Copies of the report and accounts to 31 March 2023 may be obtained from the registered office of Columbia Threadneedle (Lux) III (the "Fund") at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg and from foreign representatives and will be posted to shareholders on request. Notices to Shareholders are published in the *Recueil Electronique des Sociétés et Associations* (the "RESA") and in Luxembourg newspapers, to the extent required by Luxembourg law, and in such other newspapers as the Directors may decide. The articles of incorporation of the Fund (the "Articles") have been lodged at the *Registre de Commerce et des Sociétés* of Luxembourg where they are available for inspection and copies can be obtained upon request. The net asset value of each of the Fund's shares is published in accordance with the relevant appendices of the Fund's latest prospectus (the "Prospectus"). The issue and redemption prices are available from Columbia Threadneedle Management Limited, Exchange House, Primrose Street, London EC2A 2NY, United Kingdom, at the registered office of the Fund and will be published as further described in the Prospectus.

No subscription can be received on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus, the latest key investor information documents and the latest annual and the most recent semi-annual report, if published thereafter.

The information contained in this report is historical and should not be taken as a guide to future performance. Statements contained in this report concerning future performance are the opinions of management and there can be no guarantee that such opinions will prove to be correct.

Columbia Threadneedle (Lux) III The Portfolios and their Objectives

CT (Lux) Diversified Growth

The investment objective of the Portfolio is to achieve capital appreciation over the medium to long-term through a broadly diversified mix of holdings into traditional and alternative assets including investments in: equities, bonds, indirect property and indirect commodities. The Portfolio intends to target a return of ESTR (Euro Short-Term Rate) (or the equivalent local currency SONIA (Sterling Overnight Index Average) rate per hedged share class) +4% over a rolling 3 year period. Portfolio efficiency is maximised, and costs minimised, by using the most efficient products in the market place, that provide liquid, low-cost exposure to the relevant asset class. A combination of cash, Exchange Traded Funds (ETF), financial derivative instruments, listed certificates issued by investment banks, as well as swap contracts and currency are used to structure the Portfolio.

CT (Lux) Euro Bond

The investment objective of the Portfolio is to ensure an adequate return of the invested capital while reducing risk due to an adequate investment diversification. The assets of the Portfolio are mainly invested, directly or through the use of financial derivative instruments, in debt securities having a fixed and variable income listed on a stock exchange or dealt in on another regulated market of an OECD-member state, whilst attempting to reduce the exchange risks. Without changing the specific investment policy of the Portfolio and as market conditions and investment opportunities prevail, the Portfolio may, on an ancillary basis, invest in securities listed on a stock exchange or dealt in on a regulated market of a non OECD-member state. Taking into account the principle of investment risk spreading, the Portfolio will invest, directly or indirectly through the use of financial derivative instruments, in investment grade (at the time of the purchase and as defined by recognised rating agents such as Moody's Services or Standard & Poor's) bonds and money market instruments. The Portfolio may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for hedging purposes. These instruments may include, but are not limited to, futures, forwards, options, swaptions, interest rate swaps and inflation swaps.

CT (Lux) European Growth & Income

The investment objective of the Portfolio is to achieve long-term capital appreciation and an enhanced level of income by investing in companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). In addition to equity and equity-related securities, the Portfolio may also invest in warrants on equity and equity related securities which qualify as transferable securities.

CT (Lux) European Smaller Cap

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of European domiciled companies listed on the various European States Stock Exchanges. The Investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies.

The Portfolio is actively managed. The Investment Manager believes that an appropriate comparator benchmark for reviewing fund performance is the EMIX Smaller European Companies NR Index, given the investment policy of the Portfolio and the approach taken by the Investment Manager. The Portfolio is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in Europe. In addition, the Portfolio will invest the majority (i.e., greater than 50%) of its total assets in European equities of companies that have a maximum capitalisation less than or equal to the highest capitalisation in the Index. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the GITA.

CT (Lux) Global Absolute Return Bond

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio seeks to deliver an absolute return irrespective of bond market direction. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

Columbia Threadneedle (Lux) III The Portfolios and their Objectives (continued)

CT (Lux) Global Convertible Bond

The investment objective of the Portfolio is to achieve high returns by investing its assets through a balanced portfolio consisting of convertible securities. The Portfolio will invest its assets in a balanced portfolio consisting of convertible debt securities and synthetic convertibles which offer the most attractive risk/reward characteristics in terms of upward participation and downward protection. The Portfolio will invest at least two thirds of its total assets in convertible debt securities issued by corporations located in Europe, the United States, Japan and Asia.

CT (Lux) Global Smaller Cap Equity

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of listed securities of companies on a worldwide basis. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest primarily in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) issued by small and medium sized companies. Small and medium sized companies will generally be companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company subsequently reaches or exceeds US\$ 10 billion or equivalent after acquisition by the Portfolio. The Portfolio may also hold exchange traded funds and fixed interest securities should this be considered to be appropriate at any particular time. Subject to the investment restrictions set forth in section S "Investment Restrictions", the Portfolio may also invest in money market instruments, bank deposits and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. In normal market conditions investment in such liquid assets and debt instruments of any kind will not exceed 15% of the Portfolio's Net Asset Value.

CT (Lux) Global Total Return Bond

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

CT (Lux) Plus II (liquidated with effect from 13 December 2022)

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing in shares or units of other collective investment schemes that invest in global developed market equities and bonds or by investing in global developed equity and bond markets directly. Up to 5% of the Portfolio's total assets may be invested in shares or units of other collective investment schemes that invest in emerging market equities.

CT (Lux) Responsible Euro Corporate Bond

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing mainly in investment grade fixed income debt securities, floating rate and other debt securities, including asset backed securities and contingent convertible bonds, issued by companies. Investment grade securities are defined as securities that are rated Baa3/BBB- or higher by Moody's, Standard & Poor's or another recognised credit rating agency. The Portfolio may also invest up to 15% of its net assets in sub investment grade fixed income debt securities, floating rate and other debt securities. Investments in asset backed securities may not exceed 10% of the Portfolio's net assets. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets.

CT (Lux) Responsible Global Emerging Markets Equity

The purpose of the Portfolio is to provide a medium through which investors may participate in an actively managed portfolio, primarily invested in equity and equity-related securities of companies in emerging markets worldwide. The Portfolio may, as described below, invest in companies which are listed or traded on a recognised exchange in emerging market countries worldwide, which have, in the opinion of the Investment Manager, the potential for generating long term returns and contribute to or benefit from the sustainable economic development of the emerging market countries. The subscription proceeds relating to the different Classes of Shares in issue shall be invested in one common underlying portfolio of investments. Each Class of Shares will have a proportional entitlement to the assets (and liabilities) of the Portfolio (calculated according to the prevailing Net Asset Values of each Class). The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds

Columbia Threadneedle (Lux) III The Portfolios and their Objectives (continued)

with warrants), of companies that are incorporated under the laws of, and have their registered office in, an emerging market country, or that derive a predominant part of their economic activity from emerging market countries, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) Responsible Global Equity

The Portfolio focuses on long-term capital growth through investment in companies across the world. Its objective is to maximise returns through investment in an ethically screened and diverse universe of companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-related securities (excluding convertible bonds and bonds with warrants) of companies, in any market, that meet the ethical and sustainable criteria. The Portfolio will invest a more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) SDG Engagement Global Equity

The Portfolio aims to achieve long-term capital growth and support sustainable development. The Portfolio invests primarily in a diversified portfolio of equity and equity-related securities (excluding convertible bonds and bonds with warrants) of small- and mid-capitalisation companies, which may be anywhere in the world and be in any industry or sector. The Portfolio will hold more than 50% in equities securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) Sustainable Multi-Asset Income

The investment objective of the Portfolio is to achieve capital appreciation and income through sustainable investments, while maintaining long-term value. The Portfolio will invest in a diversified mix of sustainable investments in traditional and alternative asset classes. The Portfolio will invest a majority of its assets in equity securities and debt securities, including investment grade, below investment grade debt securities and contingent convertible bonds. The Portfolio may invest in derivatives to enhance performance by gaining exposure to a number of alternative sources of return and controlling risk. Derivatives may be traded through recognised exchanges or over-the-counter ("OTC") and may include but are not limited to, options, futures, swaps (including, but not limited to, total return swaps on strategies, equity baskets, equity indices, property or commodity indices), contracts for difference and forward contracts. The Portfolio may invest up to 10% of its net assets in below investment grade debt securities. The Portfolio will not invest in securities that are "distressed" or "defaulted" at the time of their purchase by the Portfolio. In the event of a downgrading of any debt security held by the Portfolio, the Investment Manager will take all reasonable efforts to keep this exposure below 5% of the Portfolio's net assets and to realise the distressed or defaulted securities as soon as reasonably practicable if this is tin the best interest of the Shareholders. Investments in contingent convertible bonds will not exceed 5% of the Portfolio's net assets. The Portfolio will invest a minimum of 26% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) Sustainable Opportunities European Equity

The investment objective of the Portfolio is to achieve long-term capital appreciation through sustainable investments. The Portfolio invests in European companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

CT (Lux) US Smaller Companies

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of United States companies listed on United States Stock Exchanges or NASDAQ. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) of small capitalisation companies that are incorporated under the laws of, and have their registered office in the United States, or that derive a predominant part of their economic activity from the United States, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest in companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company has reached or exceeded US\$ 10 billion or equivalent after acquisition by the Portfolio.

Performance

Over the six months to 31 March 2023, the Class X shares - EUR returned 3.0%. The Class A shares EUR returned 2.2%. By comparison the benchmark of ESTR Overnight rate, plus 4% per annum, returned 2.9% over the same period. Performance is net of fees and in euro terms.

With yields falling, both government and corporate bonds delivered decent gains to the portfolio over the period. This was further enhanced by the tactical overweight during the period. Equities were a strong driver of performance for the fund as markets rallied, however our conservative tactical positioning reduced overall gains somewhat. Alternatives were mixed, with strong contributions from insurance-linked securities and commodity, currency, and rates risk premia strategies. Overall gains from alternatives were tempered by the weak performance of the merger arbitrage strategy and the alternative beta allocations where, amongst others, private equity and property holdings have rerated sharply.

Market Review

Initially, equity indices fell as jittery investors sold off stocks on the back of soaring inflation, fears of recession, rising commodity prices and a potential European winter energy crisis. However, despite interest rates continuing to rise, markets staged a series of rallies into the new year, helped by China's removal of Covid restrictions, a warm winter cutting energy demand in Europe and the much-anticipated softening of interest rate hikes as inflation began to slow. Despite this, there was a general surge in volatility in March as banking stocks were hit by the collapse of SVB and Signature Bank in the US and the rescue of Credit Suisse in Europe. Geopolitical risks also weighed on emerging equity markets. The continued rise of interest rates over the period prompted the underperformance of US technology-driven mega-cap growth stocks. Global government bond yields generally fell slightly over a volatile six months, with the 10-year US Treasury yield decreasing from 3.80% to 3.49%. Initially, the yield rose and peaked at 4.23% towards the end of October, a level not seen since July 2008, rising alongside the jumbo interest rate increases by the US Federal Reserve. Thereafter yields on Treasuries trended down towards the end of the period, even as interest rates continued to rise. Investors increasingly anticipated that the Federal Reserve's (Fed) tightening cycle would halt and then reverse due to the economic slowdown in the US, especially following the banking crisis. Over the six months, the Fed made diminishing rate hikes of 75 basis points (bp) in November, 50 bp in December and 25 bp in February and March, which raised policy rates by a total of 1.75% over the six months to 5.00%. The demand for equities was mirrored by increased demand for investment-grade corporate credit and short-term government bonds in anticipation of the Fed slowing interest rate hikes, which narrowed corporate credit spreads.

Outlook

The question of whether a soft landing can be achieved is the foremost driver of equities now that inflation is beginning to roll over. In January and February, pricing out of the hard landing scenario led global equities higher, reflecting investor faith in the Fed's ability to engineer a growth slowdown that is sufficient to cap inflation without a triggering a significant recession. Nonetheless, a recession in the US is still the most likely outcome, and we would argue that recent turmoil in the US banking system, and resultant tightening in credit conditions, makes a hard landing all the more likely. Many of the same growth stocks that strongly underperformed in 2022 saw price recovery due to peaking bond yields and their relative historical resilience in a growth downturn, however, markets continue to exhibit a degree of complacency that is consistent with the view that we likely experienced a bear-market rally over the first quarter. Expectations for growth and earnings are yet to fully reflect the economic reality although it should be acknowledged that the backdrop is undoubtably better than had been feared at this point. Only higher unemployment, weaker wage growth, or a recession may be sufficient to convince central bankers that core inflation is under control. Whilst we believe that we are very near the end of this rate rising cycle, we also believe that the markets are taking too rosy a picture about the length of time that rates will remain at or around these levels. As such the risk of a policy mistake by central banks remains high, ultimately leading to lower equity markets and higher bond prices.

Multi-Asset Team May 2023

Columbia Threadneedle (Lux) III CT (Lux) Euro Bond

Performance

Over the six months to 31 March 2023, the I Acc EUR share class returned 0.3%. By comparison, the Barclays Capital Euro Aggregate Treasury Total Return Index returned 0.3%. Performance is total return and in euro terms.

Over the six-month period, the CT (Lux) Euro Bond Fund performed in line with its benchmark. Short positions in Japanese bonds added to performance whilst underweight positions in Italian government bonds subtracted.

Market Review

European government bond yields generally climbed over the period due to persistent wage inflation and aggressive rate hikes as the economy avoided the expected energy crisis. Yields dropped back through November and again in January as investor optimism rose that inflation was beginning to fall as energy prices dropped, and a period of lower-pace rate hikes would begin. The European Central Bank (ECB) began "quantitative tightening" (not reinvesting maturing bonds) in March 2023, which added to the net supply of bonds in the market. However, yields then fell through March as investors hoped that the collapse of SVB and rescue of Credit Suisse would mean an earlier end to the current tightening cycle. The benchmark 10-year German bund yield rose from 2.1% at the beginning of October to 2.4% in late October before dropping to 1.8% at the beginning of December. It peaked in early March at 2.8% before ending the period at 2.3%. Other government bond yields followed a similar pattern, but, for example, the Italian 10-year government bond yield started the period at 4.5% but ended at 4.1% as a more benign economic outlook allowed credit risk premiums to contract. Preliminary estimates show Euro Area inflation eased to 6.9% in March, the lowest since February 2022. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50%. The Eurozone economy remained static in the fourth quarter of 2022, and household consumption dropped as sticky inflation, rising borrowing and energy costs negatively impacted activity and demand.

Outlook

Our bias for eurozone government bond yields has shifted towards a modestly more bullish stance. We expect yields to be range-bound but with a bullish bias, driven by inflation having already peaked and relatively weak growth prospects. In the very near-term, yields have priced in a quick reversal in the ECB hiking cycle to cuts in early 2024. We think this pricing is overdone, given that the labour market remains tight, therefore, we would look to use weakness to add government bond exposure. Signs that the labour market is weakening, would give us confidence to move to an outright bullish stance. We anticipate other government bond yield spreads over Germany will widen in 2023 as growth weakens, putting pressure on fiscal deficits. Poor net supply dynamics will be aggravated by the start of quantitative tightening in March.

Performance

In the six months to 31 March 2023, the Class A EUR shares returned 20.4%. By comparison the FTSE All-World Developed Europe NR Index return was 19.1%. All figures are net of fees and in euro terms.

Expectations that inflation and interest rates were close to the peak drove the recovery In general performance leadership was more varied with strong contributions from both cyclical and growth sectors. Stock selection was the main contributor to the outperformance. The largest contributors included Compagnie Financiere Richemont, as luxury goods companies saw continued strong sales and the outlook was boosted by China's decision to end lockdowns. The positive impact of rising interest rates drove the outperformance of Bank of Ireland. There was also a positive contribution from the zero holdings of Roche and Nestle, two classic defensive stocks who underperformed as the outlook improved. The portfolio did have some exposure to such stocks and the holding of Kerry Group was the largest induvial detractor from performance. The holdings in Norwegian financials DnB and Storebrand under-performed other European financials as investors, at least until SVB's travails, focused instead on lower-quality, cheaper stocks that were benefiting from faster rising Eurozone interest rates.

Market Review

European government bond yields generally climbed over the period due to persistent wage inflation and aggressive rate hikes as the economy avoided the expected energy crisis. Yields dropped back through November and again in January as investor optimism rose that inflation was beginning to fall as energy prices dropped, and a period of lower-pace rate hikes would begin. The European Central Bank (ECB) began "quantitative tightening" (not reinvesting maturing bonds) in March 2023, which added to the net supply of bonds in the market. However, yields then fell through March as investors hoped that the collapse of SVB and rescue of Credit Suisse would mean an earlier end to the current tightening cycle. The benchmark 10-year German bund yield rose from 2.1% at the beginning of October to 2.4% in late October before dropping to 1.8% at the beginning of December. It peaked in early March at 2.8% before ending the period at 2.3%. Other government bond yields followed a similar pattern, but, for example, the Italian 10-year government bond yield started the period at 4.5% but ended at 4.1% as a more benign economic outlook allowed credit risk premiums to contract. Preliminary estimates show Euro Area inflation eased to 6.9% in March, the lowest since February 2022. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50%. The Eurozone economy remained static in the fourth quarter of 2022, and household consumption dropped as sticky inflation, rising borrowing and energy costs negatively impacted activity and demand.

Outlook

Our bias for eurozone government bond yields has shifted towards a modestly more bullish stance. We expect yields to be range-bound but with a bullish bias, driven by inflation having already peaked and relatively weak growth prospects. In the very near-term, yields have priced in a quick reversal in the ECB hiking cycle to cuts in early 2024. We think this pricing is overdone, given that the labour market remains tight, therefore, we would look to use weakness to add government bond exposure. Signs that the labour market is weakening, would give us confidence to move to an outright bullish stance. We anticipate other government bond yield spreads over Germany will widen in 2023 as growth weakens, putting pressure on fiscal deficits. Poor net supply dynamics will be aggravated by the start of quantitative tightening in March.

Columbia Threadneedle (Lux) III CT (Lux) European Smaller Cap

Performance

Over the six months to 31 March 2023, the Class A EUR share returned 18.7%. By comparison the EMIX Smaller European Companies Index (NR), returned 16.9%. Performance is net of fees and in euro terms.

The Portfolio outperformed the strong gains of European equity markets over the six months. Our best contribution came from Gerresheimer, the German-listed pharmaceutical packaging company. Recent results and outlook were encouraging, above expectations and demonstrate that the company's significant investments to drive accelerating growth are now bearing fruit and that we should be moving onto a better platform of growth, profit margins and cash flow. MIPs, the Swedish designer of the Brain Protection System that is integrated in helmets, also saw a positive reaction following results. While the results themselves weren't particularly impressive, management's confidence in a recovery in the second half of the year was enough to see the shares perform strongly. Our holding in Bank of Ireland has been a strong contributor since we added to the portfolio in April 2022. The company operates in an attractive oligopoly within an economy that is performing well and has strong fundamentals. Acquisitions and interest rates are helping to drive an improvement in profitability, yet the business's valuation remains very attractive. An increase in guidance for the full-year profits helped propel the shares higher. Performance was hit by a profit warning from flatexDEGIRO, the German-listed online broker. The fall in full-year guidance due to lower client activity wasn't a shock. However, the news of an audit by the German regulator (BaFin), resulting in measures needed to improve internal controls and capital, was a surprise. While the company's rapid expansion requires greater regulatory oversight, the way in which this has been handled by management was extremely disappointing. Inevitably, financials were our worst contributors. While we believe that the issues impacting both SVB and Credit Suisse are stock specific and do not represent a systemic risk to the European finance infrastructure, we reduced our exposure to the sector quickly at the onset of the news, mitigating some of the damage. However, on a long-term basis, we are happy with our holdings in this area. They have strong franchises, are well capitalised, have good track records of execution and are attractively valued.

Market Review

Small cap equity markets in Europe rose over the period, performing strongly alongside the bounce in European equity market more widely. Investor confidence increased on expectations that central banks would at least slow the pace of monetary policy tightening. Later, a mild winter eased the energy crisis, averting recession and capping inflation and so reducing the pace of interest rate hikes, which allowed many European equities to rally and outperform many other markets. However, the banking sector suffered towards the end of the period as investors assessed the fallout after the collapse of two mid-sized US banks and the rescue of Credit Suisse. Despite this, aggregate losses were limited as these sectors represent a relatively small part of the index. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50% overall, as concerns of high inflation continued to outweigh fears of slowing growth. Official preliminary estimates of consumer price inflation in the euro area eased to 6.9% in March, the lowest rate since February 2022, with the cost of energy declining for the first time in two years. However, the eurozone economy showed no growth in the fourth quarter of 2022, and household consumption slumped. Consumer confidence edged down to -19.2 in March but remained near the highest level in over a year.

Outlook

Energy prices appear to have peaked in Europe, and now the focus is on the direction of interest rates, weak economic growth and on how the banking sector will withstand these pressures. The bank failures in the first quarter were limited in impact, and although we expect economic growth to slow, we also expect banks to remain resilient. However, first quarter updates will confirm whether this confidence is misplaced. The war in Ukraine, in addition to strike action and demands for higher wages and government spending, will continue to be economically disruptive across Europe. However, inflation is slowly falling, mainly due to lower energy costs, and many European companies remain well-positioned with attractive valuations, while investors are increasing European allocations in recognition of these strengths.

Columbia Threadneedle (Lux) III CT (Lux) Global Absolute Return Bond

Performance

Over the six months to 31 March 2023, the Class F GBP Hedged shares returned 3.1%. By comparison, the SONIA Interbank Rate GBP return was 1.6%. Performance is total return, net of fees and in sterling terms.

The strategy outperformed its benchmark. We shifted from a structural short duration position in the last quarter of last year to more tactical positioning, as it became clear that central banks were edging towards terminal rate levels. The fund benefitted from the strong performance of the core portfolio, as the market aggressively priced in interest rate cuts by the major central banks. Exposure to rising stars – issuers making the credit rating transition from high yield to investment grade – provided another positive contributor to performance, as did a tilt to higher beta sectors of the corporate bond market. In a more constructive environment for fixed income, notwithstanding the banking stresses that were to emerge in March, credit hedging strategies detracted from returns.

Market Review

Global government bond yields generally fell slightly over a volatile six months, with the 10-year US Treasury yield decreasing from 3.80% to 3.49%. Initially, the yield rose and peaked at 4.23% towards the end of October, a level not seen since July 2008, rising alongside the jumbo interest rate increases by the US Federal Reserve. Thereafter yields on Treasuries trended down towards the end of the period, even as interest rates continued to rise. Investors increasingly anticipated that the Federal Reserve's (Fed) tightening cycle would halt and then reverse due to the economic slowdown in the US, especially following the banking crisis. Over the six months, the Fed made diminishing rate hikes of 75 basis points (bp) in November, 50 bp in December and 25 bp in February and March, which raised policy rates by a total of 1.75% over the six months to 5.00%. The demand for equities was mirrored by increased demand for investment-grade corporate credit and short-term government bonds in anticipation of the Fed slowing interest rate hikes, which narrowed corporate credit spreads. There was a brief about-turn at the back of December and through February as fixed asset investors priced in persisting inflation and began to demand higher premiums for holding longer-term bonds. The European Central Bank (ECB) began quantitative tightening in March and raised rates with a jumbo rate rise of 75 bp in October, ending with additional 50 bp rises in December, February and March, increasing the deposit facility to 3.50%, as it tried to combat high inflation.

Outlook

Our bias for government bond yields has shifted towards a modestly more bullish stance. We expect yields to be range-bound but with a bullish bias, driven by inflation having already peaked and relatively weak growth prospects. In the very near-term, yields have already priced a quick reversal to cuts of the central bank hiking cycle by the end of the year. With labour markets remaining tight globally, we think this pricing is probably overdone and could see some weakness. However, we would not wish to be underweight given recent banking stress which is likely to further impair credit provision to the broad economy. Instead, we would look to use weakness to add government bond exposure. Signs that labour markets are weakening would give us confidence to move to an outright bullish view. We have a conservative stance on global credit. The first quarter of the year ended with overall positive returns across both government bond and credit markets. However, credit market returns were driven by the reduction in government yields rather than material tightening in credit spreads. Banking sector problems have meant that investors re-evaluated the likely peak in interest rates and the speed at which central banks may then begin cutting, as the risk has increased of a harder landing for the economy, sooner than expected. Looking forward, the prospect of this happening underlines our conservative stance on credit, and we caution on chasing risk at current levels. However, higher overall yields do offer a compelling opportunity to investors seeking income, and attractive valuations represent a good entry level for those looking to allocate to credit.

Columbia Threadneedle (Lux) III CT (Lux) Global Convertible Bond

Performance

In the six months to 31 March 2023, the return on the A EUR shares was 2.4%, while the return for the Refinitiv Global Focus Combined Index was 3.3%. The A EUR Hedged share class returned 6.8% and the I EUR Hedged share class returned 7.2%. Performance is net of fees and in euro terms.

The Portfolio underperformed the benchmark. Regional and sector allocation detracted from relative returns. European convertibles stood out for their strong performance. The region avoided an energy crisis as gas prices declined, China reopened, fiscal stimulus and high savings combined with attractive relative valuations of the European market all contributed to this relative outperformance. Whilst the Portfolio has been increasing its European exposure over the period, being still underweight Europe and slightly overweight US detracted from relative returns. From a sector perspective, underweight industrials was the largest detractor. Not owning French aerospace and defence company Safran (excluded from investment because of its armaments exposure), which traded up strongly, was the main cause for this. Convertible selection compensated for the negative regional and sector allocation. Selection was positive across all regions. Positioning in consumer discretionary, materials and real estate were the main positive drivers, whilst selection in communication services and health care detracted from relative returns. Over the review period, investment strategy has been cautious. Taking profits, notably during the first quarter of 2023 on short-dated convertibles ahead of upcoming maturity that had benefited from strong run-ups and spread tightening, has been used to reduce credit risk. Re-investments have been focussed on high-quality, balanced convertibles in Europe. In both defensive sectors (telecom) and more equity-sensitive ones that had de-rated strongly on anticipated economic slow-down. Against an uncertain economic outlook, our quality-focussed investment strategy will be retained.

Market Review

Convertibles gained support from a recovery in equity markets and corporate credit spreads even as interest rates continued to rise, as confidence in the outlook improved from very low levels in the latter part of 2022 and into 2023. Global government bond yields generally fell slightly over a volatile six months, with the 10-year US Treasury yield decreasing from 3.80% to 3.49%. Initially, the yield rose and peaked at 4.23% towards the end of October, a level not seen since July 2008, rising alongside the jumbo interest rate increases by the US Federal Reserve. Thereafter yields on Treasuries trended down towards the end of the period, even as interest rates continued to rise. Investors increasingly anticipated that the Federal Reserve's (Fed) tightening cycle would halt and then reverse due to the economic slowdown in the US, especially following the banking crisis. Over the six months, the Fed made diminishing rate hikes of 75 basis points (bp) in November, 50 bp in December and 25 bp in February and March, which raised policy rates by a total of 1.75% over the six months to 5.00%. The demand for equities was mirrored by increased demand for investment-grade corporate credit and short-term government bonds in anticipation of the Fed slowing interest rate hikes, which narrowed corporate credit spreads.

Outlook

We have a cautious outlook. Recent bank turmoil highlights the challenges to central banks in taming inflation while balancing recession risks and financial stability. Although inflation is softening, core inflation remains well above central bank targets, with higher interest rates and tighter credit conditions likely to affect future economic growth. Moreover, geopolitical risk and the US debt ceiling also warrant attention. The rapid tightening cycle may also trigger other unforeseen risks, as highlighted by the collapse of Silicon Valley Bank (SVB). High refinancing costs for debt-laden companies and industries, following years of low interest rates, further increase risk. Within this uncertain outlook, we continue to focus on quality. However, volatility will provide an opportunity to reposition and benefit from the asymmetrical risk/reward profile the asset class provides.

Anja Eijking Portfolio Manager May 2023

Columbia Threadneedle (Lux) III CT (Lux) Global Smaller Cap Equity

Performance

Over the six months to 31 March 2023, the Class I USD shares returned 20.3%. By comparison, the MSCI World Small Cap Index, returned 15.5%. Performance is net of fees and in US dollar terms.

The Portfolio outperformed over the period. The highlight was good stock selection in US banks in the face of the challenges to the industry. Focus Financial Partners, a US wealth management business, received a takeover bid from private equity. Wheaton Precious Metals, an investor in precious metals royalties, benefitted from a higher gold price. Melrose Industries, a UK holding company that turns around industrial businesses, benefitted from a broker upgrade and good prospects for the company's aerospace division. Negative contributions came from Molina Healthcare, a US managed care business, which suffered from uncertainty over future managed care rates, while Webster Financial, a US regional bank, was caught up in the wider US regional bank sector turmoil. Viavi Solutions, which provides testing and monitoring equipment and services for communications networks, reported disappointing profits as customers reduced their investment intentions.

The fund remains underweight Japan and the US and overweight UK and Ireland. The largest sector overweights are in cash, materials and health care sectors, the largest sector underweights are in industrials, consumer discretionary and real estate.

Market Review

Global small cap equity markets rose over the period, outperforming large caps as signs of stability returned to capital markets. Initially, equity indices fell as jittery investors sold off stocks on the back of soaring inflation, fears of recession, rising commodity prices and a potential European winter energy crisis. However, despite interest rates continuing to rise, markets staged a series of rallies into the new year, helped by China's removal of Covid restrictions, a warm winter cutting energy demand in Europe and the much-anticipated softening of interest rate hikes as inflation began to slow. Despite this, there was a general surge in volatility in March as banking stocks were hit by the collapse of SVB and Signature Bank in the US and the rescue of Credit Suisse in Europe. Geopolitical risks also weighed on emerging equity markets. The continued rise of interest rates over the period prompted the underperformance of US technology-driven mega-cap growth stocks and a reversal of the dollar's strength.

Outlook

Confidence amongst consumers continues to improve as some price pressures eased, although wages have still not yet caught up with higher living costs. Sentiment amongst manufacturers (represented by ISM and PMI data) suggests that the sector is in contractionary territory, and we should remain cautious about the outlook for margins in the industrial economy. Earnings results so far in 2023 show corporate earnings reports were generally above expectations. Earnings forecasts appear stable, but confidence in those estimates is low given the numerous uncertainties that are present. Accordingly, a cautious yet opportunistic investment approach seems appropriate in the current environment.

Catherine Stanley Portfolio Manager May 2023

Columbia Threadneedle (Lux) III CT (Lux) Global Total Return Bond

Performance

Over the six months to 31 March 2023, the Class I Acc EUR shares returned 2.6%. By comparison, its market reference, the Barclays Global Aggregate EUR Hedged Index returned 2.4%. Performance is total return, net of fees and in euro terms.

The strategy outperformed its benchmark. We shifted from a structural short duration position in the last quarter of last year to more tactical positioning, as it became clear that central banks were edging towards terminal rate levels. The fund benefitted from the strong performance of the core portfolio, as the market aggressively priced in interest rate cuts by the major central banks. Exposure to rising stars – issuers making the credit rating transition from high yield to investment grade – provided another positive contributor to performance, as did a tilt to higher beta sectors of the corporate bond market. In a more constructive environment for fixed income, notwithstanding the banking stresses that were to emerge in March, credit hedging strategies detracted from returns.

Market Review

Global government bond yields generally fell slightly over a volatile six months, with the 10-year US Treasury yield decreasing from 3.80% to 3.49%. Initially, the yield rose and peaked at 4.23% towards the end of October, a level not seen since July 2008, rising alongside the jumbo interest rate increases by the US Federal Reserve. Thereafter yields on Treasuries trended down towards the end of the period, even as interest rates continued to rise. Investors increasingly anticipated that the Federal Reserve's (Fed) tightening cycle would halt and then reverse due to the economic slowdown in the US, especially following the banking crisis. Over the six months, the Fed made diminishing rate hikes of 75 basis points (bp) in November, 50 bp in December and 25 bp in February and March, which raised policy rates by a total of 1.75% over the six months to 5.00%. The demand for equities was mirrored by increased demand for investment-grade corporate credit and short-term government bonds in anticipation of the Fed slowing interest rate hikes, which narrowed corporate credit spreads. There was a brief about-turn at the back of December and through February as fixed asset investors priced in persisting inflation and began to demand higher premiums for holding longer-term bonds. The European Central Bank (ECB) began quantitative tightening in March and raised rates with a jumbo rate rise of 75 bp in October, ending with additional 50 bp rises in December, February and March, increasing the deposit facility to 3.50%, as it tried to combat high inflation.

Outlook

Our bias for government bond yields has shifted towards a modestly more bullish stance. We expect yields to be range-bound but with a bullish bias, driven by inflation having already peaked and relatively weak growth prospects. In the very near-term, yields have already priced a quick reversal to cuts of the central bank hiking cycle by the end of the year. With labour markets remaining tight globally, we think this pricing is probably overdone and could see some weakness. However, we would not wish to be underweight given recent banking stress which is likely to further impair credit provision to the broad economy. Instead, we would look to use weakness to add government bond exposure. Signs that labour markets are weakening would give us confidence to move to an outright bullish view. We have a conservative stance on global credit. The first quarter of the year ended with overall positive returns across both government bond and credit markets. However, credit market returns were driven by the reduction in government yields rather than material tightening in credit spreads. Banking sector problems have meant that investors re-evaluated the likely peak in interest rates and the speed at which central banks may then begin cutting, as the risk has increased of a harder landing for the economy, sooner than expected. Looking forward, the prospect of this happening underlines our conservative stance on credit, and we caution on chasing risk at current levels. However, higher overall yields do offer a compelling opportunity to investors seeking income, and attractive valuations represent a good entry level for those looking to allocate to credit.

Columbia Threadneedle (Lux) III CT (Lux) Responsible Euro Corporate Bond

Performance

Over the six months to 31 March 2023, the Class F Inc EUR shares returned 3.0%. This compares to the BBI Euro Aggregate Corporate TR Index, which returned 2.9%. Performance is total return, net of fees and in euro terms.

Over the six months, we generally maintained a conservative position within the fund and kept the overall risk profile close to the benchmark. In terms of duration, while we ended the period neural to the benchmark, we were marginally underweight through the end of 2022, which benefitted returns as rates rose. Similarly, a small overweight in credit risk through the start of 2023 was beneficial as credit spreads tightened. Our overweight position in banking and insurance, and especially subordinated debt, detracted from returns as this area underperformed in the wake of the collapse of SVB and rescue of Credit Suisse. Trading activity in the fund was reasonably light. After a difficult year for bond issuers, the start of 2023 saw a slew of new issuance, mostly from financials. We were however selective, wary that valuations were beginning to look stretched as credit markets continued to rally through January. New issuance volumes subsequently dried up in the wake of March's 'mini banking crisis'.

Market Review

European corporate bonds delivered good returns over the six months. A period of high volatility through September had pushed global credit spreads to their widest levels of 2022 however, from mid-October onwards, credit markets staged a remarkable recovery. Confidence in credit markets was buoyed by weakening macro headwinds — especially the easing of inflation and recessionary fears as energy prices declined in Europe. This continued into 2023, with the new issuance market exploding back into life. However, there was a significant reversal in March after the collapse of SVB. On a sector basis, bank spreads were weaker and wider, reflecting the obvious concerns after the collapse of several banks. Other financial sectors, including real estate and insurance, also underperformed. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50% and announced it began "quantitative tightening" (i.e., not reinvesting all proceeds of maturing bonds in its portfolio) in March. Official preliminary estimates of consumer price inflation in the euro area eased to 6.9% in March, the lowest rate since February 2022, with the cost of energy declining for the first time in two years. However, the eurozone economy showed no growth in the fourth quarter of 2022 as household consumption slumped.

Outlook

We have a conservative stance on European corporate bonds. The first quarter of the year ended with overall positive returns across both government bond and credit markets. However, credit market returns were driven by the reduction in government yields rather than any tightening in credit spreads. Banking sector problems have meant that investors re-evaluated the likely peak in interest rates and the speed at which central banks may then begin cutting, as the risk has increased of a harder landing for the economy, sooner than expected. Looking forward, the prospect of this happening underlines our conservative stance on credit, and we caution on chasing risk at current levels. However, higher overall yields do offer a compelling opportunity to investors seeking income, and attractive valuations represent a good entry level for those looking to allocate to credit.

Andrew Brown Portfolio Manager May 2023

Columbia Threadneedle (Lux) III CT (Lux) Responsible Global Emerging Markets Equity

Performance

Over the six months to 31 March 2023, the Class A Inc USD shares returned 15.3%. By comparison, the MSCI Emerging Markets NR Index, returned 14.0%. Performance is net of fees and in US dollar terms.

The fund outperformed its benchmark over the six months. At the sector level, consumer discretionary and financials were the main contributors, with selection proving most advantageous. Health care, information technology were the main detractors due to the overweight allocation to health care and selection within information technology. On a country level, Argentina (MercadoLibre), Taiwan saw positive contributions from selection decisions, while the underweight in Brazil was beneficial due to concerns over the direction of economic policy after Luis Inácio Lula da Silva was elected Brazil's president for the second time. South Korea, and Mexico were the main detractors due to underweight allocations. The overall contribution from China was positive, but this was a very volatile period for Chinese equities as they initially came under pressure as Xi Jinping was granted a third term and dashed hopes of reopening by renewing a "Zero-Covid" policy. However, late in 2022 China abruptly relaxed its Covid containment measures. There was also optimism surrounding Beijing's support to the internet and gaming sector, after Alibaba's founder, Jack Ma, returned to China for the first time in over a year. Tencent's management were also upbeat on their fintech outlook for the first time since late 2020.

Market Review

European corporate bonds delivered good returns over the six months. A period of high volatility through September had pushed global credit spreads to their widest levels of 2022 however, from mid-October onwards, credit markets staged a remarkable recovery. Confidence in credit markets was buoyed by weakening macro headwinds — especially the easing of inflation and recessionary fears as energy prices declined in Europe. This continued into 2023, with the new issuance market exploding back into life. However, there was a significant reversal in March after the collapse of SVB. On a sector basis, bank spreads were weaker and wider, reflecting the obvious concerns after the collapse of several banks. Other financial sectors, including real estate and insurance, also underperformed. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50% and announced it began "quantitative tightening" (i.e., not reinvesting all proceeds of maturing bonds in its portfolio) in March. Official preliminary estimates of consumer price inflation in the euro area eased to 6.9% in March, the lowest rate since February 2022, with the cost of energy declining for the first time in two years. However, the eurozone economy showed no growth in the fourth quarter of 2022 as household consumption slumped.

Outlook

We have a conservative stance on European corporate bonds. The first quarter of the year ended with overall positive returns across both government bond and credit markets. However, credit market returns were driven by the reduction in government yields rather than any tightening in credit spreads. Banking sector problems have meant that investors re-evaluated the likely peak in interest rates and the speed at which central banks may then begin cutting, as the risk has increased of a harder landing for the economy, sooner than expected. Looking forward, the prospect of this happening underlines our conservative stance on credit, and we caution on chasing risk at current levels. However, higher overall yields do offer a compelling opportunity to investors seeking income, and attractive valuations represent a good entry level for those looking to allocate to credit.

Performance

Over the six months to 31 March 2023, the Class A EUR shares returned 5.1%; by comparison the MSCI World NR Index returned 6.6%. Performance net of fees and in euro terms.

The fund underperformed benchmark over the six months, with relative returns overwhelmingly impacted by the painful collapse of SVB Financial, roughly a 1.2% position in the portfolio at the start of 2023, and marked down to zero in value following it being placed into FDIC receivership on 10th March. US health care company, CVS Health, was a detractor as company guidance on future earnings was lowered. Positive contributions came from French industrial group, Schneider Electric, which saw solid end market demand despite macro headwinds. Semiconductor equipment manufacturer, ASML Holding, gained on improved product demand. A big contribution came from not owning some of the mega cap index heavy weights, such as Tesla and Amazon.com. There were some offsetting impacts from not owning NVIDIA and Meta Platform.

Market Review

European corporate bonds delivered good returns over the six months. A period of high volatility through September had pushed global credit spreads to their widest levels of 2022 however, from mid-October onwards, credit markets staged a remarkable recovery. Confidence in credit markets was buoyed by weakening macro headwinds — especially the easing of inflation and recessionary fears as energy prices declined in Europe. This continued into 2023, with the new issuance market exploding back into life. However, there was a significant reversal in March after the collapse of SVB. On a sector basis, bank spreads were weaker and wider, reflecting the obvious concerns after the collapse of several banks. Other financial sectors, including real estate and insurance, also underperformed. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50% and announced it began "quantitative tightening" (i.e., not reinvesting all proceeds of maturing bonds in its portfolio) in March. Official preliminary estimates of consumer price inflation in the euro area eased to 6.9% in March, the lowest rate since February 2022, with the cost of energy declining for the first time in two years. However, the eurozone economy showed no growth in the fourth quarter of 2022 as household consumption slumped.

Outlook

We have a conservative stance on European corporate bonds. The first quarter of the year ended with overall positive returns across both government bond and credit markets. However, credit market returns were driven by the reduction in government yields rather than any tightening in credit spreads. Banking sector problems have meant that investors re-evaluated the likely peak in interest rates and the speed at which central banks may then begin cutting, as the risk has increased of a harder landing for the economy, sooner than expected. Looking forward, the prospect of this happening underlines our conservative stance on credit, and we caution on chasing risk at current levels. However, higher overall yields do offer a compelling opportunity to investors seeking income, and attractive valuations represent a good entry level for those looking to allocate to credit.

Performance

Over the six months to 31 March 2023, the Class A Acc USD shares returned 16.6%; by comparison the MSCI AC World SMID NR Index returned 15.9%. Performance is net of fees and in US dollar terms.

The fund outperformed the benchmark over the six months. Geographic allocation was negative, with positive contributions by overweights to the UK and Europe being offset by our overweight to Japan, underweight Pacific, and cash. Sector allocation was positive, with our overweights to information technology and industrials, and underweight to real estate benefitting the fund.

Stock selection was positive, although relative returns were significantly impacted by the painful collapse of SVB Financial, roughly a 2% position in the portfolio at the start of March, and marked down in value following it being placed into FDIC receivership on 10th March. Other detractors included North American waste business, Waste Connections, which was hit by weakness in recycled commodity prices. ComfortDelGro, the multi-national taxi group based in Singapore, saw results hit by higher than expected staff cost inflation. Despite these detractors, stock selection was positive for the six month period, with positive stock contributors including Wex, the US business payments group, which reported strong revenue growth and a share buy-back. Veolia Environnement, the international utility group, reported good 9-month results showing some inflation-protection in a number of its contracts; additionally, investor expectations of fewer macro challenges in Europe benefitted the stock in the period. The China reopening story helped US medical products company. Mettler-Toledo. alongside another quarter of solid results.

Market Review

Initially, equity indices fell as jittery investors sold off stocks on the back of soaring inflation, fears of recession, rising commodity prices and a potential European winter energy crisis. However, despite interest rates continuing to rise, markets staged a series of rallies into the new year, helped by China's removal of Covid restrictions, a warm winter cutting energy demand in Europe and the much-anticipated softening of interest rate hikes as inflation began to slow. Despite this, there was a general surge in volatility in March as banking stocks were hit by the collapse of SVB and Signature Bank in the US and the rescue of Credit Suisse in Europe. Geopolitical risks also weighed on emerging equity markets.

Outlook

While the first quarter of 2023 ended in positive territory for equity markets, the end of the period saw a sharp downturn of confidence in the banking system gripped global markets on the back of fears of a credit crunch and a repeat of the 2007 financial meltdown. Interest rate expectations were particularly volatile due to sticky inflation leading to expectations that the current tightening cycle will continue. Bond markets are suggesting a global recession later in 2023, which will likely lead to central banks cutting rates. As we enter first quarter equities results season, corporates are likely to be cautious, given the tightening of lending standards, stubborn core inflation and waning customer demand. As a result, over the short term, we expect elevated risks and a deterioration in growth fundamentals to persist in the short-term.

Columbia Threadneedle (Lux) III CT (Lux) Sustainable Multi-Asset Income

Performance

Over the six months to 31 March 2023, the Class F EUR share returned 2.1%. Performance is net of fees and in euro terms.

Our portfolio positioning retains its bias towards higher quality, sustainable growth companies that can prosper despite near-term economic and policy-driven volatility, giving us a bias towards healthcare, information technology and industrials. Our integrated approach to Sustainable Investment prevents any allocation to companies that manufacture weapons or tobacco or that own or derive revenue from fossil fuel reserves¹. We continue with our strategy of adding to positions where we see strong underlying quality and where the market allows us to add at more attractive levels. Equities and credit remain our largest allocations, with a smaller position in alternatives.

Market Review

Equity market performance was mixed over the final quarter of 2022, as jittery investors sold off stocks on the back of soaring inflation, fears of recession, and a potential European winter energy crisis. However, despite interest rates continuing to rise, markets staged a series of rallies into the new year, helped by China's removal of Covid restrictions, a warm winter cutting energy demand in Europe and the much-anticipated softening of interest rate hike expectations as inflation began to slow. Despite this, there was a general surge in volatility in March as banking stocks were hit by the collapse of SVB and Signature Bank in the US and the rescue of Credit Suisse in Europe. Geopolitical risks also weighed on emerging equity markets. The continued rise of interest rates over the period prompted the underperformance of US technology-driven mega-cap growth stocks and a reversal of the dollar's strength, which depressed global equity returns in euro terms. Global government bond yields generally fell slightly over a volatile six months, with the 10-year US Treasury yield decreasing from 3.8% to 3.5%. Initially, the yield rose and peaked at 4.2% towards the end of October, a level not seen since summer 2008, rising alongside the jumbo interest rate increases by the US Federal Reserve. Thereafter yields on Treasuries trended down towards the end of the period, even as interest rates continued to rise. Investors increasingly anticipated that the Federal Reserve's (Fed) tightening cycle would halt and then reverse due to the tightening credit conditions in the US, following the banking crisis. Over the six months, the Fed made diminishing rate hikes of 75 basis points (bp) in November, 50 bp in December and 25 bp in February and March, which raised policy rates by a total of 1.75% over the six months to 5.00%. The demand for equities was mirrored by increased demand for investment-grade corporate credit and short-term government bonds in anticipation of the Fed slowing interest rate hikes, which narrowed corporate credit spreads.

Outlook

While the first quarter of 2023 ended in positive territory for equity markets, the end of the period saw a sharp downturn of confidence in the banking system on the back of fears of a credit crunch and a repeat of the 2007 financial meltdown. Interest rate expectations were particularly volatile due to sticky inflation, leading to expectations that the current tightening cycle will continue. Bond markets are suggesting a global recession later in 2023, which will likely lead to central banks cutting rates. As we enter first quarter equities results season, corporates are likely to be cautious, given the tightening of lending standards, stubborn core inflation and waning customer demand. As a result, over the short term, we expect elevated risks and a deterioration in growth fundamentals. Our bias for government bond yields has shifted towards a modestly more bullish stance. We expect yields to be range-bound but with a bullish bias, driven by inflation having already peaked and relatively weak growth prospects. In the very near-term, yields have already priced a quick reversal to cuts of the central bank hiking cycle by the end of the year. With labour markets remaining tight globally, we think this pricing is probably overdone and could see some weakness. However, we would not wish to be underweight given recent banking stress which is likely to further impair credit provision to the broad economy. Instead, we would look to use weakness to add government bond exposure.

Columbia Threadneedle (Lux) III CT (Lux) Sustainable Opportunities European Equity

Performance

In the six months to 31 March 2023, the A share class returned 16.4%. By comparison the benchmark returned 19.0%. Performance is net of fees and in euro terms. The benchmark for this Portfolio was changed to MSCI Europe NR on 14/10/19, previously it was the FTSE All-World Developed Europe NR.

The Portfolio underperformed the very strong recovery of European equity markets over the period. Expectations that inflation and interest rates were close to the peak drove the recovery In general performance leadership was more varied with strong contributions from both cyclical and growth sectors. There were positive contributions from financials such as UBS, high quality stocks including Novo Nordisk and technology, such as Infineon Technologies. There was also a positive contribution from Vestas Wind Systems as input cost pressures eased, orders remained strong and the positive impacts of the US Inflation Reduction Act were better understood. Detracting from performance was the lack of exposure to the luxury goods sector, which rallied on China's decision to end lockdowns. The largest individual detractor was National Express which was hit by both rising wage costs and disruptive strike action.

Market Review

European equity markets outperformed global averages over the period. October and November were bullish as confidence increased on expectations that central banks would at least slow the pace of monetary policy tightening. Later, a mild winter eased the energy crisis, averting recession and capping inflation and so reducing the pace of interest rate hikes, which allowed many European equities to rally and outperform many other markets. However, the banking sector suffered towards the end of the period as investors assessed the fallout after the collapse of two mid-sized US banks and the rescue of Credit Suisse. Despite this, aggregate losses were limited as these sectors represent a relatively small part of the index. The European Central Bank (ECB) hiked interest rates four times over the six months, from 1.25% to 3.50% overall, as concerns of high inflation continued to outweigh fears of slowing growth. Official preliminary estimates of consumer price inflation in the euro area eased to 6.9% in March, the lowest rate since February 2022, with the cost of energy declining for the first time in two years. However, the eurozone economy showed no growth in the fourth quarter of 2022, and household consumption slumped. Consumer confidence edged down to -19.2 in March but remained near the highest level in over a year.

Outlook

Energy prices appear to have peaked in Europe, and now the focus is on the direction of interest rates, weak economic growth and on how the banking sector will withstand these pressures. The bank failures in the first quarter were limited in impact, and although we expect economic growth to slow, we also expect banks to remain resilient. However, first quarter updates will confirm whether this confidence is misplaced. The war in Ukraine, in addition to strike action and demands for higher wages and government spending, will continue to be economically disruptive across Europe. However, inflation is slowly falling, mainly due to lower energy costs, and many European companies remain well-positioned with attractive valuations, while investors are increasing European allocations in recognition of these strengths.

Columbia Threadneedle (Lux) III CT (Lux) US Smaller Companies

Performance

Over the six months to 31 March 2023, the CT (Lux) US Smaller Companies Fund returned 6.1%. By comparison, the benchmark (Russell 2000 Index) returned -1.7%. Returns are net of fees, in sterling terms and on a total return basis.

Alpha model performance was positive in the period, as positive contributions from the valuation and fundamentals themes more than offset a negative contribution from the investor interest theme. Both security selection and sector allocation made positive contributions to performance during the six-month period. The strategy's overweight positions in information technology and industrials added to performance, while an underweight position in consumer discretionary and overweight to health care detracted from performance. Stock selection was strongest in health care and financials, while stock selection detracted most within utilities and consumer staples. Top individual contributors for the period included Duolingo, Class A and Crocs while top detractors included Comstock Resources and CareDx. Elevated interest rates continue to draw a distinct line between stable growth companies and those classified as "growth at any price" or those more reliant on low interest rates to drive high multiples. Firms with resilient business models possess a higher probability of success in an era characterized by increased nominal interest rates. As earnings estimates continue to decline, value and quality biases are expected to deliver outperformance.

Market Review

Through the six-month period ending March 31st, 2023, the US economy was best defined by the US Federal Reserve's (Fed) fight against inflation and an unexpected banking crisis. October and November brought positive returns as inflation finally started to cool slightly and many investors looked to a potential end of the Fed's tightening cycle. While the Fed reduced the pace of tightening from 75 basis points earlier in the year to 50 basis points in December, Fed Chair Powell maintained a hawkish stance, continuing to stress the Fed's mandate to rein in inflation over maintaining full employment. While Fed moves operate with a lag, outside of some relief in the rate of year-over-year inflation metrics through November, there remained upward pressure on wage growth and the employment picture remained solid despite some high-profile layoffs in the information technology and financial services sectors. Consumer spending remained good enough, especially around services, to keep the economy growing despite the rapid pace of the Fed interest rate moves through the year.

During the first quarter of 2023, significant fluctuations in interest rate expectations were observed, accompanied by a near-miss banking crisis resulting from the failures of Signature and Silicon Valley Banks in the US and Credit Suisse in Europe. Concurrently, the Fed continued in its tightening cycle, raising the upper bound on Fed funds by 25 basis points at the March 22nd FOMC meeting. In terms of expectations, the Fed funds terminal rate initially increased from 4.9% in early February to 5.58% on March 8, only to retrace to 4.75% following the bank failures a few days later. Despite persistent hawkish communication from Chair Powell and other Fed members, the terminal rate concluded the quarter slightly below its starting point at 4.92%. Substantial volatility, especially in the bond market, endured in the aftermath of the bank failures in early March. Two-year Treasury yields underwent more than 100 basis points of fluctuation within the quarter (and within the month of March).

Outlook

Concerning our portfolio orientation, we maintain the conviction that stocks with strong fundamentals, such as quality and stable growth at a reasonable valuation, will continue to perform in a positive nominal interest rate climate accompanied by what is likely to be slower economic expansion. As for potential risks, negotiations surrounding the debt ceiling could conceivably precipitate the next crisis and reach a critical juncture around July, when the government may face difficulties in meeting its financial obligations. Presently, there are no indications of a compromise between the White House and the US House of Representatives.

Columbia Threadneedle (Lux) III Notes to the Financial Statements

as at 31 March 2023

1. Columbia Threadneedle (Lux) III, (THE "FUND")

The Fund is a "Société d'Investissement à Capital Variable" and is qualified as a Luxembourg investment company. Under the laws of the Grand Duchy of Luxembourg, the Fund is registered as an undertaking for collective investment pursuant to Part I of the amended Law of 17 December 2010 relating to undertakings for collective investment (the "Law").

Carne Global Fund Managers (Luxembourg) S.A. has been designated by the directors of the Fund as management company (the "Management Company") by an agreement dated 1 October 2021. The list of the investment funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company is a Société Anonyme incorporated under the laws of Luxembourg with registered number B 148258 and approved to act as a Management Company for Luxembourg authorised collective investment schemes pursuant to Chapter 15 of the law of 17 December 2010. The Management Company acts as UCITS Management Company to a range of Luxembourg authorised UCITS collective investment schemes. It also acts as an Alternative Investment Fund Manager to alternative investment funds. The registered office of the Management Company is at 3, rue Jean Piret, L-2350 Luxembourg, Grand Duchy of Luxembourg.

The Fund's board of directors (the "Board" or "Directors" and each a "Director") has adopted the ALFI Code of Conduct, which sets out the principles of good governance, and considers that the Fund has been in compliance with it in all material respects throughout the financial period ended 31 March 2023.

2. SIGNIFICANT ACCOUNTING POLICIES

Presentation of financial statements

The financial statements have been presented in accordance with the reporting requirements of the Luxembourg supervisory authorities and Luxembourg generally accepted accounting principles ("GAAP").

Combined accounts

The combined financial statements have been presented in Euro, the functional currency of the Fund. Where a Portfolio is denominated in a currency other than Euro, the average exchange rate has been used for the Statement of Operations and Changes in Net Assets. The exchange rate ruling as at the reporting date has been used for the Statement of Net Assets.

Investments

As per the Prospectus and for the purpose of determining the Net Asset Value used for subscriptions and redemptions, the quoted investments and those traded in other regulated markets are valued on the basis of the last available price at 31 March 2023.

Securities which are not quoted on, or dealt, in an official or another regulated market, or securities which are so quoted or dealt in but in which the last sale price is not available, and securities for which the last sale price is not representative of the fair market value, the value of such securities will be determined based on an agreed pricing basis and the reasonably foreseeable sales price determined prudently and in good faith, upon the advice of the Investment Manager, by the Directors. Purchases and sales of investments are recognised on the trade date. Gains or losses on sales of investments are computed on the average cost basis and include transaction costs.

Investment income

Dividends are recognised in income, net of irrecoverable withholding tax, on the date upon which the relevant securities are declared "ex-dividend". Interest income, net of irrecoverable withholding tax, is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts.

Translation of foreign currencies

Assets and liabilities denominated in currencies other than the Portfolios' reporting currencies have been translated at the rates of exchange ruling at 31 March 2023. Cost of investments and income and expenditure which are denominated in currencies other than the Portfolios' reporting currency have been translated at the exchange rates ruling on the day of transaction. The exchange gain or loss arising from the translation of these items is taken into account in the determination of the results of operations. The average USD/EUR exchange rate during the period was 0.955901. The USD/EUR exchange rate as at 31 March 2023 was 0.920429.

Cross portfolio investments

At 31 March 2023 there were no cross investments.

Futures contracts on securities and indices

Initial margin deposits are made upon entering into futures contracts and can be made either in cash or securities. During the period the futures contract is open, changes in the value of the contract are recognised as unrealised gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract.

Columbia Threadneedle (Lux) III Notes to the Financial Statements (continued)

as at 31 March 2023

Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realised profit or loss includes net gains or losses on forward foreign exchange contracts which have been settled or offset by other contracts with the same counterparty.

Options Purchased and Options Written

The premium paid for options purchased is recorded as an investment and is subsequently adjusted to the current market value of the option. Premiums paid for the purchase of options which expire unexercised are treated as realised losses on the expiration date. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index, in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Portfolio.

For a written option, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio as realised gains on the expiration date. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the relevant Portfolio has realised a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security purchased by the relevant Portfolio.

Future style options

In the case of options on futures, no premium margin is required as a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Swap contracts

The Fund may enter into swap contracts in which the Fund and the counterparty agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices. Swaps are valued at their fair value based on the underlying securities (at close of business or intraday) as well as on the characteristics of the underlying commitments.

Cash and cash equivalents

Cash and other liquid assets are valued at their face value, including interest accrued, where applicable. Interest is also accrued on bank overdrafts. All cash at bank is held either directly with a sub-depositary or by State Street Bank International GmbH, Luxembourg Branch, on overnight deposit with a third party institution which has been approved by the Board. The cash collateral in relations to the futures contracts, swaps, forward foreign exchange contracts and options are included in the statement of net assets respectively under "Cash held at brokers" and "Amounts due to brokers".

Income and receivable from securities lending

The Fund may lend its portfolio securities to specialised banks and credit institutions and other financial institutions of high standing and highly qualified registered brokers/dealers or through recognised clearing institutions such as Clearstream or Euroclear subject to complying with the provisions set forth in the CSSF Circular 08/356. Loans will be secured continuously by eligible collateral authorised from time to time by the CSSF. During the whole period of lending, collateral must be at least equal to the value of the global valuation of the securities lent. Each counterparty will possess an industry standard credit rating that is acceptable to the Investment Manager with reference to the market conditions prevailing at the relevant time.

Total amount of "Security lending income": 24,944 EUR

Total amount of "Security lending receivable": 2,112 EUR

As at 31 March, 2023, total amount of "Security lending receivable" is included in "Other assets".

Net amortization/Net accretion

Net amortization/Net accretion, includes the amortization and accretion of premiums / discounts from both, the long and short term fixed income securities. All components are netted and disclosed in the Statement of Operations and Changes in Net Assets as a positive sum under the income position "Net amortization/ Net accretion" and as a negative sum under the expense position "Net amortization / Net accretion". Net amortization/Net accretion are calculated on straight line basis.

Notes to the Financial Statements (continued)

as at 31 March 2023

3. EQUALISATION

The Fund follows the accounting practice known as "equalisation" by which a portion of the issue and redemption price representing, on a per share basis, accrued distributable investment income (excluding capital gains or losses), is credited or charged to distributable income. The amounts attributable to this income equalisation account are included in the proceeds from subscriptions to the Fund's shares or in the payment for the Fund's shares redeemed, and in the "Net equalisation", items of the Statement of Operations and Changes in Net Assets.

4. INVESTMENT MANAGEMENT FEES

The Fund entered into an agreement with the Management Company and Columbia Threadneedle Management Limited ("CTML") to act as investment manager to the following Portfolios for a monthly fee calculated on the average of the net asset value of each of the following Portfolios managed by it during the preceding month at the following rates:

CTML is a company incorporated in England and regulated by the Financial Conduct Authority ("FCA").

For the CT (Lux) Global Convertible Bond, CTML has delegated the portfolio management functions to Columbia Threadneedle Netherlands B.V.

For CT (Lux) US Smaller Companies, CTML has delegated the portfolio management functions to Columbia Management Investment Advisers, LLC.

There are no Investment Management Fees payable on Class X shares or Class L shares (if any).

The Investment Manager(s) have, at their discretion, capped expenses on some share classes. For these share classes, in instances where the expenses exceed the capped level, the Investment Manager(s) reimburses the Fund. The amounts reimbursed to the fund are disclosed in "Waiver of investment management fees" in the statement of net assets and in the statement of operations and changes in net assets.

5. ADMINISTRATION AND DEPOSITARY FEES

State Street Bank International GmbH, Luxembourg Branch ("the Depositary") is entitled to fees payable by the Fund, accruing daily and payable monthly in arrears, of up to 0.50% of the assets under custody plus a transaction charge with respect to its function as the Depositary of the Fund. The actual level of the fees and transaction charges payable for the custody services vary, depending on the different countries. In addition, for acting as Registrar, Transfer, Domiciliary, Administrative and Paying Agent to the Fund, State Street Bank International GmbH, Luxembourg Branch will be entitled to fees of up to 0.045% of the applicable Net Asset Value plus a transaction charge.

In addition State Street Bank International GmbH, Luxembourg Branch is entitled to pass on to the Fund fees charged by external price vendors where the cost of obtaining vendor prices is not contained within the standard State Street Bank International GmbH, Luxembourg Branch fund accounting fixed percentage fee.

6. DIRECTORS' FEES

Each of the Directors of the Fund is entitled to remuneration for their services at the rate determined by the Fund in general meeting from time to time. Those Directors of the Fund who are employees of Columbia Threadneedle Management Limited (parent of the Investment Managers), or any of its subsidiaries, waive their fees in carrying out their duties as Directors of the Fund. Directors' fees are paid to the remaining directors and allocated to the Portfolios based on average net assets. For the year to 30 September 2023, the Chairman Patrick Johns is entitled to a fee of EUR 27,000 per annum and directors Jacques Elvinger and Ailbhe Jennings are entitled to a fee of EUR 22,000 per annum. In addition, each Director may be paid reasonable expenses in connection with meetings of the Board or otherwise properly incurred in connection with the business of the Fund.

7. MANAGEMENT COMPANY FEE

The Fund pays to the Management Company an annual Management Company fee payable out of the assets of the Fund of up to a maximum of 0.02% of the net asset value (on a sliding scale dependant on the size of the Portfolio), with no minimum fee.

Columbia Threadneedle (Lux) III Notes to the Financial Statements (continued)

as at 31 March 2023

8. TAXATION

The Fund is not subject to taxation in Luxembourg on its income, profits or gains. However, the Fund is liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the basis of the total net assets of the Fund at the end of the relevant quarter. The rate of the annual subscription tax is reduced to 0.01% per annum for the Portfolios which, in accordance with Article 174 of the Law, invest exclusively in money market instruments as defined in the Grand-Ducal Regulation of 14 April 2003 and in respect of classes of shares which are only sold to and held by Institutional Investors. No stamp duty or other tax will be payable in Luxembourg on the issue of Shares in the Fund.

Interest and dividend income received by the Fund may be subject to non-recoverable withholding tax in the source countries. The Fund may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin.

Distributions made by the Fund are not subject to withholding tax in Luxembourg.

The Fund is not subject to net wealth tax.

Dividend and interest income are recognised in the Combined Statement of Operations and Changes in Net Assets on a net basis.

As from 1 April 2007, investment vehicles listed in article 44, 1, d) of the Luxembourg VAT law (SICAVs, SICAFs and management companies of FCPs) should be registered as taxable persons for VAT purposes. As taxable persons for VAT purposes these investment vehicles must comply with the standard obligations foreseen in the Luxembourg VAT law such as VAT registration, VAT compliance and payment of the VAT due on services subject to reverse charge.

Investors should be aware that a United Kingdom offshore funds regime was introduced applicable to United Kingdom investors into "offshore funds". The Board has obtained reporting fund status approval from HM Revenue & Customs for the classes of shares listed below.

The following share classes were included in the application (as at 30 September 2022):

CT (Lux) European Growth & Income - Class A Shares - Euro CT (Lux) European Growth & Income - Class A Shares - GBP CT (Lux) European Smaller Cap - Class A Shares - Euro CT (Lux) European Smaller Cap - Class A Acc Shares - Euro CT (Lux) European Smaller Cap - Class I Shares - Euro CT (Lux) European Smaller Cap - Class I Acc Shares - Euro CT (Lux) European Smaller Cap - Class R Acc Shares - Euro CT (Lux) Global Absolute Return Bond - Class F Acc Shares - GBP (Hedged) CT (Lux) Global Absolute Return Bond - Class I Acc Shares - GBP (Hedged) CT (Lux) Global Convertible Bond - Class A Shares - Euro CT (Lux) Global Convertible Bond - Class A Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class A Shares - GBP CT (Lux) Global Convertible Bond - Class A Acc Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class A Acc Shares - US\$ (Hedged) CT (Lux) Global Convertible Bond - Class Hong Kong A Shares - US\$ CT (Lux) Global Convertible Bond - Class I Shares - Euro CT (Lux) Global Convertible Bond - Class I Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class P Shares - Euro (Hedged) CT (Lux) Global Convertible Bond - Class R Shares - Euro CT (Lux) Global Smaller Cap Equity - Class A Shares - US\$ CT (Lux) Global Smaller Cap Equity - Class A Acc Shares - Euro CT (Lux) Global Smaller Cap Equity - Class A Acc Shares - US\$ CT (Lux) Global Smaller Cap Equity - Class I Acc Shares - GBP CT (Lux) Global Total Return Bond - Class I Acc Shares - Euro CT (Lux) Responsible Euro Corporate Bond - Class X Shares - GBP (Hedged) CT (Lux) Responsible Global Emerging Markets Equity - Class A Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class A Acc Shares - CHF CT (Lux) Responsible Global Emerging Markets Equity - Class I Acc Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - CHF CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - Euro CT (Lux) Responsible Global Emerging Markets Equity - Class P Acc Shares - US\$ CT (Lux) Responsible Global Emerging Markets Equity - Class R Acc Shares - CHF

The Directors intend to issue the annual investor report on or around 31 March each year via the CT Website (This information is unaudited).

9. RELATED PARTY TRANSACTIONS

For certain share classes, CTML may be entitled to a placing and/or introductory fee of not more than 5% of the subscription value of the Fund shares. Out of this fee, stockbrokers or other approved introducing agents may be paid a proportion.

Patrick Johns (Chairman) is a non-executive adviser to Columbia Threadneedle Investments.

Jacques Elvinger, a Director of the Fund, is a partner in the Luxembourg law firm Elvinger Hoss Prussen, société anonyme. Mr Elvinger has been an Avocat à la Cour, Luxembourg since 1984.

Ailbhe Jennings, a Director of the Fund, is non-executive adviser to Columbia Threadneedle Investments, a subsidiary of Columbia Threadneedle Management Limited.

Notes to the Financial Statements (continued)

as at 31 March 2023

Rogier van Harten, a Director of the Fund, is Head of Institutional Distribution for Continental Europe, Columbia Threadneedle Netherlands B.V., a subsidiary of Columbia Threadneedle Investments.

Tina Watts, a Director of the Fund, is Head of Operations EMEA, Columbia Threadneedle Investments.

The Fund has entered into an Agency Agreement for the lending of securities in return for a loan fee. During the period under review, State Street Bank International GmbH, London Branch earned EUR 9,530 as securities lending agent. The Investment Managers earned EUR 6,353 for monitoring and oversight of the securities lending program.

No marketing expenses or distribution fees were charged to the following Portfolios:

CT (Lux) Euro Bond CT (Lux) Plus II*

Any costs incurred in relation to the distribution of these Portfolios/Share Classes (if any) will be borne by CTML.

CTML may pass on to the Fund certain approved expenses incurred in the marketing of the Fund. The maximum chargeable during any accounting period is 0.025% of the net asset value of the Fund as the respective Portfolio(s).

CTML may also charge a fee to the Fund to cover the costs incurred in the distribution of the Fund in the various jurisdictions in which it is registered. The amount to be charged during any accounting period may not exceed 0.05% of the net asset value of the Fund or the respective Portfolio(s).

No marketing expenses or distribution fee will be charged to the Hong Kong Share Classes of any Portfolio. Any costs incurred in relation to the distribution of the Hong Kong Share Classes (if any) will be borne by CTML.

CTML is entitled to an annual service fee of 0.015% of the equity and bond investments of the Portfolios making use of its Responsible Engagement Overlay services as described in the Prospectus. This service is not charged to the Hong Kong Share Classes for any Portfolio.

10. STATEMENT OF CHANGES IN INVESTMENTS

A list, specifying for each Portfolio the total purchases and sales which occurred during the period under review, may be obtained, upon request, at the registered office of the Fund and the Fund's Registrar/Administrative Agent, Depositary, or Paying Agent in the relevant jurisdiction.

11. PERFORMANCE FEE

No performance fees were charged to any of the Portfolios during the period.

12. SOFT COMMISSIONS ARRANGEMENTS AND OTHER SIMILAR ARRANGEMENTS

Since the implementation of MiFID II, in January 2018, all third party investment research consumed by investment teams in EMEA, were paid for directly by Columbia Threadneedle Investments. The use of Commission Sharing Agreements ceased at the end of December 2017 and since then, Client Portfolios have only incurred execution-related commission costs.

13. SECURITIES LENDING

The volume of the securities lending transactions will be kept at an appropriate level. The Fund will be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It will be ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with the investment policy.

The income earned from the securities lending program is reflected net of fees in the Statement of Operations and Changes in Net Assets.

State Street Bank International GmbH, London Branch as the securities lending agent receives a 15% fee for their services. The Investment Manager as the Fund's securities lending co-ordinator receives an administration fee of 10% to cover operational costs. There is no hidden revenue. As a result, the Fund receives 75% of the gross revenue generated from securities lending. It is the Investment Manager's policy to return all revenue to the Fund less direct and indirect operational costs.

The table below shows the market value of securities on loan as well as the market value of collateral held as at 31 March 2023. The collateral held at this date provided coverage of 101.00%.

Notes to the Financial Statements (continued)

as at 31 March 2023

During the period ended to 31 March 2023, dividends with an ex-dividend date of 20 January 2023 were paid out to shareholders on 31 January 2023 as follows:

			Amount of
			Dividends
	Share class	Dividend	paid out to
Share class Name	Currency	per Share	Shareholders
CT (Lux) Responsible Global Emerging Market Equity - Class A Shares - US\$	US\$	0.0347	171,106
CT (Lux) Responsible Global Equity - Class P Shares - GBP	GBP	0.0467	17,865
CT (Lux) Responsible Global Equity - Class R Shares - Euro	Euro	0.1004	505,315
CT (Lux) SDG Engagement Global Equity - Class R Shares - GBP	GBP	0.0314	94,143

For all distributing classes of shares which have registered for United Kingdom Reporting Fund Status it is intended to distribute 100 percent of reportable income (computed in accordance with the definition of reportable income under the United Kingdom Offshore Funds (Tax) Regulations 2009 (as amended)) which accrues to the Portfolio or distributing class, however it should be noted that this cannot be guaranteed. It may be that the Directors consider in certain cases that the amounts available for distribution are so minimal that a distribution is not commercially viable. Where Share Classes have not been registered for UK Reporting Fund Status, the Directors will determine an alternative basis for determining the level of any dividend.

The Board may decide to make dividend payments to Shareholders once a year or more frequently provided that no payment will be made as a result of which the total net assets of the Fund would become less than the minimum required by Luxembourg law.

15. SWING PRICING

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Portfolio. In order to prevent this effect, called "dilution", the Board may determine that a "swing pricing" methodology applies so as to allow for the Net Asset Value per Share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Portfolio if the net capital activity exceeds, as a consequence of the aggregate transactions in that Portfolio on a given Valuation Date (as defined in the Prospectus), a threshold (the "Threshold") set by the Board from time to time.

Description of the swing pricing methodology:

If the net capital activity on a given Valuation Date leads to a net inflow/outflow of assets in excess of the Threshold in the relevant Portfolio, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Portfolio is adjusted upwards/downwards by the swing factor set by the Board from time to time.

The swing factor shall not exceed 2% of the Net Asset Value per Share of the relevant Portfolio. Further, for the purpose of calculating the expenses of a Portfolio which are based on the Net Asset Value of the relevant Portfolio (including any applicable performance fee), the Administrative Agent will continue to use the un-swung Net Asset Value.

The swing pricing mechanism was in place for all sub funds except CT (Lux) Responsible Global Emerging Markets Equity during the financial period.

16. SIGNIFICANT EVENT

COVID-19

The outbreak of Coronavirus (COVID-19), declared by the World Health Organisation ("WHO") as a global pandemic in March 2020 and has impacted many aspects of daily life and the global economy since this date. There has been no official change to its status as a pandemic, but this is expected in 2023 as the crisis is now considered broadly stable. We continue to be informed of new variants impacting different regions. The number of infections continue to increase but there is continued focus on rollout of vaccine programmes and a significant drop in recorded mortality rates. Most travel movements and operational restrictions implemented by many countries have returned to normal. While many economies globally have reopened the pace of recovery has varied from country to country and most countries also now impacted by the rising inflation as a global phenomenon. As we progress through 2023, there continues to be potential unforeseen economic consequences from this virus and market reaction to such consequences could be rapid and unpredictable and vary from country to country.

The Directors together with the Manager will continue to monitor business continuity and resilience processes with the objective of mitigating any ongoing impact of COVID-19.

Impact of Russia-Ukraine Conflict

The events arising in Ukraine during Q1 2022 has impacted securities related to companies domiciled in, or linked to, Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ('Russian Securities').

CT (Lux) Responsible Global Emerging Markets Equity holds one investment, Moscow Exchange MICEX-RTS PJSC, with exposure to Russia. This security accounted for 0.63% of CT (Lux) Responsible Global Emerging Markets Equity prior to being written down to Nil in March 2022. This security continues to be valued at Nil as at 31 March 2023.

Columbia Threadneedle (Lux) III Notes to the Financial Statements (continued)

as at 31 March 2023

Sectoral financial and investment restrictions are in place in the Russia sanctions regime which restrict specified activities. These include restrictions on dealing with transferable securities or money-market instruments. The Directors have appointed State Street as Administrator to monitor the sanctions activity globally to ensure the portfolios are in adherence. The Administrator continues to monitor the investor base with respect to sanctions. If any sanctioned investors are identified, the Administrator will inform the Directors, the Company's MLRO, the Manager, and the Investment Manager and will remediate following appropriate policies and procedures.

17. SOCIALLY RESPONSIBLE INVESTMENT

CTML is convinced that investors increasingly care about environmental, social and corporate governance (ESG) issues and that these may have a material impact on the companies in which we invest. Therefore the Fund has appointed CTML to engage with companies held by the portfolios in order to improve the ESG performance and safeguard investor value. The Responsible Engagement Overlay service, known as reo®, aims to encourage companies to behave more responsibly with regard to social, environmental and corporate issues, in ways that are consistent with shareholder values. The objective of reo® is to encourage investee companies to enhance their business performance by adopting better corporate governance, social and environmental practices. reo® does not entail taking a view of acceptability of what investee companies do nor does it lead to exercising a significant influence over the management of such companies. reo® is about using CTML ability, as manager of the Fund's equity and bond Portfolios, to encourage investee companies, through a constructive dialogue, to behave more responsibly with regard to corporate governance, social and environmental practices. In CTML's view, reo® may contribute towards business success and therefore increase the value of the investee companies' shares and consequently the value of the Fund's investments. More information on reo® and the specific companies engaged via the reo® service is available on www.columbiathreadneedle.com.

18. APPROVAL OF THE FINANCIAL STATEMENTS

The Board approved the financial statements on 22 May 2023.

Remuneration

REMUNERATION POLICY

Carne Global Fund Managers (Luxembourg) S.A.

The Management Company has designed and implemented a remuneration policy (the "Remuneration Policy") in line with the provisions on remuneration as set out by the European Directive 2009/65/EC ("UCITS Directive"), as amended by Directive 2014/91/EU ("UCITS V Directive") as implemented into Luxembourg in the Law of 10 May 2016 (the "2016 Law").

The Management Company has developed and implemented remuneration policies and practices that are consistent with and promote sound and effective risk management of the Fund, do not encourage risk-taking which is inconsistent with the risk profiles/rules governing the Fund, and do not impair compliance with the Management Company's duty to act in the best interest of the Fund and ultimately its investors.

The Board of Directors of the Management Company is responsible for the design, implementation and regular review of the Remuneration Policy. In reviewing the Remuneration Policy, the Board of Directors of the Management Company will consider whether the remuneration framework operates as intended and ensure that the risk profile, long-term objectives and goals of the Fund are adequately reflected. No material amendments were made to the Remuneration Policy and no irregularities were uncovered during the period under review. The current version of the Remuneration Policy is available on the Management Company's website.

Proportion of the total remuneration of the staff of the UCITS attributable to COLUMBIA THREADNEEDLE (LUX) III as of December 31, 2022¹.

The proportion of the total remuneration attributable to Columbia Threadneedle (Lux) III has been calculated on a pro rata basis of assets under management and on the basis of the number of funds managed by the Management Company.

CT Group Company	Number of beneficiaries	Total remuneration (EUR) ²	Fixed remuneration (EUR)	Variable remuneration (EUR)
Total remuneration paid to Identified Staff ³ by the Management Company during the financial year	26	4,219,616	104,523	49,493

¹31 December is the financial year end of the Management Company

The Chief Executive Officer and Country Head of Luxembourg and the Head of Compliance are also Conducting Officers and are therefore captured in footnote 3 under the Conducting Officers.

CT Group (below note refers to CT Group only)

In accordance with the UCITS V Directive, the Investment Managers to the Fund have adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the Columbia Threadneedle Investments (EMEA) Remuneration Policy. The size of the CT Group (the "Group") and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Report on Remuneration

This section of the annual report has been prepared in accordance with Article 14a(4) of Directive 2009/65/EC, as amended by Directive 2014/91/EU ("UCITS V Directive") and the Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code).

In accordance with the UCITS V Directive, the Investment Managers has adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the Columbia Threadneedle Asset Management (EMEA) Remuneration Policy. The size of the CT Group (the 'Group') and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Remuneration policy

The purpose of the Group's remuneration policy is to describe the remuneration principles and practices within the Group and for such principles and practices:

- (a) to be consistent with, and promote, sound and effective risk management;
- (b) to be in line with the business strategy, objectives, values and interests of the Group;
- (c) not to encourage excessive risk-taking as compared to the investment policy of the relevant sub-funds of the Group;

²Total remuneration = sum of fixed remuneration and variable remuneration paid to identified staff of the Management Company during the Management Company's financial year

³Identified Staff comprises = Chief Business Development Officer, Senior Business Development Officer, Person responsible for the Permanent Risk Function, Carne's Responsable du Contrôle, Conducting Officers of the Company, Head of Legal, Directors of the Company, members of the Investment Committee and members of the Valuation Committee.

Columbia Threadneedle (Lux) III Remuneration (continued)

(d) to provide a framework for remuneration to attract, motivate and retain staff (including directors) to which the policy applies in order to achieve the objectives of the Group; and

(e) to ensure that any relevant conflicts of interest can be managed appropriately at all times.

Decision making and governance

The board of directors (the Group's Board) is responsible for the remuneration policy of the Group and for determining the remuneration of the directors of the Group and other staff who undertake professional activities for the Group. The Group's Board has delegated to the Risk and Remuneration Committee (the "Committee") of Columbia Threadneedle Investments (formerly BMO Asset Management (Holdings) plc) responsibility for maintaining a compliant remuneration policy. The Committee solely comprises non-executive directors of Columbia Threadneedle Investments. The Group's Board has adopted the remuneration policy applicable to all members of the Group ("Columbia Threadneedle Investments (EMEA)") for this financial year as reviewed and approved by the Committee periodically (at least annually). The Committee is responsible for, and oversees, the implementation of the remuneration policy in line with the UCITS Regulations. The Group's Board considers that the members of the Committee have appropriate expertise in risk management and remuneration to perform this review.

Applicability

The remuneration policy, which incorporates compliance with UCITS V requirements, applies to staff whose professional activities have a material impact on the risk profile of the Group or of the funds it manages ("Identified Staff") and so covers:

- a) senior management;
- b) risk takers;
- c) control functions; and
- d) employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profile of the Company.

The Identified Staff list and the selection criteria above are subject to regular review (at least annually) by the Committee as well as formally reviewed in the event of significant organisation changes and changes in remuneration regulations the Group is subject to.

Linking remuneration with performance

The Company's remuneration policy is part of the Columbia Threadneedle Investments (EMEA) framework for promoting sound remuneration management, with the objective of providing total compensation to its employees that is warranted by corporate, business unit/function and individual performance and is comparable to market competitors, whilst being consistent with and promoting sound and effective risk management and the achievement of fair outcomes for all customers. Its purpose is to facilitate achievement of the business objectives and corporate values of the Company, with the primary focus on clients, whilst ensuring that Columbia Threadneedle Investments (EMEA) is able to attract, retain and motivate the key talent required to achieve these business objectives and corporate values without incentivising excessive or inappropriate risk.

When setting remuneration levels, the following components and principles form part of the remuneration management framework:

- Fixed remuneration is determined taking into account factors including the requirements of the particular role and the staff
 member's experience, expertise, contribution level and the fixed pay for comparable roles. Fixed remuneration is set, with
 reference to market data, at a level that is sufficient to attract high calibre staff as well as to permit the operation of a fully-flexible
 remuneration policy (including the possibility of a staff member receiving reduced or no variable remuneration in a particular year).
 The Committee keeps the balance between fixed and variable remuneration under review.
- Variable remuneration is determined annually by reference to both financial and non-financial company performance considerations. External competitor practices are included in the funding review to ensure compensation opportunities in the markets within which the Group operates are given due consideration and retention risks are effectively managed. Incentive funding is developed in view of current and projected economics and risks, supported by Columbia Threadneedle Investments (EMEA) Audit and Compliance Committee inputs, ensuring risk-adjustments and qualitative and quantitative considerations, such as the cost and quantity of capital and liquidity are actively considered as funding adjustments. The Committee ensures that all incentive awards are not paid through vehicles or methods that facilitate the avoidance of the requirements with regard to remuneration imposed by applicable law and/or regulations.
- Variable remuneration is allocated to respective business functions by reference to:
 - · contribution of the respective business function or unit to corporate performance;
 - business function performance relative to pre-determined targets and objectives, including adherence to risk management obligations; and
 - competitive market pay data.

Individual award allocations are referenced to the individual achievement during the performance year relative to pre-agreed objectives and assessment of market comparability. Performance is assessed in relation to pre-agreed objectives, which include financial and non-financial goals (including the achievement of fair customer outcomes), compliance with the CT Group's policies and procedures, adherence to risk management and compliance requirements and the CT Code of Conduct. The assessment of performance for Identified Staff reflects multi-year performance in a manner appropriate to the life-cycle of the funds that are managed by the Group.

Columbia Threadneedle (Lux) III Remuneration (continued)

 Application of Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code) pay-out process rules, save for disapplication at individual or Group level, which is determined by an annual proportionality assessment.

Quantitative remuneration disclosure

The total remuneration paid by Columbia Threadneedle Management Limited to its staff is zero, as all UCITS staff are employed by other companies in Columbia Threadneedle Investments (EMEA).

The table below provides an overview of aggregate total remuneration paid to UCITS Identified Staff in respect of the proportion of their pay aligned to their UCITS responsibilities. It is not possible to apportion remuneration by individual Identified Staff working a specific UCITS fund, therefore figures are provided in aggregate on a UCITS management company basis.

Columbia Threadneedle Fund Management Limited	Headcount	Fixed Remuneration (£m)	Variable Remuneration (£m)	Total Remuneration (£m)
Remuneration of UCITS Identified Staff of which:	35	0.49	1.15	1.64
Senior Management	12	0.17	0.37	0.54
Other Code Staff	23	0.32	0.78	1.10

Notes on the quantitative remuneration disclosure

Total remuneration reported is the sum of salary, cash bonus, any deferred annual bonus, value of any long-term incentive awards granted in respect of performance in the reportable financial year, plus the value of any applicable cash allowances.

"Senior Management" are defined in this table as the UCITS Directors, Executive and Non-Executive Directors and Group Management Team members of Columbia Threadneedle Investments. "Other Code Staff" includes all other identified Code staff in business areas, internal control functions and corporate functions.

The Identified Staff disclosure represents total compensation of those staff who are fully or partly involved in the activities of the UCITS funds, apportioned to the estimated time relevant to the UCITS or to the amount attributable to the UCITS allocated on an AUM basis.

Columbia Threadneedle (Lux) III **Portfolio Turnover Ratio**

The Portfolio Turnover Ratio have been calculated for the period ended 31 March 2023 based on the following formula:

PTR=	(Total purchases + Total sales) - (Total subscriptions + Total redemptions)	x 100
1 111	Average net assets of the Portfolio	χ 100

Portfolio	Portfolio Currency	Total Net Assets, average during the period	Portfolio Turnover Ratio as of 31 March 2023 (annualised) %
CT / Lux/ Diversified Crouth	Euro	100 205 444	91.63%
CT (Lux) Diversified Growth		109,295,444

Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of share.

Global data

The following table details the market value of securities lent as a proportion of the relevant Portfolio's total lendable assets and Net Assets, and the value of Total Return Swaps ("TRS") as a proportion of the Portfolio's Net Assets, as at 31 March 2023. Total lendable assets represents the total market value of the securities portfolio excluding derivatives as at the reporting date. The value of TRS is based on the Unrealised Gain/(Loss) on an absolute basis.

			TRS			
Portfolio	Portfolio currency	Market value of securities lent	% of lendable assets	% of Net	Unrealised profit/loss	% of Net

The above maturity tenor analysis has been based on the contractual maturity date of the securities lent, and of the relevant TRS transaction.

The following table provides an analysis of the non cash collateral received for the securities lending transactions and OTC by clearing mechanism indicating as well the triparty agent and the bilateral, as at 31 March 2023:

	Security lent non cash collateral received	OTC non cash collateral received
Triparty		
JP Morgan Chase Bank	2,163,495	-
Bank of New York	3,522,139	-
Total	5.685.634	-

	Security lent non cash collateral received	OTC non cash collateral received
Triparty		
bilateral	2,113,127	948,749

Data on reuse of collateral

As at 31 March 2023, none of the cash collateral received in respect of OTC derivative transactions (including TRS) was re-invested. In respect of securities lending transactions, the Fund does not accept cash collateral in the securities lending program.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Safekeeping of collateral

The following table provides an analysis of the amounts of non-cash collateral received by the Portfolios in respect of securities lending transactions and OTC derivatives transactions (including TRS) and held by the Funds' Depositary (or through its delegates) or through a third party Depositary, as at 31 March 2023:

Data on return and cost

For the securities lending transactions the breakdown of return and cost by portfolio is disclosed in the Notes. Please refer to the note "Securities lending".

All returns from OTC derivative transactions (including TRS) will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

For TRS transactions costs are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains and change in unrealised appreciations on swaps contract during the reporting period.
