The value of shares or units in undertakings for collective investment shall be determined on the basis of the last net asset value available.

The value of cash in hand or on deposit, notes and bills payable on demand and all accounts receivable, prepaid costs, dividends and interest due but not yet received shall correspond to the full per value, unless it proves to be unlikely that the full value shall be received; in which case the value shall be calculated by subtracting a certain amount which appears to be appropriate in order to reflect the true value of such assets.

The valuation of transferable securities and money market instruments listed or traded on an official stock market or other regulated market which operates regularly and is recognised and open to the public, shall be based on the last known price and if that transferable security / money market instrument is traded on several markets, on the basis of the last known price on the principal market for that security or instrument. If the last known price is not representative, the valuation shall be based on the probable realisation value estimated with prudence and in good faith by the Board of Directors of the SICAV.

Securities not listed or traded on an official stock exchange or on another regulated market which operates regularly and is recognized and open to the public shall be valued on the basis of their probable sale price as estimated prudently and in accordance with the principle of prudence and good faith by the Board of Directors of the SICAV.

One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity.

Total return swaps are marked to market at each NAV calculation date. The unrealised appreciation/depreciation is disclosed in the Statement of net assets under “Net Unrealised gain/(loss) on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/depreciation as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

Note 11 - Swaps

Total Return Swaps

A Total Return Swap (TRS) is an agreement to exchange the total performance of a bond or other underlying asset (share, index, etc.) usually for a benchmark rate plus a spread. The total performance includes the interest coupons, dividends and profits and losses on the underlying asset over the life of the agreement, depending on the type of underlying concerned. The risk in this type of agreement is linked to the fact that the benefit for each counterparty will depend on how the underlying asset performs over time, which is unknown at the time at which the agreement is entered into.

Notes to the financial statements at 30/06/2024

Note 13 - Performance fees

The Sub-fund pays out of its assets a Performance Fee to the Management Company. A part of this Performance Fee limited to 50% of the Performance Fee may be paid out by the Management Company to the Investment Adviser, in addition to the Investment Adviser fee.

Performance Fees provision is adjusted on each Valuation Day during the fiscal year.

The Performance Fee is equal to the percentage of the positive difference between the performance of the Sub-fund and the Hurdle Rate of the Net Asset Value per Share of the Class multiplied by the number of Shares outstanding in respect of each Performance Period subject to a High Water Mark Model.

If the Net Asset Value per Share of a given Class underperforms the Hurdle Rate during a Performance Period as described below, the provisions made in respect of the Performance Fee is reduced accordingly. If these provisions fall to zero, no Performance Fee is payable.

The High Water Mark is the greater of:

- a) the highest Net Asset Value per Share at the end of a Performance Period on which a Performance Fee has been paid; and
- b) the initial Net Asset Value.

If the Net Asset Value is lower than the High Water Mark no provision for the Performance Fee is made. When using this High Water Mark Model, a Performance Fee cannot be charged until previous losses are recovered and especially if a Class performance is negative during a Performance Period as described below.

The Performance Fee is calculated on the basis of the Net Asset Value after deduction of all expenses, liabilities, and Management Fees (but not Performance Fee).

In the event that a Shareholder redeems Shares prior to the end of a Performance Period, any accrued but unpaid Performance Fee in respect of such Shares will be kept and paid to the Management Company at the end of the relevant Performance Period.

The Performance Fee is payable annually at most in arrears in respect of each Performance Period. For a given Class, the first Performance Period will be from the latest date between the ABSOLUTE ALPHA Restructuring Date and the Class Launch Date (the "Class Performance Fee Starting Date") until the end of the first full Fiscal Year at which a Performance Fee is payable following the Class Performance Fee Starting Date.

The subsequent Performance Period starts from the beginning of each following Fiscal Year until the end of the relevant Fiscal Year when a new Performance Fee is payable.

Performance fees payable by the Sub-fund THEAM Quant - LFIS Selection:

Transaction fees incurred by the Fund relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of standard fees, sundry fees on transaction, stamp fees, brokerage fees, custody fees, VAT fees, stock exchange fees and RTO fees (Reception and Transmission of Orders).

In line with bond market practice, a bid-offer spread is applied when buying and selling these securities. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's fee.

Total Expense Ratios

The Total Expense Ratio (TER) is the sum of Management Fees and Other Fees for the period, as a proportion of the average net assets of the unit class. Management Fees are calculated on the basis of the average net assets of the previous month for each unit class.

Other Fees include all other fees (auditor's fees, cost of net asset value publication, "taxe d'abonnement" (subscription tax), etc.) and commissions (depositary, administrative agent, etc.) with the exception of fees and commissions linked to transactions.

In the specific case of sub-funds and unit classes launched during period, the TER has been calculated on the basis of Management Fees and Other Fees recognised since launch and extrapolated over a 12-month period.

For the period from 1 July 2023 to 30 June 2024, the TER is :
