What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The Sub-Fund's objective is to target returns in excess of nominal Asian GDP growth (gross domestic product) over the medium to long term. It will do so by investing in under-valued companies capable of sustaining high economic returns.

Investment policies The Sub-Fund's investment strategy will be unconstrained by any benchmark index, and it will be focused on achieving absolute returns over the longer term.

The portfolio is expected to consist primarily of equity securities including convertible bonds and, on an ancillary basis, warrants on transferable securities.

The portfolio is expected to consist primarily of equity securities including convertible bonds and, on an ancillary basis, warrants on transferable securities. In addition the Sub-Fund may also invest in other transferable securities such as but not limited to debt securities, money market instruments, term deposits, nil and partly paid securities, cash and near cash.

The use of derivatives will typically be limited to efficient portfolio management and any wider use of derivatives would not be for the purpose of raising the risk profile. Hedging techniques may be used.

The portfolio will invest directly or indirectly primarily in equities of companies based in Asia or carrying out significant business activities in Asia. Exposure to such instruments will be limited to 10% of NAV with any individual counter party.

No more than 10% of the assets of the Sub-Fund may in aggregate be invested in units or shares of other UCITS or UCIs (including money market funds).

Ancillary liquid assets (i.e. bank deposits at sight) will be limited to 20% of the Cadence Strategic Asia Sub-Fund's net assets.

Up to 100% of the Sub-Fund's net assets may be invested in short-term negotiable debt securities, money market instruments, time deposits and/or money market funds, under very specific market conditions such as the 2008 Lehman Brothers bankruptcy, understanding these investments will comply with all applicable investment restrictions in terms of eligibility and legal and/ or specific risk diversification.

However, more than 50% of its gross assets will be invested, on an ongoing basis, in equity participations.

For full investment objectives and policy details please refer to the Prospectus and the Prospectus Supplement.

Benchmark The Sub-fund is actively managed. MSCI AC Asia Ex Japan Index USD is used only for the purpose of calculating the performance fee as fully described in the Prospectus.

Redemption and Dealing Investors may purchase or sell shares of the Sub-Fund on any business day in Luxembourg.

Distribution Policy Any income generated by the Sub-Fund is reinvested to grow the value of the shares.

Launch date The Sub-Fund was launched on 17/04/2015 and the share class was launched on 27/11/2020.

Fund Currency The reference currency of the Sub-Fund is EUR and the currency of the share class is USD.

Conversion of units/shares Shareholders are allowed to request the conversion of all or part of their shares into shares of another class/sub-fund subject to the conditions and fees detailed in the prospectus of the Fund.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://funds.waystone.com/public>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 May 2021 and 31 October 2023.

Moderate: this type of scenario occurred for an investment between 30 September 2014 and 30 September 2019.

Favourable: this type of scenario occurred for an investment between 26 February 2016 and 26 February 2021.

What happens if Compass Asset Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	157 USD	1,062 USD
Annual cost impact*	1.6%	1.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.2% before costs and 5.5% after costs.
