Board of Directors' Report

The board of directors of the Company (the 'Board') presents the Annual Review and Audited Financial Statements of The Jupiter Global Fund (the 'Company') for the year ended 30 September 2023.

Structure of the Company

The Board has designated Jupiter Asset Management International S.A. ('JAMI') as Management Company of the Company to perform investment management, administration and marketing functions for the Company. JAMI is authorised as a management company managing UCITS governed by the UCITS Directive and is authorised and regulated by the Luxembourg regulator, the CSSF.

As at 30 September 2023, the Company comprised 17 active Funds with multiple share classes. Details of fund launches, merger and liquidations during the year can be found in Note 1 to the Financial Statements.

Jupiter Flexible Income and Jupiter Flexible Macro (LUX) Funds were closed on 21 October 2022. Jupiter Global Ecology Bond and Jupiter Global Ecology Diversified Funds were closed on 6 April 2023. Jupiter Asia Pacific Income was closed on 17 May 2023.

Corporate Governance and the ALFI Code of Conduct

The Board undertakes an annual review of ongoing compliance with the principles of the Code and considers that the Company has been in compliance with its principles in all material aspects throughout the year ended 30 September 2023.

Board Composition

The Board is composed of five Board members, three of them being independent from JAMI and JAML.

GARTH LORIMER TURNER

Director and Chairman

Garth Lorimer Turner (British) is a Solicitor of the Supreme Court of England & Wales, a Solicitor of the Supreme Court of Hong Kong and a Bermuda Barrister & Attorney.

JACQUES ELVINGER

Director

Jacques Elvinger (Luxembourgish) is a partner of the Luxembourg law firm of Elvinger Hoss Prussen, *société anonyme*.

PAULA MOORE

Director

Paula Moore (British) is a Chartered Accountant and a member of the Institute of Chartered Accountants in England and Wales. She is a director of several Jupiter companies.

SIMON ROWSON

Director

Simon Rowson (British) is a Solicitor of the Supreme Court of England & Wales. He is Head of Product Structuring & Legal of JAML.

REVEL WOOD

Director

Revel Wood (British) is a Chartered Accountant (SAICA). He is an ALFI board member, co-chairman of the ILA conducting officer forum and ALFI Fund Governance forum, and co-founder of ONE group solutions a specialised governance provider.

Board of Directors' Report *(continued)*

Chairman's Review

Over 18 months on from the start of the war in Ukraine, and over three years since the start of the Covid pandemic, markets are still reacting to the economic and inflationary shocks that these events visited upon the global economy. After inflation soared last year, interest rates began to rise too as central banks sought to keep a lid on rising prices, while a 'cost of living crisis' put households under pressure.

Where we stand today is that, across the developed world, inflation has generally come down quite significantly from its peaks, albeit still sits at levels well above previous years. Has the inflation beast been slain, then? Central banks have not been quick to declare victory, so far opting to at most keep interest rates on hold rather than cut them while they wait to see what economic data reveals about the state of the economy. Economic growth, particularly in the US, has held up better than many observers expected, but that hasn't removed speculation that a recession could still be around the corner.

On top of that, geopolitical risks continue to present investment markets with a highly changeable backdrop against which asset prices and future prospects must be judged. On top of the ongoing war in Ukraine, there are now also simmering tensions in the Balkans and the Caucasus, and an outbreak of hostilities in the Middle East between Hamas and Israel that, at the time of writing, is still a fast-developing global story. All of these are tipped into the melting pot of investors' perceptions of risk.

The following pages provide detail about how each of the Jupiter Global Fund's sub-funds have performed across the period under review. In the current environment, Jupiter's investment managers must attempt to make sense of often conflicting economic data, positioning their portfolios to make the most of the opportunities that investment markets offer while insulating them from the worst of the risks, all in the service of trying to deliver long-term returns for clients. Investing in challenging times such as these requires patience, conviction and discipline.

Annual General Meeting

The next annual general meeting of the Company will be held on 7 February 2024 at the registered office of the Company to consider matters relating to the year ended on 30 September 2023.

Garth Lorimer Turner
Chairman

Luxembourg, 15 January 2024

Report of the Depositary

In our capacity as Depositary we confirm that, in our opinion, the Management Company and the Board of Directors have managed the Company during the year ended 30 September 2023 in accordance with the provisions of the principal documents of the Company and the Protection of Investors as stated in the Luxembourg Law and rules made thereunder.

Audit report

To the Shareholders of
The Jupiter Global Fund

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of The Jupiter Global Fund (the “Fund”) and of each of its sub-funds as at 30 September 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 30 September 2023;
- the statement of operations and changes in net assets for the year then ended;
- the schedule of investments as at 30 September 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Market Review

The twelve month period was characterized by a strong performance for risk assets with equities recording double digit returns, credit spreads tightening and government bond yields closing broadly higher.

Such market movements have been in sharp contrast with the initial setup for the year, with various leading macroeconomic indicators pointing towards a slowdown across many regions and signs of fragility emerging across the globe.

The period saw a continuous alternation of market narratives between hard landing and soft landing subsequently followed by the “higher for longer thesis”. Single macroeconomic data prints, especially in the US, drove meaningful market reversals, generating highly erratic trading patterns.

Data towards the end of 2022 pointed towards lower inflation, supporting risk assets as well as government bonds. Stronger macro data in February, however, generated a partial reversal. But that did not last very long, as financial stability concerns materialized in March. Stocks of regional banks in the US started to fall, which was followed by the takeover of Credit Suisse by its rival UBS. Fears of further weakness in the banking sector in the US was a key topic for a number of months, but the return of some stability

was welcomed by the market with strong performance for risk assets. The debt ceiling saga generated some brief hiccup going into summer, but ultimately an extension deal was sealed averting a possible technical default for the US Treasury.

As economic growth remained broadly resilient, central banks were in a position to continue their inflation fight, delivering additional rate hikes.

Finally, August and September were negative for the broader markets as well as fixed income. In particular, concerns over increased deficit and hence government bond supply became a key topic for markets. At the same time resilient growth in the US fuelled the discussion over a potential higher long-term neutral level for interest rates.

Policy Review

In the October to December 2022 quarter, the overall asset allocation reflected the barbell structure that had characterized the previous 12/18 months, with an allocation to high quality sovereign bonds and duration (a measure of a bond price’s sensitivity to changes in interest rates). In the first quarter of 2023, our exposure to government bonds (both in developed markets and emerging markets) increased. In the second quarter, the allocation saw a more defensive shift. At the end of the review period, the duration increased to 8.3 years.

Jupiter Dynamic Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

In the first quarter of the period under review, the biggest contributor to the performance was our exposure to developed markets high yield corporates as developed markets high yield spreads saw a strong compression across the board, particularly in Europe. The main negative contribution came from government bonds in developed markets, particularly in Australia where yields have seen a meaningful rise during the quarter. The first quarter of 2023 was positive for fixed income markets. Our exposure to government bonds in developed markets was the biggest positive contributor. The sharp and abrupt shift in government bond yields seen across the globe, as investors repriced growth prospects and future path's of monetary policy, was in particular the key driving force. The second quarter was overall negative for our strategy, as some of the trends seen in the first quarter effectively reversed. The biggest negative contribution came from our exposure to government bonds in developed markets. In particular, the majority of the losses came from our exposure to Australian government bonds in the long end. Exposure to developed markets investment grade corporate bonds contributed positively. The third quarter has been overall negative for our strategy and for most of the high quality segments of the fixed income market. Our allocation to government bonds in developed markets was the major negative contributor. In particular, our exposure to the United States and Australia generated most of the losses, while exposure to New Zealand and United Kingdom provided a more marginal negative contribution. Exposure to local rates in emerging markets also provided an overall negative contribution as our allocation to government bonds in South Korea and Brazil saw negative returns. Exposure to corporate bonds contributed positively. The biggest positive contribution came in particular from our exposure to high yield corporate bonds in developed markets.

Overall, during the period our allocation to government bonds in developed markets was our main negative contributor. In particular, exposure to

US Treasuries was the main detractor, followed by Australia, New Zealand and United Kingdom. Our exposure to local rates in Brazil and South Korea instead provided a positive contribution.

Our allocation to corporate bonds provided a positive contribution over the period under review, with allocation to developed markets high yield corporate bonds in particular providing strong positive contribution. Allocation to telecommunications and financials provided meaningful contribution, while the consumer staples sector contributed negatively. Also, our credit risk hedging via XOVER provided some negative contribution. Investment grade corporate bonds in developed markets also provided a positive contribution, especially in the financials sector. Finally, emerging markets corporates contributed positively as well.

Investment Outlook

Looking at the next 12/18 months our key thesis remains that major developed markets economies are going to see a material slowdown and most likely a recession. Some emerging markets economies (especially China) look somewhat fragile. In recent quarters market narrative has changed multiple times following trends in spot macro data. While admittedly GDP numbers and spot job market data (e.g. unemployment) remain fairly solid for now, albeit there are numerous cracks starting to appear, our view remains that monetary policy acts with "long and variable lags". Further unintended consequences from the last 18 months of tightening are likely to materialise in the coming quarters and possibly in unexpected areas of the market/economy.

We think that the next 12 to 18 months should provide central banks across the globe with reasons (or perhaps the need) to be less hawkish. Developed markets central banks still look fairly data dependent. But China, Brazil, Chile and Hungary have already started their rate cutting cycle.

Jupiter Dynamic Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook *(continued)*

Investment implications remain stable. We see material value in government bonds in developed markets (US and Australia in particular) and in some emerging markets (S. Korea, Brazil) and prefer to keep historically high duration exposure across our portfolios. Credit markets look quite complacent with mounting recessionary risks, with global high yield spreads below long-term averages and well below recessionary averages.

Ariel Bezael and Harry Richards

* Performance takes into consideration dividend distributions during the year.

Market Review

The twelve month period was characterized by a strong performance for risk assets with equities recording double digit returns, credit spreads tightening and government bond yields closing broadly higher.

Such market movements have been in sharp contrast with the initial setup for the year, with various leading macroeconomic indicators pointing towards a slowdown across many regions and signs of fragility emerging across the globe.

The period saw a continuous alternation of market narratives between hard landing and soft landing subsequently followed by the “higher for longer thesis”. Single macroeconomic data prints, especially in the US, drove meaningful market reversals, generating highly erratic trading patterns.

Data towards the end of 2022 pointed towards lower inflation, supporting risk assets as well as government bonds. Stronger macro data in February, however, generated a partial reversal. But that did not last very long, as financial stability concerns materialized in March. Stocks of regional banks in the US started to fall, which was followed by the takeover of Credit Suisse by its rival UBS. Fears of further weakness in the banking sector in the US was a key topic for a number of months, but the return of some stability was welcomed by

the market with strong performance for risk assets. The debt ceiling saga generated some brief hiccup going into summer, but ultimately an extension deal was sealed averting a possible technical default for the US Treasury.

As economic growth remained broadly resilient, central banks were in a position to continue their inflation fight, delivering additional rate hikes.

Finally, August and September were negative for the broader markets as well as fixed income. In particular, concerns over increased deficit and hence government bond supply became a key topic for markets. At the same time resilient growth in the US fuelled the discussion over a potential higher long-term neutral level for interest rates.

Policy Review

In the October to December 2022 quarter, the overall asset allocation reflected the barbell structure that had characterized the previous 12/18 months, with an allocation to high quality sovereign bonds and duration (a measure of a bond price’s sensitivity to changes in interest rates). In the first quarter of 2023, our exposure to government bonds (both in developed markets and emerging markets) increased. In the second quarter, the allocation saw a more defensive shift. At the end of the review period, the duration increased to 9.5 years.

Jupiter Dynamic Bond ESG

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

In the October to December 2022 quarter, the biggest contributor to the performance was our exposure to developed markets high yield corporates as developed markets high yield spreads saw a strong compression across the board, particularly in Europe. The main negative contribution came from government bonds in developed markets, particularly in Australia where yields have seen a meaningful rise during the quarter. The first quarter of 2023 was positive for fixed income markets. Our exposure to government bonds in developed markets was the biggest positive contributor. The sharp and abrupt shift in government bond yields seen across the globe, as investors repriced growth prospects and future paths of monetary policy, was in particular the key driving force. The second quarter was overall negative for our strategy, as some of the trends seen in quarter one effectively reversed. The biggest negative contribution came from our exposure to government bonds in developed markets. In particular, the majority of the losses came from our exposure to Australian government bonds in the long end. Exposure to developed markets investment grade corporate bonds contributed positively. The third quarter has been overall negative for our strategy and for most of the high quality segments of the fixed income market.

Our allocation to government bonds in developed markets was the major negative contributor. In particular, our exposure to the United States and Australia generated most of the losses, while exposure to New Zealand and United Kingdom provided a more marginal negative contribution. Exposure to local rates in emerging markets also provided an overall negative contribution as our allocation to government bonds in South Korea and Brazil saw negative returns. Exposure to corporate bonds contributed positively. The biggest positive contribution came in particular from our exposure to high yield corporate bonds in developed markets.

Overall, during the period our allocation to government bonds in developed markets was our main negative contributor. In particular, exposure to US Treasuries was the main detractor, followed by New Zealand and United Kingdom. Contribution from Australia was flat. Our exposure to local rates in Brazil and South Korea instead provided a positive contribution.

Our allocation to corporate bonds provided instead a positive contribution over the 12 months, with allocation to developed markets high yield corporate bonds in particular providing strong positive contribution. Allocation to healthcare contributed positively, while industrials made a negative contribution. Also, our credit risk hedging via XOVER provided some negative contribution. Investment grade corporate bonds in developed markets also provided a positive contribution, especially in the financials sector. Finally, emerging markets corporates contributed positively as well.

Investment Outlook

Looking at the next 12/18 months our key thesis remains that major developed markets economies are going to see a material slowdown and most likely a recession. Some emerging markets economies (especially China) look somewhat fragile. In recent quarters market narrative has changed multiple times following trends in spot macro data. While admittedly GDP numbers and spot job market data (e.g. unemployment) remain fairly solid for now, albeit there are numerous cracks starting to appear, our view remains that monetary policy acts with “long and variable lags”. Further unintended consequences from the last 18 months of tightening are likely to materialise in the coming quarters and possibly in unexpected areas of the market/economy.

Jupiter Dynamic Bond ESG

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook *(continued)*

We think that the next 12 to 18 months should provide central banks across the globe with reasons (or perhaps the need) to be less hawkish. Developed markets central banks still look fairly data dependent. But China, Brazil, Chile and Hungary have already started their rate cutting cycle.

Investment implications remain stable. We see material value in government bonds in developed markets (US and Australia in particular) and in some emerging markets (S. Korea, Brazil) and prefer to keep historically high duration exposure across our portfolios. Credit markets look quite complacent with mounting recessionary risks, with global high yield spreads below long-term averages and well below recessionary averages.

Market Review

The period began with global risk assets under pressure as market concerns ramped up around persistent inflation, high energy prices and supply disruption from Russia, and recession risk. European equities rebounded toward the end of 2022 as inflation readings were lower than expected. Both the US Federal Reserve (Fed) and the European Central Bank (ECB) stepped down the size of their hikes in December, but both remained hawkish.

The new year brought further gains for equity markets, with easing inflation and hopes that peak central bank rates were near. Authorities in China began easing Covid restrictions. Volatility returned to markets with the collapse of three US regional banks followed by Swiss authorities forcing the sale of troubled Credit Suisse to its stronger peer UBS in March.

Markets rallied again as financial contagion risk fears subsided. While headline inflation continued to ease, underlying inflation remained elevated in many developed markets. China's economic recovery from lockdown was slower than expected. The ECB raised rates to a record in September. Economic data showed a slowdown in manufacturing in the euro-area. Global equity markets fell in the third quarter of 2023 on a range of concerns including that central banks will keep rates higher for longer.

Policy Review

Among the top contributors to the fund performance in the 12 months under review were Novo Nordisk, RELX, VAT Group and Kingspan. The underperformers for the fund included Pernod Ricard, Allfunds and Dr Martens.

Jupiter European Growth

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

Novo Nordisk has seen significant share price strength following strong demand for their new obesity drug, as well as market speculation following early test results that show possible wider uses for their drug therapies. Comparatively, Pernod Ricard saw weak share price performance during the period. Despite announcing 15% growth in revenues year-on-year, the company has seen weaker growth than expected in the US market and earnings have also been negatively impacted by currency movements. Nevertheless, we believe that the company's long-term growth outlook remains attractive as the company continues to innovate and support customer behavioural changes.

The fund purchased several new holdings in the period, taking advantage of market volatility to buy into quality companies that we believe are exposed to attractive long-term secular growth trends. Two companies from the industrial sector were added: Sandvik is a global engineering company that provides electrification services to the mining industry; and Rotork, provides mission-critical, flow-control products and systems to markets, including water and power, oil and gas, industrial and chemicals. Both companies are exposed to the sustainability growth theme by providing products that can help customers to improve efficiency of processes and reduce negative impacts on the environment.

Other additions included ASM International, a global leader in the semi-conductor capital equipment value chain, and Sartorius, a leading provider of laboratory equipment for the biopharmaceutical industry. The Swiss luxury goods group Richemont was also added in 2023. The company owns brands including Cartier; we believe it has significant pricing power, an attractive portfolio of brands and should benefit from a simplification of its business to focus on core categories.

Finally, the most recent addition to the fund was L'Oreal, a global leader in cosmetic products that continues to innovate across products and channels as well as to acquire and scale new brands to help maintain attractive margins.

To help fund some of these purchases, the fund sold out of several businesses where we held lower conviction and had smaller positions. These included Knorr Bremse, Biomerieux and Grifols. Temenos, the software company, was also sold due to concerns about operational performance as its banking industry customers deferred investment.

Investment Outlook

Risk assets face a range of macroeconomic and geopolitical challenges. Markets are worried about the risk of recession, persistent Inflation and whether the Fed, ECB and other central banks can tame inflation without overtightening. Eurozone economic data has been soft, Russia's invasion of Ukraine grinds on, causing human, economic and geopolitical damage and China's economic data has been mixed since its emergence from Covid lockdowns.

Nevertheless, many of our holdings have been reporting healthy fundamentals, and we have been impressed by the operational performance of our holdings in the face of the broad-based supply chain challenges and inflationary cost pressures.

We continue to focus on businesses that have the potential to consistently create significant value for shareholders over the long term regardless of short-term headwinds. We seek to buy and hold exceptional franchises with sustainable competitive advantages. We continue to be attracted to companies with long-term structural growth drivers and predictable cashflows and will apply our process to analyse and invest behind these opportunities.

We will continue to monitor the fundamental backdrop closely, assessing for signs of competitive change or disruptive forces. But it is also worth noting that quality businesses tend to thrive and gain share in more difficult economic times, as their customers focus on purchasing goods and services that can make the difference to their operations.

Mark Nichols and Mark Heslop

Market Review

The period began with global risk assets under pressure as market concerns ramped up around persistent inflation, high energy prices and supply disruption from Russia, and recession risk. European equities rebounded toward the end of 2022 as inflation readings were lower than expected. Both the US Federal Reserve (Fed) and the European Central Bank (ECB) stepped down the size of their hikes in December, but both remained hawkish.

The new year brought further gains for equity markets, with easing inflation and hopes that peak central bank rates were near. Authorities in China began easing Covid restrictions. Volatility returned to markets with the collapse of three US regional banks followed by Swiss authorities forcing the sale of troubled Credit Suisse to its stronger peer UBS.

Markets rallied again as financial contagion risk fears subsided. While headline inflation continued to ease, underlying inflation remained elevated in many developed markets. China's economic recovery from lockdown was slower than expected. The ECB raised rates to a record in September. Economic data showed a slowdown in manufacturing in the euro-area. Global equity markets fell in the third quarter of 2023 on a range of concerns including that central banks will keep rates higher for longer.

Policy Review

Among the top contributors to the fund performance in the 12 months under review were Novo Nordisk, RELX, VAT Group and Kingspan. The underperformers for the fund included Pernod Ricard, Allfunds, FinecoBank and Dassault Systemes.

Novo Nordisk has seen significant share price strength following strong demand for their new

obesity drug, as well as market speculation following early test results that show possible wider uses for their drug therapies. Comparatively, Pernod Ricard saw weak share price performance during the period. Despite announcing 15% growth in revenues year-on-year, the company has seen weaker growth than expected in the US market, and their earnings have also been negatively impacted by FX. Nevertheless, we believe that the company's long term growth outlook remains attractive as the company continues to innovate and support customer behavioural changes.

The fund purchased several new holdings in the period, taking advantage of market volatility to buy into quality companies that we see are exposed to attractive long term secular growth trends.

New additions included ASM International, a global leader in the semi-conductor capital equipment value chain; Sandvik, a global engineering company that provides electrification services to the mining industry; and Sartorius, a leading provider of laboratory equipment for the biopharmaceutical industry. The Swiss luxury goods group Richemont was also added in 2023. Richemont owns brands including Cartier, and we believe it has significant pricing power, an attractive portfolio of brands and should benefit from a simplification of its business to focus on core categories.

To help fund some of these purchases, the fund sold out of several businesses where we held lower conviction and had small positions. These included Knorr Bremse, Biomerieux and Grifols. Temenos, the software company, was also sold due to concerns about operational performance as its banking industry customers deferred investment.

Jupiter Europe ex-UK Equity

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook

Risk assets face a range of macroeconomic and geopolitical challenges. Markets are worried about the risk of recession, persistent Inflation and whether the Fed, ECB and other central banks can tame inflation without overtightening. Eurozone economic data has been soft, Russia's invasion of Ukraine grinds on, causing human, economic and geopolitical damage and China's economic data has been mixed since its emergence from Covid lockdowns.

Nevertheless, many of our holdings have been reporting healthy fundamentals, and we have been impressed by the operational performance of our holdings in the face of the broad-based supply chain challenges and inflationary cost pressures.

We continue to focus on businesses that have the potential to consistently create significant value for shareholders over the long term regardless of short-term headwinds. We seek to buy and hold exceptional franchises with sustainable competitive advantages. We continue to be attracted to companies with long-term structural growth drivers and predictable cashflows and will apply our process to analyse and invest behind these opportunities.

We will continue to monitor the fundamental backdrop closely, assessing for signs of competitive change or disruptive forces. But it is also worth noting that quality businesses tend to thrive and gain share in more difficult economic times, as their customers focus on purchasing goods and services that can make the difference to their operations.

Market Review

Global stock markets continued to sell off in October 2022, though they rallied meaningfully in November as expectations grew that peak inflation would soon be reached, with subsequent smaller incremental interest rate increases and the potential for a topping out in the strength of the US dollar.

Global equities started 2023 with a strong rally, as global growth surprised on the upside. Lower energy and oil prices also supported investor sentiment, along with the reversal of China's zero-Covid policy. In March, attention turned to global financial stability, with the collapse of Silicon Valley Bank (SVB) in the US and a rescue deal for Credit Suisse in Europe, which hit bank shares particularly hard.

The second quarter got off to an uncertain start driven by further fallout from the failure of SVB; First Republic Bank came under increasing pressure before failing in May. Fortunately, the contagion was limited following swift action from the US Federal Reserve (Fed) and the US government.

Following a rally in global stock markets in the first half of 2023, the third quarter was more difficult. Economic data showed a deterioration in the

outlook for global growth, while a moderation in inflationary pressures suggested we are approaching a peak in the global interest rate hiking cycle. Market participants are now questioning how long central banks will hold interest rates at these levels, with a general consensus of "higher for longer" interest rates, given persistent pricing pressures.

Policy Review

The Jupiter Financial Innovation fund delivered solid returns in the period under review, though it underperformed the MSCI ACWI/Financials Index. However, it outperformed the index year to date (to the end of September 2023).

The SVB collapse and Credit Suisse rescue deal in the first quarter of 2023 hit global banks' shares across the board. Some financials payment networks were also caught up in the narrative. However, many banks recovered strongly from the volatility as the year progressed. For example, the fund benefitted from its overall exposure to European banks, with names like UBS and Nordea Bank performing strongly for the year under review. UK financials such as HSBC and Standard Chartered also benefitted from the re-opening of the Chinese economy.

Jupiter Financial Innovation

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

Several fintech names, including payment networks Visa and Mastercard, recovered strongly after the selloffs driven by SVB and Credit Suisse, given an improving outlook in cross-border travel.

UniCredit was the top performing position in the period. In January, the Italian bank reported its best full-year results in a decade. It announced it would return more than €5bn to shareholders through dividend payouts¹ and share buybacks². In July, it raised its net profit and shareholder reward targets for the year for the second quarter in a row, after higher interest rates resulted in its earnings exceeding expectations.

Kaspi.KZ was another strong performer for the fund. In April, the Kazakhstan-focused mobile technology company announced its first-quarter revenue had soared as a result of improved performance across all its platforms. Later in the year, brokers upgraded revenue forecasts for the near term.

On the negative side, our exposure to Indonesia detracted from returns, partly due to profit taking following strong performance. Deutsche Boerse also underperformed in the period under review, as its search for a new CEO has brought uncertainty. However, its earnings are growing, and it recently received final approval from the regulators for its acquisition of SimCorp, in an all-cash deal for \$4.3bn.

Investment Outlook

Economic data is starting to show signs of a deterioration in the outlook for global growth, while a moderation in inflationary pressures suggests we are approaching a peak in the global interest rate hiking cycle. Market participants are now questioning how long central banks will hold interest rates at these levels, with a general consensus of “higher for longer” interest rates, given persistent pricing pressures.

Stagflation³ increasingly appears to be on the cards for the European economy as the region’s growth data deteriorates, while overall inflation levels continue to be elevated. Several recent data releases

in Europe have pointed to a continued loss of momentum in the economy on aggregate. On inflation, the Consumer Price Index (CPI) remains well above the European Central Bank interest rates (at 4%), and rising oil and gas prices pose additional challenges in the region.

While the global banking sector was hit by the Silicon Valley Bank crisis and takeover of Credit Suisse earlier at the start of 2023, financial services companies’ earnings continued to improve thereafter, often beating expectations. Peak net interest income may be around the corner, making upward earnings revisions more difficult. However, central banks are supportive of generous bank payouts, and valuations are at multi-year lows.

The higher interest rate environment is challenging for financial technology names, but our long-term view is unchanged about the wealth of opportunities unlocked by the unprecedented pace of innovation in the industry. Companies that can successfully harness technology to cut costs, improve customer experience, and tap into new markets will ultimately gain ground over competitors that are too slow to adapt.

Guy de Blonay

Investment Manager

30 September 2023

¹Dividend payouts: A share of a company’s profit distributed to shareholders.

²Share buybacks: When a company buys back its shares from the marketplace, effectively reducing the number of outstanding shares on the market, which increases the value of remaining shares.

³Stagflation: When an economy simultaneously has slow growth, high unemployment and inflation.

Market Review

Global equities rose during the period under review. The final quarter of 2022 saw stock markets rally meaningfully as expectations grew that peak inflation would soon be reached and would bring subsequent smaller incremental interest rate increases by central banks and the potential for a topping out in the strength of the US dollar.

There was another strong equities rally in the start of 2023, as global growth surprised on the upside. Lower energy prices also helped to support investor sentiment, along with the reversal of the zero-Covid policy in China. In March, attention turned to global financial stability, with the collapse of Silicon Valley Bank in the US and a rescue deal for Credit Suisse in Europe, which hit equities, and in particular, bank shares, hard.

Markets rallied as financial contagion risk fears subsided, and industrials and technology sectors performed well, with technology's strength being

driven by expectations around artificial intelligence. While headline inflation continued to ease, underlying inflation remained elevated in many developed markets.

The third quarter was tough for global markets. Government bond yields continued to rise, as did oil prices and the US dollar. Most equity markets declined due to fears over the global economy and the impact of higher interest rates and bond yields. The US Federal Reserve indicated that interest rates may have to stay "higher for longer" to tackle inflation. The European Central Bank raised rates to a record high, while economic data in the region remained soft. The outlook for the Chinese economy worsened, while Japan remained an outlier, with relatively tight monetary policy despite above-target inflation.

Jupiter Global Convertibles

Review of Portfolio as at 30 September 2023 *(continued)*

Performance Review

The objective of the fund is to achieve long-term capital growth by investing on a global basis in a diversified portfolio of convertible securities. The convertible bond asset class generated positive returns during the period under review though lagged the returns in global equity markets. The Jupiter Global Convertibles fund underperformed the benchmark but outperformed on a peer group basis.

The best performing regions for the fund on an absolute basis were the US followed by Europe, Asia Pacific, the UK and Japan. By sector, the best performing industries for the fund on an absolute basis were technology, industrials and basic materials, while health care, real estate and utilities were negative contributors.

Total convertibles issuance for the calendar year to date in 2023 stands at \$61 billion and is on track to hit an “average cycle” level of \$80 billion to \$85 billion, which is significantly better than last year’s lacklustre \$39 billion of issuance. We continued to be selective in our participation of new issues.

Investment Outlook

The higher rates for longer rhetoric that is feeding through the bond markets, is certainly making investors nervous on whether central banks can achieve a soft landing for the economy. The resilience that has been seen so far in the labour market is showing signs of change with the US unemployment rate recently increasing. Manufacturing data continues to be weak throughout US and Europe and consumer spending is also starting to show signs of weakness with several retailers announcing profit warnings during earnings season.

Outside of the US, China remains the elephant in the room, with some signs of improvement during the summer, however the government still needs to do more given the structural imbalance in the economy rather than the piecemeal measures announced so far.

We still subscribe to a soft-landing scenario as we think anything more will result in central banks pivoting to a looser monetary policy. In the current environment we think the convertible bond market is well placed to attract new issuers given where funding rates have got to, particularly for high yield companies. We think this, combined with low absolute volatility levels, bodes well for the asset class and should support valuations going forward.

Lee Manzi and Makeem Asif

Market Review

Global equities rose during the period under review; however, while the end of 2022 and first half of 2023 were driven by momentum, the latter part of the period was more challenging for global equity markets as rising interest rates weighed on wider sentiment. However, global equity experienced a strong rally at the end of 2022 into the start of 2023. Since the start of the year markets have been dominated by the 'Magnificent 7'. Although these mega-cap, high-growth technology companies were weaker in the third quarter, they still accounted for 73% of the MSCI All Country World index return (USD) year-to-date to the end of September.

Aside from market factors, environmental policy progress continues to be made, led by the US. Despite its misleading name, the Inflation Reduction Act (IRA) intends to combat climate change and reinvigorate US industrial and strategic policy in the process. In our view, not only does the IRA give the US a meaningful chance of meeting its greenhouse gas reduction targets, but it also presents an unprecedented catalyst for companies in the environmental solutions space.

Policy developments like the Inflation Reduction Act (IRA) in the US are welcome in light of the scientific evidence on the world's climate status. More recently, Global Stocktake Technical Assessment

report was released. Its main takeaway was that the world is off-track on the path to meeting the temperature goal set out in the Paris Agreement. This assessment follows on from the IPCC Sixth Assessment Report which issued a dire assessment of the world's climate trajectory, but pointed out that the technologies exist to reach the targets if they are implemented in time.

Policy Review

The Fund underperformed in an environment split between momentum increasing risk-off sentiment as central banks converged around higher interest rates. Relative to the world equity index MSCI ACWI, Fund performance was relatively resilient during much of the period under review. However, against a more challenging backdrop, relative performance was weaker in Q3 2023, in part due to having no exposure to the Energy sector, which performed more strongly as supply constraints drove oil prices higher. The Fund does not have exposure to traditional energy companies, though some of our holdings do indirectly benefit from rising energy prices. Relative performance lagged the strength of the Information Technology sector which benefitted from AI-themed stocks that we do not have exposure to.

Jupiter Global Ecology Growth

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

The largest positive performance contributor was the Fund's largest thematic allocation, Green Buildings and Industry. Many of our holdings within this theme are industrial companies whose physical products are reliant on global supply chains. As Covid-related disruptions have eased, holdings have been benefitting from a structural tailwind of energy price volatility which encourages the take-up of energy efficient solutions that are a large component of the GBI opportunity set. US-based Owens Corning, which we trimmed in the period, benefitted from a strong rally in US building products. The Fund also saw positive contribution from Infineon and Schneider Electric.

On the negative side, the Sustainable Agriculture & Land Ecosystems theme detracted from performance, with DSM Firmenich the largest single stock detractor in the period. Although the Netherlands-based life and materials sciences company has faced headwinds in the vitamin market, it remains a market leader in food flavourings and nutrition. The nutrition company provides solutions to both near-term climate adaptation which can lead to emissions reduction as well as investing in a longer-term societal shift in the way we eat. The Clean Energy theme was also a detractor, following a period of strong returns, as oil prices surged due to reduced supply.

Trading activity centred around taking profits from positions which had performed strongly. We trimmed into strength within both the Clean Energy and Circular Economy themes. Reductions in these themes include Vestas Wind Systems, following first-quarter results where management re-iterated their full-year guidance as well as the longer-term margin target. We reduced several positions within the Green Buildings & Industry theme following strong short-term performance including Owens Corning, Advanced Drainage and Linde and disposed of Daikin on growing concerns around of reputational and regulatory risks due to its current and legacy exposure to PFAS (long-lasting chemicals which are difficult to break down in the

environment) as well as mounting signals that the global market for low-carbon heat-pumps is slowing as production capacity increases significantly.

Investment Outlook

We have a long-held conviction that environmental challenges in all their forms are central to global development in the long term. This provides compelling growth opportunities for companies focussed on delivering real-world solutions to climate change and wider forms of natural capital protection including water and biodiversity. The landmark US IRA, and the recent responses from the European Commission such as the Net-Zero Industry Act, signal that environmental solutions markets have crossed a watershed moment where they are no longer peripheral, but instead integral to future economies and markets.

Given the rising incidence of large-scale natural disasters, including intense flooding and wildfires, politicians are increasingly considering the importance of adaptation measures, rather than mitigation solutions, to combat the worst effects of these disasters. While we believe adaptation solutions do have a role, we believe the most appropriate approach for investors is to recognise the nuance, and to avoid considering opportunities through an either one or the other lens, instead seeking solutions where climate adaptation and mitigation converge. We ideally seek those opportunities which provide clear mitigation or two-pronged solutions to the vital challenges the world is facing.

We expect the volatility in equity markets to continue into the near-term, presenting opportunities for long-term active investors focussing on structural growth trends such as energy transition and more widely across our six environmental solution investment themes.

Market Review

The fourth quarter of 2022 was mixed for fixed income, including emerging market debt (EMD). In November, lower-than-expected Consumer Price Index (CPI) data and renewed hopes for re-opening in China gave a meaningful boost to EMD. December was generally difficult for developed markets, while EMD continued to trend higher.

Moving into 2023, EMD continued to perform well, though markets took a pause in February. China continued to move towards a full reopening of its economy, reigniting optimism towards global growth. In March, however, we saw an abrupt change in market dynamics, as investors shifted their focus from inflation to the banking sector, as Silicon Valley Bank collapsed in the US and Credit Suisse had to be rescued by UBS in Europe. Volatility in EMD was mostly driven by developed market factors rather than EM-specific risks.

We saw some stabilisation in April, though the month ended with another collapse from US regional bank First Republic. May was a broadly negative month for fixed income markets, with hard currency¹ emerging market debt performing broadly in line with developed markets. The debt ceiling saga in the US was the main concern for market participants, but in practice market effects were limited. The US Federal Reserve (Fed) paused from hiking interest rates for the first time in 15 months, but with expectations of two additional hikes by the end of the year.

The third quarter was another mixed period for EMD. Once again, developed markets largely dominated newsflow. “Higher for longer” interest rates became the key theme in markets, supported by relatively resilient economic data in the US and a rebound in oil prices.

Jupiter Global Emerging Markets Corporate Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Performance Review

The Jupiter Global Emerging Markets Corporate Bond fund delivered strong returns, outperforming its benchmark in the period under review.

Positive contributions

- Bond selection in China
- Overweight² exposure to and bond selection in Mexico
- Overweight exposure to Indonesia
- Overweight exposure to and bond selection in Ukraine
- Overweight exposure to Guatemala

Negative contributions

- Overweight exposure to interest rates
- Overweight exposure to and bond selection in Brazil
- Bond selection in Colombia
- Underweight³ to Macau
- Underweight to Argentina

We are underweight investment grade⁴ and overweight high yield⁵ debt relative to the index. In recent quarters, as developed market economies have shown signs of deterioration, we have started to reduce our underweight exposure to investment grade debt (especially in Asia).

On a regional level, we are overweight Africa, Europe, the Middle East and Latin America. We are significantly underweight Asia.

In Africa, we have modest overweights in Mauritius (a bank), Morocco (a large fertiliser company) and Tanzania (a telecommunication towers business), as well as off-benchmark exposure to Cote D'Ivoire sovereign debt⁶. We are now underweight South Africa; where we do have exposure, we focus on the transportation and the technology, media, and telecom (TMT) sectors.

In Europe, we are overweight Ukraine (sovereign debt, poultry business, agricultural, metals and mining), Turkey (consumer, airlines, utilities and

infrastructure sectors, local authority debt), Azerbaijan, the Czech Republic, Moldova, Uzbekistan and Bulgaria, with our main exposure coming from the utilities and energy sectors. In September, we increased our Turkey exposure to overweight.

In the Middle East, we remain overweight the UAE, where our exposure mainly comes from the real estate, logistics, education and energy sectors. We also hold some UAE sovereign debt. Saudi Arabia is now an underweight (primarily real estate and financials), as well as having some energy exposure. We remain overweight Jordan (international pharmaceutical) and Oman (energy). Qatar and Kuwait remain underweights, mostly given valuations; where we do have exposure, it is primarily to the financials sector.

In Latin America, we are overweight Mexico, Paraguay, Panama, Guatemala and the Dominican Republic. In Mexico, our largest active allocation is in the financials space, along with exposure to the utilities, telecommunications and consumer sectors. In Paraguay, Panama, Guatemala and the Dominican Republic, most of our exposure comes from the TMT, utilities and financials industries. We have an underweight allocation to Brazil, though we still have exposure to the utilities, animal protein, energy infrastructure and mining sectors. We remain underweight Chile and Argentina, and we have a benchmark-neutral allocation to Colombia.

Asia is our most significant underweight position, but we have recently increased our exposure. We remain significantly underweight China, South Korea, Taiwan, Hong Kong, Thailand, Malaysia, the Philippines and Singapore. We recently increased our Macau gaming exposure, which is now our largest overweight in the region. Our second largest overweight is Mongolia (sovereign bonds, as there are no liquid corporate bonds). We have marginal overweight exposure to Indonesia, with a preference for the consumer staples, real estate, energy, financials and TMT sectors, owning both corporate bonds and quasi-sovereign debt, and some exposure to local currency government bonds. Our position in India is now close to neutral, with a preference for the TMT,

Jupiter Global Emerging Markets Corporate Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Performance Review *(continued)*

renewables and infrastructure sectors, as well as having some financials exposure. In China most of our underweight comes from across financials. We recently opened a new position in debt issued by a large government-backed conglomerate with some real estate exposure. We also own some off-benchmark exposure in Japan.

Investment Outlook

We are cautiously optimistic about the outlook for US inflation, but we think this will probably come at the price of a slowdown in growth of the US economy. We believe the path for US Treasury yields will likely be descending, or at least more stable than what we've seen in the past 12 to 18 months. On the other hand, in recent months we have still seen relatively pronounced volatility on rates, with the resurgence of a "higher for longer" narrative.

Investors had expected more from the highly anticipated China's post-Covid re-opening. In practice, we have seen a mostly services-driven recovery, with manufacturing lagging behind. Consumer Price Index (CPI) remains on the verge of deflation, while Producer Price Index (PPI) is already in proper deflationary territory. This might be positive news for those looking for global disinflation, but it clearly presents a grim picture for demand in China. We've seen additional support both in terms of monetary and continuation of targeted relief measures for the property sector. We think there will be more stimulus and more support for the property sector and the broader economy.

It is unusual for developed market inflation to surpass EM inflation (on aggregate). Central banks' credibility has helped emerging markets to avoid a bout of hyperinflation. Interest rate hiking cycles started in EM well before those in developed markets. At the same time, less representation of services in consumer price baskets has helped to moderate the rise in services inflation that we've seen in developed markets and allowed them to benefit more from commodity disinflation. We do not expect a massive round of additional interest rate cuts from here, however. We think EM central

banks will mostly be following the Fed's moves, as early easing could lead to excessive depreciation⁷ for EM currencies.

In terms of the fundamentals of EM corporate bonds, we believe that the overall environment remains positive. Compared to historical data and developed markets, the level of net leverage appears to be relatively low. Looking ahead, we anticipate the potential for increased dispersion. One key factor that has benefitted many companies in 2023 has been the manageable wall of refinancing. However, this maturity wall is expected to become more challenging over the next few years. We believe there is a certain level of refinancing risk due to the rising cost of debt that many issuers will face following recent sharp interest rate rises. Previously, we sought growth stories that could outpace their debt, but now we are prioritising resilient companies that can navigate the refinancing cycle without difficulty, or those that have already taken proactive measures. We believe the current environment offers the potential for attractive returns, if caution is exercised in avoiding weaker names on the refinancing list.

EM sovereign debt (hard and local currency) has performed well year to date. Many positive (and often unexpected) idiosyncratic stories have started to play out, bringing a strong recovery in valuations of some more complicated names. Ukraine, Turkey, Nigeria, Egypt, Pakistan, and progress on critical restructurings such as Ghana or Zambia, are only a few of the examples where in recent months we have observed positive developments not expected by investors. We think these "high yielding" countries still offer interesting opportunities.

Alejandro Arevalo and Reza Karim

Investment Managers

30 September 2023

¹ Hard currency debt: predominantly issued in US dollars

² Overweight: when a fund holds an asset in excess of its representation within a comparable index

³ Underweight: when a fund holds less of a particular asset than its comparable index

⁴ Investment grade: refers to the quality of a bond; to be considered investment grade, the company's/country's debt must be rated at 'BBB' or higher by Standard and Poor's/Moody's

⁵ High yield refers to the quality of a bond; high yield is riskier debt, which carries a greater chance of default

⁶ Sovereign debt: debt issued by a government

⁷ Depreciation: a fall in the value of a currency in terms of its exchange rate versus other currencies

Market Review

The fourth quarter of 2022 was mixed for fixed income, including emerging market debt (EMD). In November, lower-than-expected Consumer Price Index (CPI) data and renewed hopes for re-opening in China gave a meaningful boost to EMD. December was generally difficult for developed markets, while EMD continued to trend higher.

Moving into 2023, EMD continued to perform well, though markets took a pause in February. China continued to move towards a full reopening of its economy, reigniting optimism towards global growth. In March, however, we saw an abrupt change in market dynamics, as investors shifted their focus from inflation to the banking sector, as Silicon Valley Bank collapsed in the US and Credit

Suisse had to be rescued by UBS in Europe. Volatility in EMD was mostly driven by developed market factors rather than EM-specific risks.

We saw some stabilisation in April, though the month ended with another collapse from US regional bank First Republic. May was a broadly negative month for fixed income markets, with hard currency¹ emerging market debt performing broadly in line with developed markets. The debt ceiling saga in the US was the main concern for market participants, but in practice market effects were limited. The US Federal Reserve (Fed) paused from hiking interest rates for the first time in 15 months, but with expectations of two additional hikes by the end of the year.

Jupiter Global Emerging Markets Short Duration Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Market Review *(continued)*

The third quarter was another mixed period for EMD. Once again, developed markets largely dominated newsflow. “Higher for longer” interest rates became the key theme in markets, supported by relatively resilient economic data in the US and a rebound in oil prices.

Performance Review

The Jupiter Global Emerging Markets Short Duration Bond fund delivered strong returns in the period under review.

Positive contributions

- Exposure to China
- Exposure to India
- Exposure to Mexico
- Exposure to Macau
- Exposure to Indonesia

Negative contributions

- Exposure to interest rates
- Exposure to Brazil
- Exposure to Kenya
- Exposure to Senegal

The fund’s duration (a measure of a bond price’s sensitivity to changes in interest rates) remains stable, at 2.1 years. We continue to have a modest bias towards high yield². The fund’s average rating is BB+.

On a regional level, Asia, Latin America and the Middle East account for almost 70% of the fund, in similar proportions, followed by Africa. Our Europe exposure remains marginal.

In Asia, most of our exposure comes from Indonesia, India, China, Macau and Singapore. Indonesia offers opportunities in multiple quasi-sovereign³ bonds and corporate bonds, across the utilities, telecommunications, real estate, energy and financials sectors. We also have exposure to its sovereign bonds⁴ in Indonesian Rupiah (IDR). In India, we are focused on the technology, media, and telecom (TMT), renewables and financials sectors. In

China, most of our exposure comes from large utilities and consumer/IT companies, as well as the automotive and financials sectors, while avoiding the real estate sector. In Macau, our allocation is focused on the gaming sector, while in Singapore we own debt issued by two banks and an aircraft leasing business.

In Latin America, our largest allocations are in Mexico (financials, utilities, and some consumer space exposure), Peru (primarily energy and financials), Colombia (energy and financials, and sovereign debt) and Paraguay (a bank and a telecommunications company). In Brazil, we have some exposure to the animal protein sector.

Most of our Middle East exposure comes from the major countries, with the UAE being the biggest allocation, followed by Saudi Arabia, Qatar, Israel, Bahrain and Jordan. In the UAE and Saudi Arabia, we are still finding value across the financials, real estate, utilities and logistics sectors. In Qatar, we are primarily focused on the financials space, while in Israel our exposure mostly comes from the debt of a large international pharmaceutical company and two other companies in the energy and industrial spaces. In Jordan, our allocation is split between sovereign bonds and a large international pharmaceutical company’s debt.

We have diversified exposure in Africa, primarily in Nigeria, South Africa, Morocco, Zambia, Egypt and Tanzania. In Nigeria, its sovereign debt makes up one third of our allocation, and the rest of our exposure comes from the financials and energy sectors. In South Africa, we own debt issued by a company in the TMT sector and a company in the transportation sector, as well as having some exposure to its sovereign debt (purely hard currency⁵). In Morocco, we have fertiliser and energy exposure, plus an allocation to its sovereign debt. In Zambia, we own financials/supranational debt and a mining company’s debt. In Tanzania, we have exposure to a telecommunication towers business. In Egypt, we own sovereign debt and a supranational’s bonds⁶.

Jupiter Global Emerging Markets Short Duration Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook

We are cautiously optimistic about the outlook for US inflation, but we think this will probably come at the price of a slowdown in growth of the US economy. We believe the path for US Treasury yields will likely be descending, or at least more stable than what we've seen in the past 12 to 18 months. On the other hand, in recent months we have still seen relatively pronounced volatility on rates, with the resurgence of a "higher for longer" narrative.

Investors had expected more from the highly anticipated China's post-Covid re-opening. In practice, we have seen a mostly services-driven recovery, with manufacturing lagging behind. Consumer Price Index (CPI) remains on the verge of deflation, while Producer Price Index (PPI) is already in proper deflationary territory. This might be positive news for those looking for global disinflation, but it clearly presents a grim picture for demand in China. We've seen additional support both in terms of monetary and continuation of targeted relief measures for the property sector. We think there will be more stimulus and more support for the property sector and the broader economy.

It is unusual for developed market inflation to surpass EM inflation (on aggregate). Central banks' credibility has helped emerging markets to avoid a bout of hyperinflation. Interest rate hiking cycles started in EM well before those in developed markets. At the same time, less representation of services in consumer price baskets has helped to moderate the rise in services inflation that we've seen in developed markets and allowed them to benefit more from commodity disinflation. We do not expect a massive round of additional interest rate cuts from here, however. We think EM central banks will mostly be following the Fed's moves, as early easing could lead to excessive depreciation⁷ for EM currencies.

In terms of the fundamentals of EM corporate bonds, we believe that the overall environment remains positive. Compared to historical data and developed markets, the level of net leverage appears to be relatively low. Looking ahead, we anticipate

the potential for increased dispersion. One key factor that has benefitted many companies in 2023 has been the manageable wall of refinancing. However, this maturity wall is expected to become more challenging over the next few years. We believe there is a certain level of refinancing risk due to the rising cost of debt that many issuers will face following recent sharp interest rate rises. Previously, we sought growth stories that could outpace their debt, but now we are prioritising resilient companies that can navigate the refinancing cycle without difficulty, or those that have already taken proactive measures. We believe the current environment offers the potential for attractive returns, if caution is exercised in avoiding weaker names on the refinancing list.

EM sovereign debt (hard and local currency) has performed well year to date. Many positive (and often unexpected) idiosyncratic stories have started to play out, bringing a strong recovery in valuations of some more complicated names. Ukraine, Turkey, Nigeria, Egypt, Pakistan, and progress on critical restructurings such as Ghana or Zambia, are only a few of the examples where in recent months we have observed positive developments not expected by investors. We think these "high yielding" countries still offer interesting opportunities.

Alejandro Arevalo and Reza Karim

Investment Managers

30 September 2023

¹ Hard currency debt: predominantly issued in US dollars

² High yield refers to the quality of a bond; high yield is riskier debt, which carries a greater chance of default

³ Quasi-sovereign bonds: bonds issued by non-government entities, but usually backed by the government

⁴ Sovereign bonds: debt issued by the government

⁵ Hard currency debt: predominantly issued in US dollars

⁶ Supranational bonds: debt issued by supranational organisations, which are institutions created by the governments of several countries to promote economic, political, and social cooperation

⁷ Depreciation: a fall in the value of a currency in terms of its exchange rate versus other currencies

Market Review

The year under review was generally strong, especially early 2023. Equity markets mixed an enthusiasm for growth and mega-cap technology stocks with a more sanguine view on central bank interest rate policy. Markets seemed to price an ending to additional central bank tightening and an expectation of moderating inflation. Volatility subsided somewhat and individual stock selection mattered more. Questions remained, however, on the economic outlook and how much the US Federal Reserve (Fed) tightening cycle will dampen activity. While macroeconomic concerns abated somewhat compared to 2022, an uncertain outlook lingered. Late in the period, markets fell sharply as jitters returned. Some economic data and a U.S. government budget battle also did not assuage the lingering market fears about the economic outlook.

While the strength in technology stocks generally helped the portfolio, it had a smaller exposure to high-flying AI related stocks or to mega-caps, which were particularly strong. We think in many cases the enthusiasm over these stocks ignored the uncertainty that AI brings, and hype overtook prudence as a market driver.

Policy Review

The fund's investment process is to find highly innovative and adaptive names in a fast-changing world. Thus, it tends to do better in periods that favor growth and technology stocks. Much of the period under review reflected this environment, and the fund did well in absolute terms and relative to its benchmark. Our overweight¹ exposure to the IT sector and our positions in semiconductors in particular were helpful to performance for the year. We remain overweight in the information technology sector, including having meaningful exposure to semiconductors. While several semiconductor stocks in the portfolio saw strong performance driven by demand for AI-related chips, we also owned companies along the supply chain exposed to what we expect to be strong semiconductor content in the automotive and industrial sectors. We continue to believe that semiconductors are the foundation of the digital transformation of the global economy. While large software companies, such as Workday and Salesforce, were strong contributors, we shifted away from software modestly over concern that per-user or seat-based software companies such as these will face pressure as AI allows for reduced workforces.

Jupiter Global Equity Growth Unconstrained

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

Other sectors were less favorable. We lagged in the financial sector, in part because of our focus on financial services and away from large banks and in part due to some poor performing stocks. In particular, Adyen, a Dutch payment services company, fell sharply after reporting slower-than-expected growth and heightened competition in the North American market. Another firm in payment services, Fiserv Inc., also fell and detracted from performance. Both stocks fell in the last three months of the period, contributing meaningfully to the lagging relative performance for the year.

The fund's focus remains unchanged. The research process at NZS Capital is always guided by the unpredictability of the world around us. We see ourselves in the early stages of the analog to digital transformation for the economy, a shift driving huge waves of innovation and disruption. We think investors need to be on the right side of this change by owning companies that are driving innovation or are highly adaptive to the rapidly changing industry conditions.

Investment Outlook

Our outlook tries to look beyond the interest rate uncertainty. Longer term, we see an environment with inflation under control and interest rate hikes ending. Indeed, there are already signs of subdued inflation in the economy. We are sensitive to potential weakness in consumer spending from higher rates, but our focus remains on companies that can do well in the next phase of innovation. AI leads the way. While opportunity conflates with hype now, in the longer term, AI will bring substantial changes to the business models of many companies. The range of outcomes is wider for many companies, and we anticipate a wider bifurcation between winners and losers. Innovation paradigm shifts tend to accelerate the process of a disproportionate share of returns accruing to a narrow group of companies. While cognizant of

near-term issues, including geopolitical risks, we are excited about the longer-term opportunity for a focus on innovation and disruption.

Brad Slingerlend and Brinton Johns

Market Review

The twelve month period was characterized by a strong performance for risk assets with equities recording double digit returns, credit spreads tightening and government bond yields closing broadly higher.

Such market movements have been in sharp contrast with the initial setup for the year, with various leading macroeconomic indicators pointing towards a slowdown across many regions and signs of fragility emerging across the globe.

The period saw a continuous alternation of market narratives between hard landing and soft landing subsequently followed by the “higher for longer thesis”. Single macroeconomic data prints, especially in the US, drove meaningful market reversals, generating highly erratic trading patterns.

Data towards the end of 2022 pointed towards lower inflation, supporting risk assets as well as government bonds. Stronger macro data in February, however, generated a partial reversal. But that did not last very long, as financial stability concerns materialized in March. Stocks of regional banks in the US started to fall, which was followed by the takeover of Credit Suisse by its rival UBS. Fears of further weakness in the banking sector in the US was a key topic for a number of months, but the return of some stability was welcomed by the market with strong performance for risk assets. The debt ceiling saga generated some brief hiccup going into summer, but ultimately an extension deal was sealed averting a possible technical default for the US Treasury.

Jupiter Global High Yield Bond

Review of Portfolio as at 30 September 2023 *(continued)*

Market Review *(continued)*

As economic growth remained broadly resilient, central banks were in a position to continue their inflation fight, delivering additional rate hikes.

Finally, August and September were negative for the broader markets as well as fixed income. In particular, concerns over increased deficit and hence government bond supply became a key topic for markets. At the same time resilient growth in the US fuelled the discussion over a potential higher long-term neutral level for interest rates.

Policy Review

During the period the strategy managed to meaningfully outperform vs the benchmark. The performance differential came mostly from the following contributors/detractors:

Positive contributors

- Underweight exposure to interest rates;
- Overweight and security selection in the healthcare sector;
- Overweight and security selection in the materials sector;
- Security selection in the energy sector;
- Overweight to financials.

Negative contributors

- Security selection in financials;
- Security selection in the real estate sector;
- Underweight to consumer discretionary;
- Security selection in consumer staples;
- Underweight to telecommunication.

Since the end of 2021, the fund has been progressively neutralising its underweight duration (a measure of a bond price's sensitivity to changes in interest rates) position relative to benchmark as interest rates have risen. We are now marginally underweight (-0.4 years) vs our benchmark after ending 2021 at two years underweight. Fund credit exposure remained highly tactical towards the end of the review period: we are generally cautious about credit spreads (which have tightened very significantly since mid 2022) but are still finding enough high conviction credit opportunities to offer materially higher yield and spread vs benchmark. From a rating standpoint we are roughly neutral on CCCs and carry an overweight exposure to Bs, paired with an

off-benchmark exposure in AA US Treasuries (after the downgrade from Fitch we now classify US Treasuries as AAs) and AAA corporates, to be seen as a hedge to portfolio credit risk but also as potential dry powder.

Investment Outlook

Over the course 2023, we had a stealth bull market in high yield. Credit spreads tightened and high yield performed well. Investors have been increasingly relaxed about recession risk – many have bought into the “soft landing” narrative – believing that central banks can perfectly land the plane.

Our view is that the market may be too complacent about the well-publicised lag effects of monetary policy: interest rate hikes are a powerful tool but they only percolate through the global economy slowly, causing more and more damage as governments, businesses and consumers progressively have to refinance their debt. The huge amount of monetary tightening by the central banks over the last year is only now hitting consumers and businesses and we're likely to have a recession, potentially very soon. Default rates will increase, and there will be greater volatility in the high yield market – dispersion in performance among issuers and sectors – that disciplined active managers can take advantage of. The yields on offer in high yield are indeed high relative to history, and they offer the potential for attractive future returns, but in this environment selectivity will be even more important to avoid the weaker names.

We think it makes sense for high yield investors to be more cautious today in portfolio construction: such as owning more lower-risk bonds and keeping higher cash balances to provide a risk hedge as well as dry powder that can be used to take advantage of selloffs and dispersion in the market.

Nevertheless, the current market also offers opportunities to own bonds that already price a relatively weak economic environment.

Market Review

The twelve month period was characterized by a strong performance for risk assets with equities recording double digit returns, credit spreads tightening and government bond yields closing broadly higher.

Such market movements have been in sharp contrast with the initial setup for the year, with various leading macroeconomic indicators pointing towards a slowdown across many regions and signs of fragility emerging across the globe.

The period saw a continuous alternation of market narratives between hard landing and soft landing subsequently followed by the “higher for longer thesis”. Single macroeconomic data prints, especially in the US, drove meaningful market reversals, generating highly erratic trading patterns.

Data towards the end of 2022 pointed towards lower inflation, supporting risk assets as well as government bonds. Stronger macro data in February, however, generated a partial reversal. But that did not last very long, as financial stability concerns materialized in March. Stocks of regional banks in the US started to fall, which was followed by the takeover of Credit Suisse by its rival UBS. Fears of further weakness in the banking sector in the US was a key topic for a number of months, but the return of some stability was welcomed by the market with strong

performance for risk assets. The debt ceiling saga generated some brief hiccup going into summer, but ultimately an extension deal was sealed averting a possible technical default for the US Treasury.

As economic growth remained broadly resilient, central banks were in a position to continue their inflation fight, delivering additional rate hikes.

Finally, August and September were negative for the broader markets as well as fixed income. In particular, concerns over increased deficit and hence government bond supply became a key topic for markets. At the same time resilient growth in the US fuelled the discussion over a potential higher long-term neutral level for interest rates.

Policy Review

During the period under review the strategy managed to deliver strong positive returns, outperforming the government bond market, as represented by the comparator benchmark and the Morningstar Global Bond (USD Hedged) category.

Absolute performance mainly came from the following contributors and detractors:

Contributors

- Exposure to emerging markets rates in the following countries: Chile, S. Korea, Hungary, Poland, Colombia, Peru, Thailand, Romania, Brazil and Mexico.

Jupiter Global Sovereign Opportunities

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

- Exposure to developed markets rates in the Eurozone and in the UK (short).
- Exposure to credit spreads (sovereign and corporates), especially in Ukraine, Argentina, Nigeria, El Salvador, Turkey (short), Greece, Kazakhstan, Ecuador, Egypt, Tunisia, Bahamas, Angola and Sri Lanka.
- USD risk-free rate.
- FX exposure (including FX carry), especially in: Brazil, Colombia, Chile, South Korea, Eurozone (short), China (short), Thailand (short), South Africa, Hungary, Sweden (short).

Detractors

- Exposure to developed markets rates in: United States, New Zealand, Sweden, Australia.
- Exposure to emerging markets rates in: Turkey, South Africa and Egypt.
- Credit risk hedging via XOVER and CDX on subordinated financials.
- Exposure to credit spreads (sovereign and corporates) in Brazil, Italy (short), China (short), South Africa (short), Indonesia (short), Switzerland (short), India, Saudi Arabia (short), Oman (short).
- FX exposure (including carry), especially in: Japan, UK (short), Turkey, Egypt, Nigeria, Mexico (short).

Investment Outlook

Looking forward to the final quarter of 2023, our conviction on the global economic outlook has reduced: whilst we still expect a 'hard' economic landing as our base-case outcome into 2024, we assign a lower probability of this occurring in 2023 and increase the probability assigned to a 'no landing' scenario. Our expectation that 'hard' economic data in the US would deteriorate in the second half of 2023 has not yet materialised and we are now more cognisant of the unpredictability of the "long and variable lags" of monetary policy. We believe that longer-dated sovereign bonds are particularly vulnerable to the 'no landing' scenario and accordingly have changed the duration (a measure of a bond price's sensitivity to changes in interest rates) profile of the Fund in Q3 2023. We have reduced the overall Fund duration by -2.5y

and further shifted our curve exposure towards 3-5y bonds. We retain our cautious stance on 'risky' assets and have maintained the Fund's limited credit spread exposure. We have shifted our view towards expecting appreciation of the USD.

In the interest rates space, in DM, our preference is to hold duration exposure via US, UK and Sweden rates, with a preference for the 3-5y part of the yield curve. Despite continued economic strength in the US, the UK and Swedish economies have demonstrated early signs of economic weakness. In the EM space, our highest conviction exposure is to South Korean rates, given the expectation of a slowdown in credit growth and activity catalysed by rapid tightening of policy in an over-leveraged economy. We remain positive on LATAM rates, expressed primarily via Brazil (high positive real rates and early signs of deflation) and Colombia (political risk premium is exaggerated). In the credit space, our steady-state approach is to run low net credit spread exposure, with a mixture of long and short positions.

Market Review

The opening section of the period under review was characterised by an unusual degree of short-termism in markets, which started the year from a market buying risk following China's reopening and the US Federal Reserve's (Fed's) initial slowing pace of interest rate rises, to a cautious February outlook of further rate hikes. Then March saw caution as the quality of bank's loan books was once again in the spotlight; instigated with the collapse of Silicon Valley Bank and then spreading more widely to include the rescue of Credit Suisse. It's worth noting the fund does not currently have any direct exposure to US banks, as the investment team have not been able to gain comfort around visibility of loan book risk.

Notably high temperatures were recorded across South and Southeast Asia in April, while parts of Europe and North Africa experienced their own heatwave. Studies looking into such events have shown that climate change has already made such events 100 times more likely than they were in the past, adding to the importance that the world

embraces the transition to a low carbon economy. This may offer opportunities to companies able to benefit from that trend, while presenting a clear risk to those unwilling to adapt.

A major theme across the period under review was the domination of market returns by a handful of mega cap stocks, which are all believed to be beneficiaries of the opportunities in AI. Apple also became the first company to close a trading day with a market cap of over US\$3 trillion. If you strip out just those few companies, underneath it's been a volatile and challenging market. Particularly for active managers, and especially for those who don't hold these big tech names. The characteristics of the companies we invest in are defensive with long-term structural tailwinds.

As markets entered the third quarter of the calendar year, the dominant narrative converged around a 'higher for longer' outlook for interest rates.

Jupiter Global Sustainable Equities (LUX)

Review of Portfolio as at 30 September 2023 *(continued)*

Market Review *(continued)*

The possibility of further interest rate rises, the persistence of inflation and declining economic indicators, including early signs of consumer weakness combined to dampen global equity returns. The high interest rate environment, not seen since before the financial markets crash of 2008, presents a challenge for equities in the short-term, it also presents an attractive entry point for long term investors with a focus on fundamentals.

Elsewhere rising oil prices have not only put pressure on consumers' wallets, but supply constraints have also driven up the oil price (Brent was at \$92.80 at the time of writing). As a result, the energy sector was once again the only one in positive territory in the quarter.

Finally, on 1 October 2023, the Carbon Border Adjustment Mechanism (CBAM) entered into application in its transitional phase, with the first reporting period for importers 31 January 2024. It was joined in July by the PROVE IT (Provide Reliable Objective Verifiable Emissions Intensity Targets) Act in the US, which requires the Department of Energy (DOE) to study and compare the carbon emissions of carbon-intensive sectors. The US state of California recently took measures further, passing a bill in early September 2023 which will require all companies to disclose carbon emissions. Set to take effect in 2027, reporting requirements would include scope 3 emissions, which are inherently more complex to measure, though vital to understanding the full scope of a company's carbon-related impact. This is a big and bold move from the US State and is likely to set the bar for further SEC measures.

The increasing likelihood and rising onus on global reporting standards may offer opportunities to companies able to benefit from that trend, while presenting a clear risk to those unwilling to adapt.

Policy Review

The portfolio continues to focus on the long term and as a strategy of well capitalised businesses, in a tightening cycle, demonstrating strong price pass through in an inflationary environment, we consider the strategy to be relatively defensive in its positioning.

Significant headwinds for the strategy over the year under review included the strength of the energy sector, as well as the hype cycle around artificial intelligence. This latter trend, as noted above, led to overall market returns being completely dominated by a small handful of US-listed megacaps, many of which we don't own (NVIDIA, Microsoft, Meta, Apple, Alphabet). We do, however, hold Adobe – the creativity software and cloud services provider behind such applications as Photoshop – which rose strongly over the year and was by far the fund's top contributor to performance. Elsewhere in the IT space, Visa and Mastercard both rose more than the MSCI AC World Index and therefore contributed to the fund's relative returns.

On a sectoral level, areas of the market where the fund's holdings materially outperformed their peers included Industrials and Financials, with Old Dominion, a recent addition to the portfolio, and Legrand standouts from the former, and Partners Group and Amundi notable winners from the latter. Old Dominion, a US-based less-than-truckload (LTL) shipping company, was added to the portfolio in late 2022. We see clear structural cost and environmental benefits of industry moving to LTL shipping, as it can reduce the number of vehicles (and therefore fuel consumption) needed for freight transport by sharing trailer capacity across customers. It is also cost effective for customers, particularly in an inflationary environment.

On the negative side, the key detractor was the lack of exposure to certain tech names as noted above, but there was also share price weakness from Jack Henry, a tech services and payments provider, which fell as its main clients are in the financials and banking sector that came under pressure in the spring. Other negatives include healthcare companies CSL and Danaher. We continue to see preventative healthcare as a long-term structural driver of growth and believe those companies are well positioned to benefit from this trend, providing attractive economic returns and positive social multipliers.

Jupiter Global Sustainable Equities (LUX)

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook

It is our view that companies with strong balance sheets, robust cash flow generation and durable franchises should be well placed in a market environment defined by rising interest rates, persistent inflation and fragmented consumer conservatism. The team view the affordability of debt as an increasing concern for the economy, both at a consumer level and commercial. Running your savings with an aggregate interest cover of over seventy times the cover required, we view this as prudent, given current uncertainty. We anticipate continued opacity in the context of breadth and depth of recessionary fallout, with central banks committed to curbing inflation. For active investors with a long-term horizon, the current volatility presents opportunities to build positions in high quality companies at a reduced premium, affording exposure to long term structural tailwinds and a low carbon portfolio.

Market Review

For most of 2022 the consensus view was that a global recession was imminent as consumers would have to cut back on discretionary spending to cope with higher inflation. Stock markets around the world had been weak reflecting this cautious outlook. Despite the concerns, economic indicators remained surprisingly resilient and stock markets started to recover in October 2022. This created a helpful environment for value investing because cyclical investments produced better earnings than anticipated and expensive shares continued to be disproportionately impacted by higher interest rates. For the first 5 months of the period under review this environment resulted in the MSCI ACWI Value index returning 1.9% more than the benchmark. However, in March 2023, the failure of two U.S. banks caused a very sharp reversal. Many investors believed these bank failures would cause the Federal Reserve to cut interest rates sooner than previously expected. This change in expectations caused a very dramatic shift in markets and from the end of February to the end

of June 2023 the MSCI ACWI value index returned 6.7% less than the benchmark. At the time of writing the events which might have caused the Federal Reserve to cut interest rates (a banking crisis or a recession) have yet to materialise. We saw a modest reversal of the extreme underperformance of value in the final quarter of the year but over the full 12 months the MSCI ACWI value index still finished 3.5% behind the benchmark.

Policy Review

The fund outperformed the benchmark during the period under review despite the headwind from the underperformance of the investment style.

Despite the problems in the banking sector several of our best performing shares were banks. The largest contributor to relative performance was AIB, the Irish retail bank but we also benefited from the strong performance of Standard Chartered and Banco do Brazil. All are beneficiaries of rising interest rates. We fully sold our position in AIB but have retained positions in the other banks which we believe still trade at a substantial discount to intrinsic value.

Jupiter Global Value

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

Kyndryl, an IT services company spun out of IBM, generated good returns. The stock market had been sceptical above its ability to generate profits as an independent company but during the year it made several announcements pointing towards earlier and higher levels of profitability than expected. We still think the shares are good value if management can come anywhere close to the targets they have set. We also had a strong recovery in several shares where the valuations had fallen over worries of a global recession. Continental (tyres and car parts), Vitesco (car parts) and Covestro (chemicals) all recovered sharply with Covestro also receiving a preliminary takeover approach although no offer has yet been tabled to shareholders.

On the negative side the biggest detractor from performance was Sally Beauty Holdings, a US listed retailer and distributor of beauty products. The shares have been extremely weak as the market is worried about the outlook for the US consumer. We think the stock market is being overly harsh: the company is on track to meet all financial guidance but is trading on a P/E ratio of less than 5x on consensus earnings forecasts. We topped up the position during the year. Our position in Nokia was also very weak. The networking industry is going into a downturn following the completion of the 5G rollout in the U.S. We think the valuation is extremely low and does not give Nokia any credit for its market positions or its strong balance sheet. Japan Post Holdings detracted from performance, and we fully sold our shares in the company after disappointing full year results. Our primary concern was that although they had sold shares in a subsidiary worth around 30% of the market cap, they announced a share buyback worth only 7.5% of the market cap and held the dividend flat. The business trades on a steep discount to the sum of the parts but this now seems justified if the cash will never be returned to shareholders.

During the period we established new positions in Dassault Aviation (defence), Samsung (semi-conductors and consumer electronics), LG H&H (beauty, homecare and soft drinks) Paramount Group (commercial real estate), Barclays (banking) and SES (satellite network provider). We sold our entire positions in M Dias Branco, AIB, Aviva and Kingfisher.

Investment Outlook

Our view remains that the best predictor of future equity returns is valuation. The 10-year average P/E ratio of the US market remains extremely elevated on 29.3x. This suggests that future returns from the US stock market are likely to be below average. However, most other major stock markets are much more reasonably valued: Japan trades on 22.4x, Europe on 19.3x and the UK on just 15.6x. The fund in aggregate trades on a 10-year average P/E ratio of <10x. Importantly this low valuation has been achieved without taking any balance sheet risk and without concentrating the fund in any one particular industry or region. This makes us very optimistic about future returns, both on a relative and an absolute basis.

Market Review

The Indian equity market performed strongly over the past twelve months, as a powerful rally in the summer of 2023 more than compensated for a brief correction seen in the first quarter, which had been driven both by falling risk appetite among global investors and a much-hyped short-seller report in February against the Adani Group of companies. In May, an expert committee appointed by India's Supreme Court delivered an investigatory report on this matter, whose conclusions reassured investors, clearing the way for the market to move upwards, as stock prices began to catch up with the healthy momentum in corporate earnings growth. Macro data continued to surprise positively, with India's composite Purchasing Managers' Index (PMI) reaching a 13-year high in July 2023. Figures for the June quarter show GDP growth of 7.8% year-on-year, with the figure for this financial year expected to come in comfortably above 6%, making India one of the fastest growing large economies in the world.

Policy Review

The fund's holdings in Godfrey Philips, Olectra Greentech, BSE, and public sector banks, Bank of Baroda, State Bank of India and Canara Bank, all contributed positively to performance during the period.

Godfrey Philips, a core, long-term holding in the fund, performed strongly during the period, with the stock appreciating +89% after reporting impressive +78% year-over-year earnings growth. Electric bus manufacturer, Olectra Greentech, also performed strongly after the announcement of a number of large orders. BSE, the owner of the Bombay Stock Exchange, saw its share price more than doubled during the period as investors began to appreciate the revenue growth potential of the recently relaunched equity derivatives business. Our public sector banks, Bank of Baroda, State Bank of India, and Canara Bank also performed strongly. These names were trading on extremely depressed valuations in 2021, in some cases below book value, as investors feared that the pandemic could negatively affect asset quality. As the pandemic abated and lockdowns were eased, it became clear that the magnitude of provisions was far smaller than many had expected, leading to positive earnings surprises that drove share price performance.

While relative performance was overall very strong, there were a few negative contributors, such as Patanjali foods, which suffered a margin squeeze due to higher input prices, and our relatively low exposure to automakers also proved a headwind, as this sector outperformed the broader market.

Jupiter India Select

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook

India has attracted increasing interest from foreign investors in recent months, as the positive effects of reforms made over the last decade – temporarily masked by the disruptions of the pandemic years – become increasingly apparent in the continuing flow of positive economic data and corporate earnings. India has always been a land of immense potential due to its favourable demographics and solid democratic institutions, and this potential is now being realised to a far greater extent than before, thanks to the enabling effect of improved governance and technological progress. Taxes on business have been reduced and simplified, and the roll-out of government digital identification and payment infrastructure (as part of a very comprehensive digital public infrastructure) has massively simplified the process of bringing people into the formal economy as taxpayers, borrowers, and investors – fuelling a virtuous cycle of improved tax collection that funds investment in the infrastructure needed to enable faster economic growth.

India is seeing significant productivity gains from urbanisation, as workers move from agriculture towards higher paid jobs in manufacturing or services, swelling the ranks of India's middle classes. The IT services sector has been a particular success story, helping to drive demand elsewhere in the economy. Over the next decade India's workforce is predicted to grow by 10%, with the number of households earning more than USD 10,000 forecast to increase 2.5-fold to 191 million. Currently the fifth largest economy in the world, India is expected to overtake Germany and Japan to become the third-largest economy during the course of the next ten years. This will create unparalleled opportunities for local companies to grow their earnings as they seek to meet the needs of increasingly affluent Indian consumers.

India is also seeing increased investment in manufacturing as multinational companies seek to diversify supply chains that had become overly dependent on China. The strict lockdown policies that were enacted there during the pandemic, along with the geopolitical tensions surrounding Taiwan, have

encouraged efforts to build capacity in alternative locations. As the lowest-cost manufacturing destination in Asia, India stands to benefit immensely from this shift. CEIC, an analysis firm, predicts that India's manufacturing will triple by 2032 to reach USD 1.5 trillion. The Indian government continues to support both domestic and international investors through their "Make in India" programme, which provides production-linked incentives to build new factories.

In the short-term, we should be aware of the expensive valuation of the benchmark index, relative to its history, the current geopolitical situation causing an increase in commodity prices and shipping costs and the unprecedented velocity of increase in US and global interest rates. All of these factors can cause the equity valuations to correct in the short term.

However, in our view, the long-term outlook for India is very bright – the reforms of the last decade have put it in a very strong position to benefit from a changing geopolitical landscape in which it is becoming a favoured destination for investment flows. The unique combination of demographic shifts and government reforms, combined with very favourable outlooks for the technology, financial and manufacturing sectors are an exciting prospect for the nation and for investors. Domestic investors continue to pour money into local equity markets at an unprecedented rate, via long term Systematic Investment Plans and pension schemes and life insurance policies. Yet its stock market remains relatively under-explored by foreign investors, with non-dedicated funds accounting for the vast majority of assets. There are approximately 6,000 listed companies in India, many of which are below the radar of funds for whom India is only one of many markets they look at. As India specialists with experience stretching back almost three decades, our approach identifies under-priced growth opportunities that can create superior returns for investors over the longer term.

Market Review

At the start of the period under review, in late 2022, the Japanese yen strengthened following a long period of weakness in anticipation that the trajectory of Japanese interest rates might finally turn upwards in early 2023. In actual fact, the Bank of Japan (BoJ) tweaked monetary policy slightly tighter in December – sooner than expected – by increasing the upper band on 10-year Japanese government bond yields from 0.25% to 0.5%. This theme of the BoJ catching markets off guard would be a surprising theme to the year.

It is surely no coincidence that this shift in central bank policy followed the appointment of Kazuo Ueda as the BoJ's Governor. In a departure from tradition, Ueda is the first academic Governor of the BoJ of the post-war period and perhaps this partly accounts from the break with policy orthodoxy in July, when the BoJ said it would amend its policy of 'yield curve control' by continuing to allow 10-year Japanese government bond (JGB) yields to fluctuate in a range of 0.5% above or below zero, but purchasing 10-year JGBs with yields of up to 1% through fixed-rate operations. In theory this adds an additional 50 basis points to the permitted yield range, which might not sound significant on paper, but marked a significant change in tone from a

previously very cautious central bank. More analysis on this move, and our opinion of it, can be found in the Outlook section below.

Moving on from the actions of central banks, the period was undoubtedly a strong one for Japanese equities in local currency terms with a confluence of factors helping to drive the market. These ranged from expectations for an end to Japan's deflation, the Tokyo Stock Exchange calling for firms trading below book value to address the issue, significant buying from foreign investors including Warren Buffet, an easing of concerns about a US economic downturn, and the Japanese yen depreciating against the US dollar.

Other features of the period under review included fresh signs of life in the Japanese IPO market, as more new companies start to be listed on the stock exchange. Inevitably, the quality of these new entrants is mixed (as has been their early reception by the market) but it is encouraging to a broadening out of the opportunity set available to Japanese equity investors. Lastly, there has been increasing evidence of the theme of 'friendshoring' – fixed capital investment in friendly and stable regions like Japan in preference to cheaper but more politically contentious countries like China. For example, having already committed to subsidies for a joint TSMC-Sony

Jupiter Japan Select

Review of Portfolio as at 30 September 2023 *(continued)*

Market Review *(continued)*

semiconductor fab in Kyushu, the Japanese government announced that it would provide up to \$1.3bn to US chipmaker Micron to subsidise the construction of a new facility in Hiroshima prefecture. Meanwhile, a different manifestation of the same trend could be seen in Mitsubishi Motors' announcement that it would dissolve its JV and cease production in China.

Performance Review

On a stock level, the top performing position in the fund over the year under review was Socionext. The company, which designs, develops and provides system-on-chip solutions for industrial and automotive applications, benefited from the ripple effect of artificial intelligence (AI) related bullishness around the globe.

Elsewhere, leading digital infrastructure and Japanese IT blue chip NEC delivered both better than expected full-year numbers and issued consensus beating forward guidance whilst global leading insurer and our only exposure to this sector, Tokio Marine, issued a new mid-term plan where it discussed better domestic growth potential coupled with an already attractive overseas expansion plan, placing the business extremely attractively against more richly valued global peers. Lastly, playing into the thematic of ongoing shareholder returns and the push for greater capital efficiency, civil engineering company Hazama Ando positively supported the fund's performance.

In terms of negative contributions, size appears to have been a factor with a number of the fund's small and mid-cap companies failing to attract investor attention as the market continued to rise. Outsourcing company Direct Marketing MiX is an especially notable one to us, where we see no fundamental cause for the shares to have fallen, other than it simply being a smaller company.

Lastly, negative contributions came from Katitas, Visional, Asahi Kasei, and Roland, a world leader in the manufacture of electronic musical instruments

for which growth has slowed following the pandemic stay-at-home boom, and as consumers tighten their belts.

Investment Outlook

Who, or rather what, is Kazuo Ueda? A policy genius, delicately balancing the many needs and wants of the Japanese economy? Or a choker overwhelmed by the job nobody else wanted – as Governor of the Bank of Japan – who has fluffed his big moment? History will decide, but the July decision by the BoJ to tweak its yield curve control policy has investors wondering why such a tweak was made, and what it might mean for monetary conditions from here.

Until July, BoJ policy had been to forcibly contain the yield on 10-year Japanese government debt to a range of 0.5% above or below zero. To keep yields in check as persistent global inflation led other central banks to hike rates, the Bank of Japan was forced to buy its own government debt in size – to the tune of almost 16% of GDP in the eight months to July. With well over half of all JGBs held by the Bank of Japan, the very idea of there being a market for JGBs was being called into question.¹ As mentioned above, in its July meeting the BoJ said it would continue to allow 10-year Japanese government bond yields to fluctuate in the previous range around zero, but that it would purchase 10-year JGBs with yields of 1% through fixed-rate operations. This effectively adds an additional 50 basis points to the permitted yield range, although exactly in what circumstances the BoJ might intervene if yields are between 0.5%-1.0% remains unclear.

Ueda's critics wail that this injection of 'will he, won't he?' uncertainty about intervention in the 0.5% and 1% yield range is unhelpful. At best it shows indecision, they say, while at worst it is a sign that Ueda – who has spoken before about the importance of clear guidance – speaks with a forked tongue.² To us, this seems harsh.

Jupiter Japan Select

Review of Portfolio as at 30 September 2023 *(continued)*

Investment Outlook *(continued)*

It has long been our hunch that the BoJ would tread the line of monetary normalisation very carefully. As a mature economy with an increasingly mature population, consumption is fragile and trend economic growth moderate at best. No central banker wants to crash their economy, but it is understandable that the Japanese seem particularly sensitive to the risk. Inflation, though high in a Japanese context is unexceptional when compared to other developed markets, at least at their peaks. Deflation – which the Bank fought so hard to escape – is a recent memory in Japan, so nobody should be surprised that its central bankers are unenthusiastic inflation fighters.

In that context, it is surely relevant that the BoJ's official inflation forecasts now show a return to the 2% target by 2024 and dipping below it thereafter. Just how literally this should be taken is debatable, however.³

With almost ¥1 quadrillion (\$13tn) of outstanding debt – some 260% of GDP – the Japanese government is surely reluctant to see bond yields move too far or fast. This year, debt servicing will eat up 22% of the government's ¥114tn (\$800bn) national budget.⁴ Ueda will receive little thanks from the Prime Minister's office if he invites more financial stress or imperils the country's single-A credit rating. It seems more likely that the BoJ sees inflation not as a threat, but an opportunity – one to curtail its distortions on the bond market; to normalise policy.

To us, the BoJ policy tweak seems sensible and well-thought out rather than a policy blooper. We have little foresight of BoJ action from here, but the moderate nature of the recent move did not surprise us and so further measured normalisation seems most likely. That said, shocks in either direction are possible and so our positioning is designed to minimise monetary conditions as a factor, rather than to play them. Consensus has coalesced around some kind of normalisation though, and this is probably a good thing.

When the BoJ pushed too far into abnormality early in 2016 it was taken badly, and so a gradual shift more a regular monetary regime should be seen as a vote of confidence and could be good rather than bad for stocks. Banks are the obvious beneficiaries of higher rates, but investors should beware not to get carried away – the sector has some problems which will not be fixed by the central bank. Gearing too should be on investors' minds – low rates and minimal levels of overall net debt have been a feature of Japan, but there are pockets of potential stress which would be wise to be avoided.

Market Review

The period began with global risk assets under pressure as market concerns ramped up around persistent inflation, high energy prices and supply disruption from Russia, and recession risk. European equities rebounded toward the end of 2022 as inflation readings were lower than expected. Both the US Federal Reserve (Fed) and the European Central Bank (ECB) stepped down the size of their hikes in December, but both remained hawkish.

The new year brought further gains for equity markets, with easing inflation and hopes that peak central bank rates were near. Authorities in China began easing Covid restrictions. Volatility returned to markets with the collapse of three US regional banks followed by Swiss authorities forcing the sale of troubled Credit Suisse to its stronger peer UBS.

Markets rallied again as financial contagion risk fears subsided. While headline inflation continued to ease, underlying inflation remained elevated in many developed markets. China's economic recovery from lockdown was slower than expected. The ECB raised rates to a record in September. Economic data showed a slowdown in manufacturing in the euro-area. Global equity markets fell in the third quarter of 2023 on a range of concerns including that central banks will keep rates higher for longer. European smaller companies have seen weaker performance

than their large-cap peers over the last year, meaning that European smaller companies' shares are now trading at a discount to large caps shares versus the historic premium of above 15%.

Policy Review

The fund's holdings are typically, high-quality growth businesses whose earnings are geared to long-term growth trends rather than near-term economic activity. The fund focuses on companies that have sustainable competitive advantages and avoids companies that operate in highly commoditised sectors and business models.

Among the top contributors to fund performance in the period under review were Elis, Gerresheimer, VAT Group, and Comet. The underperformers for the fund included Allfunds, Azelis, Tryg and Temenos.

The fund added several new holdings in the period: Rotork provides mission critical flow-control products and systems to several key markets, such as water and power, oil and gas, industrial and chemicals; Fortnox, a Swedish accounting software provider for small businesses that has developed a dominant position in the market; Rational, a leader in steam combi ovens with a c. 50% market share in the premium end oven market; and global lubricant supplier, Fuchs.

Jupiter Pan European Smaller Companies

Review of Portfolio as at 30 September 2023 *(continued)*

Policy Review *(continued)*

The fund also started a position in Burckhardt Compression, which provides compressor technology and systems. The company is a beneficiary of the energy transition, with their compressors useful within hydrogen infrastructure and with a servicing business providing steady cashflow.

Most recently the fund participated in the IPO for Schott Pharma at the end of September. The company provide packaging products that are used to contain and deliver injectable pharmaceuticals. We believe that the business has attractive market positions, with opportunities for growth and sticky customer relationships.

The fund sold its holdings in GVS and Temenos to fund higher conviction ideas. Somfy was sold after the family, which had a controlling stake, bid to take the company private.

Investment Outlook

Risk assets face a range of macroeconomic and geopolitical challenges. Markets are worried about the risk of recession, persistent Inflation and whether the Fed and ECB will keep rates higher for longer. Eurozone economic data has been soft, Russia's invasion of Ukraine grinds on, causing human, economic and geopolitical damage and China's economic data has been mixed since its emergence from Covid lockdowns.

The fund aims to acquire great companies including focused owner-manager businesses, regional or global leaders in niche markets, and hidden gems such as underappreciated or under-researched companies. We continue to focus on businesses that have the potential to consistently create significant value for shareholders over the long term regardless of short-term headwinds.

Volatility and weakness in the European smaller companies investment universe has given us the opportunity to add new quality businesses to the portfolio at attractive valuations. We seek to buy and hold companies with sustainable competitive

advantages that are exposed to long-term structural growth drivers. We believe that the strength of these businesses make them well positioned to navigate the current macroeconomic environment. Over the long term we expect these companies to materially outperform the broader market.

Notes to the Financial Statements

1. General Information

The Jupiter Global Fund (the 'Company') is an open-ended investment company which qualifies as an undertaking for collective investment in transferable securities (UCITS) under part I of the law of 17 December 2010 (as amended) regarding undertakings for collective investment. The Company was incorporated in Luxembourg as a *société d'investissement à capital variable (SICAV)* on 22 September 2005 for an unlimited duration.

The Company may issue multiple classes of Shares in several funds (the 'Funds'). A separate pool of assets and liabilities is maintained for each Fund and is invested in accordance with the investment objective applicable to the relevant Fund. All liabilities attributable to a particular Fund are binding solely upon that Fund.

As at 30 September 2023 the Company was comprised of the following Funds with the following Share Classes in issue:

Fund	Share Class											
Jupiter Dynamic Bond	A	C	D	-	I	L	N	-	-	-	-	Y

Institutional Only	Retail Only	Either
G, I, U1, U2, U3, X & Y	Z	A, C, D, E, L, N, S & T

Full details of Share Class features disclosed in the prospectus.

The Share Class names reflect the specifications of each Class, including their respective (i) categories (A, C, D, E, G, I, L, N, S, T, U1, U2, U3, X, Y or Z), (ii) reference currencies, (iii) distribution policies (accumulation or distribution of income) and if the latter case, the frequency thereof, i.e. annually ('A Inc'), quarterly ('Q Inc') or monthly ('M Inc') and (iv) hedging status (Hedged Share Class (HSC) or Portfolio Hedged Share Class (PHSC)).

For example:

- Share Class L EUR A Inc Dist distributes income annually with payment (no automatic reinvestment by default).
- Share Class D USD Acc HSC is a non-distributing hedged Share Class.
- Share Class L GBP Q Inc HSC is a hedged class distributing income quarterly.

For more information please refer to the Key Features section of the prospectus under the sub-heading Share Classes and Features.

Notes to the Financial Statements

2. Summary of Significant Accounting Policies

a) Basis of preparation

The financial statements have been prepared in conformity with Luxembourg generally accepted accounting principles applicable to investment funds. The financial statements have been prepared on a going concern basis, with the exception of Jupiter Flexible Income and Jupiter Flexible Macro (LUX) Funds which closed on 21 October 2022, Jupiter Global Ecology Bond and Jupiter Global Ecology Diversified which closed on 6 April 2023 and Jupiter Asia Pacific Income Fund which closed on 17 May 2023.

b) Financial Statements

Financial statements are presented for each Fund in the base currency of the Fund, the combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets of the Company are presented in Euro (EUR), based on the exchange rate ruling at the date of these financial statements.

The net asset values have been calculated by reference to the valuation day which might differ from their value on a dealing day. The financial statements presented in this report have been prepared on the basis of the latest calculated net asset values in the year.

The difference between opening Net Assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as a 'Foreign currency translation difference' in the Statement of Operations and Changes in Net Assets.

c) Foreign currency translation

Assets and liabilities denominated in currencies other than a Fund's base currency are translated into that base currency at exchange rates ruling at the date of these financial statements. Transactions occurring during the year in currencies other than the base currency are translated at rates of exchange ruling on the transaction dates. Differences arising on translation are included in the Statement of Operations and Changes in Net Assets.

d) Investments

Securities are initially recognised at cost, being the fair value of the consideration given.

Securities listed on an official stock exchange or dealt in on any regulated market are valued at the last available price at the company's valuation point.

Open-ended funds and Closed-ended funds are valued at their last available price. Wherever practicable, the last available Net Asset Value is deemed to include the Net Asset Value calculated on the same Valuation day for any underlying fund which itself has a valuation point at or before the Company's Valuation Point being 1pm Luxembourg time.

In the event that any of the securities held by a Fund on the relevant day are not listed on any stock exchange or dealt in on any regulated market or if, with respect to securities listed on any stock exchange or dealt in on any other regulated market, the basis of the price as determined above is not representative of the fair market value of the relevant securities, the value of such securities will be determined based on the reasonably foreseeable sales price determined prudently and in good faith, as delegated by the Board of Directors of the Company to Jupiter Asset Management International S.A..

Notes to the Financial Statements

2. Summary of Significant Accounting Policies *(continued)*

d) Investments *(continued)*

Fund	Fund Currency	Number of Fair Valued Assets	Holding	Market Value	% of Net Assets
Jupiter Dynamic Bond	EUR	26	2,217,386,003	7,822,510	0.13
Jupiter Dynamic Bond ESG	EUR	1	7,697	-	-
Jupiter Financial Innovation	EUR	1	22,943	93,839	0.20
Jupiter India Select	USD	1	50,000	-	-

Gains or losses arising on the disposal of investments are calculated by reference to the first-in-first-out (FIFO) methodology.

All purchases and sales of securities are recognised on the trade date, i.e. the date the Fund commits to purchase or sell the security to the Investment Funds.

e) Contracts for difference

Contracts for difference are valued using the local daily price of the underlying listed equity then converted into the currency of the relevant Fund. The unrealised gain/(loss) on contracts for difference is included in the Statement of Net Assets as 'Unrealised gain on contracts for difference' or 'Unrealised loss on contracts for difference'. Contracts for difference are reset at month end after the Valuation Point.

Dividends on contracts for difference on underlying securities of contracts for difference are included in the Statement of Net Assets in 'Dividends receivable' for long positions and in 'Dividends payable' for short positions. Interest calculated on contracts for difference is included in the Statement of Net Assets in 'Interest receivable' for short positions and in 'Interest payable' for long positions.

f) Credit default swap contracts

A credit default swap contracts ('CDS') is a transaction in which two parties enter into an agreement, whereby the buyer pays the seller a periodic payment for the specified life of the agreement. The seller makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event does occur, the seller will then make a payment to the buyer, and the swap contract will terminate.

CDS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/(loss) on credit default swap contracts is included in the Statement of Net Assets as 'Unrealised gain on swap contracts' or 'Unrealised loss on swap contracts'.

The notional amount represents the highest potential liability of a contract and is not shown in the Statement of Net Assets.

g) Interest Rate Swap Contracts

An interest rate swap contract ('IRS') is a bilateral agreement in which each of the parties agree to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

The unrealised gain/(loss) on interest rate swap contracts is included in the Statement of Net Assets as 'Unrealised gain on swap contracts' or 'Unrealised loss on swap contracts'.

Notes to the Financial Statements

2. Summary of Significant Accounting Policies *(continued)*

h) Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time before maturity.

The value of options which are listed on any official stock exchange or dealt in on any Regulated Market are valued at the last available price at the company's valuation point.

Over-The-Counter ('OTC') options are valued using the Black-Scholes model. Options are valued by reference to the expected future cash flow based on the market implied performance, spot level and the volatility of the underlying asset(s).

The Company may purchase and sell put and call options through regulated exchanges and OTC markets. Options purchased by the Company provide the Company with the opportunity to purchase (call options) or sell (put options) the underlying asset at an agreed-upon value either on or before the expiration of the option. The Company is exposed to credit risk on purchased options only to the extent of their carrying amount, which is their market value.

i) Forward currency exchange contracts

The Company may enter into forward currency exchange contracts to hedge against exposures to foreign currency fluctuations. The carrying value of these contracts is the gain or loss that would be realised if the position was closed out on the valuation date, and is included in the Statement of Net Assets as 'Unrealised gain on forward currency exchange contracts' and 'Unrealised loss on forward currency exchange contracts'. Upon the closing of the contract, the gain or loss is recorded in the 'Net realised gain/(loss) on forward currency exchange contracts'.

j) Financial future contracts

Regulated financial future contracts are valued at the exchange quoted settlement price. Initial margin deposits are made upon entering into the contracts and can be either in cash or securities. During the year the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by 'marking-to-market' on a daily basis to reflect the market value of the contracts at the end of each business day's trading. The unrealised gain/(loss) on financial future contracts is included in the Statement of Net Assets as 'Unrealised gain on financial future contracts' or 'Unrealised loss on financial future contracts'. Variation margin payments are made or received, depending upon whether losses or gains are incurred. When a contract is closed, the Company records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract.

k) Income recognition

Bonds may be purchased at a discount or at a premium. Such discount or premium is amortised over the life of the bond using straight line amortisation. Amortisation is recorded as part of interest income included in 'Interest income from investments, net of withholding taxes' in the Statement of Operations and Changes in Net Assets.

Interest income is recognised as the interest accrues unless collectability is in doubt.

Dividend income is recognised when the right to receive the dividend is established.

Income is presented net of withholding taxes in the Statement of Operations and Changes in Net Assets.

Notes to the Financial Statements

2. Summary of Significant Accounting Policies *(continued)*

l) Expense recognition

Expenses are accounted for on an accrual basis. Expenses are charged to the Statement of Operations and Changes in Net Assets except for expenses incurred on the acquisition of an investment which are included within the cost of that investment and expenses arising on the disposal of investments, which are deducted from the disposal proceeds.

m) Dividend distributions payable

Dividend distributions payable by the Company are recorded on the ex-date.

n) Net Asset Value per Share

The Net Asset Value per Share is calculated by dividing the Net Assets of the relevant Class of Shares in a Fund included in the Statement of Net Assets by the number of Shares of the relevant Class in that Fund in issue at the year end.

o) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates.

3. Exchange rate

The exchange rate used for the financial statements as at 30 September 2023 is as follows:

Currency	Rate
EUR = 1	
USD	1.06110

Notes to the Financial Statements

4. Investment Management

The Management Company appointed Jupiter Asset Management Limited ('JAML') as Investment Manager to provide certain administrative and management services.

The Investment Management Fee is calculated and accrued per Fund on the basis of the daily Net Asset Value of each Fund and is payable monthly in arrears. The fee rates per annum charged and applicable to each Class of Shares during the year ended 30 September 2023 are as follows:

Fund	A %	C %	D %	E %	G %	I %	L %	N %

¹ Fund liquidated on 17 May 2023.

² Fund liquidated on 21 October 2022.

³ Fund liquidated on 6 April 2023.

Where a Fund invests in other funds managed by the same Investment Manager, the Fund will not be subject to additional management fees. These related management fee reimbursements are included in 'Management fee rebates' in the Statement of Operations and Changes in Net Assets and amounted to EUR 701,564 for the year ended 30 September 2023 as follows:

Fund	Fund Currency	Amount
Jupiter Dynamic Bond	EUR	701,564

Where a Feeder Fund invests in a Master Fund managed by the same Investment Manager, the management fees are charged at the Feeder Fund level only.

None of the Funds are entitled to accrue a performance fee on any of the Classes of Shares.

Notes to the Financial Statements

5. Aggregate Operating Fee

To seek to protect the Shareholders from fluctuations in ordinary operating expenses, the Company shall pay to the Management Company a fixed level of fee (the 'Aggregate Operating Fee'), which will be determined as an annual percentage of the Net Asset Value of the Class of Shares for each Fund, and the Management Company will be responsible for paying all of the ordinary fees and expenses out of the Aggregate Operating Fee received by it, including (but not limited to) the following:

- Management Company fees and expenses;
- Depository, fund accounting, custody, transfer agency and fiduciary fees payable to Citibank Europe plc, Luxembourg Branch. The depository fee consists of safekeeping, administration and transaction charges;
- Set up costs incurred in connection with the launch of a new Fund;
- Costs of operating special purpose subsidiaries;
- Any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agencies or stock exchanges in the Grand Duchy of Luxembourg and in any other country together with associated support fees;
- Paying agent fees;
- Dividend/income distribution fees;
- Costs of agents employed by the Company, Correspondents and permanent representatives in places of registration;
- Financial and regulatory reporting costs;
- Governmental charges, taxes and duties;
- Costs related to the preparation and filing of tax or other reports in respect of the operations of the Company or its Shareholders;
- Costs related to the preparation and publication of data, literature and shareholder communications, including the costs of preparing, printing and distributing prospectuses, Key Investor Information Documents ('KIIDs'), Key Facts Statements ('KFSs') (for Hong Kong investors), explanatory memoranda, yearical reports or registration statements, and the costs of any reports to Shareholders;
- Directors' remuneration, their insurance coverage and reasonable travelling costs and out-of-pocket expenses in connection with board meetings;
- Legal fees; and
- Audit fees.

Save for the payment of the Aggregate Operating Fee, the Company shall have no obligation with respect to the ordinary operating expenses.

The Aggregate Operating Fee will accrue on a daily basis. The application of the Aggregate Operating Fee against capital or income is fund specific and further details are published in the Company's prospectus which is available at www.jupiteram.com. The Aggregate Operating Fee is accrued at each calculation of the Net Asset Value and is disclosed in the relevant KIIDs and (for Hong Kong Investors) KFSs from time to time by comprising part of the ongoing charges of a Share Class.

Notes to the Financial Statements

5. Aggregate Operating Fee (continued)

The Aggregate Operating Fee is calculated and accrued per Fund on the basis of the daily Net Asset Value of each Fund at each Valuation Point and is payable monthly. The fee rates per annum charged and applicable to each Class of Shares during the year ended 30 September 2023 are as follows:

Fund	A %	C %	D %	E %	G %	I %	L %	N %
Jupiter Asia Pacific Income ¹	0.22	0.20	0.20	–	–	0.16	0.22	0.22

¹ Fund liquidated on 17 May 2023.

² Fund liquidated on 21 October 2022.

³ Fund liquidated on 6 April 2023.

Further details of the Aggregate Operating Fee are published in the Company's prospectus which is available at www.jupiteram.com.

6. Management Company Responsibilities

Jupiter Asset Management International S.A. ('JAMI') is appointed as the Management Company.

The list of the funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company may market the Shares directly to investors and may enter into agreements to appoint distributors to act as intermediaries or nominees for investors subscribing for Shares through their facilities. The Management Company has also entered into a distribution agreement with Jupiter Asset Management Limited.

Notes to the Financial Statements

6. Management Company Responsibilities *(continued)*

The Management Company has delegated its investment management functions to Jupiter Asset Management Limited, the Investment Manager.

In the context of its administration functions, the Management Company has delegated its administration functions to Citibank Europe plc, Luxembourg Branch, the Administrator.

In the context of its marketing function, the Management Company may enter into agreements with Distributors pursuant to which the Distributors agree to act as intermediaries or nominees for investors subscribing for Shares through their facilities.

The Management Company will monitor on a continual basis the activities of the delegates. The agreements entered into between the Management Company and the relevant third parties provide that the Management Company can give at any time further instructions to such third parties, and that it can withdraw their mandate with immediate effect if this is in the interest of the Shareholders. The Management Company's liability towards the Company is not affected by the fact that it has delegated certain functions to third parties.

The Company pays to the Management Company the Aggregate Operating Fee and the Management Company will be responsible for paying certain Company costs out of the Aggregate Operating Fee received by it. Refer to Note 5 for further information. Full details are published in the Company's prospectus which is available at www.jupiteram.com.

7. Administration, Custodian and Depositary Fees

Citibank Europe plc, Luxembourg Branch was appointed to perform central administration duties for the Company pursuant to a delegation of such duties to it by the Management Company, and was appointed by the SICAV Board as the Depositary..

Citibank Europe plc, Luxembourg Branch as Administrator, Custodian and Depositary was entitled to receive custodian fees, fund accounting fees, transfer agency fees and fiduciary fees.

The custodian fee consists of safekeeping, administration and transaction charges. Safekeeping and administration charges are applied to the market value of the assets of the country of the underlying investments held in custody at the end of the billing year. The transaction charges are based on the number of transactions in a particular country. The safekeeping and administration fee rate varies according to the country of the underlying investments and decreases depending on the thresholds in a particular country.

The fund accounting fee is the sum of the base NAV calculation fee plus the total of all other fees, including but not limited to financial reporting, share class valuation, tax reporting and all other fees detailed in the fee schedule agreement.

The transfer agency fee is based on the number of transactions processed, the number of holdings (shareholder accounts), the number of new investor accounts opened and include fund/class set-up and annual maintenance fees, enhanced fund distribution support, platform connectivity fee and out-of-pocket expenses.

The fiduciary fee per Fund is calculated as the greater of the minimum annual fee or an ad valorem fee based upon the Fund's month-end NAV.

These fees are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

Notes to the Financial Statements

8. Auditor Fees and Terms of Engagement

PricewaterhouseCoopers, *société coopérative* has been appointed by the shareholders at their annual general meeting as Auditor of the Company for the current accounting year and the shareholders have authorised the Board to agree with the Auditor on its terms of appointment.

The fees of the Auditor are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

9. Other Expenses

There are certain other fees that are payable in addition to the Aggregate Operating Fee and the Investment Management fees.

Each Share Class bears the costs relating to certain transactions such as the costs of buying and selling underlying securities, costs charged by any financial institution or organisation in relation to swap agreements or over-the-counter transactions, bank charges relating to delivery, receipt of securities or to foreign exchange transactions and fees relating to collateral management, transaction costs, interest on bank overdraft and any other extraordinary fees and expenses.

Each Share Class also bears any extraordinary expenses incurred due to external factors, some of which may not be reasonably foreseeable in the normal course of activity of the Company such as, without limitation, any litigation expenses or any tax, levy, duty or similar charge of fiscal nature imposed on the Company or its assets by virtue of a change of laws or regulations.

For so long as the Company and any of the Funds remain authorised by the Securities and Futures Commission ('SFC') in Hong Kong, the Company has undertaken that no marketing or advertising expenses will be paid by the Company. Any marketing and advertising expenses will instead be paid by the Investment Manager.

10. Directors' Fees, Expenses and Interests

Mr. Jacques Elvinger is a partner of the Luxembourg law firm of Elvinger Hoss Prussen, *société anonyme*, which provides legal services to the Company.

The Chairman receives fees of EUR 35,500 and each Director receives fees of EUR 30,000 (including taxes) per annum. Mrs. Paula Moore and Mr Simon Rowson are employed by the Investment Manager JAML although the fees due to them have been waived. In addition, all Directors are entitled to reimbursement by the Company of any expenses directly incurred in the execution of their duties as Directors.

No Director holds any shares in the Company nor has any interest in any transaction which, during the year under review, has been effected by the Company and is unusual in its nature or conditions, or is significant to the business of the Company.

Directors' remuneration, insurance coverage and reasonable expenses directly incurred in the execution of their duties as Directors are included under the Aggregate Operating Fee. Refer to Note 5 for further details.

11. Taxe d'abonnement and Other Operational Taxes

The Company is liable in Luxembourg to a tax (*taxe d'abonnement*), such tax being payable quarterly and calculated on the Net Asset Value of the Company at the end of the relevant calendar quarter. The *taxe d'abonnement* is levied at a rate of 0.01% per annum on Funds or Classes reserved to Institutional Investors (Class G, I, UI, U2, U3, X and Y) and at 0.05% per annum on other Funds or Share Classes (Class A, C, D, E, L, N, S, T and Z). No such tax is payable in respect of the portion of the assets of each Fund invested in other Luxembourg collective investment undertakings which are subject to this tax. *Taxe d'abonnement* is included under the Aggregate Operating Fee, refer to Note 5 for further details.

Notes to the Financial Statements

11. Taxe d'abonnement and Other Operational Taxes *(continued)*

Under current law and practice, the Company is not liable to Luxembourg taxes on income or capital gains, nor are dividends paid by the Company liable to any Luxembourg withholding tax.

Interest, dividends and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

Where the withholding tax in certain jurisdictions has been raised at a rate higher than the rate applicable to comparable domestic UCITS funds, the Company has launched a withholding tax reclaim with the national tax authorities of those countries, with no guarantee of success. If and when those tax reclaims are successful, the proceeds of tax reimbursement are recognised in the Statement of Operations and Changes in Net Assets as 'Dividend income, net of withholding taxes'.

Withholding tax reclaims accrued by the Company during the year ended 30 September 2023 amounted to:

Fund	Fund Currency	Amount
Jupiter Dynamic Bond	EUR	32,027
Jupiter European Growth	EUR	3,163,452
Jupiter Europe ex-UK Equity	EUR	14,105
Jupiter Financial Innovation	EUR	235,090
Jupiter Global Convertibles	EUR	59,779
Jupiter Global Ecology Growth	EUR	18,608
Jupiter Global Equity Growth Unconstrained	USD	5,156
Jupiter Global Sovereign Opportunities	USD	21,266
Jupiter Global Sustainable Equities (LUX)	USD	1,520
Jupiter Global Value	USD	586,762
Jupiter Pan European Smaller Companies	EUR	121,368

12. Transactions with Connected Parties

All transactions with connected parties were carried out on an arm's length basis. The Investment Manager and its affiliates, the Directors, Management Company and other related agents of the Company are considered connected parties.

13. Use of Dealing Commission

The Investment Manager pays for research services from its own resources and its clients take on no research costs at all.

During the year ended 30 September 2023, no brokerage commission rebates were obtained by the Investment Managers or any of their connected persons and no soft commission arrangements were in place.

Notes to the Financial Statements

14. Swing Pricing

The Funds adopted a partial swing pricing process. Under certain circumstances (for example, large volumes of deals) investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Fund. In order to prevent this effect, the Investment Manager, as delegated by the Board of Directors, has the discretion to allow for the Net Asset Value per Share to be adjusted by effective dealing and other costs and fiscal charges which would be payable on the acquisition or disposal of assets in the relevant Fund if the net capital activity exceeds, as a consequence of the sum of all subscriptions, redemptions or switches in such a Fund, such threshold percentage (the 'Threshold') as may be determined from time to time by the Investment Manager, as delegated by the Board of Directors, of the Fund's total Net Assets on a given Valuation Day.

If the net capital activity on a given Valuation Day leads to a net inflow of assets above the threshold in the relevant Fund, the Net Asset Value used to process all subscriptions, redemptions or switches in such a Fund is adjusted upwards by a swing factor that shall be determined from time to time by the Investment Manager, as delegated by the Board of Directors.

If the net capital activity on a given Valuation Day leads to a net outflow of assets above the threshold in the relevant Fund, the Net Asset Value used to process all subscriptions, redemptions or switches in such a Fund is adjusted downwards by a swing factor that shall be determined from time to time by the Investment Manager, as delegated by the Board of Directors.

A factor is calculated for each fund based on the prices of the first business day of the month preceding the relevant quarter and the average transaction costs over the previous 12 months.

The swing factor calculation is based on:

- The bid-offer spread of the underlying portfolio of investments;
- The transaction costs;
- Any taxes

The price of each class in each Fund will be calculated separately but any dilution adjustment will affect the price of shares of each class of the relevant Fund identically, up to a maximum of 2%.

The dilution adjustment is recorded as the 'Net Realised Gains/(Losses) on Investments in securities' in the Statement of Operations and Change in Net Assets.

Swing Price adjustments are applied during the year, but as at the last valuation point 29 September 2023, they have not been applied to any of the funds.

Notes to the Financial Statements

14. Swing Pricing *(continued)*

The maximum factor applied to each fund (the same factor being applied to every share class within each fund) where an application took place during the year was as follows:

Fund	Bid %	Offer %
Jupiter Asia Pacific Income	(0.37)	0.31
Jupiter Dynamic Bond	(0.54)	0.54
Jupiter Dynamic Bond ESG	(0.54)	0.54
Jupiter European Growth	(0.08)	0.31
Jupiter Europe ex-UK Equity	(0.07)	0.17
Jupiter Financial Innovation	(0.26)	0.37
Jupiter Flexible Income	(0.39)	0.41
Jupiter Flexible Macro (LUX)	(0.17)	0.17
Jupiter Global Convertibles	(0.45)	0.45
Jupiter Global Ecology Bond	(0.32)	0.32
Jupiter Global Ecology Diversified	(0.21)	0.22
Jupiter Global Ecology Growth	(0.13)	0.15
Jupiter Global Emerging Markets Corporate Bond	(0.34)	0.34
Jupiter Global Emerging Markets Short Duration Bond	(0.32)	0.32
Jupiter Global Equity Growth Unconstrained	(0.06)	0.06
Jupiter Global High Yield Bond	(0.65)	0.65
Jupiter Global Sovereign Opportunities	(0.38)	0.38
Jupiter Global Sustainable Equities (LUX)	(0.11)	0.11
Jupiter Global Value	(0.13)	0.22
Jupiter India Select	(0.37)	0.34
Jupiter Japan Select	(0.17)	0.16
Jupiter Pan European Smaller Companies	(0.18)	0.31

15. Statement of Changes in the Portfolio

A listing of the statement of changes in the portfolio during the year is available upon request to any investor at the registered office of the Company free of charge.

Notes to the Financial Statements

16. Transaction Costs

For the year ended 30 September 2023 the applicable Funds incurred transaction costs related to purchase or sale of transferable securities as follows:

Fund	Fund Currency	Amount
Jupiter Asia Pacific Income	USD	39,440
Jupiter Dynamic Bond	EUR	1,678
Jupiter European Growth	EUR	423,710
Jupiter Europe ex-UK Equity	EUR	7,449
Jupiter Financial Innovation	EUR	254,770
Jupiter Flexible Income	EUR	2,647
Jupiter Flexible Macro (LUX)	EUR	2,059
Jupiter Global Ecology Diversified	EUR	4,249
Jupiter Global Ecology Growth	EUR	2,446
Jupiter Global Equity Growth Unconstrained	USD	77,450
Jupiter Global Sovereign Opportunities	USD	24,272
Jupiter Global Sustainable Equities (LUX)	USD	475
Jupiter Global Value	USD	318,171
Jupiter India Select	USD	161,799
Jupiter Japan Select	USD	56,277
Jupiter Pan European Smaller Companies	EUR	77,983

The above transaction costs include brokers' fees, depositary's transaction specific fees, stamp duty fees, or security transaction taxes, where applicable. These costs are directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

The transaction costs consisting of brokers' fees, stamp duty fees, or security transaction taxes, where applicable are included in the Statement of Net Assets as 'Investments in securities at cost' and in the Statement of Operations and Changes in Net Assets in 'Net change in unrealised appreciation/(depreciation) on investments' for the purchase of securities. For the sale of securities, they are netted from the 'Due to brokers' amount and from the 'Net realised gain/(loss) on sale of investments' in the Statement of Operations and Changes in Net Assets. Costs related to the acquisition and disposal of fixed income instruments are not separately identifiable from the transaction price.

Notes to the Financial Statements

17. Cross-investments

The value of the cross-investments of the Funds has not been deducted for the calculation of the combined total net assets of the Company.

As at 30 September 2023, the total cross-investments between Funds amounts to EUR 128,585,026.

The details of the cross-investments between Funds are disclosed in EUR in the following table:

Investment	Fund Currency	Market Value	% of Net Assets
Jupiter Dynamic Bond	EUR	128,585,026	2.10
The Jupiter Global Fund - Jupiter Dynamic Bond ESG - Class I EUR Acc		54,659,751	0.89
The Jupiter Global Fund - Jupiter Global Emerging Markets Corporate Bond - Class I USD Acc		39,146,508	0.64
The Jupiter Global Fund - Jupiter Global Sovereign Opportunities - Class I USD Acc		34,778,767	0.57

18. Important Events During the Year

Jupiter Flexible Income closed on 21 October 2022. As at 30 September 2023, there was cash for an amount of EUR 98 remaining in the Fund, which is due to the Investors.

Jupiter Flexible Macro (LUX) closed on 21 October 2022. As at 30 September 2023, there was no cash remaining in the Fund.

Jupiter Global Ecology Bond closed on 6 April 2023. As at 30 September 2023, there was no cash remaining in the Fund.

Jupiter Global Ecology Diversified closed on 6 April 2023. As at 30 September 2023, there was no cash remaining in the Fund.

Jupiter Asia Pacific Income closed on 17 May 2023. As at 30 September 2023, there was cash for an amount of EUR 8 remaining in the Fund, which is due to the Investors.

19. Subsequent Events

There are no significant events after the reporting date.

Appendix

Collateral (unaudited)

As at 30 September 2023, the collateral received or paid which is composed of cash collateral granted to or received from brokers and counterparties for the purpose of transactions in OTC derivatives is as follows:

UCITS V Remuneration Qualitative Disclosures

Jupiter Asset Management International S.A. (JAMI)

Decision-making process to determine remuneration policies

Under the Jupiter's Group's framework ultimate responsibility in remuneration matters is held by the Board of Directors of Jupiter Fund Management Plc. The Board is supported in remunerated-related issues by the Remuneration Committee (RemCo).

The Board is responsible for establishing the Group Remuneration Policy, and with support of the RemCo regularly reviewing the Group Remuneration Policy to meet any important regulatory developments and the objectives of the Group.

The RemCo is delegated with the role of supporting the Board in setting remuneration guidelines, establishing share-based remuneration plans, and approving the aggregate variable remuneration expenditure of the Group as well as determining and proposing to the Board the individual total remuneration payable to the members of the Board (other than its chairman) for approval. The RemCo ensures that the Remuneration Policy and practices across the Group operate in line with EU regulations that apply to its regulated entities and delegates.

The RemCo regularly reports to the Board on the status of its activities, the development of the remuneration architecture within the Group as well as on the operational implementation of this Policy. The RemCo consists of at least three members of the Board all of whom are Non-Executive Directors.

Jupiter's remuneration philosophy is aligned with the Group's pre-incentive operating profit as well as its tolerance for risk. The Group's approach provides for remuneration that attracts and retains employees in each local market and motivates them to contribute to the development and growth of its business. The policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

Link between pay and performance

As described above, Jupiter operates a Group-wide remuneration policy, which applies to all employees across the Group.

Jupiter ensures that any measurement of performance used to evaluate the quantum of variable remuneration elements or pools of variable remuneration elements:

- includes adjustments for current and future risks, taking into account the cost and quantity of the capital and the liquidity required;
- takes into account the need for consistency with the timing and likelihood of the firm receiving potential future revenues incorporated into current earnings;
- is based on the performance of the Group, the individual and the relevant function / business unit or in the case of a fund manager, the fund(s), where financial and non-financial criteria are considered when assessing individual performance; and
- is set within a multi-year framework to ensure that the assessment process is based on longer term performance and associated risks, and to ensure that payment is spread over an appropriate period.

Material Risk Takers

The categories of staff for inclusion as Material Risk Takers for JAMI include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

The Material Risk Takers are identified and reviewed on an annual basis by the relevant entities and the RemCo in line with the criteria set out under EU regulations, namely:

If, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as Identified Staff. For this purpose, the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance with internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines is considered equivalent in its objectives. The Group’s regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the ‘equivalence standard’ as described.

In line with ESMA Guidelines, proportionality is considered taking into account the following factors:

- The percentage of assets under management;
- Total assets under management; and
- The average ratio between its fixed and variable remuneration paid to staff.

It should be noted that despite use of proportionality, the Group’s compensation arrangements involve high levels of deferral, payment in shares and performance adjustment provisions on commercial and risk management grounds.

Further details in relation to the Qualitative disclosures are included in the Group Remuneration Policy.

Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance year 2022 in relation to the funds managed by JAMI.

As at 31 December 2022, JAMI had EUR 9,200 million assets under management consisting of 24 funds.

Total annual remuneration paid to all Management Company employees:	1,728,150
Of which fixed:	1,487,140
Of which variable:	241,010
Number of Management Company employees:	16
Total remuneration paid to Identified Staff of the Management Company:	11,408,040
Of which paid to Senior Management:	1,614,843
Of which paid to other Identified Staff:	9,793,197
Number of Identified Staff:	30
Total annual remuneration paid to employees in delegate(s):	13,021,358
Of which fixed:	1,335,083
Of which variable:	11,686,275
Number of beneficiaries:	4

Jupiter Asset Management International S.A. ('JAMI') *(continued)*

Notes

Remuneration for Material Risk Takers includes remuneration paid to employees of other group companies performing senior management functions for the Management Company.

Remuneration for Material Risk Takers includes remuneration paid to employees of other group companies who perform fund management activities on behalf of the Management Company under the terms of a delegation agreement between the Management Company and their employer. The remuneration disclosed for these employees is the proportion of their total remuneration for the fund management activities they perform under a delegation agreement.

In the figures above, fixed remuneration relates to salary and pension benefits and variable remuneration includes the annual bonus including any long-term incentive awards.

These disclosures are in line with Jupiter's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops Jupiter may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other Jupiter fund disclosures in that same year.

Due to the increasing complexity of the business (i.e., Merian transaction), the information that is needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

Implementation of the remuneration policy for the Group is subject to an annual independent review. No material outcomes or irregularities were identified as a result of the most recent independent review, which took place in 2022.

PEA Compliance Note

Jupiter Europe ex-UK Equity – French PEA restriction Jupiter Europe ex-UK Equity has been eligible to be held within a French ‘Plan d’Épargne en Actions’ (‘PEA’) since 29 August 2018. The Fund has undertaken, by virtue of the application of article 91, paragraph L of Annex II of the French ‘Code général des impôts’, to ensure that at least 75% of the assets of the Fund are permanently invested in the eligible securities mentioned in paragraphs a, b and c of section 1° of article L.221-31 of the French ‘Code monétaire et financier’.

At all times the Fund was invested in more than 75% of PEA eligible assets. As at the date of this report, the Fund had 86.43% in PEA eligible assets.

UK Tax Reporting Fund Regime

All Funds are Reporting Funds for UK taxation purposes for the year ended 30 September 2023. Tax reporting information for the year ended 30 September 2023 in respect of these Funds is available at www.jupiteram.com.

Securities Financing Transaction Regulation (‘SFTR’)

Currently, none of the sub funds of The Jupiter Global Fund make use of the financial instruments to which this regulation pertains. Further details are published in the Company’s prospectus which is available at www.jupiteram.com.

Securities Financing Disclosure Regulation (‘SFDR’)

The following Sub-Funds meet the definition for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852:

Jupiter Dynamic Bond ESG
 Jupiter European Growth
 Jupiter Europe (ex UK) Equity
 Jupiter Global Emerging Markets Corporate Bond
 Jupiter Global Emerging Markets Short Duration Bond
 Jupiter Global Sustainable Equities (LUX)
 Jupiter Japan Select
 Jupiter Pan European Smaller

The following Sub-Funds meet the definition for financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852:

Jupiter Global Ecology Bond
 Jupiter Global Ecology Diversified
 Jupiter Global Ecology Growth

The following Sub-Funds take into account sustainability risks under Article 6, paragraphs 1, 2 and 3, of Regulation (EU) 2019/2088. They do not promote environmental or social characteristics nor contain sustainable investments:

Jupiter Dynamic Bond
 Jupiter Financial Innovation

The VAR approach

The following Funds use the Value-at-Risk ('VaR') approach in order to monitor and measure their global exposure:

The VaR figures have been calculated based on the following input data:

VaR method: Historical simulation
 Confidence interval: 99%
 Analysis time horizon: One month (20 days)
 Time series extension: 2 years
 Leverage methodology: Sum of Notional (Delta adjusted)

Jupiter Dynamic Bond

Methodology: Absolute VaR

Limit: 200.00%

Benchmark: none

The utilisation of VaR from 3 October 2022 to 30 September 2023 was as follows:

MIN 4.06%

MAX 4.77%

Average 4.38%

The average leverage used, computed with the sum of the notionals approach for the period noted above, was 95.19%.

Jupiter Dynamic Bond ESG

Methodology: Absolute VaR

Limit: 200.00%

Benchmark: none

The utilisation of VaR from 3 October 2022 to 30 September 2023 was as follows:

MIN 4.03%

MAX 4.95%

Average 4.44%

The average leverage used, computed with the sum of the notionals approach for the period noted above, was 130.00%.

Jupiter Financial Innovation

Methodology: Relative VaR

Limit: 200.00%

Benchmark: MSCI All Countries World Financials (EUR)

The utilisation of VaR from 3 October 2022 to 30 September 2023 was as follows:

MIN 108.73%

MAX 149.45%

Average 128.42%

The average leverage used, computed with the sum of the notionals approach for the period noted above, was 16.09%.

Jupiter Global Emerging Markets Corporate Bond

Methodology: Relative VaR

Limit: 200.00%

Benchmark: JPM CEMBI Broad Diversified Total Return Index (USD)

The utilisation of VaR from 3 October 2022 to 30 September 2023 was as follows:

MIN 105.22%

MAX 145.59%

Average 122.77%

The average leverage used, computed with the sum of the notionals approach for the period noted above, was 13.86%.

Jupiter Global Sovereign Opportunities

Methodology: Absolute VaR

Limit: 20.00%

Benchmark: none

The utilisation of VaR from 3 October 2022 to 30 September 2023 was as follows:

MIN 3.05%

MAX 6.01%

Average 4.23%

The average leverage used, computed with the sum of the notionals approach for the period noted above, was 323.90%.

Product name: **The Jupiter Global Fund – Jupiter Dynamic Bond ESG**

Legal entity identifier: **549300I6KHJGDQGSJ979**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.80% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles.

With respect to corporate issuers the environmental characteristic was promoted by the Fund through the integration of the Net Zero Investment Framework (NZIF) principles into the investment analysis process alongside a consideration of the material ESG factors relevant to each issuer.

Additionally for corporate issuers the social characteristic of the Fund was promoted by the Fund through seeking compliance with the UN Global Compact Principles. The Investment Manager's investment due diligence process included an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data. Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

For sovereign issuers, the Investment Manager used Jupiter's proprietary Sovereign ESG Framework to assess the alignment of sovereign assets to the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 46.92% of the investments are on a Net zero pathway according to the stated methodology summarised above and are therefore aligned with the promotion of the environmental characteristic for corporate issuers.

It has been assessed that all the corporate investments are in compliance with the UNGC principles and are therefore aligned with the promotion of the social characteristic.

It has been assessed that 22.61% of the issuers were assessed to be aligned with Jupiter's proprietary Sovereign ESG Framework.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has remained broadly in line with the performance over the previous period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF for corporate issuers. The environmental indicator for sovereigns is determined by Jupiter's proprietary sovereign framework.

Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund made included contributing to one or more of the environmentally orientated sustainable Development Goals ("SDGs").

The Fund's sustainable investments contribute to these objectives by passing a minimum threshold of 20% for revenue or capex alignment with the SDGs.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed. In instances where the Investment Manager could not satisfy themselves that the investment was not doing significant harm to a social or environmental objective the investment was not counted towards the Fund's sustainable investment alignment figure.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

Largest Investments	Sector	% of Net Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

59.80% of the Investments made by the Fund were sustainable investments.

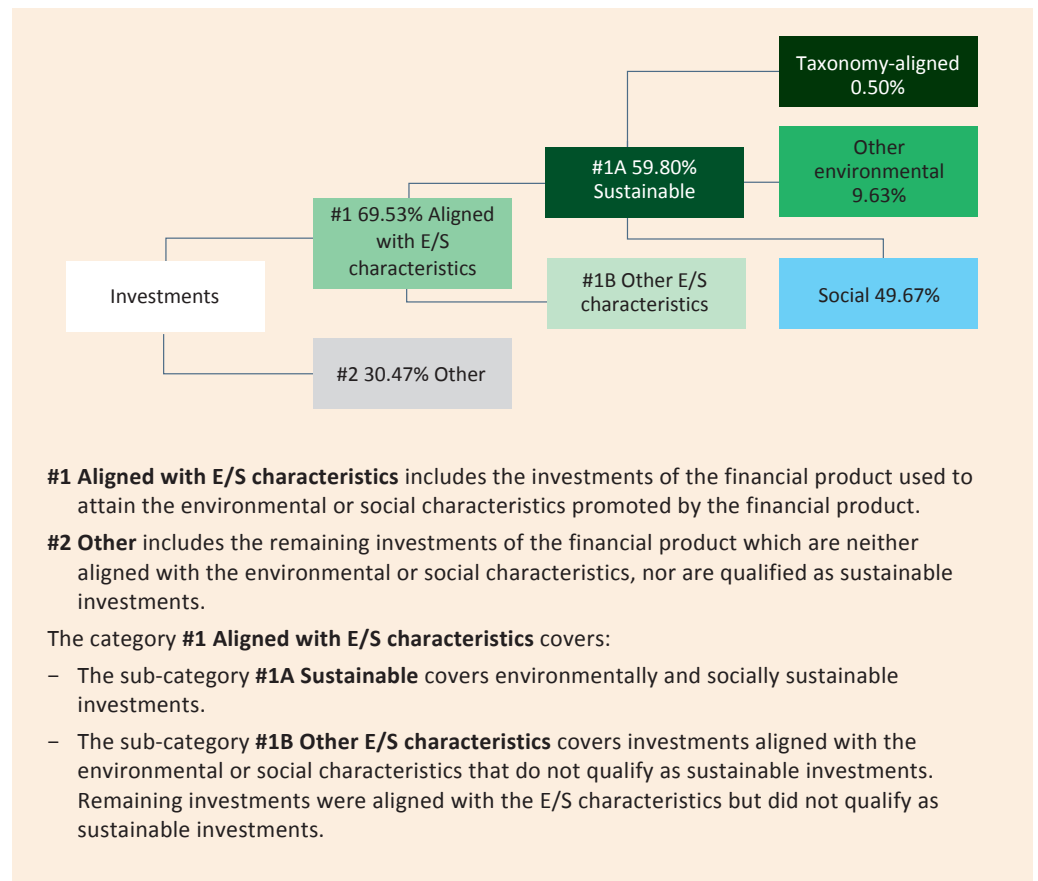

● What was the asset allocation?

69.53% of the Fund’s investment portfolio aligned with the environmental and social characteristics promoted by the Fund. The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

In accordance with the Fund’s investment policy, at least 90% of the Fund’s investments in debt securities met the environmental and social characteristics promoted by the Fund or demonstrated sound prospects for improvement in these areas as determined by the Investment Manager.

10.13% of the investments made by the Fund qualified as sustainable investments with an environmental objectives.

49.67% of the investments made by the Fund qualified as sustainable investments with a social objective.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.01%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment for the fund was improved compared to the previous period. It should be noted that market participants continue to experience fundamental challenges due to the lack of data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

9.63% of the investments made by the Fund sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

 **What was the share of socially sustainable investments?**

49.67% of the investments made by the Fund were socially sustainable

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

All of the Fund's investments were held with a view to achieving the Fund's investment objective, including any that were not aligned to the ESG characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance for corporates and considered the investments against UNGC principles. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the promotion of the target characteristics.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures. Engagements relating to social factors were also undertaken during the period as required and as determined by the engagement priorities either on a top down basis or from the double materiality templates which summaries the key considerations for the corporate issuer(s) in question.

During the reference period, the Investment Manager was reassured to see that several of the companies who had been engaged on the topic of PAI reporting including Newday had begun improving their PAI reporting.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter European Growth**

Legal entity identifier: **549300G82NGMSULN1N18**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 93.50% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 98.89% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
RELX PLC	Professional Services	6.52	Netherlands
Novo Nordisk Class B	Pharmaceuticals	5.84	Denmark
LVMH	Textiles, Apparel & Luxury Goods	5.34	France
Amadeus It Group Sa	Hotels, Restaurants & Leisure	5.34	Spain
Pernod Ricard SA	Beverages	4.95	France
Edenred	Financial Services	4.90	France
ASML Holding NV	Semiconductors & Semiconductor Equipment	4.79	Netherlands
Dassault Systemes	Software	4.19	France
Wolters Kluwer NV	Professional Services	3.71	Netherlands
Fincobank Banca Fineco	Banks	3.53	Italy
IMCD NV	Trading Companies & Distributors	3.19	Netherlands
Lonza Group AG	Life Sciences Tools & Services	2.65	Switzerland
Atlas Copco Class A	Machinery	2.40	Sweden
Kingspan Group PLC	Building Products	2.18	Ireland
Davide Campari Milano NV	Beverages	2.12	Italy

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

● What was the asset allocation?

93.50% of the Fund’s investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund’s investment portfolio (“#2Other”) consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.15%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the fund has remained broadly in line with the EU Taxonomy alignment of the fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack of data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter Europe (ex UK) Equity**

Legal entity identifier: **549300HIYYQPBC2AP33**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 93.56% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 98.27% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What were the top 15 investments of this financial product?

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

● What was the asset allocation?

93.56% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.13%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the fund has remained broadly in line with the EU Taxonomy alignment of the fund over the previous period.

Market participants continue to experience fundamental challenges due to the lack of data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

Sustainable investment objective

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

X Yes

It made **sustainable investments with an environmental objective: 90%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: %**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to generate long-term capital appreciation and income investing primarily in global fixed income securities, that focus on making a positive impact towards environmental and sustainable objectives.

In order to achieve the Fund's sustainable investment objective, the Investment manager targeted issuers that contribute to the Fund's sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or relevant UN Sustainable Development Goals.

Targeting Issuers contributing to the Fund's Sustainable solution themes

The Investment Manager identified global environmental and sustainability challenges, which included amongst other challenges climate change mitigation and adaptation, natural capital and biodiversity restoration.

The Investment Manager selected investments issued by companies which it considered to be addressing these challenges by having at a minimum 20% revenue or capital expenditure attributable to any of the sustainable solution themes below.

- Clean energy;
- Green mobility;
- Green buildings and industry;
- Sustainable agriculture and land ecosystems;
- Sustainable oceans and freshwater systems; and
- Circular economy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund's sustainable solution themes are closely aligned to the six environmental objectives of the EU Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems. As such, to the extent that data is both reliable and available, the EU Taxonomy provided the principal framework for assessing the environmental sustainability of economic activities.

Furthermore, the Fund's sustainable solution themes are closely aligned to relevant UN SDGs.

● **How did the sustainability indicators perform?**

The Investment Manager uses a revenue or capital expenditure test to determine whether an issuer is substantially focused on activities generating or enabling positive outcomes against one or more of the Fund's sustainable solution themes.

At a minimum, at least 20% of an issuer's revenue or capital expenditure must be attributable to such activities.

During the reporting period, 100% of the Fund's investments (excluding cash and instruments held for liquidity and hedging purposes) were issued by organisations or securities considered by the Investment Manager to have at least 20% of their revenue or capital expenditure attributable to such activities.

● **...and compared to previous periods?**

The overall strong alignment of the Fund with its sustainable investment objective was maintained over the period due to strong performance of the underlying sustainability indicators.

The Fund maintained its 100% alignment of the investments it held (except for cash and instruments used for liquidity and hedging purposes) that were issued by organisations or securities that the Investment Manager deemed to have at least 20% of their revenue or capital expenditure related to the Fund's sustainable solution themes during the period.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary Fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
SCOTTISH HYDRO ELECTRIC TRANSMISSI	Utilities	2.71	United Kingdom
NORFOLK SOUTHERN CORPORATION	Industrials	2.65	United States
XYLEM INC (INDIANA)	Industrials	2.63	United States
AMERICAN WATER CAP CORP	Utilities	2.50	United States

OWENS CORNING	Industrials	2.06	United States
REPUBLIC SERVICES INC	Industrials	2.06	United States
JOHNSON CONTROLS INTERNATIONAL PLC	Industrials	2.06	Ireland

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What was the proportion of sustainability-related investments?

90.38% of the Fund's Investment portfolio were sustainable investments.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

90.38% of the Fund’s Investment portfolio were sustainable investments. These sustainable investments include investments that contributed to the Fund’s sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or a relevant environmental objective as outlined in the UN SDGs and qualify as sustainable investments under SFDR article 2(17). The remaining portion of the Fund’s investment portfolio (“#2Not sustainable”) consisted of deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the share revenue of from green activities of investee companies

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

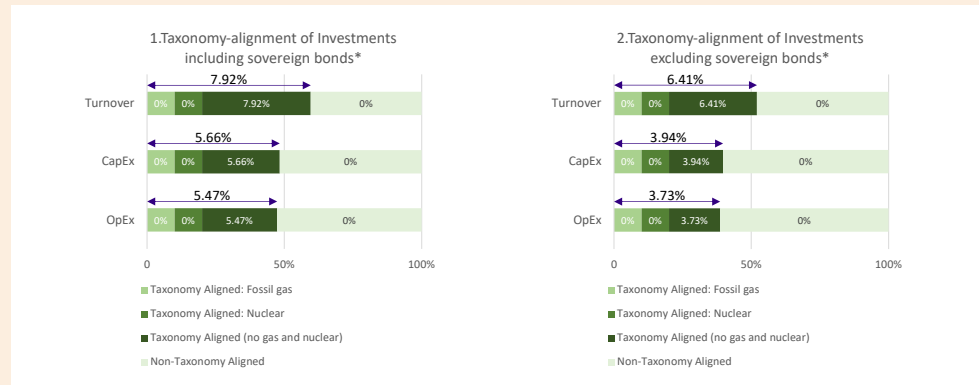

operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

As set out in the graphs below 7.92% of the Fund’s investments were aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 2.24%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund maintained an EU Taxonomy alignment above the minimum commitment set out in the fund prospectus. However, the overall EU Taxonomy alignment of the fund was lower than the EU Taxonomy alignment of the fund over the previous period.

Market participants continue to experience Fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

82.46% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, the Fund also made investments for hedging and liquidity purposes to achieve its investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

All sustainable investments made by the Fund during the investment period were subject to a due-diligence process in order to evaluate the contribution of a proposed sustainable investment to the sustainable investment objective.

The Investment Manager ensured that all investments are sustainable. To achieve this, all investments underwent a proprietary sustainability rationale analysis or green bond verification, as appropriate. In addition, do no significant harm assessments for all investments were completed. To achieve this, the assessments referenced third party data providers, controversy searches, and/or analysis of PAIs according to internal methodology. Finally, all investments were evaluated for good governance practices.

For ESG labelled fixed income securities with associated nominated projects, the sustainability criteria apply at the project level.

Sustainable investment objective

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

X Yes

It made **sustainable investments with an environmental objective: 97%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: %**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to generate long-term capital appreciation and income investing primarily in global equity and fixed income securities, that focus on making a positive impact towards environmental and sustainable objectives.

In order to achieve the Fund's sustainable investment objective, the Investment manager targeted issuers that contribute to the Fund's sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or relevant UN Sustainable Development Goals.

Targeting Issuers contributing to the Fund's Sustainable solution themes

The Investment Manager identified global environmental and sustainability challenges, which included amongst other challenges climate change mitigation and adaptation, natural capital and biodiversity restoration.

The Investment Manager selected investments issued by organisations or securities which it considered to be addressing these challenges by having at a minimum 20% revenue or capital expenditure attributable to any of the sustainable solution themes below.

- Clean energy;
- Green mobility;
- Green buildings and industry;
- Sustainable agriculture and land ecosystems;
- Sustainable oceans and freshwater systems; and
- Circular economy.

The Fund's sustainable solution themes are closely aligned to the six environmental objectives of the EU Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems. As such, to the extent that data is both reliable and available, the EU Taxonomy provided the principal framework for assessing the environmental sustainability of economic activities.

Furthermore, the Fund's sustainable solution themes are closely aligned to relevant UN SDGs.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Investment Manager uses a revenue or capital expenditure test to determine whether an issuer is substantially focused on activities generating or enabling positive outcomes against one or more of the Fund's sustainable solution themes.

At a minimum, at least 20% of an issuer's revenue or capital expenditure must be attributable to such activities.

During the reporting period, 100% of the Fund's investments (excluding cash and instruments held for liquidity and hedging purposes) were issued by organisations or securities considered by the Investment Manager to have at least 20% of their revenue or capital expenditure attributable to such activities.

● **...and compared to previous periods?**

The overall strong alignment of the Fund with its sustainable investment objective was maintained over the period due to strong performance of the underlying sustainability indicators.

The Fund maintained its 100% alignment of the investments it held (except for cash and instruments used for liquidity and hedging purposes) that were issued by organisations or securities that the Investment Manager deemed to have at least 20% of their revenue or capital expenditure related to the Fund's sustainable solution themes during the period.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary Fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager’s portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
EUROPEAN INVESTMENT BANK	Financials	2.26	Luxembourg
THERMO FISHER SCIENTIFIC INC	Health Care	1.98	United States
AVANGRID INC	Utilities	1.88	United States
HOUSING NEW ZEALAND LTD	Real Estate	1.81	New Zealand

AMERICAN WATER CAP CORP	Utilities	1.50	United States
KONINKLIJKE DSM NV	Materials	1.49	Netherlands

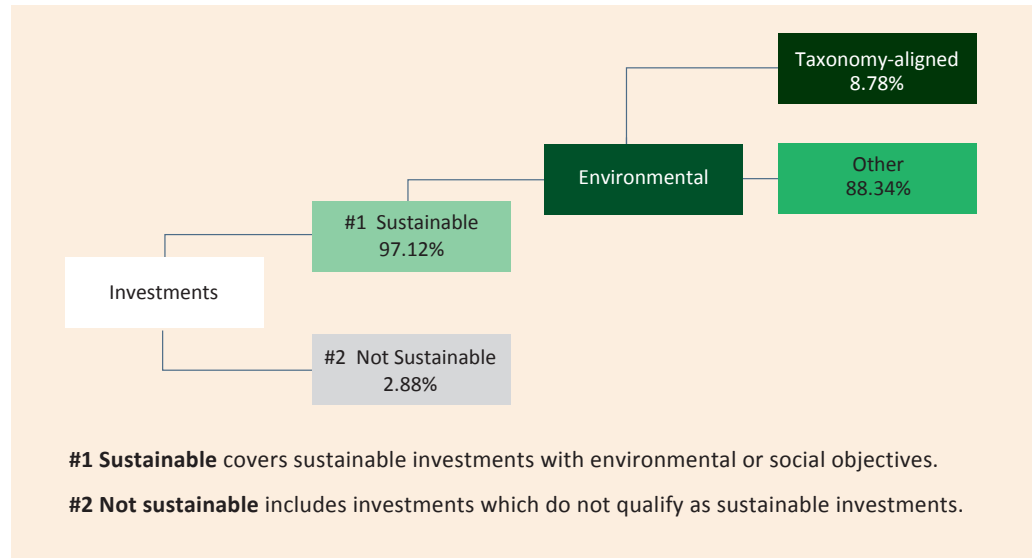

What was the proportion of sustainability-related investments?

97.12% of the Fund’s Investment portfolio were sustainable investments.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

97.12% of the Fund’s Investment portfolio were sustainable investments. These sustainable investments include investments that contributed to the Fund’s sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or a relevant environmental objective as outlined in the UN SDGs and qualify as sustainable investments under SFDR article 2(17). The remaining portion of the Fund’s investment portfolio (“#2Not sustainable”) consisted of deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflecting the share revenue of from green activities of investee companies

capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

As set out in the graphs below 8.78% of the Fund’s investments were aligned with the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Sustainable investment objective

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

X Yes

It made **sustainable investments with an environmental objective: 94%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: %**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Fund seeks to generate long-term capital appreciation and income investing primarily in global equity securities that focus on making a positive impact towards environmental and sustainable objectives.

In order to achieve the Fund's sustainable investment objective, the Investment Manager targeted companies that contribute to the Fund's sustainable solution themes, by contributing to a relevant environmental objective as outlined in the EU Taxonomy and/or relevant UN Sustainable Development Goals (SDG).

Targeting companies contributing to the Fund's Sustainable solution themes

The Investment Manager identified global environmental and sustainability challenges, which included amongst other challenges climate change mitigation and adaptation, natural capital preservation and biodiversity restoration.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager selected investments issued by companies which it considered to be addressing these challenges by having at a minimum 20% revenue attributable to any of the sustainable solution themes below.

- Clean energy;
- Green mobility;
- Green buildings and industry;
- Sustainable agriculture and land ecosystems;
- Sustainable oceans and freshwater systems; and
- Circular economy.

The Fund's sustainable solution themes are closely aligned to the six environmental objectives of the EU Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems. As such, to the extent that data is both reliable and available, the EU Taxonomy provided the principal framework for assessing the environmental sustainability of economic activities.

Furthermore, the Fund's sustainable solution themes are closely aligned to relevant UN SDGs.

● **How did the sustainability indicators perform?**

The Investment Manager uses a revenue test to determine whether a company is substantially focused on activities generating or enabling positive outcomes against one or more of the Fund's sustainable solution themes.

At a minimum, at least 20% of a company's revenue must be attributable to such activities.

During the reporting period, 100% of the Fund's investments (excluding cash and instruments held for liquidity and hedging purposes) were issued by companies considered by the Investment Manager to have at least 20% of their revenue attributable to such activities.

● **...and compared to previous periods?**

The overall strong alignment of the Fund with its sustainable investment objective was maintained over the period due to strong performance of the underlying sustainability indicators.

The Fund maintained its 100% alignment of the investments it held (except for cash and instruments used for liquidity and hedging purposes) that were issued by companies that the Investment Manager deemed to have at least 20% of their revenue related to the Fund's sustainable solution themes during the period.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the "DNSH test"). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager's DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager's DNSH test and were evaluated on a qualitative and quantitative basis.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of companies' alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary Fundamental research and/or the use of third party data. capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

As set out in the graphs below 22.24% of the Fund’s investments were aligned with the EU Taxonomy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 17.44%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The overall EU Taxonomy alignment for the fund was improved compared to the previous period. It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

71.98% of the Fund's investments were sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

In addition to making sustainable investments, the Fund also made investments for hedging and liquidity purposes to achieve its investment objective.

What actions have been taken to attain the sustainable investment objective during the reference period?

All sustainable investments made by the Fund during the investment period were subject to a due-diligence process in order to evaluate the contribution of a proposed sustainable investment to the sustainable investment objective. The Investment Manager ensured that all investments are sustainable. To achieve this, all investments underwent a proprietary sustainability rationale analysis in the form of a green revenue attribution to the strategy's six environmental themes. In addition, do no significant harm assessments for all investments were completed. To achieve this, the assessments referenced third party data providers, controversy searches, and/ or analysis of PAIs according to internal methodology. Finally, all investments were evaluated for good governance practices.

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

It has been assessed that 58.73% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 88.30% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

- **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

● What was the asset allocation?

56.17% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 0.89%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the fund has remained broadly in line with the EU Taxonomy alignment of the fund over the previous period.

Market participants continue to experience Fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund - Jupiter Global Emerging Markets Short Duration Bond**

Legal entity identifier: **549300YMC3QIZG6G7188**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 49.87% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 82.95% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund's promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 78.93% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental Characteristic

In order to promote the Fund's environmental characteristic of the transition to a low carbon economy, the Investment Manager targeted issuers that contribute to the sustainability frameworks set out below.

The temperature goals of the Paris Agreement

The Fund targeted issuers that were determined to be aligned with the delivery of the Paris agreement. Further details on the Paris alignment issuer assessment can be found in the Fund's Annual Impact report.

The United Nations Sustainable Development Goals (UN SDGs)

The Fund targeted issuers that were assessed to be in alignment with the delivery of the environmentally orientated SDGs.

The assessment of an issuer's alignment with the SDGs amongst other things incorporated a review of the most significant contributions of the Issuer's products and service to the delivery of the UN SDGs.

The Investment Manager also placed significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Compliance with the UN Global Compact Principles

The Fund targeted issuers that were assessed to be in alignment with the UN Global Compact Principles. The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data.

Social Characteristic

In order to promote the Fund's social characteristic, the Investment Manager targeted issuers that contribute to the sustainability frameworks set out below.

The United Nations Sustainable Development Goals (UN SDGs)

The Fund targeted issuers that were assessed to be in alignment with the delivery of the socially orientated SDGs.

The assessment of an issuer's alignment with the SDGs amongst other things incorporated a review of the most significant contributions of the Issuer's products and service to the delivery of the Socially orientated UN SDGs.

The Investment Manager also placed significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

Compliance with the UN Global Compact Principles

The Fund targeted issuers that were assessed to be in alignment with the UN Global Compact Principles. The Investment Manager's investment due diligence process includes an initial evaluation and ongoing monitoring of issuers' compliance with the UN Global Compact Principles using third party ESG risk data.

● **How did the sustainability indicators perform?**

The environmental and social characteristics promoted by the financial product are:

- (i) the transition to a low carbon economy; and
- (ii) alignment with the United Nations Sustainable Development Goals and the United Nations Global Compact Principles.

98.58% of the financial product's assets have been assessed as aligning with the environmental and social characteristics.

Environmental characteristics

The Fund seeks to promote the transition to a low carbon economy by seeking to align with the sustainability frameworks set out below:

The temperature goals of the Paris Agreement

The Fund seeks to promote the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts of the Paris Agreement. For the purposes of SFDR, a company's alignment with a low carbon world is determined by assessing the compatibility of its historic and future scope 1 and 2 carbon emissions and emissions intensity with widely recognised Paris-aligned targets and science-based low carbon trajectories. On this basis, 83.46% of the financial product's assets were assessed as being aligned with the trajectory required to reach the temperature goals of the Paris Agreement.

The investment team assesses a company's full alignment with the delivery of the Paris Agreement using additional measures and analyses, as reported on more fully to clients in the Annual Impact Report. This includes an opportunity to invest in companies with an environmental benefit through products and services that can help others to decarbonise. However, given challenges in data availability on a global basis and complexity of assessment these do not form part of this sustainability indicator for the purposes of SFDR.

The United Nations Sustainable Development Goals (UN SDGs)

The Fund seeks to promote the delivery of the UN SDGs. A company's alignment with the UN SDGs considers the most significant contributions its products and services make aligned with specific targets under the UN SDG framework. To do this, a company's revenue streams are ascribed to the key contributions from its products and services, which are then aggregated up to a portfolio level according to the weighting of the investment.

The SDGs considered for revenue alignment with promoting environmental characteristics are:

6. Clean water and sanitation
7. Affordable and clean energy
9. Industry, innovation and infrastructure
11. Sustainable cities and communities
12. Responsible consumption and production
13. Climate action
14. Life below water
15. Life on land

On this basis, 30.75% of the portfolio's assets were assessed as being aligned with contributing to delivering SDGs related to environmental goals.

The Investment Manager also places significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

Social characteristics

The social characteristic promoted by the Fund is assessed through seeking: (i) alignment with the UN SDGs; and (ii) compliance with the UN Global Compact Principles ("UNGC").

The United Nations Sustainable Development Goals (UN SDGs)

The Fund seeks to promote the delivery of the UN SDGs. A company's alignment with the UN SDGs considers the most significant contributions its products and services make aligned with specific targets under the UN SDG framework. To do this, a company's revenue streams are ascribed to the key contributions from its products and services, which are then aggregated up to a portfolio level according to the weighting of the investment.

The SDGs considered for revenue alignment with promoting social characteristics are:

1. No poverty
2. Zero hunger
3. Good health and well-being
4. Quality education
5. Gender equality
8. Decent work and economic growth
10. Reduced inequalities
16. Peace, justice and strong institutions

On this basis, 34.65% of the portfolio's assets were assessed as being aligned with contributing to delivering SDGs related to social goals.

The Investment Manager also places significant emphasis on a company's contribution to the UN SDGs through its operational contributions. However, this does not form part of this sustainability indicator for the purposes of SFDR given that this cannot be mapped on a revenue basis.

The United Nations Global Compact (UNGC)

The United Nations Global Compact (UNGC) is a voluntary initiative comprising ten Fundamental principles of responsible business behaviour and corporate citizenship. These principles fall into four categories: human rights, labour rights, the environment and anti-corruption. The investment team will not invest in companies that, in its opinion, violate the UNGC. There were no violations of the UN Global Compact during the reference period.

The Fund does not use financial derivative instruments specifically for the purpose of attaining the environmental and/ or social characteristics it promotes.

● **...and compared to previous periods?**

The overall performance of the sustainability indicators has remained broadly in line with that of the previous period due to the continued strong alignment of the underlying equity investments with the delivery of the temperature goals of the Paris Agreement, the UN Sustainable Development Goals and the UN Global Compact.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the Fund partially makes include contributing to the delivery of one or more of the Sustainable Development Goals (“SDGs”)

The Fund’s sustainable investments contribute to these objectives by passing a minimum threshold for revenue alignment with the SDGs. This ensures that for an investment to be deemed sustainable, a minimum level of contribution must be attained by selling products and services aligned with delivering solutions to significant environmental and societal challenges. This minimum level of contribution is 20% of revenues for the purposes of the calculation of this metric for SFDR.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments made by the Fund were subjected to a review by the Investment Manager to assess whether or not the Issuer did or did not significantly harm any social or environmental objective (the “DNSH test”). As part of the DNSH test, the Investment Manager subjected all sustainable investments to a rigorous in-house qualitative and quantitative assessment against all the mandatory principal adverse indicators listed in Table 1 of Annex 1 of the RTS. The Investment Manager’s DNSH test utilised a broad range of data sources across numerous ESG thematic areas to ensure that proposed sustainable investments were appropriately analysed. In instances where the Investment Manager could not satisfy themselves that the investment was not doing significant harm to a social or environmental objective the investment was not counted towards the Fund’s sustainable investment alignment figure.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Indicators for adverse impacts on sustainability factors were incorporated into the Investment Manager’s DNSH test and were evaluated on a qualitative and quantitative basis.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Investment Manager’s investment due diligence process includes an initial evaluation and ongoing monitoring of companies’ alignment with OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This evaluation may be conducted by the Investment Manager through primary Fundamental research and/or the use of third party data. Where such evaluation identifies an issue in respect of a company, investment in that company will only be permitted where appropriate remedial actions have been implemented.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

What were the top 15 investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

Largest Investments	Sector	% of Net Assets	Country
AGILENT TECHNOLOGIES INC	Life Sciences Tools & Services	5.32	United States
DANAHER CORP	Life Sciences Tools & Services	5.19	United States
VISA INC CLASS A	Financial Services	4.56	United States
ACCENTURE PLC CLASS A	IT Services	4.42	United States
CSL LTD	Biotechnology	4.30	Australia
METTLER TOLEDO INC	Life Sciences Tools & Services	4.17	United States
TEXAS INSTRUMENT INC	Semiconductors & Semiconductor Equipment	4.00	United States
JACK HENRY AND ASSOCIATES INC	Financial Services	3.53	United States
CHUBB LTD	Insurance	3.50	United States
UNILEVER PLC	Personal Care Products	3.40	United Kingdom
ADOBE INC	Software	3.39	United States
AUTOMATIC DATA PROCESSING INC	Professional Services	3.27	United States
AMERICAN WATER WORKS INC	Water Utilities	3.26	United States
SHERWIN WILLIAMS	Chemicals	3.13	United States
PARTNERS GROUP HOLDING AG	Capital Markets	2.94	Switzerland

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

78.93% of the Investments made by the Fund were sustainable investments.

● What was the asset allocation?

98.58% of the Fund's investment portfolio aligned with the environmental and social characteristics promoted by the Fund. The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

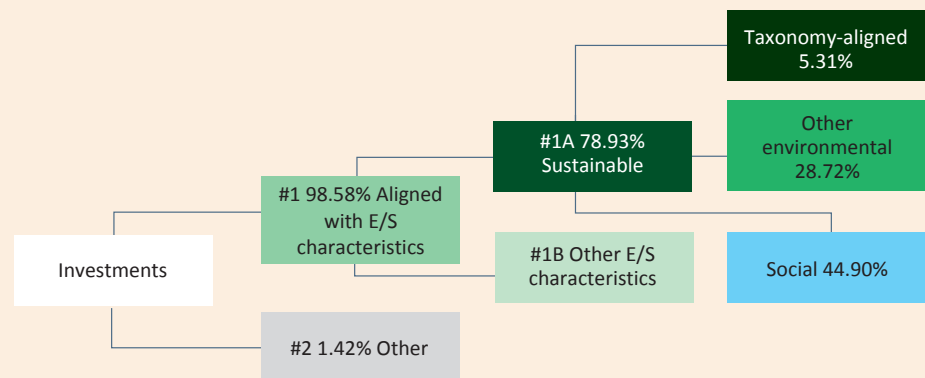

34.03% of the investments made by the Fund qualified as sustainable investments with an environmental objective.

44.90% of the investments made by the Fund qualified as sustainable investments with a social objective.

Please note in total, 78.93% of the financial product's assets made 20% or more revenues from products or services aligned with delivering the SDGs.

46.81% of the assets made 20% or more revenues from products or services aligned with delivering environment-related SDGs and 40.01% of the assets made 20% or more revenues from products or services aligned with delivering social-related SDGs.

The sum of the allocation to environment- and social- related SDGs is greater than the total alignment because several companies are deemed to make 20% or more revenues from products and services that address both environmental and social SDGs.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments. Remaining investments were aligned with the E/S characteristics but did not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 2.27%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The reported percentage alignment to the EU taxonomy has increased over the period, mainly due to improved company reporting on relevant metrics and broader coverage by external data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

28.72% of the investments made by the Fund were sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

44.90% of the investments made by the Fund were socially sustainable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The primary method of meeting the environmental and social characteristics for the financial product is through aligning its investments with the delivery of three key frameworks; the temperature goals of the Paris Agreement, the SDGs and the UNGC.

As has been described earlier, the investment team will engage with a company should news flow or other information suggest there is a risk that it is involved in a controversy or in violation of the UNGC. Where the investment team sees opportunities for portfolio holdings to improve their performance on environmental and social matters they will engage to promote change. In many cases this relates to disclosure, where a company could benefit from providing additional insights into how it approaches managing specific ESG and sustainability risks and opportunities. In other cases it will relate to practices; for example, over the year the team has engaged with a portfolio company on its approach to minimum wages. In another instance it has engaged with a company on its approach to incorporating natural capital costs into its budgeting and planning. However, this is not the basis on which the investment team assesses whether the characteristics have been met or whether the characteristics are likely to be met for the purposes of determining the appropriateness of an investment within a sustainable investment framework.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter Japan Select**

Legal entity identifier: **5493002R7V1ID61TTW30**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 86.68% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 97.67% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
Sumitomo Mitsui Financial Group In	Banks	7.15	Japan
Tokio Marine Holdings Inc	Insurance	5.21	Japan
Sony Group Corp	Household Durables	5.17	Japan
Softbank Corp	Wireless Telecommunication Services	4.79	Japan
Shin Etsu Chemical Ltd	Chemicals	4.50	Japan
Orix Corp	Financial Services	4.44	Japan
Bridgestone Corp	Automobile Components	4.12	Japan
KDDI Corp	Wireless Telecommunication Services	3.98	Japan
Sekisui House Ltd	Household Durables	3.98	Japan
Nec Corp	IT Services	3.56	Japan
Recruit Holdings Ltd	Professional Services	3.52	Japan
Fanuc Corp	Machinery	3.48	Japan
Hazama Ando Corp	Construction & Engineering	3.09	Japan
Star Asia Investment Reit Corp	Diversified REITs	2.84	Japan
Roland Corp	Leisure Products	2.79	Japan

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

● What was the asset allocation?

86.68% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Refer to table above in top investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the "greenness" of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 1.19%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment of the fund has remained broadly in line with the EU Taxonomy alignment of the fund over the previous period.

Market participants continue to experience Fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **The Jupiter Global Fund – Jupiter Pan European Smaller**

Legal entity identifier: **549300TP2JH99U8Z1N86**

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:**

%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were: (i) the transition to a low carbon economy in seeking to promote the goal of net zero greenhouse gas emissions by 2050 or sooner; and (ii) the upholding responsibilities to people and planet in seeking compliance with the UN Global Compact Principles, (the “ESG Characteristics”).

The environmental characteristic promoted by the Fund was pursued through the targeting of issuers achieving net zero greenhouse gas emissions by 2050 or sooner. Industry guidance through the Net Zero Investment Framework (NZIF) was utilised to assess a company’s status under the net zero pathway. The long-term 2050 goal is subject to short and medium-term milestones and incorporates engagement protocols for companies that the Investment Manager classifies as high impact based on the NZIF’s material sector guidance.

The social characteristic promoted by the Fund was pursued through seeking compliance with the UN Global Compact Principles.

The Investment Manager’s investment due diligence process included an initial evaluation and ongoing monitoring of issuers’ compliance with the UN Global Compact Principles using third party ESG risk data.

Where an issuer was identified as having breached the UN Global Compact Principles, the issuer was not counted as a holding that was deemed to be promoting the social characteristic of the Fund. In such instances, the Investment Manager satisfied themselves that appropriate remedial actions had been implemented to reduce the likelihood of a future breach.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

It has been assessed that 64.40% of the portfolio is on a Net zero pathway according to the stated methodology summarised above and therefore is aligned with the promotion of the E characteristic.

It has been assessed that 98.60% of the portfolio is in compliance with the UNGC principles therefore is aligned with the promotion of the S characteristic.

● **...and compared to previous periods?**

The overall alignment of the Fund’s promotion of environmental and social characteristics has experienced growth over the period due to the performance of the underlying indicators.

The performance of the environmental indicator is the main determinant of the overall alignment. As discussed above, the environmental indicator is linked to investor practice centred on the NZIF.

We are encouraged that further portfolio holdings have introduced long-term decarbonisation commitments or have shown further developments within the transparency and execution of their climate strategies over the period.

NZIF protocols involve the assessment of underlying companies against progressive and long-term milestones. Consequently, it should be noted that we do not expect progress to be linear and year on year growth to be in evidence for every reporting period. Investments will be monitored and the investment team will duly engage where it is deemed appropriate.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as the Fund has not committed to make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered as an additional consideration in the Investment Manager's portfolio construction process. A list of the key principle adverse impact indicators considered by the Fund can be found on the website: <https://www.jupiteram.com/board-and-governance/#sustainable-finance-disclosures>.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top 15 investments of this financial product?

Largest Investments	Sector	% of Net Assets	Country
Elis SA	Commercial Services & Supplies	3.78	France
Comet Holding AG	Electronic Equipment, Instruments & Components	3.75	Switzerland
Finecobank Banca Fineco	Banks	3.41	Italy

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01 October 2022 - 30 September 2023.

What was the proportion of sustainability-related investments?

Not applicable as the Fund has not committed to make sustainable Investments.

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

64.40% of the Fund's investment portfolio was aligned with both of the environmental and social characteristics promoted by the Fund.

The remaining portion of the Fund's investment portfolio ("#2Other") consisted of investments which were not aligned to the ESG Characteristics promoted by the Fund, investments for which relevant data was not available and/or deposits at sight, deposits, money market instruments and money market Funds held on an ancillary basis.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Refer to table above in top investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported below are an incidental result of the Fund’s investment strategy and promotion of environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

turnover reflects the “greenness” of investee companies today.

capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● What was the share of investments made in transitional and enabling activities?

The share of investments made in transitional activities was 0.00%. The share of investments made in enabling activities was 3.45%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Please note that the Fund did not make a commitment to make EU Taxonomy aligned investments. Therefore, the EU Taxonomy alignment figures reported are an incidental result of the Fund's investment strategy and promotion of environmental and social characteristics.

The overall EU Taxonomy alignment for the fund was improved compared to the previous period. It should be noted that market participants continue to experience fundamental challenges due to the lack data availability and the dearth of corporate disclosures. We are working with vendors and using relevant data packages to best assess and understand taxonomy alignment. However, although we expect data quality to improve (as regulatory actions take effect), caution should be applied when deriving conclusions over this reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Fund has not committed to make sustainable Investments.

What was the share of socially sustainable investments?

Not applicable as the Fund has not committed to make socially sustainable Investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

All of the Fund’s investments were held with a view to achieving the Fund’s investment objective, including any that were not aligned to the ESG Characteristics promoted by the Fund.

Sustainability risks were integrated into the investment decision making process. The active ownership approach considered material ESG factors which strengthened the assessment of the risks and opportunities that drive returns.

The Investment Manager took sustainability risks (defined in SFDR as an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment) and ESG Characteristics into account as part of its selection process.

In addition to investments made by the Fund in pursuit of its investment strategy, the Fund may also have held deposit at sight, deposits, money market instruments and money market Funds on an ancillary basis in order to achieve its investment goals, for treasury purposes and in case of unfavourable market conditions. No minimum environmental or social safeguards were applied in relation to these holdings.

This category may also have included investments for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager conducted detailed assessments of underlying investment issuers progress and trajectory along the net zero alignment pathway based on the NZIF guidance. The Investment Manager utilised the detailed understanding gathered from the assessments to establish engagement priorities linked to the transition to a low carbon economy for each issuer.

The Investment Manager also conducted an engagement prioritisation assessment at the portfolio level. The prioritisation assessment was not solely linked to high impact or heavy emitting companies because these companies typically already have in place more progressive net zero strategies, policies and disclosures.

Given the systematic nature of the environmental characteristic of the transition to a low carbon economy that is promoted by the Fund, the Investment Manager deemed it necessary to engage more broadly at an industry level to tackle these macro challenges. The Investment Manager engaged with investor bodies and industry peers to consider and discuss climate policies targeted at investors.

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Notice of Annual General Meeting of Shareholders of The Jupiter Global Fund

Dear Shareholders,

Notice is hereby given that the **Annual General Meeting** (the "Meeting") of **The Jupiter Global Fund** (the "Company") will be held on **Wednesday February 7, 2024 at 11.00 a.m. CET**.

AGENDA

1. Approval of the audited annual accounts of the Company for the financial year ended September 30, 2023 (the "Audited Annual Accounts").
2. Discharge of the Directors of the Company for the performance of their duties carried out for the financial year ended September 30, 2023.
3. Re-appointment of Mr Garth Lorimer Turner, Me Jacques Elvinger, Mrs Paula Moore, Mr Revel Wood and Mr Simon Rowson as Directors of the Company until the next Annual General Meeting of Shareholders of the Company that will consider the approval of the audited annual accounts for the financial year ending on September 30, 2024.
4. Appointment of Ernst & Young SA ("EY") as the approved statutory auditor of the Company until the next Annual General Meeting of Shareholders of the Company that will consider the approval of the audited annual accounts for the financial year ending September 30, 2024 and authorization to the Board of Directors of the Fund to agree on the terms of EY's appointment.
5. Approval of Directors' Fees for the period October 1, 2022 to September 30, 2023, prior to any waiver applied to the fees, as described in the Company's Audited Annual Accounts.
6. Approval of Directors' Fees for the period October 1, 2023 to September 30, 2024, prior to any waiver applied to the fees, as described in the Company's Audited Annual Accounts.

VOTING

Resolutions on the agenda of the Annual General Meeting will require no quorum and the resolutions will be passed by simple majority of the votes cast at the Meeting.

VOTING ARRANGEMENTS

We would be grateful if you could sign the proxy form where indicated, return a copy by fax or email to arrive no later than 5.00 p.m. CET on Tuesday February 6, 2024 marked for the attention of Ms Edita Demirovic (fax +352 45 14 14 439, email: FCSLux@citi.com) and send the signed original by post marked for the attention of:

Ms Edita Demirovic,
Citibank Europe plc, Luxembourg Branch,
31, Z.A. Bourmicht,
L-8070 Bertrange,
Grand-Duchy of Luxembourg.

Terms not defined in this notice have the same meaning as in the Company's prospectus.

The proxy will remain in force if the Meeting, for whatever reason, is postponed or reconvened.

Should you have any questions regarding the above, please do not hesitate to contact Ms Edita Demirovic on + 352 45 14 14 425.

By order of the Board of Directors

THE JUPITER GLOBAL FUND Société d'Investissement à Capital Variable
Registered Office: 31 Z.A. Bourmicht, L-8070 Bertrange R.C.S Luxembourg B 110.737

Proxy Form

I/We the undersigned _____,

being shareholder(s) of **The Jupiter Global Fund** (the Company), and with respect to my/our shares held on the Register of the Company hereby give irrevocable proxy to the Chairman of the Meeting with full power of substitution (the 'Proxy'), to represent me/us at the **Annual General Meeting of Shareholders** of the Company (the Meeting) to be held on **Wednesday February 7, 2024 at 11:00 a.m. CET**, and at any adjournment thereof, in order to deliberate upon the agenda, as indicated below:

If you want to vote in a certain way on the resolutions specified, please indicate with an X in the spaces below. If you appoint a Proxy and you do not indicate with an X in the spaces below how you wish your votes to be cast, the Proxy will vote 'for' in favour of the resolutions specified. The Proxy can also do this on any other resolution that is put to the Meeting.

Direction to your Representative
