# LETTER FROM THE BOARD OF DIRECTORS

## 2023 Global Financial Markets Review

Global equities produced solid returns for the year despite persistent volatility as generally positive economic and corporate earnings data offset concerns about a possible impending recession, still-high inflation and interest rates, geopolitical tensions, and turmoil in the U.S. and European banking sectors. In the final weeks of the year, markets experienced a strong rally amid signs of cooling inflation and economic data and dovish comments from the U.S. Federal Reserve, driving investor hopes for rate cuts in 2024.

Major U.S. stock indexes produced strong gains in 2023, as the equity market rebounded from poor performance in 2022. Thanks in part to generally favorable corporate earnings, a resilient economy, and increased investor interest in artificial intelligence (AI), equities climbed the proverbial wall of worry, led by a relatively small group of high-growth, technology-oriented mega-cap companies. The market overcame bearish factors such as regional bank turmoil in March following the failures of Silicon Valley Bank and Signature Bank; uncertainty about Congress and President Joe Biden agreeing to raise the debt ceiling—the statutory limit on U.S. government borrowing—before the government ran out of money in June; geopolitical concerns stemming from the ongoing Russian invasion of Ukraine and from Israel's response to deadly Hamas attacks in early October; and a sluggish Chinese economic recovery hindered in part by distress in the property sector.

Developed European stocks rose over the period despite the fact that the region was plagued by high inflation, shrinking economic activity, high interest rates, and slowing demand from China which is a negative for the European economy. Both the European Central Bank (ECB) and the Bank of England raised interest rates to multi-year highs, but in the fourth quarter, both central banks paused rate hikes, and the ECB also reduced its inflation and economic growth forecasts, helping stocks in the region to rally as the year ended.

Developed Asian markets also gained ground. Equities in Japan led the region, helped by the continuation of a highly stimulative monetary policy. However, as the year closed out, yen strength posed a headwind for the country's exporters, while uncertainty about the central bank's yield curve control framework and commitment to negative interest rates also weighed on sentiment. Hong Kong stocks declined by double digits for the year, as the Chinese economic recovery struggled amid property sector woes on the mainland.

Emerging markets rose but broadly underperformed stocks in developed markets. Most markets in Latin America produced very strong returns. Stocks in Argentina surged amid hopes that President Javier Milei, a right-wing libertarian economist who was elected late in the year, would take strong measures to address the country's economic woes. In the emerging Europe, market performance was largely positive. However, Turkish stocks fell as the central bank raised short-term interest rates aggressively in the second half of the year to fight elevated inflation. Emerging Asia was among the weakest regions, weighed down by a selloff in Chinese shares, including the A shares market, as the Chinese economy remained sluggish, hobbled in part by continued distress in the real estate sector.

Sector performance in the MSCI All Country World Index was positive. Information technology, communication services, and consumer discretionary were the strongest performers, while utilities and consumer staples delivered tepid but modestly positive returns.

U.S. taxable investment-grade bonds produced positive returns in 2023, thanks to a strong year-end rally that offset earlier losses stemming from rising interest rates. U.S. Treasury bill yields rose as the Federal Reserve lifted the fed funds target rate to the 5.25% to 5.50% range by the end of July and kept the target range steady through the end of the year. Intermediate- and long-term U.S. Treasury yields climbed to multi-year highs by late October. In fact, the 10-year U.S. Treasury note yield reached the 5.00% level for the first time in about 16 years. Yields plunged in the last two months of the year, however, amid signs of disinflation, labor market softening, and expectations for Fed rate cuts in 2024. The 10-year U.S. Treasury note yield ended the year at 3.88%.

In the investment-grade bond universe, sector performance in 2023 was broadly positive. Corporate bonds produced very strong gains. Mortgage-backed, commercial mortgage-backed, and asset-backed securities performed in line with the broad market index. U.S. Treasury securities trailed with milder gains. Tax-free municipal bonds outpaced the broad taxable bond market. High yield corporate bonds, which are less sensitive to interest rate movements and more sensitive to credit-related trends, strongly outperformed higher-quality bonds.

## LETTER FROM THE BOARD OF DIRECTORS continued

Bonds in developed non-U.S. markets produced positive returns in U.S. dollar terms, helped by a weaker U.S. dollar versus major European currencies. In Europe, long-term government bond yields climbed for most of the year, as the Bank of England and the European Central Bank raised short-term interest rates through the end of September. Long-term yields retreated with U.S. Treasury yields in the fourth quarter as inflation pressures eased and the major central banks kept short-term rates steady.

In Japan, the yen fell versus the dollar for the year. Long-term Japanese government bond (JGB) yields were fairly steady in the first half of the year but climbed from July through late October. During that timeframe, the Bank of Japan (BoJ) increased the flexibility of its yield curve control policy on two occasions; this policy was originally designed to keep 10-year JGB yields around 0.50%. By the end of October, the 10-year JGB yield approached 1.00%—its highest level in more than a decade. Around that time, the BoJ indicated that it regards “the upper bound of 1.0 percent for 10-year JGB yields as a reference in its market operations,” rather than strictly capping interest rates at that level. Yields retreated in November and December, tracking government bond yields in the U.S. and Europe. Emerging markets bonds produced strong returns in U.S. dollar terms in 2023. Bonds denominated in local currencies fared better than dollar-denominated issues, as most emerging markets currencies strengthened versus the U.S. dollar.

# T. Rowe Price Global Focused Growth Equity Fund

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of listed companies. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve its objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the latest prospectus. However, as at the date of the latest prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# T. Rowe Price Global Growth Equity Net Zero Transition Fund<sup>(1)</sup>

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 50% of the value of its portfolio invested in Sustainable Investments, while, at the same time, aiming for 100% of the value of the portfolio to have achieved the transition required to limit global warming to 1.5 degrees by 2050. The investment manager implements the following investment strategies: Net Zero status Framework, including engagement, sustainable investment exposure and application of a responsible exclusion screen. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of listed companies whose market capitalisation, at the time of purchase, falls within or above the range covered by the MSCI All Country World Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve its objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the latest prospectus. However, as at the date of the latest prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# T. Rowe Price Health Sciences Equity Fund

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of, and income from, its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that are involved in the research, development, production, or distribution of products or services related to health sciences. The companies may be anywhere in the world, including emerging markets, with a focus on companies in the United States.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of pharmaceutical companies, health care services companies, medical products and device providers, life sciences and biotechnology firms. While the Fund can invest in companies of any size, the majority of its assets are expected to be invested in large- and mid-capitalisation companies. Types of securities may include common stocks, preferred stocks, American Depositary Receipts (ADRs). Investment in China A shares may be made through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect programs.

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the latest prospectus. However, as at the date of the latest prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# T. Rowe Price Japanese Equity Fund

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies in Japan.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in Japan or conduct most of their business there. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' of the latest prospectus. However, as at the date of the latest prospectus, the fund does not expect to invest in any other eligible securities, on an ancillary basis, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# T. Rowe Price US Large Cap Growth Equity Fund

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares from large capitalisation companies in the United States that have the potential for above-average and sustainable rates of earnings growth. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that have a market capitalisation equal to or greater than the companies in the Russell 1000 Index. Types of securities may include common shares, preferred shares, warrants, American Depository Receipts (ADRs), European Depository Receipts (EDRs) and Global Depository Receipts (GDRs).

In seeking to achieve its objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the latest prospectus. As at the date of the latest prospectus, this may include eligible securities from other countries, to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# T. Rowe Price US Large Cap Value Equity Fund

## INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

The fund is actively managed and invests mainly in a diversified portfolio of shares from large capitalisation companies in the United States that are selling at discounted valuations relative to their historical average and/or the average of their industries.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. Details of how environmental and/or social characteristics are promoted are further explained in the relevant Sustainable Finance Disclosure Regulation section of this report.

The fund invests primarily in equity and equity-related securities of companies that are either incorporated in the United States of America or conduct most of their business there and that have a market capitalisation equal to or greater than the companies in the Russell 1000 Index. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs).

In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities as described in the 'General Investment Powers and Restrictions' section of the latest prospectus. As at the date of the latest prospectus, this may include up to a limit of 10%, asset-backed securities (ABS), mortgage-backed securities (MBS), distressed or defaulted bonds and real estate investment trusts (REITs) or eligible securities from other countries to more than a limited extent.

The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund objectives and the environmental and social characteristics described within the 'Objective and Investment Policy' section of the latest prospectus and in the relevant Sustainable Finance Disclosure Regulation section of this report. For a summary of the main types of derivatives that may be used within the fund and what they may be used for, refer to the 'Fund Derivatives Usage' section of the latest prospectus.

# Notes to the Financial Statements

As at 31 December 2023

## 1. THE COMPANY

Select Investment Series III SICAV (the “Company”) is an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg as a Société d’Investissement à Capital Variable (“SICAV”) and was authorised under Part I of the Law of 17 December 2010, as amended, relating to Undertakings for Collective Investment. The Company was incorporated on 22 March 2018 and qualifies as an Undertakings for Collective Investment in Transferable Securities (“UCITS”).

On 22 March 2018, the Company has appointed T. Rowe Price (Luxembourg) Management S.à r.l. as its management company (the “Management Company”), responsible for management, administration and distribution of the Company.

The Company is structured to provide both institutional and individual investors with a choice of investment portfolios (“Fund(s)”) each offering different investment objectives designed to meet specific risk expectations and diversification requirements.

### Fund Rename

T. Rowe Price Global Growth Equity Net Zero Transition Fund was formally known as T. Rowe Price Global Growth Equity Fund prior to 01 November 2023.

During the year ended 31 December 2023, the following Funds had the following share class launches and share class liquidations:

### New share classes

Fund	Class Currency	Base Currency	Launch date
<b>T. Rowe Price Health Sciences Equity Fund</b>			
Class Id (GBP)	GBP	USD	05 April 2023
Class Qd (GBP)	GBP	USD	04 October 2023

### Share class liquidations

Fund	Class Currency	Base Currency	Liquidation date
<b>T. Rowe Price Japanese Equity Fund</b>			
Class I (USD)	USD	JPY	30 November 2023
Class Q (EUR)	EUR	JPY	30 November 2023
<b>T. Rowe Price US Large Cap Growth Equity Fund</b>			
Class I10	USD	USD	04 April 2023

As at 31 December 2023, up to four classes of shares may be offered to investors (“Class”): Class A Shares, Class I Shares, Class Q Shares and Class S Shares. The shares of any Class may further be sub-divided into categories of shares that either distribute income (“Distributing Shares”) or accumulated income (“Accumulating Shares”), and may be hedged (“Hedged Shares”) or denominated into a currency other than the currency of denomination for a particular Fund. Class A Shares are available for all investors. Class Q Shares are intended for (i) independent investment advisers, (ii) discretionary investment managers, (iii) intermediaries, in each case where the regulatory environment to which they are subject prohibits the receipt and/or retention of

retrocessions, (iv) investors having a written, fee based advisory or discretionary arrangement with entities listed in (i), (ii) and (iii), or (v) clients of non-independent advisers with whom they have a written, fee based agreement that prohibits the receipt and/or retention of retrocessions. Class I and S Shares are available for institutional investors only. Class S Shares are restricted to investors who have a professional services agreement with the investment manager.

Where appropriate, one or more suffixes (each defined below) may be added to indicate certain characteristics:

**d:** Indicates that the shares are net income distributing shares. Substantially all income earned by the class over the distribution year is distributed after the deduction of fees and expenses charged to the class.

**x, y:** Indicates that the shares are gross income distributing shares. Substantially all income earned by the class over the distribution year is distributed prior to the deduction of fees and expenses charged to the class. In effect, fees and expenses will be deducted from capital. While this will increase the amount of income (which may be taxable) available for distribution to holders of the shares, investors should be aware that such charging to capital amounts to a return, or withdrawal, of part of an investor’s original investment, or from any capital gains attributable to that original investment, this could erode capital and constrain future growth. Furthermore, where fees and expenses are deducted from capital and gross income is distributed, this may have tax implications for investors, especially those for whom income and capital gains are subject to different treatment and personal tax rates.

Share classes that do not carry a “d”, an “x” or a “y” suffix are accumulating shares.

**h:** Indicates that the shares are ‘portfolio hedged’. Such hedging is intended to reduce or eliminate the effects of changes in the exchange rate between the currency exposure(s) of a fund’s portfolio and the share class currency. Although the hedging will seek to fully eliminate the effect of foreign exchange rate fluctuations between the share class currency and the currency exposure(s) of the relevant fund portfolio, it is unlikely that the hedging will eliminate 100% of the difference, because fund cash flows, foreign exchange rates, and market prices are all in constant flux.

**b:** Indicates that shares are ‘benchmark hedged’. Such shares will be hedged, with reference to a relevant index, with the intention to preserve currency exposure taken as part of the investment strategy.

**n:** Indicates that the shares are ‘NAV hedged’. Such shares will be hedged with the intention to reduce or eliminate the effects of changes in the exchange rate between the fund’s base currency (not the underlying currency exposures) and the share class currency.

Currency abbreviation: A three-letter abbreviation that indicates the share class currency (the currency in which the shares are issued) when it is different from the base currency of the fund.

# Notes to the Financial Statements continued

As at 31 December 2023

Class with number as a suffix indicates that the shares are reserved shares. These shares are limited to particular investors, distributors, or countries.

Reserved shares have the same characteristics as their corresponding non-reserved shares, except that reserved shares may seek income from additional sources and distribute it more frequently (if they are distributing shares), and the Management Company may waive more of its fees. All classes belonging to the same Fund will be commonly invested in adherence with the specific investment objective of the relevant Fund but may differ with regard to fee structure, minimum subscription amount, dividend policy, currency hedging, or other particular features described in the Company's prospectus.

## 2. SIGNIFICANT ACCOUNTING POLICIES

### (a) General

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investments funds. The financial statements of the Company and each of its Funds are prepared on a going concern basis of accounting.

The financial statements as at 31 December 2023 are prepared based on the last Net Asset Value ("NAV") as at the current financial year-end, being the one as at 29 December 2023.

### (b) Valuation of Securities

In determining the value of the assets of the Funds, securities which are quoted or dealt in on an official exchange or another regulated market are valued at the latest available sale price, or official closing price for certain markets, on the official exchange or market which is normally the principal market for such securities.

Securities which are not quoted or dealt in on an official exchange or another regulated market, as well as securities which are so quoted or dealt in but for which the last sale price is not available, and securities for which the last sale price is not representative of fair value are valued in good faith by and under the direction of the Board of Directors on the basis of reasonably expected sale prices.

### (c) Securities Transactions and Investment Income

Securities transactions are recorded on a trade date basis. Realised gains and losses are determined on the basis of the average cost of securities sold.

Dividend income is accrued on the ex-dividend date (net of withholding taxes). Interest income and expenses are recorded on the accrual basis. Premiums and discounts on debt securities are recognised in income on a straight-line basis.

### (d) Cash at Bank and brokers

Cash at banks includes cash balances in time deposits ranging from overnight to three months in duration with various financial institutions meeting certain credit standards. Cash collateral received is included in the cash at bank in assets but is also recorded as cash due to brokers in liabilities in the Statement of Net Assets. Each Fund could experience a delay in recovering

the value of these deposits and a possible loss of income or value if the counterparty fails to return deposited amounts. Cash collateral paid/owed to the brokers is recorded as part of Cash at brokers.

### (e) Class Accounting and Formation Expenses

Expenses incurred by each Class are charged directly to the Class to which they relate. In particular, the costs and related liabilities and benefits arising from instruments entered into for the purposes of hedging the currency exposure of any particular hedged share class of a fund is exclusively attributed to that share class. Expenses common to all Classes, investment income and realised and unrealised gains and losses are allocated daily to each Class based on relative net assets.

The costs and expenses incurred in connection with the formation of a new fund and the initial issuance of shares may be deferred and amortised over a period not exceeding five years against the assets of that fund and in such amounts in each year as determined by the Board of Directors on an equitable basis.

## 3. CONVERSION OF FOREIGN CURRENCIES

The books and records of each Fund are kept in the base currency of that Fund. Amounts denominated in other currencies are translated into the base currency on the following basis: (i) investment valuations and other assets and liabilities initially expressed in other currencies are converted each business day into the base currency using currency prevailing on each such business day, and (ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

Net realised gains and losses on foreign currency transactions represent:

(i) foreign exchange gains and losses from the holding and sale of foreign currencies, (ii) gains and losses between trade date and settlement date on securities transactions, and (iii) gains and losses arising from the difference between amounts of dividends and interest recorded and the amounts actually received. The Funds do not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of investments held during the year.

Currency	Rate

NOK	10.1283
SEK	10.0520

# Notes to the Financial Statements continued

As at 31 December 2023

## 4. INVESTMENT TRANSACTIONS

### (a) Derivatives

Each Fund may enter into forward currency exchange, financial futures, option and swap contracts which, except for purchased options, represent market risk in excess of the amount reflected in the Statement of Net Assets. The amount of the contracts represents the extent of each Fund's participation in these financial instruments. Forward currency exchange and financial futures contracts are valued daily using prevailing forward exchange rates and current settlement prices, respectively. Option and swap contracts are valued daily using an independent pricing service. Changes in contract value are recorded daily as unrealised gains or losses until termination or maturity. Realized gains or losses are recorded on termination of derivatives contracts. Net annual receipts or payments required by swap contracts are accrued daily as interest income or interest expense on swaps.

Market risks associated with such contracts arise due to the possible movements in foreign exchange rates, interest rates, credit quality, indices and security values underlying these instruments. Other market and credit risks include the possibility that there may be an illiquid market for the contracts, that a change in the value of the contracts may not directly correlate with changes in the value of currencies, indices, or securities being hedged or that the counterparty to a contract defaults on its obligation to perform under the terms of the contract. Open contracts attributable to all classes of a Fund, if applicable, are reflected in each Fund's Schedule of Investments.

The Funds may deposit cash into an account held at the broker in order to meet initial margin requirements on open future contracts and to keep additional Funds available to settle future variation margin liabilities. The deposits held at the broker are included in Deposits on futures in the Statement of Net Assets, if any.

### (b) TBA Purchase Commitments

Certain Funds may enter into to be announced ("TBA") purchase commitments, pursuant to which they agreed to purchase mortgage-backed securities for a fixed unit price, with payment and delivery at a scheduled future date beyond the customary settlement year for such mortgage-backed securities. With TBA transactions, the particular securities to be delivered are not identified at the trade date; however, delivered securities must meet specified terms, including issuer, rate and mortgage term, and be within industry-accepted "good delivery" standards. The Funds generally enter into TBA transactions with the intention of taking possession of the underlying mortgage securities.

Until settlement, the Funds maintain cash reserves and liquid assets sufficient to settle its TBA commitments.

## 5. DIVIDENDS

The Company intends to declare and distribute dividends representing substantially all of the net investment income attributable to Distributing Shares. Dividends in respect of these Shares will be declared in the currency of denomination of the relevant Class and will be recorded on ex-date. Interim dividends

in respect of the Distributing Shares of any particular Fund may be paid from the attributable net investment income and realised capital gains with a frequency and at such intervals as the Board of Directors may decide.

No dividend payments were made during the year ended 31 December 2023.

## 6. DEPOSITARY FEES

The Funds are subject to an annual depositary fee, based upon a reducing scale, from 0.017% to 0.0005% depending upon the value of the assets held in Depositary. This fee is still calculated and accrued on each business day and paid monthly.

## 7. ADMINISTRATION AND TRANSFER AGENCY FEES

The Funds are subject to an annual administration fee, based upon a reducing scale, from 0.01% to 0.003% depending upon the value of the Fund's net assets. The Funds are, however, subject to a minimum annual administration fee of USD 27,000.

This fee is calculated and accrued each business day and paid monthly.

Transfer Agency Fees are based on the number of transactions processed, number of holdings and include but are not limited to fund/class set-up and annual maintenance fee, and out-of-pocket expenses.

## 8. TAXATION

Under current law and practice, the Company is not liable for any Luxembourg income tax, nor are dividends paid by the Company subject to any Luxembourg withholding tax. Additionally, no Luxembourg tax is payable on the realised or unrealised capital appreciation of the assets of the Company.

### (a) Taxe d'Abonnement

The Funds are liable in Luxembourg to a tax ("Taxe d'Abonnement") of 0.05% per annum in respect to Class A and Q Shares ("Retail Classes") and 0.01% per annum in respect to Class I and S Shares ("Institutional Classes") as provided by the relevant Luxembourg laws. The Taxe d'Abonnement is payable quarterly on the basis of the value of the net assets of each class at the end of the relevant calendar quarter.

### (b) Provision for Foreign Taxes

Each Fund is subject to foreign income taxes imposed by certain countries in which it invests. Taxes attributable to income are accrued by each Fund as a reduction of income. Capital gains realised by a Fund upon disposition of securities issued in or by certain foreign countries are subject to capital gains tax imposed by those countries. All taxes are computed in accordance with the applicable foreign tax law, and, to the extent permitted, capital losses are used to offset capital gains. To the extent that tax rates vary based upon holding period, each Fund accrues a deferred tax liability using the minimum applicable tax rate. Current and deferred tax expenses attributable to net capital gains are reflected net of eligible refunds as a component of

## Notes to the Financial Statements continued

As at 31 December 2023

realised and/or change in unrealised, respectively gain (loss) from investments. For the year ended 31 December 2023, there were current or deferred tax expense amounts attributable to realised or unrealised Indian capital gains as presented in the Statement of Operations and Changes in Net Assets for the below Funds.

T. Rowe Price Global Focused Growth Equity Fund USD 68,407

T. Rowe Price Global Growth Equity Net Zero Transition Fund<sup>(1)</sup> USD 310,616

As at 31 December 2023, the below Fund did have the following capital loss carry forwards to offset future realised gains on Indian securities subject to Indian capital gain taxes:

The capital loss carry forwards would be eligible to be off set against the realized gains for a period of 8 years from the year when the loss was first incurred.

<sup>(1)</sup> Fund renamed from T. Rowe Price Global Growth Equity Fund effective 01 November 2023.

### 9. RELATED PARTY TRANSACTIONS

#### (a) Management Company Fee

The Funds are managed by T. Rowe Price (Luxembourg) Management S.à r.l. (the "Management Company"). The Management Company is entitled to receive from the Company a Management Company Fee. The Management Company pays the Investment Manager out of the Management Company Fee. This fee is payable monthly in arrears and calculated on the daily net assets of each Fund at the following maximum annual rates:

Fund	Class A*	Class I**	Class Q***
T. Rowe Price Global Focused Growth Equity Fund	1.60%	0.75%	0.75%
T. Rowe Price Global Growth Equity Net Zero Transition Fund <sup>(1)</sup>	1.60%	0.75%	0.75%
T. Rowe Price Health Sciences Equity Fund	1.75%	0.835%	0.835%
T. Rowe Price Japanese Equity Fund	1.60%	0.75%	0.75%
T. Rowe Price US Large Cap Growth Equity Fund	1.50%	0.65%	0.65%
T. Rowe Price US Large Cap Value Equity Fund	1.50%	0.65%	0.65%

<sup>(1)</sup> Fund renamed from T. Rowe Price Global Growth Equity Fund effective 01 November 2023.

\* Includes A, A (SEK) and Ad.

\*\* Includes I, I (GBP), I (USD), I10, Id (GBP), Ih (NOK) and In (NOK).

\*\*\* Includes Q, Q (EUR), Q10 and Qd (GBP).

There is no Management Company Fee charged directly to S Share Class.

#### (b) Total Expense Ratio and Expense Limit

The following expense limits were applied to certain classes for the year ended 31 December 2023.

Fund	Class	Total Expense Ratio*	Expense Limit <sup>^</sup>
T. Rowe Price Global Focused Growth Equity Fund	Class I	0.85	0.85
	Class Ih (NOK)	0.85	0.85
	Class Q	0.92	0.92
T. Rowe Price Global Growth Equity Net Zero Transition Fund <sup>(1)</sup>	Class A (SEK)	1.77	1.77
	Class I	0.83	0.85
	Class Q	0.92	0.92
T. Rowe Price Health Sciences Equity Fund	Class A	1.85	1.92
	Class I (GBP)	0.92	0.94
	Class Id (GBP)**	0.94	0.94
	Class Q	0.94	1.01
	Class Qd (GBP)**	1.01	1.01
T. Rowe Price Japanese Equity Fund	Class A (SEK)	1.77	1.77
T. Rowe Price US Large Cap Growth Equity Fund	Class A	1.65	1.67
	Class Ad	1.59	1.67
	Class I	0.70	0.75
	Class Q	0.82	0.82
T. Rowe Price US Large Cap Value Equity Fund	Class I	0.75	0.75
	Class Q (EUR)	0.82	0.82

<sup>(1)</sup> Fund renamed from T. Rowe Price Global Growth Equity Fund effective 01 November 2023.

\* The Total Expense Ratio expresses the total fees and expenses borne by a particular Class, net of any expenses waived, during the year ended 31 December 2023 as a percentage of the average net assets of that Class.

\*\* Class inception during the year ended 31 December 2023; the Total Expense Ratio indicated is an annualised figure.

<sup>^</sup> The expense limit disclosed in the annual report includes the effective management fees and the maximum of operating and administrative expenses.

In the case of any individual Fund or Class, the Management Company may, for such time as it considers appropriate, choose to subsidise all or part of the operating and administrative expenses in order to reduce the impact such expenses may have on the performance of such Classes.

#### (c) Related Party shareholder

As at 31 December 2023, the following Fund had a percentage of its net assets expressed in U.S. Dollars held by the Investment Manager or its affiliates.

Fund Name	Percentage
T. Rowe Price Japanese Equity Fund	94.42%

## Notes to the Financial Statements continued

As at 31 December 2023

### 10. CROSS INVESTMENTS BETWEEN FUNDS

As at 31 December 2023, none of the Funds of the Company invest in other Funds of the Company.

### 11. COLLATERAL

As at 31 December 2023, the collateral received or paid which is composed of cash collateral granted to or received from brokers and counterparties for the purpose of transactions in OTC derivatives is as follows:

Fund Name	Currency	Counterparty	Type of Collateral	Collateral received	Collateral paid
T. Rowe Price Global Focused Growth Equity Fund	USD	HSBC Bank	Cash	2,060,000	–

### 12. SWING PRICING (DILUTION ADJUSTMENT)

Swing pricing is intended to protect the interests of all shareholders by mitigating the negative impact of dilution on the fund's returns.

The actual total cost of purchasing or selling the underlying securities in a fund may be higher or lower than the mid-market value used in calculating the NAV.

The difference can be attributed to a variety of factors including dealing charges, commissions, taxes and dealing spreads as well as other market and trading considerations and can, over time, have a materially disadvantageous effect on a shareholder's interest in a fund if not otherwise accounted for in the calculation of the NAV.

To prevent this effect, known as "dilution", on business days when the amount of trading in a fund's shares will precipitate significant purchases or sales of underlying securities, we will adjust the fund's NAV by an amount estimated to more closely reflect the actual prices and costs of the underlying transactions.

This is often referred to as "swing pricing". These adjustment amounts, called swing factors, can vary with market conditions and transaction volumes and this means that the amount of dilution adjustment applied can change at any time.

Ordinarily, we apply the swing pricing process on a systematic basis across all funds. However, we annually review the principles on which the process is based, including the operational application, the net subscription / redemption related trigger points and the swing factor calculation methodology.

It is not possible to predict accurately whether a price swing will occur at any point in time. In general, the NAV per share applied to all subscription and redemption requests, in the relevant fund on that day, will be adjusted upward when we believe that the demand to buy fund shares is material and downward when we believe that the demand to redeem fund shares is material.

Typically, on any business day, any adjustment is limited to a maximum of 2% of a fund's NAV. However, in the event of extreme or exceptional market conditions and on a temporary basis, it may be necessary for any swing factor to be set at a level which exceeds this maximum. We review these estimates on a regular basis and they can change at any time.

As at 31 December 2023, there was no swing factor applied to any of the Funds, except T. Rowe Price US Large Cap Value Equity Fund as detailed below:

T. Rowe Price US Large Cap Value Equity Fund	Swung NAV per share	Unswung NAV per share
Class I	13.07	13.07
Class Q (EUR)	12.14	12.14

Swung and Unswung NAV per share disclosed above are the same due to roundings to 2 decimal places.

### 13. TRANSACTION COSTS

For the year ended 31 December 2023, the amounts are as follows:

Fund	Fund Currency	Total transaction costs
T. Rowe Price Global Focused Growth Equity Fund	USD	122,650
T. Rowe Price Global Growth Equity Net Zero Transition Fund <sup>(1)</sup>	USD	216,925
T. Rowe Price Health Sciences Equity Fund	USD	55,906
T. Rowe Price Japanese Equity Fund	JPY	305,102
T. Rowe Price US Large Cap Growth Equity Fund	USD	24,290
T. Rowe Price US Large Cap Value Equity Fund	USD	7,616

<sup>(1)</sup> Fund renamed from T. Rowe Price Global Growth Equity Fund effective 01 November 2023.

There are no brokerage fees charged separately for transactions on fixed income instruments and derivatives (except for futures). The transaction costs are included in the transaction price, which is known as "marked up".

### 14. CREDIT FACILITY

The Funds, together with the other investment funds managed by the Management Company and certain other T. Rowe Price U.S. registered funds ("foreign investment funds"), are party to a \$1.3 billion, 364-day syndicated credit facility (the "facility"). Excluding commitments designated for the foreign investment Funds, the Funds can borrow up to an aggregate commitment amount of \$150 million on a first-come, first-served basis. The facility provides a source of liquidity to the participating funds for temporary and emergency purposes.

During the year ended 31 December 2023, the Funds have not used the facility and therefore have no borrowing outstanding under the facility as at 31 December 2023.

# Notes to the Financial Statements continued

As at 31 December 2023

## 15. OTHER MATTERS

Unpredictable events such as environmental or natural disasters, war, terrorism, pandemics, outbreaks of infectious diseases, and similar public health threats may significantly affect the economy, the markets and issuers in which the Fund invests. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others, and exacerbate other pre-existing political, social, and economic risks.

Since 2020, a novel strain of coronavirus (COVID-19) has resulted in disruptions to global business activity and caused significant volatility and declines in global financial markets.

In February 2022, Russian forces entered Ukraine and commenced an armed conflict leading to economic sanctions being imposed on Russia and certain of its citizens, creating impacts on Russian-related stocks and debt and greater volatility in global markets.

In March 2023, overall concerns around the soundness and stability of the global banking sector has sparked concerns of a broader financial crisis impacting the overall banking sector. In certain cases, government agencies have assumed control or otherwise intervened in the operations of certain banks due to liquidity and solvency concerns.

These are recent examples of global events which may have a negative impact on the values of certain portfolio holdings or the Funds' overall performance. The Board is closely monitoring the situation with respect to all securities held in our funds, and to the increased operational risk and financial impacts arising from these events.

## PERFORMANCE DISCLOSURE

Past performance is not indicative of current or future performance. Investment in the Shares of the Funds are subject to risks, including possible loss of principal amount invested. Performance data provided for the Funds are based on the base currency of denomination of the relevant Fund shares (unless otherwise noted) and include changes in principal value and reinvested dividends but does not take into account any commissions and costs incurred on the issue and redemption of Fund shares.

## Appendix 1: Performance Summary (unaudited)

### PERFORMANCE SUMMARY

Fund name	Share Class	31 December 2023 Year to Date	31 December 2022 Year to Date	31 December 2021 Year to Date

\* Performance is presented for the period since inception for these classes with operations less than one year.

\*\* Share classes liquidated during the year.

## Appendix 2: Risk Measurement and Global Exposure (unaudited)

The global exposure is calculated for all funds regardless of their investment strategies. The methods used to measure the global exposure are the commitment approach or the (absolute or relative) VaR approach according to the CSSF Circular 11/512. The commitment approach is used by the Funds which are not disclosed in the table below. The following table indicates the Monte-Carlo Simulation VaR analysis, based on a 99% confidence interval, a holding period of 20-days and a historical observation period of not less than 1 year (250 business days).

Funds	Global Exposure Methodology	Leverage % (Av)	Lowest	Highest	Average	Reference Portfolio

## Further Information (unaudited)

### STATEMENT OF CHANGES IN PORTFOLIO

A statement giving the changes in the portfolio of investments for the year ended 31 December 2023 can be obtained free of charge from the registered office of the Company. Additional information regarding the portfolio of each Fund may be requested from the registered office of the Company.

### DEALING COMMISSIONS AND INVESTMENT RESEARCH

In choosing broker-dealers to execute trades involving portfolio securities, the investment manager and the SICAV have fiduciary and regulatory requirements to seek broker-dealers that offer "best execution".

Because price is not the only factor to be assessed when determining which firm offers "best execution", the investment manager may choose a broker-dealer who charges a higher commission on trades if the investment manager determines, in good faith, that the commission paid is reasonable in relation to the value of the brokerage services provided.

The investment manager and investment sub-managers may acquire equity and fixed income research designed to assist in the investment decision-making process from independent providers and broker-dealers (i.e., "third party research").

Third party research utilised by the equity and fixed income investment staff of the investment manager and investment sub-managers will be borne by the investment manager or the relevant investment sub-manager. The Funds will not pay for third party research.

### GENERAL INFORMATION

The Company's articles of incorporation ("Articles of Incorporation") may be amended from time to time by a meeting of Shareholders, subject to the quorum and majority requirements as provided for by Luxembourg law. Any amendment thereto shall be published in the *Recueil électronique des sociétés et associations*, in a Luxembourg daily newspaper and, if necessary, in the official publications specified for the respective countries in which Company shares are sold. Such amendments become legally binding on all Shareholders, following their approval by the General Meeting of Shareholders.

Any amendments affecting the rights of the holders of shares of any Class vis-à-vis those of any other Class shall be subject further to the said quorum and majority requirements in respect of each relevant Class.

The Company is a single legal entity. However, each Fund is regarded as being separate from the others and is liable for all of its own obligations, unless other terms have been specifically agreed with its creditors.

The Annual General Meeting of Shareholders of the Company will be held each year in accordance with Luxembourg law, in the commune of Niederanven in the Grand-Duchy of Luxembourg at the registered office of the Company, or at such other place

in the Grand-Duchy of Luxembourg as may be specified in the notice of meeting, within six months of the Company's accounting year end. The annual general meeting may be held abroad if, in the absolute and final judgement of the Board, exceptional circumstances so require.

Notices of all Annual General Meetings are sent by mail to all registered Shareholders at their registered address at least eight days prior to each such meeting, and notices of all extraordinary general meetings at least 21 days prior to each such meeting. Such notice will indicate the time and place of such meeting and the conditions of admission thereto, will contain the agenda and will refer to the requirements of Luxembourg law with regard to the necessary quorum and majorities at such meeting. To the extent required by Luxembourg law, further notices will be published in the *Recueil électronique des sociétés et associations* and in one Luxembourg newspaper.

The annual report, containing the audited combined financial accounts of the Company expressed in US dollars and of each Fund expressed in the relevant currency of denomination, with respect to the preceding financial year will be made available at the registered office within four months of the end of the financial year.

Unaudited semi-annual reports will also be sent, on demand, to Shareholders whose names appear in the register and will be made available at the Company's registered office within two months of the end of the year to which they relate.

The list of countries where the Company has regulatory approvals to market its Funds to institutional and / or retail clients can be obtained from [www.troweprice.lu/SICAV3fundregistrations](http://www.troweprice.lu/SICAV3fundregistrations). Information in relation to facilities for investors located in the respective countries, is available at [www.eifs.lu/troweprice](http://www.eifs.lu/troweprice).

Copies of the Company's latest Prospectus, Key Information Document, Application Form, Articles of Incorporation and the latest annual and (where applicable) semi-annual reports may be obtained free of charge from the offices of the Administrator or the Distributor.

KID is available to the investors at [www.troweprice.com/sicavfunds](http://www.troweprice.com/sicavfunds).

#### Brexit Financial Impact:

The Company applied for the Fund's inclusion in the United Kingdom's Temporary Marketing Permission Regime ("TMPR") prior to the Brexit deadline. TMPR allows funds that were already registered with the FCA prior to Brexit, to continue to be marketed in the United Kingdom (UK). TMPR is due to expire at the end of 2026, however the UK is currently in the process of implementing the Overseas Funds Regime ("OFR"). OFR is a new, streamlined framework for the registration of non-UK funds.

### LOCATION WHERE THE RELEVANT DOCUMENTS MAY BE OBTAINED

The prospectus, the key information documents, articles of incorporation, the annual and semi-annual reports as well as a list of all portfolio changes during the reporting period may be obtained free of charge from the Representative.

### PUBLICATIONS

Publications concerning the SICAV are made in Switzerland on [www.fundinfo.com](http://www.fundinfo.com).

The net asset value together with the reference stating “excluding commissions” shall be published daily on the [fundinfo.com](http://fundinfo.com) website.

### PLACE OF PERFORMANCE AND PLACE OF JURISDICTION

In respect of the shares offered in Switzerland, the place of performance is at the registered office of the Representative. The place of jurisdiction is at the registered office of the Representative or at the registered office or place of residence of the investor.

### PAYMENT OF RETROCESSIONS AND REBATES

The management company and/or its agents may pay retrocessions as remuneration for distribution activity in respect of fund shares in Switzerland. This remuneration may be deemed payment for the following services in particular: Any activity aimed at promoting the distribution of fund shares. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

Disclosure of the receipt of retrocessions is based on the applicable provisions of Federal Act on Financial Services.

In the case of distribution activity in Switzerland, the management company and/or its agents may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. Rebates are permitted provided that:

- they are paid from fees received by the management company or the investment manager and therefore do not represent an additional charge on the fund assets; and
- they are granted on the basis of objective criteria; and
- all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the management company and/or its agents are as follows:

- Agree to the terms and conditions set out in a written agreement to be entered into between the investor and the management company or the investment manager
- Amount invested

- Investment behaviour shown by the investor
- Investment period
- Share class purchased

At the request of the investor, the investment manager must disclose the amounts of such rebates free of charge.

The total expense ratio and the performance summary disclosed in the financial statements notes have been calculated in accordance with the Asset Management Association Switzerland Guidelines. The portfolio turnover ratios are available on request to all investors in the funds the Management Company manages.

### Additional Information on the Management Company:

The Management Company has committed to adhere to the Association of the Luxembourg Fund Industry (ALFI) Code of Conduct for Luxembourg Investment Funds. The purpose of the ALFI Code of Conduct is to provide persons responsible for the management and supervision of a fund with a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment Funds.

### Information about Remuneration:

As required by the law of 17 December 2010 relating to Undertakings for Collective Investment, as amended, (the “Law of 2010”) the Management Company shall provide general information relating to the financial and nonfinancial criteria of the remuneration policies and practices for relevant categories of staff to enable investors to assess the incentives created. In accordance with the principles set out in art. 111bis and 111ter of the Law of 2010, the Management Company shall disclose at least the information necessary to provide an understanding of the risk profile of the Company and the measures it adopts to avoid or manage conflicts of interest. As such, the Management Company has established a Remuneration Policy Statement (RPS) setting out policies, practices and procedures to comply with the Law of 2010.

The RPS is designed to reward individuals who contribute to the long-term value creation for all clients and investors. The Management Company seeks to accomplish this through a balance of short-term fixed and variable compensations, and long-term equity-based incentives. Further, the RPS is intended to be consistent with, and promotes sound and effective risk management and does not encourage risk-taking that is inconsistent with the risk profile, rules or governing documents of the Funds managed. The Board of the Management Company reviews the RPS annually to ensure remuneration practices are consistent with the firm’s risk profile. The RPS is available on request to all investors in the Funds the Management Company manages.

The Management Company has paid the following amounts to its identified staff, as defined in the Law of 2010, for the year ended 31 December 2023. As required by Article 151(3) a) and b) of the Law of 2010, the aggregate amount of remuneration is to be broken down by a) fixed and variable amounts and b) senior management and non-senior management identified staff of the Management Company whose actions have a material impact

## Further Information (unaudited) continued

As at 31 December 2023

on the risk profile of the Funds. However, the Management Company's compensation systems do not allow for such amounts to be identified per fund managed. Therefore, the figures show the total remuneration of the staff of the Management Company and the relevant delegates fully or partly involved in the activities of the Funds the Management Company manages and which is attributable to such activities are:

- Number of identified staff is 78.
- Total gross amount of the remuneration of the identified staff fully or partly involved in the activities of the Funds the Management Company manages (including the Company) which is attributable to such activities is EUR 33,578,572.

(a) Aggregate amount of senior management is EUR 1,978,361.

- Including a fixed compensation of EUR 1,327,694 and
- A short-term variable compensation of EUR 531,225 and a long-term variable compensation of EUR 119,442.

(b) Aggregate amount of non-senior management having a material impact on the risk profile of the Company is EUR 31,600,211.

- Including a fixed compensation of EUR 5,142,644 and
- A short-term variable compensation of EUR 17,346,126 and a long-term variable compensation of EUR 9,111,441.

(c) Combined is EUR 33,578,572.

- Including a fixed compensation of EUR 6,470,338 and
- A short-term variable compensation of EUR 17,877,352 and a long-term variable compensation of EUR 9,230,882.

## Securities Financing Transactions Regulation (unaudited)

Currently, none of the Funds of Select Investment Series III SICAV make use of the financial instruments to which this regulation pertains. Further details are published in the Company's prospectus.

## Sustainable Finance Disclosure Regulation (unaudited)

Funds promoting environmental and/or social characteristics (classified pursuant to Article 8 of SFDR) and Funds that have sustainable investment as their objective (classified pursuant to Article 9 of SFDR) are required to include in periodic reports information on the extent to which environmental and/or social characteristics have been met or the overall sustainability impact by means of relevant sustainability indicators. From 1 January 2023, this information should be disclosed using the prescribed templates included within the SFDR Delegated Regulation.

To meet this requirement, periodic reporting templates have been prepared for Funds that have been classified pursuant to Article 8 of SFDR during the reference period covering 1 January 2023 to 31 December 2023. The reference period used for SFDR reporting will cover the same period as the financial statements. Where a Fund changed its sustainability characteristics during the reference period, the reference period for those would be shorter than 12 months and will be specified within the Fund's SFDR periodic reporting included in the following pages.

Binding commitments reported on are based on information disclosed in the Prospectus that was current during the reference period. Where commitments have been added during the reference period, the Fund's SFDR periodic reporting specifies the period for which the commitment is binding. Where commitments have been changed after the reference period, it is also clearly referenced within the templates. Full information on the commitments of the Funds applicable from 1 January 2023 have been disclosed in the pre-contractual templates appended to the latest prospectus.

Quantitative information disclosed within the Fund's SFDR periodic reporting has been calculated using the weighted average quarter value of investments during the reference period. Numbers may not add due to roundings.

All Funds of Select Investment Series III SICAV are classified pursuant to Article 8 of SFDR. The periodic reporting templates prepared for these Funds are provided in the following pages.

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 45.7% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes environmental and/or social (“E/S”) characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments. Effective 1 November 2023 the Fund additionally committed to maintain a minimum of 0.5% of the value of its portfolio invested in sustainable investments with an environmental objective and a minimum of 0.5% with a social objective.

During the reference period the Fund held an average of 45.7% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%. The Fund held an average of 19.4% in investments with an environmental objective and 26.3% with a social objective, always maintaining a minimum of 0.5% since 1 November 2023. The Fund’s sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

● **How did the sustainability indicators perform?**

The sustainability indicator performed as follows.

During the reference period an average of 45.7% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

● **... and compared to previous periods?**

The historical values of the Fund’s sustainability indicator are shown in the table below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

T. Rowe Price Global Focused Growth Equity Fund

Period	% Sustainable Investments
2022 <sup>1</sup>	46.2
2023	45.7

<sup>1</sup> As the Fund’s sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals (“SDGs”) to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer’s sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- reducing greenhouse gases
- promoting healthy ecosystems
- nurturing circular economies
- enabling social equality
- improving health
- enhancing quality of life

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the “do no significant harm” assessment incorporates issuer information in relation to Principal Adverse Impact (“PAI”) indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

T. Rowe Price Global Focused Growth Equity Fund

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

- violations of UN Global Compact principles (PAI #10)
- board gender diversity (PAI #13)
- exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) (PAI #14)

PAI Indicator	Unit of Measurement	Value (%)	Fund Coverage (%) <sup>*</sup>
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	99.3
Board gender diversity (PAI #13)	Average percentage of female board members	32.1	99.3
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	99.3

\* Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund’s exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

## T. Rowe Price Global Focused Growth Equity Fund

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January to 31 December 2023

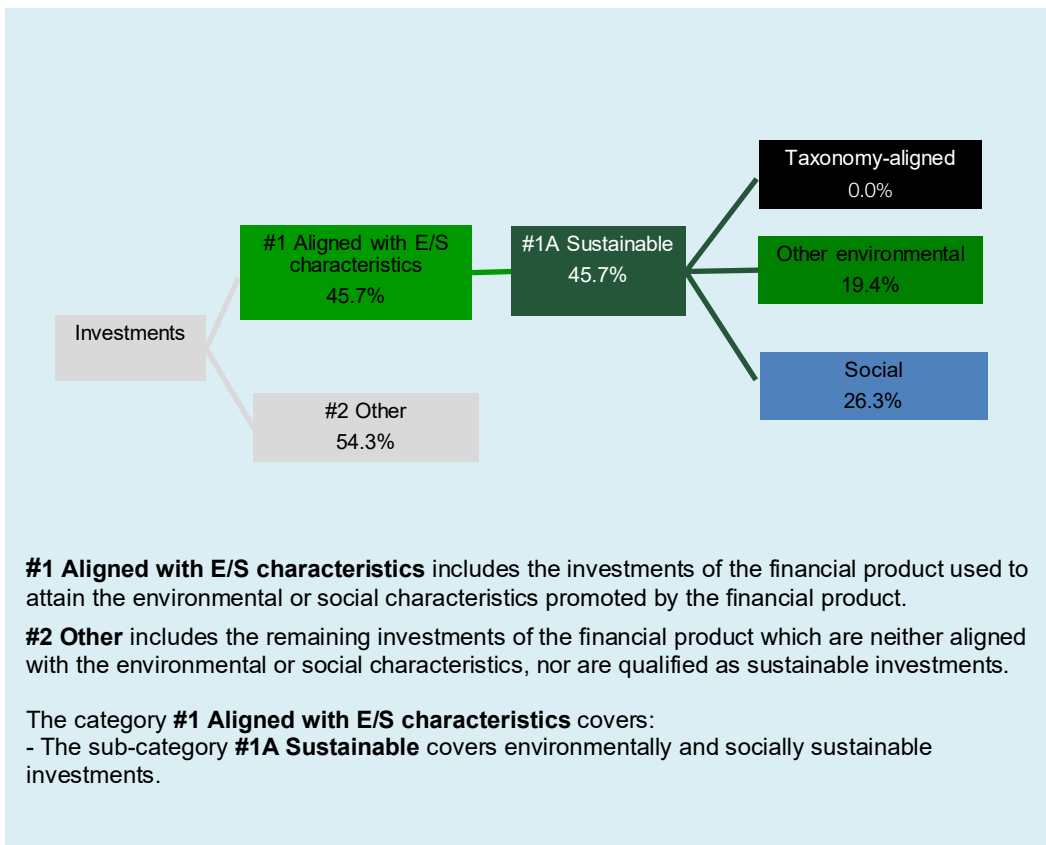

Largest Investments	Sector	% Assets	Country
Amazon.com	Consumer Discretionary	4.5	United States
Microsoft	Information Technology	4.3	United States
Apple	Information Technology	4.2	United States
Eli Lilly and Co	Health Care	3.7	United States

T. Rowe Price Global Focused Growth Equity Fund

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures (including quasi-sovereign bonds).

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 19.4%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

## T. Rowe Price Global Focused Growth Equity Fund

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 26.3%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund’s entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Throughout the reference period 45.7% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company’s contribution to an E/S objective based on the company’s revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund’s minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager’s good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company’s good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund’s overall exposure to sustainable investments.

T. Rowe Price Global Focused Growth Equity Fund

*How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# T. Rowe Price Global Growth Equity Net Zero Transition Fund

Legal entity identifier: 549300WVS13S4OAMQ386

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 51.3% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

Effective 1 November 2023 the Fund changed its name to T. Rowe Price Global Growth Equity Net Zero Transition Fund from T. Rowe Price Global Growth Equity Fund.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Effective 1 November 2023 the Fund promotes environmental characteristics by aiming to support the transition to Net Zero, with a specific focus on reducing greenhouse gas emissions. This is achieved by investing in companies that are on the path to aligning with net zero emissions by 2050. This is assessed according to the investment manager's Net Zero Status framework. More details on this framework can be found in the Funds's prospectus.

In addition the Fund promotes environmental and/or social ("E/S") characteristics by committing to maintain a minimum of 50% of the value of its portfolio invested in sustainable investments, with a minimum of 10% invested in sustainable investments with an environmental objective and a minimum of 10% with a social objective.

Prior to 1 November 2023 the Fund promoted E/S characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments.

During the reference period the Fund held an average of 51.3% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%, and 50% since 1 November 2023. The Fund held an average of 20.2% in investments with an environmental objective and 31.1% with a social objective, always maintaining a minimum of 10% since 1 November 2023. The Fund's sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

#### ● How did the sustainability indicators perform?

The sustainability indicator performed as follows.

- During the reference period an average of 51.3% of the value of the Fund's portfolio was invested in securities that the investment manager identified as sustainable investments.
- As at 31 December 2023, 12.9% of the value of the Fund's portfolio was invested in holdings classified as Achieving or Aligned to Net Zero Status according to the investment manager's Net Zero Status framework.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

T. Rowe Price Global Growth Equity Net Zero Transition Fund

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

● **... and compared to previous periods?**

The historical values of the Fund's sustainability indicators are shown in the table below.

Period	% Sustainable Investments	% Achieving or Aligned to Net Zero Status
2022 <sup>1</sup>	49.1	n/a
2023	51.3	12.9 <sup>2</sup>

<sup>1</sup> As the Fund's sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

<sup>2</sup> As at 31 December 2023.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals ("SDGs") to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer's sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- reducing greenhouse gases
- promoting healthy ecosystems
- nurturing circular economies
- enabling social equality
- improving health
- enhancing quality of life

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the "do no significant harm" assessment incorporates issuer information in relation to Principal Adverse Impact ("PAI") indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

T. Rowe Price Global Growth Equity Net Zero Transition Fund

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

PAI Indicator	Unit of Measurement	Value	Fund Coverage (%)*
Scope 1-3 GHG emissions (PAI #1)	mtCO <sub>2</sub> e	81,430.7	96.8
Carbon footprint (PAI #2)	mtCO <sub>2</sub> e per US\$ million invested	352.3	96.8
GHG intensity (PAI #3)	mtCO <sub>2</sub> e per US\$ million revenue	852.1	97.7

## T. Rowe Price Global Growth Equity Net Zero Transition Fund

PAI Indicator	Unit of Measurement	Value	Fund Coverage (%)*
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	99.2
Board gender diversity (PAI #13)	Average percentage of female board members	31.9	98.3
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	99.2

\* Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund started to consider GHG emissions (PAI #1-3) from 1 November 2023 and the investment manager will continue to monitor those PAI indicators for the next reference period before determining whether any investment action is needed.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund's exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January to 31 December 2023

Largest Investments	Sector	% Assets	Country
Microsoft	Information Technology	4.4	United States
Apple	Information Technology	3.9	United States
Amazon.com	Consumer Discretionary	2.9	United States

T. Rowe Price Global Growth Equity Net Zero Transition Fund

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures (including quasi-sovereign bonds).

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 20.2%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

T. Rowe Price Global Growth Equity Net Zero Transition Fund

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 31.1%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund’s entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Since 1 November 2023 the investment manager utilized its proprietary Net Zero Status framework to assess potential investments alignment with the 1.5°C pathway to achieving net zero emissions by 2050. As a result of this assessment 12.9% of the Fund was invested in securities that are either Achieving or Aligned to net zero.

Throughout the reference period 51.3% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company’s contribution to an E/S objective based on the company’s revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund’s minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager’s good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company’s good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund’s overall exposure to sustainable investments.

T. Rowe Price Global Growth Equity Net Zero Transition Fund

*How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# T. Rowe Price Health Sciences Equity Fund

Legal entity identifier: 549300F42GTYE5GSFE88

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 91.4% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Effective 1 November 2023, the Fund promotes environmental and/or social (“E/S”) characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments with a social objective.

Prior to 1 November 2023, the Fund promoted E/S characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments, with no minimum commitment to investments with environmental or social objectives.

During the reference period the Fund held an average of 91.4% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%. The Fund held an average of 90.8% in investments with a social objective, always maintaining a minimum of 10% since 1 November 2023. The Fund’s sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

#### ● How did the sustainability indicators perform?

The sustainability indicator performed as follows.

- During the reference period an average of 91.4% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable.
- During the reference period an average of 90.8% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments with a social objective. As at 31 December 2023, 88.7% of the Fund was held in sustainable investments with a social objective.

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **... and compared to previous periods?**

The historical values of the Fund's sustainability indicator are shown in the table below.

Period	% Sustainable Investments	% Sustainable Investments with Social objective
2022 <sup>1</sup>	92.1	n/a
2023 <sup>2</sup>	91.4	90.8

<sup>1</sup> As the Fund's sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

<sup>2</sup> Effective 1 November 2023 the sustainability indicator of holding a minimum of 10% of the value of its portfolio invested in sustainable investments with a social objective replaced the previous sustainability indicator of holding a minimum of 10% of the value of its portfolio invested in sustainable investments

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals ("SDGs") to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer's sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- reducing greenhouse gases
- promoting healthy ecosystems
- improving health

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the "do no significant harm" assessment incorporates issuer information in relation to Principal Adverse Impact ("PAI") indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

- violations of UN Global Compact principles (PAI #10)
- board gender diversity (PAI #13)
- exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) (PAI #14)

## T. Rowe Price Health Sciences Equity Fund

PAI Indicator	Unit of Measurement	Value (%)	Fund Coverage (%) <sup>*</sup>
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	98.4
Board gender diversity (PAI #13)	Average percentage of female board members	33.1	96.2
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	98.4

\* Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund's exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January to 31 December 2023

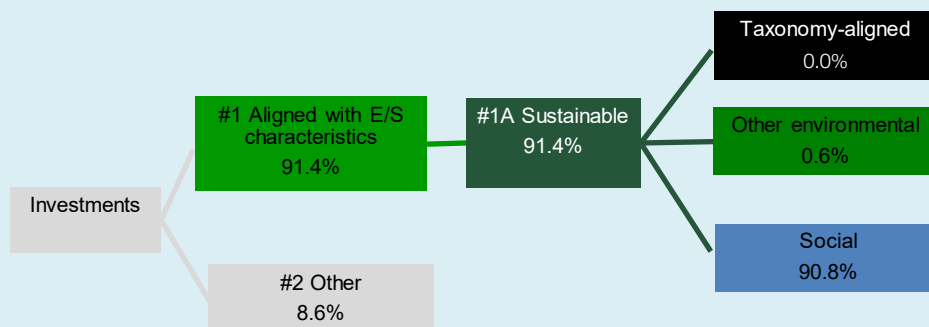

Largest Investments	Sector	% Assets	Country
UnitedHealth Group	Services	7.6	United States
Eli Lilly and Co	Pharmaceuticals	6.5	United States

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

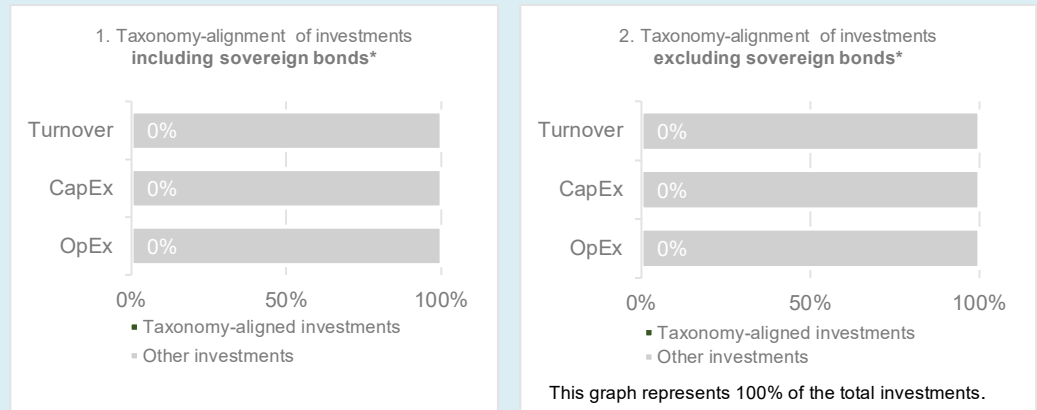

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures (including quasi-sovereign bonds).

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 0.6%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 90.8%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund’s entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Throughout the reference period 91.4% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company’s contribution to an E/S objective based on the company’s revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund’s minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager’s good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company’s good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund’s overall exposure to sustainable investments.

### *How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# T. Rowe Price Japanese Equity Fund

Legal entity identifier: 549300RZOLNPD8Y04117

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 22.6% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes environmental and/or social (“E/S”) characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments. Effective 1 November 2023 the Fund additionally committed to maintain a minimum of 0.5% of the value of its portfolio invested in sustainable investments with an environmental objective and a minimum of 0.5% with a social objective.

During the reference period the Fund held an average of 22.6% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%. The Fund held an average of 10.1% in investments with an environmental objective and 12.6% with a social objective, always maintaining a minimum of 0.5% since 1 November 2023. The Fund’s sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

● **How did the sustainability indicators perform?**

The sustainability indicator performed as follows.

During the reference period an average of 22.6% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

● **... and compared to previous periods?**

The historical values of the Fund’s sustainability indicator are shown in the table below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

T. Rowe Price Japanese Equity Fund

Period	% Sustainable Investments
2022 <sup>1</sup>	36.4
2023	22.6

<sup>1</sup> As the Fund’s sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals (“SDGs”) to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer’s sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- nurturing circular economies
- improving health
- enhancing quality of life

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the “do no significant harm” assessment incorporates issuer information in relation to Principal Adverse Impact (“PAI”) indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

- violations of UN Global Compact principles (PAI #10)
- board gender diversity (PAI #13)
- exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) (PAI #14)

PAI Indicator	Unit of Measurement	Value (%)	Fund Coverage (%)*
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	97.5
Board gender diversity (PAI #13)	Average percentage of female board members	17.7	94.3
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	97.5

\* Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund’s exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

## T. Rowe Price Japanese Equity Fund

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January to 31 December 2023

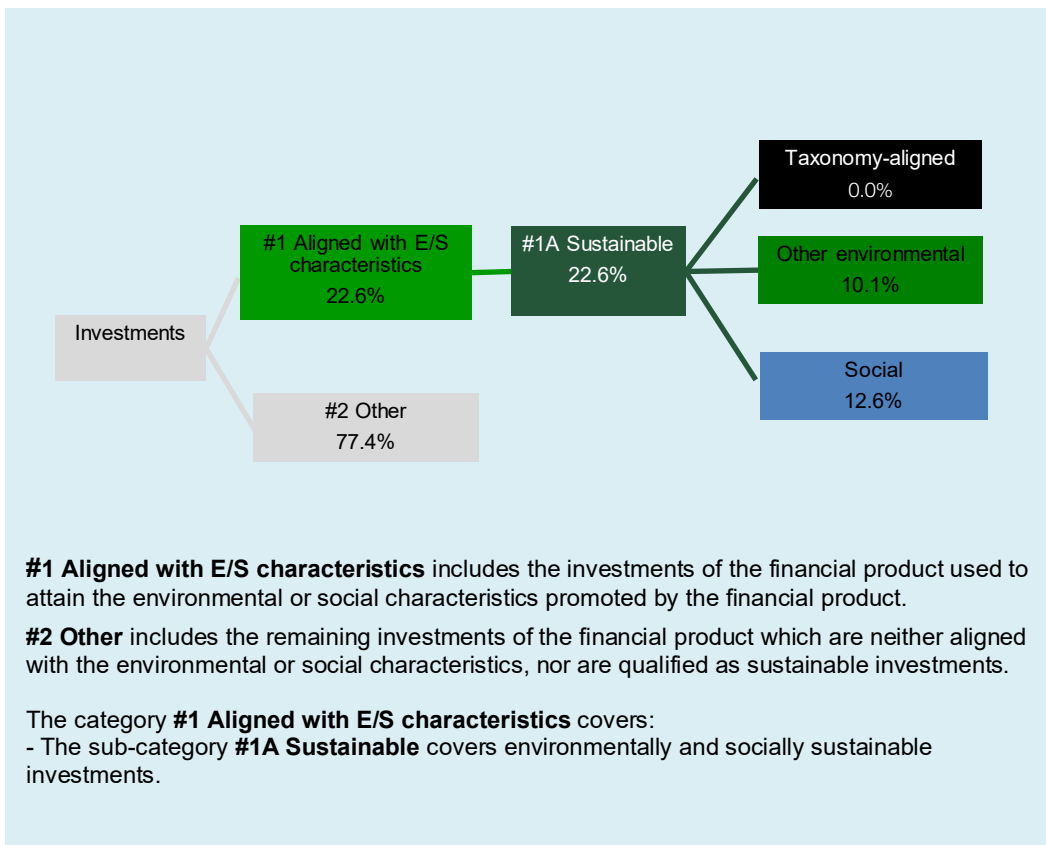

Largest Investments	Sector	% Assets	Country
Sony	Electric Appliances And Precision Instruments	3.8	Japan
Mitsubishi UFJ Financial	Banks	3.5	Japan
Keyence	Electric Appliances And Precision Instruments	3.3	Japan

T. Rowe Price Japanese Equity Fund

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures (including quasi-sovereign bonds).

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 10.1%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

## T. Rowe Price Japanese Equity Fund

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 12.6%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund’s entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Throughout the reference period 22.6% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company’s contribution to an E/S objective based on the company’s revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund’s minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager’s good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company’s good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund’s overall exposure to sustainable investments.

T. Rowe Price Japanese Equity Fund

*How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 50.1% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes environmental and/or social (“E/S”) characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments. Effective 1 November 2023 the Fund additionally committed to maintain a minimum of 0.5% of the value of its portfolio invested in sustainable investments with an environmental objective and a minimum of 0.5% with a social objective.

During the reference period the Fund held an average of 50.1% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%. The Fund held an average of 26.4% in investments with an environmental objective and 23.7% with a social objective, always maintaining a minimum of 0.5% since 1 November 2023. The Fund’s sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

● **How did the sustainability indicators perform?**

The sustainability indicator performed as follows.

During the reference period an average of 50.1% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

● **... and compared to previous periods?**

The historical values of the Fund’s sustainability indicator are shown in the table below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

T. Rowe Price US Large Cap Growth Equity Fund

Period	% Sustainable Investments
2022 <sup>1</sup>	51.4
2023	50.1

<sup>1</sup> As the Fund’s sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals (“SDGs”) to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer’s sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- reducing greenhouse gases
- promoting healthy ecosystems
- enabling social equality
- improving health
- enhancing quality of life

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the “do no significant harm” assessment incorporates issuer information in relation to Principal Adverse Impact (“PAI”) indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

T. Rowe Price US Large Cap Growth Equity Fund

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

- violations of UN Global Compact principles (PAI #10)
- board gender diversity (PAI #13)
- exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) (PAI #14)

PAI Indicator	Unit of Measurement	Value (%)	Fund Coverage (%) <sup>*</sup>
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	99.5
Board gender diversity (PAI #13)	Average percentage of female board members	33.8	99.4
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	99.5

<sup>\*</sup> Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund’s exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

T. Rowe Price US Large Cap Growth Equity Fund

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

*What were the top investments of this financial product?*

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January to 31 December 2023

T. Rowe Price US Large Cap Growth Equity Fund

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

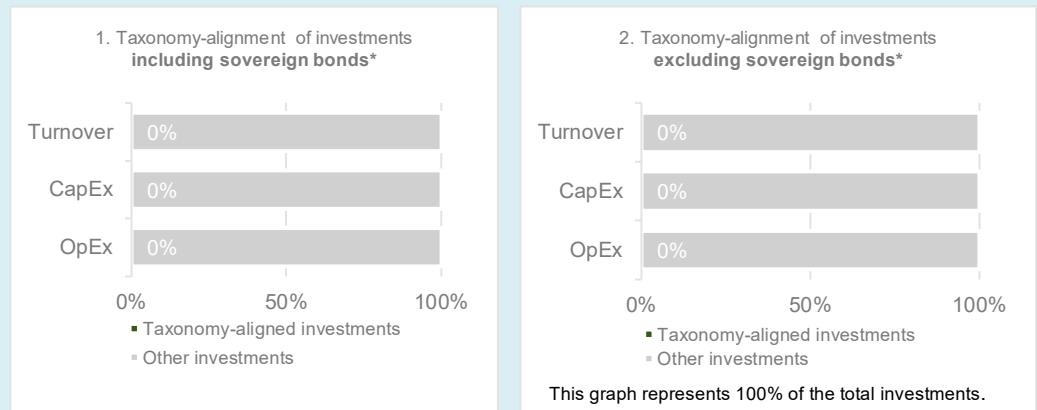

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures (including quasi-sovereign bonds).

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 26.4%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

T. Rowe Price US Large Cap Growth Equity Fund

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 23.7%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund’s entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Throughout the reference period 50.1% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company’s contribution to an E/S objective based on the company’s revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund’s minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager’s good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company’s good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund’s overall exposure to sustainable investments.

T. Rowe Price US Large Cap Growth Equity Fund

*How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# T. Rowe Price US Large Cap Value Equity Fund

Legal entity identifier: 549300VF5MK7J2U5K882

1 January to 31 December 2023

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 40.2% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes environmental and/or social (“E/S”) characteristics by committing to maintain a minimum of 10% of the value of its portfolio invested in sustainable investments. Effective 1 November 2023 the Fund additionally committed to maintain a minimum of 0.5% of the value of its portfolio invested in sustainable investments with an environmental objective and a minimum of 0.5% with a social objective.

During the reference period the Fund held an average of 40.2% of the value of its portfolio in sustainable investments, always maintaining a minimum of 10%. The Fund held an average of 8.1% in investments with an environmental objective and 32.1% with a social objective, always maintaining a minimum of 0.5% since 1 November 2023. The Fund’s sustainable investments contributed to specific environmental and social objectives, which are listed in a section below.

#### ● **How did the sustainability indicators perform?**

The sustainability indicator performed as follows.

During the reference period an average of 40.2% of the value of the Fund’s portfolio was invested in securities that the investment manager identified as sustainable investments.

T. Rowe Price calculates the proportion of sustainable investments during a reference period by taking quarter-end portfolio measurements and averaging these over four quarters.

#### ● **... and compared to previous periods?**

The historical values of the Fund’s sustainability indicator are shown in the table below.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

T. Rowe Price US Large Cap Value Equity Fund

Period	% Sustainable Investments
2022 <sup>1</sup>	39.1
2023	40.2

<sup>1</sup> As the Fund’s sustainable investment commitment took effect from 1 October 2022, the sustainability indicator reflects the sustainable investment proportion on 31 December 2022.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested in sustainable investments that have environmental (E) and social (S) objectives. The Fund used the following E/S pillars that align to the UN Sustainable Development Goals (“SDGs”) to determine economic activities that contributed to E/S objectives:

Pillar	Activities
Climate and resource impact	Reducing greenhouse gases Promoting healthy ecosystems Nurturing circular economies
Social equity and quality of life	Enabling social equity Improving health Enhancing quality of life

An issuer’s sustainable contribution is measured as a percentage of its revenue generated from sustainable economic activities.

The Fund held investments in companies which, through their products or services, were aligned to economic activities that contributed to the following objectives:

- reducing greenhouse gases
- improving health
- enhancing quality of life

More details on the approach to identifying sustainable investments can be found on the website: [www.funds.troweprice.com](http://www.funds.troweprice.com)

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The investment manager utilises its proprietary internal research platform to support its assessment of whether an issuer is causing significant harm to any E/S objective. Combined with third-party data, the “do no significant harm” assessment incorporates issuer information in relation to Principal Adverse Impact (“PAI”) indicators and alignment to certain international guidelines and principles.

Throughout the reference period, all investments that the investment manager has determined as sustainable have been assessed against all relevant PAI indicators and OECD guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights. Based on this assessment, the sustainable investments held by the Fund did not significantly harm any environmental or social objectives.

Do No Significant Harm (DNSH)	OECD Guidelines & UN Guiding Principles on Business and Human Rights	Supply Chain
		Employee Treatment
		Society & Community Relations
		UNGC and OECD Guidelines
	PAI Indicators	GHG Emissions
		Biodiversity
		Water, Waste & Material Emissions
		Social & Employee Matters
		Exposure to Controversial Weapons

T. Rowe Price US Large Cap Value Equity Fund

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The table above illustrates the framework the investment manager applies to systematically assess DNSH as a part of its investment process, which is inclusive of both PAI indicators and OECD guidelines and human rights principles. Where issuer data for a PAI indicator is unavailable the investment manager used proxy PAI indicators that aligned to the mandatory PAI sub-categories described in the table above.

The investment manager determined whether significant harm was being caused by applying a qualitative and quantitative assessment of the data it has obtained for the mandatory PAI indicators listed in Table 1 and any relevant indicators in Tables 2 and 3 of Annex I of the SFDR Delegated Regulation. The investment manager also analysed issuer PAI metrics relative to internally set thresholds, where relevant and appropriate. These thresholds provided an initial indication of whether significant harm is occurring.

The investment manager undertook further analysis to support its view, where necessary. The investment manager considered the materiality of a given indicator relative to an issuer’s industry, sector, or location, which was factored into the overall determination. Where sufficient data was not available, other relevant data points were used to make an assessment.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes, all sustainable investments were aligned with the UN Guiding Principles on Business and Human Rights and related standards and OECD Guidelines for Multinational Enterprises during the reference period.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund makes a commitment to consider the following PAI indicators:

- violations of UN Global Compact principles (PAI #10)
- board gender diversity (PAI #13)
- exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) (PAI #14)

PAI Indicator	Unit of Measurement	Value (%)	Fund Coverage (%)*
Violations of UN Global Compact principles (PAI #10)	Percentage of Fund invested	0.0	98.0
Board gender diversity (PAI #13)	Average percentage of female board members	35.3	97.4
Exposure to controversial weapons (PAI #14)	Percentage of Fund invested	0.0	98.0

\* Fund coverage represents the proportion of investments for which PAI data is available and applicable.

The Fund considers Violations of UN Global Compact principles (PAI #10) and Exposure to controversial weapons (PAI #14) by restricting investment in companies the investment manager identifies as violating UNGC principles and/or having exposure to controversial weapons. These restrictions are implemented systematically through the T. Rowe Price Responsible Exclusion List. For the reference period, the Fund’s exposure to controversial weapons and violations of UN Global Compact was zero. Since these PAI values cannot be improved, the investment manager is not planning any engagement or investment action. The investment manager will continue to monitor these on an ongoing basis.

## T. Rowe Price US Large Cap Value Equity Fund

The Fund considers Board gender diversity (PAI #13) by periodically collecting issuer-level PAI data, aggregating the data and averaging this over the reference period to provide a portfolio-level view of the indicator. In accordance with its PAI policy (available at [www.troweprice.com/esg](http://www.troweprice.com/esg)), the investment manager evaluates the portfolio-level view at least annually to identify and prioritise stewardship or investment action, where appropriate.

Following this evaluation, the investment manager has determined that no changes are needed to its engagement program or proxy voting policies on board gender diversity, and will maintain them for the coming year.

For clarity, if evidence of insufficient board diversity is found, the investment manager generally will engage with the company and, in the case of equity holdings, generally opposes the re-elections of Governance Committee members and/or senior directors, as appropriate. Please refer to the proxy voting guidelines available here ([www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf](http://www.troweprice.com/content/dam/trowecorp/Pdfs/esg/proxy-voting-guidelines-TRPA.pdf)) for additional, region-specific guidelines.

T. Rowe Price US Large Cap Value Equity Fund

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The actual proportion of Taxonomy-aligned investments held by the Fund was 0.0%.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional activities was 0.0% and in enabling activities was 0.0%.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Period	% Taxonomy-aligned Investments
2022	0.0
2023	0.0

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU taxonomy was 8.1%.

Sustainable investments may not be EU Taxonomy aligned for a number of reasons, including:

## T. Rowe Price US Large Cap Value Equity Fund

- The Fund does not currently commit to investing any of its assets in investments aligned with the EU Taxonomy.
- In order to demonstrate EU Taxonomy alignment, the EU Taxonomy Regulation prescribes specific criteria that the investment manager must assess the assets for. These requirements rely heavily on data availability and reliability. Many issuers were not required to comply with the Taxonomy disclosure requirements during the reference period, making it difficult to obtain the data needed to assess Taxonomy alignment.
- Not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could make a substantial contribution to the environment. Where developed, not all criteria were in place to apply for the reporting period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 32.1%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

This included all other investments that were not aligned with the E/S characteristics of the Fund. These were subject to screening by the investment manager to avoid investment in issuers that the investment manager believes are harmful to the environment or society through the application of the T. Rowe Price Responsible Exclusion List. The T. Rowe Price Responsible Exclusion List is a binding exclusion list that applies directly to the Fund's entire portfolio, meaning that all investments the Fund makes are screened against this exclusion list. At the discretion of the investment manager, the Fund may hold investments that are not relevant to the T. Rowe Price Responsible Exclusion List (cash and certain derivatives used for efficient portfolio management). These investments are still subject to the good governance assessment, where relevant.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Throughout the reference period 40.2% of the value of the Fund's portfolio was invested in securities that the investment manager identified as sustainable investments.

The sustainable investments have been identified using the following steps:

The investment manager identified each investee company's contribution to an E/S objective based on the company's revenue derived from that specific sustainable activity. The sustainable investment exposure for each company was aggregated by the investment manager. This means that only the proportion of the investment contributing to a sustainable activity by an investee company was counted towards meeting the Fund's minimum sustainable investment commitment.

The investment manager has adopted a robust process to consistently identify whether a company causes significant harm to an E/S objective and incorporates PAIs into that assessment, where appropriate on an issuer-by-issuer basis. Its “do no significant harm” assessment is comprised of both proprietary research and third-party data inputs, including data in relation to PAI where relevant to the issuer and/or sector. The investment manager assessed whether the company caused significant harm by setting and monitoring thresholds, where relevant and appropriate, relative to PAI indicators, and whether it has been involved in significant controversies related to the OECD guidelines for multinational enterprises and UNGPs on business and human rights. If the activity breached the set thresholds, regardless of the percentage of revenue alignment (or use of bond proceeds) to an E/S objective, the company failed the sustainable investment test.

The investment manager also assessed the governance practices of an investee company by undertaking:

- A quantitative review using the investment manager's good governance test which consists of weighted pillars designed to measure specific corporate governance risks, rolled up to an overall rating, and
- A qualitative review by the governance team if a company's good governance test rating is red, taking into account market and sector norms.

All investments held by the Fund that contributed to a specific E/S objective and passed “do no significant harm” as well as good governance assessments, as detailed above, contributed towards the Fund's overall exposure to sustainable investments.

T. Rowe Price US Large Cap Value Equity Fund

*How did this financial product perform compared to the reference benchmark?*

---

A reference benchmark is not used for the purpose of promoting the Fund's E/S characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Audit report

To the Shareholders of  
**SELECT INVESTMENT SERIES III SICAV**

---

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of SELECT INVESTMENT SERIES III SICAV (the “Fund”) and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the statement of net assets as at 31 December 2023;
- the schedule of investments as at 31 December 2023;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

#### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
