the current reference period, which was higher than in the last period when it held 51.43%.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund. Information on how the principal adverse impacts were taken into account will be provided in the Fund's annual report.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
CROWN CASTLE INC	Real estate activities	4.03%	US
SEGRO REIT PLC	Real estate activities	3.87%	GB
ALEXANDRIA REAL ESTATE EQUITIES RE	Real estate activities	3.85%	US

EDISON INTERNATIONAL	Electricity, gas, steam and air conditioning supply	2.61%	US
NEXTERA ENERGY PARTNERS UNITS	Electricity, gas, steam and air conditioning supply	2.57%	US
KEYERA CORP	Transportation and storage	2.50%	CA

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.02% of NAV as at 31 March 2024. This comprised 57.63% of NAV in sustainable investments, and the remaining 41.40% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 4.71% were aligned to the EU Taxonomy. 24.82% related to investments with other environmental characteristics, and 28.10% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Electricity, gas, steam and air conditioning supply	28.96%
Real estate activities	17.02%
Transportation and storage	15.01%
Financial and insurance activities	14.85%
Information and communication	5.89%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.62%
Mining and quarrying	5.14%
Construction	4.11%
Water supply; sewerage, waste management and remediation activities	2.37%
Other	1.02%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 4.71%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution from climate change mitigation was 9.14% while climate change adaptation contributed 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	9.14%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.01% and in enabling activities 3.76%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.01%
Share of Enabling Activities	3.76%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned with the EU taxonomy in this reference period (4.71%) was lower than in the previous period when it was 5.84%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24.82%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 28.10%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash and money market funds, infrastructure funds and securitised assets as "Other" investments during the reporting period as part of normal liquidity management. No minimum safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and it made investments that are SDG-aligned. Its compliance with the same is reported in the sustainability indicators above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Global Macro Bond Fund  
**Legal Entity Identifier:** 549300OHGMRPC0NPD471

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.75% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met nearly all of the time during the reporting period.

There was one breach caused by an update to our internal good governance test around restricted countries on the basis of ultimate country of incorporation and domicile. The Fund held a bond from the Government of the Bahamas. Trades were carried out to return the fund to compliance.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	2.67%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	2.88%	100.00%

- **...and compared to previous periods?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach in this reference period as it did in the previous period. Compared to the previous period, in this reference period, there was one instance where the Fund did not meet the test for compliance with the Exclusionary Approach.

As it did in the previous reference period, in this reference period it held 0% of ABS below the Investment Manager's threshold for alignment.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 56.75% in sustainable investments in the current reference period, slightly higher than the percentage it held in the previous reference period (55.85%).

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which were taken into account by the

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
TREASURY (CPI) NOTE	Public administration and defence; compulsory social security	6.00%	US
TREASURY BOND	Public administration and defence; compulsory social security	3.98%	US
TREASURY NOTE	Public administration and defence; compulsory social security	3.60%	US
TREASURY NOTE	Public administration and defence; compulsory social security	2.96%	US
TREASURY (CPI) NOTE	Public administration and defence; compulsory social security	2.61%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.43% of NAV as at 31 March 2024. This comprised 56.75% of NAV in sustainable investments, and the remaining 38.68% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.25% were aligned to the EU Taxonomy, while 25.36% related to investments with other environmental characteristics, and 31.14% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Public administration and defence; compulsory social security	69.87%
Financial and insurance activities	18.58%
Other	4.15%
Information and communication	2.47%
Manufacturing	2.08%
Electricity, gas, steam and air conditioning supply	1.62%
Activities of extraterritorial organisations and bodies	0.58%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.35%
Water supply; sewerage, waste management and remediation activities	0.23%
Administrative and support service activities	0.06%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 0.25% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.37% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.37%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.05% and to enabling activities was 0.24%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.05%
Share of Enabling Activities	0.24%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly higher than it was in the previous reference period. In the previous reference period, the share was 0.2%, compared to 0.25% in this reference period.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25.36%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 31.14%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, FX derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Product Name:** M&G (Lux) Global Sustain Paris Aligned Fund  
**Legal Entity Identifier:** 549300IT00LV3HDN7Z63

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective:** 96.68%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that contribute towards the Paris Agreement climate change goal, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 1.49%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

### Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

In the reporting period, the Fund's normalised Weighted Average Carbon Intensity (WACI) was 54.52 t CO<sub>2</sub>e. The WACI is a measure of the carbon intensity of all underlying holdings, weighted to their allocations in the Fund.

Notably, investee companies providing climate solutions helped to avoid 139924970 tonnes of CO<sub>2</sub> equivalents, according to the latest available company disclosures. eBay and SolarEdge are two examples of investee companies operating in the climate solutions area. eBay contributes to the circular economy by enabling the buying and selling of used and refurbished goods while SolarEdge supplies solar inverters, facilitating the clean energy transition.

Furthermore, 52.29% of the fund's Net Asset Value (NAV) was held in companies with ratified science-based targets, while a further 22.32% of NAV was held in companies that have committed to science-based targets. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	28.13%	98.17%	73.61%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	41.37%	98.17%	73.61%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	83.85%	98.17%	98.08%
Tonnes of CO <sub>2</sub> emissions avoided by positive impact investments	197050000 tCO <sub>2</sub> e	98.17%	12.07%
Total renewable energy produced (megawatt hours)	-	98.17%	0%
Weighted average carbon intensity (WACI) for the fund	57.0 tCO <sub>2</sub> e	96.24%	100%
Weighted average carbon intensity (WACI) for the Investment Universe	128.6 tCO <sub>2</sub> e	-	-

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	22.32%	100%	83.30%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	64.12%	100%	96.20%
Avoided carbon emissions-for companies that provide direct solutions to the climate challenge via their products and services	139924970 tCO <sub>2</sub> e	100%	11.26%
Total renewable energy produced (megawatt hours)	-	100%	0%
Weighted average carbon intensity (WACI) for the fund	54.52 tCO <sub>2</sub> e	96.20%	100%
Weighted average carbon intensity (WACI) for the Investment Universe	117.55 tCO <sub>2</sub> e	99.98%	98.92%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	52.29%	100%	83.30%

● **...and compared to previous periods?**

In the reference period, the Fund's normalised Weighted Average Carbon Intensity (WACI) was 54.52 t CO<sub>2</sub>e. This is a decrease on the previous reporting period's figure which was 59.3 t CO<sub>2</sub>e.

During the reference period, investee companies providing climate solutions helped to avoid 139924970 tonnes of CO<sub>2</sub> equivalents. This is a decrease on the previous reporting period's figure of over 197 million tonnes.

In the prior reporting period, 41.37% of NAV was held in companies that have ratified science-based targets and 28.13% in companies that have committed to science-based targets. In the reference period, the percentage of NAV held in companies with ratified science-based targets increased to 52.29% while the percentage of NAV held in companies that have committed to science-based targets fell to 22.32%.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information and communication	7.65%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective.

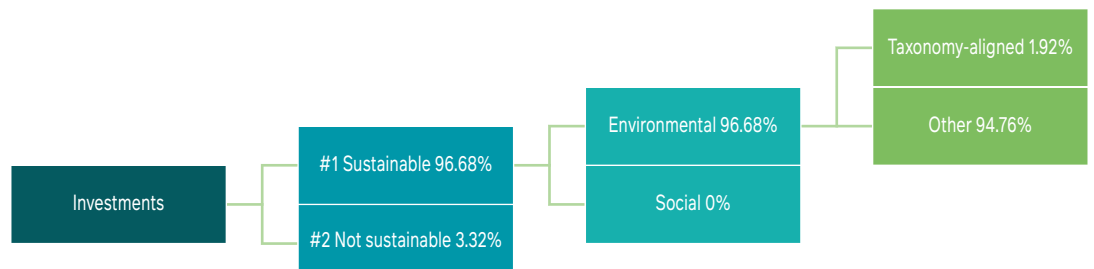

As of 31 March 2024, 96.68% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 1.92% of the sustainable investments were aligned to the EU Taxonomy. 96.68% related to investments with environmental objectives.

3.32% of the Fund was composed of "not sustainable" investments (cash and money market funds).

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	33.44%
Financial and insurance activities	26.36%
Information and communication	25.66%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.79%
Other	3.80%
Transportation and storage	2.59%
Administrative and support service activities	1.27%
Electricity, gas, steam and air conditioning supply	0.87%
Other service activities	0.22%

- **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 1.92% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 1.49%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.49%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% while the share of the Fund's investments made in enabling activities was 0.80% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.80%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 1.92% in taxonomy-aligned investments. This is an increase on the previous reporting period's figure which was 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 94.76%. This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash and money market funds as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund has invested in companies that contribute towards the Paris Agreement climate change goal. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their climate and sustainability standards, to support the fund's sustainable investment objective.

For example, we encouraged US-listed online marketplace eBay to more explicitly link remuneration KPIs to sustainability targets. In response to our suggestion that it set a net zero target, the company confirmed that it would be doing so and that it planned to seek SBTi validation for this.

We also engaged with companies on social topics. We met Danish pharmaceutical company Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We believe Novo Nordisk is doing all it can to prevent abuse of Wegovy.

We discussed two key social issues with Johnson Controls International. The first pertained to a cyberattack carried out on the company last year. In light of this, we wanted to ensure that the business had implemented the requisite systems, controls and procedures to limit damage in case of any future attack. Secondly, we wanted to verify that the company was no longer exposed to perfluoroalkyl and polyfluoroalkyl substances (PFAS), often termed “forever chemicals”.

The company asserted that the cyberattack prompted it to review and strengthen its risk mitigation strategy. It has also hired a new chief information officer and chief technology officer, further bolstering cybersecurity at the business.

Unfortunately, Johnson Controls is currently the subject of a class action connected to PFAS contamination. The action relates to a product whose chemical composition had been mandated by the US government. The company confirmed that is now selling a compliant version of the product and that nothing else that it sells contains PFAS.

### **How did this financial product perform compared to the reference sustainable benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### **● How did the reference benchmark differ from a broad market index?**

N/A

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

#### **● How did this financial product perform compared with the reference benchmark?**

N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Global Themes Fund  
**Legal Entity Identifier:** 2549003Q1RX8JB20XW74

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.13% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 7.48, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	7.48 ESG Score	98.71%	97.20%
Portfolio weighted average ESG score for the Investment Universe	6.78 ESG Score	99.98%	98.89%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	7.37 ESG Score	98.93%	98.59%
Portfolio weighted average ESG score for the Investment Universe	6.79 ESG Score	99.48%	49.67%

- **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 71.13% was lower than the previous reference period, when it was 76.08%. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was higher than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 7.48.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information and communication	4.08%	US
ALPHABET INC CLASS A	Information and communication	3.96%	US
PRAIRIESKY ROYALTY LTD	Mining and quarrying	3.50%	CA
INTEL CORPORATION CORP	Manufacturing	3.01%	US
FRANCO NEVADA CORP	Financial and insurance activities	3.01%	CA
BROOKFIELD CORP	Real estate activities	2.74%	CA
TENCENT HOLDINGS LTD	Information and communication	2.66%	CN
CROWN CASTLE INC	Real estate activities	2.39%	US
SEGRO REIT PLC	Real estate activities	2.35%	GB
BYD LTD H	Manufacturing	2.35%	CN
MAGNA INTERNATIONAL INC	Manufacturing	2.25%	CA
MANULIFE FINANCIAL CORP	Financial and insurance activities	2.02%	CA
LULULEMON ATHLETICA INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.99%	CA
BRISTOL MYERS SQUIBB	Manufacturing	1.98%	US
BECTON DICKINSON	Manufacturing	1.98%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

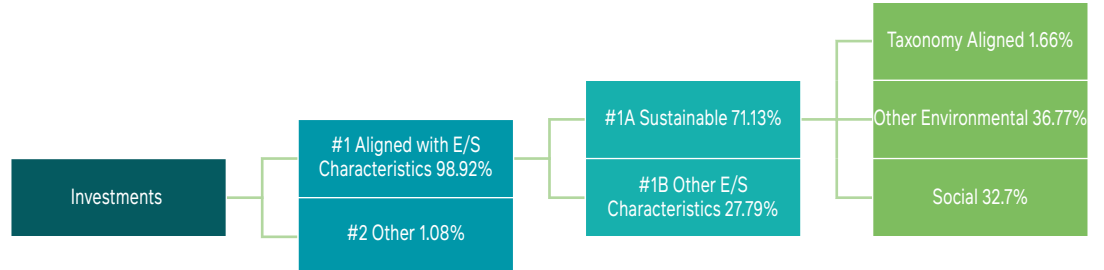

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.92% of NAV as at 31 March 2024. This comprised 71.13% of NAV in sustainable investments, and the remaining 27.79% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 1.66% were aligned to the EU Taxonomy, 36.77% related to investments with other environmental characteristics, and 32.70% related to socially sustainable investments.

1.08% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	33.13%
Information and communication	16.90%
Financial and insurance activities	12.97%
Real estate activities	10.36%
Electricity, gas, steam and air conditioning supply	6.62%
Transportation and storage	4.87%
Mining and quarrying	4.79%
Wholesale and retail trade; repair of motor vehicles and motorcycles	4.50%
Water supply; sewerage, waste management and remediation activities	1.99%
Construction	1.49%
Other	1.29%
Human health and social work activities	0.98%
Professional, scientific and technical activities	0.10%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 1.66%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 3.95% while climate change adaptation contributed 0.0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	3.95%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.01% and in enabling activities 0.52%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.01%
Share of Enabling Activities	0.52%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 1.66% and was therefore lower than in the previous reference period when it was 3.03%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36.77%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 32.70%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Income Allocation Fund  
**Legal Entity Identifier:** 5493009TGYUIY117XO13

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.55% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach").

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance)

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- **...and compared to previous periods?**

The Fund sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reference period, as they did in the previous reporting period.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 61.55% in sustainable investments in this reference period. This is slightly lower than it was in the previous reference period, when it was 62.83%.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	5.12%	DE

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

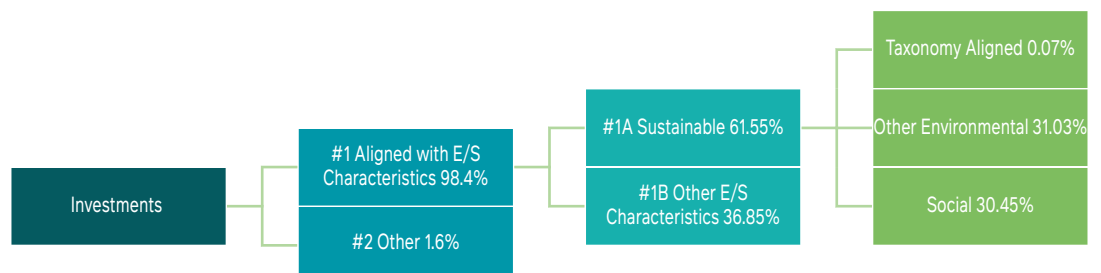

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 98.40% of NAV as at 31 March 2024. This comprised 61.55% of NAV in sustainable investments, and the remaining 36.85% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.07% were aligned to the EU Taxonomy. 31.03% related to investments with other environmental characteristics, and 30.45% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

## What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Public administration and defence; compulsory social security	45.49%
Manufacturing	20.58%
Financial and insurance activities	10.70%
Information and communication	6.45%
Wholesale and retail trade; repair of motor vehicles and motorcycles	3.45%
Transportation and storage	2.58%
Mining and quarrying	2.56%
Activities of extraterritorial organisations and bodies	2.00%
Electricity, gas, steam and air conditioning supply	1.31%
Other	1.21%
Real estate activities	1.18%
Accommodation and food service activities	0.78%
Administrative and support service activities	0.59%
Professional, scientific and technical activities	0.57%
Human health and social work activities	0.34%
Construction	0.23%
Other service activities	0.00%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.07%.

This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

Climate change mitigation accounted for 0.09% while climate change adaptation accounted for 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.09%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0.01% and in enabling activities was 0.02% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.01%
Share of Enabling Activities	0.02%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of the Fund's investments that were aligned with the EU taxonomy in this reference period (0.07%) is in line with the previous reference period when it was 0.08%.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31.03%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 30.45%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, near cash, collectives, FX derivatives, index derivatives and similar derivatives. No safeguards were applied.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Japan Fund  
**Legal Entity Identifier:** 549300OR1ZG2XAP7AU07

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.61% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 7.19, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	7.19 ESG Score	97.27%	99.16%
Portfolio weighted average ESG score for the Investment Universe	7.34 ESG Score	100.00%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the Fund	6.69 ESG Score	98.78%	98.60%
Portfolio weighted average ESG score for the Investment Universe	7.15 ESG Score	99.42%	50.00%

● **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 59.61% was lower than the previous reference period, when it was 62.51%. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was higher than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of at least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 7.19.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
mitsubishi UFJ FINANCIAL GROUP INC	Financial and insurance activities	5.97%	JP
TOYOTA MOTOR CORP	Manufacturing	5.47%	JP
SEVEN & I HOLDINGS LTD	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.53%	JP
HITACHI LTD	Information and communication	4.22%	JP
MITSUI LTD	Mining and quarrying	4.09%	JP
NIPPON TELEGRAPH AND TELEPHONE COR	Information and communication	3.81%	JP
ORIX CORP	Financial and insurance activities	3.75%	JP
SONY GROUP CORP	Manufacturing	3.32%	JP
HONDA MOTOR LTD	Manufacturing	3.23%	JP
TOYOTA INDUSTRIES CORP	Manufacturing	2.62%	JP
SOFTBANK GROUP CORP	Information and communication	2.45%	JP
RECRUIT HOLDINGS LTD	Administrative and support service activities	2.43%	JP
CREDIT SAISON LTD	Financial and insurance activities	2.39%	JP
NEC CORP	Information and communication	2.36%	JP
MITSUI FUDOSAN LTD	Real estate activities	2.23%	JP

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.58% of NAV as at 31 March 2024. This comprised 59.61% of NAV in sustainable investments, and the remaining 37.97% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, 53.54% related to investments with other environmental characteristics, and 6.07% related to socially sustainable investments.

2.42% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	40.31%
Information and communication	13.92%
Financial and insurance activities	13.91%
Wholesale and retail trade; repair of motor vehicles and motorcycles	7.13%
Administrative and support service activities	5.72%
Real estate activities	4.45%
Mining and quarrying	4.09%
Construction	2.77%
Other	2.71%
Transportation and storage	2.50%
Professional, scientific and technical activities	2.37%
Arts, entertainment and recreation	0.11%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.00%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data. The percentage of contribution from climate change mitigation was 0% while climate change adaptation contributed 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.00% and in enabling activities 0.00%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 0% and was the same as in the previous reference period when it was 0%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 53.54%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 6.07%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives. The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Japan Smaller Companies Fund  
**Legal Entity Identifier:** 549300QUHQWF3GEVSU46

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective. No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 6.26, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714). Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	6.26 ESG Score	97.64%	85.97%
Portfolio weighted average ESG score for the Investment Universe	6.73 ESG Score	100.00%	98.10%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	5.82 ESG Score	98.12%	81.90%
Portfolio weighted average ESG score for the Investment Universe	6.45 ESG Score	99.15%	48.92%

- **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 55.3% was higher than the previous reference period, when it was 49.4%. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was slightly higher than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of at least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 6.26.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
KYB CORP	Manufacturing	2.93%	JP
CREDIT SAISON LTD	Financial and insurance activities	2.88%	JP
ICHIGO INC	Real estate activities	2.87%	JP
TOYOTA INDUSTRIES CORP	Manufacturing	2.79%	JP
OPEN UP GROUP INC	Administrative and support service activities	2.77%	JP
USHIO INC	Manufacturing	2.62%	JP
SUMITOMO BAKELITE LTD	Manufacturing	2.54%	JP
HITACHI ZOSEN CORP	Manufacturing	2.52%	JP
ORIX CORP	Financial and insurance activities	2.47%	JP
ROHM LTD	Manufacturing	2.44%	JP
YAMAHA MOTOR LTD	Manufacturing	2.42%	JP
DIP CORP	Administrative and support service activities	2.31%	JP
CKD CORP	Manufacturing	2.26%	JP
NEC CORP	Information and communication	2.26%	JP
NIKON CORP	Manufacturing	2.20%	JP

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

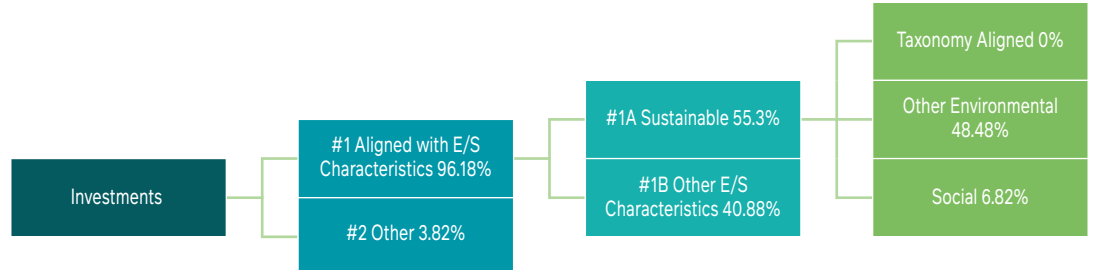

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.18% of NAV as at 31 March 2024. This comprised 55.30% of NAV in sustainable investments, and the remaining 40.88% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 48.48% related to investments with other environmental characteristics, and 6.82% related to socially sustainable investments.

3.82% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	57.90%
Financial and insurance activities	11.00%
Administrative and support service activities	6.90%
Transportation and storage	4.77%
Real estate activities	3.79%
Professional, scientific and technical activities	3.47%
Wholesale and retail trade; repair of motor vehicles and motorcycles	3.27%
Information and communication	2.86%
Other	2.35%
Construction	2.15%
Human health and social work activities	1.37%
Agriculture, forestry and fishing	0.16%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 0% while climate change adaptation contributed 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 0% and was therefore the same as the previous reference period when it was 0%.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 48.48%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 6.82%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### **How did the reference benchmark differ from a broad market index?**

N/A

#### **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) North American Dividend Fund  
**Legal Entity Identifier:** LU1670627253

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.1% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 7.17, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714). Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	7.17 ESG Score	98.73%	100.00%
Portfolio weighted average ESG score for the Investment Universe	6.63 ESG Score	100.00%	99.25%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	7.32 ESG Score	98.74%	100.00%
Portfolio weighted average ESG score for the Investment Universe	6.68 ESG Score	99.37%	49.82%

- **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 79.10% was lower than the previous reference period, when it was 89.05%. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was slightly lower than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of at least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 7.17.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Information and communication	9.09%	US
BROADCOM INC	Manufacturing	8.07%	US
MASTERCARD INC CLASS A	Financial and insurance activities	8.04%	US
VISA INC CLASS A	Financial and insurance activities	6.00%	US
UNITEDHEALTH GROUP INC	Financial and insurance activities	4.60%	US
BLACKROCK INC	Financial and insurance activities	4.18%	US
AMERICAN TOWER REIT CORP	Real estate activities	2.94%	US
COGENT COMMUNICATIONS HOLDINGS INC	Information and communication	2.76%	US
JPMORGAN CHASE	Financial and insurance activities	2.69%	US
AIR PRODUCTS AND CHEMICALS INC	Manufacturing	2.66%	US
THERMO FISHER SCIENTIFIC INC	Manufacturing	2.48%	US
ELEVANCE HEALTH INC	Financial and insurance activities	2.41%	US
AMERICAN EXPRESS	Financial and insurance activities	2.29%	US
EQUINIX REIT INC	Information and communication	2.18%	US
ARTHUR J GALLAGHER	Financial and insurance activities	2.11%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.86% of NAV as at 31 March 2024. This comprised 79.10% of NAV in sustainable investments, and the remaining 18.76% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.0% were aligned to the EU Taxonomy. 42.24% related to investments with other environmental characteristics, and 36.86% related to socially sustainable investments.

2.14% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	33.55%
Manufacturing	26.94%
Information and communication	19.61%
Wholesale and retail trade; repair of motor vehicles and motorcycles	6.59%
Real estate activities	4.83%
Administrative and support service activities	2.43%
Electricity, gas, steam and air conditioning supply	2.10%
Mining and quarrying	1.97%
Other	1.27%
Transportation and storage	0.71%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution from climate change mitigation was 1.81% while climate change adaptation contributed 0.0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.81%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 0.0% and was therefore the same as the previous reference period when it was 0.0%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42.24%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 36.86%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### ● How did the reference benchmark differ from a broad market index?

N/A.

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A.
- **How did this financial product perform compared with the broad market index?**  
N/A.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) North American Value Fund  
**Legal Entity Identifier:** 549300JHS93E10IP4365

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.43% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintained a weighted average ESG rating that was equivalent to at least an MSCI A rating.

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Tilt were met at all times during the reference period.

by the financial product are attained.

The Fund committed to maintain a weighted average ESG rating that is either:

1. Higher than that of the equity market as represented by its investment universe; or
2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met as the Fund's ESG Score was 6.39, which is equivalent to at least an MSCI A rating (or numerical score of at least 5.714).

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Portfolio weighted average ESG score for the fund	6.39 ESG Score	97.43%	99.03%
Portfolio weighted average ESG score for the Investment Universe	6.63 ESG Score	100.00%	99.25%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	6.10 ESG Score	97.37%	100.00%
Portfolio weighted average ESG score for the Investment Universe	6.68 ESG Score	98.53%	49.82%

● **...and compared to previous periods?**

The proportion of the Fund's sustainable investments in this reference period at 77.43% was higher than the previous reference period, when it was 76.42%. As it did in the previous reference period, the Fund complied with its Exclusionary Approach at all times during the period. The portfolio weighted average ESG score for the Fund was higher than in the previous period, as can be seen in the table above. As it did in the previous period, the Fund maintained a Positive ESG Tilt by meeting the second test of achieving an MSCI ESG rating of least an A (equivalent to a numerical score of at least 5.714) with its ESG Score of 6.39.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
ALPHABET INC CLASS A	Information and communication	4.56%	US
META PLATFORMS INC CLASS A	Information and communication	3.61%	US
JPMORGAN CHASE	Financial and insurance activities	2.78%	US
JOHNSON & JOHNSON	Manufacturing	2.65%	US
MONDELEZ INTERNATIONAL INC CLASS A	Manufacturing	2.19%	US
CHEVRON CORP	Manufacturing	2.15%	US

CISCO SYSTEMS INC	Manufacturing	1.89%	US
COCA COLA EUROPACIFIC PARTNERS PLC	Manufacturing	1.80%	GB
KROGER	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.76%	US
DEVON ENERGY CORP	Mining and quarrying	1.75%	US
MEDTRONIC PLC	Manufacturing	1.74%	US
INTEL CORPORATION CORP	Manufacturing	1.72%	US
ELEVANCE HEALTH INC	Financial and insurance activities	1.71%	US
BRISTOL MYERS SQUIBB	Manufacturing	1.64%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

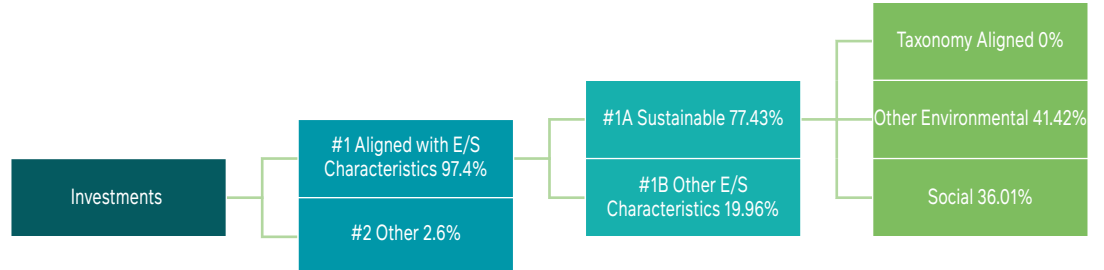

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.40% of NAV as at 31 March 2024. This comprised 77.43% of NAV in sustainable investments, and the remaining 19.96% of NAV in investments with other environmental and or social characteristics. Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy. 41.42% related to investments with other environmental characteristics, and 36.01% related to socially sustainable investments.

2.60% of the Fund was held in investments that were not aligned to the promoted environmental or social characteristics.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	45.23%
Information and communication	17.73%
Financial and insurance activities	14.00%
Mining and quarrying	5.33%
Wholesale and retail trade; repair of motor vehicles and motorcycles	4.70%
Electricity, gas, steam and air conditioning supply	4.30%
Transportation and storage	3.53%
Other	2.57%
Real estate activities	1.45%
Administrative and support service activities	0.64%
Human health and social work activities	0.48%
Professional, scientific and technical activities	0.03%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data. The percentage of contribution from climate change mitigation was 0% while climate change adaptation contributed 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy in this reference period was 0% and was therefore the same as in the previous reference period when it was 0%.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 41.42%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 36.01%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. The Fund committed to maintain a weighted average ESG rating that is either

1. higher than that of the equity market as represented by its investment universe; or
2. equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

The second of these tests was met. Its compliance with the same is reported in the sustainability indicators section shown above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

#### How did the reference benchmark differ from a broad market index?

N/A

#### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Optimal Income Fund  
**Legal Entity Identifier:** 5493008ON3OV4FEXKY59

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.32% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted the use of an Exclusionary Approach (as defined below):

The Sub-Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager is promoting environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period. Until 30 November 2023, the fund committed to maintain a weighted average ESG score higher than that of its investment universe ("Positive ESG Tilt"), which it did successfully. From 30 November 2023 this Positive ESG Tilt was removed.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	0.04%	75.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	6.83 ESG Score	65.38%	91.16%
Portfolio weighted average ESG score for the Investment Universe	6.11 ESG Score	64.60%	42.62%

- **...and compared to previous periods?**

During this reporting period, the Fund's proportion of sustainable investments of 57.32% was lower than in the previous reporting period when it was 61.81% .

With regards to the Fund's Positive ESG Tilt, which aimed to maintain a weighted average ESG score higher than that of the fund's investment universe, it is not possible to compare the current to the previous reference period as the tilt was removed at the end of November 2023.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 57.32% in sustainable investments in the current reference period, lower than the percentage it held in the previous reference period (61.81%).

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund.

Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 92.50% of NAV as at 31 March 2024. This comprised 57.32% of NAV in sustainable investments, and the remaining 35.19% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.04% were aligned to the EU Taxonomy, while 24.30% related to investments with other environmental characteristics, and 32.98% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	43.83%
Public administration and defence; compulsory social security	34.45%
Other	5.72%
Manufacturing	4.06%
Information and communication	3.78%
Electricity, gas, steam and air conditioning supply	3.34%
Activities of extraterritorial organisations and bodies	1.22%
Real estate activities	0.78%
Administrative and support service activities	0.71%
Accommodation and food service activities	0.50%
Transportation and storage	0.38%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.34%
Mining and quarrying	0.26%
Professional, scientific and technical activities	0.21%
Human health and social work activities	0.16%
Water supply; sewerage, waste management and remediation activities	0.15%
Construction	0.07%
Other service activities	0.04%
Arts, entertainment and recreation	0.00%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.04%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.37% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.37%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.09% and to enabling activities was 0.12%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.09%
Share of Enabling Activities	0.12%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly lower than it was in the previous reference period. In the previous reference period, the share was 0.1%, compared to 0.04% in this reference period.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24.30%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

 **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 32.98%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held securitised assets, credit default swaps, derivatives, cash, FX derivatives and money market funds and as “Other” investments, for any purpose permitted by the Fund’s investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund’s investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments’ alignment with the promoted characteristics.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund’s sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**

N/A.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. ## Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective**: 96.48%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**:

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that contribute towards the Paris Agreement climate change goal, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 2.85%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

### Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Notably, 60.99% of the fund's Net Asset Value (NAV) was held in companies with ratified science-based targets, while a further 14.42% of NAV was held in companies that have committed to science-based targets. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement.

Investee companies providing climate solutions helped to avoid 113399970 tonnes of CO2 equivalents, according to the latest available company disclosures. Investee companies in this area included transport and logistics company DSV and Danish renewable energy company Ørsted.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	18.82%	98.36%	79.17%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	46.78%	98.36%	79.17%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	89.70%	98.36%	98.49%
Total renewable energy produced (megawatt hours)	-	98.36%	0%
Tonnes of CO2 emissions avoided by positive impact investments	183750000 tCO2e	98.36%	7.47%
Weighted average carbon intensity (WACI) for the fund	44.5 tCO2e	96.85%	99.63%
Weighted average carbon intensity (WACI) for the Investment Universe	113.9 tCO2e	-	-

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	14.42%	100%	89.07%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	70.24%	100%	96.46%
Avoided carbon emissions-for companies that provide direct solutions to the climate challenge via their products and services	113399970 tCO2e	100%	6.48%
Total renewable energy produced (megawatt hours)	-	100%	0.00%
Weighted average carbon intensity (WACI) for the fund	47.18 tCO2e	96.46%	100%
Weighted average carbon intensity (WACI) for the Investment Universe	102.50 tCO2e	100%	98.24%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	60.99%	100%	89.07%

● **...and compared to previous periods?**

In the reference period, 60.99% of the fund's NAV was invested in companies with ratified science-based targets. This is an increase on the previous reporting period's figure which was 46.78%. Conversely, the percentage of NAV invested in companies that have committed to science-based targets fell to 14.42% in the reference period (from 18.82% in the previous reporting period).

During the reference period, investee companies providing climate solutions helped avoid 113399970 tonnes of CO2 equivalents; this is a decrease on the previous reporting period's figure which was 183750000 tonnes.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
NOVO NORDISK CLASS B	Manufacturing	5.61%	DK
SCHNEIDER ELECTRIC	Manufacturing	5.08%	FR
SCOUT24 N	Information and communication	4.28%	DE
AIB GROUP PLC	Financial and insurance activities	4.20%	IE
NESTLE SA	Manufacturing	3.72%	CH
DSV	Transportation and storage	3.65%	DK
RELX PLC	Information and communication	3.63%	GB
WH SMITH PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.60%	GB
KUEHNE UND NAGEL INTERNATIONAL AG	Transportation and storage	3.49%	CH
UNILEVER PLC	Manufacturing	3.43%	GB
ING GROEP NV	Financial and insurance activities	3.34%	NL
CTS EVENTIM AG	Arts, entertainment and recreation	3.23%	DE
AKZO NOBEL NV	Manufacturing	3.20%	NL
AMADEUS IT GROUP SA	Information and communication	3.17%	ES
SAP	Information and communication	3.15%	DE

### What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 80% to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective.

As of 31 March 2024, 96.48% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 80%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 2.97% of the sustainable investments were aligned to the EU Taxonomy. 96.48% related to investments with environmental objectives and 0% related to investments with a social objective.

3.52% of the Fund was composed of "not sustainable" investments (cash and money market funds).

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	42.83%
Information and communication	17.14%
Financial and insurance activities	14.11%
Transportation and storage	7.15%
Wholesale and retail trade; repair of motor vehicles and motorcycles	6.61%
Other	3.54%
Arts, entertainment and recreation	3.23%
Administrative and support service activities	2.15%
Human health and social work activities	1.85%
Electricity, gas, steam and air conditioning supply	1.40%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 2.97% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 2.85%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	2.85%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- **What was the share of investments made in transitional and enabling activities?**

Over the period, the share of the Fund's investments made in transitional activities was 0% while the share of the Fund's investments made in enabling activities was 1.77%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	1.77%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 2.97% in taxonomy-aligned investments. This is an increase on the previous reporting period's figure which was 0.76%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 93.51%. This compares to a minimum percentage commitment of 80% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

- **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash and money market funds as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund has invested in companies that contribute towards the Paris Agreement climate change goal. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their climate and sustainability standards, to support the fund's sustainable investment objective.

For example, we met Danish pharmaceutical company ALK-Abelló to ensure it was on track to have its near-term climate goals validated by the Science Based Targets initiative (SBTi). We suggested that the business disclose its strategy for achieving these targets and that variable remuneration be tied into milestones. The company confirmed that it was at the last stage of the finalisation process for its 2030 target; this will then need approval from the board before being submitted to the SBTi. The company is seeking to simplify its non-financial remuneration KPIs; in doing so, it will consider embedding climate targets into this KPI framework. The company was also receptive to the idea of publishing milestones in connection with its 2030 target.

We met UK retailer WH Smith to ask it to publish milestones in its roadmap for achieving emission reduction targets. We proposed that it tie some executive remuneration into reaching these milestones. The company understood our rationale for seeking the publication of milestones (it would allow us to ensure the company was on track to meeting its targets) and said it would think about the request. At the time of our meeting, WH Smith was going into its three-year remuneration policy review. The company stated that it was considering enhancing chief executives' packages so that they are more competitive.

We also reiterated our suggestion that WH Smith's workforce be paid in line with the real living wage. The company asserted that it was currently paying at a premium to the statutory minimum wage. It stated that bringing salaries in line with the real living wage could have an impact on profitability and potentially result in store closures. We were clear that we did not want our suggestion on this issue to have unintended consequences; we proposed that employees move on to a real living wage equivalent after completing training, which takes three to six months. We think this could act as a tool for recruitment and retention. The company said it would consider our proposals, but takes the view that wage increases are more of a gradual evolution. It has hired a new chief people officer, who is putting a new people strategy in place.

## How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

### ● How did the reference benchmark differ from a broad market index?

N/A

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

N/A

### ● How did this financial product perform compared with the reference benchmark?

N/A

### ● How did this financial product perform compared with the broad market index?

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Positive Impact Fund  
**Legal Entity Identifier:** 549300XGF5HHUXGRO059

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective**: 52.9%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 45.25%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies that have a positive societal impact through addressing the world's major social and/or environmental challenges, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 3.07%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

### Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### ● How did the sustainability indicators perform?

Please see the below table for an overview of the fund's performance relative to its sustainability indicators.

The 'Eligibility' figure is a measure of the percentage of fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

In the reporting period, 96.43% of the fund was held in investments aligned with the UN's Sustainable Development Goals (SDGs). This is in line with the fund's aim to hold companies which make a positive impact and contribute towards at least one of the SDGs. Furthermore, 68.71% of the fund's Net Asset Value (NAV) was held in companies participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting. The TCFD provides recommendations to help companies disclose clear, comparable and consistent information about the risks and opportunities presented by climate change, aiming to improve transparency for investors and other market participants.

Notably, 41.39% of the fund's NAV was held in companies that have ratified science-based targets, while a further 19.21% of NAV was held in companies that have committed to science-based targets. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement. These companies are therefore demonstrating their intention to contribute positively towards global climate action, aside from their primary positive social or environmental impact.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of NAV invested in positive impact assets in the Fund	98.00 %	100.00%	99.01%
Percentage (%) of investments by value that is SDG-aligned	97.97 %	98.01%	99.01%
Weighted average carbon intensity (WACI) for the fund	126.26 tCO <sub>2</sub> e /€m sales	97.03%	98.09%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	31.35 %	98.01%	56.97%
% of CO <sub>2</sub> emissions with Science Based Targets (SBTs)	63.3% tCO <sub>2</sub> e	97.03%	50.59%
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	13.20 %	98.01%	56.97%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	88.30 %	98.01%	99.01%
Percentage (%) of NAV in Climate Solutions companies	7.92 %	97.03%	100.00%
Percentage (%) of NAV investment providing environmental solutions	24.94 %	98.01%	99.01%
Percentage (%) of NAV in Circular Economy solutions companies	10.56 %	98.01%	99.01%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV invested in positive impact assets in the Fund	96.43 %	100.00%	100.00%
Percentage (%) of investments by value that is SDG-aligned	96.43 %	100.00%	100.00%
Weighted average carbon intensity (WACI) for the fund	108.45 tCO <sub>2</sub> e / €m sales	97.45%	98.60%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	41.39 %	100.00%	70.91%
% of CO <sub>2</sub> emissions with Science Based Targets (SBTs)	84.7% tCO <sub>2</sub> e	97.45%	72.77%
Percentage (%) of NAV committed to Science-Based Targets (SBTs)	19.21 %	100.00%	70.91%
Percentage (%) of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	68.71 %	100.00%	95.95%
Percentage (%) of NAV in Climate Solutions companies	4.70 %	97.45%	100.00%
Percentage (%) of NAV investment providing environmental solutions	27.42 %	100.00%	97.39%
Percentage (%) of NAV in Circular Economy solutions companies	12.60 %	100.00%	97.39%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **...and compared to previous periods?**

In the reference period, 96.43% of the fund was held in investments aligned with the UN's Sustainable Development Goals (SDGs). This reflects a slight decrease on the previous reporting period's figure which was 97.97%.

During the reference period, 68.71% of the fund's NAV was held in companies participating in Task Force on Climate-related Financial Disclosures (TCFD) reporting; this is a decrease on the previous reporting period's figure of 88.30%.

In the previous reporting period, 31.35% of NAV was held in companies that have ratified science-based targets and 13.20% in companies that have committed to science-based targets. In the reference period, these figures increased to 41.39% and 19.21% respectively.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
ON SEMICONDUCTOR CORP	Manufacturing	5.61%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus), the Fund committed to investing a minimum of 80% of the Fund in sustainable investments, with at least 30% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

As of 31 March 2024, 98.15% of the Net Asset Value of the Fund was invested in sustainable investments, which is above the minimum commitment of 80%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 2.15% of the sustainable investments were aligned to the EU Taxonomy. 52.90% of the sustainable investments related to investments with environmental objectives and 45.25% related to investments with a social objective.

1.85% of the Fund was composed of "not sustainable" investments (cash).

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	51.88%
Financial and insurance activities	17.99%
Information and communication	6.85%
Human health and social work activities	6.45%
Water supply; sewerage, waste management and remediation activities	4.17%
Electricity, gas, steam and air conditioning supply	2.58%
Other	2.55%
Construction	2.23%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.16%
Other service activities	1.78%
Professional, scientific and technical activities	1.36%

- **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with an environmental objectives.

The Fund held 2.15% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 3.07%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	3.07%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Over the period, the share of the Fund's investments made in transitional activities was 0% while the share of the Fund's investments made in enabling activities was 0.76%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.76%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 2.15% in taxonomy-aligned investments. This is a decrease on the previous reporting period's figure which was 3.38%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 50.76%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 45.25%. This compares to a minimum percentage commitment of 30% stated in the Fund's precontractual disclosure.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below:

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund has invested in companies that have a positive societal impact through addressing the world’s major social and/or environmental challenges. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund’s sustainable investment objective.

For example, we met Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We also sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We believe Novo Nordisk is doing all it can to prevent abuse of Wegovy.

We met semiconductor manufacturer onsemi to discuss its decarbonisation plans. We urged the company to have its targets validated by the Science Based Targets initiative (SBTi). We also encouraged it to align long-term executive remuneration with these targets. We proposed that the company disclose emissions avoided through use of its products in order to demonstrate its positive impact. The company has published its Scope 3 emissions across 12 categories and is developing a climate transition plan. It also committed to the SBTi in 2023.

We liaised with ALK-Abelló to ensure it was on track to have its near-term climate goals validated by the Science Based Targets initiative (SBTi). We suggested that the business disclose its strategy for achieving these targets and that variable remuneration be tied into milestones. The company confirmed that it was at the last stage of the finalisation process for its 2030 target; this will then need approval from the board before being submitted to the SBTi. The company is seeking to simplify its non-financial remuneration KPIs; in doing so, it will consider embedding climate targets into this KPI framework. The company was also receptive to the idea of publishing milestones in connection with its 2030 target.

### **How did this financial product perform compared to the reference sustainable benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund’s sustainable investment objective.

#### **● How did the reference benchmark differ from a broad market index?**

N/A

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

#### **● How did this financial product perform compared with the reference benchmark?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Short Dated Corporate Bond Fund  
**Legal Entity Identifier:** 549300PT8Y5VIWCSE97

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.42% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance). The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	14.80%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00 %	2.88%	100.00%

- **...and compared to previous periods?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach in this reference period as it did in the previous period. As it did in the previous reference period, in this reference period it held 0% of ABS below the Investment Manager's threshold for alignment.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 68.42% in sustainable investments in the current reference period, slightly higher than the percentage it held in the previous reference period (68%).

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment"

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	4.16%	DE
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	3.76%	FR
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.97%	DE
ROYAL BANK OF CANADA	Financial and insurance activities	1.73%	CA
TSB BANK PLC	Financial and insurance activities	1.66%	GB
CLYDESDALE BANK PLC	Financial and insurance activities	1.48%	GB
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	1.45%	FR
TORONTO-DOMINION BANK/THE	Financial and insurance activities	1.43%	CA

DEUTSCHE PFANDBRIEFBANK AG	Financial and insurance activities	1.00%	DE
BANK OF NOVA SCOTIA	Financial and insurance activities	1.00%	CA

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 95.83% of NAV as at 31 March 2024. This comprised 68.42% of NAV in sustainable investments, and the remaining 27.41% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.31% were aligned to the EU Taxonomy, while 27.06% related to investments with other environmental characteristics, and 41.05% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	53.20%
Other	16.66%
Public administration and defence; compulsory social security	12.22%
Manufacturing	6.07%
Information and communication	3.27%
Electricity, gas, steam and air conditioning supply	2.77%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.83%
Accommodation and food service activities	1.16%
Transportation and storage	0.96%
Activities of extraterritorial organisations and bodies	0.71%
Administrative and support service activities	0.43%
Real estate activities	0.36%
Professional, scientific and technical activities	0.34%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.31%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.58% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.58%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.05% and to enabling activities was 0.20%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.05%
Share of Enabling Activities	0.20%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly higher than it was in the previous reference period. In the previous reference period, the share was 0.2%, compared to 0.31% in this reference period.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27.06%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 41.05%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held securitised assets, credit default swaps, derivatives, cash, FX derivatives, money market funds, and as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective**: 74.65%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 22.91%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 1.73%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

There was one inadvertent breach related to the Fund holding a Russian security, Alrosa Finance, not rated by MSCI. Following the sanctions imposed on Russian entities in 2022, MSCI dropped coverage of Alrosa Finance. As a result, we could no longer source key climate data which would have enabled us to assess the company's climate change credentials. The holding therefore automatically failed to meet the Fund's sustainable objective. This security was inherited by the fund due to a fund merger in the past. As a result of the sanctions, the security cannot be traded and has therefore been marked down to zero.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

**Sustainability indicators** measure how the sustainable

### ● How did the sustainability indicators perform?

objectives of this financial product are attained.

As part of the climate focus of the fund, we aim to assess our holdings on both their current carbon emissions/ emission intensity and on their climate transparency, governance and ambition as represented by clear reduction targets.

36.93% of corporate issuers held by the fund had ratified science-based targets in the reference period. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement.

In the reference period, positive impact assets constituted 39.89% of the fund's NAV. Examples of positive impact investments include Novo Nordisk, Ørsted and SolarEdge. Novo Nordisk's therapeutics are helping to fight and mitigate the impact of diabetes and obesity on patients' lives. Meanwhile, Ørsted and SolarEdge are both contributing to the clean energy transition; the former has expertise in wind power while the latter supplies solar inverters for solar energy production.

The fund has also invested in green bonds, including a Colombian green bond and a Chilean green bond. The Colombian green bond has been issued to fund projects related to sustainable water management, clean and sustainable transport, and ecosystem services and biodiversity. The Chilean green bond has been issued to fund green projects in areas such as clean transportation and renewable energy.

The number of underserved people reached by the fund's holdings stood at 200.53 million people in the reference period. Katitas and Bank Rakyat Indonesia are examples of investments in this area. Bank Rakyat Indonesia (BRI) provides financial services to micro, small and medium-sized enterprises (MSMEs). Its focus on MSMEs enables it to reach typically underserved markets. Meanwhile, Katitas provides affordable housing through the purchase and renovation of vacant homes.

The fund's weighted average carbon emissions intensity (WACI) is declining and now stands at 44.44 t CO<sub>2</sub>e. This reflects the decisions made in the investment process, as well as the fact that climate data is increasingly accessible (facilitating decision-making). The fund also holds several investments in renewable energy infrastructure and solution providers.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	200.53 Million people	100.00%	26.13%
Percentage (%) of NAV invested in positive impact assets in the Fund	39.89%	100.00%	100.00%
Percentage (%) of sovereigns party to the Paris Agreement	99.43 %	26.25%	99.43%
Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year trend	100.00 %	26.25%	100.00%
Weighted average carbon intensity (WACI) for the fund	44.44 tCO2e / €m sales	69.76%	92.64%

Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year trend	96.53 %	21.33%	96.53%
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	110.80 Million people	83.47%	26.60%
Percentage (%) of NAV invested in positive impact assets in the Fund	52.70 %	100.00%	100.00%
Change in CO2 emissions intensity over the previous three year period CAGR Corporate	-8.24 CAGR 3Y	71.60%	64.14%
Change in CO2 emissions intensity over the previous three year period CAGR Sovereign	-3.53 CAGR 3Y	21.33%	73.90%
Percentage (%) of corporate issuers with ratified Science-Based Targets under the Science Based Target Initiative (SBTi) or an equivalent as assessed by the Investment Manager	45.90 %	-	-

- **...and compared to previous periods?**

In the current reference period, the percentage of corporate issuers with ratified science-based targets was 36.93%. This is a decrease on the previous reference period's percentage which was 44.8%.

In the reference period, the fund's positive impact investments avoided 470453623.05 t CO<sub>2</sub>e, an increase on the previous reporting period's figure, which was 385911148.00 t CO<sub>2</sub>e.

In the previous reporting period, 52.70% of the fund's NAV was invested in positive impact assets; this figure fell to 39.89% in the reference period.

The fund's weighted average carbon emission intensity was 44.44 t CO<sub>2</sub>e in the reference period, a decrease on the previous reporting period's WACI which was 59.14 t CO<sub>2</sub>e.

In the reference period, 200.53 million underserved people were reached by the fund's holdings, an increase on the previous reporting period's figure of 110.80 million people.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
INTER-AMERICAN DEVELOPMENT BANK	Activities of extraterritorial organisations and bodies	4.12%	SP
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	3.03%	DE
UNITED KINGDOM OF GREAT BRITAIN AN	Public administration and defence; compulsory social security	2.83%	GB
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.65%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.32%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.17%	DE
CHILE (REPUBLIC OF)	Public administration and defence; compulsory social security	1.77%	CL
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.67%	DE

INTERNATIONAL BANK FOR RECONSTRUCT	Activities of extraterritorial organisations and bodies	1.55%	SP
THE RENEWABLES INFRASTRUCTURE GROU	Financial and insurance activities	1.51%	GG
UK CONV GILT	Public administration and defence; compulsory social security	1.51%	GB
INTERNATIONAL BANK FOR RECONSTRUCT	Activities of extraterritorial organisations and bodies	1.49%	SP
GREENCOAT RENEWABLES PLC	Financial and insurance activities	1.47%	IE

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be invested in sustainable investments, in pursuit of the sustainable investment objective, with at least 20% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

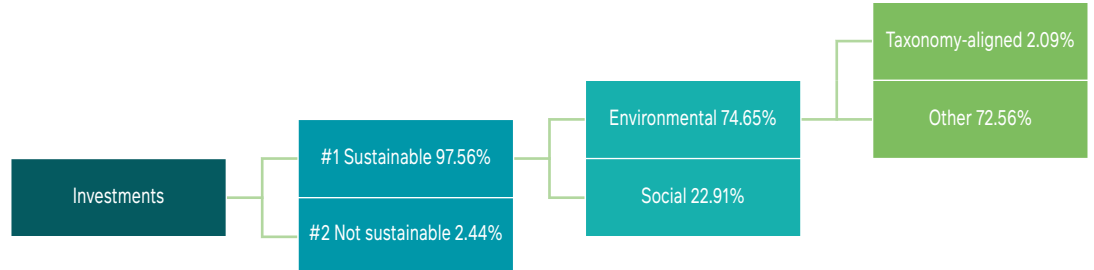

As of 31 March 2024, 97.56% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 70%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 2.09% of the sustainable investments were aligned to the EU Taxonomy. 74.65% related to investments with environmental objectives and 22.91% related to investments with a social objective.

2.44% of the Fund was comprised of "not sustainable" investments (cash, FX and FX forwards).

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**Asset allocation** describes the share of investments in specific assets.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Public administration and defence; compulsory social security	26.25%
Financial and insurance activities	23.28%
Manufacturing	19.41%
Activities of extraterritorial organisations and bodies	13.78%
Information and communication	6.08%
Real estate activities	2.56%
Electricity, gas, steam and air conditioning supply	2.47%
Human health and social work activities	2.04%
Other	1.55%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.62%
Water supply; sewerage, waste management and remediation activities	0.56%
Construction	0.49%
Education	0.42%
Professional, scientific and technical activities	0.40%
Administrative and support service activities	0.10%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 2.09% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the Fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 1.73%. The percentage of the Fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.73%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0.00% while the share of investments made in enabling activities was 0.81% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.81%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 2.09% in taxonomy-aligned investments. This is an increase on the previous reporting period's figure which was 0.90%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 72.56%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 22.91%. This compares to a minimum percentage commitment of 20% stated in the Fund's precontractual disclosure.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, FX and FX forwards as “Other” investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

As part of the fund merger between the Fund and M&G (Lux) Conservative Allocation on 21 October 2022, two sanctioned Russian-listed securities were transferred into the beneficial ownership of the Fund. As both funds have been prohibited from selling these assets, they have remained in a custody account of M&G (Lux) Conservative Allocation.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, we met US-based semiconductor manufacturer, LAM Research, to encourage it to improve its diversity and inclusion practices throughout the organisation. We proposed that it increase its board gender diversity to bring it in line with our minimum expectations. The company has integrated diversity and inclusion into its strategy and places emphasis on fostering inclusion in order to retain and attract diverse talent. In 2022, board-level gender diversity stood at 40%, but subsequent changes to board composition resulted in a decrease to 27%. The company asserted that it was considering long-term strategies and aims to reinstate the previous level of board gender diversity. At the time of the engagement, the company's ethnic minority representation stood at 45%, surpassing a number of other companies.

We also liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We believe Novo Nordisk is doing all it can to prevent abuse of Wegovy.

### How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

### How did the reference benchmark differ from a broad market index?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Sustainable Emerging Markets Corporate Bond Fund  
**Legal Entity Identifier:** 2549007K6TQBRKISX148

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.97% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes. In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe.

At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective. No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics. The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

**Sustainability indicators** measure how the environmental

### ● How did the sustainability indicators perform?

or social characteristics promoted by the financial product are attained.

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reference period. The Fund's exclusions were breached on one occasion. This was already reported in the previous periodic report.

Following changes to the Fund's ESG screening in October 2021, the Fund failed to sell a local currency government bond issued in Kazakhstan tenge, which had been bought prior to Freedom House screening being introduced. (Kazakhstan is an ESG-failing country, according to Freedom House rules, and by extension holding its currency is excluded.) The bond matured in May 2023, before the breach was detected, realising a gain for the Fund, and is no longer held by the Fund.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Weighted average carbon intensity (WACI) for the fund	83.35 tCO <sub>2</sub> e / €m sales	86.14%	79.96%
Weighted average carbon intensity (WACI) for the Investment Universe	644.78 tCO <sub>2</sub> e / €m sales	100.00%	86.18%
Portfolio weighted average ESG score for the fund	6.41 ESG Score	86.14%	72.86%
Portfolio weighted average ESG score for the Investment Universe	5.39 ESG Score	100.00%	82.89%
Percentage (%) of ABS below the Investment Manager's threshold for alignment	-	0.00%	0.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	6.37 ESG Score	86.40%	73.71%
Portfolio weighted average ESG score for the Investment Universe	5.25 ESG Score	93.01%	42.21%
Weighted average carbon intensity (WACI) for the fund	126.93 tCO <sub>2</sub> e / €m sales	86.40%	76.69%
Weighted average carbon intensity (WACI) for the Investment Universe	584.83 tCO <sub>2</sub> e / €m sales	93.10%	43.17%

- **...and compared to previous periods?**

The Fund's weighted average carbon intensity was lower in this reference period than in the previous period (see table above) and its weighted average ESG score was slightly higher (6.41 vs 6.37). Fund data coverage for both metrics was in line with the previous reference period, while investment universe data coverage was much higher for both the WACI and ESG score metrics.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 51.97% in sustainable investments in the current reference period, slightly below the percentage it held last in the previous reference period (61.08%).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
BOC AVIATION PTE LTD	Administrative and support service activities	1.85%	SG
TREASURY NOTE	Public administration and defence; compulsory social security	1.78%	US
TREASURY NOTE	Public administration and defence; compulsory social security	1.78%	US
TSMC GLOBAL LTD	Financial and insurance activities	1.59%	VG
PROSUS NV	Information and communication	1.41%	NL
BANCO NACIONAL DE COMERCIO EXTERIO	Financial and insurance activities	1.40%	MX
EASTERN AND SOUTHERN AFRICAN TRADE	Activities of extraterritorial organisations and bodies	1.37%	SP
TEVA PHARMACEUTICAL FINANCE NETHER	Financial and insurance activities	1.30%	NL
BANGKOK BANK PUBLIC CO LTD (HONG K	Financial and insurance activities	1.30%	HK
STANDARD CHARTERED PLC	Financial and insurance activities	1.30%	GB
LENOVO GROUP LTD	Manufacturing	1.28%	HK
OOREDOO INTERNATIONAL FINANCE LTD	Financial and insurance activities	1.17%	BM
COLOMBIA (REPUBLIC OF)	Public administration and defence; compulsory social security	1.15%	CO
MASHREQBANK PSC	Financial and insurance activities	1.15%	AE
BANK LEUMI LE ISRAEL BM	Financial and insurance activities	1.09%	IL

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 40% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.94% of NAV as at 31 March 2024. This comprised 51.97% of NAV in sustainable investments, and the remaining 47.97% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% was aligned to the EU Taxonomy, while 33.27% related to investments with other environmental characteristics, and 18.70% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	50.19%
Public administration and defence; compulsory social security	13.05%
Information and communication	9.86%
Manufacturing	7.92%
Electricity, gas, steam and air conditioning supply	3.28%
Mining and quarrying	3.01%
Administrative and support service activities	2.75%
Wholesale and retail trade; repair of motor vehicles and motorcycles	2.10%
Other	1.92%
Activities of extraterritorial organisations and bodies	1.82%
Real estate activities	1.79%
Transportation and storage	1.07%
Construction	0.61%
Accommodation and food service activities	0.42%
Water supply; sewerage, waste management and remediation activities	0.13%
Other service activities	0.09%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.04% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0.00%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.04%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and to enabling activities was 0.04%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.04%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reference period, the share of the Fund's investments that were aligned with the EU Taxonomy was 0%, the same as in this reference period.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33.27%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 18.70%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

- **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**  
N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
N/A
- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Sustainable Global High Yield Bond Fund  
**Legal Entity Identifier:** 222100FNZWQINHRH8058

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.31% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below): The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes. In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe.

At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective. No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics. The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

**Sustainability indicators** measure how the environmental or social characteristics promoted

### ● How did the sustainability indicators perform?

by the financial product are attained.

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reference period. The Fund's exclusions were passively breached on one occasion.

The Fund held a bond from Nordic real estate company Samhallsbyggnadsbolaget i Norden (SBB), which saw its MSCI ESG rating downgraded to B. The Fund must hold securities with an MSCI ESG rating of at least BB. The bond was subsequently sold to bring the Fund back into compliance.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Weighted average carbon intensity (WACI) for the fund	135.41 tCO <sub>2</sub> e / €m sales	93.54%	89.50%
Weighted average carbon intensity (WACI) for the Investment Universe	347.75 tCO <sub>2</sub> e / €m sales	100.00%	84.37%
Portfolio weighted average ESG score for the fund	6.13 ESG Score	93.54%	83.30%
Portfolio weighted average ESG score for the Investment Universe	5.39 ESG Score	100.00%	79.33%
Percentage (%) of ABS below the Investment Manager's threshold for alignment	-	0.00	0.00

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Weighted average carbon intensity (WACI) for the fund	120.10 tCO <sub>2</sub> e / €m sales	89.54%	87.45%
Weighted average carbon intensity (WACI) for the Investment Universe	355.28 tCO <sub>2</sub> e / €m sales	91.13%	42.06%
Portfolio weighted average ESG score for the fund	6.13 ESG Score	89.54%	87.80%
Portfolio weighted average ESG score for the Investment Universe	5.21 ESG Score	93.13%	41%

- **...and compared to previous periods?**

The Fund's weighted average carbon intensity was higher in this reference period than in the previous period (see table above) while its weighted average ESG score was the same as it was in the previous period. Fund data coverage for both metrics was in line with the previous period, while investment universe data coverage was much higher for both the WACI and ESG score metrics.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

The Fund held 66.31% in sustainable investments in the current reference period, slightly higher than the percentage it held in the previous period (63.66%).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

- **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
UNITED STATES DOLLAR	Other	2.13%	
EUROPEAN INVESTMENT BANK	Financial and insurance activities	1.54%	SP
EUROPEAN INVESTMENT BANK	Financial and insurance activities	1.52%	SP
FORD MOTOR COMPANY	Manufacturing	1.38%	US
TENET HEALTHCARE CORPORATION	Human health and social work activities	1.33%	US
TELECOM ITALIA SPA	Information and communication	1.32%	IT
CCO HOLDINGS LLC/CCO HOLDINGS CAPI	Information and communication	1.30%	US
IRON MOUNTAIN INC	Real estate activities	1.09%	US
COMMUNITY HEALTH SYSTEMS INC	Human health and social work activities	0.98%	US
VERISURE MIDHOLDING AB	Manufacturing	0.97%	SE
IQVIA INC	Professional, scientific and technical activities	0.91%	US
UNICREDIT SPA	Financial and insurance activities	0.90%	IT
AVANTOR FUNDING INC	Financial and insurance activities	0.90%	US
TRITON WATER HOLDINGS INC	Manufacturing	0.90%	US
FRONTIER COMMUNICATIONS HOLDINGS L	Financial and insurance activities	0.89%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 40% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 96.81% of NAV as at 31 March 2024. This comprised 66.31% of NAV in sustainable investments, and the remaining 30.51% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.47% was aligned to the EU Taxonomy, while 30.92% related to investments with other environmental characteristics, and 34.92% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	31.48%
Information and communication	19.66%
Manufacturing	16.10%
Other	6.72%
Administrative and support service activities	4.91%
Wholesale and retail trade; repair of motor vehicles and motorcycles	4.84%
Transportation and storage	4.34%
Human health and social work activities	3.69%
Real estate activities	2.31%
Professional, scientific and technical activities	1.75%
Construction	1.04%
Accommodation and food service activities	1.03%
Water supply; sewerage, waste management and remediation activities	1.00%
Mining and quarrying	0.54%
Other service activities	0.31%
Electricity, gas, steam and air conditioning supply	0.28%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.47%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.26% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0.02%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.26%
Climate Change Adaption	0.02%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities 0.05%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.05%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly higher than in the previous reference period. In the previous reference period, the share was 0.09%, compared to 0.47% in this reference period.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30.92%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 34.92%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash and FX derivatives as “Other” investments, for any purpose permitted by the Fund’s investment policy. No minimum environmental or social safeguards were applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund’s investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments’ alignment with the promoted characteristics.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

### **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund’s sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Sustainable Macro Flexible Credit Fund  
**Legal Entity Identifier:** 254900MBYTIXGWFWM22

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**
   **No**

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.12% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reporting period.

The sustainability indicators to test its compliance with its Exclusionary Approach reveal that there were the following instances where the Exclusionary Approach was not followed: the Fund held two securities during the period which inadvertently breached the exclusionary approach following changes to internal compliance rules. Holding Electricite de France (EDF) breached our revenue thresholds for a company deriving revenue from a nuclear energy-based power generation and installed capacity associated with nuclear power generation while holding E.ON breached our exclusions on power generation from nuclear power. The holdings were subsequently sold to bring the Fund back into compliance.

In addition, the Fund passively breached by holding bonds from Akelius Residential Property and Nordic real estate company Samhallsbyggnadsbolaget i Norden (SBB), which saw their MSCI ESG ratings downgraded. The Fund must hold securities with an MSCI ESG rating of at least BB. The bonds were subsequently sold to bring the Fund back into compliance.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator.

The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Weighted average carbon intensity (WACI) for the fund	67.53 tCO <sub>2</sub> e / €m sales	64.84%	93.47%
Weighted average carbon intensity (WACI) for the Investment Universe	260.97 tCO <sub>2</sub> e / €m sales	72.78%	89.71%
Portfolio weighted average ESG score for the fund	7.19 ESG Score	64.84%	87.71%
Portfolio weighted average ESG score for the Investment Universe	6.45 ESG Score	72.78%	87.04%
Percentage (%) of ABS below the Investment Manager's threshold for alignment	0.00%	2.10%	100.00%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Portfolio weighted average ESG score for the fund	7.15 ESG Score	56.98%	68.96%
Portfolio weighted average ESG score for the Investment Universe	6.13 ESG Score	52.68%	28.47%
Weighted average carbon intensity (WACI) for the fund	82.96 tCO <sub>2</sub> e / €m sales	56.98%	70.72%
Weighted average carbon intensity (WACI) for the Investment Universe	271.92 tCO <sub>2</sub> e / €m sales	52.67%	29.20%

#### ● ...and compared to previous periods?

The Fund's weighted average carbon intensity was lower in this reference period compared to the previous period (see table above) while its weighted average ESG score was slightly higher than in the previous reference period. Fund data coverage for both metrics was higher than it was in the previous reference period, while investment universe data coverage was much higher for both the WACI and ESG score metrics.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

The Fund held 59.12% in sustainable investments in the current reference period, lower than the percentage it held in the previous reference period (67.57%).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
TREASURY (CPI) NOTE	Public administration and defence; compulsory social security	1.24%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 73.32% of NAV as at 31 March 2024. This comprised 59.12% of NAV in sustainable investments, and the remaining 14.21% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0.7% was aligned to the EU Taxonomy, while 31.39% related to investments with other environmental characteristics, and 27.03% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

## What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	48.50%
Public administration and defence; compulsory social security	13.18%
Other	13.04%
Manufacturing	7.54%
Information and communication	4.24%
Real estate activities	3.17%
Electricity, gas, steam and air conditioning supply	1.88%
Transportation and storage	1.61%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.49%
Activities of extraterritorial organisations and bodies	1.28%
Professional, scientific and technical activities	1.24%
Administrative and support service activities	1.11%
Human health and social work activities	0.52%
Accommodation and food service activities	0.42%
Construction	0.38%
Other service activities	0.21%
Water supply; sewerage, waste management and remediation activities	0.15%
Arts, entertainment and recreation	0.03%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0.7%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.84% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0.01%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.84%
Climate Change Adaptation	0.01%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.04% and to enabling activities was 0.39%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.04%
Share of Enabling Activities	0.39%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly higher than in the previous reference period. In the previous reference period, the share was 0%, compared to 0.7% in this reference period.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31.39%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 27.03%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held cash, FX derivatives and interest rate derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

### How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

- **How did this financial product perform compared with the broad market index?**

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Sustainable Multi Asset Growth Fund  
**Legal Entity Identifier:** 254900DTG2UFJ7LAT088

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

● ●  Yes ● ●  No

It made **sustainable investments with an environmental objective: 70%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 26.98%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent was the sustainable investment objective of this financial product met?

The fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation, in line with its sustainable investment objective. The strength of the fund's performance against this objective is evaluated in the sustainability indicators section below.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation was 2.59%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation was 0%.

There is no data available for the following environmental objectives: pollution prevention and control, protection and restoration of biodiversity and ecosystems, transition to circular economy, and sustainable use and protection of water and marine resources.

The Investment Manager operates data driven quantitative good governance tests used to consider investments into companies. The Investment Manager excludes investments in securities that are considered as failing the Investment Manager's good governance tests. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

All investments purchased for the Fund were in compliance with the sustainable investment objective save for as permitted under the "Other" Investments allocation.

The alignment percentage indicated in the graphic below shows the allocation between sustainable investments made in pursuit of the sustainable investment objective and "Other" investments.

### Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

#### ● How did the sustainability indicators perform?

As part of the climate focus of the fund, we aim to assess our holdings on both their current carbon emissions/ emission intensity and on their climate transparency, governance and ambition as represented by clear reduction targets.

It is encouraging to see that a significant proportion of corporate issuers (47.58%) held by the fund now have

ratified science-based targets. Science-based targets provide companies with a clear roadmap for reducing their emissions; targets must be consistent with what the most recent climate science considers necessary to meet the aims of the Paris Agreement.

In the reference period, positive impact assets constituted nearly half of the fund's NAV (44.49%). Examples of positive impact investments include Novo Nordisk, Ørsted and SolarEdge. Novo Nordisk's therapeutics are helping to fight and mitigate the impact of diabetes and obesity on patients' lives. Meanwhile, Ørsted and SolarEdge are both contributing to the clean energy transition; the former has expertise in wind power while the latter supplies solar inverters for solar energy production.

The fund has also invested in green bonds, including a Colombian green bond and a Chilean green bond. The Colombian green bond has been issued to fund projects related to sustainable water management, clean and sustainable transport, and ecosystem services and biodiversity. The Chilean green bond has been issued to fund green projects in areas such as clean transportation and renewable energy.

The number of underserved people reached by the fund's holdings stood at 333.34 million people for the reference period. Helios Towers and Bank Rakyat Indonesia are examples of investments in this area. Bank Rakyat Indonesia (BRI) provides financial services to micro, small and medium-sized enterprises (MSMEs). Its focus on MSMEs enables it to reach typically underserved markets. Meanwhile, Helios Towers helps expand access to mobile and communication services, with a notable footprint in Sub-Saharan Africa.

The fund's weighted average carbon emissions intensity (WACI) is declining and now stands at 62.36 t CO<sub>2</sub>e. This reflects the decisions made in the investment process, as well as the fact that climate data is increasingly accessible (facilitating decision-making). The fund also holds several investments in renewable energy infrastructure and solution providers.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Change in CO2 emissions intensity over the previous three year period CAGR Corporate	-8.00 CAGR 3Y	85.52%	86.16%
Change in CO2 emissions intensity over the previous three year period CAGR Sovereign	-3.83 CAGR 3Y	9.28%	62.17%
Percentage (%) of sovereigns party to the Paris Agreement	62.17%	9.28%	62.17%
Weighted average carbon intensity (WACI) for the fund	78.79 tCO2e /€m Sales	85.52%	91.35%
Percentage (%) of NAV with ratified Science-Based Targets (SBTs)	33.71%	92.20%	61.30%
Percentage (%) of corporate issuers participating in the Carbon Disclosure Project (CDP)	78.92%	85.52%	92.69%
Tonnes of CO2 emissions avoided by positive impact investments	399575143 tCO2e	92.20%	20.80%
Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year trend	100%	9.28%	100%
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	248 Million People	92.20%	38.12%
Percentage (%) of NAV invested in positive impact assets in the Fund	46%	100%	100%
Percentage (%) of corporate issuers with ratified Science-Based Targets under the Science Based Target Initiative (SBTi) or an equivalent as assessed by the Investment Manager (corporate).	46.0%	-	-

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Percentage (%) of NAV invested in positive impact assets in the Fund	44.49%	100%	100%
Percentage (%) of sovereigns party to the Paris Agreement	99.29%	10.75%	99.29%
Percentage (%) of sovereign ranked above the Social Progress Index (SPI) Global Average, which assesses how well a society provides its people with material needs, and does not have a negative 5 year	100%	10.75%	100%
Weighted average carbon intensity (WACI)	62.36 tCO2e / €m sales	84.59%	92.78%
Change in CO2 emissions intensity over the previous three year period (compounded annualised growth rate over last three years) (corporate and sovereigns)	-7.14 CAGR 3Y	84.59%	83.97%
Change in CO2 emissions intensity over the previous three year period (compounded annualised growth rate over last three years) (corporate and sovereigns)	-3.06 CAGR 3Y	10.75%	99.29%
Percentage (%) of corporate issuers participating in the Carbon Disclosure Project (CDP)	80.92%	84.59%	92.78%
Tonnes of CO2 emissions avoided by positive impact investments	475518348.05 tCO2e	100%	20.00%
Percentage (%) of corporate issuers with ratified Science-Based Targets under the Science Based Target Initiative (SBTi) or an equivalent as assessed by the Investment Manager (corporate).	53.8%	84.04%	82.90%
Number of underserved people reached including patients treated, customers served etc. by positive impact investments	333.34 Million People	100%	35.20%

- **...and compared to previous periods?**

In the current reference period, the percentage of corporate issuers with ratified science-based targets was 47.58%. This is a slight decrease on the previous reference period's percentage which was 49.6%.

In the reference period, the fund's positive impact investments avoided 475518348.05 t CO<sub>2</sub>e, an increase on the previous reporting period's figure, which was 399575143 t CO<sub>2</sub>e.

In the previous reporting period, 46% of the fund's NAV was invested in positive impact assets; this figure fell to 44.49% in the reference period.

The fund's weighted average carbon emission intensity (WACI) was 62.36 t CO<sub>2</sub>e in the reference period, a decrease on the previous reporting period's WACI which was 78.79 t CO<sub>2</sub>e.

In the reference period, 333.34 million underserved people were reached by the fund's holdings, an increase on the previous reporting period's figure of 248 million people.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represented significant exposure to businesses the Investment Manager considered harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators forming part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments were also required to pass tests to confirm they did no significant harm, as described above. These tests embedded a consideration of the OECD Guidelines and UN Guiding Principles.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.28%	DE
OCTOPUS RENEWABLES INFRASTRUCTURE	Financial and insurance activities	1.88%	GB
THE RENEWABLES INFRASTRUCTURE GROUP	Financial and insurance activities	1.83%	GG

BANK OF GEORGIA GROUP PLC	Financial and insurance activities	1.03%	GE
ASE TECHNOLOGY HOLDING LTD	Manufacturing	1.03%	TW
COCHLEAR LTD	Manufacturing	1.03%	AU
SAP	Information and communication	1.02%	DE

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be invested in sustainable investments, in pursuit of the sustainable investment objective, with at least 20% in sustainable investments with a social objective and at least 30% in sustainable investments with an environmental objective.

As of 31 March 2024, 96.98% of the Net Asset Value of the Fund was in sustainable investments, which is above the minimum commitment of 70%. Whilst the fund did not commit to invest in investments aligned to the EU Taxonomy, 3.03% of the sustainable investments were aligned to the EU Taxonomy. 70.00% related to investments with environmental objectives and 26.98% related to investments with a social objective.

3.02% of the Fund was comprised of "not sustainable" investments (cash, FX and FX forwards).

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	31.05%
Financial and insurance activities	27.80%
Public administration and defence; compulsory social security	10.75%
Information and communication	8.59%
Activities of extraterritorial organisations and bodies	4.11%
Electricity, gas, steam and air conditioning supply	3.87%
Real estate activities	3.15%
Human health and social work activities	2.51%
Construction	2.25%
Other	1.94%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.62%
Water supply; sewerage, waste management and remediation activities	1.00%
Education	0.63%
Professional, scientific and technical activities	0.56%
Administrative and support service activities	0.16%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund held 3.03% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of the fund's investments that contributed to the environmental objective of climate mitigation (EU taxonomy) was 2.59%. The percentage of the fund's investments that contributed to the environmental objective of climate adaptation (EU taxonomy) was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	2.5%
Climate Change Adaptation	0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities was 0.02% while the share of the Fund's investments made in enabling activities was 1.25% over the period. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of transitional activities	0.02%
Share of enabling activities	1.25%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the reference period, the Fund held 3.03% in taxonomy-aligned investments. This is an increase on the previous reporting period's figure which was 1.35%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 66.97%. This compares to a minimum percentage commitment of 30% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26.98%. This compares to a minimum percentage commitment of 20% stated in the Fund's precontractual disclosure.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, FX and FX forwards as “Other” investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund contributed to a sustainable economy by investing in assets supporting environmental and/or social goals, in particular climate change mitigation. Its compliance with the same is reported in the sustainability indicators above.

ESG engagements are also a key focus for the fund in order to help investment companies improve their impact and sustainability standards, to support the fund's sustainable investment objective.

For example, we met US-based semiconductor manufacturer, LAM Research, to encourage it to improve its diversity and inclusion practices throughout the organisation. We proposed that it increase its board gender diversity to bring it in line with our minimum expectations. The company has integrated diversity and inclusion into its strategy and places emphasis on fostering inclusion in order to retain and attract diverse talent. In 2022, board-level gender diversity stood at 40%, but subsequent changes to board composition resulted in a decrease to 27%. The company asserted that it was considering long-term strategies and aims to reinstate the previous level of board gender diversity. At the time of the engagement, the company's ethnic minority representation stood at 45%, surpassing a number of other companies.

We also liaised with Novo Nordisk to establish whether it had appropriate processes and checks in place to prevent misuse of its weight-loss medication, Wegovy. We sought further information on its temporary suspension from the Association of the British Pharmaceutical Industry (ABPI). We believe Novo Nordisk is doing all it can to prevent abuse of Wegovy.

### How did this financial product perform compared to the reference sustainable benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A

- **How did this financial product perform compared with the reference benchmark?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Sustainable Optimal Income Bond Fund  
**Legal Entity Identifier:** 254900JKCO00UZ0A2X81

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

**No**

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.61% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that were considered to do significant harm to environmental and/or social objectives.

The Fund had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and

"Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and strategy to achieve a Positive ESG Outcome were met nearly all of the time during the reporting period.

The sustainability indicators to test its compliance with its Exclusionary Approach reveal that there were the following instances where the Exclusionary Approach was not followed: the Fund held two securities during the period which inadvertently breached the exclusionary approach following changes to internal compliance rules.

Holding Electricite de France (EDF) breached our revenue thresholds for a company deriving revenue from a nuclear energy-based power generation and installed capacity associated with nuclear power generation while holding E.ON breached our exclusions on power generation from nuclear power. The holdings were subsequently sold to bring the Fund back into compliance.

Please see the below table for an overview of the Fund's performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Sub-Fund's assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
Weighted average carbon intensity (WACI) for the fund	50.29 tCO <sub>2</sub> e / €m sales	53.09%	89.88%
Weighted average carbon intensity (WACI) for the Investment Universe	96.03 tCO <sub>2</sub> e / €m sales	58.98%	94.67%
Portfolio weighted average ESG score for the fund	7.38 ESG Score	53.09%	85.43%
Portfolio weighted average ESG score for the Investment Universe	6.53 ESG Score	58.98%	94.18%

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2023</b>			
Weighted average carbon intensity (WACI) for the fund	55.13 tCO <sub>2</sub> e / €m sales	64.34%	91.60%
Weighted average carbon intensity (WACI) for the Investment Universe	90.81 tCO <sub>2</sub> e / €m sales	62.99%	47.82%
Portfolio weighted average ESG score for the fund	7.22 ESG Score	64.34%	90.54%
Portfolio weighted average ESG score for the Investment Universe	6.49 ESG Score	62.99%	47.84%

#### ● ...and compared to previous periods?

The Fund's weighted average carbon intensity was lower in this reference period than in the previous reference period (see table above) while its weighted average ESG score was higher in this reference period versus in the previous period. Fund data coverage for both metrics was in line with the previous reference period, while investment universe data coverage was much higher for both the WACI and ESG score metrics.

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

The Fund held 62.61% in sustainable investments in the current reference period, lower than the percentage it held in the previous reference period (67.29%).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/04/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
TREASURY NOTE	Public administration and defence; compulsory social security	4.06%	US
TREASURY NOTE	Public administration and defence; compulsory social security	3.47%	US
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	2.81%	FR
TREASURY NOTE	Public administration and defence; compulsory social security	2.50%	US
UK CONV GILT	Public administration and defence; compulsory social security	2.28%	GB

UK CONV GILT	Public administration and defence; compulsory social security	0.83%	GB

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

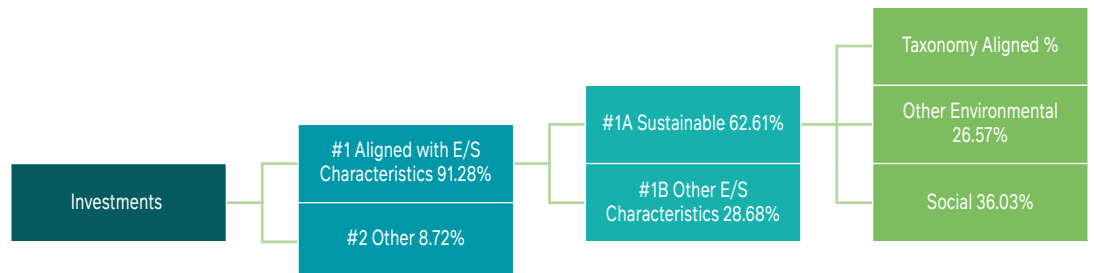

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 91.28% of NAV as at 31 March 2024. This comprised 62.61% of NAV in sustainable investments, and the remaining 28.68% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% was aligned to the EU Taxonomy, while 26.57% related to investments with other environmental characteristics, and 36.03% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	41.63%
Public administration and defence; compulsory social security	39.25%
Other	6.01%
Information and communication	3.94%
Manufacturing	2.90%
Activities of extraterritorial organisations and bodies	2.11%
Electricity, gas, steam and air conditioning supply	1.13%
Administrative and support service activities	0.64%
Real estate activities	0.59%
Accommodation and food service activities	0.53%
Human health and social work activities	0.34%
Construction	0.28%
Transportation and storage	0.22%
Water supply; sewerage, waste management and remediation activities	0.20%
Wholesale and retail trade; repair of motor vehicles and motorcycles	0.20%
Professional, scientific and technical activities	0.04%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0.28% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.28%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.05% and to enabling activities was 0.07%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.05%
Share of Enabling Activities	0.07%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments aligned to EU Taxonomy was slightly lower than it was in the previous reference period. In the previous reference period, the share was 0.32%, compared to 0% in this reference period.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26.57%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 36.03%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash, interest rate and FX and derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach and met its strategy to achieve a Positive ESG Outcome. Its compliance with the same is reported in the sustainability indicators above.

- **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**  
N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
N/A
- **How did this financial product perform compared with the reference benchmark?**  
N/A
- **How did this financial product perform compared with the broad market index?**  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Investment Funds 1 – M&G (Lux) TAP Global Listed Infrastructure Fund  
**Legal Entity Identifier:** 2549003UF6Z6PBHCNI58

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and it made investments that are SDG-aligned (as defined below): The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes ("Exclusionary Approach").

The Fund considered the UN Sustainable Development Goals (SDGs) as part of its investment process and the sustainability themes considered by the Investment Manager are based on the SDGs as a relevant framework to measure contribution to sustainability factors ("SDG-alignment").

8.27% of the Fund's investments by value were SDG-aligned. 99.05% of the Fund's investments by value were in investments considered by the Investment Manager to be related to sustainability themes.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics. The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance). The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and SDG-alignment were met at all times during the reporting period.

Please see the below table for an overview of the Funds' performance relative to its sustainability indicator. The 'Eligibility' figure is a measure of the percentage of Fund assets which are eligible to be measured by the sustainability indicator. The 'Coverage' figure indicates the percentage of eligible assets for which data is available.

Sustainability indicator name	Value	Eligibility	Coverage
<b>As at - 31 March 2024</b>			
SDG-alignment: Percentage (%) of investments by value that is SDG-aligned	8.27%	100%	9.75%

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e., investments with an environmental and/or social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 59.70% in sustainable investments in the current reference period.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they passed a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions. The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above.

For other investments the Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available, which allowed the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 16/11/2023 to 31/03/2024

Largest investments	Sector	% Assets	Country
CROWN CASTLE INC	Real estate activities	3.98%	US
ALEXANDRIA REAL ESTATE EQUITIES RE	Real estate activities	3.93%	US
SEGRO REIT PLC	Real estate activities	3.69%	GB
AES CORP	Electricity, gas, steam and air conditioning supply	3.52%	US
AMERICAN TOWER REIT CORP	Real estate activities	3.49%	US
TC ENERGY CORP	Transportation and storage	3.46%	CA
GIBSON ENERGY INC	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.20%	CA

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 51% of the Fund to be in Sustainable Investments.

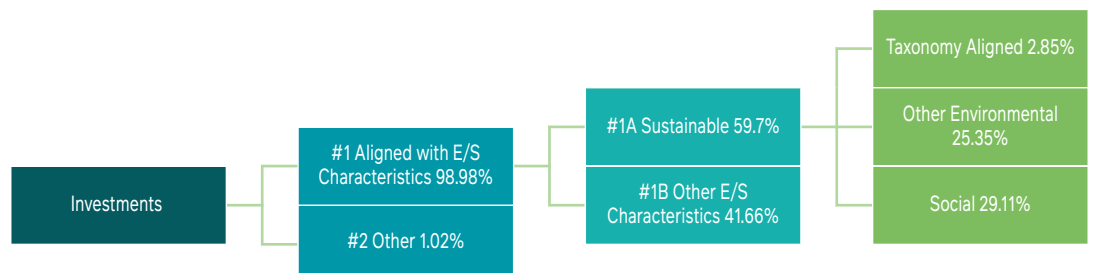

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 99.05% of NAV as at 31 March 2024. This comprised 59.70% of NAV in sustainable investments, and the remaining 39.35% of NAV in investments with other environmental and or social characteristics.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 4.82% were aligned to the EU Taxonomy. 25.63% related to investments with other environmental characteristics, and 29.26% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

## What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Electricity, gas, steam and air conditioning supply	29.39%
Transportation and storage	19.65%
Real estate activities	16.57%
Financial and insurance activities	12.88%
Wholesale and retail trade; repair of motor vehicles and motorcycles	5.68%
Information and communication	5.46%
Construction	4.46%
Water supply; sewerage, waste management and remediation activities	2.77%
Mining and quarrying	1.99%
Other	1.14%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 4.82%.

This percentage is determined by taking the quarter end figure for each quarter in the reference period and averaging it. The information was obtained from public disclosures.

The percentage of contribution from climate change mitigation was 8.16% while climate change adaptation contributed 0%.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	8.16%
Climate Change Adaptation	0.0%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas                       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.02% and in enabling activities 4.35%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.02%
Share of Enabling Activities	4.35%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The product is not yet able to provide comparison to a previous reporting period as this is the product's first SFDR Level 2 Periodic Report disclosure. The product will provide historic comparison in the next Periodic Report.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25.63%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 29.26%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash and money market funds, and securitised assets as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach and it made investments that are SDG-aligned. Its compliance with the same is reported in the sustainability indicators above.

- **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective. Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**  
N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
N/A

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.29% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach met at all times during the reporting period. As the fund launched on 19 March 2024, the reporting period runs from 19 March 2024 to 31 March 2024.

#### ● ...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 53.29% in sustainable investments as at 31 March 2024.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions. The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: to 31/03/2024

Largest investments	Sector	% Assets	Country
TREASURY NOTE	Public administration and defence; compulsory social security	3.16%	US
TREASURY NOTE	Public administration and defence; compulsory social security	3.15%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

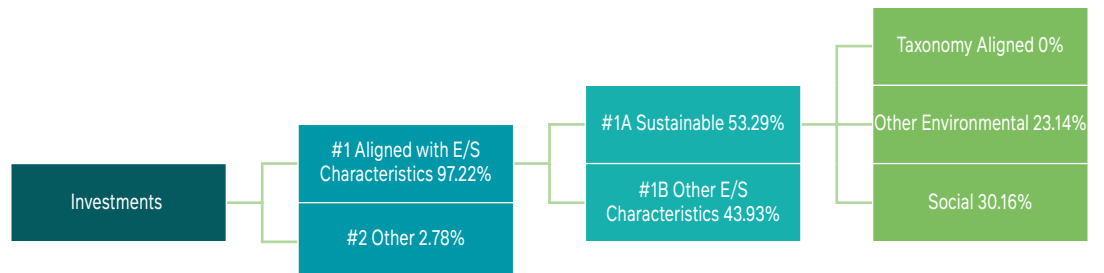

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 97.22% of NAV as at 31 March 2024. This comprised 53.29% of NAV in sustainable investments, and the remaining 43.93% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 23.14% related to investments with other environmental characteristics, and 30.16% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

- **What was the asset allocation?**

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Financial and insurance activities	38.38%
Public administration and defence; compulsory social security	15.88%
Manufacturing	11.82%
Electricity, gas, steam and air conditioning supply	7.32%
Information and communication	6.65%
Mining and quarrying	4.34%
Transportation and storage	4.26%
Other	2.83%
Real estate activities	2.23%
Human health and social work activities	1.83%
Wholesale and retail trade; repair of motor vehicles and motorcycles	1.43%
Accommodation and food service activities	0.80%
Administrative and support service activities	0.69%
Water supply; sewerage, waste management and remediation activities	0.69%
Professional, scientific and technical activities	0.61%
Construction	0.23%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. As the fund launched on 19 March 2024, the reference period covers the timeframe of 19 March 2024 to 31 March 2024. This percentage is determined by taking the quarter end figure (i.e. 31 March 2024). The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaption	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas                       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and to enabling activities was 0%. This compares to a minimum percentage commitment of 0% to both stated in the Sub-Fund's precontractual disclosure. (Reference period runs from 19 March 2024 to 31 March 2024).

Activity	Percentage Investments
Share of Transitional Activities	0.00%
Share of Enabling Activities	0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The product is not yet able to provide comparison to a previous reporting period as this is the product's first SFDR Level 2 Periodic Report disclosure. The product will provide historic comparison in the next Periodic Report.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 23.14%. This compares to a minimum percentage commitment of 5% in environmentally sustainable investments (i.e., both aligned to the EU Taxonomy and not) stated in the Fund's precontractual disclosure.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 30.16%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held cash, near cash, derivatives and money market funds as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied. Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied an exclusion policy to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators above.

- **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's sustainable investment objective. Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did the reference benchmark differ from a broad market index?**

N/A.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**

N/A.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** M&G (Lux) Investment Funds 1 - M&G (Lux) US High Yield Bond Fund  
**Legal Entity Identifier:** 254900SHYE2Q055Q4Z34

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes
  No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.46% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark was designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The Investment Manager operates a data driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

The alignment percentage indicated in the graphic below shows the allocation between such investments and "Other" Investments.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met nearly all of the time during the reporting period. As the fund launched on 21 March 2024, the reporting period runs from 21 March 2024 to 31 March 2024.

There was one advertent breach during the period. The fund held HilCorp Energy which had 18% of revenues deriving from Arctic range exploration and production. The maximum percentage permitted is 10%; the fund manager subsequently sold the position but this sale took place in May, after the end of the review period.

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment. The Investment Manager used a series of proprietary tests based on available data to determine whether and how an investment made positive contribution(s) towards environmental and social objectives.

The Fund held 34.46% in sustainable investments as at 31 March 2024.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as they were required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures were compatible with sustainable investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process included consideration of Principal Adverse Impact indicators for all investments where data was available (i.e. not just for sustainable investments), which allowed the Investment Manager to make informed investment decisions. The Fund's consideration of Principal Adverse Impact indicators was used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund were then subject to ongoing monitoring and a quarterly review process. Further information on the Principal Adverse Impact indicators which were taken into account by the Investment Manager can be found in the Annex to the Investment Manager's website disclosures for the Fund.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund passed the Investment Manager's good governance tests, and in addition, sustainable investments also passed tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: to 31/03/2024

Largest investments	Sector	% Assets	Country
PG&E CORPORATION	Electricity, gas, steam and air conditioning supply	1.29%	US

## What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to a minimum of 70% of the Fund to be aligned to the promoted E/S characteristics and for a minimum of 20% of the Fund to be in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The % of investments that were aligned to the environmental or social characteristic promoted was 92.72% of NAV as at 31 March 2024. This comprised 34.46% of NAV in sustainable investments, and the remaining 58.26% of NAV in investments with other environmental and or social characteristics.

The Fund did not commit to invest in investments aligned to the EU Taxonomy, 0% were aligned to the EU Taxonomy, while 15.83% related to investments with other environmental characteristics, and 18.63% related to socially sustainable investments.

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic sector	% Assets
Manufacturing	15.65%
Financial and insurance activities	14.85%
Information and communication	11.41%
Other	9.53%
Mining and quarrying	9.50%
Transportation and storage	7.89%
Administrative and support service activities	7.74%
Wholesale and retail trade; repair of motor vehicles and motorcycles	7.61%
Human health and social work activities	4.98%
Electricity, gas, steam and air conditioning supply	4.20%
Real estate activities	2.57%
Construction	1.98%
Water supply; sewerage, waste management and remediation activities	1.40%
Accommodation and food service activities	0.69%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The share of the Fund's investments that were aligned with the environmental objectives under the Taxonomy Regulation during the reference period was 0%. As the fund launched on 21 March 2024, the reference period covers the timeframe of 21 March 2024 to 31 March 2024.

This percentage is determined by taking the quarter end figure (i.e. 31 March 2024). The information was obtained from public disclosures. No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

The percentage of contribution to the taxonomy-aligned climate change mitigation in the current reference period was 0% while the percentage of contribution to the taxonomy-aligned climate change adaptation was 0%.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaptation	0.00%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:  In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy.
