## What is this product?

### TYPE OF PRODUCT

The product is a Sub-Fund of Protea Fund, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Sub-Fund is established for an unlimited duration. However, the board of directors may also propose to dissolve a compartment at a General Meeting of that compartment.

### OBJECTIVES

#### Objectives and investment policy

The Sub-Fund Protea Fund – Dogma Renovatio Credit Fund (the "Sub-Fund") is a medium risk vehicle aiming to provide reward on capital. The Sub-Fund aims to invest in companies active into the Energy sector and its industrial renovation called "Energy Transition". Hence, together with the Fossil Fuels based companies the Sub-Fund will invest into the Renewable Energy sources via companies directly or indirectly correlated to these sectors. The Sub-Fund will be suitable for conservative investors, for whom income and preservation of principal are their primary objectives over the long term. Hence it requires an investment horizon of at least 5 years. However, investors should be aware that the preservation of capital is not guaranteed.

The Sub-Fund aims to provide capital preservation and income by mainly investing in a diversified portfolio of debt instruments (including money market instruments):

- issued by companies active in the energy sector, from fossil-based (such as but not limited to oil, gas, energy equipment, utilities, etc.) to renewable energy (such as wind energy, solar energy, alternative energies); and/or
- issued by companies active in the materials sector (such as but not limited to metals and mining, chemicals, etc.); and/or
- issued by governments having a large dependency on fossil-based energy revenues (such as but not limited to Saudi Arabia, Qatar, United Arab Emirates, Canada, Brazil, Norway, etc.).

In exceptional circumstances, where targeted companies of the energy sector have no available debt securities issued on the market or where these securities present a low expected return, the Investment Manager (defined below) intends to gain exposure via equity and equity related securities (ADR (American Depository Receipt), GDR (Global Depository Receipt)).

There can be no assurance that the investment objective will be achieved.

The choice of investments will neither be limited by geographical area (including emerging markets), nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single currency.

On an ancillary basis (up to 49% of its net assets), the Sub-Fund may also invest directly in the assets listed below:

- Debt securities issued or guaranteed by an OECD Member State or by their local public authorities or by supranational institutions, up to 49% of its net assets.
- Investments in units or shares of UCITS and/or other UCIs as referred to in Section 23.3(e) of the main body of the prospectus, shall not exceed 10% of the net assets of the Sub-Fund.
- Convertible Bonds up to 20% of the net assets of the Sub-Fund.
- Cash and cash equivalents, including money market instruments up to 49% of the net assets of the Sub-Fund.
- Structured products with or without embedded derivatives up to 20% of the net assets.

**Derivatives** For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments traded on a Regulated Market and/or OTC.

**Benchmark** The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

**Dividend Policy** This Class is cumulative. Dividend distributions are not planned.

**Share Class Currency** The currency of the Class is USD.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

The return of the product is determined using the Net Asset Value (the "NAV") calculated by the Central administration. This return depends mainly on the market value fluctuations of the underlying investments.

### INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

### OTHER INFORMATION

**Depositary** Pictet & Cie (Europe) S.A. (the "Depositary").

**Asset segregation** The assets and liabilities of each sub-fund are segregated by law, which means that the performance of the assets in other sub-funds does not influence the performance of your investment.

**Dealing** The Net Asset Value for the Class is calculated weekly on Wednesday bank business day in Luxembourg based on the pricing of the preceding bank business day ("the Transaction Day"). The cut-off time to submit subscriptions and/or redemptions orders is 2 p.m. Luxembourg time on the Transaction Day.

**Switching** Shareholders may apply for any shares of any sub-funds to be converted into shares of another sub-fund, provided that the conditions for accessing the target class or sub-fund are fulfilled with respect to this sub-fund, on the basis of their respective net asset value calculated on the valuation day following receipt of the conversion request. The redemption and subscription costs connected with the conversion may be charged to the shareholder as indicated in the prospectus. For more details about how to switch between sub-funds, please refer to the prospectus.

**Additional Information** More detailed information on this Sub-Fund, such as the prospectus, other classes, the key information, the latest Net Asset Value, the articles of incorporation as well as the latest annual and semi-annual report, can be obtained free of charge, in French, from the central administrator, the distributors, the Management Company or online at [www.swissfunddata.ch](http://www.swissfunddata.ch).

This key information document describes the Class of one Sub-Fund of the Fund. For more information about other sub-funds, please refer to the prospectus and periodic reports that are prepared for the entire Fund.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if your cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

<b>Recommended holding period (RHP): Example investment</b>	<b>5 years USD 10,000</b>	
	<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>

Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
<b>Stress scenario</b>	<b>What you might get back after costs</b>	USD 6,920	USD 3,140	
	Average return each year	-30.8%	-20.7%	
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	USD 8,000	USD 6,210	This type of scenario occurred for an investment in the proxy then the product between March 2015 and March 2020.
	Average return each year	-20.0%	-9.1%	
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	USD 9,560	USD 7,950	This type of scenario occurred for an investment in the product between June 2017 and June 2022.
	Average return each year	-4.4%	-4.5%	
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	USD 13,230	USD 9,740	This type of scenario occurred for an investment in the proxy then the product between June 2016 and June 2021.
	Average return each year	32.3%	-0.5%	

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if FundPartner Solutions (Europe) S.A. is unable to pay out?

The Management Company is not making any payment to you in relation to this Sub-Fund and you would still be paid in case of a default from the Management Company.

The Sub-Fund's assets are held with a separate company, the Depository, so the Sub-Fund's ability to pay out would not be affected by the insolvency of the Management Company. However, in the event of the Depository's insolvency, or its delegates, the Sub-Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depository is required by law and regulation to segregate its own assets from the assets of the Sub-Fund. The Depository will also be liable to the Sub-Fund or its investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations (subject to certain limitations).

If the Sub-Fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

There is no compensation or guarantee scheme protecting you from a default of the Depository.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested

Investment of USD 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	USD 637	USD 3,027
<b>Annual cost impact (*)</b>	6.4%	6.4%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.9% before costs and -4.5% after costs.

#### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee for this Class.	USD 0
Exit costs	We do not charge an exit fee for this Class.	USD 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	4.16% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 416
Transaction costs	2.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 202
Incidental costs taken under specific conditions		
Performance fees	Paid yearly equal to 15.00% of the performance of the NAV per share exceeding the high water mark multiplied by the number of shares in circulation during the calculation period. No performance fee will be due if the NAV per share before performance fee turns out to be below the high water mark for the calculation period in question. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	USD 18

## How long should I hold it and can I take my money out early?

#### Recommended holding period (RHP): 5 years.

The RHP was chosen to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

The Net Asset Value for the Class is calculated weekly on Wednesday bank business day in Luxembourg based on the pricing of the preceding bank business day ("the Transaction Day"). The cut-off time to submit subscriptions and/or redemptions orders is 2 p.m. Luxembourg time on the Transaction Day.

## How can I complain?

In the event a natural or legal person wishes to file a complaint with the Fund in order to recognize a right or to redress a harm, the complainant should address a written request that contains description of the issue and the details at the origin of the complaint, either by email or by post, in an official language of their home country to the following address:
