<b>Competent Authority</b>	Luxembourg Commission de Surveillance du Secteur Financier

**You are about to purchase a product that is not simple and may be difficult to understand.**

This document was prepared on 28 August 2023.

## What is this product?

### Type

The Fund is a compartment of MFS Investment® Funds established in Luxembourg as an open-ended investment fund (a *fonds commun de placement* or "FCP"). The assets of each compartment are segregated by law. The fund qualifies as an Undertaking for Collective Investment in Transferable Securities (a UCITS fund).

The fund has no fixed maturity date. The recommended holding period of the fund is 5 years.

You may request to redeem your units, on any business day of the MFS Investment Funds, in the currency in which they are denominated, at their net asset value. You may exchange your units into units of another class of the same or another fund of the MFS Investment Funds having the same fee structure (and in certain cases, into classes with a different fee structure). An exchange within the same fund must be into a class with the same currency denomination.

Information about other classes of the fund available in your country is available at fcp.mfs.com or from your financial intermediary. The fund's depository is State Street Bank International GmbH, Luxembourg Branch. See "Other Relevant Information" below for information about the fund's depository and how to obtain further information about the fund.

### Objective

The fund's investment objective is to seek total return with an emphasis on current income, but also considering capital appreciation, as measured in US dollars.

### Investment Policy

The fund invests primarily (at least 70%) in investment grade U.S. municipal debt instruments. The fund generally focuses its investments in taxable municipal debt instruments, but may also invest in U.S. tax-exempt municipal debt instruments and debt instruments of private issuers, including non-profit organizations, used to finance services and/or projects that relate to public or municipal functions. The fund may invest a relatively large percentage of the fund's assets in municipal and other debt instruments that finance similar services or projects. The fund may invest a significant percentage of the fund's assets in issuers in a single U.S. state, territory, or possession, or a small number of U.S. states, territories, or possessions. The fund's municipal and related investments may be supported by cash flows from tax receipts, infrastructure projects or other assets. However, the fund will not invest in other securitized instruments or mortgage-backed securities. The fund will also not invest in contingent convertible debt instruments, or debt instruments that are distressed or defaulted at the time of purchase, but may invest in U.S. municipal debt instruments that are distressed or defaulted but protected by insurance guaranteeing the payment of principal and interest. The Investment Manager may consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors. The fund falls within Article 6 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") and does not promote an environmental or social characteristic, or have sustainable

investment as its objective. The fund may use derivatives for hedging and/or investment purposes but will not extensively or primarily use derivatives to achieve the fund's investment objective.

Prices of municipal debt instruments can be volatile and significantly affected by adverse tax changes or court rulings, legislative or political changes, changes in market and economic conditions, and the financial condition of municipal issuers and insurers. Because many municipal debt instruments are issued to finance similar projects, conditions in certain industries can significantly affect the revenue generated and the overall municipal market. The taxable municipal market is smaller and less diverse than the broader municipal securities market and may be less liquid than other debt instruments. Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of its investments, as well as other factors. The fund's ability to earn income on its investments will be reduced during periods of low or negative interest rates and certain share classes of the fund may realize negative net income resulting in losses to investors in that class. Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests. Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost. For more information about the fund's risks, please see the Prospectus.

The fund's benchmark, 75% Bloomberg Municipal Bond Index - Taxable / 25% Bloomberg Municipal Bond Index, has been designated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

### Currency Hedging

MFS will generally enter into currency hedging transactions for this class with the aim to reduce exchange rate and return fluctuations between the class and U.S. dollars, the base currency class of the fund.

### Distributions

Income will not be distributed to unitholders but reflected in the assets of the fund.

### Intended Retail Investor

The fund is intended as a long term investment for investors who have the ability to bear fluctuations in the value of their investment, including in extraordinary market conditions, the total loss of their investment. The fund is available for investors with basic knowledge of financial instruments and limited or no previous experience investing in pooled investment products. Notwithstanding the above, investment decisions should be based on each investor's specific risk profile and investment portfolio.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this fund compared to other products. It shows how likely it is that the fund will lose money because of movements in the markets.

 The risk indicator assumes you keep the fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Be aware of currency risk if your reference currency differs from the base currency of the fund as the final return you receive depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown.

The hedging strategy for the Hedged Classes will not completely eliminate the exposure to currency movements.

The rating reflects the risks of investing in a portfolio of U.S. municipal debt instruments, other securities as described under "Investment Policy" above, and derivatives. It does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risk, change over time and can affect the fund's returns differently in the future.

**This product does not include any protection from future market performance so you could lose some or all of your investment.**

## Performance Scenarios

**What you get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

Recommended Holding Period: 5 Years

Investment CHF 10,000		IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
<b>Scenarios</b>			
Stress scenario	What you might get back after costs	7,800 CHF	6,930 CHF
	Average return each year	-22.0%	-7.1%
Unfavourable scenario	What you might get back after costs	7,980 CHF	8,430 CHF
	Average return each year	-20.3%	-3.4%
Moderate scenario	What you might get back after costs	10,380 CHF	12,270 CHF
	Average return each year	3.8%	4.2%
Favourable scenario	What you might get back after costs	12,440 CHF	13,790 CHF
	Average return each year	24.4%	6.6%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest CHF 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other Products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the fund. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if MFS Investment Management Company (Lux) S.à r.l. is unable to pay out?

The assets of the fund and of the Product Manufacturer are segregated, so the default of the Product Manufacturer should not result in a financial loss to the fund's shareholders.

## What are the costs?

**The person advising on or selling you this product (including through an insurance or capitalization contract, if applicable) may charge you other costs that are not taken into account in this document. If so, this person will provide you with information about these costs and how they affect your investment.**

### Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000 is invested.

## Key Information Document

Investment CHF 10,000	IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
Total Costs	40 CHF	220 CHF
Annual cost impact*	0.4%	0.4%

\* This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 4.6% before costs and 4.2% after costs.

## Composition of costs

One off costs upon entry or exit		If you exit after 1 year
Entry costs	0.00% of the amount you pay in when entering this investment.	0 CHF
Exit costs	0.00% of your investment before it is paid out to you if you redeem in less than one year.	0 CHF
Ongoing costs taken each year		
Portfolio transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	2 CHF
Management fees and other administrative operating costs*	0.41% The impact of the costs that we take each year for managing your investments.	41 CHF
Incidental costs		
Performance fees	There is no performance fee for this product.	N/A
Carried interests	There are no carried interests for this product.	N/A

\* The other ongoing costs figure shown here is based on annualised expenses for the six month period ended 31 March 2023. Other ongoing costs may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the prospectus, which is available at [fcp.mfs.com](http://fcp.mfs.com).

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years.

This product has no required minimum holding period. You may request, at any time, to redeem your units in the currency in which the purchase was made at their net asset value. Due to potential volatility of returns, you should be prepared to stay invested for at least 5 years. However, we believe holding investments over a full market cycle provides the best opportunity for investors to realize the value of the active investment approach utilized in the management of this fund.

## How can I complain?

Any complaint regarding the person advising on or selling the fund should be addressed to that Financial Intermediary.

Complaints concerning the Product Manufacturer or about the fund itself can be lodged as follows:

- You may contact us free of charge on +352-46-40-10-600 to log your complaint and learn what steps you need to take.

- You may log your complaint via email to [MFSFCPQueryDesk@statestreet.com](mailto:MFSFCPQueryDesk@statestreet.com).
- You may send your complaint in writing to MFS Investment Management Company (Lux) S.à r.l, 4, rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg.
