

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

JPM ESG EMBI GLOBAL DIVERSIFIED COMPOSITE, a Subfund of the SICAV BNP PARIBAS EASY

Class "Track X Distribution" - ISIN code LU1953137178

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The Fund is an index-tracking passively managed fund.

The Fund seeks to replicate (with a maximum tracking error* of 1%) the performance of the JPM ESG EMBI Global Diversified Composite (TR) Index (the «Index») by investing in the debt securities issued by countries included in the Index, respecting the Index's weightings (full replication), or in a sample of debt securities issued by countries included in the Index (optimised replication).

When investing in a sample of debt securities, the Fund's tracking error may be higher.

*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its reference index.

A dividend may be distributed.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

Risk and Reward Profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?

The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.

- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the "Investment risks" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.

Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No
Exit charge	No
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year	
Ongoing charges	0.13%
Charges taken from the fund under specific conditions	
Performance fee	No

The ongoing charges figure is based on past expenses determined as of 31 October 2020

This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

In addition, the investor's subscription, conversion or redemption order may be subject to an anti-dilution levy (maximum 2% for subscription or conversion in, and maximum 1.5% for redemption or conversion out) paid to the sub-fund in order to cover transaction costs.

In case of conversion, no fee will be charged.

For more information about charges, please see the "Fees and Costs" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.

Past Performance

- Performance figures are shown for shares classes, for which NAV was continuously calculated during the period from 1st January to 31st December.
- Past performance is not an indicator of future results.
- The ongoing charges of the Fund are included in the calculation of past performance.
- The share class came into existence in 2019
- Past performance has been calculated in USD
- Performance returns are based on the net asset value with distributable income reinvested.
