Vontobel Fund

Annual report including audited financial statements as of August 31, 2024

This document does not constitute an offer to purchase or subscribe to shares. Subscription to shares of the Sub-Funds of Vontobel Fund, a Luxembourg SICAV, should always be undertaken only on the basis of the Sales Prospectus, the Key Information Document (KID), the Articles of Association, and the annual and semi-annual reports (plus, in the case of Italy, the Modulo di Sottoscrizione). We also recommend that you contact your relationship manager or other advisors prior to each investment. An investment in Sub-Funds of Vontobel Fund involves risks, which are explained in the Sales Prospectus. All the above-mentioned documents and a list of the changes in the portfolio during the financial year and the composition of the benchmarks are available free of charge from Vontobel Fonds Services AG, Gotthardstrasse 43, CH-8022 Zurich, as representative in Switzerland; Bank Vontobel AG, Gotthardstrasse 43, CH-8022 Zurich, as paying agent in Switzerland; Erste Bank der oesterreichischen Sparkassen AG, Am Belvedere 1, A-1100 Vienna, as facilities agent for Austria; PwC Société coopérative – GFD, 2, Rue Gerhard Mercator, L-1014 Luxembourg as facilities agent for Germany; authorised distribution agencies and the registered office of the Fund, 49, Avenue J.F. Kennedy, L-1855 Luxembourg, or at www.vontobel.com/am.

The shareholders agree that Vontobel Fonds Services AG, Zurich, may consult entries in the register of shareholders in order to offer services to shareholders.

Report of the Board of Directors for the financial year from September 1, 2023 to August 31, 2024

Dear investors,

During the financial year under review, the assets of Vontobel Fund decreased by 0.20%, from CHF 29,937.45 million to CHF 29,879.06 million. This decrease in assets is primarily due to net outflows.

The following Sub-Fund was launched during the financial year:

Vontobel Fund –	Currency	Launch date
mtx Emerging Markets Leaders ex China	USD	20.09.2023

The following Share Classes were launched during the financial year:

Vontobel Fund –	Share Class	Currency	Launch date

Please find detailed information on the individual Share Classes and their respective performance during the financial year under review in the respective reports and statements.

For information on the events during and after the financial year, see points 14 and 15 of the Notes to the financial statements.

The Board of Directors points out that the statements contained in the auditor's opinion with respect to the statutory responsibility of the Board of Directors are exclusively those of the auditor. The responsibilities and obligations of the Board of Directors are regulated by law. The Board of Directors considers that it has met these obligations in their entirety.

The Board of Directors

Notes to the Financial Statements

1 General information

Vontobel Fund (hereinafter referred to as the "Fund") is an open-ended investment company with variable capital under Luxembourg law, incorporated on October 4, 1991 for an indefinite duration as a "Société d'Investissement à Capital Variable" ("SICAV") in accordance with the provisions of Part I of the amended Luxembourg Law of December 17, 2010 on Undertakings for Collective Investment. The Fund's financial year ends on August 31.

The legal basis for the Fund is laid down by the Articles of Association of the Fund. The Fund's Articles of Association were published for the first time on November 18, 1991 in the Luxembourg Official Gazette ("Mémorial C, Recueil des Sociétés et Associations-Mémorial") and last amended on April 30, 2016. They are filed with the Trade and Companies Register of the District Court of Luxembourg where they may be consulted and copies thereof may be obtained.

The Fund is registered in the Luxembourg Trade and Companies Register with registration number B38170.

The Fund is composed of several sub-funds ("Sub-Funds"), each of which represents a specific portfolio of assets and liabilities and is managed in accordance with its own specific investment objectives.

As at August 31, 2024, the Fund had the following Sub-Funds and Share Classes available:

Vontobel Fund –	Sub-Fund Currency	Distributing and accumulating Share Classes
Swiss Money	CHF	A, B, I, N, R
Euro Short Term Bond	EUR	A, AN, B, C, HN (CHF), HNG (CHF), I, N, NG, R

The Articles of Association permit the Fund's board of directors ("Board of Directors") at any time to issue various share classes ("Share Classes") within a Sub-Fund, the assets of these Share Classes being managed jointly. The Share Classes may, however, differ in their specific characteristics, e.g. with respect to their investor profile, fee structure, minimum investment amount, taxation and their distribution policy.

The Board of Directors may at any time decide to issue the Share Classes listed below for each Sub-Fund. Share classes may be issued in the reference currency of the Sub-Fund or in alternative currencies. If the alternative currency is hedged against currency fluctuations with respect to the reference currency of the Sub-Fund, this will be indicated by the addition of the letter "H" and the term "hedged" to the name of the Share Class. The net asset value and, accordingly, the performance of the corresponding hedged shares may differ from the net asset value of the corresponding shares in the reference currency.

Further details of available Share Classes can be obtained from the registered office of the Fund or the Management Company and are available along with current prices and KIDs at vontobel.com/am at any time. As noted below, certain Share Classes are reserved for specific investors. Not all Share Classes are available in all countries in which the Fund has been approved for distribution:

a) Share classes with entitlement to distributions:

- A-shares may be subscribed by any type of investor and distribute annually.
- AM-shares may be subscribed by any type of investor and distribute monthly.
- AQ-shares may be subscribed by any type of investor and distribute quarterly.
- AS-shares may be subscribed by any type of investor and distribute semi-annually.

The Board of Directors may, at its sole discretion, resolve on the amounts to be distributed to the shareholders.

The Board of Directors may decide to issue gross distributing share classes which may pay out distributions gross of fees and expenses. To achieve this, all or part of their fees and expenses may be paid out of capital, resulting in an increase in distributable income for the payment of dividends to such classes of shares. This may result in distribution of income and, in addition, both realized and unrealized capital gains, if any, and capital attributable to such Shares within the limits set up by Luxembourg law. Distribution of capital represents a withdrawal of part of an investor's original investment. Such distributions may result in a reduction of the net asset value per Share over time and the net asset value per Share may fluctuate more than other Share Classes. These gross distributing share classes will be indicated by the addition of the term "Gross" to the name of the Share Class entitled to distributions.

The use of income, and in particular any final distribution amount to be paid out, will be decided for each Share Class by the general meeting of Shareholders of the Fund, which may override the distribution provisions set out in the Sales Prospectus.

The Board of Directors may at any time decide to issue Share Classes with entitlement to distribution which are combined with characteristics of the following accumulation Share Classes (e.g. "AQG" share classes). These Share Classes will be entitled to distributions but provide apart from that the same characteristics as accumulation shares.

b) Non-distributing Share Classes (accumulating Share Classes):

- B-shares may be subscribed by any type of investor and are accumulating (no distribution).
- C-shares may be subscribed by any type of investor and are accumulating (no distribution). They are only available through specific distributors.
- E-shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the Law of 2010 and are accumulating (no distribution). The Board of Directors may at any time decide to close E shares for subscriptions by further investors upon reaching a certain amount of subscription monies. Such amount will be determined per Share Class per Sub-Fund. The Board of Directors reserves the right to determine the Management Fee per Share Class per Sub-Fund.
- F-shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the Law of 2010, which invest and hold at least 20 million in the currency of the Share Class or who have concluded a corresponding agreement with a company in the Vontobel Group. F shares are accumulating (no distribution) and shall be issued only by Sub-Funds which envisage a Performance Fee in the Special Part of the Sales Prospectus applicable to the relevant Sub-Fund; F shares shall provide a higher management fee than other share classes for institutional investors whereas a Performance Fee shall not be calculated for and not be charged to the F shares.

Notes to the Financial Statements

1 General information (continued)

- G-shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest and hold at least 50 million in the currency of the Sub-Fund. An investor is still considered eligible for this Share Class if the value of his holdings falls below the above minimum holding threshold due to market movements. G Shares are accumulating (no distribution).
- H-(hedged) shares may be subscribed by any type of investor and are accumulating (no distribution) and are issued in a currency other than the reference currency of the relevant Sub-Fund. The subscription currency of the Share Class is always hedged against the reference currency of the relevant Sub-Fund. However, the extent of the hedge may slightly fluctuate around the full hedge level.
- PH-(partially hedged) shares may be subscribed by any type of investor, are accumulating (no distribution) and are issued in a currency other than the reference currency of the relevant Sub-Fund. PH (partially hedged) shares will seek to hedge only exposure to the proportion of the main investment currency of the portfolio of a Sub-Fund against the currency of the Share Class. Investors should be aware that these Share Classes will retain a level of currency exposure to the other investment currencies of the Sub-Fund portfolio other than the main investment currency. This exposure can be significant. For example: The Reference Currency of a Sub-Fund is USD, the Share Class currency is CHF and the main part of the Sub-Fund's assets is invested in EUR. This PH CHF Share Class seeks to hedge only the proportion of the EUR portion of the Sub-Fund's portfolio against CHF. The PH CHF share class thus will retain currency exposure to the other investment currencies of the Sub-Fund's portfolio.
- I-shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law and are accumulating (no distribution).
- N-shares may be subscribed only:
 - by investors who are prohibited from accepting and retaining inducements from third parties under applicable laws and regulations or court rulings, such as in the United Kingdom and the Netherlands and
 - by investors with separate fee arrangements with their clients for the provision of discretionary portfolio management services or independent advice services or who have a separate fee arrangement with their clients for the provision of non-independent advice in cases in which they have agreed not to accept and retain inducements from third parties.

The shares are accumulating (no distribution) and do not grant any rebates or retrocessions.

- R-shares may be subscribed only by investors who are entitled, according to staff regulations of a Vontobel company, to hold shares in their respective account / deposit at Bank Vontobel AG, Zurich, according to employee terms or who have concluded a special agreement with a Vontobel company. It is therefore possible that these shares will be subscribed and held by persons who have access to non-public, material information in relation to the relevant Sub-Fund. In order to prevent conflicts of interest, the Vontobel Group and associated companies have issued corresponding directives, compliance with which is constantly monitored.
- S-shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which have concluded a corresponding agreement with a company in the Vontobel Group (including the Management Company) and are accumulating (no distribution). Neither management fee nor performance fee are charged for the S Share Class; Fees, if any, are charged directly by the contracting company in the Vontobel Group to the investor under the aforementioned corresponding agreement.
- U-shares may be subscribed by any type of investor and are accumulating (no distribution). Provisions governing issuance of fractions of shares are not applicable to U Shares. Converting U Shares into Shares of other Share Classes in the Fund is not permitted.
- V-shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law, who are a company in the Vontobel Group, or have a cooperation agreement with a company of the Vontobel Group. V Shares are accumulating (no distribution) and do not grant any rebates or retrocessions to the investors;
- X-shares may be subscribed only by institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest at least 50 million in the currency of the Share Class per initial subscription and who have concluded a corresponding agreement with a company belonging to the Vontobel Group. X shares are accumulating (no distribution).
- Y-shares are reserved exclusively for institutional investors in the sense of Art. 174 par. 2 lett. c) of the 2010 Law which invest and hold at least 500 million in the currency of the Share Class. An investor is still considered eligible for this Share Class if the value of his holdings falls below the above minimum holding threshold due to market movements. Y Shares are accumulating (no distribution).

The Board of Directors may at any time decide to issue Share Classes which provide a combination of various characteristics of Share Classes.

The above-mentioned Share Class types or combinations thereof may contain the additional denominations from "1" to "10". These Shares shall have the same architecture as the Share Classes from which they have been derived, but shall have one or another feature distinguishing them from the Share Classes from which they have been derived. Such special feature may include distributors who are domiciled in certain countries or carry out their business in those countries and who act on behalf of their own clients (who may be any type of investor) providing they fulfill the general eligibility criteria for the relevant Share Class, investors who have concluded a corresponding agreement with a company belonging to the Vontobel Group or similar.

Notes to the Financial Statements

1 General information (continued)

There is a required minimum investment and/or holding amount for the acquisition and/or holding of Shares in several Shares Classes as set out above. The Board of Directors or the Management Company, after taking into consideration the equal treatment of the shareholders, have discretion to permit a lower minimum investment/holding amount in qualifying cases.

If a holder of any Share Class does not or does no longer fulfil the criteria provided for an investor in this Share Class, the Fund shall be entitled to repurchase the shares concerned in accordance with the provisions for redemption in the Sales Prospectus. The shareholder shall be informed that such measure has been taken. Alternatively, the Board may offer to such investor to convert the shares concerned into shares of another Share Class for which the investor fulfils all the eligibility criteria.

A number of different Share Classes may be issued within a single Sub-Fund.

2 Accounting principles

a) Financial statements

The financial statements for the Fund have been prepared on a going concern basis, with the exception of the sub-fund Vontobel Fund - Eastern European Bond, which has been prepared on a non-going concern basis. For this latter sub-fund, the assets and liabilities as of August 31, 2024 have been presented at their net realizable values and estimated settlement values respectively, being deemed to equate to their fair values/nominal values as appropriate as of August 31, 2024.

As of August 31, 2024, the NAVs of these financial statements were determined for each of the Sub-Funds on the basis of the valuation of the underlying assets at the latest prices available as of August 30, 2024.

b) Valuation of the assets

- i. The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforementioned and not yet received shall be deemed to be the full amount thereof, unless it is possible that the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at by deducting a sum that the Company considers appropriate in such case to reflect the true value thereof.
- ii. The value of all securities and/or derivative financial instruments listed or traded on the exchange is based on the last-known price on the day before the valuation day. Exceptions to this are the securities and/or derivative financial instruments held by the Sub-Funds specified in the Special Part of the Sales Prospectus, which, in accordance with their investment policy, are invested in Asia and the Far East and the value of which is measured on the basis of the last-known price at the time of valuation on the valuation day.
- iii. The value of securities and/or derivative financial instruments traded on other regulated markets shall be calculated on the basis of the closing price on the day preceding the valuation day.
- iv. If any of the securities and/or derivative instruments in the Fund's portfolio on the relevant valuation day are neither listed or traded on any official stock exchange nor on any other regulated market or if, the price as determined pursuant to paragraphs ii. and iii. is not representative of the fair market value of the relevant securities and/or derivative instruments listed or traded on an official stock exchange or other regulated market, the value of these securities and/or derivative instruments shall be determined prudently and in good faith based on a value resulting from the application of the recognized valuation rules or models.
- v. For fixed-income or variable-rate money market paper and securities with a residual term to maturity of less than three months, the valuation price may be successively adjusted to the redemption price, taking the net purchase price as a starting point, while maintaining the resulting yield. The valuation price calculated using this method may differ from the actual market price, if it can be ensured that this will not lead to a material difference between the actual value of the security and the adjusted valuation price. Where significant differences in market conditions exist, the basis for valuing the individual investments will be adapted in line with new market yields.
- vi. Units or shares in undertakings for collective investment shall be valued at the last available net asset value.
- vii. In the event that the above valuation methods should prove inappropriate or misleading, the Board of Directors may adjust the value of the investments or allow the use of a different valuation method for the Fund's assets.

The Board of Directors is entitled to temporarily apply other generally recognized valuation methods that are used in good faith and are verifiable by the Fund's auditors in order to calculate the assets of the Fund and/or the assets of a Sub-Fund if the aforementioned valuation criteria appear to be impossible or inexpedient due to exceptional circumstances, or if this is in the interests of the Fund or a Sub-Fund and/or shareholders (e.g. to avoid market timing) to achieve an appropriate valuation of the Fund and/or the Sub-Fund concerned.

c) Net realised gain/loss on the sale of securities

Realised net profits and net losses from the sale of securities are calculated on the basis of average costs. Realised profits and losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on investments".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on investments".

Notes to the Financial Statements

2 Accounting principles (continued)

d) Income

Dividends are recognised as income in the statement of net income / loss on the day on which the security is first listed as ex-dividend, provided this information is available to the Fund. Accrued interest is allocated on a daily basis. Coupons received from the issuers of the underlying securities are included in the position "Net interests on bonds". Dividends received from the issuers of the underlying securities are included in the position "Net dividends". Interests and dividends receivable for the Fund are booked to "Receivable on interests and dividends".

e) Valuation of futures

Futures are valued on the basis of the last available price. Realised net profits and net losses from the sale of futures are calculated according to the FIFO-principle. Net profits and net losses are reported net in the statement of operations and changes in net assets under "Net realised gain/loss on futures".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on Futures".

The outstanding futures are shown in Note 10.

f) Valuation of forward foreign exchange contracts

Forward foreign exchange contracts are valued on the basis of the forward foreign exchange rates on the valuation date. Realised net profits and net losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on forward foreign exchange contracts".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on forward foreign exchange contracts".

The outstanding forward foreign exchange contracts are shown in Note 10.

g) Valuation of options

Options are valued on the basis of the last available price. Realised net profits and net losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on options".

Changes in unrealised gains and losses are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on options".

The outstanding options are shown in Note 10.

h) Valuation of Swaps

The value of the traded swaps is calculated by CACEIS Bank, Luxembourg Branch on the basis of the net asset value of all monetary flows, both inflows and outflows. This valuation method is used with the Fund's consent. If extraordinary circumstances render a valuation in accordance with the aforementioned method impracticable or inadequate, the Fund is authorised to use other generally accepted and auditable valuation methods in good faith in order to achieve an appropriate valuation of the net assets.

Profits and losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on swaps". Interest is recognised as income or expenses and recorded in the Statement of Net Income / Loss under "Net interests on swaps".

Changes in unrealised appreciation and depreciation are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on swaps".

The outstanding swaps are shown in Note 10.

i) Valuation of contracts for difference

Contracts for difference are agreements between Sub-Funds and third parties which allow the Sub-Fund to benefit from price movements of shares, commodities, indices, interest rate products or currencies without the need to own them directly. Upon entering into such contracts, the Sub-Funds are required to deposit with a broker a one-off cash margin equal to a certain percentage of the contract amount. Variation margin payments are made or received by the Sub-Fund depending on the movement in the value of the underlying. Contracts for difference are valued as the difference between the market price of the underlying on the valuation day and the contract price. The changes in contract values are recorded as unrealised profits or losses and the Sub-Funds recognise a realised profit or loss when the contract is closed.

Unrealised gains and losses are reported in the statement of net assets under "Unrealised gain/loss on contracts for difference".

Realised profits and losses are reported in the statement of operations and changes in net assets under "Net realised gain/loss on contracts for difference".

Notes to the Financial Statements

2 Accounting principles (continued)

Changes in unrealised appreciation and depreciation are reported in the statement of operations and changes in net assets under "Change in unrealised appreciation/depreciation on contracts for difference". Interest is recognised as income or expenses and recorded in the Statement of Net Income / Loss under "Net interest on contracts for difference".

The outstanding contracts for difference are shown in Note 10.

j) Other assets/liabilities

Other assets arise mainly from recoverable taxes and costs.

Other liabilities arise mainly from provisions for general tax advice, other costs, clearing brokerage costs and legal fees.

k) Combined financial statements

The reference currencies of the Sub-Funds are converted into Swiss francs to produce combined financial statements (annual and semi-annual reports) that comply with provisions under Luxembourg Law.

l) Conversion of items in foreign currencies

Cash at banks, financial instruments as well as other assets / liabilities that are expressed in currencies other than the reference currency of the different Sub-Funds, are converted at the last known exchange rate on the valuation day. Income and expenses expressed in currencies other than the reference currency of the different Sub-Funds are converted at the exchange rate on the transaction day. Realised profits and losses on currency exchanges are reported in the statement of operations and changes in net assets under "Net realised gain/loss on currency exchange".

The acquisition cost of securities expressed in currencies other than the reference currency of the different Sub-Funds are converted at the exchange rate of the acquisition date.

m) Formation expenses

The formation expenses for the Fund have been allocated to the individual Sub-Funds in proportion to their initial subscription amounts and were written off in full over a period of five years.

n) Taxation

With the exception of the "taxe d'abonnement" (subscription tax) listed under Note 4, the Fund is not subject to any Luxembourg taxes. However, in accordance with the applicable foreign legislation, the Fund may be subject to capital gains taxes and withholding tax on interest and dividend income at differing rates.

For the purpose of disclosure, non-refundable withholding taxes are deducted from the gross dividends/interest amounts. Capital gains taxes are deducted from sales proceeds as a reduction in realised profits.

Tax implications for direct investments : Some Sub-Funds may invest directly in India. In case of direct investments in India, the relevant Sub-Funds may be subject to taxes on revenue and/or capital gains as well as potentially other taxes or levies due in accordance with applicable Indian legislation. Some or all of such amounts due may not be recoverable and/or not covered by double tax treaty between the Grand Duchy of Luxembourg and India.

o) Swing pricing

Trading in a Sub-Fund (in particular subscription and redemption activities) translates as a rule in corresponding trading activities in the portfolio of the relevant Sub-Fund (i.e. purchase of additional instruments in case of subscriptions and sale of instruments held in the portfolio of the relevant Sub-Fund in case of redemptions). Such trading activities entail various costs, including but not limited to bid-ask spreads, brokerage fees, transaction taxes and similar. Frequent trading in the portfolio of a Sub-Fund arising from frequent trading in the Sub-Fund may result in transaction costs that might be non-negligible and have a detrimental financial impact on the investors in the Sub-Fund, in particular on the long-term investors. To protect those investors, the Board of Directors may decide to apply the single swing pricing mechanism (the "SSP") in any Sub-Fund. The SSP mechanism adjusts the net asset value of the affected Sub-Fund, as calculated above, if a predetermined net capital activity threshold is exceeded ("partial" SSP), to accommodate it for those transaction costs. Subsequently, the adjustment takes place at the level of the relevant Sub-Fund and not at the level of an individual investor.

The adjustments of the net asset value on any valuation day in accordance with the SSP mechanism are made as follows:

- a) the net asset value of all Share Classes of the relevant Sub-Fund shall be increased by the applicable swing factor, as defined below, if the total subscriptions less the total redemptions for all Share Classes of the Sub-Fund on the relevant transaction day results in a net asset inflow (net subscriptions). Subsequently, subscribing investors shall receive a lower number of shares than they would receive without the application of the SSP while redeeming investors shall receive a higher redemption amount than they would receive without the application of the SSP (investors subscribing for a certain number of shares shall pay a higher total subscription amount); or

Notes to the Financial Statements

2 Accounting principles (continued)

- b) the net asset value of all Share Classes of the relevant Sub-Fund shall be decreased by the applicable swing factor, as defined below, if the total subscriptions less the total redemptions for all Share Classes of the Sub-Fund on the relevant transaction day results in a net asset outflow (net redemptions). Subsequently, subscribing investors shall receive a higher number of shares than they would receive without the application of the SSP while redeeming investors shall receive a lower redemption amount than they would receive without the application of the SSP (investors subscribing for a certain number of shares shall pay a lower total subscription amount); or
- c) no change shall be made if the net asset inflow or net asset outflow on the relevant transaction day does not exceed a certain threshold which may be determined by the Board of Directors for the relevant Sub-Fund (single swing pricing threshold).

The maximum adjustment that may be made to the net asset value of the relevant Sub-Fund, as described above (Single Swing Pricing Factor) has been determined by the Board of Directors to amount to 1% of the net asset value of the relevant Sub-Fund. Exceptions to the 1% maximum are listed below.

The effects of the SSP mechanism on the Sub-Funds on August 31, 2024, were as follows (a value of 0 for the Swing pricing adjustment means that the mechanism was not applied on August 31, 2024):

Vontobel Fund –	Sub-Fund Currency	Overall net assets before application of the swing factor	Swing pricing adjustment	Overall net assets after application of the swing factor
Swiss Money	CHF	75,805,355	0	75,805,355

Asian Bond	USD	11,829,433	0	11,829,433
Emerging Markets Investment Grade	USD	55,230,931	0	55,230,931

The following Sub-Funds are subject to single swing pricing and may apply a maximum single swing pricing factor of up to 3% of the Net Asset Value:

- Vontobel Fund – Sustainable Emerging Markets Local Currency Bond
- Vontobel Fund – Emerging Markets Debt
- Vontobel Fund – Sustainable Emerging Markets Debt
- Vontobel Fund – Emerging Markets Blend
- Vontobel Fund – Emerging Markets Corporate Bond
- Vontobel Fund – Asian Bond
- Vontobel Fund – Emerging Markets Investment Grade

The Board of Directors may decide to apply Single Swing Pricing Factors beyond the maximum adjustment level to a Sub-Fund in case of exceptional market circumstances, such as periods of high volatility, reduced asset liquidity and market stress.

All Sub-Funds subject to the application of the SSP mechanism may be consulted on the Internet at vontobel.com/am.

Notes to the Financial Statements

3 Management Fee and Performance Fee

a) Management Fee

The Sub-Funds pay a "Management Fee", which covers all costs relating to possible services rendered in connection with investment management and distribution and is payable at the end of every month. The composition of this Management Fee is determined by the Investment Managers, insofar as applicable, the Sub-Investment Managers and the distributors concerned. This Management Fee is calculated based on the average of the daily net asset values of the Sub-Fund concerned during the relevant month. The applicable fee rate is confirmed by the Board of Directors. The maximum fee rates for each Sub-Fund are defined in the Special Part of the Sales Prospectus.

During the financial year, the applicable rates per annum and per Share Class were as follows:

Footnotes: in the table below, the following references are used:

- (1) Management Fee until termination of the Share Class.
- (2) Management Fee since launch of the Share Class.
- (3) See note 14.
- (4) Management Fee since the launch of the Sub-Fund.
- (5) Management Fee until liquidation of the Sub-Fund.
- (6) Management Fee until the merger of the Sub-Fund with Vontobel Fund – Global Active Bond.

b) Performance Fee

In addition, a performance-related remuneration ("Performance Fee") may be charged to the Sub-Fund assets or to the relevant Share Classes, if such a Performance Fee is envisaged in the Special Part of the Sales Prospectus applicable to the Sub-Fund in question. The Performance Fee shall be calculated separately for each Share Class.

In case a Sub-Fund applies the single swing pricing mechanism, any performance fee in this Sub-Fund will be calculated and accrued on the basis of the unswung net asset value ("NAV").

Unless the Special Part of the Sales Prospectus specifies otherwise, the following principles shall apply to the calculation of the Performance Fee:

The Performance Fee shall be calculated on each Valuation Day and accrued in accounting terms. The Performance Fee owed shall be paid on the Valuation Day on which the Performance Fee is crystallized (the "Crystallization Day").

No equalization accounting or multi-series accounting methods, etc. shall be applied in calculating the Performance Fee. This may mean that an investor does not benefit from a positive performance, depending on the point in time when said investor subscribes to shares, but is charged a Performance Fee because of the positive overall performance of the Sub-Fund over the Performance Reference Period of at least five years.

If shares are redeemed during a Performance Reference Period, that part of the Performance Fee which has been accrued during the relevant Performance Fee Period up to the Redemption Day on which the shares are redeemed (as defined in and in accordance with section 13 "Redemption of shares" of the Sales Prospectus) shall also be retained – irrespective of whether or not a Performance Fee is owed on the Crystallization Day.

The Performance Fee shall be calculated on the basis of the "High Watermark Principle" ("HWM Principle") and the "Hurdle Rate Principle". The calculation method to be applied is stipulated in the Special Part of the Sales Prospectus for the relevant Sub-Fund.

Notes to the Financial Statements

3 Management Fee and Performance Fee (continued)

When a Share Class of a Sub-Fund is launched, the first High Water Mark ("HWM") is identical to the initial issue price of the respective Share Class.

When a Performance Fee is subsequently introduced for a Share Class, the first HWM is identical to the NAV of the relevant Share Class as calculated on the Valuation Day on which the Performance Fee for the Share Class is introduced.

During the financial year/period, a performance fee was applicable for the following Sub-Funds:

- Vontobel Fund – Global Active Bond
- Vontobel Fund – Value Bond (merged into Vontobel Fund – Global Active Bond as of March 4, 2024)
- Vontobel Fund – Absolute Return Bond (EUR) (merged into Vontobel Fund – Global Active Bond as of March 4, 2024)

Vontobel Fund – Global Active Bond

*A yearly provision is created for the performance fee for each calculation day. If the NAV per share decreases during the calculation period, the provisions created for the performance fee are reduced accordingly. If these provisions drop to zero, no performance fee is payable.

For Vontobel Fund - Value Bond, CHF 235 performance fee was charged during the reporting period.

For Vontobel Fund - Absolute Return Bond (EUR), no performance fee was paid out during the reporting period.

Notes to the Financial Statements

4 Subscription tax

The Sub-Funds are, in principle, subject to a subscription tax (taxe d'abonnement) levied at the rate of 0.05% per annum based on their net asset value at the end of the relevant quarter, calculated and paid quarterly.

A reduced subscription tax rate of 0.01% per annum may however be applicable to any

- Sub-Fund whose exclusive object is the collective investment in money market instruments, the placing of deposits with credit institutions, or both.
- Sub-Fund or Share Class provided that their shares are reserved to one or more institutional investors within the meaning of article 174 of the 2010 Law (an "Institutional Investor").

A subscription tax exemption may apply to:

- The portion of any Sub-Fund's assets (prorata) invested in a Luxembourg investment fund or any of its sub-funds to the extent it is subject to the subscription tax;
- Any Sub-Fund (i) whose securities are reserved to Institutional Investor(s), and (ii) whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and (iii) whose weighted residual portfolio maturity does not exceed 90 days, and (iv) that have obtained the highest possible rating from a recognized rating agency. If several Share Classes are in issue in the relevant Sub-Fund meeting (ii) to (iv) above, only those Share Classes meeting (i) above will benefit from this exemption;
- Any Sub-Fund only held by pension funds and assimilated vehicles.

5 Service Fee

The Fund pays a "Service Fee" which covers the costs involved in central administration, management, the Depositary function and support for the Fund. This Service Fee shall be calculated on the average daily net asset value of the relevant Sub-Fund during the relevant month and charged to the assets of the relevant Sub-Fund at the end of the month. It amounts to a maximum of 1.0494 % p.a. for all Share Classes. Commissions due to the Management Company, the Administrator, the Depositary, the representatives and paying agents and information agents for the countries in which the Fund is sold are paid from this Service Fee.

6 Cross investments

Some Sub-Funds of Vontobel Fund invest in other Sub-Funds of Vontobel Fund. As at August 31, 2024, the value of these investments (known as "cross investments") amounts to:

Vontobel Fund –	Target funds	Market value in CHF	% of net assets
Euro Corporate Bond	Vontobel Fund – Global High Yield Bond I EUR	34,963,383	2.21%
	Vontobel Fund – Sustainable Global Bond I EUR	1,396,890	0.09%
	Vontobel Fund – Credit Opportunities E USD	19,391,570	1.22%

	Vontobel Fund – Emerging Markets Investment Grade I USD	9,467,632	0.37%
	Vontobel Fund – Sustainable Emerging Markets Local Currency Bond I USD	15,324,983	0.59%
Emerging Markets Corporate Bond	Vontobel Fund – Emerging Markets Investment Grade I USD	10,374,107	1.11%
	Vontobel Fund – Asian Bond I USD	10,020,605	1.07%
Multi Asset Solution	Vontobel Fund – Sustainable Emerging Markets Debt HI (hedged) EUR	8,630,988	5.83%
	Vontobel Fund – Green Bond S EUR	2,490,820	1.68%
Multi Asset Defensive	Vontobel Fund – Emerging Markets Debt I USD	1,270,383	1.22%
	Vontobel Fund – Commodity I USD	932,361	0.89%

In accordance with the 2010 Law as amended, no fees were charged for the subscription or redemption of shares of target funds that are managed by the same management company or by another company that is affiliated to the management company.

7 Related parties

In accordance with the 2010 Law, no fees were charged for the subscription or redemption of shares in target funds that are managed by the same Management Company or by another company affiliated with the Management Company.

The Sub-Funds Vontobel Fund – Smart Data Equity, Vontobel Fund – Active Beta Opportunities Plus and Vontobel Fund – Multi Asset Defensive were invested in funds of affiliated parties at the end of the financial year (see note 3).

10 Balance-sheet transactions

The collateral received per Sub-Fund for each type of balance-sheet transaction are mentioned in section 10f).

Notes to the Financial Statements

10 Balance-sheet transactions (continued)

a) Forward foreign exchange contracts

In order to protect its assets against currency fluctuations, the Fund may carry out transactions to dispose of foreign exchange forward contracts and call options on currencies, and to acquire put options on currencies. The arrangement of hedging transactions is subject to the condition that there is a direct connection between the transaction and the assets to be hedged. This means that transactions concluded in a given currency must not significantly exceed the total value of the assets denominated in that currency or the period during which the assets are held.

The counterparties for the forward foreign exchange contracts listed below are: Barclays Bank, BNP Paribas, BofA Securities Europe S.A., CACEIS Bank, Luxembourg Branch, Citigroup Global Markets Limited, Deutsche Bank AG, London Branch, Goldman Sachs International, JP Morgan Securities PLC, JP Morgan AG, Morgan Stanley & Co International PLC, Northern Trust, Société Générale Paris, Standard Chartered Bank and UBS AG, London Branch.

The following forward exchange contracts were outstanding as at August 31, 2024:

13 Russia/Ukraine situation

In February 2022, a number of countries (including the US, UK and EU) imposed sanctions against certain entities and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation. Additional sanctions continued to be imposed following the war initiated by Russia against Ukraine on February 24, 2022. The situation, together with growing turmoil from fluctuations in commodity prices and foreign exchange rates, has adversely impacted global economies and has driven a sharp increase in volatility across markets. The Board of Directors used fair value methodology to evaluate the impacted portfolios. For details on Sub-Funds invested in securities issued by Russian or Ukrainian entities for which a fair value was applied as a consequence of the events, please refer to note 11, Securities valuation.

The Board of Directors continues to monitor the evolving situation and its impact on the financial position of the Sub-Funds.

14 Events during the financial year

On December 5, 2022, the Sub-Fund Vontobel Fund - Eastern European Bond was put into liquidation. The last official Net Asset Value dated as at December 13, 2022 amounted to EUR 22,468,412. On December 16, 2022, first liquidation proceeds corresponding to proceeds from the sale of the liquid assets in the Sub-Fund and amounting to EUR 18,914,439 were paid to the shareholders of the Sub-Fund. The shareholders keep holding shares representing the remaining sanctioned assets. The unofficial Net Asset Value as at August 30, 2024 was calculated for the purpose of the presentation in the financial statements. Assets and liabilities of the Sub-Fund as at August 30, 2024 and the changes in net assets (profit and losses) for the financial year then ended are presented in the Statement of Net Assets, the Statement of Operations and Changes in Net Assets and Statement of Net Income / Loss of the Sub-Fund.

On September 20, 2023, the Sub-Fund Vontobel Fund – mtX Emerging Markets Leaders ex China was launched.

On November 29, 2023, the Sub-Fund Vontobel Fund – Dynamic Commodity was put into liquidation. The last Net Asset Value is dated as at December 12, 2023.

On January 26, 2024, the Sub-Fund Vontobel Fund – Bond Global Aggregate was renamed Vontobel Fund – Global Active Bond and the Sub-Fund Vontobel Fund – Vescore Artificial Intelligence Multi Asset was renamed Vontobel Fund – Active Beta Opportunities Plus.

On March 4, 2024, the Sub-Funds Vontobel Fund – Absolute Return Bond (EUR) and Vontobel Fund – Value Bond were merged into the Sub-Fund Vontobel Fund – Global Active Bond.

Notes to the Financial Statements

15 Events after the end of the financial year

The Board of Directors decided to appoint State Street Bank International GmbH, Luxembourg Branch, (“SSB”) having its registered office at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, registered with the R.C.S. Luxembourg under no. B148186, the Luxembourg branch of State Street Bank International GmbH, a limited liability company (Gesellschaft mit beschränkter Haftung) incorporated and existing under the laws of Germany, having its registered office at Brienner Strasse 59, 80333 Munich, Germany and registered in the commercial register in Munich with company number HRB 42872 in replacement of CACEIS Bank, Luxembourg Branch as new Depository, Administrator, Registrar, Transfer and Domiciliary Agent of the Fund with effect from October 7, 2024 (the “Effective Date”).

As a result of the appointment of SSB as Domiciliary Agent, as from the Effective Date the registered office of the Fund was moved to 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

16 Transaction costs

Transaction costs are costs incurred by the Fund as a result of buying and selling securities and derivatives as part of portfolio management.

Notes to the Financial Statements

17 Cash in custody relating to liquidated Sub-Funds

As of August 31, 2024, an amount of cash was still held in custody for one liquidated sub-fund as described below. The cash balance is used to cover liquidation fees and expenses or shall be paid back to shareholders present at the date of liquidation:

Vontobel Fund – Dynamic Commodity (liquidated as at December 12, 2023): EUR 10,105.24 and USD 9,716.57.

This amount is not included in the combined statement of net assets.

18 TER (Total Expense Ratio)

In accordance with the Asset Management Association Switzerland (AMAS) guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of May 16, 2008 (version dated August 5, 2021), the Fund must show a TER for the past 12-month period. This figure expresses the total fees and costs which are charged on an ongoing basis to the Sub-Fund's assets as a percentage of net Sub-Fund assets (operating expenditure), and is generally calculated according to the following formula:

$$\text{TER} = \frac{\text{Total operating expenses in CU}^*}{\text{Average net Fund assets in CU}^*} \times 100$$

* CU = currency units in Sub-Fund accounting currency

The TER of the Sub-Funds is as follows:

Vontobel Fund – Share Class	Currency	TER	TER including Performance Fee	Vontobel Fund – Share Class	Currency	TER	TER including Performance Fee

19 Contingent Assets

As of 31 August 2024, some of the Sub-Funds of the Fund are involved in some collective legal actions ("Class Actions"). In the context of these procedures, these Sub-Funds could receive, with no certainty, compensations related to losses occurred in the course of previous financial years.

Additional Unaudited Information

1 Performance

Historical performance is not an indicator of current or future performance. Performance data do not take account of any commissions and expenses charged on the issue and redemption of shares, or of possible custody fees or withholding taxes that decrease the value of the assets.

The Fund's return can rise or fall due to currency fluctuations. Investors should note that past performance is not necessarily indicative of the future performance of the various Sub-Funds.

Investors need to be aware of the following key points concerning the presentation of the benchmark performance:

- Single Benchmark:** For some Sub-Funds, a single benchmark applies to all Share Classes, irrespective of their currency.
- Hedged Benchmark:** For other Sub-Funds, which apply hedged benchmarks, the benchmark performance will be disclosed in all Share Class currencies.
- Conversion Indicator:** Benchmarks marked with * represent a benchmark performance value converted to the Share Class currency using the exchange rate as at the end of each reporting period.
- Calculation Reference:** The value of the benchmark performance is calculated from the launch date of the oldest Share Class in the Sub-Fund still active at the closing date of this report.

The performance figures have been calculated in accordance with the guidelines on the calculation and publication of performance data of the Asset Management Association Switzerland (AMAS) of May 16, 2008 (version dated August 5, 2021).

Footnotes: In the table below, the following references are used:

- (1) Performance until the termination of the Share Class.
- (2) On February 15, 2022, the name of the benchmark changed from Bloomberg Barclays MSCI Green Bond to Bloomberg MSCI Global Green Bond Index hedged EUR.
- (3) Performance since the launch of the Share Class.
- (4) Performance based on the unofficial NAV/share as at 31.08.2024. The performance based on the last official NAV/share as at 13.12.2022 were the following: A -4.65%, AM (EUR) -6.25%, AM (USD) -6.76%, AN -4.51%, B -4.65%, C -4.75%, I -4.50%, N -4.51% and R -4.42%.
- (5) Performance based on the unofficial NAV/share as at 31.08.2024. The performance based on the last official NAV/share as at 13.12.2022 were the following: A 63.41%, AM (EUR) -38.44%, AM (USD) -55.79%, AN -37.88%, B 63.39%, C -29.07%, I -16.79%, N -37.90% and R -29.55%.
- (6) Performance since the launch of the Sub-Fund.
- (7) Performance until the liquidation of the Sub-Fund.
- (8) Performance until the merger of the Sub-Fund with Vontobel Fund – Global Active Bond.

Additional Unaudited Information

2 Information on the remuneration (in EUR) of employees of Vontobel Asset Management S.A. for the financial year ended December 31, 2023 (continued)

The remuneration policies and practices shall apply to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers whose professional activities have a material impact on the risk profiles of the management companies or of the UCITS that they manage.

The remuneration practice for identified employee categories is described in the remuneration policy of Vontobel Asset Management S.A. and is available to investors upon request.

Neither the Management Company nor the Fund pays remuneration to identified employees of delegates.

The results of the annual review of the implementation of the remuneration policy were positive.

The remuneration paid to staff members of the investment management delegates in charge of investment management functions for Vontobel Fund from January 1, 2023 to December 31, 2023 amounts to EUR 40,961,630 overall. For these purposes, "staff" is defined broadly and includes for example analysts of the relevant investment management delegates.

Number of employees related to Vontobel Fund on December 31, 2023	Total remuneration for financial year 2023	of which variable remuneration paid in 2023
78.5	40,961,630	19,774,416

3 Information concerning the remuneration of the members of the Board of Directors (in EUR) of the Fund for the financial year ended August 31, 2024

The members of the Board of Directors of the Fund received a total remuneration of EUR 64,000 for their activities in connection with the financial year. Members of the Board of Directors who are employed by a company of the Vontobel Group do not receive any remuneration for their activities as members of the Board of Directors of the Fund.

Additional Unaudited Information

4 Global Exposure

The commitment approach method is used for calculating global exposure for all Sub-Funds, except for the Sub-Funds mentioned below. In relation to the Sub-Funds mentioned, global exposure is instead calculated based on a VaR method. The global exposure data for the financial year ended August 31, 2024 are as follows.

Vontobel Fund –	Calculation of global exposure	Model type	Benchmark portfolio	VaR Limit	Lowest VaR in period	Highest VaR in period	Average VaR in period	Average leverage level (1)
Credit Opportunities	Absolute VaR	Monte Carlo (2)	-	20%	5.16%	9.80%	7.05%	308.72%

Multi Asset Solution	Absolute VaR	Monte Carlo (2)	-	12%	2.56%	5.81%	4.63%	64.90%
Non-Food Commodity	Relative VaR	Monte Carlo (2)	BBG Commodity ex-Agriculture and Livestock TR Index	200%	80.43%	118.53%	97.94%	175.76%
Sustainable Emerging Markets Local Currency Bond	Relative VaR	Monte Carlo (2)	JP Morgan GBI-EM Global Diversified unhedged USD	200%	70.70%	88.65%	78.92%	80.09%
TwentyFour Strategic Income Fund	Absolute VaR	Monte Carlo (2)	-	20%	3.81%	7.60%	5.77%	82.96%
TwentyFour Sustainable Strategic Income Fund	Absolute VaR	Monte Carlo (2)	-	20%	3.26%	6.39%	4.73%	82.92%
Active Beta Opportunities Plus	Absolute VaR	Monte Carlo (2)	-	20%	3.20%	11.83%	7.50%	229.99%

(1) In accordance with CSSF Circular 11/512, the data published here were collected daily. Leverage is calculated using the sum of notionals approach.

(2) The VaR is calculated with a confidence level of 99% and a horizon of 20 business days.

5 Securities Financing Transactions Regulation

The Fund is subject to the Regulation (EU) 2015/2365 of the European Parliament and of the Council on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 of the European Parliament (“SFTR”).

A Securities Financing Transaction (“SFT”) is defined in Article 3 (11) of the SFTR as:

- repurchase transactions or reverse repurchase transactions;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction;
- a margin lending transaction.

The SFTR also covers transactions that are usually described as total return swaps (“TRS”).

The Fund did not use any instrument falling in the scope of the SFTR for the financial year ended August 31, 2024.

Report of the Réviseur d'entreprises agréé for the financial year from September 1, 2023 to August 31, 2024

To the Shareholders of Vontobel Fund
11-13, Boulevard de la Foire
L-1528 Luxembourg

Opinion

We have audited the financial statements of Vontobel Fund (the "Fund") and of each of its Sub-Funds, which comprise the statement of net assets and the portfolio as at August 31, 2024, and the statement of operations and changes in net assets, and the statement of net income / loss for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its Sub-Funds as at August 31, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (the "Law of July 23, 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Report of the Réviseur d'entreprises agréé for the financial year from September 1, 2023 to August 31, 2024

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its Sub-Funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its Sub-Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its Sub-Funds (except for the Sub-Fund where a decision or an intention to close exists) to cease to continue as a going concern.
- In respect of the Sub-Fund where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited Information)

Transparency of the promotion of environmental or social characteristics and of sustainable investments

On November 27, 2019, Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector was published (the "SFDR"). The SFDR aims to increase the harmonization of, and transparency towards the end investors with regard to, the integration of sustainability risks, the consideration of adverse sustainability impacts, the promotion of environmental or social characteristics and sustainable investment by requiring pre-contractual and ongoing disclosures to end investors.

Within the meaning of SFDR, the sub-funds which do not promote environmental and/or social characteristics nor have a sustainable investment as its objective are categorized as Article 6 products.

For the purpose of the "taxonomy" regulation (regulation EU 2020/852 of June 18, 2020 on the establishment of a framework to facilitate sustainable investment, and amending the EU regulation 2019/2088), the investments underlying the sub-funds categorized as Article 6 products do not take into account the EU criteria for environmentally sustainable economic activities.

The following Sub-Funds of Vontobel Fund are categorized as Article 6 products falling under the scope of the following SFDR articles as at August 31, 2024:

Vontobel Fund –

Swiss Money
 US Dollar Money
 Global High Yield Bond
 Eastern European Bond (in liquidation)
 Swiss Mid And Small Cap Equity
 Smart Data Equity
 Commodity
 Non-Food Commodity
 Credit Opportunities
 Asian Bond

In addition, the SFDR provides high-level definitions and distinguishes between several categorizations of products including "Article 8 products" which are financial products that promote, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices ("SFDR Article 8 Products") and "Article 9 products" which are products that have sustainable investment as their objective ("SFDR Article 9 Products").

The following Sub-Funds of Vontobel Fund are categorized as Article 8 and 9 products falling under the scope of the following SFDR articles as at August 31, 2024:

Vontobel Fund –

Current SFDR categorization as at August 31, 2024

Green Bond	Article 9 product
Global Environmental Change	Article 9 product
TwentyFour Sustainable Short Term Bond Income	Article 9 product
Euro Short Term Bond	Article 8 product
Sustainable Swiss Franc Bond	Article 8 product
Euro Corporate Bond	Article 8 product
Global Active Bond	Article 8 product
Sustainable Emerging Markets Local Currency Bond	Article 8 product
European Equity	Article 8 product
US Equity	Article 8 product
Global Equity	Article 8 product
Global Equity Income	Article 8 product
Emerging Markets Equity	Article 8 product
Asia ex Japan	Article 8 product
Energy Revolution	Article 8 product
mtx Sustainable Asian Leaders (ex Japan)	Article 8 product

Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited Information)

Vontobel Fund –	Current SFDR categorization as at August 31, 2024
mtx Sustainable Emerging Markets Leaders	Article 8 product
mtx Emerging Markets Leaders ex China	Article 8 product
Emerging Markets Debt	Article 8 product
Sustainable Emerging Markets Debt	Article 8 product
Sustainable Global Bond	Article 8 product
Global Corporate Bond	Article 8 product
Emerging Markets Blend	Article 8 product
Emerging Markets Corporate Bond	Article 8 product
TwentyFour Absolute Return Credit Fund	Article 8 product
TwentyFour Strategic Income Fund	Article 8 product
TwentyFour Sustainable Strategic Income Fund	Article 8 product
TwentyFour Monument European Asset Backed Securities	Article 8 product
Multi Asset Solution	Article 8 product
Active Beta Opportunities Plus	Article 8 product
Multi Asset Defensive	Article 8 product
Emerging Markets Investment Grade	Article 8 product

All disclosures below concern the relevant Sub-Fund's investments during the Fund's financial year ending on August 31, 2024, except if specified otherwise.

The disclosure of the top investments of the Sub-Funds as well as the information concerning the economic sectors in which the investments were made are based on the average of quarter-end holdings of the Sub-Funds as at November 30, 2023, February 29, 2024, May 31, 2024 and August 31, 2024.

In the context of principal adverse impacts indicators, references to "Table 1", "Table 2" and "Table 3" concern Table 1, 2 and 3 of Annex I of Commission Delegated Regulation (EU) 2022/1288.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund - Green Bond

Legal Entity Identifier: 529900SFUVZHB2Y5U19

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> YES</p> <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 97.99%</p> <p><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> NO</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met.

The Sub-Fund's sustainable investment objective consisted of investing in debt instruments issued for projects and/or by issuers that contributed to pre-defined so called "Impact Pillars", with an environmental focus, based on the Investment Manager's assessment. Environmental Impact Pillars (clean and renewable energy, energy efficiency, resource efficiency, low-carbon transportation, agriculture and forestry as well as climate resilient infrastructure) were the primary focus of the Sub-Fund (at least 80% of the Sub-Fund's assets). In order to attain the sustainable investment objective, the Sub-Fund invested 97.99% of its assets in green bonds (sustainable investments with an environmental objective). Through these investments, the Sub-Fund invested in sustainable investments with an environmental objective as defined by the EU Taxonomy. These objectives were: "climate change mitigation", "climate change adaptation", "sustainable use and protection of water and marine resources", "transition to a circular economy", "pollution prevention and control", "protection and restoration of biodiversity and ecosystems". The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date. The Investment Manager therefore performed additional analysis of the issuers. For the Sub-Fund, the Investment Manager only selected green bonds backed by a second party opinion, financing projects that contribute to the Sub-Fund's Impact Pillars.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in green bonds	100%	
Percentage of investments in social and/or sustainability bonds	N/A	
Percentage of investments in debt instruments that are not green, but that are issued by issuers that contribute to an environmental objective	0%	
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate issuers that are not above the maximum Implied Temperature Rise, provided by a third-party ESG data provider, that has been set for this Sub-Fund.	100%	
Sub-Fund's weighted average ESG rating, provided by a third-party ESG data provider	AAA (score: 8.8)	The Sub-fund must have at least a weighted average ESG rating of A
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in green bonds	100%	100%
Percentage of investments in social and/or sustainability bonds	N/A	0%
Percentage of investments in debt instruments that are not green, but that are issued by issuers that contribute to an environmental objective	0%	0%

Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	0%
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	0%
Percentage of investments in securities of corporate issuers that are not above the maximum Implied Temperature Rise, provided by a third-party ESG data provider, that has been set for this Sub-Fund.	100%	N/A
Sub-Fund's weighted average ESG rating, provided by a third-party ESG data provider	AAA (score: 8.8)	N/A
Percentage of securities covered by ESG analysis	100%	100%

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund's investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund made, the Investment Manager took into account the indicators for adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Scope 3 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	1	Total GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Verbund	Electricity, gas, steam and air conditioning supply	3.05	Austria
E.ON	Professional, scientific and technical activities	2.76	Germany
E.ON	Professional, scientific and technical activities	2.7	Germany
Acciona	Financial and insurance activities	2.64	Spain
Elia Transmission Belgium	Electricity, gas, steam and air conditioning supply	2.59	Belgium
Madrid	Public administration and defence; compulsory social security	2.54	Spain
Red Electrica	Financial and insurance activities	2.48	Spain
European Investment Bank	Financial and insurance activities	2.38	Luxembourg
Orsted	Electricity, gas, steam and air conditioning supply	2.31	Denmark
European Union	Public administration and defence; compulsory social security	2.25	Belgium
Acciona	Financial and insurance activities	2.24	Spain
European Investment Bank	Financial and insurance activities	2.2	Luxembourg
Acciona	Financial and insurance activities	2.07	Spain
Eurofima	Financial and insurance activities	2.05	Switzerland
Oncor Electric Delivery	Electricity, gas, steam and air conditioning supply	2.03	United States

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

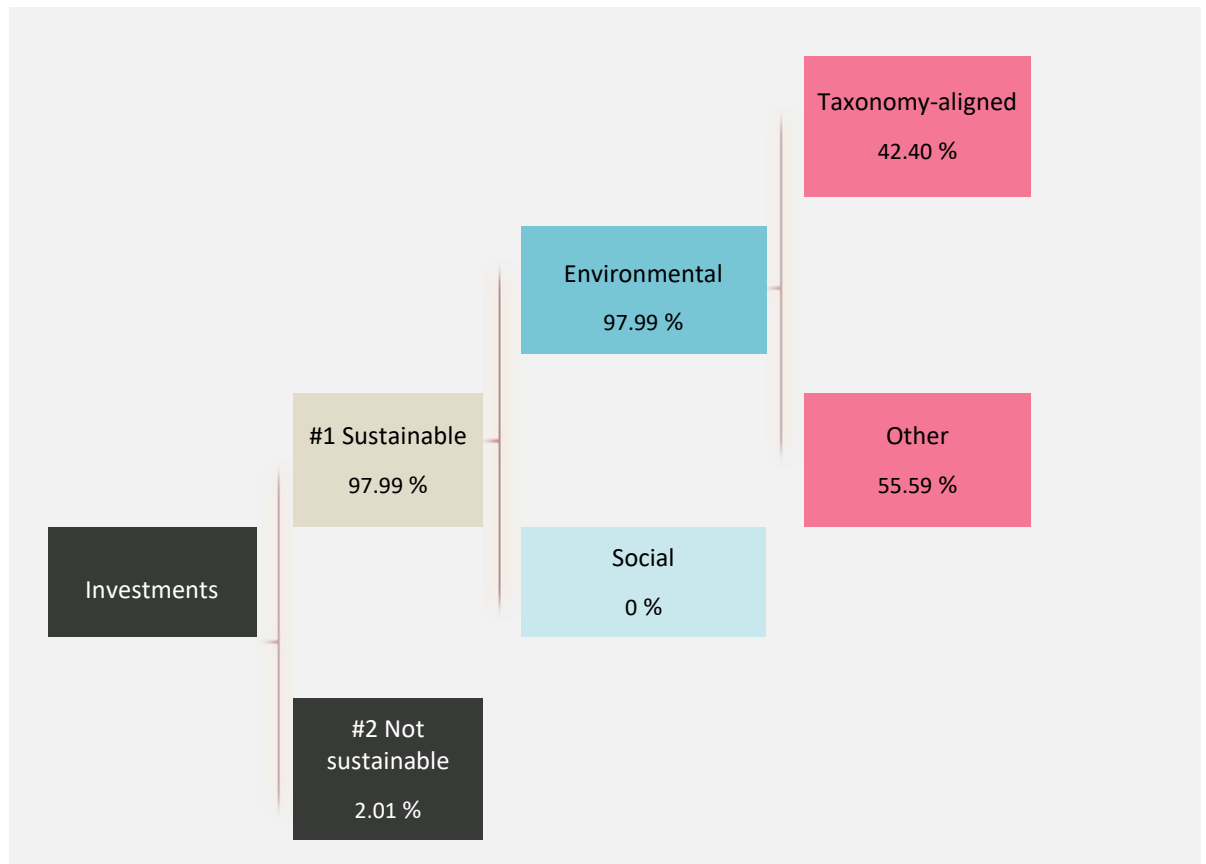

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.99% (sustainable investments).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Professional, scientific and technical activities	Activities of head offices	22.21
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	21.32
Financial and insurance activities	Other financial service activities, except insurance and pension funding	13.91
Financial and insurance activities	Monetary intermediation	9.63
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	7.76
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	6.54
Financial and insurance activities	Trusts, funds and similar financial entities	6.27

Financial and insurance activities	Activities of holding companies	3.50
Information and communication	Wired telecommunications activities	2.97
Financial and insurance activities	Insurance	2.08
total of remaining sectors with a proportion < 1.0%		1.86

The portfolio proportions of investments presented above are an average over the reference period.

27.86% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

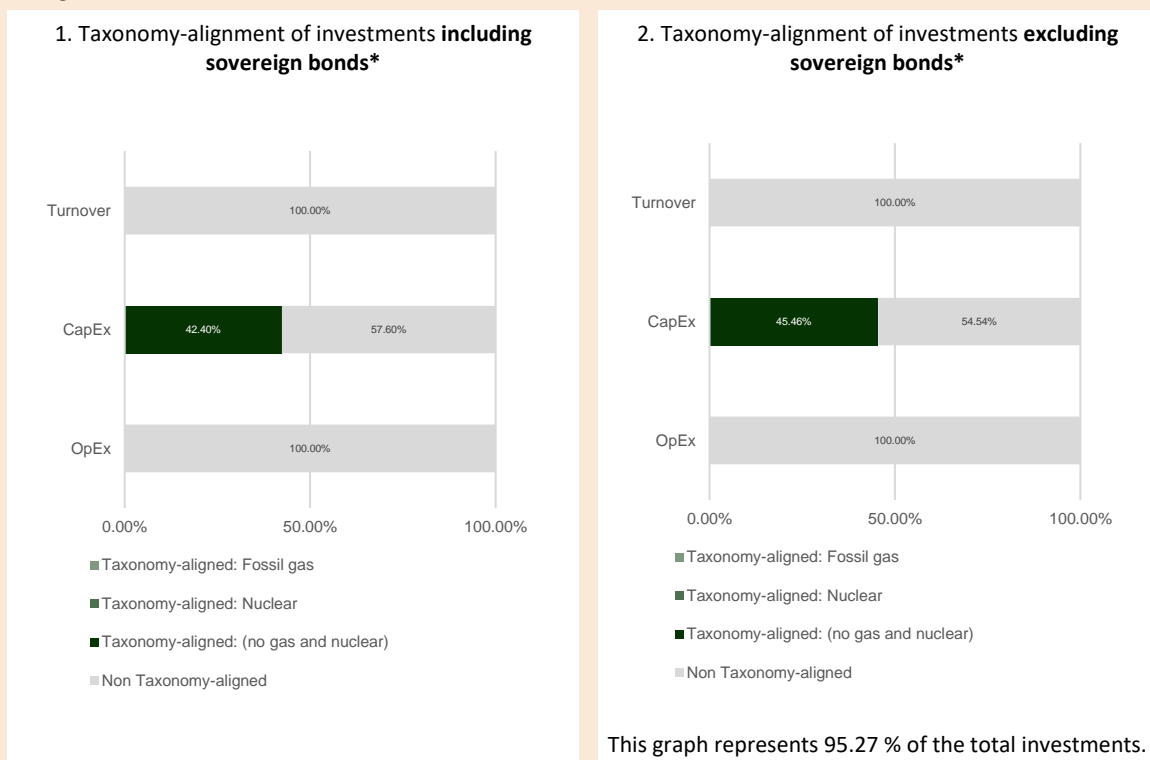

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
42.40	46.42

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 55.59% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “Not sustainable” investments represented 2.01% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.01%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of sustainable investments have been monitored throughout the reporting period. For the EU Taxonomy investments, we only consider the alignment related to the projects, and not by the companies themselves.

How did this financial product perform compared to the reference sustainable benchmark?

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund - Global Environmental Change **Legal Entity Identifier:** 529900ZUMAVW7HND8002

Sustainable investment objective

Did this financial product have a sustainable investment objective?

YES

It made **sustainable investments with an environmental objective: 97.63%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: ___%**

NO

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___ % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the Sub-Fund were met.

The companies contributed to the pre-defined, so-called “Impact Pillars”, based on the Investment Manager’s assessment. The six Impact Pillars are: clean energy infrastructure, resource-efficient industry, clean water, building technology, low emission transportation and lifecycle management.

The targeted companies provide products and services along the whole value chain, which tackle today’s pressing problems such as resource scarcity and environmental pollution. The companies had to derive at least 20% of their revenues from the sale of products or services that contribute to at least one of the Investment Manager’s six Impact Pillars. 100% of the EU Taxonomy aligned revenues of the portfolio holdings pursued the environmental objective of climate change mitigation.

The companies were not allowed to be exposed to certain controversial economic activities as outlined in the Sub-Fund’s website disclosure. The controversial weapons exclusion covered all categories of controversial weapons, i.e., anti-personnel landmines, cluster bombs, biological, chemical, blinding lasers, incendiary, non-detectable fragments, nuclear weapons, fissile material. This list went beyond the list of the Vontobel Group policy. In cases where investments were considered in utilities that generate nuclear power below the revenue threshold for exclusion, plant location risks and operational safety track record of nuclear facilities were carefully assessed but did not lead to an exclusion of any utility companies.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive more than 20% of their revenues from economic activities that contribute to at least one of the Impact Pillars. (based on a proprietary methodology)	100%	The methodology how to evaluate the impactful revenues of a company that contribute to the impact pillars is described in the pre-contractual disclosure annex for the Sub-Fund.
Percentage of investments in securities of corporate issuers that have a positive Impact Strategy score (based on a proprietary methodology)	100%	The six criteria for the Investment Manager's impact strategy assessment are described in the pre-contractual disclosure annex for the Sub-Fund.
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	More information about the products and activities excluded by the Sub-Fund can be found in the pre-contractual disclosure.
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG score that has been set for this Sub-Fund (ESG score of B)	100%	
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

No investment was identified as having a critical and poorly managed impact in one of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund-; (ii) involved in severe controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Scope 3 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	1	Total GHG emissions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

Within the reporting period, no investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Applied Materials	Manufacture of machinery and equipment n.e.c.	3.31	United States
Linde	Manufacture of chemicals and chemical products	3.22	Ireland
Prysmian	Manufacture of electrical equipment	3.07	Italy
Iberdrola	Electric power generation, transmission and distribution	2.79	Spain
Saint-Gobain	Activities of head offices	2.68	France
Air Liquide	Manufacture of chemicals and chemical products	2.58	France
Xylem	Manufacture of machinery and equipment n.e.c.	2.54	United States
Quanta Services	Electrical installation	2.49	United States
ASML Holding	Activities of head offices	2.18	Netherlands
Siemens	Manufacture of electrical equipment	2.18	Germany

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

NXP Semiconductor	Manufacture of computer, electronic and optical products	2.16	Netherlands
Trane Technologies	Activities of head offices	2.14	Ireland
Synopsys	Software publishing	2.03	United States
Clean Harbors	Waste collection	2.02	United States
Tetra Tech	Architectural and engineering activities and related technical consultancy	1.99	United States

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

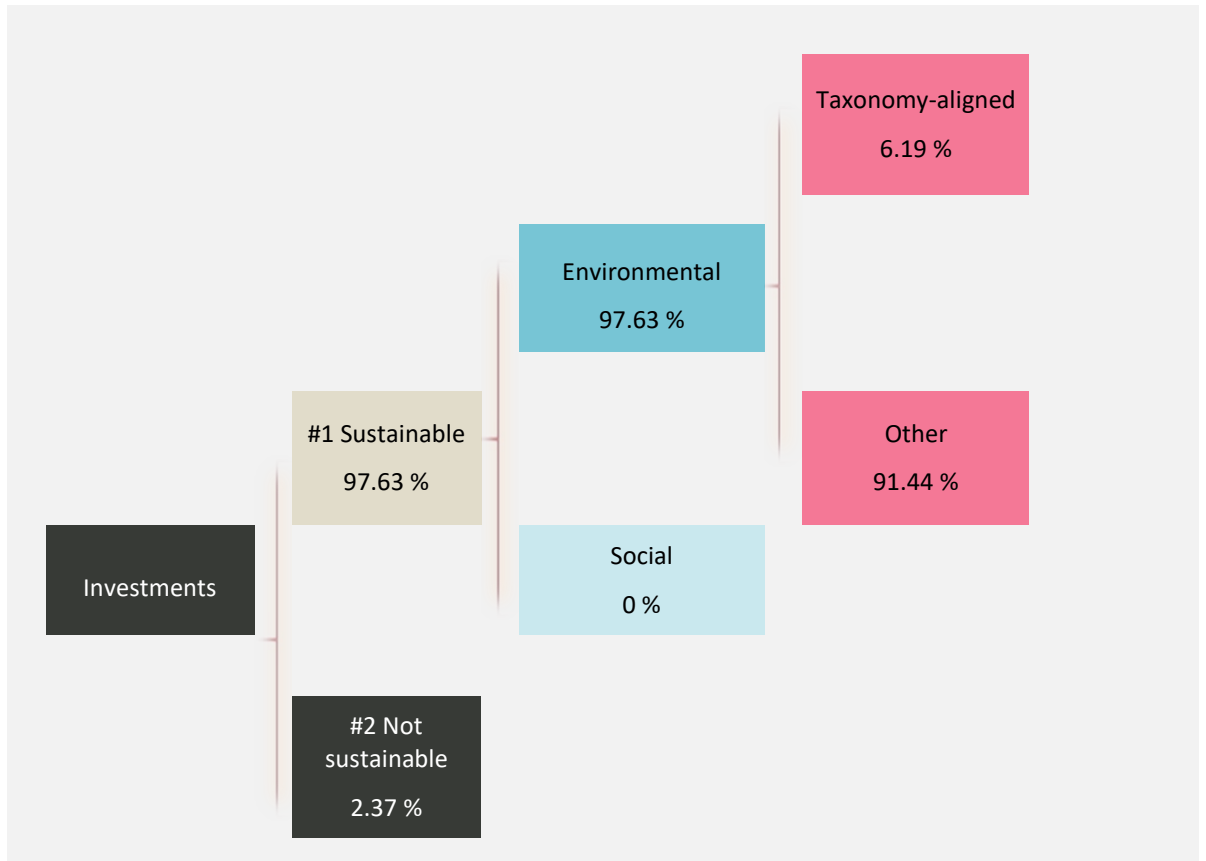

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.63% (sustainable investments).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this product's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

● ***In which economic sectors were the investments made?***

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Professional, scientific and technical activities	Activities of head offices	14.22
Manufacturing	Manufacture of machinery and equipment n.e.c.	13.55
Manufacturing	Manufacture of computer, electronic and optical products	13.37
Manufacturing	Manufacture of electrical equipment	12.05
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	6.11
Manufacturing	Manufacture of chemicals and chemical products	5.80
Professional, scientific and technical activities	Architectural and engineering activities and related technical consultancy	3.74
Information and communication	Software publishing	3.10
Construction	Electrical installation	2.49
Water supply; sewerage, waste management and remediation activities	Waste collection	2.02
Administrative and support service activities	Other building and industrial cleaning activities	1.88
Transportation and storage	Passenger rail transport, interurban	1.88
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of wood, construction materials and sanitary equipment	1.82
Water supply; sewerage, waste management and remediation activities	Water collection, treatment and supply	1.79
Transportation and storage	Freight rail transport	1.73
Administrative and support service activities	Business support service activities n.e.c.	1.64
Construction	Construction of utility projects for electricity and telecommunications	1.62
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of electronic and telecommunications equipment and parts	1.62
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of hardware, plumbing and heating equipment and supplies	1.45
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of other household goods	1.10
total of remaining sectors with a proportion < 1.0%		4.82

The portfolio proportions of investments presented above are an average over the reference period.

6.11% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

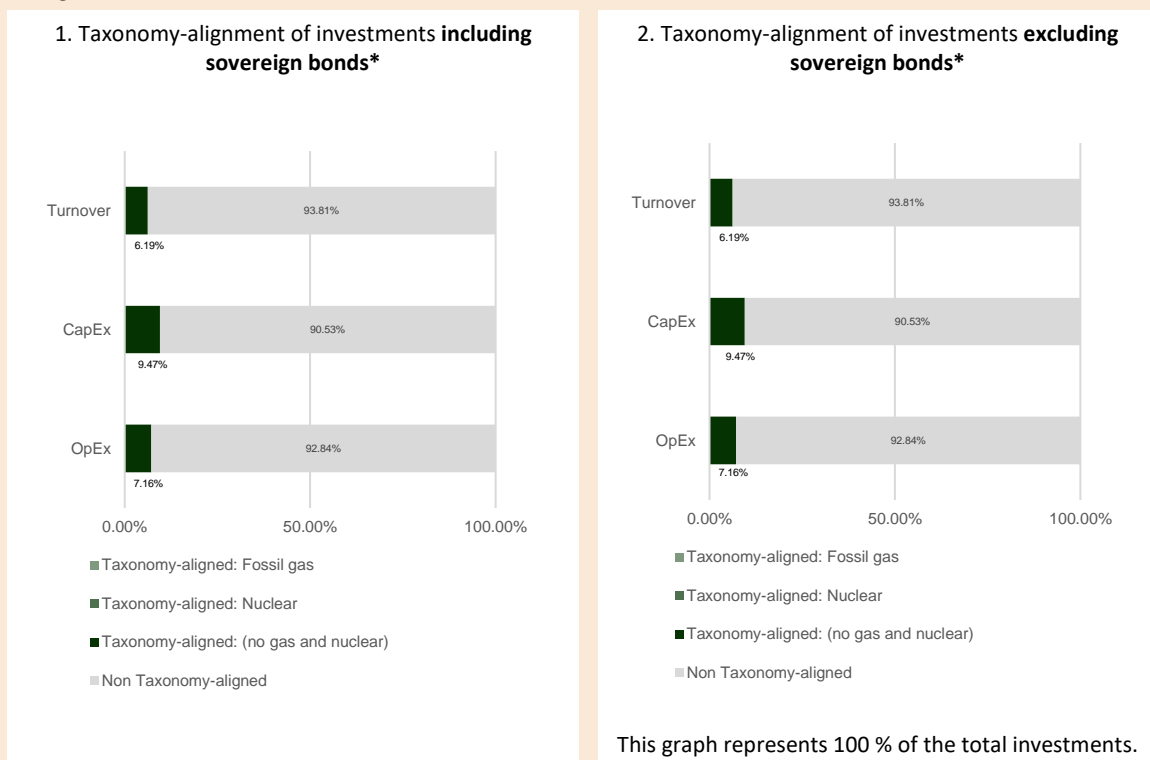

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 4.00 %.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
6.19	7.90

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 91.44% for this Sub-Fund.

Investee companies with an environmental sustainable objective under SFDR are contributing to support one of the six impact pillars based on defined criteria as described above and in the PCD. These criteria are not (yet) covered under the EU Taxonomy or the positive contribution was not (fully) aligned with the criteria for environmental sustainable economic activities under the EU Taxonomy or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude their assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “not sustainable” investments represented 2.37% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (2.37 %), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of sustainable investments have been monitored throughout the reporting period. Their application led to the exclusion of approx. 85% of the of the investments considered prior to the application of the investment strategy (i.e. global listed equity markets).

How did this financial product perform compared to the reference sustainable benchmark?

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund - TwentyFour Sustainable Short Term Bond Income

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 77.20%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___ % of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 3.47%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met.

The Sub-Fund met its sustainable investment objective of investing in securities of issuers that contribute towards the Paris Agreement’s goal to hold the increase in the global average temperature to below 2°C above pre-industrial levels by investing at least 80% in sustainable investments with the objectives of “climate change mitigation” and “climate change adaptation” and with a social objective, namely “empowerment”. In addition, the Sub-Fund invested in sustainable investments by investing in securities of corporate issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment. The Sub-Fund was re-categorized under the Sustainable Finance Disclosure Regulation (“SFDR”) from Article 8 to Article 9 SFDR. As part of this change, the Sub-Fund changed its definition of Sustainable Investments and increased its commitment to invest at least 80% (previously: 15%) of its net assets in sustainable investments. Information on the sustainable investment objective is available in the pre-contractual disclosure annex for the Sub-Fund.

As at the financial year-end, the Sub-Fund had 80.67% of its net assets invested in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	Excluded products and /or activities are referenced in the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	95.08%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	95.08%	96.17%
Percentage of corporate issuer securities covered by ESG analysis	N/A	100%

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund’s investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the indicators for adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer,

proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	12	Unadjusted gender pay gap
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond Germany	Administration of the State and the economic and social policy of the community	4.71	Germany
Bond United Kingdom	Administration of the State and the economic and social policy of the community	2.35	United Kingdom
Siemens Finance	Activities of holding companies	1.30	Netherlands
Tesco Corporate Treasury Services	Other financial service activities, except insurance and pension funding	1.27	United Kingdom
BUPA Finance	Activities of head offices	1.24	United Kingdom
Virgin Money	Activities of holding companies	1.22	United Kingdom
Bond United States	Administration of the State and the economic and social policy of the community	1.22	United States
Digital Stout Holding	Computer programming, consultancy and related activities	1.22	United States

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Bond United States	Administration of the State and the economic and social policy of the community	1.21	United States
Bond United States	Administration of the State and the economic and social policy of the community	1.21	United States
Legal & General Group	Activities of holding companies	1.20	United Kingdom
Bond United States	Administration of the State and the economic and social policy of the community	1.18	United States
Bunzl Finance	Trusts, funds and similar financial entities	1.14	United Kingdom
Experian	Other financial service activities, except insurance and pension funding	1.08	United Kingdom
BNP Paribas	Monetary intermediation	1.08	France

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

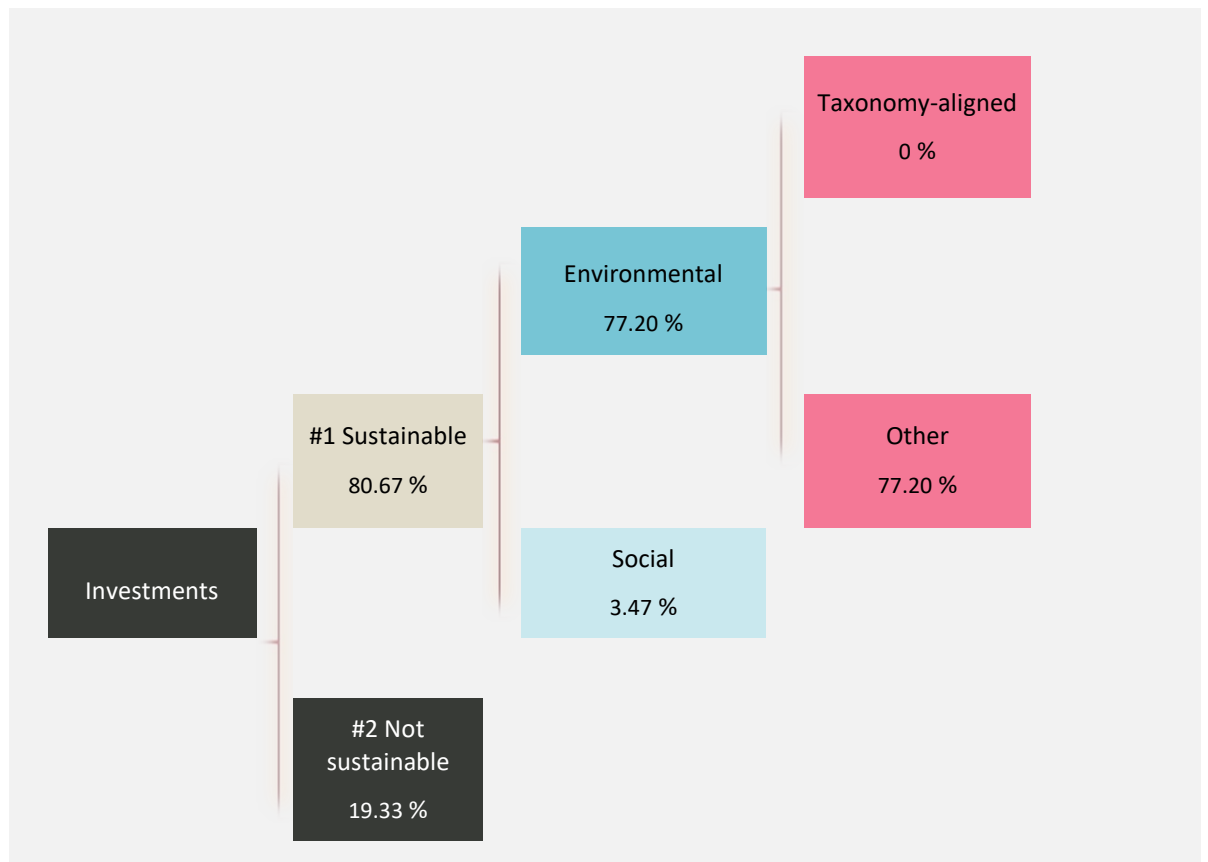

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 80.67% (sustainable investments).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub-sector	Proportion (%)
Financial and insurance activities	Activities of holding companies	20.47
Financial and insurance activities	Monetary intermediation	14.68
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	13.54
Financial and insurance activities	Other financial service activities, except insurance and pension funding	12.62
Financial and insurance activities	Trusts, funds and similar financial entities	4.81
Professional, scientific and technical activities	Activities of head offices	3.68
Manufacturing	Manufacture of wearing apparel	3.06
Information and communication	Other telecommunications activities	3.01
Financial and insurance activities	Insurance	2.97
Information and communication	Wired telecommunications activities	2.59
Information and communication	Computer programming, consultancy and related activities	2.38
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	2.36
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	2.02
Financial and insurance activities	Activities auxiliary to insurance and pension funding	1.05
Administrative and support service activities	Business support service activities n.e.c.	1.01
total of remaining sectors with a proportion < 1.0%		5.94

The portfolio proportions of investments presented above are an average over the reference period.

4.38% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

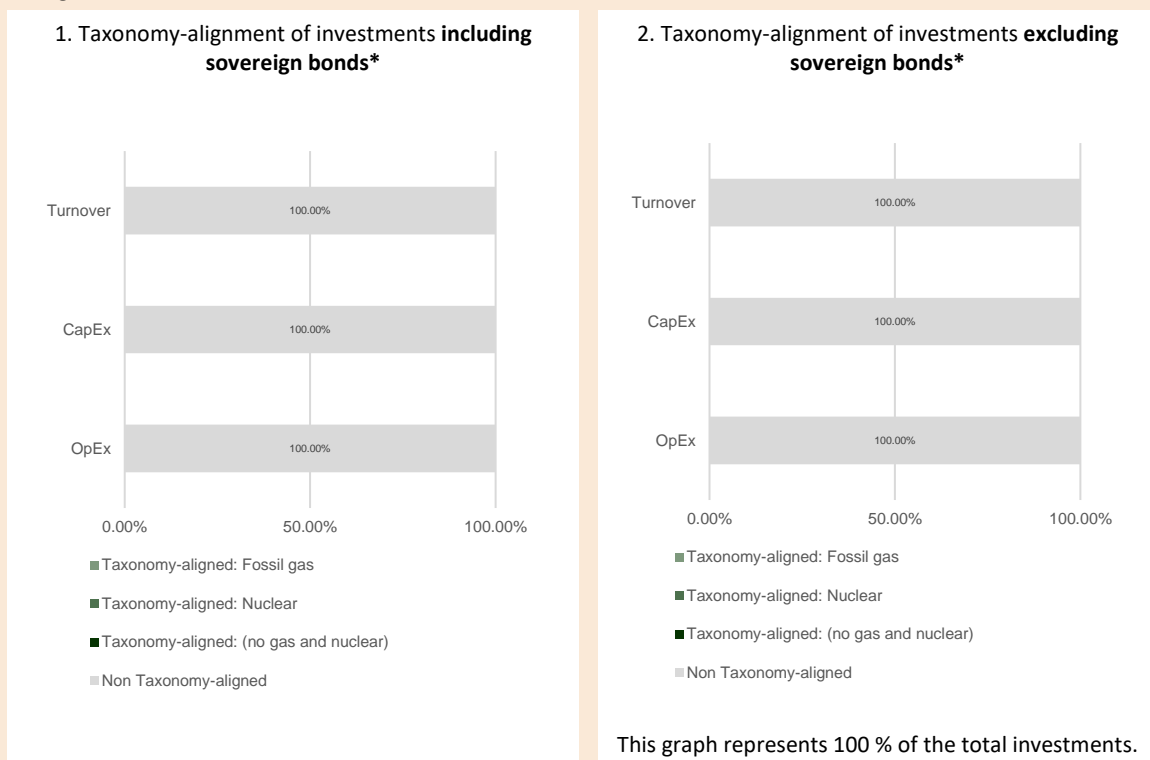

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 77.20% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 3.47% in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “Not sustainable” investments represented 19.33 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (4.92%) for liquidity management purposes.
- 14.14% sovereign bonds

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of sustainable investments have been monitored throughout the reporting period. The Sub-Fund was re-categorized under the Sustainable Finance Disclosure Regulation (“SFDR”) from Article 8 to Article 9 SFDR. As part of this change, the Sub-Fund changed its definition of Sustainable Investments and increased its commitment to invest at least 80% (previously: 15%) of its net assets in sustainable investments. This change required three positions (amounting to 1% of its net assets) to be sold.

How did this financial product perform compared to the reference sustainable benchmark?

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Euro Short Term Bond

Legal Entity Identifier: 529900VG4MSY8YCUWQ46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.34% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its re-categorization from an SFDR Article 6 to an Article 8 product as from January 26, 2024, the Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 11.34%% of its net assets in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms relate directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	100%	
Percentage of investments in securities of sovereign issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	100%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	11.34%	
Sub-Fund's combined weighted average ESG rating (for corporates "Management Score", for sovereigns "Factors Score", provided by Sustainalytics, a third-party ESG data provider) compared to the global bond investment universe (i.e. represented by its benchmark, Bloomberg Euro Aggregate 1-3 Year) weighted average rating)	Sub-Fund: 64.44 Benchmark: 63.66	
Percentage of securities covered by ESG analysis	96.24%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	N/A
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	N/A

Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	11.34%	N/A
Sub-Fund's combined weighted average ESG rating (for corporates "Management Score", for sovereigns "Factors Score", provided by Sustainalytics, a third-party ESG data provider) compared to the global bond investment universe (i.e. represented by its benchmark, Bloomberg Euro Aggregate 1-3 Year) weighted average rating)	Sub-Fund: 64.34 Benchmark: 63.66	N/A
Percentage of securities covered by ESG analysis	96.24%	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund's investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A, B, D, F, H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond Spain	Public administration and defence; compulsory social security	4.07	Spain
Bond Germany	Public administration and defence; compulsory social security	3.30	Germany
Bond Finland	Public administration and defence; compulsory social security	3.15	Finland
Bond Spain	Public administration and defence; compulsory social security	2.30	Spain
Bond France	Public administration and defence; compulsory social security	2.24	France
CNP Assurances	Financial and insurance activities	2.12	France
Axa	Financial and insurance activities	2.12	France
Autostrade	Transportation and storage	1.99	Italy
Unicredit	Financial and insurance activities	1.93	Germany
ING	Financial and insurance activities	1.63	Netherlands
Belfius Bank	Financial and insurance activities	1.63	Belgium
Bond Germany	Public administration and defence; compulsory social security	1.58	Germany
Bond Finland	Public administration and defence; compulsory social security	1.41	Finland
Unicredit	Financial and insurance activities	1.35	Italy
MTU Aero Engines	Manufacturing	1.32	Germany

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26/01/2024-31/08/2024

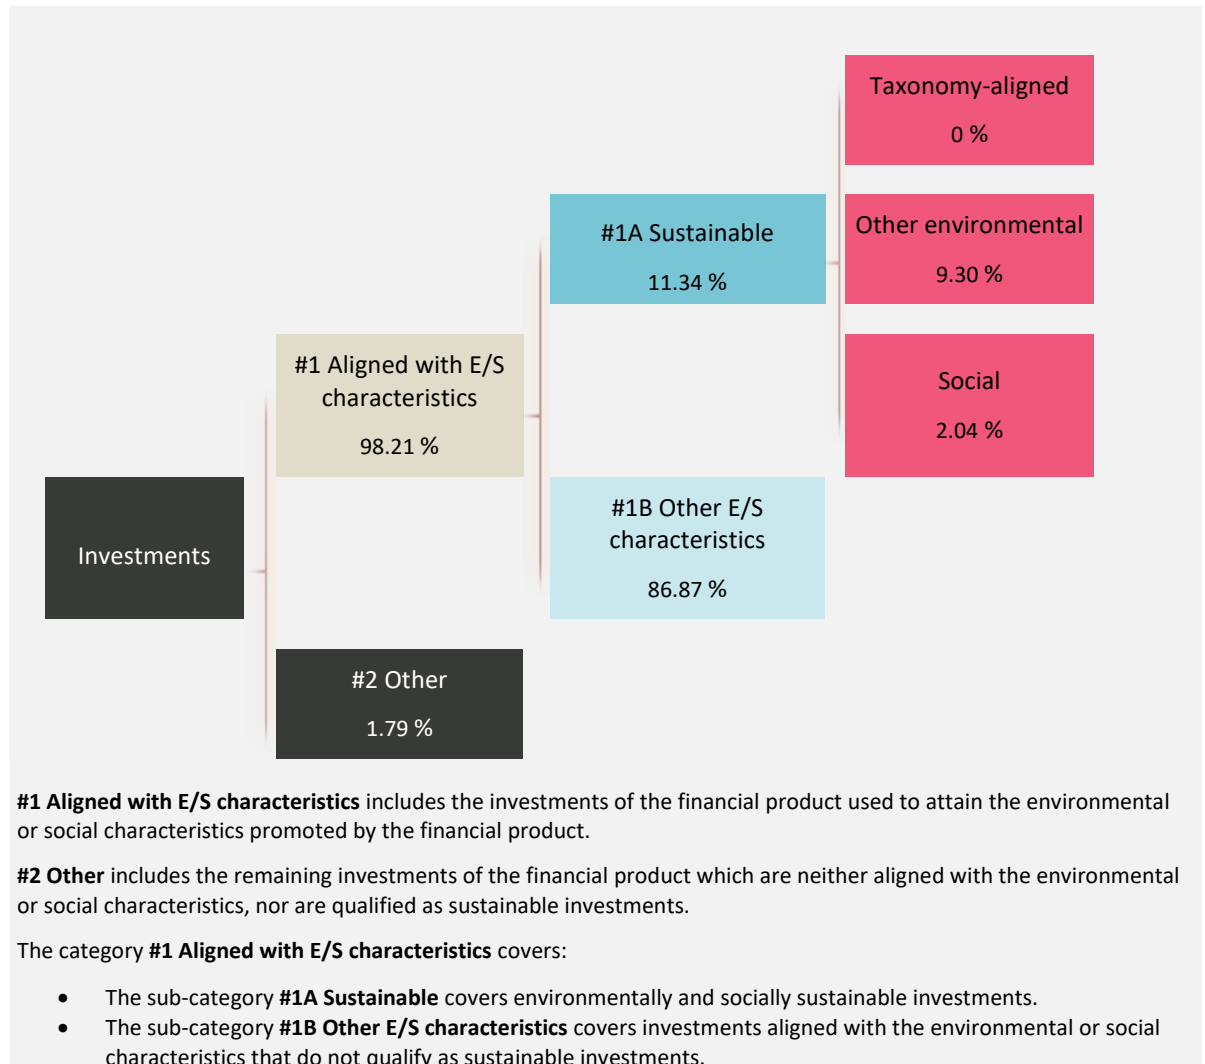

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.21% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	23.42
Financial and insurance activities	Monetary intermediation	23.31
Financial and insurance activities	Activities of holding companies	11.36
Financial and insurance activities	Other financial service activities, except insurance and pension funding	8.30

Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	4.09
Professional, scientific and technical activities	Activities of head offices	3.77
Financial and insurance activities	Insurance	3.74
Financial and insurance activities	Trusts, funds and similar financial entities	2.85
Transportation and storage	Support activities for transportation	2.51
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.71
Information and communication	Wireless telecommunications activities	1.45
Manufacturing	Manufacture of other transport equipment	1.32
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	1.21
Manufacturing	Manufacture of paper and paper products	1.16
total of remaining sectors with a proportion < 1.0%		8.35

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

5.30% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse

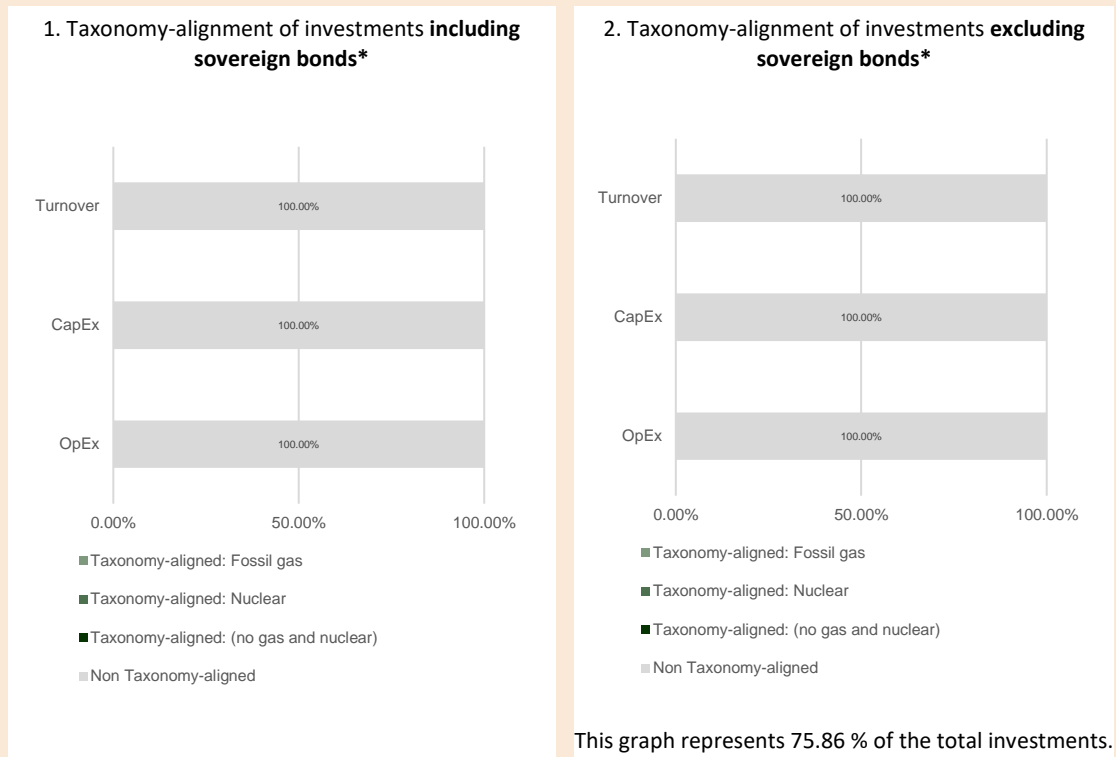

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 9.30% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.04% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.79% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.29%), for liquidity management purposes.
- Investments not covered by ESG research (0.50%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Sustainable Swiss Franc Bond

Legal Entity Identifier: 529900GTQNJG95M3H547

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.21% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were partially met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 31.21% in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date, the Investment Manager therefore performed additional analysis of the issuers.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund for sovereigns	0%	Exclusion criteria are indicated under the above-mentioned section
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating (50 out of 100) that has been set for this Sub-Fund	98.34%	4 issuers did not meet the minimum ESG rating (score below 50). The issuers were Standard Oil (not rated), Southern California Gas (score: 31.17), Société Générale (43.91) and Toronto Dominion Bank (49.00).
Percentage of investment in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 50 out of 100)	100%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	31.21%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%

Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund for sovereigns	0%	0%
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	0%
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating (50 out of 100) that has been set for this Sub-Fund	98.34%	100%
Percentage of investment in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 50 out of 100)	100%	100%
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	31.21%	29.21%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer “allocated funding”, if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE D, F, H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Pfandbriefzentrale der schweizerischen Kantonalbanken	Financial and insurance activities	3.81	Switzerland
Oesterreichische Kontrollbank	Financial and insurance activities	2.5	Austria
Energie Beheer Nederland	Manufacturing	1.95	Netherlands
European Investment Bank	Financial and insurance activities	1.94	Luxembourg
Nederlandse Waterschapsbank	Financial and insurance activities	1.59	Netherlands
Cembra Money Bank	Financial and insurance activities	1.51	Switzerland
KommunalKredit	Financial and insurance activities	1.47	Denmark
Bank Nederlandse Gemeenten	Financial and insurance activities	1.43	Netherlands
Municipality Finance	Financial and insurance activities	1.35	Finland
European Investment Bank	Financial and insurance activities	1.33	Luxembourg
SNCF Réseau	Public administration and defence; compulsory social security	1.28	France
KTSP Winterthur	Human health and social work activities	1.23	Switzerland
Laensfoersaekringar Hypotek	Financial and insurance activities	1.20	Sweden
Banque Cantonale Vaudoise	Financial and insurance activities	1.16	Switzerland
Basellandschaftliche Kantonalbank	Financial and insurance activities	1.11	Switzerland

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

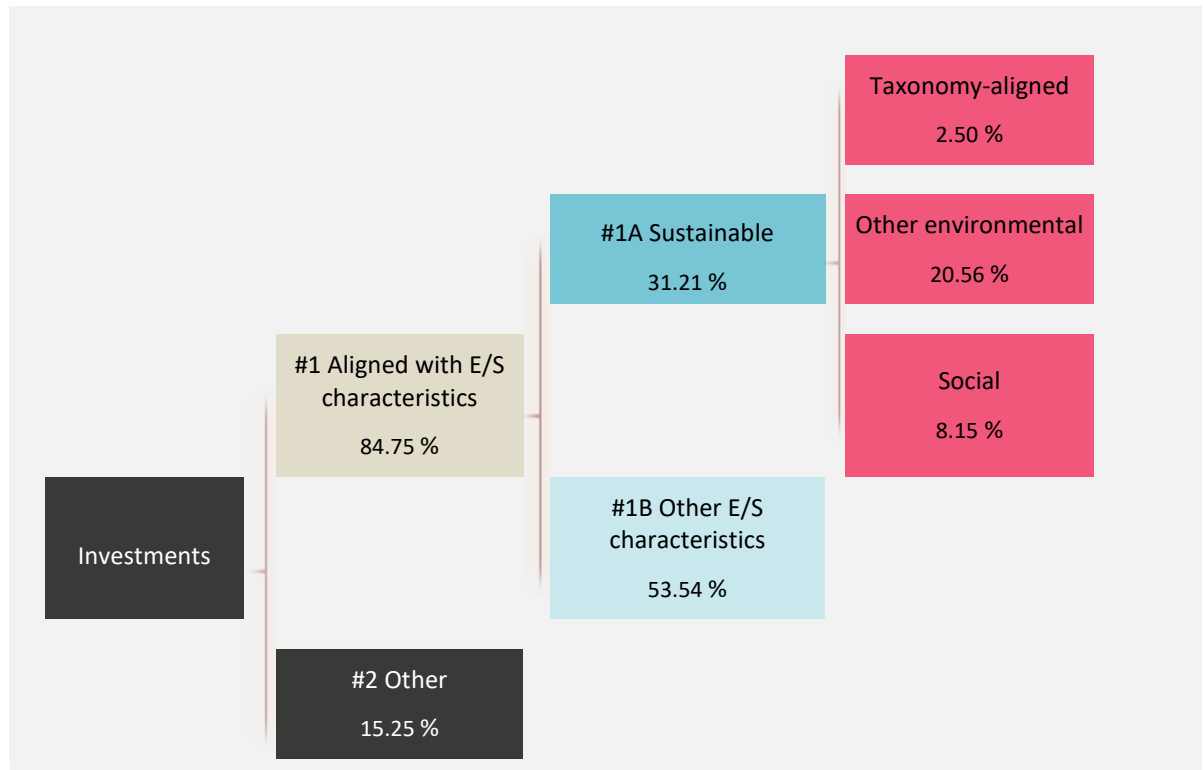

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 84.75% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Monetary intermediation	60.24
Financial and insurance activities	Other financial service activities, except insurance and pension funding	10.55
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	5.51
Human health and social work activities	Hospital activities	2.53
Manufacturing	Manufacture of food products	2.35

Financial and insurance activities	Activities of holding companies	2.29
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	2.12
Manufacturing	Manufacture of coke and refined petroleum products	2.10
Professional, scientific and technical activities	Activities of head offices	2.01
Transportation and storage	Urban and suburban passenger land transport	1.52
total of remaining sectors with a proportion < 1.0%		7.26

The portfolio proportions of investments presented above are an average over the reference period.

4.22% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
2.50	3.13

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.56% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 8.15% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 15.25% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.33%), for liquidity management purposes.
- Investments not covered by ESG research (13.92%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Euro Corporate Bond

Legal Entity Identifier: 5299007053L3LRN24X46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="radio"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.80% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted social transition through empowerment with a focus on pre-defined empowerment indicators. The Investment Manager favored issuers that perform well in such indicators or were on their way to perform well in these indicators while excluding any issuers that were not aligned with the strategy. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 14.80% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in securities of corporate issuers that, in respect to the pre-defined empowerment related indicators (i.e. diversity oversight by management and programs, percentage of women in total workforce, ILO Labor core convention violations and percentage of employees to receive training provided by specialized third-party ESG research), (i) perform well, or (ii) are on their way to perform well in these indicators, or (iii) where potential for improvement has been identified, based on the Investment Manager's analysis	(i): 18.09% (ii): 33.94% (iii): 38.74%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	14.80%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	1 issuer was flagged with severe controversies by either MSCI or Sustainalytics: Glencore. The issuer is on watch list.
Sub-Fund's weighted average UN Global Compact profile, compared to the investment universe (i.e. euro investment grade corporate debt market)	Sub-Fund: 86.73 Universe: 86.05	
Percentage of securities covered by ESG analysis	90.77%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	0%
Percentage of investments in securities of corporate issuers that, in respect to the pre-defined empowerment related indicators (i.e. diversity oversight by management and programs, percentage of women in total workforce, ILO Labor core convention violations and percentage of employees to receive training provided by specialized third-party ESG research), (i) perform well, or (ii) are on their way to perform well in these indicators, or (iii) where potential for improvement has been identified, based on the Investment Manager's analysis	(i): 18.09% (ii): 33.94% (iii): 38.74%	(i): 60.39% (ii): 17.62% (iii): 1.23%
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	14.80%	N/A
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	N/A

Percentage of securities covered by ESG analysis	90.77%	N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in severe controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Vontobel Fund – Global High Yield Bond I EUR *	Financial and insurance activities	2.23	Luxembourg
Vontobel Fund – Credit Opportunities E USD *	Financial and insurance activities	1.18	Luxembourg
Bond Spain	Public administration and defence; compulsory social security	0.86	Spain
Heathrow Funding	Financial and insurance activities	0.81	Jersey
Heathrow Funding	Financial and insurance activities	0.78	Jersey
Bond Spain	Public administration and defence; compulsory social security	0.74	Spain
Swiss Confederation Government Bond	Public administration and defence; compulsory social security	0.64	Switzerland
Lloyds	Financial and insurance activities	0.63	United Kingdom
Stora Enso	Manufacturing	0.59	Finland
Unicredit	Financial and insurance activities	0.57	Italy
Mediobanca	Financial and insurance activities	0.56	Italy
Siemens Finance	Financial and insurance activities	0.54	Netherlands
NatWest Group	Financial and insurance activities	0.53	United Kingdom
VW International Finance	Financial and insurance activities	0.53	Netherlands
Fidelity National Information Services	Information and communication	0.53	United States

* Indirect investments not aligned with E/S characteristics.

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

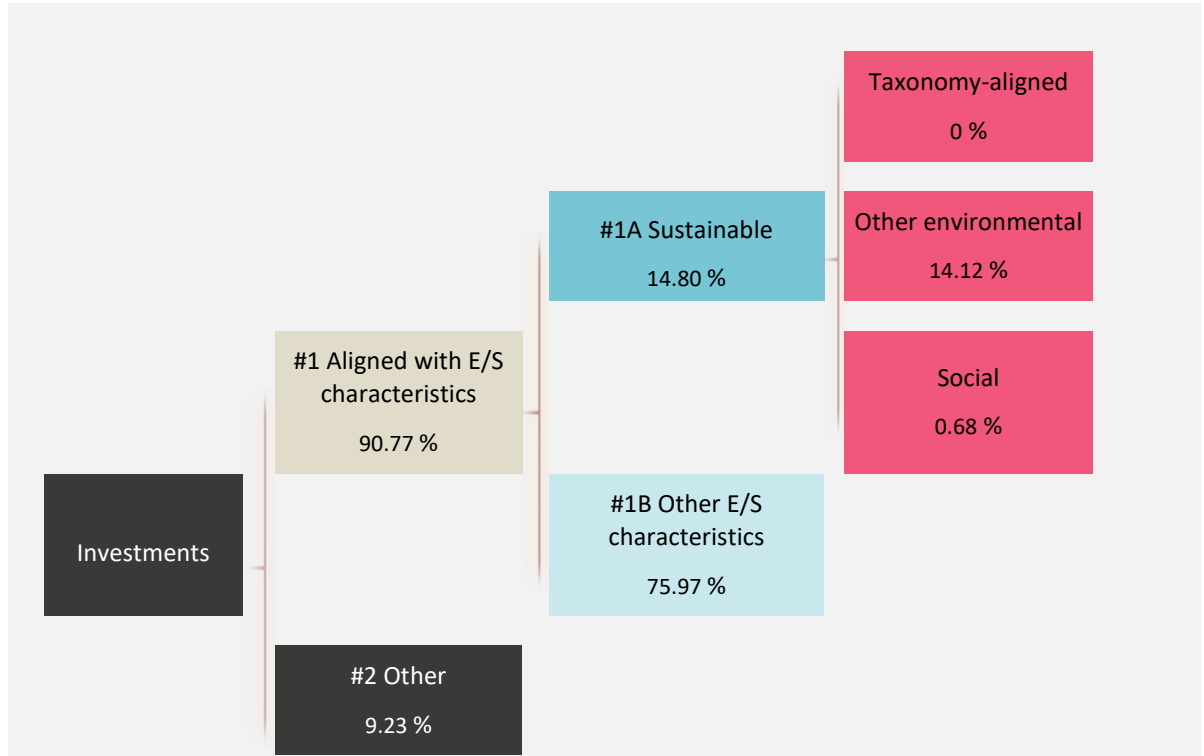

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 90.77% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Activities of holding companies	21.33
Financial and insurance activities	Monetary intermediation	20.89
Financial and insurance activities	Other financial service activities, except insurance and pension funding	10.88
Financial and insurance activities	Trusts, funds and similar financial entities	6.58
Professional, scientific and technical activities	Activities of head offices	6.13

Transportation and storage	Support activities for transportation	4.06
Financial and insurance activities	Insurance	4.05
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	3.76
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	2.55
Information and communication	Other telecommunications activities	2.40
Information and communication	Wired telecommunications activities	1.51
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.20
Manufacturing	Manufacture of paper and paper products	1.08
Professional, scientific and technical activities	Advertising	1.03
total of remaining sectors with a proportion < 1.0%		9.32

3.76% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

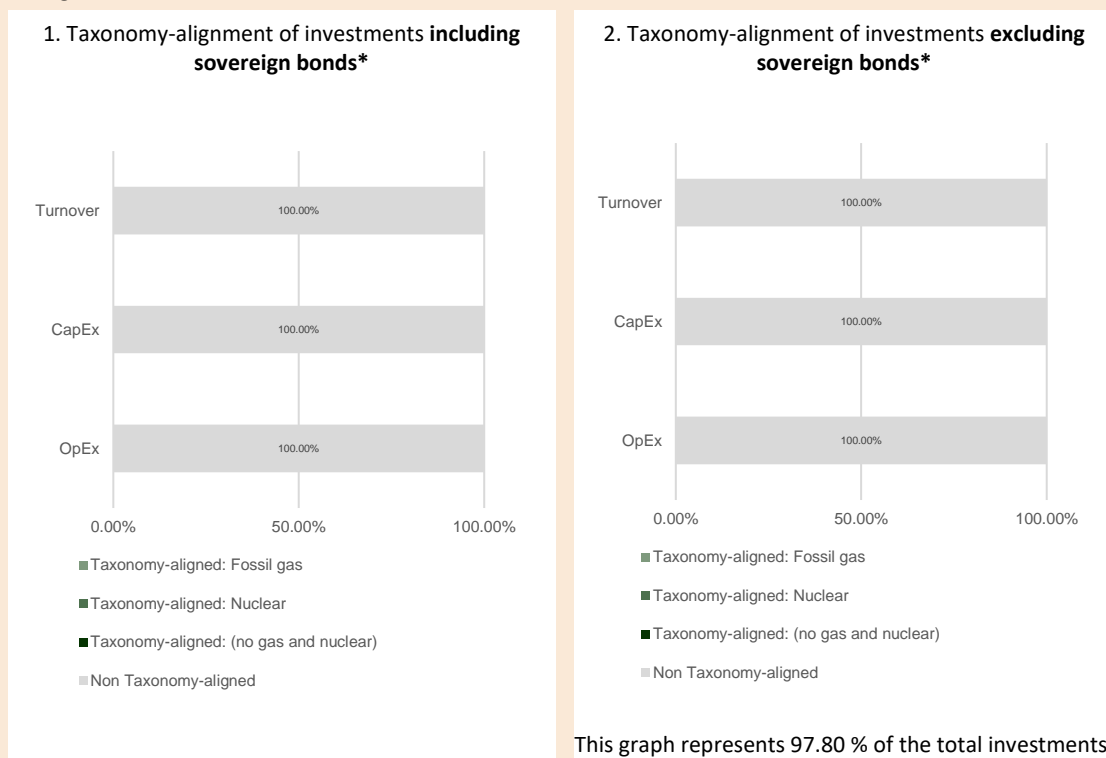

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.12% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 0.68% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 9.23% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.50%) and cash equivalent investments, for liquidity management purposes.
- UCITS/UCIs (3.52%) for investment/ diversification purposes. - Investments (sovereign issuers) not covered by ESG research (2.21%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Global Active Bond

Legal Entity Identifier: 5299008301SVLPAHIM72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.89% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 6.89% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as "greenhouse gas emissions", "biodiversity" or "waste") and social characteristics (such as "inequality", "labour relations", "investment in human capital"), for example because these aspects were integrated in the Investment Manager's ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not have included all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	85.13%	2.53% of corporate issuers obtained a score below 25. The issuers were Poinsettia Finance (score: 16.32), Uzpromstroybank (22.13), Citadel Finance 144A (15.20), EnfraGen Energia (16.57). The Investment Manager has conducted a qualitative analysis of the issuers.
Percentage of investments in securities of sovereign issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	100%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	6.89%	
Sub-Fund's combined weighted average ESG rating (for corporates "Management Score", for sovereigns "Factors Score", provided by Sustainalytics, a third-party ESG data provider) compared to the global bond investment universe (i.e. represented by its benchmark, Bloomberg Global Aggregate Index (EUR Hedged)) weighted average rating	Sub-Fund: 61.85 Benchmark: 57.58	
Percentage of securities covered by ESG analysis	90.40%	

● **... And compared to previous periods?**

Percentage of securities covered by ESG analysis	90.40%	N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer should have had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric will be used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria are met, as described below). As an issuer could contribute to an environmental (climate change mitigation, responsible use of natural resources) and a social (addressing basic needs, empowerment) objective at the same time, an investment could be counted as sustainable investment with an environmental objective and sustainable investment with a social objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in one of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE A, B, D and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Vontobel Fund – Credit Opportunities E USD	Financial and insurance activities	9.56	Luxembourg
Bond France	Public administration and defense; compulsory social security	2.30	France
Bond Germany	Public administration and defense; compulsory social security	2.11	Germany
Bond Spain	Public administration and defense; compulsory social security	2.08	Spain
Bond Germany	Public administration and defense; compulsory social security	1.59	Germany
Bond France	Public administration and defense; compulsory social security	1.20	France
Bond Germany	Public administration and defense; compulsory social security	1.14	Germany
Bond Germany	Public administration and defense; compulsory social security	1.14	Germany
HSBC	Financial and insurance activities	1.08	United Kingdom
Bond Germany	Public administration and defense; compulsory social security	1.05	Germany
QBE Insurance Group	Financial and insurance activities	1.01	Australia
Autopista Rio Magdalena	Financial and insurance activities	0.99	Colombia
Axa	Financial and insurance activities	0.95	France
EBRD	Financial and insurance activities	0.92	United Kingdom

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/09/2023-31/08/2024

Banque Ouest-Africaine de Developpement	Financial and insurance activities	0.90	Togo
-----------------------------------------	------------------------------------	------	------

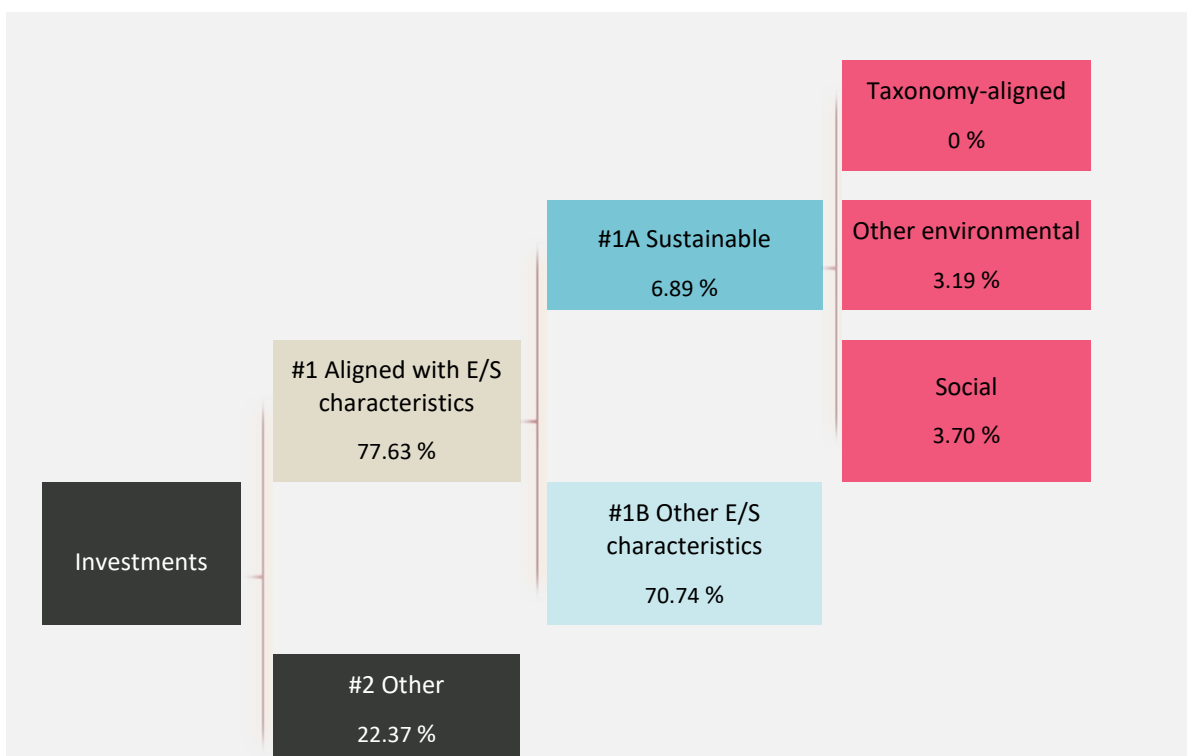

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 77.63% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Monetary intermediation	18.59
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	17.97

Financial and insurance activities	Activities of holding companies	15.31
Financial and insurance activities	Other financial service activities, except insurance and pension funding	15.09
Financial and insurance activities	Trusts, funds and similar financial entities	11.94
Financial and insurance activities	Insurance	2.77
Transportation and storage	Support activities for transportation	1.59
Professional, scientific and technical activities	Activities of head offices	1.04
total of remaining sectors with a proportion < 1.0%		6.82

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

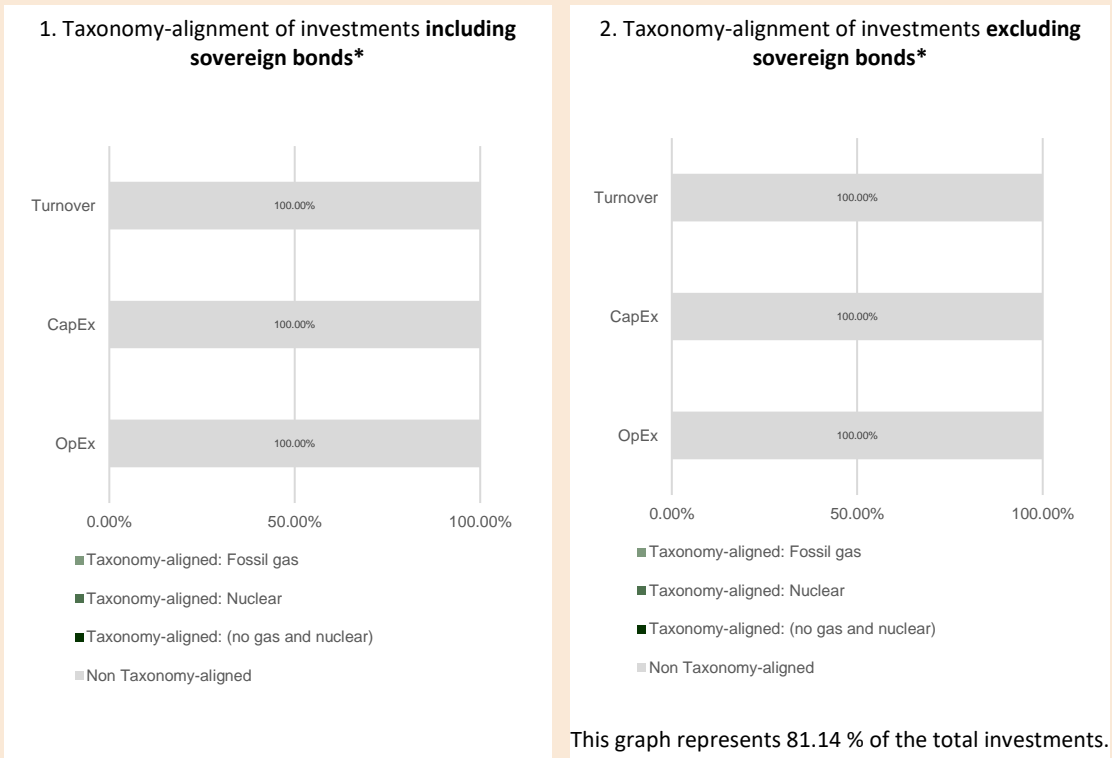

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 3.19% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 3.70% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 22.37% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (4.48%) and cash equivalent investments, for liquidity management purposes.
- UCITS/UCIs (9.62%) for investment/diversification purposes. Minimum environmental and social safeguards did not apply (SFDR Art. 6 fund)
- Investments not covered by ESG research (8.27%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

The Sub-Fund was merged into Vontobel Fund – Global Active Bond as of March 4, 2024. Please take into consideration that the disclosure for this Sub-Fund is therefore based on data as of period-end February 29, 2024, and not as of the Fund’s financial year-end (August 31, 2024). Where data is related to the financial year-end, “N/A” or “Not applicable” values are shown instead.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Value Bond

Legal Entity Identifier: 529900K5NFXE0V8RNQ14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="checkbox"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, it partially targets instruments providing solutions to environmental challenges, i.e. climate change.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of sovereign issuers with UN and EU sanctions	N/A	
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, potentially subject to the Investment Manager's review)	N/A	
Percentage of investments in securities of corporate issuers that pass the minimum environmental rating that has been set for this Sub-Fund (applied unless the corporate issuer has an MSCI ESG rating between A and AAA; minimum is set between 2.4 and 6.5 out of 10, depending on the sector)	N/A	
Percentage of investments in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, based on a proprietary methodology)	N/A	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues.	N/A	
Percentage of investments in green and/or sustainability bonds	N/A	
Percentage of securities covered by ESG analysis	N/A	

● **... And compared to previous periods?**

Financial year of the Fund ending on 4 March	2024	2023

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered a set of principal adverse impacts on sustainability factors in the following areas:

- controversial weapons (Table 1 – PAI indicator 14: Exposure to controversial weapons),
- social matters and human rights (Table 1 – PAI indicator 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
- climate and other environment-related indicators (Table 1 – PAI indicator 1: GHG emissions (Scope 1 and 2), Scope 1 GHG emissions, Scope 2 GHG emissions, Total GHG emissions (Scope 1 and 2), PAI indicator 2: Carbon footprint, PAI indicator 3: GHG intensity of investee companies, PAI indicator 4: Exposure to companies active in the fossil fuel sector, PAI indicator 5: Share of non-renewable energy consumption and production, PAI indicator 6: Energy consumption intensity per high impact climate sector, PAI indicator 7: Activities negatively affecting biodiversity-sensitive areas, PAI indicator 8: Emissions to water, PAI indicator 9: Hazardous waste and radioactive waste ratio),
- and social aspects for sovereigns (PAI indicator 16: Investee countries subject to social violations).

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Vontobel Fund – Credit Opportunities E USD	Financial and insurance activities	9.81	Luxembourg
Bond Spain	Public administration and defence; compulsory social security	4.80	Spain
Bond France	Public administration and defence; compulsory social security	4.15	France
Caixabank	Financial and insurance activities	1.85	Spain
Axa	Financial and insurance activities	1.52	France
Banco Santander	Financial and insurance activities	1.38	Spain
Goldman Sachs	Financial and insurance activities	1.34	United States
Raiffeisen Schweiz Genossenschaft	Financial and insurance activities	1.27	Switzerland
Bond France	Public administration and defence; compulsory social security	1.23	France
Kreditanstalt für Wiederaufbau	Financial and insurance activities	1.23	Germany
Banco Santander	Financial and insurance activities	1.20	Spain
Intesa Sanpaolo	Financial and insurance activities	1.20	Italy
Sampo	Financial and insurance activities	1.20	Finland
Commerzbank	Financial and insurance activities	1.00	Germany
Standard Chartered	Financial and insurance activities	0.98	United Kingdom

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (30/11/2023 and 29/02/2024) of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-04/03/2024

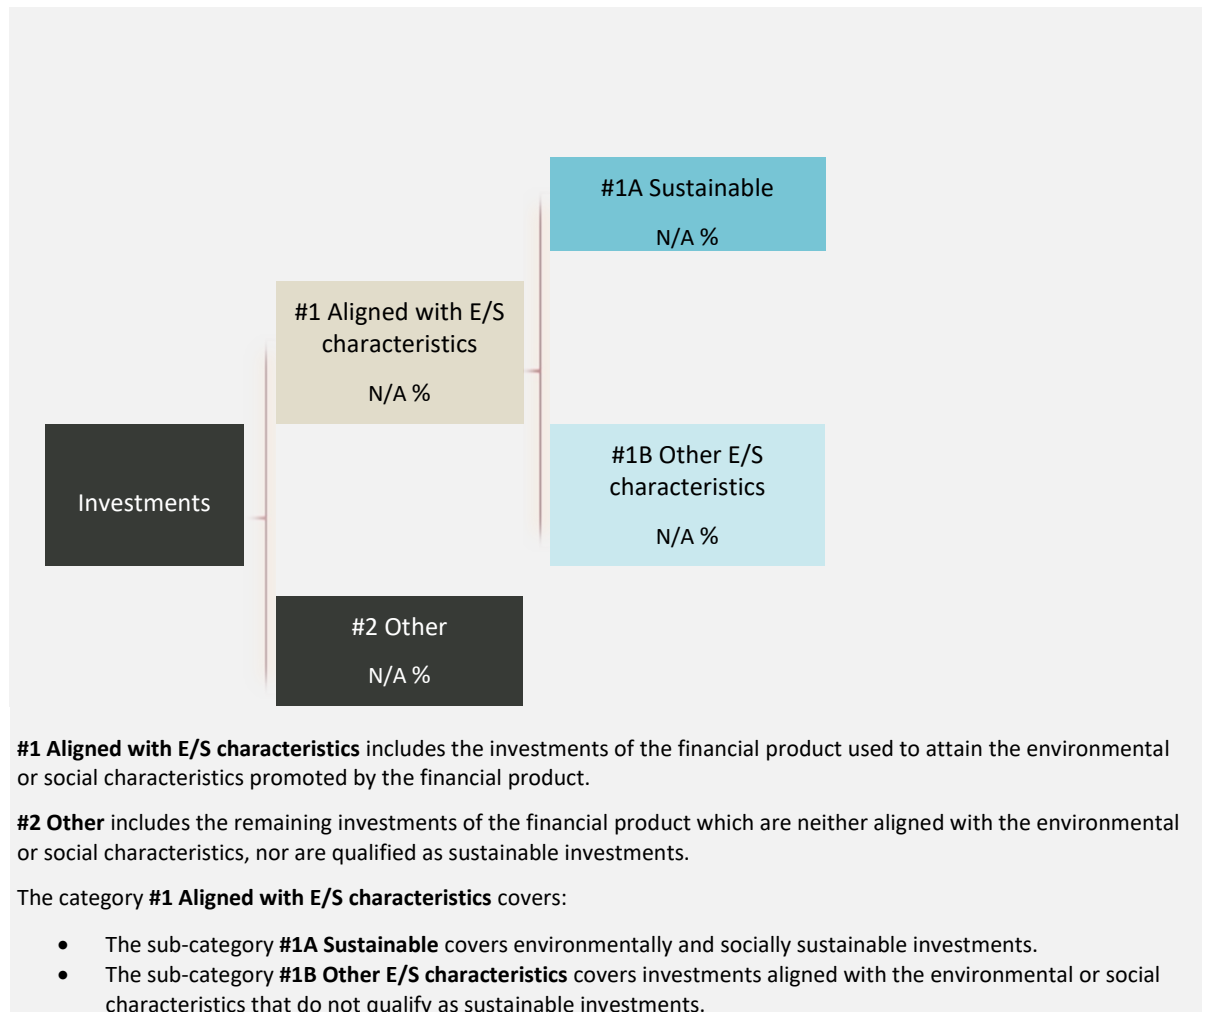

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Monetary intermediation	24.89
Financial and insurance activities	Activities of holding companies	15.98
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	12.45
Financial and insurance activities	Trusts, funds and similar financial entities	11.19
Financial and insurance activities	Other financial service activities, except insurance and pension funding	8.49
Financial and insurance activities	Insurance	2.44
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.46
Transportation and storage	Support activities for transportation	1.17
Manufacturing	Manufacture of coke and refined petroleum products	1.06

Mining and quarrying	Extraction of crude petroleum and natural gas	1.05
Professional, scientific and technical activities	Activities of head offices	1.01
total of remaining sectors with a proportion < 1.0%		5.26

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (30/11/2023 and 29/02/2024) of the financial year.

2.11% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
N/A	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

The Sub-Fund was merged into Vontobel Fund – Global Active Bond as of March 4, 2024. Please take into consideration that the disclosure for this Sub-Fund is therefore based on data as of period-end February 29, 2024, and not as of the Fund’s financial year-end (August 31, 2024). Where data is related to the financial year-end, “N/A” or “Not applicable” values are shown instead.

Product Name: Vontobel Fund – Absolute Return Bond (EUR)

Legal Entity Identifier: 529900DZ5E6DQ6YJLA73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

NO

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, it partially targets instruments providing solutions to environmental challenges, i.e. climate change.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of sovereign issuers with UN and EU sanctions	N/A	
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, potentially subject to the Investment Manager's review)	N/A	
Percentage of investments in securities of corporate issuers that pass the minimum environmental rating that has been set for this Sub-Fund (applied unless the corporate issuer has an MSCI ESG rating between A and AAA; minimum is set between 2.4 and 6.5 out of 10, depending on the sector)	N/A	
Percentage of investments in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile based on a proprietary methodology)	N/A	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues.	N/A	
Percentage of investments in green and/or sustainability bonds	N/A

---------------------------------------------------------------------------------------	--	-------------------------------------------------------------------------

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered a set of principal adverse impacts on sustainability factors in the following areas:

- controversial weapons (Table 1 – PAI indicator 14: Exposures to controversial weapons),
- social matters and human rights (Table 1 – PAI indicator 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
- climate and other environment-related indicators (Table 1 – PAI indicator 1: GHG emissions (Scope 1 and 2), Scope 1 GHG emissions, Scope 2 GHG emissions, Total GHG emissions (Scope 1 and 2), PAI indicator 2: Carbon footprint, PAI indicator 3: GHG intensity of investee companies, PAI indicator 4: Exposure to companies active in the fossil fuel sector, PAI indicator 5: Share of non-renewable energy consumption and production, PAI indicator 6: Energy consumption intensity per high impact climate sector, PAI indicator 7: Activities negatively affecting biodiversity-sensitive areas, PAI indicator 8: Emissions to water, PAI indicator 9: Hazardous waste and radioactive waste ratio),
- and social aspects for sovereigns (PAI indicator 16: Investee countries subject to social violations).

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Stora Enso	Manufacturing	1.10	Finland
Banco Santander	Financial and insurance activities	1.08	Spain
Zurich Finance Ireland	Financial and insurance activities	1.07	Ireland
Intesa Sanpaolo	Financial and insurance activities	1.06	Italy

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (30/11/2023 and 29/02/2024) of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-04/03/2024

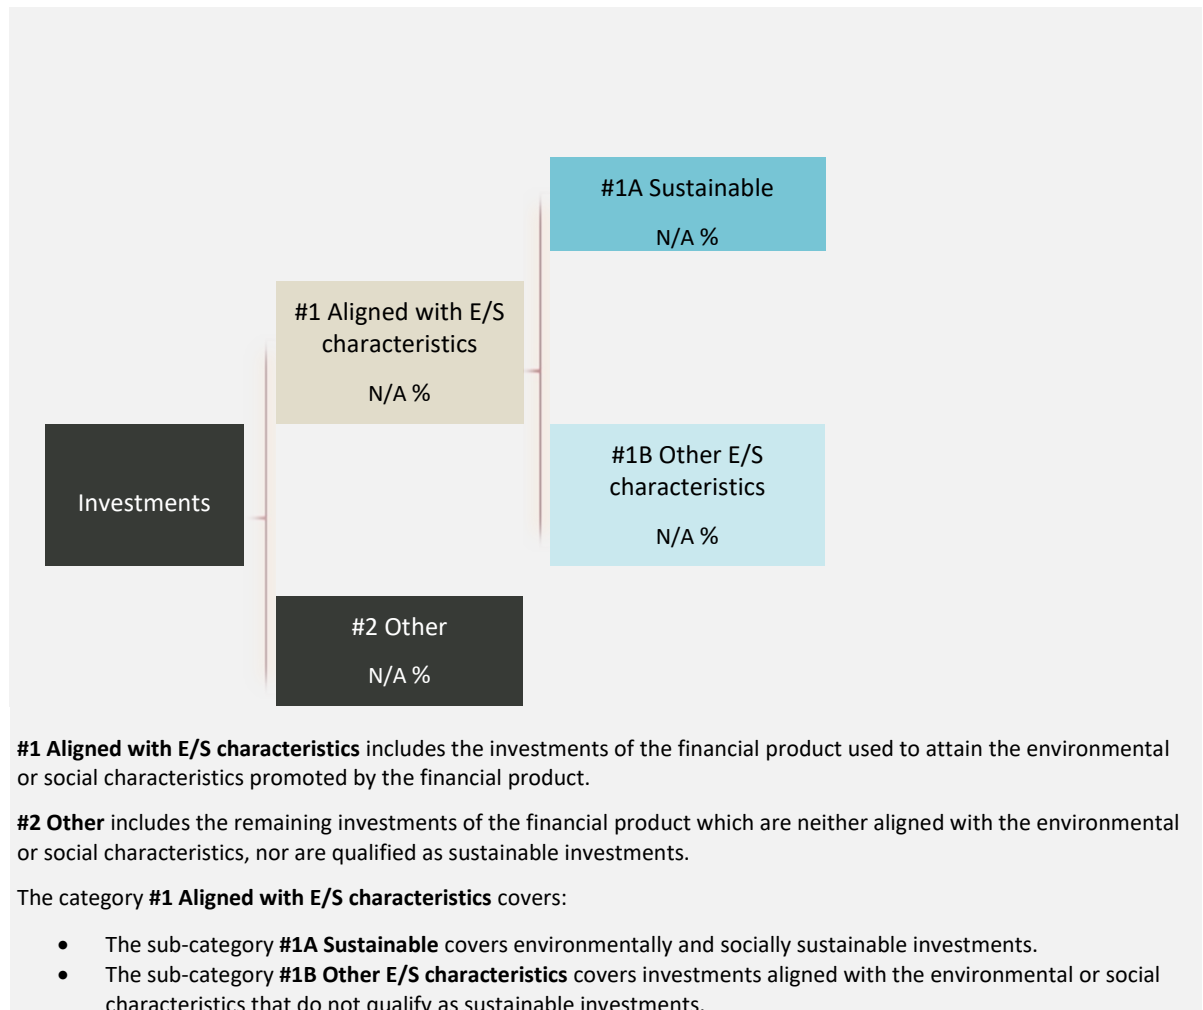

What was the proportion of sustainability-related investments?

Not applicable.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Monetary intermediation	25.70
Financial and insurance activities	Activities of holding companies	16.12
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	13.80
Financial and insurance activities	Trusts, funds and similar financial entities	11.82
Financial and insurance activities	Other financial service activities, except insurance and pension funding	11.14
Financial and insurance activities	Insurance	2.66
Professional, scientific and technical activities	Activities of head offices	1.36
Transportation and storage	Support activities for transportation	1.15

Manufacturing	Manufacture of paper and paper products	1.10
Information and communication	Other telecommunications activities	1.08
total of remaining sectors with a proportion < 1.0%		5.68

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (30/11/2023 and 29/02/2024) of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
N/A	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

● **What was the share of socially sustainable investments?**

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Sustainable Emerging Markets Local Currency Bond **Legal Entity Identifier:** 529900GEEVRUYGQ2C28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input type="checkbox"/> YES	<input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.06% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were partially met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 24.06% in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date, the Investment Manager therefore performed additional analysis of the issuers.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of sovereign issuers, that are considered "non-democratic", based on a third-party research provider (Freedom House)	0%	
Percentage of investments in securities of sovereign issuers with UN or international sanctions	0%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Percentage of investments in supranational issuers that pass the minimum ESG rating that has been set for this Sub-Fund (based on a proprietary methodology, minimum is set at 50 out of 100)	100%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	24.06%	
Sub-Fund's weighted average ESG rating (for securities of sovereign issuers) compared to its Benchmark, namely J.P Morgan GBI-EM Global Diversified Composite USD (based on a proprietary methodology)	Sub-Fund: 62.72 Benchmark: 58.19	
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of sovereign issuers, that are considered "non-democratic", based on a third-party research provider (Freedom House)	0%	0%
Percentage of investments in securities of sovereign issuers with UN or international sanctions	0%	0%
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	0%

Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	24.06%	23.25%
Sub-Fund's weighted average ESG rating (for securities of sovereign issuers) compared to its Benchmark, namely J.P Morgan GBI-EM Global Diversified Composite USD (based on a proprietary methodology)	Sub-Fund: 62.72 Benchmark: 58.19	Sub-Fund: 62.04 Benchmark: 58.38
Percentage of securities covered by ESG analysis	100%	100%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer “allocated funding”, if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

----- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

----- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section of the pre-contractual disclosure annex) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B, C, D, F, H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond Malaysia	Public administration and defence; compulsory social security	5.47	Malaysia
Bond Poland	Public administration and defence; compulsory social security	5.32	Poland
Bond Brazil	Public administration and defence; compulsory social security	3.93	Brazil
Bond Mexico	Public administration and defence; compulsory social security	3.39	Mexico
Bond Malaysia	Public administration and defence; compulsory social security	2.90	Malaysia
Bond Czech Republic	Public administration and defence; compulsory social security	2.89	Czech Republic
Asian Development Bank	Manufacturing	2.81	Philippines
Bond Indonesia	Public administration and defence; compulsory social security	2.79	Indonesia
Inter-American Development Bank	Financial and insurance activities	2.62	United States
EBRD	Financial and insurance activities	2.62	United Kingdom
Asian Development Bank	Financial and insurance activities	2.49	Philippines
Bond South Africa	Public administration and defence; compulsory social security	2.36	South Africa
Bond Botswana	Public administration and defence; compulsory social security	2.32	Botswana
Bond Chile	Public administration and defence; compulsory social security	2.21	Chile
Bond Hungary	Public administration and defence; compulsory social security	2.19	Hungary

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

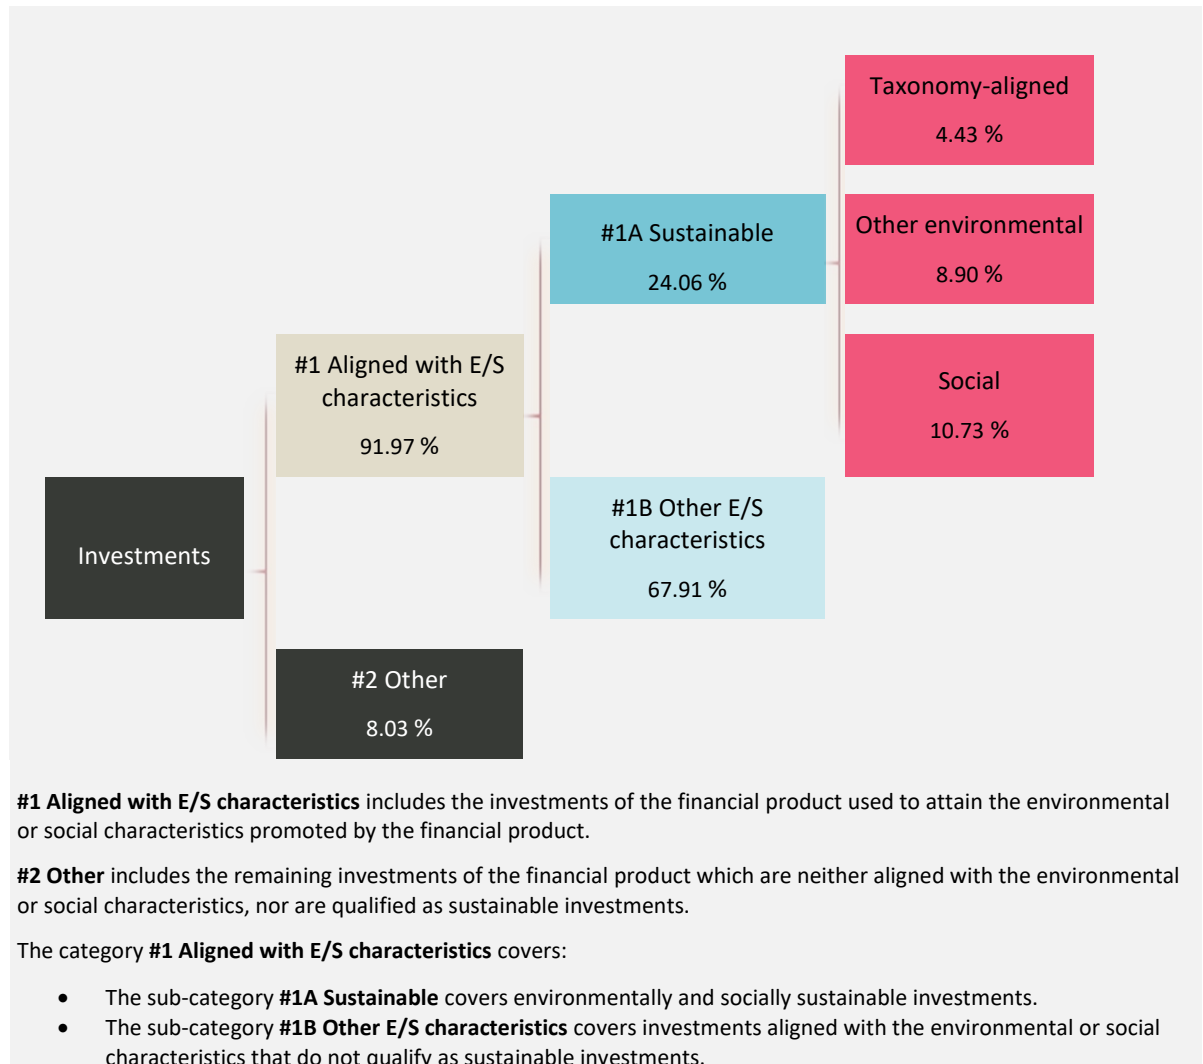

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 91.97% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	70.78
Financial and insurance activities	Other financial service activities, except insurance and pension funding	15.52
Manufacturing	Manufacture of wearing apparel	2.94
Financial and insurance activities	Monetary intermediation	1.21
total of remaining sectors with a proportion < 1.0%		1.02

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
4.43	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 8.90% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 10.73% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 8.03% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (8.03%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. Their application led to the exclusion of 21.6% of the investments considered prior to the application of the investment strategy (i.e. sovereign local currency emerging debt market).

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – European Equity

Legal Entity Identifier: WMZ8K5LDTZ4Z1L1E2V22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their	0%	Excluded products and /or activities are referenced in the investment strategy

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

revenues from products and/or activities excluded by the Sub-Fund.		section of the pre-contractual disclosure annex
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Sub-Fund's weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund's benchmark (MSCI Europe Index TR net).	60.05 tons CO2e/USD million revenue (Sub-Fund) vs 79.76 tons CO2e/USD million revenue (benchmark)	
Percentage of securities covered by ESG analysis	100%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
RELX	Publishing of books, periodicals and other publishing activities	6.04	United Kingdom
London Stock Exchange Group	Activities auxiliary to financial services, except insurance and pension funding	5.28	United Kingdom
Wolters Kluwer	Publishing of books, periodicals and other publishing activities	4.54	Netherlands
EssilorLuxottica	Other manufacturing	4.46	France
Air Liquide	Manufacture of chemicals and chemical products	4.08	France
Nestlé	Activities of head offices	3.88	Switzerland
Alcon	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.87	Switzerland
Inwit	Wireless telecommunications activities	3.83	Italy
Accenture 'A'	Management consultancy activities	3.73	Ireland
Experian	Business support service activities n.e.c.	3.62	Jersey

Vinci	Activities of head offices	3.54	France
L'Oreal	Activities of head offices	3.17	France
Ferrari	Activities of holding companies	3.14	Netherlands
Halma	Activities of head offices	2.65	United Kingdom

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/09/2023-31/08/2024

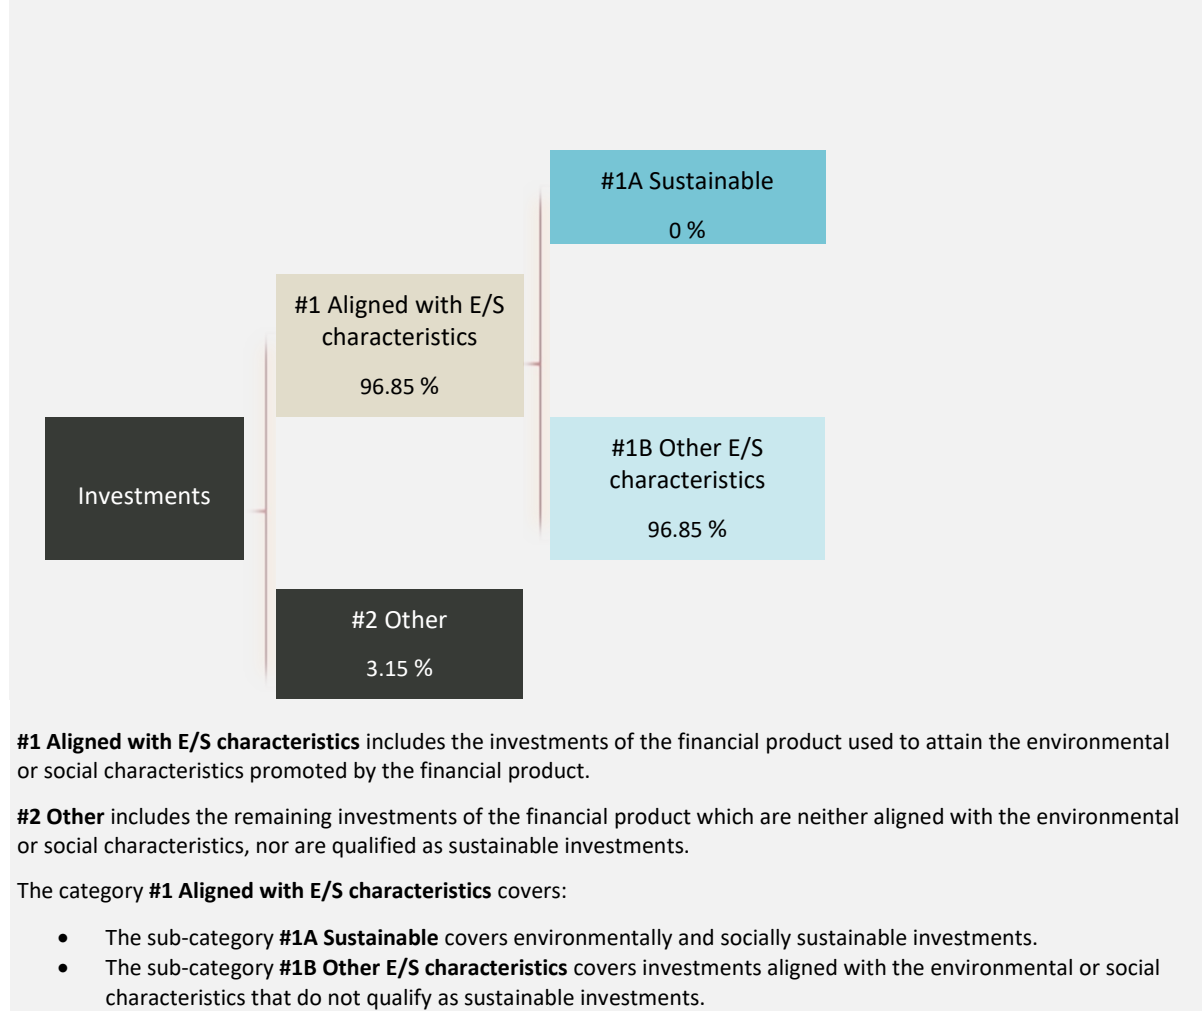

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 96.85 % (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Professional, scientific and technical activities	Activities of head offices	28.36
Information and communication	Publishing of books, periodicals and other publishing activities	10.58
Financial and insurance activities	Activities of holding companies	7.93
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	5.28
Manufacturing	Manufacture of chemicals and chemical products	5.06

Manufacturing	Other manufacturing	4.46
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	4.43
Information and communication	Wireless telecommunications activities	3.83
Professional, scientific and technical activities	Management consultancy activities	3.73
Administrative and support service activities	Business support service activities n.e.c.	3.62
Information and communication	Computer programming, consultancy and related activities	3.60
Information and communication	Data processing, hosting and related activities; web portals	3.33
Arts, entertainment and recreation	Gambling and betting activities	2.76
Administrative and support service activities	Rental and leasing of other machinery, equipment and tangible goods	2.00
Manufacturing	Manufacture of beverages	2.00
Retail trade, except of motor vehicles and motorcycles	Retail sale of other goods in specialized stores	1.79
Wholesale trade, except of motor vehicles and motorcycles	Non-specialized wholesale trade	1.77
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.74
total of remaining sectors with a proportion < 1.0%		0.75

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 3.15% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (3.15%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – US Equity

Legal Entity Identifier: 529900V0F1A5URWGJS61

Environmental and/or social characteristics

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="radio"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.35% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 37.35% of its net assets in securities of issuers that qualified as sustainable investment based on the Investment Manager’s Sustainable Development Goal (SDG) assessment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanism relate directly to one of these characteristics. The ESG assessment framework may not have included all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer was operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	Excluded products and /or activities are referenced in the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (S&P 500 – TR).	58.53 tons CO2e/USD million revenue (Sub-Fund) vs 98.13 tons CO2e/USD million revenue (benchmark)	
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	0%
Sub-Fund’s weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund’s benchmark (S&P 500 – TR).	58.53 tons CO2e/USD million revenue (Sub-Fund) vs 98.13 tons CO2e/USD million revenue (benchmark)	31.21 tons CO2e/USD million revenue (Sub-Fund) vs 113.83 tons CO2e/USD million revenue (benchmark)
Percentage of securities covered by ESG analysis	100%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product made was to invest in securities of issuers that contribute to at least one of the Sustainable Development Goals (SDGs). The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment, on the one hand of “operations” (measured based on a scorecard) and on the other hand of “products and services” (measured based on revenues – if an issuer derives more than 20% of its revenues from economic activities that contribute to at least one of the SDGs, it will be considered a sustainable investment). For both aspects, the companies’ economic activities were classified in one of the following four buckets: “Significant Harm”, “Neutral”, “In transition”, “Positive contribution”. In order to qualify as a sustainable investment, and apart from following good governance, the company:

- Must not have had any aspect of its economic activities classified as “Significant Harm”
- Must have had at least one aspect of its economic activities classified as “In transition” or “Positive contribution”

The Sub-Fund did not commit to invest a minimum share in sustainable investments with an environmental objective as defined by the EU Taxonomy.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund ; (ii) involved in severe controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Microsoft	Software publishing	6.01	United States
Amazon.com	Retail trade not in stores, stalls or markets	5.95	United States
Coca-Cola	Manufacture of food products	4.71	United States
Intercontinental Exchange	Activities auxiliary to financial services, except insurance and pension funding	4.44	United States
Mastercard	Activities auxiliary to financial services, except insurance and pension funding	4.04	United States
Mondelez International	Manufacture of food products	4.01	United States
UnitedHealth Group	Activities of head offices	3.71	United States
CME Group	Activities auxiliary to financial services, except insurance and pension funding	3.65	United States
RB Global	Business support service activities n.e.c.	3.42	Canada
Adobe	Software publishing	3.38	United States

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Abbott Laboratories	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.22	United States
Alphabet 'C'	Computer programming, consultancy and related activities	3.20	United States
Intuit	Software publishing	3.04	United States
Boston Scientific	Other manufacturing	3.04	United States
Becton Dickinson & Co	Other manufacturing	2.89	United States

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

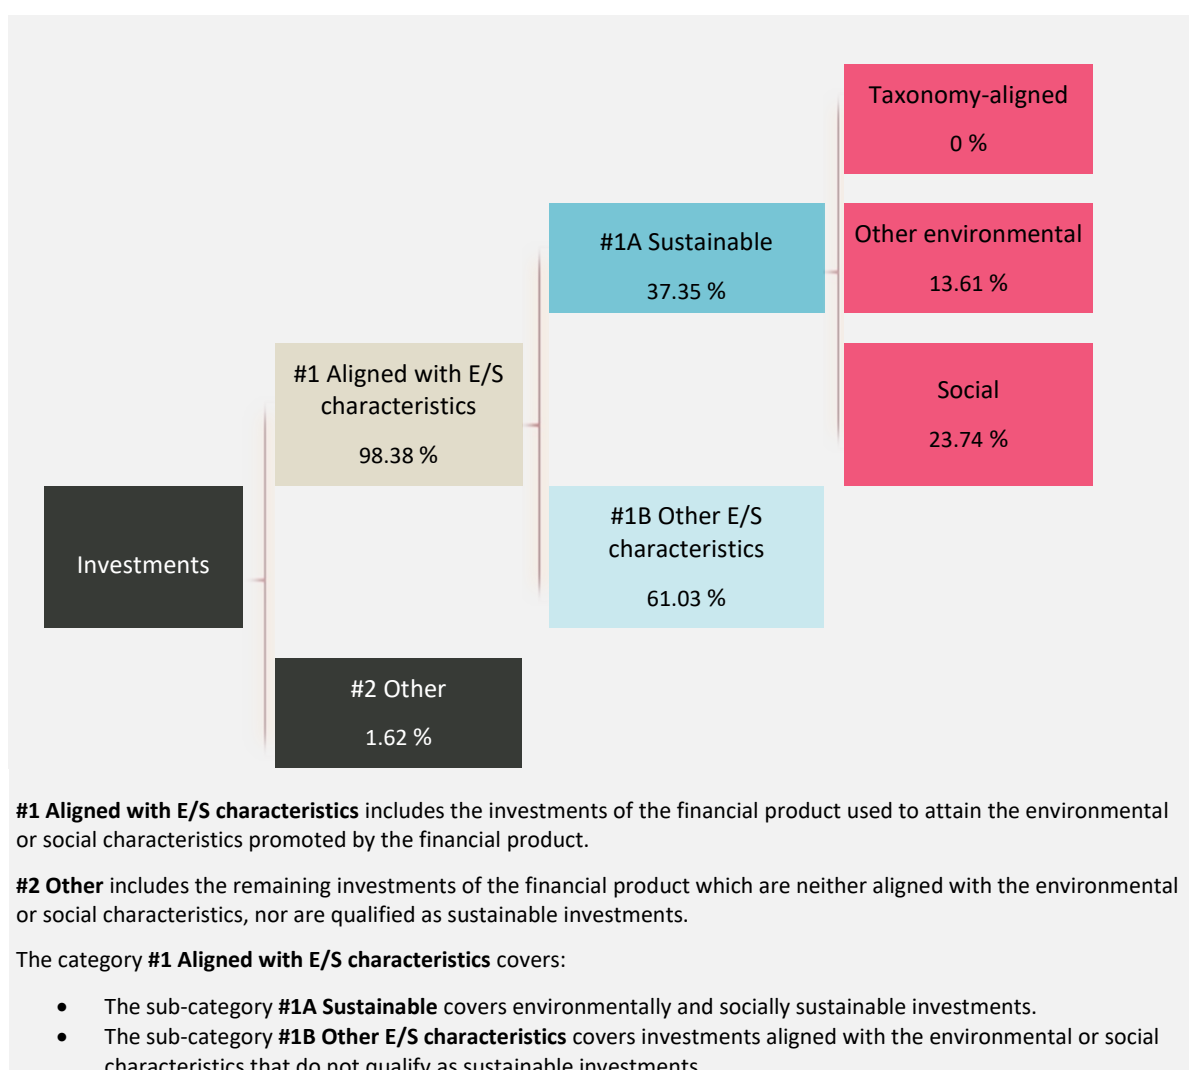

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.38% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	14.29
Information and communication	Software publishing	13.99
Manufacturing	Manufacture of food products	9.38
Information and communication	Computer programming, consultancy and related activities	6.79
Manufacturing	Manufacture of computer, electronic and optical products	6.49
Manufacturing	Other manufacturing	6.14
Retail trade, except of motor vehicles and motorcycles	Retail trade not in stores, stalls or markets	5.95
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	4.18
Financial and insurance activities	Activities of holding companies	3.90
Professional, scientific and technical activities	Activities of head offices	3.71
Administrative and support service activities	Business support service activities n.e.c.	3.42
Retail trade, except of motor vehicles and motorcycles	Retail sale in non-specialized stores with food, beverages or tobacco predominating	2.71
Manufacturing	Manufacture of beverages	2.58
Information and communication	Wireless telecommunications activities	1.61
Retail trade, except of motor vehicles and motorcycles	Other retail sale in non-specialized stores	1.45
Transportation and storage	Freight rail transport	1.41
Mining and quarrying	Other mining and quarrying	1.38
Manufacturing	Manufacture of other non-metallic mineral products	1.25
Manufacturing	Manufacture of chemicals and chemical products	1.11
Retail trade, except of motor vehicles and motorcycles	Retail sale of other household equipment in specialized stores	1.09
Information and communication	Data processing, hosting and related activities; web portals	1.06
Wholesale and retail trade; repair of motor vehicles and motorcycles	Sale of cars and light motor vehicles	1.04
total of remaining sectors with a proportion < 1.0%		3.82

The portfolio proportions of investments presented above are an average over the reference period.

1.38% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹***

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.61% for this Sub-Fund.

As a US equity strategy, the investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment therein.

What was the share of socially sustainable investments?

The Sub-Fund invested 23.74% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.62% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.62%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Global Equity

Legal Entity Identifier: HKDKDIFFGRVL37GZF444

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part	0%	Excluded products and /or activities are referenced in the

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

of their revenues from products and/or activities excluded by the Sub-Fund.		investment strategy section of the pre-contractual disclosure annex

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Microsoft	Software publishing	6.25	United States

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

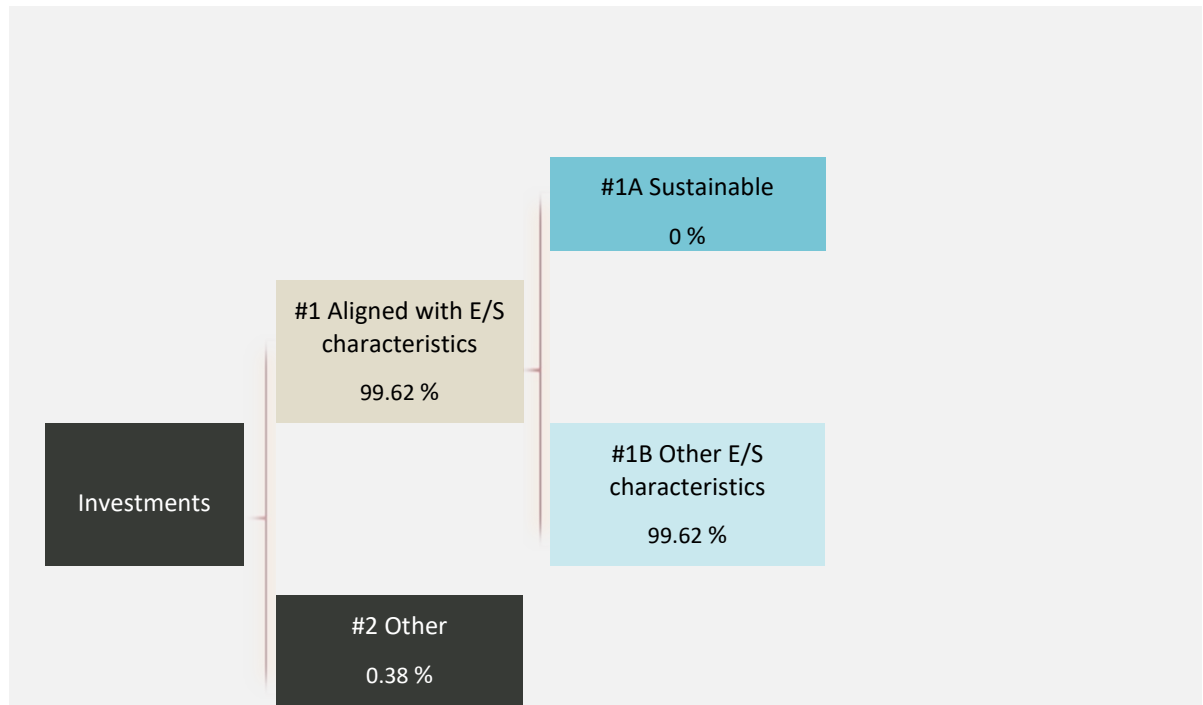

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.62 % (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	11.41
Professional, scientific and technical activities	Activities of head offices	10.94
Information and communication	Computer programming, consultancy and related activities	10.83
Information and communication	Software publishing	9.22
Manufacturing	Other manufacturing	7.88
Manufacturing	Manufacture of food products	7.42

Manufacturing	Manufacture of computer, electronic and optical products	6.24
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	5.22
Retail trade, except of motor vehicles and motorcycles	Retail trade not in stores, stalls or markets	5.16
Information and communication	Publishing of books, periodicals and other publishing activities	4.47
Financial and insurance activities	Monetary intermediation	3.82
Manufacturing	Manufacture of chemicals and chemical products	3.03
Arts, entertainment and recreation	Gambling and betting activities	2.92
Administrative and support service activities	Business support service activities n.e.c.	2.65
Retail trade, except of motor vehicles and motorcycles	Retail sale in non-specialized stores with food, beverages or tobacco predominating	1.96
Mining and quarrying	Other mining and quarrying	1.63
Administrative and support service activities	Rental and leasing of other machinery, equipment and tangible goods	1.35
Information and communication	Data processing, hosting and related activities; web portals	1.22
total of remaining sectors with a proportion < 1.0%		1.68

The portfolio proportions of investments presented above are an average over the reference period.

1.63% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial

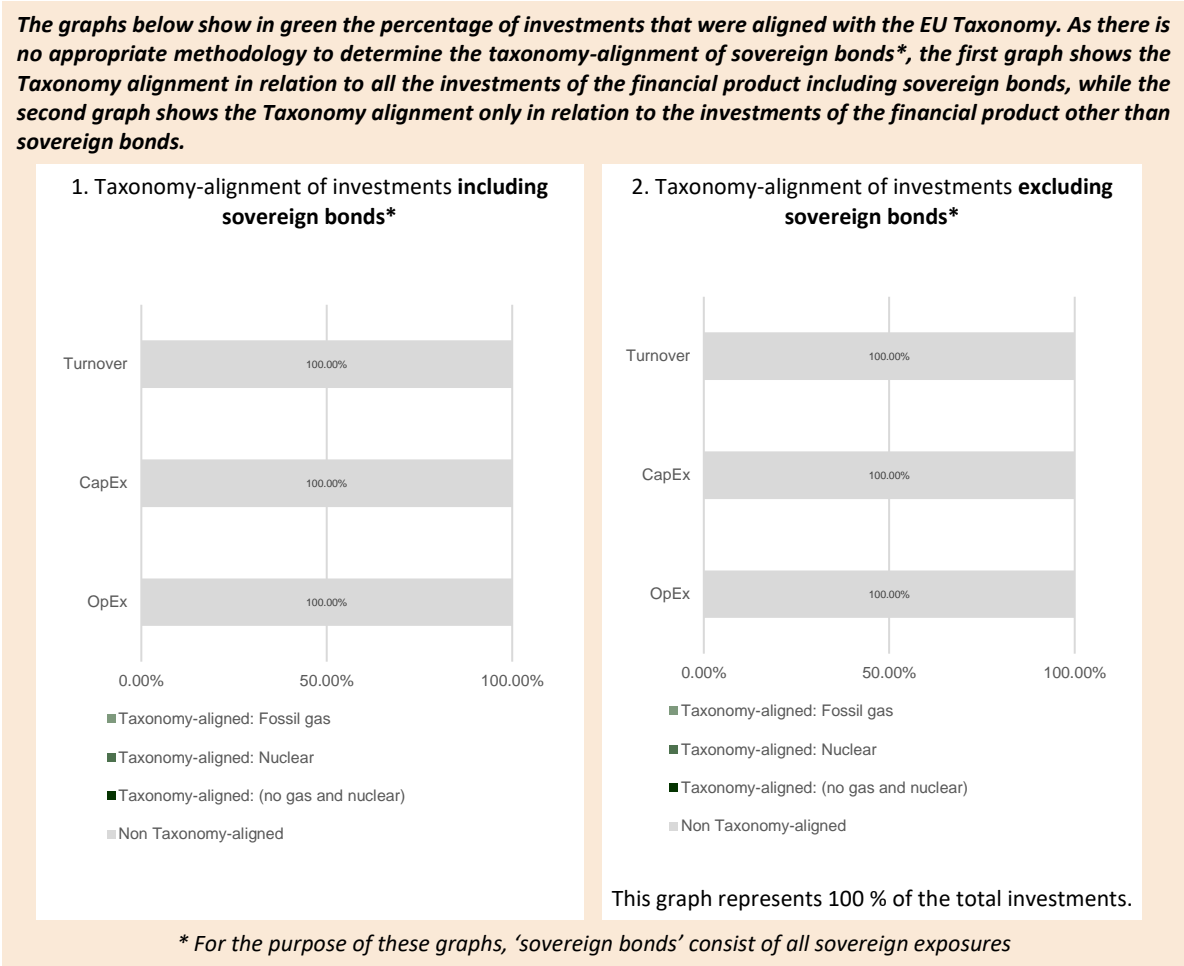

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

 **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “Other” investments represented 0.38% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (0.38%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

 **How did this financial product perform compared to the reference benchmark?**

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Global Equity Income

Legal Entity Identifier: FHGZV6FG3E781BD7B132

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part	0%	Excluded products and /or activities are referenced in the investment

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

of their revenues from products and/or activities excluded by the Sub-Fund.		strategy section of the pre-contractual disclosure annex
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0	During the reporting period, there were two potential breaches of UNGC standards. After review, a positive outlook has been identified by the Research and ESG Analyst(s) and confirmed by Investment Risk.
Sub-Fund's weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund's benchmark (MSCI All Country World Index TR net).	57.41 tons CO2e/USD million revenue (Sub-Fund) vs 122.10 tons CO2e/USD million revenue (benchmark)

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the adverse impact areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Power Grid Corporation of India	Other personal service activities	4.10	India
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	4.09	Taiwan
CME Group	Activities auxiliary to financial services, except insurance and pension funding	3.96	United States
PepsiCo	Manufacture of beverages	3.88	United States
Coca-Cola	Manufacture of food products	3.42	United States
Vinci	Activities of head offices	3.42	France
Nestlé	Activities of head offices	3.29	Switzerland
RELX	Publishing of books, periodicals and other publishing activities	3.11	United Kingdom
Johnson & Johnson	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.93	United States
Roche Holding	Activities of head offices	2.91	Switzerland
TJX Companies	Retail sale of other goods in specialized stores	2.55	United States
Genuine Parts	Wholesale trade of motor vehicle parts and accessories	2.54	United States
Medtronic Holdings	Other human health activities	2.42	Ireland
Comcast	Wired telecommunications activities	2.29	United States
UTD Overseas Bank/Local	Monetary intermediation	2.19	Singapore

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

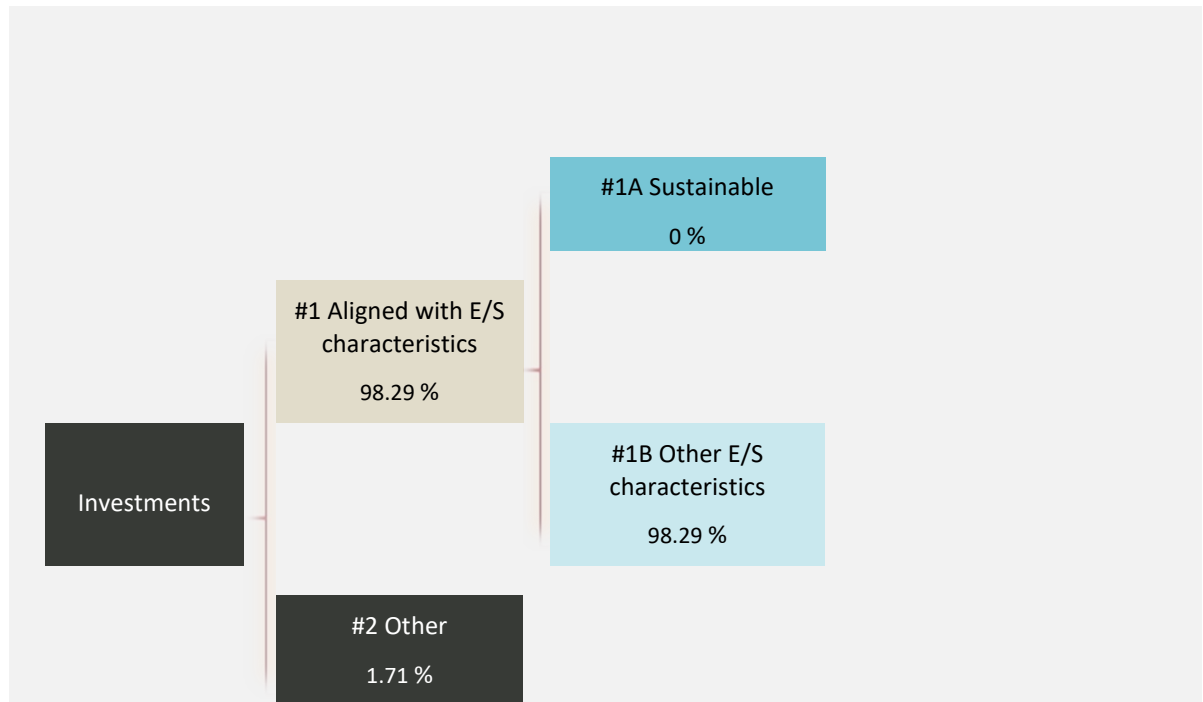

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.29 % (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Professional, scientific and technical activities	Activities of head offices	18.30
Financial and insurance activities	Activities of holding companies	10.71
Financial and insurance activities	Monetary intermediation	9.91

Human health and social work activities	Other human health activities	2.42
Retail trade, except of motor vehicles and motorcycles	Retail sale in non-specialized stores with food, beverages or tobacco predominating	2.05
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of clothing and footwear	1.98
Information and communication	Wireless telecommunications activities	1.35
Financial and insurance activities	Other financial service activities, except insurance and pension funding	1.22
Manufacturing	Manufacture of chemicals and chemical products	1.18
total of remaining sectors with a proportion < 1.0%		0.46

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

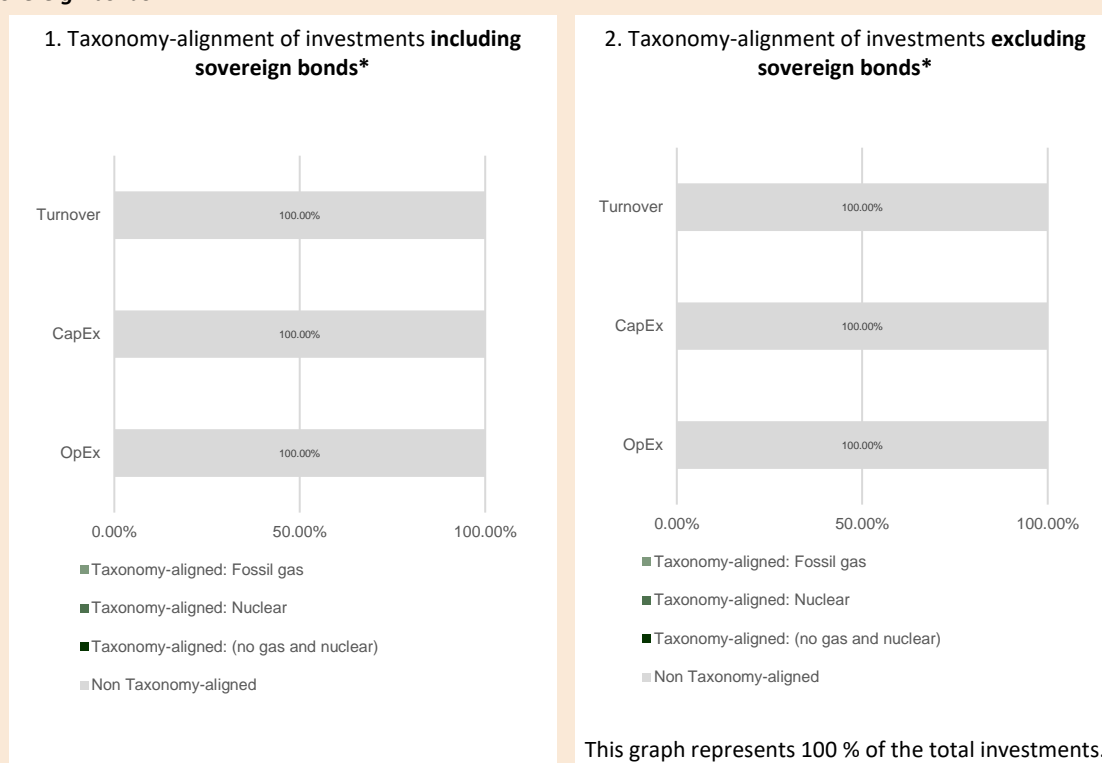

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “Other” investments represented 1.71% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.71%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Emerging Markets Equity

Legal Entity Identifier: ZM4Q3MBON4HNUYCJQU59

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible	0%	Excluded products and /or activities are referenced in the investment

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	7.25	Taiwan
Tencent Holdings	Other telecommunications activities	6.35	Cayman Islands
Samsung Electronics	Manufacture of computer, electronic and optical products	5.06	Korea, Republic Of
Raia Drogasil	Activities of head offices	3.16	Brazil
HDFC Bank	Monetary intermediation	2.69	India
Reliance Industries	Mining support service activities	2.64	India
President Chain Store	Retail sale in non-specialized stores with food, beverages or tobacco predominating	2.56	Taiwan
Eicher Motors	Manufacture of electrical equipment	2.47	India
Bank Rakyat Indonesia TBK PT	Monetary intermediation	2.24	Indonesia
Fomento Economico Mexicano	Activities of head offices	2.16	Mexico

Other service activities	Other personal service activities	1.78
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.67
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.57
Information and communication	Data processing, hosting and related activities; web portals	1.38
Administrative and support service activities	Rental and leasing of motor vehicles	1.32
Information and communication	Wireless telecommunications activities	1.29
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of watches and jewelry	1.19
total of remaining sectors with a proportion < 1.0%		9.68

The portfolio proportions of investments presented above are an average over the reference period.

2.64% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

To comply with the EU Taxonomy, the criteria for fossil gas include

Yes

In fossil gas

In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

 **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “Other” investments represented 1.64 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (1.64 %), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

 **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Asia Ex Japan

Legal Entity Identifier: RJECJ6V6FST1O1U2DV25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part	0%	Excluded products and /or activities are referenced in the investment strategy section of

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

of their revenues from products and/or activities excluded by the Sub-Fund		the pre-contractual disclosure annex
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	During the reporting period, there were three potential breaches of UNGC standards. After review, a positive outlook has been identified by the Research and ESG Analyst(s) and confirmed by Investment Risk.
Sub-Fund's weighted average carbon intensity compared to the investment universe. The investment universe is represented by the Sub-Fund's benchmark (MSCI All Country Asia (ex Japan) TR net).	79.28 tons CO2e/USD million revenue (Sub-Fund) vs 301.85 tons CO2e/USD million revenue (benchmark)

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	3	GHG intensity of investee companies
1	7	Activities negatively affecting biodiversity-sensitive areas
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impacts areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	9.40	Taiwan
Tencent Holdings	Other telecommunications activities	7.62	Cayman Islands
Samsung Electronics	Manufacture of computer, electronic and optical products	6.91	Korea, Republic Of
President Chain Store	Retail sale in non-specialized stores with food, beverages or tobacco predominating	3.94	Taiwan
HDFC Bank	Monetary intermediation	3.13	India
Eicher Motors	Manufacture of electrical equipment	2.95	India
Cipla	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.94	India
Reliance Industries	Mining support service activities	2.79	India
Bank Central Asia TBK PT	Monetary intermediation	2.79	Indonesia
Power Grid Corporation of India	Other personal service activities	2.67	India
Tata Consultancy Services	Computer programming, consultancy and related activities	2.61	India
Bank Rakyat Indonesia TBK PT	Monetary intermediation	2.26	Indonesia
Netease	Wireless telecommunications activities	2.23	Cayman Islands
Hindustan Unilever Limited	Manufacture of chemicals and chemical products	2.18	India
Hong Kong Exchanges and Clearing	Activities auxiliary to financial services, except insurance and pension funding	1.97	Hong-Kong

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 97.79% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	23.62
Financial and insurance activities	Monetary intermediation	10.36
Information and communication	Other telecommunications activities	7.62
Professional, scientific and technical activities	Activities of head offices	5.05
Manufacturing	Manufacture of electrical equipment	4.71

Retail trade, except of motor vehicles and motorcycles	Retail sale in non-specialized stores with food, beverages or tobacco predominating	3.94
Information and communication	Computer programming, consultancy and related activities	3.65
Manufacturing	Manufacture of chemicals and chemical products	3.04
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.94
Mining and quarrying	Mining support service activities	2.79
Other service activities	Other personal service activities	2.67

Manufacturing	Manufacture of food products	2.01
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.97
Financial and insurance activities	Insurance	1.88
Human health and social work activities	Hospital activities	1.86
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.61
Information and communication	Data processing, hosting and related activities; web portals	1.48
Financial and insurance activities	Other financial service activities, except insurance and pension funding	1.45
Transportation and storage	Support activities for transportation	1.38
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of watches and jewelry	1.38
Manufacturing	Manufacture of beverages	1.36%
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of other household goods	1.29
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	1.23
Manufacturing	Manufacture of basic metals	1.13
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of other food, including fish, crustaceans and mollusks	1.05
total of remaining sectors with a proportion < 1.0%		2.62

The portfolio proportions of investments presented above are an average over the reference period.

2.79% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹***

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The "Other" investments represented 2.21 % of the Sub-Fund's Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.21%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Energy Revolution

Legal Entity Identifier: 5299008S6UZFDPCGIJ49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges.

The Sub-Fund focused on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes "Transition Materials", "Renewable Energy" and "Low Carbon Energy". Issuers were selected based on the Investment Manager's ESG framework.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in issuers that focus on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes "Transition Materials", "Renewable Energy" and "Low Carbon Energy"	Transition Materials : 20.84% Renewable Energy : 45.96% Low Carbon Energy : 31.75%	The remaining 1.45% is Cash.
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	The exclusion approach defined in the investment strategy of the pre-contractual disclosure annex allows the Sub-Fund to apply exceptions for companies that have a climate transition strategy. 5.10% of the net assets (Nextera Energy and RWE) were on the Investment Manager's exception list.
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at B)	99.50%	0.50% is invested in Carbios which does not have an MSCI ESG Rating but meets the norms-based screening criteria
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues	0%	
Percentage of securities covered by ESG analysis	99.50%	0.50% is invested in Carbios which does not have an MSCI ESG Rating but meets the norms-based screening criteria

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy :

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Linde	Manufacture of chemicals and chemical products	4.46	Ireland
Vestas Wind Systems	Manufacture of machinery and equipment n.e.c.	3.90	Denmark
NextEra Energy	Electric power generation, transmission and distribution	3.74	United States
Iberdrola	Electric power generation, transmission and distribution	3.49	Spain
Air Products & Chemicals	Manufacture of chemicals and chemical products	3.48	United States
Prysmian	Manufacture of electrical equipment	3.37	Italy
Chart Industries Inc	Manufacture of chemicals and chemical products	3.21	United States
Baker Hughes	Manufacture of machinery and equipment n.e.c.	3.20	United States

RWE	Activities of head offices	3.05	Germany
Schlumberger	Mining support service activities	2.95	Curacao
Nexans	Manufacture of electrical equipment	2.90	France
TotalEnergies	Activities of head offices	2.89	France
Itron	Manufacture of computer, electronic and optical products	2.71	United States
E.ON	Activities of head offices	2.67	Germany

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

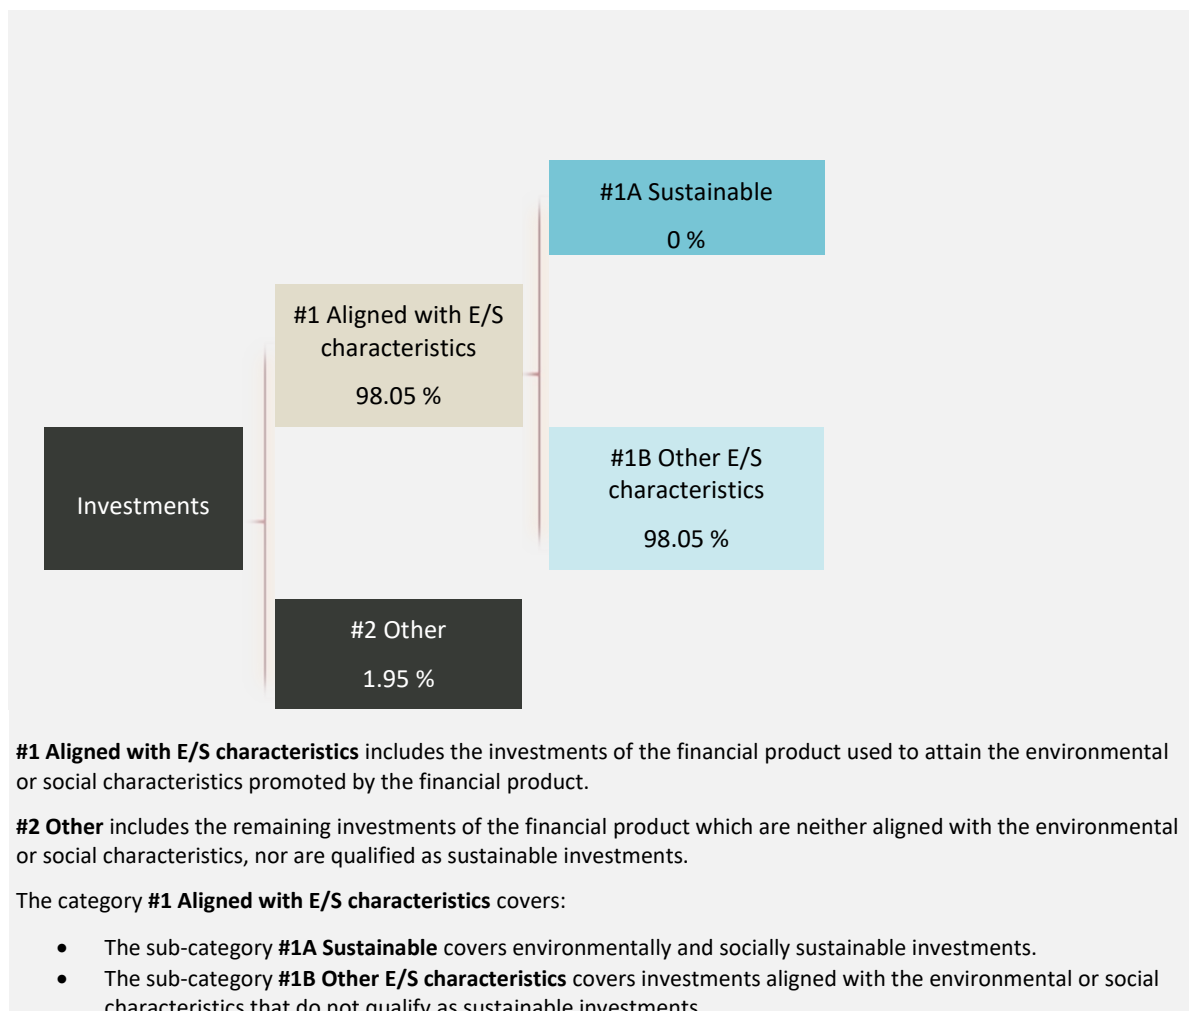

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.05 % (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Professional, scientific and technical activities	Activities of head offices	15.34
Manufacturing	Manufacture of chemicals and chemical products	12.75
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	10.96
Manufacturing	Manufacture of electrical equipment	9.60

Mining and quarrying	Mining of metal ores	7.15
Manufacturing	Manufacture of machinery and equipment n.e.c.	7.10
Mining and quarrying	Mining support service activities	6.08
Manufacturing	Manufacture of computer, electronic and optical products	5.90
Professional, scientific and technical activities	Architectural and engineering activities and related technical consultancy	3.22
Mining and quarrying	Extraction of crude petroleum and natural gas	2.57
Manufacturing	Manufacture of basic metals	2.48
Information and communication	Software publishing	2.19
Construction	Electrical installation	2.14
Transportation and storage	Sea and coastal freight water transport	1.94
Mining and quarrying	Other mining and quarrying	1.84
Real estate activities	Renting and operating of own or leased real estate	1.57
Manufacturing	Other manufacturing	1.23
Transportation and storage	Transport via pipeline	1.16
total of remaining sectors with a proportion < 1.0%		2.27

The portfolio proportions of investments presented above are an average over the reference period.

28.60% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0 % for this Sub-Fund.

What was the share of socially sustainable investments?

The Sub-Fund invested 0 % in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.95 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (1.45%) for liquidity management purposes and no minimum environmental or social characteristics.
- For the 0.5% investment in Carbios which has no MSCI ESG Rating social safeguards were applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

Their application led to the exclusion of 96% of the investments considered prior to the application of the investment strategy (i.e. global listed equity markets). As of August 31, 2024, the Sub-Fund invested 5.10% of its net assets in securities of corporate issuers that were on the Investment Manager's exception list. An exception list is maintained and regularly updated for companies that exceed the given revenue threshold in thermal coal and/or nuclear energy. These companies are investable if they have a specific climate transition strategy in the next one to three decades in place, such as quantitative CO2 emission reduction or net zero targets via increase of capital expenditures and production capacity in alternative energy in the next one to three decades and additionally have exit strategies from thermal coal and/or nuclear energy in place or their revenue share in these two areas decreases. The two companies were Nextera Energy (3.00% of total NAV of the Sub-Fund) and RWE (2.10% of total NAV of the Sub-Fund). Nextera Energy has a nuclear exposure exceeding the 10% revenue threshold (i.e. 14.28%) but is a leading producer of renewable energy from wind and solar with the goal to eliminate all scope 1 and scope 2 carbon emissions across Nextera Energy's operations by no later than 2045 (Source: Nextera Energy). RWE has a thermal coal exposure exceeding the 10% revenue threshold (i.e. 20%).

The rationale for making an exception in this case is that RWE is a leader in renewable energy with a clear ambition to be carbon neutral by 2040 with SBTi approved emission targets.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – mtX Sustainable Asian Leaders (ex Japan) **Legal Entity Identifier:** 529900WCEMQJKF4XGP13

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

The Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments against sustainability criteria with hard thresholds required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund’s portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Investment Manager applied its Minimum Standards and F-Score Frameworks, as described in the Sub-Fund's Sustainability-Related Disclosures on the website, to promote Environmental & Social (E/S) characteristics.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
1) Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated in the Sub Fund's website SFDR disclosures
2) Percentage of investments in companies that pass the minimum ESG score (as evaluated using the "Minimum Standards Framework", the Investment Manager's proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	
3) Percentage of investments in companies evaluated as having an overriding Fail Score under the "Minimum Standards Framework"	0%	
4) Percentage of investments in companies with an F-Score evaluated under the F-Score Framework, the Investment Manager's proprietary tool for evaluating critical controversies	0%	
5) Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities. Such controversies may be related to environmental, social or governance issues.	0%	During the reporting period, there were no new Critical ESG Events. The Sub-Fund holds Tencent, which was flagged by one ESG rater as in breach of UNGC but was cleared last year by the Investment Manager's Delegated Committee who opined that the allegations by the ESG rater were not substantiated.
6) Percentage of investments in UN Sanctioned Countries	0%	
7) The Sub-Fund's carbon footprint relative to the benchmark (evaluated on the basis of each issuer's scope 1 and 2 GHG emissions normalized by the company's enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark (MSCI All Country Asia (ex Japan) TR net).	Sub-Fund carbon footprint: 21.70 Benchmark footprint: 124.2 The Sub-Fund's footprint was 83% below that of its reference benchmark	The Sub-fund commits to maintaining a carbon footprint that is at least 20% lower than its reference benchmark.

8) Companies' carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund's percentage of sustainable investments.	31%	Threshold required is 15%
9) Percentage of securities covered by ESG analysis	100%	
10) Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	6.2% of companies were excluded via screening 29.7% of companies failed the ESG screening by Investment Manager's analysis	6.2% and 29.7% can't be summed as they are taken from different lists. ESG analysis is only conducted on the narrower universe of companies that have passed fundamental screens

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
1) Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
2) Percentage of investments in companies that pass the minimum ESG score (as evaluated using the "Minimum Standards Framework", the Investment Manager's proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	100%
3) Percentage of investments in companies evaluated as having an overriding Fail Score under the "Minimum Standards Framework"	0%	0%
4) Percentage of investments in companies with an F-Score evaluated under the F-Score Framework, the Investment Manager's proprietary tool for evaluating critical controversies	0%	0%
5) Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities.	0%	0%
6) Percentage of investments in UN Sanctioned Countries	0%	0%
7) The Sub-Fund's carbon footprint relative to the benchmark (evaluated on the basis of each issuer's scope 1 and 2 GHG emissions normalized by the company's enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then	Sub-Fund carbon footprint: 21.70 Benchmark footprint: 124.2	Sub-Fund carbon footprint: 22.70 Benchmark footprint: 55.46 The Sub-Fund's footprint was 59%

compared to that of the reference benchmark (MSCI All Country Asia (ex Japan) TR net).	The Sub-Fund's footprint was 83% below that of its reference benchmark	below that of its reference benchmark
8) Companies' carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund's percentage of sustainable investments.	31%	34.42%
Percentage of securities covered by ESG analysis	100%	100%
9) Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	6.2% of companies were excluded via screening 29.7% of companies failed the ESG screening by Investment Manager's analysis	7.8% of companies were excluded via screening (6.4% from business activities screens and 1.4% from global norms screening). 31.7% of companies failed the ESG screening by Investment Manager's Analysts

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the Sub-Fund's partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 31% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund's total carbon footprint was 83% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund's investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying an extensive screening using all mandatory and multiple additional Principle Adverse Impact indicators (PAI) (from SFDR RTS Annex I). The assessment is based on a two-step approach. In an initial step, potential negative impacts associated with an investment are identified. If these impacts can be mitigated, the process proceeds to a second step in which the Investment Manager conduct a rigorous analysis of mitigation measures implemented by the companies in question. If a company is flagged for potential negative impacts and lacks appropriate mitigation measures, it does not pass the DNSH test. Consequently, such companies are excluded from being considered sustainable investments. To facilitate these assessments, the Investment Manager relies on a combination of reputable data sources, including in-house

research, ESG data providers, news alerts, and issuer reported data. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	9.61	Taiwan
Samsung Electronics	Manufacture of computer, electronic and optical products	8.61	Korea, Republic Of
Tencent Holdings	Other telecommunications activities	6.31	Cayman Islands
State Bank Of India	Monetary intermediation	3.73	India
Media Tek	Manufacture of computer, electronic and optical products	3.54	Taiwan
Kia	Manufacture of motor vehicles, trailers and semi-trailers	3.30	Korea, Republic Of
Alibaba Group Holding	Activities of head offices	3.27	Cayman Islands
Trip.com	Activities of holding companies	3.25	Cayman Islands
Aia Group	Insurance	3.22	Hong-Kong
Bajaj Auto	Manufacture of other transport equipment	3.00	India
PT Bank Mandiri Persero TBK	Monetary intermediation	2.98	Indonesia
Haier Smart Home	Activities of head offices	2.58	China
Accton Technology	Manufacture of computer, electronic and optical products	2.44	Taiwan
Elite Material Co.	Manufacture of computer, electronic and optical products	2.37	Taiwan
HDFC Bank	Monetary intermediation	2.32	India

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.45% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	29.32
Financial and insurance activities	Monetary intermediation	10.18
Professional, scientific and technical activities	Activities of head offices	8.64
Information and communication	Other telecommunications activities	6.31
Financial and insurance activities	Activities of holding companies	5.31
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	3.30

Financial and insurance activities	Insurance	3.22
Manufacturing	Manufacture of other transport equipment	3.00
Manufacturing	Manufacture of electrical equipment	2.88
Manufacturing	Manufacture of beverages	2.43
Manufacturing	Manufacture of chemicals and chemical products	2.39
Financial and insurance activities	Other financial service activities, except insurance and pension funding	2.37
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of electronic and telecommunications equipment and parts	2.01
Information and communication	Software publishing	1.81
Information and communication	Wired telecommunications activities	1.80
Manufacturing	Manufacture of other non-metallic mineral products	1.79
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of other machinery and equipment	1.67
Information and communication	Data processing, hosting and related activities; web portals	1.66
Information and communication	Computer programming, consultancy and related activities	1.62
Manufacturing	Manufacture of paper and paper products	1.40
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.23
Real estate activities	Real estate activities on a fee or contract basis	1.20
total of remaining sectors with a proportion < 1.0%		3.17

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

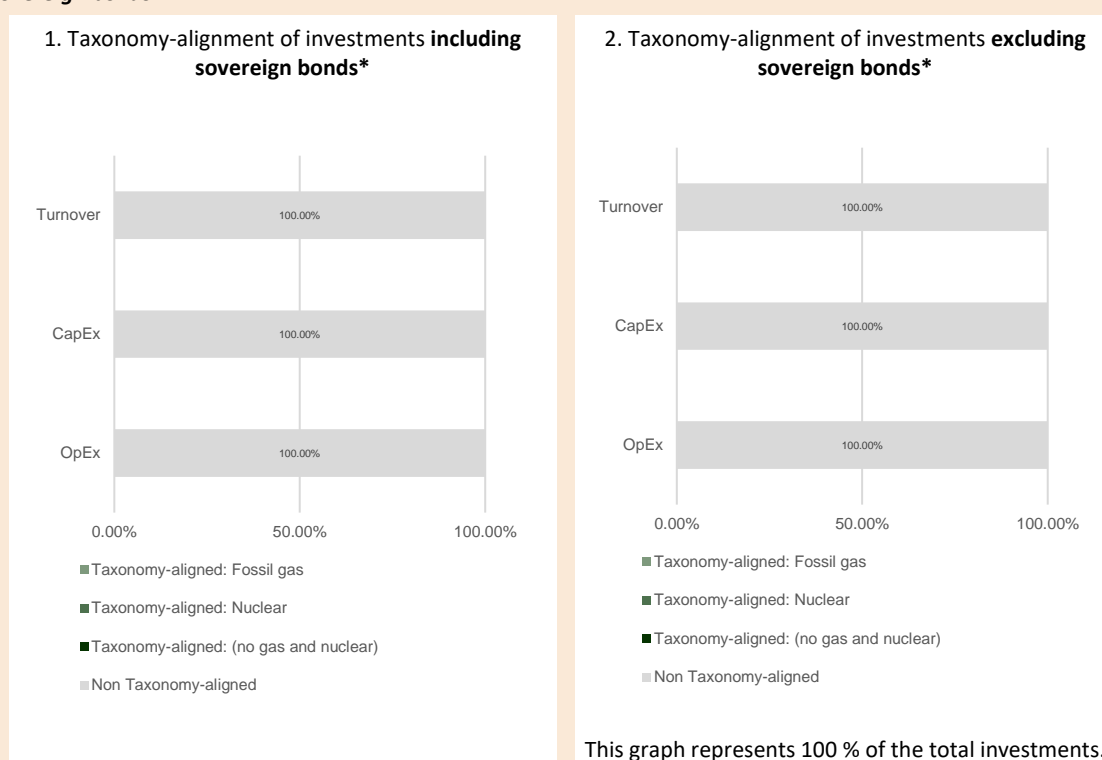

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 1.55% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (1.55%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

To support the promotion of environmental and social characteristics, the Investment Manager engages actively on voting and engagement on areas of sustainability-related risks. The Sub-Fund has an engagement coverage of 58% (based on engagement during the reporting period, for holdings as at August 30, 2024) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner.

The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating sustainability considerations where relevant. The Sub-Fund thereby voted in 100% (61 meetings) in the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<p><input checked="" type="radio"/> <input type="checkbox"/> YES</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> NO</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.9% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

The Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments against sustainability criteria with hard thresholds required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund’s portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Investment Manager applied its Minimum Standards and F-Score Frameworks, as described in the Sub-Fund's *Sustainability-Related Disclosures* on the website, to promote Environmental & Social (E/S) characteristics.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
1) Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated in the Sub Fund's website SFDR disclosures
2) Percentage of investments in companies that pass the minimum ESG score (as evaluated using the "Minimum Standards Framework", the Investment Manager's proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	The Sub-Fund holds Alrosa, which has a below threshold ESG score. Due to sanctions, the position cannot yet be traded and the Investment Manager therefore awaits an opportunity to sell the position. However, as it has no weight in the fund it does not impact the value shown.
3) Percentage of investments in companies evaluated as having an overriding Fail Score under the "Minimum Standards Framework"	0%	
4) Percentage of investments in companies with an F-Score evaluated under the F-Score Framework, the Investment Manager's proprietary tool for evaluating critical controversies	0%	
5) Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities). Such controversies may be related to environmental, social or governance issues.	0%	During the reporting period, there were no new Critical ESG Events. The Sub-Fund continues to hold Tencent, which was flagged by one ESG rater as in breach of UNGC but was cleared by Investment Manager's Delegated Committee who opined that the allegations by the ESG rater were not substantiated.
6) Percentage of investments in UN Sanctioned Countries	0%	
7) The Sub-Fund's carbon footprint relative to the benchmark (evaluated on the basis of each issuer's scope 1 and 2 GHG emissions normalized by the company's enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark (MSCI Emerging Markets TR net).	Sub-Fund carbon footprint: 25.7 Benchmark footprint: 131.2	The Sub-fund commits to maintaining a carbon footprint that is at least 20% lower than its reference benchmark.

	The Sub-Fund's footprint was 80% below that of its reference benchmark	
8) Companies' carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund's percentage of sustainable investments.	27.90%	Threshold required is 15%
9) Percentage of securities covered by ESG analysis	100%	
10) Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	4.9% of companies were excluded via screening 24.8% of companies failed the ESG screening by Investment Manager's Analysts	4.9% and 24.8% can't be summed as they are taken from different lists. ESG analysis is only conducted on the narrower universe of companies that have passed fundamental screens

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
1) Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
2) Percentage of investments in companies that pass the minimum ESG score (as evaluated using the "Minimum Standards Framework", the Investment Manager's proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	100%
3) Percentage of investments in companies evaluated as having an overriding Fail Score under the "Minimum Standards Framework"	0%	0%
4) Percentage of investments in companies with an F-Score evaluated under the F-Score Framework, the Investment Manager's proprietary tool for evaluating critical controversies	0%	0%

5) Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), (unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities).	0%	0%
6) Percentage of investments in UN Sanctioned Countries	0%	0%
7) The Sub-Fund's carbon footprint relative to the benchmark (evaluated on the basis of each issuer's scope 1 and 2 GHG emissions normalized by the company's enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark (MSCI Emerging Markets TR net).	Sub-Fund carbon footprint: 25.7 Benchmark footprint: 131.2 The Sub-Fund's footprint was 80% below that of its reference benchmark	Sub-Fund carbon footprint: 23.58. Benchmark footprint: 66.22 The Sub-Fund's footprint was 64% below that of its reference benchmark
8) Companies' carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund's percentage of sustainable investments.	27.90%	35.90%
9) Percentage of securities covered by ESG analysis	100%	100%
10) Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	4.9% of companies were excluded via screening 24.8% of companies failed the ESG screening by Investment Manager's Analysts	7.0% of companies were excluded via screening 32.8% of companies failed the ESG screening by Investment Manager's Analysts

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the Sub-Fund's partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 27.9% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund's total carbon footprint was 80% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying an extensive screening using all mandatory and multiple additional Principle Adverse Impact indicators (PAI) (from SFDR RTS Annex I). The assessment is based on a two-step approach. In an initial step, potential negative impacts associated with an investment are identified. If these impacts can be mitigated, the process proceeds to a second step in which the Investment Manager conduct a rigorous analysis of mitigation measures implemented by the companies in question. If a company is flagged for potential negative impacts and lacks appropriate mitigation measures, it does not pass the DNSH test. Consequently, such companies are excluded from being considered sustainable investments. To facilitate these assessments, the Investment Manager relies on a combination of reputable data sources, including in-house research, ESG data providers, news alerts, and issuer reported data. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Samsung Electronics	Manufacture of computer, electronic and optical products	6.27	Korea, Republic Of
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	5.04	Taiwan
Taiwan Semiconductor Manufacturing ADR	Manufacture of computer, electronic and optical products	4.54	Taiwan
Tencent Holdings	Other telecommunications activities	4.16	Cayman Islands
State Bank Of India	Monetary intermediation	3.13	India
Media Tek	Manufacture of computer, electronic and optical products	2.99	Taiwan
Kia	Manufacture of motor vehicles, trailers and semi-trailers	2.85	Korea, Republic Of
Mercadolibre	Agents involved in the sale of a variety of goods	2.85	United States
Trip.com	Activities of holding companies	2.68	Cayman Islands
PT Bank Mandiri Persero TBK	Monetary intermediation	2.50	Indonesia
Alibaba Group Holding	Activities of head offices	2.46	Cayman Islands

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Bajaj Auto	Manufacture of other transport equipment	2.41	India
Aia Group	Insurance	2.22	Hong-Kong
Haier Smart Home	Activities of head offices	2.20	China
Prio	Extraction of crude petroleum and natural gas	2.14	Brazil

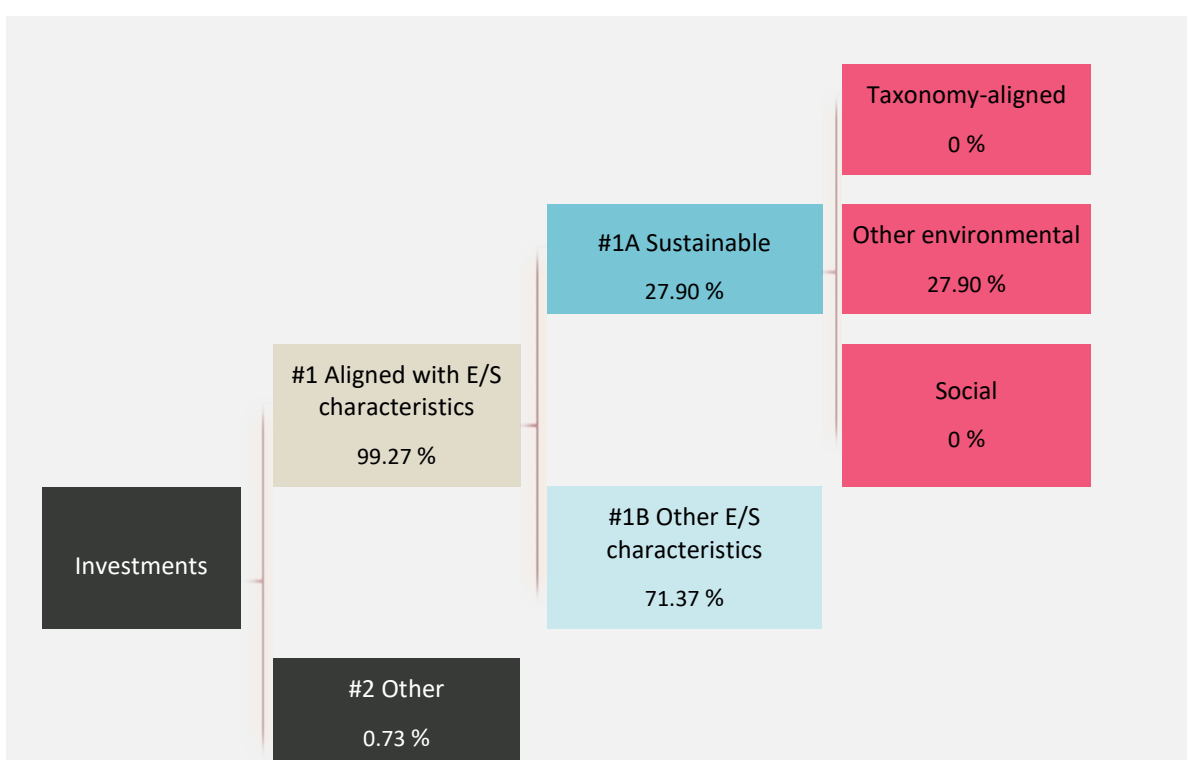

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.27% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	26.45
Financial and insurance activities	Activities of holding companies	9.59
Financial and insurance activities	Monetary intermediation	9.47
Professional, scientific and technical activities	Activities of head offices	8.94
Information and communication	Other telecommunications activities	4.16
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	2.85
Wholesale trade, except of motor vehicles and motorcycles	Agents involved in the sale of a variety of goods	2.85
Mining and quarrying	Extraction of crude petroleum and natural gas	2.61
Manufacturing	Manufacture of other transport equipment	2.41
Manufacturing	Manufacture of electrical equipment	2.38
Financial and insurance activities	Insurance	2.22
Manufacturing	Manufacture of beverages	2.21
Construction	Development of building projects	2.18
Financial and insurance activities	Other financial service activities, except insurance and pension funding	1.83
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of electronic and telecommunications equipment and parts	1.77
Information and communication	Software publishing	1.66
Information and communication	Wired telecommunications activities	1.53
Manufacturing	Manufacture of paper and paper products	1.38
Manufacturing	Manufacture of other non-metallic mineral products	1.31
Information and communication	Data processing, hosting and related activities; web portals	1.20
Information and communication	Computer programming, consultancy and related activities	1.19
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.19
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of other machinery and equipment	1.18
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.17
Real estate activities	Real estate activities on a fee or contract basis	1.03
total of remaining sectors with a proportion < 1.0%		3.55

The portfolio proportions of investments presented above are an average over the reference period.

2.61% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹***

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.9% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 0.73% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (0.73%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

To support the promotion of environmental and social characteristics, the Investment Manager engages actively on voting and engagement on areas of sustainability-related risks. The Sub-Fund has an engagement coverage of 55% (based on engagement during the reporting period, for holdings as at August 30, 2024) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner.

The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating sustainability considerations where relevant. The Sub-Fund thereby voted in 100% (80 meetings) in the reporting period (a de-minimis figure <2% of ballots are sometimes rejected for technical reasons).

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sub-Fund launched on September 20, 2023

Product Name: Vontobel Fund – mtx Emerging Markets Leaders ex China **Legal Entity Identifier:** 213800TOBRBHDIXY511

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

NO

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **28.4%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met and all binding criteria complied with.

Since its launch on September 20, 2023, the Sub-Fund promoted environmental and social characteristics by employing several safeguards and evaluating all equity investments against sustainability criteria with hard thresholds required to be met for inclusion. The Investment Manager further promoted environmental and social criteria with an extensive ESG engagement and voting program. Integrating sustainability criteria is a central pillar in the investment process with the aim of improving the long-term risk-return characteristics of the Sub-Fund's portfolio and supporting elevated social or environmental practices by the investee companies. The Investment Manager is motivated by the understanding that its investments have the potential to affect society and the environment, and that such investments are affected by society and the environment. The Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges, having satisfied minimum pass ESG scores as well as sectoral and norms-based exclusions. It also exceeded its commitments related to carbon emissions.

The Investment Manager applied its Minimum Standards and F-Score Frameworks, as described in the Sub-Fund's Sustainability-Related Disclosures on the website, to promote Environmental & Social (E/S) characteristics.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
1) Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated in the Sub-Fund's website SFDR disclosures
2) Percentage of investments in companies that pass the minimum ESG score (as evaluated using the "Minimum Standards Framework", the Investment Manager's proprietary ESG evaluation framework, minimum is set at 2.4 out of 5).	100%	
3) Percentage of investments in companies evaluated as having an overriding "Fail Score" under the Minimum Standards Framework or under the "F-Score Framework", the Investment Manager's proprietary tool for evaluating critical controversies.	0%	
4) Percentage of investments in companies that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (aka Critical ESG Events), unless the Investment Manager believes reasonable progress can be attained, for example, through active ownership activities.	0%	Such controversies may be related to environmental, social or governance issues.
5) Percentage of investments in UN Sanctioned Countries	0%	
6) The Sub-Fund's carbon footprint relative to the benchmark (evaluated on the basis of each issuer's scope 1 and 2 GHG emissions normalized by the company's enterprise value including cash (EVIC) and multiplied by its weight in the portfolio). The sum of such weighted average carbon footprint is calculated and then compared to that of the reference benchmark MSCI EM ex China 10/40 Net Index (USD).	Sub-Fund carbon footprint: 22.8 Benchmark footprint: 134.8 The Sub-Fund's footprint was 83% below that of its reference benchmark	
7) Companies' carbon footprint, including Scope 1 and 2 GHG emissions normalized by EVIC is compared to the reference benchmark. The Investment Manager then reports on the number of companies who are in the top 30% relative to their reference benchmark and report on these weighted holdings (excluding cash) as representing the Sub-Fund's percentage of sustainable investments.	28.4%	
8) Percentage of securities covered by ESG analysis	100%	

9) Percentage of potential investments excluded via the top-down exclusions applied to the starting universe plus via the sustainability screening applied in a bottom-up approach to the smaller sub-set of companies that passed the fundamental, financial assessment.	5.1% of companies were excluded via screening 18.2% of companies failed the ESG screening by Investment Manager's Analysts

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the Sub-Fund’s partial sustainable investments strategy is to support climate change mitigation and the transition to the low-carbon economy by identifying issuers that are in the lowest 30% of carbon footprint (sc.1+2) relative to their reference benchmark and maintaining a carbon footprint that is at least 20% lower than that of its reference benchmark. The Sub-Fund exceeded its targets by holding 28.4% of issuers with lowest (smallest 30%) carbon footprint, as against a commitment of 15%. The Sub-Fund’s total carbon footprint was 83% below that of its Benchmark, and thus also exceeded its goal to beat the benchmark by 20%. Calculation approach is provided in the pre-contractual disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying an extensive screening using all mandatory and multiple additional Principle Adverse Impact indicators (PAI) (from SFDR RTS Annex I). The assessment is based on a two-step approach. In an initial step, potential negative impacts associated with an investment are identified. If these impacts can be mitigated, the process proceeds to a second step in which the Investment Manager conduct a rigorous analysis of mitigation measures implemented by the companies in question. If a company is flagged for potential negative impacts and lacks appropriate mitigation measures, it does not pass the DNSH test. Consequently, such companies are excluded from being considered sustainable investments. To facilitate these assessments, the Investment Manager relies on a combination of reputable data sources, including in-house research, ESG data providers, news alerts, and issuer reported data. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
3	14	Number of identified cases of severe human rights issues and incidents

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Samsung Electronics	Manufacture of computer, electronic and optical products	8.85	Korea, Republic Of
Taiwan Semiconductor Manufacturing ADR	Manufacture of computer, electronic and optical products	6.70	Taiwan
State Bank Of India	Monetary intermediation	3.63	India
Bajaj Auto	Manufacture of other transport equipment	3.52	India
Media Tek	Manufacture of computer, electronic and optical products	3.36	Taiwan
Kia	Manufacture of motor vehicles, trailers and semi-trailers	3.10	Korea, Republic Of
Aldar Properties	Development of building projects	3.07	United Arab Emirates
PT Bank Mandiri Persero TBK	Monetary intermediation	3.05	Indonesia
Mercadolibre	Agents involved in the sale of a variety of goods	2.88	United States
Arca Continental	Activities of holding companies	2.86	Mexico
Baja Finance	Other financial service activities, except insurance and pension funding	2.79	India
Taiwan Semiconductor Manufacturing	Manufacture of computer, electronic and optical products	2.68	Taiwan
Telkom Indonesia	Wired telecommunications activities	2.66	Indonesia
Riyad Bank	Monetary intermediation	2.62	Saudi Arabia
Torrent Pharmaceuticals	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.62	India

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 20/09/2023-31/08/2024

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 99.36% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Manufacturing	Manufacture of computer, electronic and optical products	28.04
Financial and insurance activities	Monetary intermediation	13.17
Financial and insurance activities	Activities of holding companies	8.10
Professional, scientific and technical activities	Activities of head offices	6.77

Information and communication	Computer programming, consultancy and related activities	5.14
Mining and quarrying	Extraction of crude petroleum and natural gas	4.31
Manufacturing	Manufacture of other transport equipment	3.52
Construction	Development of building projects	3.32
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	3.10
Wholesale trade, except of motor vehicles and motorcycles	Agents involved in the sale of a variety of goods	2.88
Financial and insurance activities	Other financial service activities, except insurance and pension funding	2.79
Information and communication	Wired telecommunications activities	2.66
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.62
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	1.93
Wholesale trade, except of motor vehicles and motorcycles	Wholesale of electronic and telecommunications equipment and parts	1.75
Manufacturing	Manufacture of chemicals and chemical products	1.59
Information and communication	Data processing, hosting and related activities; web portals	1.40
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.06
total of remaining sectors with a proportion < 1.0%		4.07

The portfolio proportions of investments presented above are an average over the reference period.

4.31% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

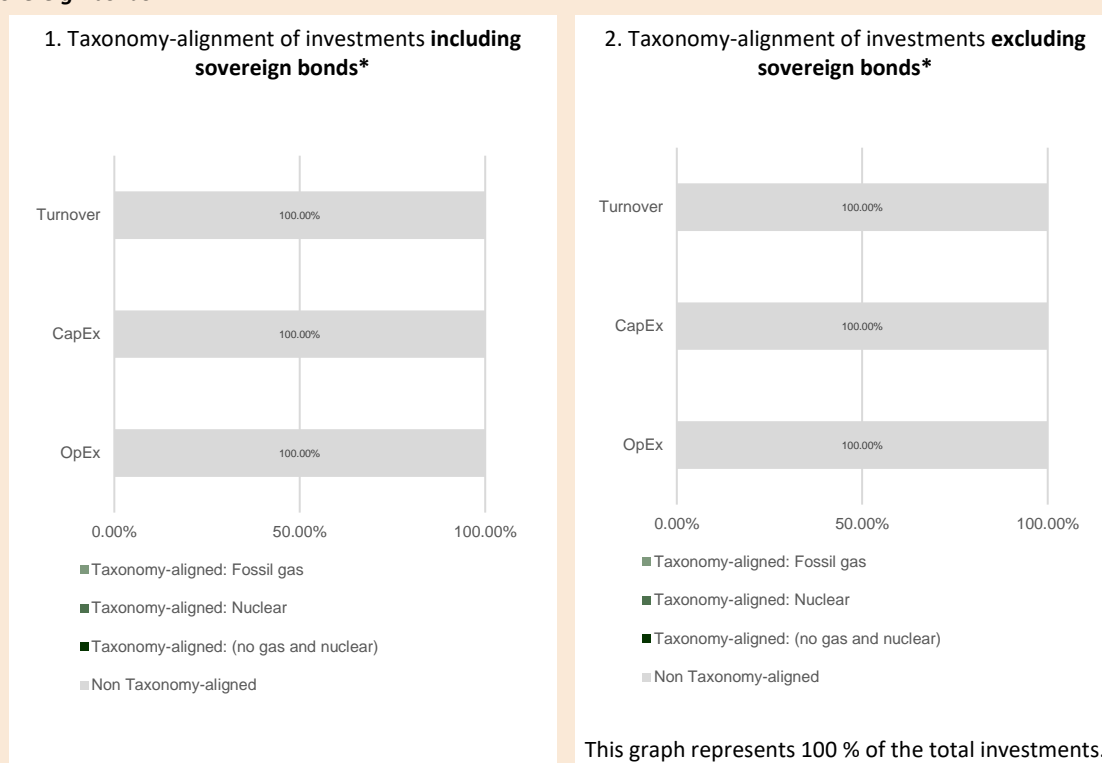

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28.4% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

 **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “Other” investments represented 0.64% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (0.64%) and cash equivalent investments, for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

To support the promotion of environmental and social characteristics, the Investment Manager engages actively on voting and engagement on areas of sustainability-related risks. The Sub-Fund has an engagement coverage of 49% (based on engagement during the reporting period, for holdings as at August 30, 2024) of its holdings via the direct engagement of the Investment Manager and its third-party specialist engagement partner.

The Investment Manager also has a dedicated process to actively vote on all company ballots following review by financial and ESG analysts, incorporating sustainability considerations where relevant. The Sub-Fund thereby voted in 100% (14 meetings) in the reporting period.

 **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Debt

Legal Entity Identifier: 529900JVJXWCEMOZ2X89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="radio"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.84% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its re-categorization from an SFDR Article 6 to an Article 8 product as from January 26, 2024, the Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 11.84% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	3 issuers were flagged with severe controversies by either MSCI or Sustainalytics: Pemex, Petroleos del Peru and Saudi Arabian Oil. Pemex and Petroleos del Peru are on watch list, and Saudi Arabian Oil has been classified as a denied controversy case.
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review	81.35%	18.65% of corporate issuers obtained a score below 25. The issuers were Poinsettia Finance (score: 16.32), Uzpromstroybank (22.13), MC Brazil Downstream (5.79), Galaxy Pipeline assets Bidco (15.20), Aragvi Holding (18.75), EnfraGen (16.57), Tengizchevroil Finance (23.75), Hungarian Export-Import Bank (14.55), Finance department Government of Sharjah (0.78), Comision Federal de Electricidad (18.39), Emirate of Abu Dhabi (17.32), Uzbekneftegaz JSC (22.13). The Investment Manager has conducted a qualitative analysis of the issuers.
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	11.84%	
Sub-Fund's combined minimum weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark (J.P. Morgan EMBI Global Diversified or CEMBI Broad Diversified)	Sub-Fund: 43.19 Benchmark: 49.58 The Sub-Fund's score is 87.11% of the one of the benchmark	

Percentage of securities covered by ESG analysis	81.97%	Some issuers were not covered by MSCI or Sustainalytics regarding controversies and ESG rating. [The Investment Manager conducted additional research to insure that the issuers were not involved in any controversies or violation of UNGC.]

Percentage of securities covered by ESG analysis	81.97%	N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment

Manager would prefer “allocated funding”, if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B-H and L

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Banque Ouest-Africaine de Developpement	Financial and insurance activities	2.05	Togo
Bond Ivory Coast	Public administration and defence; compulsory social security	1.88	Ivory Coast
Petroleos del Peru	Manufacturing	1.77	Peru
Vontobel Fund – Emerging Markets Blend I USD	Financial and insurance activities	1.68	Luxembourg
Transnet	Retail trade, except of motor vehicles and motorcycles	1.65	South Africa
MC Brazil Downstream	Financial and insurance activities	1.64	Brazil
GACI First Investment	Financial and insurance activities	1.60	Cayman Islands
Pemex	Mining and quarrying	1.55	Mexico

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26/01/2024-31/08/2024

Bond Cameroon	Public administration and defence; compulsory social security	1.45	Cameroon
Bond Gabon	Financial and insurance activities	1.39	United States
Bond Bahamas	Public administration and defence; compulsory social security	1.36	Bahamas
JSC National Company KazMunayGas	Mining and quarrying	1.36	Kazakhstan
Africa Finance	Financial and insurance activities	1.31	Nigeria
Bond Tajikistan	Public administration and defence; compulsory social security	1.25	Tajikistan
Poinsettia Finance	Financial and insurance activities	1.25	Cayman Islands

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 76.75% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	39.11
Financial and insurance activities	Other financial service activities, except insurance and pension funding	23.58
Mining and quarrying	Extraction of crude petroleum and natural gas	6.21
Financial and insurance activities	Trusts, funds and similar financial entities	4.21
Financial and insurance activities	Monetary intermediation	4.04

Mining and quarrying	Mining support service activities	3.46
Professional, scientific and technical activities	Activities of head offices	2.96
Manufacturing	Manufacture of coke and refined petroleum products	2.87
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	2.15
Retail trade, except of motor vehicles and motorcycles	Retail sale of other goods in specialised stores	1.65
Financial and insurance activities	Activities of holding companies	1.63
total of remaining sectors with a proportion < 1.0%		4.13

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

11.82% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

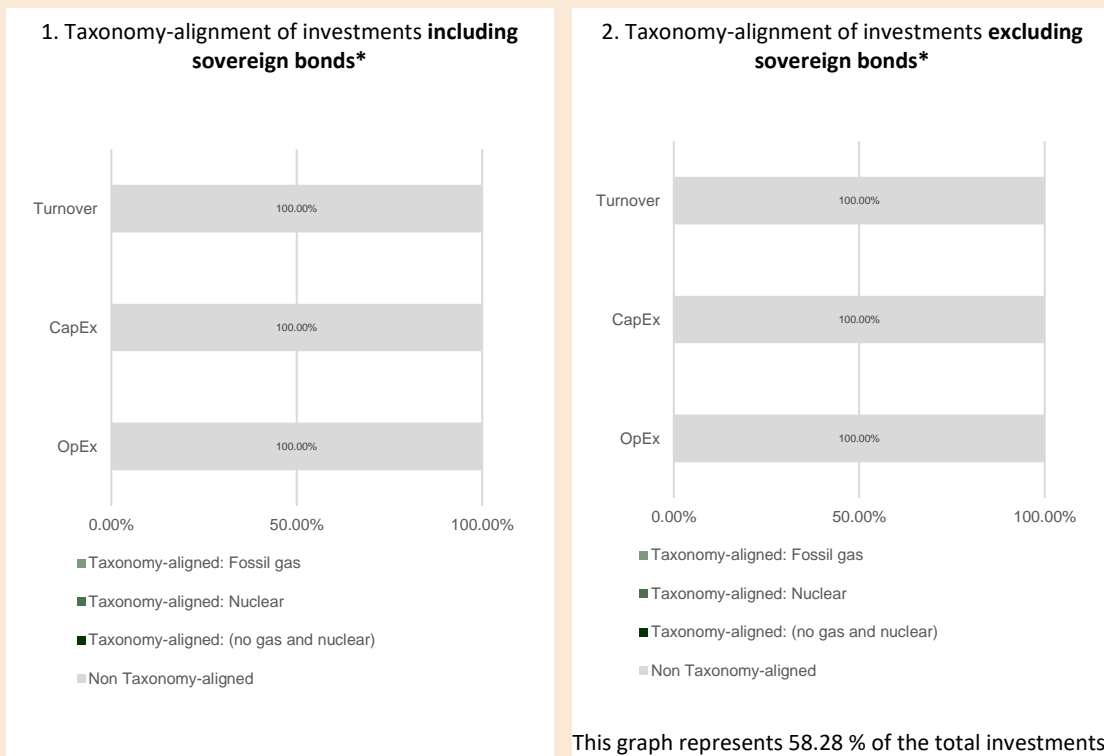

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 5.41% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 6.43% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 23.25% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (3.81%), for liquidity management purposes.
- UCITS/UCIs (2.56%) for investment/diversification purposes. Minimum environmental and social safeguards applied to four SFDR Art. 8 funds (2.56%).
- Investments not covered by ESG research (16.88%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Sustainable Emerging Markets Debt **Legal Entity Identifier:** 2221005QVB480VS2VY35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> YES</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> NO</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.38% of sustainable investments</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were partially met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 27.38% in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date, the Investment Manager therefore performed additional analysis of the issuers.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of sovereign issuers, that are considered "non-democratic", based on a proprietary methodology	0%	
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, based on a proprietary methodology)	100%	
Percentage of investments in securities of sovereign issuers that pass the minimum ESG rating that has been set for this Sub-Fund (determined based on the lowest decile, based on a proprietary methodology)	100%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies. Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	27.38%	
Sub-Fund's ESG rating compared to its Benchmark (J.P. Morgan ESG EMBI Global Diversified Index), based on the proprietary ESG scoring model and based on third-party ESG research provider	Sub-Fund: 44.09 Benchmark: 41.83	
Percentage of securities covered by ESG analysis	100%	

● **... And compared to previous periods?**

Percentage of securities covered by ESG analysis	100%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE A-F, H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Banque Ouest-Africaine de Developpement	Financial and insurance activities	2.26	Togo
Bond Hungary	Public administration and defense; compulsory social security	2.09	Hungary
Transnet	Retail trade, except of motor vehicles and motorcycles	1.89	South Africa
Bond Bulgaria	Public administration and defense; compulsory social security	1.78	Bulgaria
Africa Finance	Financial and insurance activities	1.76	Nigeria
Bond Philippines	Public administration and defense; compulsory social security	1.74	Philippines
Bond Uruguay	Public administration and defense; compulsory social security	1.69	Uruguay
Bond Dominican Republic	Public administration and defense; compulsory social security	1.58	Dominican Republic
Pertamina	Electricity, gas, steam and air conditioning supply	1.57	Indonesia
Vakiflar	Financial and insurance activities	1.52	Turkey

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Bond Mexico	Public administration and defense; compulsory social security	1.50	Mexico
Finance Department Government of Sharjah	Public administration and defense; compulsory social security	1.50	United Arab Emirates
Bond Chile	Public administration and defense; compulsory social security	1.38	Chile
Bond Poland	Public administration and defense; compulsory social security	1.28	Poland
Bond Peru	Public administration and defense; compulsory social security	1.21	Peru

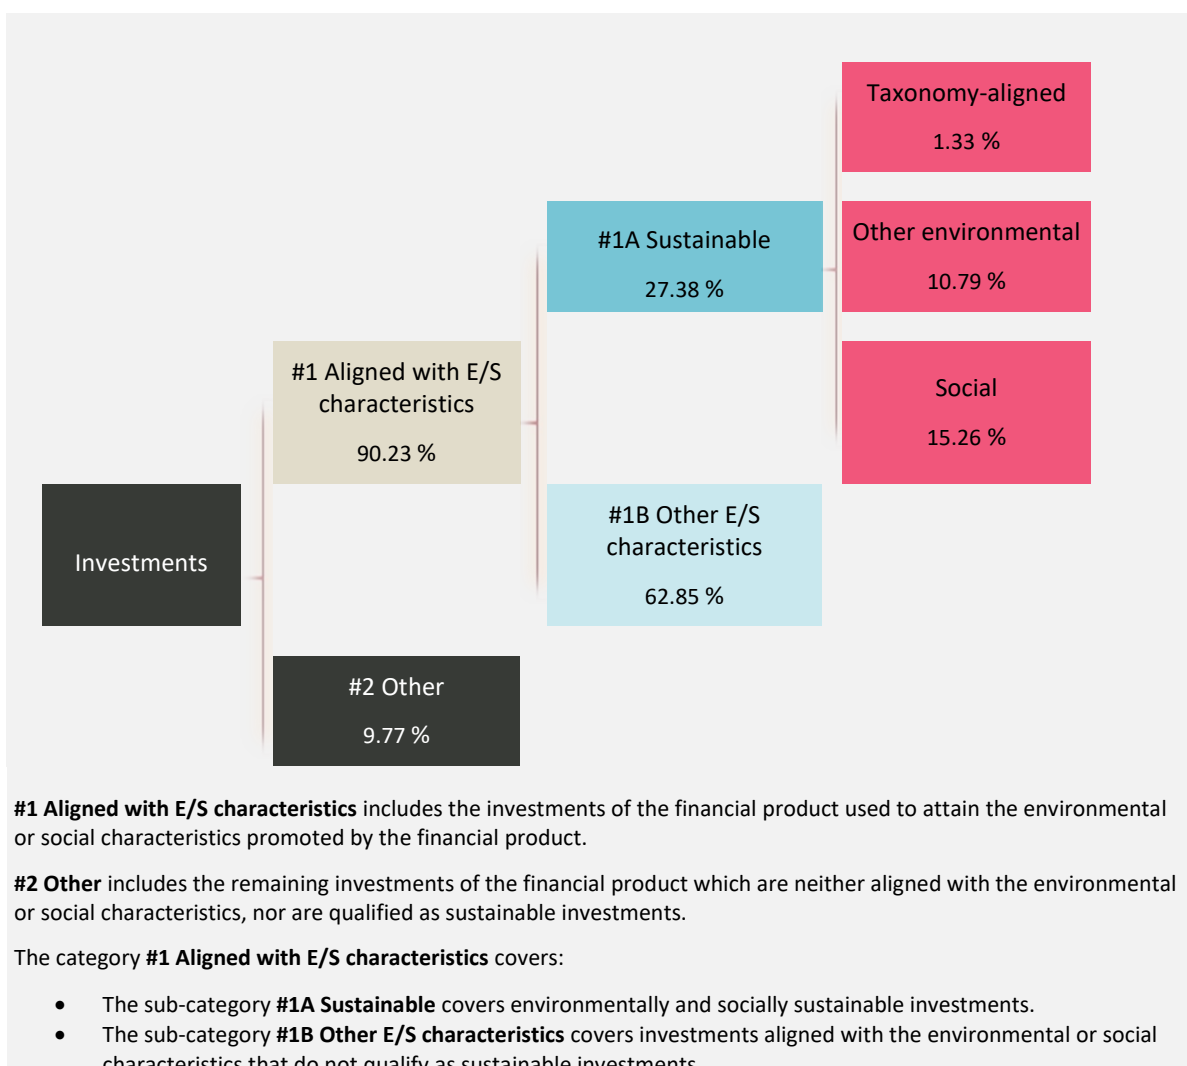

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 90.23% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	52.71
Financial and insurance activities	Monetary intermediation	15.37
Financial and insurance activities	Other financial service activities, except insurance and pension funding	8.80
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	3.75
Mining and quarrying	Mining support service activities	2.11
Retail trade, except of motor vehicles and motorcycles	Retail sale of other goods in specialised stores	1.89
Mining and quarrying	Extraction of crude petroleum and natural gas	1.88
Financial and insurance activities	Activities of holding companies	1.52
Transportation and storage	Passenger air transport	1.39
total of remaining sectors with a proportion < 1.0%		3.18

The portfolio proportions of investments presented above are an average over the reference period.

7.74% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
- In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
1.33	0

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.79% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 15.26% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 9.77% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (9.77%), for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. Their application led to the exclusion of 23.40% of the investments considered prior to the application of the investment strategy (i.e. emerging markets debt market).

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Sustainable Global Bond

Legal Entity Identifier: 222100JNJJJKXSKPUV60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.91% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics by investing in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 24.91% in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The Taxonomy alignment of sustainable investments was established based on reports provided by the issuers. The Sub-Fund also invested in environmentally sustainable investments that were not Taxonomy-aligned because the Investment Manager only used reported alignment data from issuers, not considering estimates provided by third-party data providers; the EU Taxonomy technical screening was still incomplete for climate change mitigation and adaptation and did not cover all environmental objectives (the remaining 4 objectives) as of the reporting date, the Investment Manager therefore performed additional analysis of the issuers.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	98.38%	1.62% of corporate issuers obtained a score below 25 (score: 21.45). The issuer was Toyota Motor Credit. The Investment Manager has conducted a qualitative analysis of the issuer. For Terega SA, no rating was available.
Percentage of investments in securities of sovereign issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review)	100%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments.	24.91%	
Percentage of securities covered by ESG analysis	99.06%

Percentage of securities covered by ESG analysis	99.06%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	5	Share of non-renewable energy consumption
1	5	Share of non-renewable energy production
1	6	Energy consumption intensity per high impact climate sector NACE A-F, H and L

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	11	Share of investments in investee companies without policies to monitor compliance with, or mechanisms to handle grievance/complaints in relation to the UNGC principles or OECD Guidelines for Multinational Enterprises
1	12	Unadjusted gender pay gap
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond Spain	Public administration and defense; compulsory social security	4.31	Spain
Bond United States	Public administration and defense; compulsory social security	3.17	United States
Bond Italy	Public administration and defense; compulsory social security	2.61	Italy
Bond United States	Public administration and defense; compulsory social security	2.22	United States
Bond United States	Public administration and defense; compulsory social security	1.73	United States
Bond United States	Public administration and defense; compulsory social security	1.67	United States
Bond Germany	Public administration and defense; compulsory social security	1.53	Germany

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/09/2023-31/08/2024

Bond Spain	Public administration and defense; compulsory social security	1.46	Spain
Amcors Finance	Financial and insurance activities	1.11	United States
Intesa Sanpaolo	Financial and insurance activities	1.03	Italy
Caixabank	Financial and insurance activities	1.03	Spain
Bond United States	Public administration and defense; compulsory social security	0.99	United States
Vmware	Information and communication	0.97	United States
ISS Global	Financial and insurance activities	0.97	Denmark
Bond Italy	Public administration and defense; compulsory social security	0.94	Italy

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

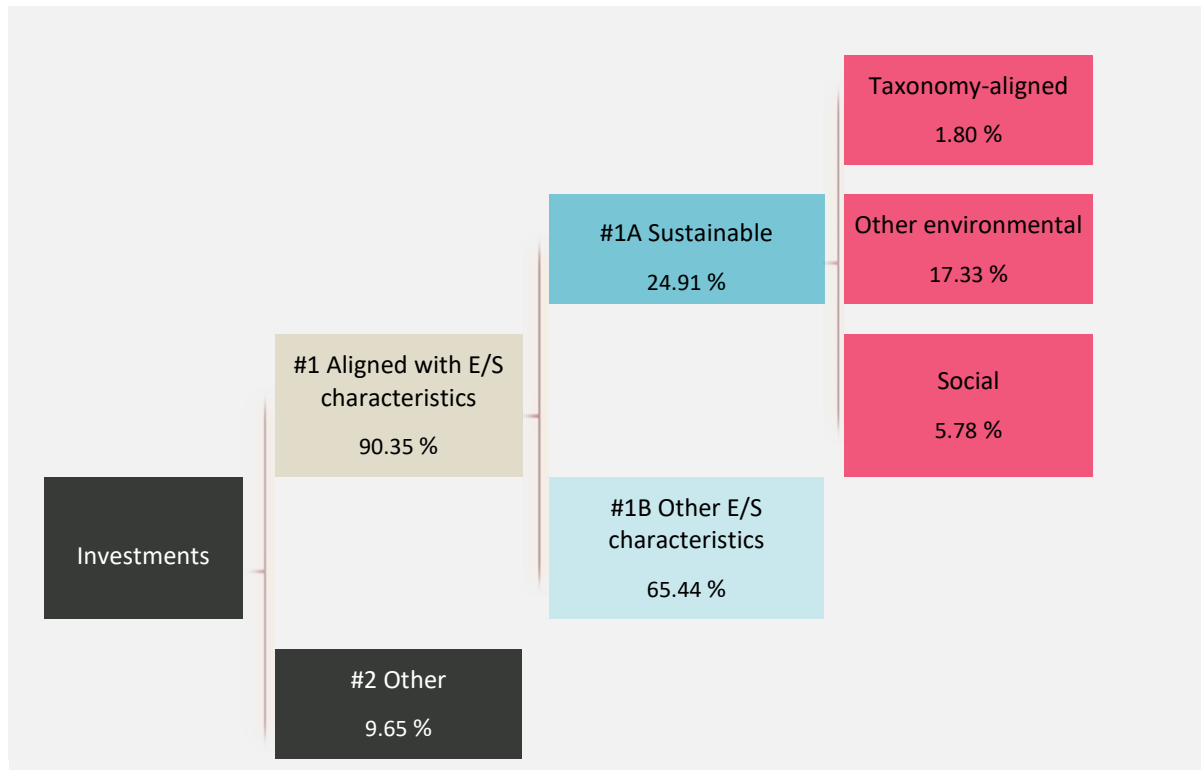

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 90.35% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	36.34
Financial and insurance activities	Monetary intermediation	9.18
Financial and insurance activities	Other financial service activities, except insurance and pension funding	8.35
Financial and insurance activities	Activities of holding companies	5.57
Professional, scientific and technical activities	Activities of head offices	2.36

Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	2.35
Manufacturing	Manufacture of computer, electronic and optical products	2.13
Information and communication	Wired telecommunications activities	2.01
Information and communication	Software publishing	1.96
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	1.95
Manufacturing	Manufacture of chemicals and chemical products	1.65
Information and communication	Data processing, hosting and related activities; web portals	1.64
Information and communication	Computer programming, consultancy and related activities	1.45
Transportation and storage	Support activities for transportation	1.30
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	1.28
Manufacturing	Manufacture of paper and paper products	1.18
Financial and insurance activities	Insurance	1.08
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.08
Real estate activities	Renting and operating of own or leased real estate	1.08
total of remaining sectors with a proportion < 1.0%		9.38

The portfolio proportions of investments presented above are an average over the reference period.

3.23% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- **What was the share of investments made in transitional and enabling activities?**
The share of investments made in transitional and enabling activities was 0 %.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
1.80	7.00

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 17.33% for this Sub-Fund.

For these issuers, the economic activity was not yet covered under the EU Taxonomy, the positive contribution was not (fully) aligned with the criteria for environmentally sustainable economic activities under the EU Taxonomy, or the issuer did not fall under the reporting scope of the EU Taxonomy, and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 5.78% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 9.65% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (8.79%), for liquidity management purposes.
- Investments not covered by ESG research (0.86%) for diversification purposes. Minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Global Corporate Bond

Legal Entity Identifier: 222100EB6D3KIX3FMQ70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted the transition to a more sustainable world with a focus on pre-defined climate change related indicators. The Investment Manager favored issuers that performed well in such indicators or were on their way to perform well in these indicators while excluding issuers that were not aligned with the strategy. Issuers were selected based on the Investment Manager's ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers with substantial UN or international sanctions	0%	
Percentage of investments in securities of corporate issuers that, in respect to the pre-defined climate change related indicators (i.e. greenhouse gas intensity, carbon reduction path, exposure to fossil fuel), (i) perform well, or (ii) are on their way to perform well in these indicators, or (iii) where potential for improvement has been identified, based on the Investment Manager's analysis	(i): 39.45% (ii): 12.92% (iii): 32.85%	
Percentage of investments in issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to critical controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues	0%	
Sub-Fund's weighted average UN Global Compact profile, compared to the investment universe (i.e. global investment grade corporate debt market)	Sub-Fund: 94.37 Universe: 83.83	
Percentage of securities covered by ESG analysis	92.60%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bank of America	Financial and insurance activities	1.07	United States
Citigroup	Financial and insurance activities	0.84	United States
Mizuho Financial Group	Financial and insurance activities	0.82	Japan
CNP Assurances	Electricity, gas, steam and air conditioning supply	0.73	United States
GE Capital International Funding	Financial and insurance activities	0.73	Ireland
Plains All American Pipeline	Financial and insurance activities	0.71	United States

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Aeroporti di Roma	Transportation and storage	0.70	Italy
Tesco Corporate Treasury Services	Financial and insurance activities	0.69	United Kingdom
Dell International	Financial and insurance activities	0.66	United States
CVS Health	Retail trade, except of motor vehicles and motorcycles	0.64	United States
Pfizer	Financial and insurance activities	0.62	Singapore
Abertis	Transportation and storage	0.61	Spain
Constellation Brands	Manufacturing	0.59	United States
Unicredit	Financial and insurance activities	0.59	Italy
Bimbo Bakeries	Manufacturing	0.59	United States

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 87.23% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Activities of holding companies	19.08
Financial and insurance activities	Other financial service activities, except insurance and pension funding	16.10
Financial and insurance activities	Monetary intermediation	12.04
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	6.21
Professional, scientific and technical activities	Activities of head offices	5.19

Information and communication	Wired telecommunications activities	3.63
Information and communication	Other telecommunications activities	3.12
Financial and insurance activities	Trusts, funds and similar financial entities	2.53
Transportation and storage	Support activities for transportation	2.31
Manufacturing	Manufacture of beverages	2.25
Transportation and storage	Transport via pipeline	2.02
Professional, scientific and technical activities	Advertising	1.94
Human health and social work activities	Hospital activities	1.77
Retail trade, except of motor vehicles and motorcycles	Retail sale of other goods in specialised stores	1.43
Manufacturing	Other manufacturing	1.22
Manufacturing	Manufacture of food products	1.17
Financial and insurance activities	Insurance	1.16
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.13
Retail trade, except of motor vehicles and motorcycles	Retail sale of other household equipment in specialised stores	1.06
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	1.00
total of remaining sectors with a proportion < 1.0%		9.97

The portfolio proportions of investments presented above are an average over the reference period.

7.21% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 12.77% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (5.80%), for liquidity management purposes.
- Investments not covered by ESG research (6.97%) for diversification purposes, environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="radio"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.61% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its re-categorization from an SFDR Article 6 to an Article 8 product as from January 26, 2024, the Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 6.61% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review	81.93%	18.07% of corporate issuers obtained a score below 25. The issuers were Poinsettia Finance (score: 16.32), Uzpromstroybank (22.13), MC Brazil Downstream (5.79), Galaxy Pipeline assets Bidco (15.20), Aragvi Holding (18.75). The Investment Manager has conducted a qualitative analysis of the issuers.
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	6.61%	
Sub-Fund's combined minimum weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark (J.P. Morgan EMBI Global Diversified or CEMBI Broad Diversified)	Sub-Fund: 46.06 Benchmark (universe): 52.30 The Sub-Fund's score is 88.08% of the one of the benchmark	The weighted average ESG score (corporate and sovereign issuers combined) of the portfolio must be at least 75% the one of the benchmark.
Percentage of securities covered by ESG analysis	78.09%	Some issuers were not covered by Sustainalytics for the ESG rating. The Investment Manager conducted additional research to ensure that the issuers did not have unmanaged material ESG risks and were not involved in any controversies or violation of UNGC.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer "allocated funding", if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Banco Actinver	Financial and insurance activities	3.35	Mexico
Grenada	Public administration and defence; compulsory social security	3.08	Grenada
Bond Mexico	Public administration and defence; compulsory social security	2.72	Mexico
Bond Gabon	Financial and insurance activities	2.46	United States
Autopista Rio Magdalena	Financial and insurance activities	2.32	Colombia
Banque Ouest-Africaine de Developpement	Financial and insurance activities	2.27	Togo
Black Sea trade	Financial and insurance activities	1.94	Greece
Aragvi Holding	Financial and insurance activities	1.86	Ireland
Poinsettia Finance	Financial and insurance activities	1.82	Cayman Islands
MC Brazil Downstream	Financial and insurance activities	1.70	Brazil
Bond Congo	Public administration and defence; compulsory social security	1.68	Congo
Galaxy Pipeline assets Bidco	Financial and insurance activities	1.63	Jersey
Bond Tajikistan	Public administration and defence; compulsory social security	1.54	Tajikistan
Corporacion Nacional del Cobre de Chile	Mining and quarrying	1.48	Chile

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26/01/2024-31/08/2024

Bond Cameroon	Public administration and defense; compulsory social security	1.48	Cameroon
---------------	---------------------------------------------------------------	------	----------

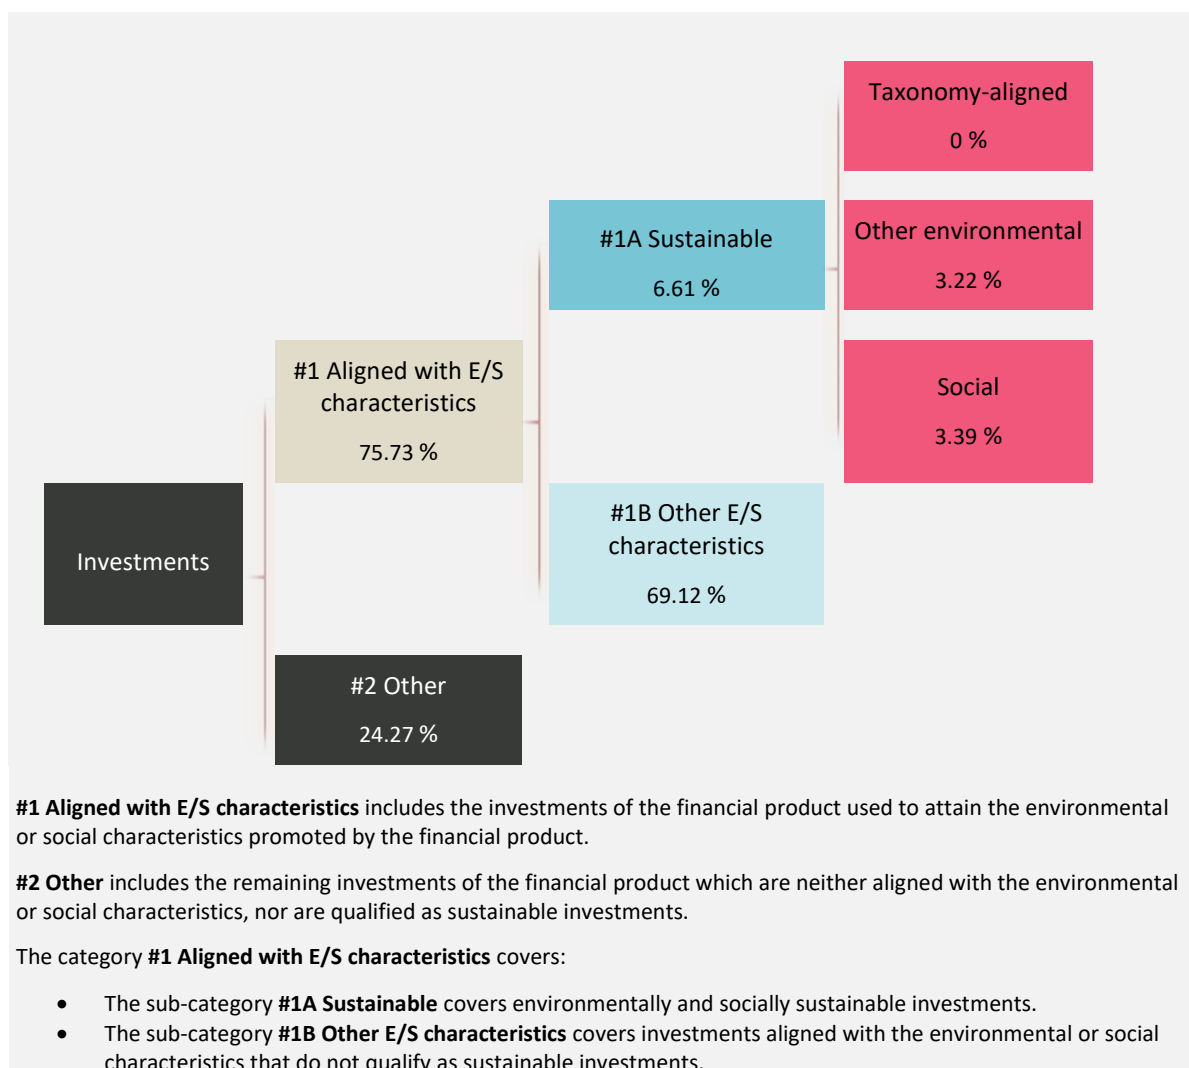

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 75.73% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub-sector	Proportion (%)
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	39.18
Financial and insurance activities	Other financial service activities, except insurance and pension funding	31.10

Financial and insurance activities	Monetary intermediation	3.59
Mining and quarrying	Mining support service activities	3.55
Mining and quarrying	Extraction of crude petroleum and natural gas	3.18
Professional, scientific and technical activities	Activities of head offices	2.83
Financial and insurance activities	Activities of holding companies	2.16
Manufacturing	Manufacture of coke and refined petroleum products	1.95
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	1.79
Financial and insurance activities	Trusts, funds and similar financial entities	1.72
total of remaining sectors with a proportion < 1.0%		5.74

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

10.47% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

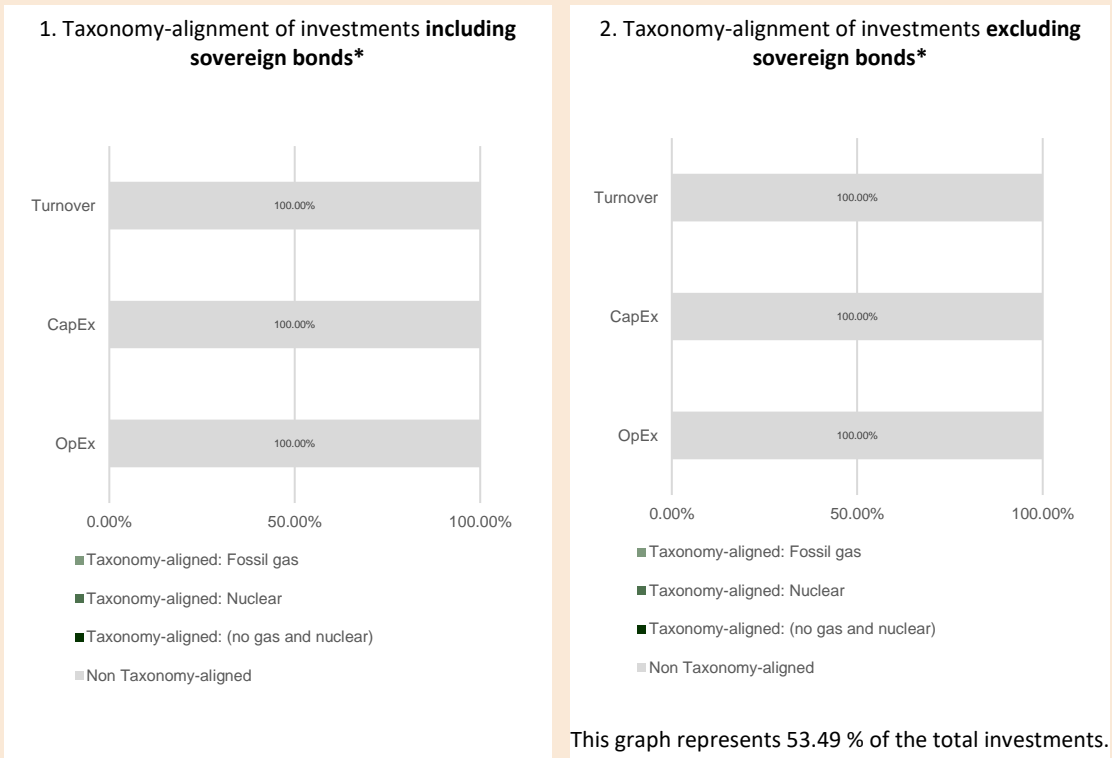

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 3.22% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 3.39% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 24.27% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (3.02%), for liquidity management purposes.
- Investments not covered by ESG research (21.25%) for diversification purposes, minimum environmental and social safeguards applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – Emerging Markets Corporate Bond

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> YES</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> NO</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 7.73% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its re-categorization from an SFDR Article 6 to an Article 8 product as from January 26, 2024, the Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 7.73% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	One issuer derived more than 25% revenue from thermal coal generation. The issuer is AES Andes. The Investment team conducted a qualitative analysis of the issuer and found out that the company has a decarbonization strategy in place. Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund for sovereigns	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	3 issuers were flagged with critical controversies by either MSCI or Sustainalytics: Pemex, Petroleos del Peru and Samarco Mineraca. Pemex and Petroleos del Peru are on watch list, and Samarco Mineraca is under ongoing review.
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review	84.96%	15.04% of corporate issuers obtained a score below 25. The issuers were Poinsettia Finance (score: 16.32), Uzpromstroybank (22.13), MC Brazil Downstream (5.79), Galaxy Pipeline assets Bidco (15.20), Aragvi Holding (18.75), EnfraGen (16.57), Drillco Holding (15.2), FEL Energy (8.61), Guara Norte (17.38), Coruripe (2.05), Alfa Desarrollo (5.49), Grupo Posadas (10.74), Tengizchevroil Finance (23.75), Hungarian Export-Import Bank (14.55), Ittihad (5.49), Finance department Government of Sharjah (0.78). [The Investment Manager has conducted a qualitative analysis of the issuers.]

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer “allocated funding”, if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Fidei	Financial and insurance activities	1.52	Colombia
STEAS Funding	Financial and insurance activities	1.38	Ireland
{CountryBrazil}	Public administration and defence; compulsory social security	1.34	Brazil
Poinsettia Finance	Financial and insurance activities	1.32	Cayman Islands
Pemex	Mining and quarrying	1.32	Mexico
Mexico Remittances Funding Fiduciary Estate	Financial and insurance activities	1.31	Luxembourg

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 26/01/2024-31/08/2024

{CountryColombia}	Public administration and defence; compulsory social security	1.28	Colombia
EnfraGen Energia	Financial and insurance activities	1.20	Spain
Vontobel Fund – Emerging Markets Investment Grade I USD **	Financial and insurance activities	1.20	Luxembourg
ELG Pearl Holdings	Professional, scientific and technical activities	1.18	Luxembourg
Minejesa	Financial and insurance activities	1.10	Netherlands
{CountryMexico}	Public administration and defence; compulsory social security	1.08	Mexico
Petroleos del Peru	Manufacturing	1.04	Peru
Ecopetrol	Mining and quarrying	1.03	Colombia
Transnet	Retail trade, except of motor vehicles and motorcycles	1.00	South Africa

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

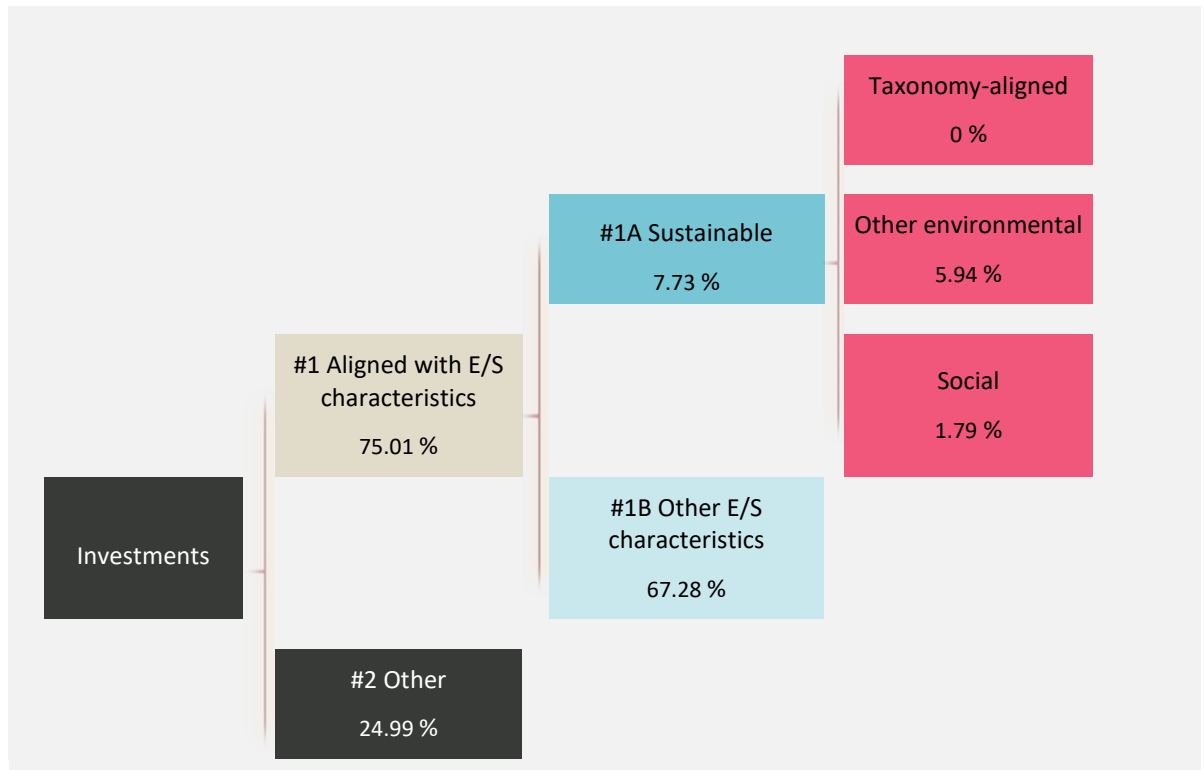

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 75.01% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Other financial service activities, except insurance and pension funding	23.79
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	20.62
Financial and insurance activities	Activities of holding companies	8.06
Mining and quarrying	Extraction of crude petroleum and natural gas	7.60
Financial and insurance activities	Monetary intermediation	4.85

Professional, scientific and technical activities	Activities of head offices	3.87
Mining and quarrying	Mining support service activities	3.67
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	3.39
Financial and insurance activities	Trusts, funds and similar financial entities	2.63
Manufacturing	Manufacture of coke and refined petroleum products	1.57
Mining and quarrying	Other mining and quarrying	1.52
Transportation and storage	Support activities for transportation	1.23
Retail trade, except of motor vehicles and motorcycles	Retail sale of other goods in specialized stores	1.00
total of remaining sectors with a proportion < 1.0%		8.44

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

17.75% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 5.94% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 1.79% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 24.99% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (5.10%), for liquidity management purposes.
- UCITS/UCIs (2.18%) for investment/diversification purposes, of which one SFDR Art. 8 fund (1.11%) with minimum environmental and social safeguards applied.
- Investments not covered by ESG research (17.71%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – TwentyFour Absolute Return Credit Fund

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> YES</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> NO</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75.65% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted the environmental and / or social characteristics by investing in issuers that the Investment Manager considered well prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in Investment Manager’s proprietary Environmental (E) and Social (S) scoring model. Information on the scoring model is available in the pre-contractual disclosure annex for the Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, since January 2024 the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

With effect from January 2024, the Sub-Fund increased its commitment to invest at least 80% (previously: 51%) of its net asset value in issuers that qualify as aligned with environmental and/or social characteristics. This included a new commitment to invest at least 15% of its net assets in sustainable investments. As at the financial year-end, the Sub-Fund had 96.22% of its net asset value invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 75.65% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	96.22%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	96.22%	96.41%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	12	Unadjusted gender pay gap
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond Germany	Administration of the State and the economic and social policy of the community	5.55	Germany
Bond United Kingdom	Administration of the State and the economic and social policy of the community	2.09	United Kingdom
NatWest Group	Activities of holding companies	1.47	United Kingdom

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Virgin Money	Activities of holding companies	1.35	United Kingdom
BUPA Finance	Activities of head offices	1.32	United Kingdom
Bond United States	Administration of the State and the economic and social policy of the community	1.25	United States
Tesco Corporate Treasury Services	Other financial service activities, except insurance and pension funding	1.25	United Kingdom
Legal & General Group	Activities of holding companies	1.23	United Kingdom
Bond United States	Administration of the State and the economic and social policy of the community	1.23	United States
Bond United States	Administration of the State and the economic and social policy of the community	1.23	United States
Bond United States	Administration of the State and the economic and social policy of the community	1.22	United States
Siemens Finance	Activities of holding companies	1.12	Netherlands
BNP Paribas	Monetary intermediation	1.12	France
Digital Stout Holding	Computer programming, consultancy and related activities	1.12	United States
Bunzl Finance	Trusts, funds and similar financial entities	1.08	United Kingdom

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 96.22% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub-sector	Proportion (%)
Financial and insurance activities	Activities of holding companies	21.65
Financial and insurance activities	Monetary intermediation	14.86
Financial and insurance activities	Other financial service activities, except insurance and pension funding	14.29
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	13.17
Financial and insurance activities	Insurance	3.41

Professional, scientific and technical activities	Activities of head offices	3.40
Financial and insurance activities	Trusts, funds and similar financial entities	3.31
Information and communication	Other telecommunications activities	3.15
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	2.91
Information and communication	Computer programming, consultancy and related activities	2.55
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	2.10
Manufacturing	Manufacture of wearing apparel	2.02
Information and communication	Wired telecommunications activities	1.94
Financial and insurance activities	Activities auxiliary to insurance and pension funding	1.05
Information and communication	Data processing, hosting and related activities; web portals	1.04
total of remaining sectors with a proportion < 1.0%		6.15

The portfolio proportions of investments presented above are an average over the reference period.

5.25 % of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 73.19 % for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 2.46 % in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 3.78 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.78%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met. The Sub-Fund promoted the environmental and / or social characteristics by investing in issuers that the Investment Manager considered well prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in Investment Manager’s proprietary Environmental (E) and Social (S) scoring model. Information on the scoring model is available in the pre-contractual disclosure annex for the Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, since January 2024 the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

With effect from January 2024, the Sub-Fund increased its commitment to invest at least 80% (previously: 51%) of its net asset value in issuers that qualify as aligned with environmental and/or social characteristics. This included a new commitment to invest at least 15% of its net assets in sustainable investments. As at the financial year-end, the Sub-Fund had 94.65% of its net asset value invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 38.81% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 12 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex	94.65%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 12 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex	94.65%	96.46%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the indicators for adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No

investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond United States	Administration of the State and the economic and social policy of the community	8.05	United States
Bond Germany	Administration of the State and the economic and social policy of the community	5.18	Germany
Bond United States	Administration of the State and the economic and social policy of the community	3.46	United States
Bond United States	Administration of the State and the economic and social policy of the community	1.98	United States

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/09/2023-31/08/2024

Bond United States	Administration of the State and the economic and social policy of the community	1.49	United States
Nationwide Building Society Core Capital Deferred	Monetary intermediation	1.27	United Kingdom
Phoenix Group Holdings	Activities of holding companies	1.17	United Kingdom
Pension Insurance	Activities auxiliary to insurance and pension funding	1.14	United Kingdom
Rothesay Life	Insurance	1.14	United Kingdom
Nationwide Building Society	Monetary intermediation	1.05	United Kingdom
Coventry Building Society	Monetary intermediation	0.98	United Kingdom
Bond United States	Administration of the State and the economic and social policy of the community	0.97	United States
Bond United States	Administration of the State and the economic and social policy of the community	0.96	United States
Achmea	Activities of holding companies	0.86	Netherlands
Lloyds Banking Group	Activities of holding companies	0.86	United Kingdom

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 94.65% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	24.12
Financial and insurance activities	Monetary intermediation	20.18
Financial and insurance activities	Other financial service activities, except insurance and pension funding	15.41
Financial and insurance activities	Activities of holding companies	13.53
Manufacturing	Manufacture of wearing apparel	6.90

Financial and insurance activities	Insurance	2.55
Professional, scientific and technical activities	Activities of head offices	2.11
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.64
Financial and insurance activities	Activities auxiliary to insurance and pension funding	1.30
total of remaining sectors with a proportion < 1.0%		8.45

The portfolio proportions of investments presented above are an average over the reference period.

0 % of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

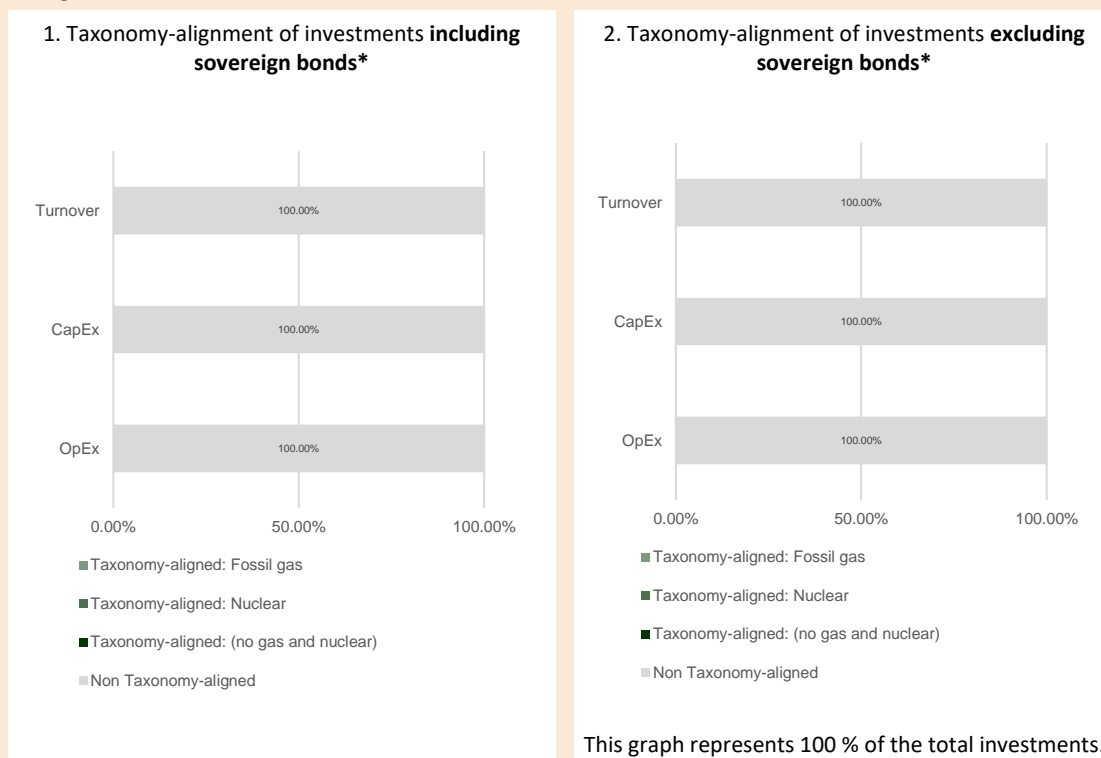

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37.73 % for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 1.08 % in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 5.35 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (5.35%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: Vontobel Fund – TwentyFour Sustainable Strategic Income Fund **Legal Entity Identifier:** 213800GWCMTLGFZXVO57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="radio"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.76% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted the environmental and / or social characteristics by investing in issuers that the Investment Manager considered well prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in Investment Manager’s proprietary Environmental (E) and Social (S) scoring model. Information on the scoring model is available in the pre-contractual disclosure annex for the Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment. In addition, the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment. With effect from January 2024, the Sub-Fund changed its definition of Sustainable Investments and increased its commitment to invest at least 20% (previously 15%) of its net assets in Sustainable Investments.

As at the financial year-end, the Sub-Fund had 95.84% of its net asset value invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 43.76% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	95.84%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 15 out of 100) and the minimum ESG score (set at 34 out of 100)	95.84%	95.71%
Percentage of corporate issuer securities covered by ESG analysis	N/A	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager. If a security complied with these requirements, the entire investment was considered a sustainable investment.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund did not cause significant harm to any environmental or social investment objective, the Sub-Fund took into account all the mandatory principal adverse impacts indicators and ensured that the Sub-Fund’s investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the indicators for adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	4	Exposure to companies active in the fossil fuel sector
1	13	Board gender diversity
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Bond United States	Administration of the State and the economic and social policy of the community	7.69	United States
Bond Germany	Administration of the State and the economic and social policy of the community	5.17	Germany
Bond United States	Administration of the State and the economic and social policy of the community	3.84	United States
Bond United States	Administration of the State and the economic and social policy of the community	3.26	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Dillon's Park CLO	Other financial service activities, except insurance and pension funding	1.58	Ireland
Bond United States	Administration of the State and the economic and social policy of the community	1.49	United States
RRME 7X	Manufacture of wearing apparel	1.48	Ireland

Penta CLO 2	Other financial service activities, except insurance and pension funding	1.12	Ireland
Capital Four CLO III 3X E	Manufacture of wearing apparel	1.11	Ireland
Aque	Manufacture of wearing apparel	1.11	Ireland
Avoca	Other financial service activities, except insurance and pension funding	1.11	Ireland

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 95.84% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub-sector	Proportion (%)
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	22.63
Financial and insurance activities	Monetary intermediation	18.27
Financial and insurance activities	Other financial service activities, except insurance and pension funding	15.83
Financial and insurance activities	Activities of holding companies	14.68
Manufacturing	Manufacture of wearing apparel	7.88

Financial and insurance activities	Insurance	2.93
Professional, scientific and technical activities	Activities of head offices	2.34
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.27
Information and communication	Other telecommunications activities	1.18
Financial and insurance activities	Trusts, funds and similar financial entities	1.10
Financial and insurance activities	Activities auxiliary to insurance and pension funding	1.06
total of remaining sectors with a proportion < 1.0%		7.28

The portfolio proportions of investments presented above are an average over the reference period.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43.76% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 4.16 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (4.16%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted the environmental and / or social characteristics by investing in issuers that the Investment Manager considered well prepared to handle financially material environmental and social challenges. Issuers were screened in accordance with the Investment Manager’s view of appropriate sustainability parameters as measured in Investment Manager’s proprietary Environmental (E) and Social (S) scoring model. Information on the scoring model is available in the pre-contractual disclosure annex for the Sub-Fund. The Sub-Fund avoided investments in issuers involved in certain economic activities that are harmful to society and the environment.

In addition, since January 2024 the Sub-Fund partially invested in sustainable investments by investing in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective based on the Investment Manager’s assessment.

With effect from January 2024, the Sub-Fund committed to invest at least 15% of its net assets in sustainable investments.

As at the financial year-end, the Sub-Fund had 96.05% of its net asset value invested in issuers that qualify as aligned with environmental and/or social characteristics, which included 23.71% of its net assets in sustainable investments.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex.
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 25 out of 100) and the minimum ESG score (set at 34 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	96.05%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund.	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum combined E&S score (set at 25 out of 100) and the minimum ESG score (set at 34 out of 100) that has been set for this Sub-Fund as described in the investment strategy section of the pre-contractual disclosure annex.	96.05%	91.61%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the Sub-Fund partially made was to invest in securities of issuers that contributed to either an environmental (climate change mitigation, climate change adaptation) or a social (empowerment) objective. In addition to following good governance, the investment must not have been classified as “Significant Harm” and must have been classified as “In transition” (which includes a commitment to transition) or “Positive contribution”, based on an evaluation conducted by the Investment Manager.

If a security complied with these requirements, the entire investment was considered a sustainable investment.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the sustainable investments that the Sub-Fund partially made, the Investment Manager took into account the indicators for adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources include ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered a set of principal adverse impacts on sustainability factors in the following areas:

Table	Number	Principal Adverse Impact Indicator
1	1	Total GHG emissions (Scope 1 and 2)
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	18	Share of investments in energy-inefficient real estate assets

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Storm	Residential mortgage-backed securities	3.35	Netherlands
Green Lion 2023-1	Residential mortgage-backed securities	3.14	Netherlands
Goldman Sachs International	Residential mortgage-backed securities	2.50	United Kingdom
Aque	Collateralized loan obligations	2.31	Ireland
Delphinus	Residential mortgage-backed securities	2.17	Netherlands
Twin Bridges	Residential mortgage-backed securities	2.10	United Kingdom
SC Germany Consumer	Consumer asset-backed securities	2.06	Luxembourg

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Holmes Master Issuer 1 A1	Residential mortgage-backed securities	1.93	United Kingdom
Together Asset Backed Securitisation	Residential mortgage-backed securities	1.82	United Kingdom
Capital Four CLO III 3X A	Collateralized loan obligations	1.81	Ireland
Arbour	Collateralized loan obligations	1.78	Ireland
Together Asset Backed Securitisation	Residential mortgage-backed securities	1.74	United Kingdom
CLONP 1X AR	Collateralized loan obligations	1.70	Ireland
Strab 2022	Residential mortgage-backed securities	1.69	United Kingdom
Twin Bridges	Residential mortgage-backed securities	1.67	United Kingdom

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

Due to limitations in the coverage and accuracy of NACE classifications for asset-backed securities, the sector classifications used for the Sub-Fund represent the specific pool of underlying loan or credit assets for each asset-backed security in order to better reflect exposure to that asset class.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 96.05% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors* detailed below:

Top sector	Sub-sector	Proportion (%)
Asset-backed securities	Residential mortgage-backed securities	41.95
Asset-backed securities	Collateralized loan obligations	30.71
Asset-backed securities	Auto Loans	7.60
Asset-backed securities	Consumer asset-backed securities	3.16
Asset-backed securities	Leases	1.07
total of remaining sectors with a proportion < 1.0%		14.48

The portfolio proportions of investments presented above are an average over the reference period.

*Due to limitations in the coverage and accuracy of NACE classifications for asset-backed securities, the sector classifications used for the Sub-Fund represent the specific pool of underlying loan or credit assets for each asset-backed security in order to better reflect exposure to that asset class.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹**

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.32% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 13.39 % in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 3.95 % of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.95%) for liquidity management purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Multi Asset Solution

Legal Entity Identifier: 2221002PGFRDROWH6H93

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p>●● <input type="checkbox"/> YES</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p>● <input checked="" type="checkbox"/> NO</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers will be selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. Further, the ESG approach has been amended, e.g. regarding exclusions, increase in minimum rating and additional climate scoring. For the Quantitative Investments ESG rating, the Investment Manager applied the concept of financial materiality to identify sustainability issues both currently material and potentially material in the future. As the drivers of financial materiality or the relevance of sustainability issues changes over time, the model uses sophisticated machine learning technics to continuously update itself. A minimum rating of E (on a scale from A to G, with A being the best, and G being the worst rating) on the Investment Manager’s proprietary QIB ESG rating scale is required to qualify to adhere to the promoted E/S characteristics. Further, the securities must pass the minimum climate score (set at 10, on a scale from 0 to 100, with 0 being the worst and 100 being the best). This proprietary model is based on a combination of backward-looking metrics such as carbon intensity, and forward-looking metrics such as warming potential which are combined in a sector neutral way.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	1.64%	
Percentage of investments in securities of sovereign issuers, that are considered “non-democratic”, based on a third-party research provider	0%	
Percentage of investments in securities of sovereign issuers that are not a party to conventions on chemical and biological weapon	0%	
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that pass the minimum ESG rating that has been set for this Sub-Fund	82.30%	
Percentage of investments in securities of issuers that pass the minimum Climate score that has been set for this Sub-Fund	77.50%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023

Percentage of investments in securities of sovereign issuers that pass the minimum climate composite score that has been set for this Sub-Fund (lowest decile is excluded)	N/A	39.77%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

anti-corruption and anti-bribery matters.

1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/09/2023-31/08/2024

Largest investments	Sector	% Assets	Country
Vontobel Fund – Sustainable Emerging Markets Debt HI (hedged) EUR	Trusts, funds and similar financial entities	4.45	Luxembourg
Bond Italy	Administration of the State and the economic and social policy of the community	3.66	Italy
Bond Spain	Administration of the State and the economic and social policy of the community	3.34	Spain
Bond Italy	Administration of the State and the economic and social policy of the community	2.64	Italy
Bond United States	Administration of the State and the economic and social policy of the community	2.29	United States
Bond United States	Administration of the State and the economic and social policy of the community	2.24	United States
Bond United States	Administration of the State and the economic and social policy of the community	2.23	United States
Bond Spain	Administration of the State and the economic and social policy of the community	1.93	Spain
Bond United States	Administration of the State and the economic and social policy of the community	1.75	United States
Bond United States	Administration of the State and the economic and social policy of the community	1.75	United States
Vontobel Fund – Green Bond S EUR	Trusts, funds and similar financial entities	1.61	Luxembourg
Bond Italy	Administration of the State and the economic and social policy of the community	1.59	Italy

Invesco Physical Gold*	Other financial service activities, except insurance and pension funding	1.38	Ireland
Bond United States	Administration of the State and the economic and social policy of the community	1.34	United States
Bond Germany	Administration of the State and the economic and social policy of the community	1.30	Germany

* Indirect investments not aligned with E/S characteristics.

The portfolio proportions of investments presented above are based on the Sub-Fund's holdings at the end of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 85.03% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund’s investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	34.75
Financial and insurance activities	Activities of holding companies	9.95
Financial and insurance activities	Monetary intermediation	7.63
Financial and insurance activities	Trusts, funds and similar financial entities	6.55
Professional, scientific and technical activities	Activities of head offices	5.07
Financial and insurance activities	Other financial service activities, except insurance and pension funding	4.72
Transportation and storage	Support activities for transportation	1.56
Mining and quarrying	Extraction of crude petroleum and natural gas	1.53
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.50
Financial and insurance activities	Insurance	1.31
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	1.29
Manufacturing	Manufacture of computer, electronic and optical products	1.18
Information and communication	Wired telecommunications activities	1.16
Manufacturing	Manufacture of chemicals and chemical products	1.10
total of remaining sectors with a proportion < 1.0%		15.22

The sector allocation of the portfolio presented above is an average based on the Sub-Fund’s holdings at the quarter-ends of the financial year.

2.82% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

To comply with the EU Taxonomy, the criteria for fossil gas include

Yes

In fossil gas

In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

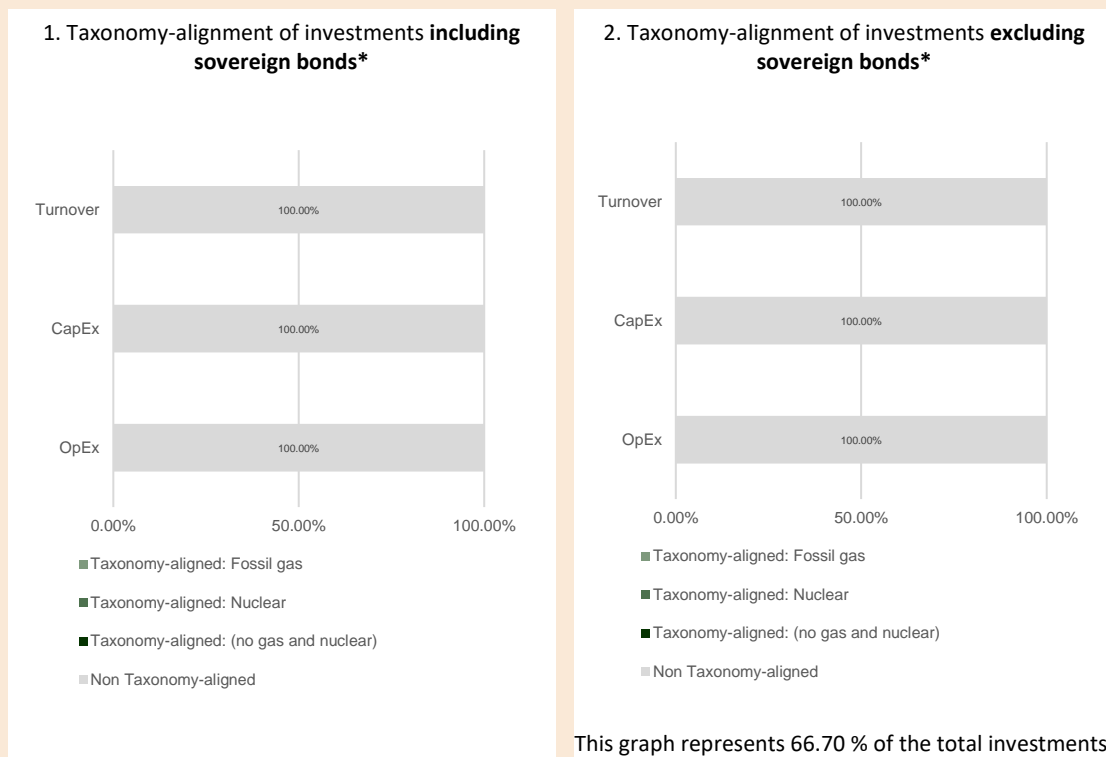

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The “Other” investments represented 14.97% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (for liquidity management purposes) and Derivatives (for investment purposes) (5.34%).
- Direct investments not aligned with E/S characteristics (5.94%). Lack of ESG data. Vontobel’s good governance process has been applied.
- Direct investments not aligned with E/S characteristics (2.14%). The binding elements were not met. Vontobel’s good governance process has been applied.
- UCITS and/or UCIs managed by other management company not aligned with E/S characteristics (1.55%). Only in target funds of reputable managers.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. In addition, the Sub-Fund was part of the pooled engagement activities by an external partner.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Active Beta Opportunities Plus Legal Entity Identifier: 222100V71MIVL749S743

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.36% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund has been renamed as from January 26, 2024, from previously VESCORE ARTIFICIAL INTELLIGENCE MULTI ASSET to new ACTIVE BETA OPPORTUNITIES PLUS. The following binding elements have been changed: Exclusions: Removal of nuclear energy, extension of the scope for exclusion of activities related to gambling, tobacco and other fossil fuels to a 10% threshold, addition of an exclusion for conventional weapons with a 10% threshold. Positive screening: Inclusion of a proprietary climate score and change to a proprietary ESG rating. For the Quantitative Investments ESG rating, the Investment Manager applied the concept of financial materiality to identify sustainability issues both currently material and potentially material in the future. As the drivers of financial materiality or the relevance of sustainability issues changes over time, the model uses sophisticated machine learning technics to continuously update itself. A minimum rating of E (on a scale from A to G, with A being the best, and G being the worst rating) on the Investment Manager's proprietary QIB ESG rating scale is required to qualify to adhere to the promoted E/S characteristics. Further, the securities must pass the minimum climate score (set at 10, on a scale from 0 to 100, with 0 being the worst and 100 being the best). This proprietary model is based on a combination of backward-looking metrics such as carbon intensity, and forward-looking metrics such as warming potential which are combined in a sector neutral way.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	Excluded products and /or activities are referenced in the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers, that are considered “non-democratic”, based on a third-party research provider	0%	
Percentage of investments in securities of sovereign issuers that are not a party to conventions on chemical and biological weapon	0%	
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in green, social or sustainability bonds in the securities portfolio	16.36%	
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating that has been set for this Sub-Fund	84.34%	
Percentage of investments in securities of corporate issuers that pass the minimum Climate score that has been set for this Sub-Fund	84.34%

Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	0%
Percentage of investments in securities of corporate issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at BBB)	N/A	39.09%
Percentage of investments in securities of sovereign issuers that pass the minimum MSCI ESG rating that has been set for this Sub-Fund (set at BBB)	N/A	48.57%
Percentage of securities that have an MSCI ESG rating better than BBB	N/A	87.66%
Percentage of investments in green, social or sustainability bonds in the securities portfolio	16.36%	6.09%
Percentage of investments in securities of corporate issuers that pass the minimum ESG rating that has been set for this Sub-Fund	84.34%	N/A
Percentage of investments in securities of corporate issuers that pass the minimum Climate score that has been set for this Sub-Fund	84.34%	N/A
Percentage of investments in securities of corporate and sovereign issuers with substantial UN or international sanctions	N/A	0%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund invested 16.36% in green bonds (the minimum was set at 15% in green, social or sustainability bonds as from January 2024), through direct investments in such bonds. These investments were qualified as sustainable investments. The direct investments are bonds categorized as green bonds based on international standards such as the International Capital Market Association (ICMA). The green bonds' objective was to enable capital-raising and investment for new and existing sound and sustainable projects with environmental benefits, that foster a net-zero emissions economy and protect the environment (example: renewable energy, pollution prevention and control, environmentally sustainable management of living natural resources and land use).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund 's investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments' exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager's own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in

either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Berlin Hyp AG	Monetary intermediation	6.13	Germany
NRW Bank	Monetary intermediation	5.25	Germany
Land Niedersachsen	Administration of the State and the economic and social policy of the community	4.46	Germany
LFA Foerderbank Bayern	Monetary intermediation	3.33	Germany
European Investment Bank	Monetary intermediation	3.27	Luxembourg
Land Hessen	Administration of the State and the economic and social policy of the community	3.24	Germany

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/09/2023-31/08/2024

Kreditanstalt für Wiederaufbau	Monetary intermediation	3.14	Germany
Investitionsbank Berlin	Monetary intermediation	3.12	Germany
Kreditanstalt für Wiederaufbau	Monetary intermediation	3.04	Germany
NRW Bank	Monetary intermediation	2.78	Germany
Nordrhein-Westfalen Land	Administration of the State and the economic and social policy of the community	2.45	Germany
Land Rheinland-Pfalz	Administration of the State and the economic and social policy of the community	2.43	Germany
DZ Hyp	Monetary intermediation	2.36	Germany
Land Berlin	Administration of the State and the economic and social policy of the community	2.23	Germany
Land Hamburg	Administration of the State and the economic and social policy of the community	2.20	Germany

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends of the financial year.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 84.34% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	45.26
Financial and insurance activities	Monetary intermediation	41.69
Financial and insurance activities	Trusts, funds and similar financial entities	0.43

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

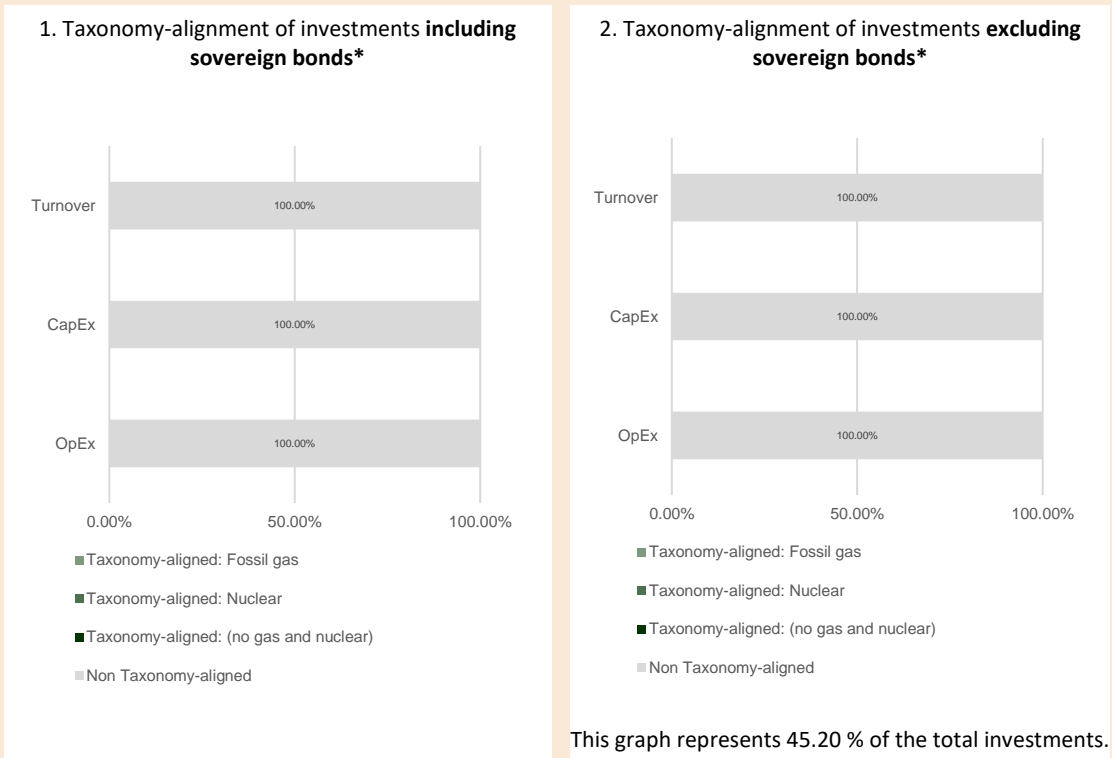

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16.36% for this Sub-Fund.

The issuers did not fall under the reporting scope of the EU Taxonomy and the Investment Manager did not have sufficient equivalent information to conclude its assessment.

What was the share of socially sustainable investments?

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 15.66% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash and cash equivalent investments (2.03%), for liquidity management purposes.
- Derivatives (13.24%) for strategy execution purposes.
- Indirect investments in two other Vontobel Fund sub-funds (0.39%) for diversification purposes, Vontobel’s good governance process has been applied.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Vontobel Fund – Multi Asset Defensive

Legal Entity Identifier: 549300W3HQ98SFBSQ681

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

NO

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

The Sub-Fund promoted environmental and social characteristics and invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and social challenges. Issuers were selected based on the Investment Manager’s ESG framework. The Sub-Fund was re-categorized from an SFDR Article 6 to an Article 8 product as from July 12, 2024. With the re-categorization, the following binding elements have been introduced: Various exclusions on certain business activities and a minimum of global treaties to adhere to for sovereign issuers, inclusion of a proprietary climate score and a proprietary ESG rating. For the Quantitative Investments ESG rating, the Investment Manager applied the concept of financial materiality to identify sustainability issues both currently material and potentially material in the future. As the drivers of financial materiality or the relevance of sustainability issues changes over time, the model uses sophisticated machine learning technics to continuously update itself. A minimum rating of E (on a scale from A to G, with A being the best, and G being the worst rating) on the Investment Manager’s proprietary QIB ESG rating scale is required to qualify to adhere to the promoted E/S characteristics. Further, the securities must pass the minimum climate score (set at 10, on a scale from 0 to 100, with 0 being the worst and 100 being the best). This proprietary model is based on a combination of backward-looking metrics such as carbon intensity, and forward-looking metrics such as warming potential which are combined in a sector neutral way.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	
Percentage of investments in securities of sovereign issuers, that are considered “non-democratic”, based on a third-party research provider	0%	
Percentage of investments in securities of sovereign issuers that are not a party to conventions on chemical and biological weapon	0%	
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	
Percentage of investments in securities of issuers that pass the minimum ESG rating that has been set for this Sub-Fund	85.20%	
Percentage of investments in securities of issuers that pass the minimum Climate score that has been set for this Sub-Fund	77.60%	

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	N/A
Percentage of investments in securities of sovereign issuers, that are considered “non-democratic”, based on a third-party research provider	0%	N/A
Percentage of investments in securities of sovereign issuers that are not a party to conventions on chemical and biological weapon	0%	N/A
Percentage of investments in securities of issuers that are in violation of certain international norms and standards promoted by the Sub-Fund or that are exposed to severe controversies (unless a positive outlook has been identified). Such controversies may be related to environmental, social or governance issues.	0%	N/A

Percentage of investments in securities of issuers that pass the minimum ESG rating that has been set for this Sub-Fund	85.20%	N/A
Percentage of investments in securities of issuers that pass the minimum Climate score that has been set for this Sub-Fund	77.60%	N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund’s investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	3	GHG intensity of investee companies
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources, including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the principal adverse impact areas considered.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
Pictet - Short-Term Money Market I EUR	Monetary intermediation	6.29	Luxembourg
Bond Germany	Administration of the State and the economic and social policy of the community	4.16	Germany

Vontobel Fund – Euro Short Term Bond I EUR *	Trusts, funds and similar financial entities	1.20	Luxembourg

* Indirect investments not aligned with E/S characteristics.

The portfolio proportions of investments presented above are based on the Sub-Fund's holdings at the end of the financial year.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 12/07/2024-31/08/2024

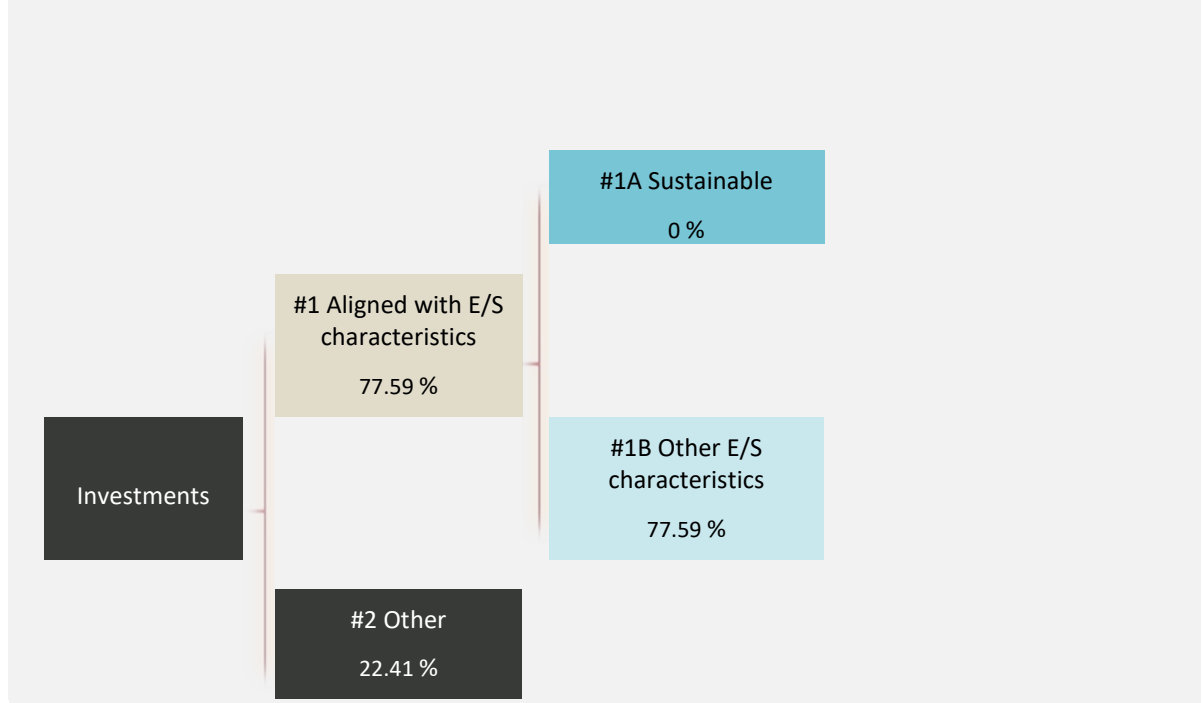

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 77.59% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Monetary intermediation	26.22
Public administration and defense; compulsory social security	Administration of the State and the economic and social policy of the community	23.38
Financial and insurance activities	Trusts, funds and similar financial entities	14.10
Financial and insurance activities	Other financial service activities, except insurance and pension funding	8.75
Financial and insurance activities	Activities of holding companies	5.09

Professional, scientific and technical activities	Activities of head offices	2.45
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.51
Information and communication	Wired telecommunications activities	1.40
total of remaining sectors with a proportion < 1.0%		11.78

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the end of the financial year.

0% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

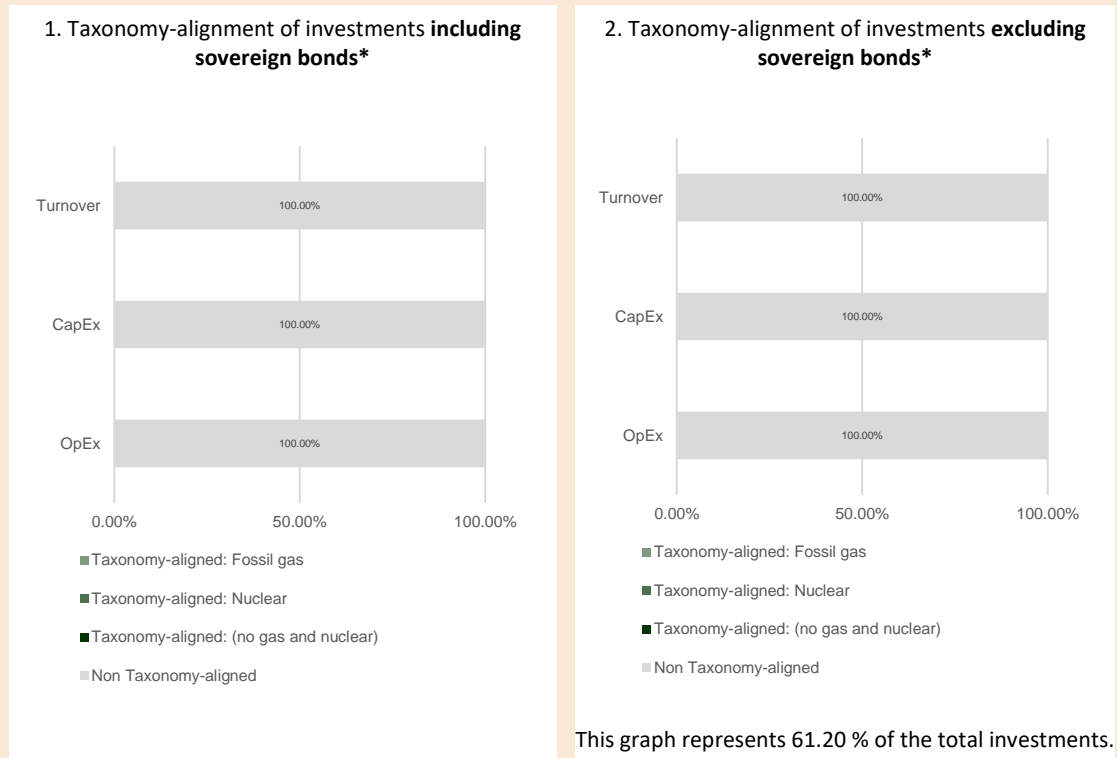

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0 %.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

● **What was the share of socially sustainable investments?**

The Sub-Fund invested 0% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 22.41% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (4.54%) and cash equivalent investments, for liquidity management purposes.
- Direct investments not aligned with E/S characteristics (9.60%). For Diversification purposes; Vontobel’s good governance process has been applied.
- Indirect investments not aligned with E/S characteristics (8.27%). For Diversification purposes, for indirect investments in two other Vontobel Fund sub-funds, Vontobel’s good governance process has been applied. For other indirect investments, the Sub-Fund invests only in securities of reputable managers.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period. In addition, the Sub-Fund was part of the pooled engagement activities by an external partner.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund were met.

Since its re-categorization from an SFDR Article 6 to an Article 8 product as from January 26, 2024, the Sub-Fund invested in issuers that the Investment Manager considered well-prepared to handle financially material environmental and/or social challenges. Issuers were selected based on the Investment Manager’s ESG framework, as described in the pre-contractual disclosure annex for the Sub-Fund. In addition, the Sub-Fund invested 8.49% of its net assets in sustainable investments by investing in securities of issuers that provided solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. By following this process, the Investment Manager promoted a combination of environmental (such as “greenhouse gas emissions”, “biodiversity” or “waste”) and social characteristics (such as “inequality”, “labour relations”, “investment in human capital”), for example because these aspects were integrated in the Investment Manager’s ESG assessment framework or because some of the applied mechanisms related directly to one of these characteristics. The ESG assessment framework may not include all of these characteristics as the aspects considered in this process may depend for example on the sector or geography the issuer is operating in.

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics that it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference period, the attainment of the environmental and social characteristics promoted by the Sub-Fund has been measured with the sustainability indicators, as presented in the table below:

Sustainability Indicators	Value	Comments
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	3 issuers derived more than 25% revenues from thermal coal generation. The issuers were PT Perusahaan Listrik Negara, AES Andes, Engie Energia Chile. The Investment team conducted a qualitative analysis of the issuers and found out that the companies have a decarbonization strategy in place by planning a coal phase-out or are active in countries with no or limited other options. Such companies are eligible for an exception in the Investment Manager's framework. Excluded products and /or activities are indicated under the investment strategy section of the pre-contractual disclosure annex
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	6 issuers were flagged with severe controversies by either MSCI or Sustainalytics: Office Cherifien des Phosphates, Pemex, Petronas Capital, Saudi Arabian Oil, Saudi Aramco, Tencent Holdings. Office Cherifien des Phosphates, Pemex and Tencent Holdings are on watch list. Petronas Capital, Saudi Arabian Oil and Saudi Aramco have been classified as a denied controversy case.
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review	85.24%	14.76% of corporate issuers obtained a score below 25. The issuers were Mexico City Airport Trust (score 24.81), Afreximbank (20.94), Alfa Desarrollo (5.49), Cometa Energia (6.34), Emaar Sukuk (24.73), Emirate of Abu Dhabi (17.32), EnfraFen Energia (16.57), FEL Energy (8.61), Finance Department Government of Sharjah (0.78), Galaxy Pipeline assets Bidco (15.2), Government of the Emirate of Sharjah (0.78), Guara Norte (17.38), Hungarian Export-Import Bank (18.3), Lima Metro Line 2 Finance (9.66), Qatar Insurance Company (17.32), Ras Laffan Liquefied Natural Gas (16.32), Schweizerische Nationalbank (6.21), SUCI Second Investment (0.78), Tengizchevroil Finance (23.75), Warba Bank (22.55).

Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	8.49%	
Sub-Fund's combined minimum weighted average ESG rating of securities of corporate and sovereign issuers compared to their respective universe in the benchmark (J.P. Morgan EMBI Global Diversified or CEMBI Broad Diversified)	Sub-Fund: 49.33 Benchmark: 52.72 The Sub-Fund's score is 93.57% of the one of the benchmark	The weighted average ESG score (corporate and sovereign issuers combined) of the portfolio must be at least 75% the one of the benchmark.
Percentage of securities covered by ESG analysis	90.08%	Some issuers were not covered by MSCI or Sustainalytics regarding controversies and ESG rating. [The Investment Manager conducted additional research to ensure that the issuers were not involved in any controversies or violation of UNGC.]

● **... And compared to previous periods?**

Financial year of the Fund ending on 31 August	2024	2023
Sustainability Indicators	Value	Value
Percentage of investments in securities of corporate issuers that derive a non-negligible part of their revenues from products and/or activities excluded by the Sub-Fund	0%	N/A
Percentage of investments in securities of sovereign issuers that are excluded based on the exclusion criteria applied by the Sub-Fund	0%	N/A
Percentage of investments in issuers that are in violation of certain global norms and standards promoted by the Sub-Fund or that are exposed to critical controversies. Such controversies may be related to environmental, social or governance issues.	0%	N/A
Percentage of investments in securities of corporate issuers that are considered "ESG Leaders" based on the Investment Manager's assessment (based on a score provided by Sustainalytics, a third-party ESG data provider; potentially subject to the Investment Manager's review	85.24%	N/A
Percentage of investments in securities of issuers that provide solutions to at least one of the actionable themes (climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment) and that qualify as sustainable investments	8.49%	N/A

Percentage of securities covered by ESG analysis	90.08%	N/A
--------------------------------------------------	--------	-----

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the financial product partially made was to invest in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. The assessment was conducted by the Investment Manager, based on quantitative ESG indicators and qualitative assessment of products, technologies, services or projects. The qualitative assessment considered research related to peer group and scientific studies. To qualify as sustainable investment, the issuer had a significant part of its activities related to these solutions, linked to at least one of the actionable themes. The Investment Manager required a minimum threshold of revenues or capital expenditure or operational expenditure or allocated funding of at least 20% (depending on the products, technologies, services or projects, an appropriate metric was used; for example, for financial institutions, the Investment Manager would prefer “allocated funding”, if relevant). If a security complied with this minimum requirement, the entire investment was considered a sustainable investment (provided that do no significant harm and, where applicable, good governance criteria were met, as described below), either with an environmental (climate change mitigation, responsible use of natural resources) or a social (addressing basic needs, empowerment) objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that the Sustainable Investments of the Sub-Fund do not cause significant harm to any environmental or social investment objective, the Sub-Fund takes into account all the mandatory principal adverse impacts indicators and ensures that the Sub-Fund’s investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as further outlined below.

How were the indicators for adverse impacts on sustainability factors taken into account?

For the Sustainable Investments that the Sub-Fund partially made, the Investment Manager took into account the adverse impacts on sustainability factors by applying the following process: The Investment Manager applied a process to identify the investments’ exposure to principal adverse impacts on sustainability factors based on in-house research; data sources included ESG data providers, news alerts, and the issuers themselves. Where no reliable third-party data was available, the Investment Manager made reasonable estimates or assumptions. No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas during the reference period.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund has a controversy monitoring process in place, that among others takes into account the alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. This process is based on third party data and may be complemented by the Investment Manager’s own ESG research capabilities. The Sub-Fund excludes issuers that are (i) in violation of the norms and standards (defined under the investment strategy section) promoted by the Sub-Fund; (ii) involved in critical controversies. Unless, in either case, the Investment Manager has identified a positive outlook (i.e., through proactive response by the issuer, proportionate rectification measures already announced or taken, or through active ownership activities with reasonable promise of successful outcomes).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the following adverse sustainability indicators for the Sub-Fund's investment strategy:

Table	Number	Principal Adverse Impact Indicator
1	1	Scope 1 GHG emissions
1	1	Scope 2 GHG emissions
1	1	Total GHG emissions (Scope 1 and 2)
1	2	Carbon footprint
1	3	GHG intensity of investee companies
1	4	Exposure to companies active in the fossil fuel sector
1	6	Energy consumption intensity per high impact climate sector NACE B-H and L
1	7	Activities negatively affecting biodiversity-sensitive areas
1	8	Emissions to water
1	9	Hazardous waste and radioactive waste ratio
1	10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
1	14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
1	15	GHG intensity of investee countries
1	16	Number of investee countries subject to social violations
1	16	Percentage of investee countries subject to social violations

The Investment Manager applied a process to identify issuers that are exposed to principal adverse impacts on sustainability factors based on in-house research and/or external data sources including ESG data providers, news alerts, and the issuers themselves.

No investment was identified as having a critical and poorly managed impact in any of the considered principal adverse impacts areas. As a result of such screening, the Investment Manager did not invest in certain companies and issuers.

What were the top investments of this financial product?

The top investments of the Sub-Fund are detailed below:

Largest investments	Sector	% Assets	Country
GACI First Investment	Financial and insurance activities	1.20	Cayman Islands
Inversiones La Construccion S.A.	Financial and insurance activities	1.16	Chile
FEL Energy VI	Financial and insurance activities	1.03	Luxembourg
Alfa Desarrollo	Professional, scientific and technical activities	1.02	Chile
Bank of Sharjah	Financial and insurance activities	1.02	Cayman Islands

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26/01/2024-31/08/2024

Bond Gabon	Financial and insurance activities	1.00	United States
PT Perusahaan Listrik Negara	Electricity, gas, steam and air conditioning supply	0.99	Indonesia
EnfraGen Energia	Financial and insurance activities	0.95	Spain
Aeropuerto Internacional de Tocumen	Transportation and storage	0.88	Panama
QatarEnergy	Mining and quarrying	0.87	Qatar
Bond Hungary	Public administration and defence; compulsory social security	0.84	Hungary
EIG Pearl Holdings	Professional, scientific and technical activities	0.83	Luxembourg
Mashreqbank	Financial and insurance activities	0.82	United Arab Emirates
LLPL Capital	Financial and insurance activities	0.82	Singapore
Nemak	Manufacturing	0.82	Mexico

The portfolio proportions of investments presented above are an average over the reference period, based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

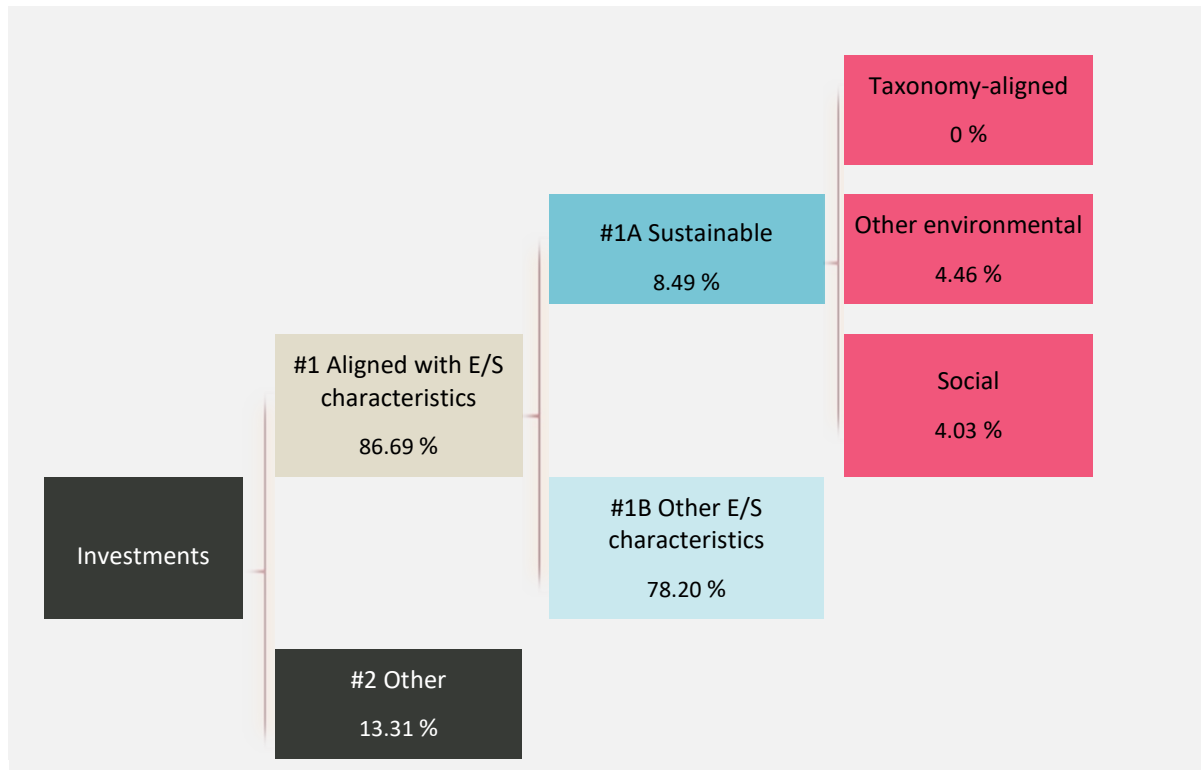

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 86.69% (assets aligned with environmental and social characteristics).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Depending on the potential usage of derivatives as part of this Sub-Fund's investment strategy, the exposure detailed above could be subject to variability as the portfolio's total value of investments (NAV) may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this Sub-Fund, please refer to its pre-contractual disclosures and the investment policy described in the Sales Prospectus.

In which economic sectors were the investments made?

The Sub-Fund's investments were made in the economic sectors detailed below:

Top sector	Sub- sector	Proportion (%)
Financial and insurance activities	Other financial service activities, except insurance and pension funding	20.35
Financial and insurance activities	Monetary intermediation	15.59
Public administration and defence; compulsory social security	Administration of the State and the economic and social policy of the community	11.66
Financial and insurance activities	Activities of holding companies	8.33
Electricity, gas, steam and air conditioning supply	Electric power generation, transmission and distribution	5.52

Professional, scientific and technical activities	Activities of head offices	5.24
Mining and quarrying	Extraction of crude petroleum and natural gas	4.71
Transportation and storage	Support activities for transportation	2.96
Mining and quarrying	Mining support service activities	1.86
Electricity, gas, steam and air conditioning supply	Manufacture of gas; distribution of gaseous fuels through mains	1.83
Mining and quarrying	Other mining and quarrying	1.40
Transportation and storage	Transport via pipeline	1.21
Manufacturing	Manufacture of chemicals and chemical products	1.11
Financial and insurance activities	Activities auxiliary to financial services, except insurance and pension funding	1.04
total of remaining sectors with a proportion < 1.0%		11.27

The sector allocation of the portfolio presented above is an average based on the Sub-Fund's holdings at the quarter-ends (29/02/2024, 31/05/2024 and 31/08/2024) of the financial year.

13.46% of the total value of investments (NAV) were in companies involved in sectors that could be connected to non-renewable energy sources, such as "Electricity, gas, steam and air conditioning supply (NACE code D)", "Mining and quarrying (NACE code B)" or "Manufacture of coke and refined petroleum products (NACE code C19)". It's important to note that even companies categorized under different NACE codes might still have some involvement with non-renewable energy-related activities, even if it's not their main focus. Additionally, the Sub-Fund might invest in bonds labeled as green, social, or sustainability bonds. These bonds typically fund projects unrelated to non-renewable energy, even if the companies issuing them can be active in sectors with potential links to non-renewable energy sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*¹

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional and enabling activities was 0 %.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of investments aligned with EU Taxonomy	
2024	2023
0	0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 4.46% for this Sub-Fund.

The investment manager did not make a commitment to investments under the reporting scope of the EU Taxonomy and did not have sufficient information to conclude an assessment on this.

What was the share of socially sustainable investments?

The Sub-Fund invested 4.03% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The “Other” investments represented 13.31% of the Sub-Fund’s Net Asset Value and consisted of:

- Cash (3.76%) and cash equivalent investments, for liquidity management purposes.
- Investments (sovereign issuers) not covered by ESG research (9.55%) for diversification purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used for the selection of the investments to attain the environmental and/or social characteristics promoted by this Sub-Fund have been monitored throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund has not designated a reference benchmark to determine whether this Sub-Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
