What is this product?

Type:

The Fund is a sub-fund of M&G (Lux) Investment Funds 1, a société d'investissement à capital variable (SICAV), organised as an umbrella fund with segregated liability between sub-funds. Governed and established under Luxembourg Law as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Objectives:

The Fund aims to provide a combination of capital growth and income that is higher than the global equities market over any five-year period.

Core investment: at least 80% of the Fund is invested in the shares of companies, across any sector and of any size, from anywhere in the world, including emerging markets. The Fund may invest in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

Other investments: the Fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned quickly into cash.

Derivatives usage: to reduce risk and costs.

Strategy in brief:

The Fund applies a systematic approach to the selection of stocks. Stocks are ranked on five key criteria or 'Factors': Value, Quality, Momentum, Volatility and Size. These rankings are then combined to provide a single 'score' for each stock. The weighting of each factor in the single score is determined by the investment manager. Historically, stocks exhibiting these characteristics (or Factors) have tended to deliver above-market returns (or equity premia). In constructing the portfolio, differences between the Fund's characteristics and those of its benchmark (such as sector, country or risk factor weightings) may be constrained. Managing the Fund in this way limits the degree by which the Fund's performance is expected to deviate from the benchmark.

Benchmark: MSCI ACWI Net Return Index

The benchmark is a comparator against which the Fund's performance can be measured. It is a net return index which includes dividends after the deduction of withholding taxes. The benchmark has been chosen as the Fund's performance comparator as it best reflects the scope of the Fund's investment policy. The benchmark also acts as a constraint on the Fund's portfolio construction, as certain limits, such as constraints on sector or geographic exposure, may apply at any given time. The Fund is actively managed. Within the given constraints, the investment manager has freedom in choosing which investments to buy, hold and sell in the Fund within the constraints defined. The Fund's portfolio holdings may deviate significantly from the benchmark's constituents. For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

Intended Retail Investor:

The Fund is for retail and institutional investors who want a combination of capital growth and income from a diversified portfolio that invests in a range of companies globally. The return on your Fund is directly related to the value of its underlying assets, which is determined by the market's view on how well each company is performing, as well as reflecting broader economic and political themes. As an investor your capital is at risk. The value of your portfolio, and any income you may receive from it, can go down as well as up. You may get back less than you originally invested.

Any income from the fund may be paid out to you annually.

Product Term: The Fund has no set maturity date but is designed to be held for a minimum of 5 years. However, it is possible for the Directors of the company to terminate the Fund, without the prior consent of the shareholders, where it is deemed to be uneconomic to run or in the best interests of shareholders. Refer to the Prospectus for more information.

What are the risks & what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund over the last 10 years. Markets could develop very differently in the future.

WHAT HAPPENS IF M&G Luxembourg S.A. IS UNABLE TO PAY OUT?

The assets of the Fund are held in safekeeping by the Depositary detailed in the prospectus. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). The Depositary is required by Luxembourg law to be member of the Fonds de Garantie des Dépôts Luxembourg (FGDL, the Luxembourg Deposit Guarantee Fund) <https://www.cssf.lu/en/protection-of-depositors-and-investors/>

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is CHF 10.000,00.

Table 1: Costs over time (Based on an investment of CHF 10.000,00)

Scenarios	1 year	If you exit after: 5 years*
Total costs	CHF 515,00	CHF 1.522,00
Impact on return (RIY) per year	5,10%	2,10%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10,25% before costs and 8,15% after costs. These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Table 2: Composition of costs

One-off costs		If you exit after: 1 year
