Production date of the key information document I 03/08/2023

Warning

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type I SYCOMORE GLOBAL ECO SOLUTIONS is a Sub-Fund of SYCOMORE FUND SICAV (Investment Company with Variable Capital) under Luxembourg law.

Duration I The Sub-Fund was created on 21/12/2021. It has no maturity date. It can be terminated and liquidated in the cases set out in the prospectus and the articles of association of the Fund.

Objectives I Sycomore Global Eco Solutions (denominated in EUR) aims to outperform the MSCI AC WORLD index (with dividend reinvested) and to achieve a significant performance over a minimum investment horizon of five years, through a rigorous selection of stocks of companies whose business model, products, services, or production process significantly and positively contribute to the energy and ecological transition challenges, through a thematic SRI strategy. The Sub-Fund has sustainable investment as its objective according to Article 9 of the SFDR, by investing in companies valuing ecological transition as a core pillar for sustainable development.

These companies have one or more activities related to energy, transportation and mobility, renovation and construction, circular economy and ecosystems (water, pollution, agriculture, food processing, forestry, fishing...). These stocks, which at all times represent at least 80% of net assets, are selected from global equity markets, without any sector or capitalisation constraints, based on fundamental analysis. The aim of this stock selection process is to identify quality companies whose market price does not reflect the intrinsic value assessed by the management team. The process of researching and selecting stocks in the investment universe includes binding extra-financial criteria and overweights companies whose ESG criteria are consistent with sustainability objectives.

The ESG (Environment, Social, Governance) analysis, rating and selection process is a fully integrated component in the fundamental analysis of companies in our investment universe and covers at least 90% of the Sub-Fund's net assets (excluding cash). This analysis and rating, conducted according to our proprietary 'SPICE' (Suppliers & Society, People, Investors, Clients, Environment) methodology and within the environment SPICE pillar, 'NEC' (Net Environmental Contribution) metric. The SPICE methodology aims in particular to understand the distribution of value created by a company among its stakeholders (investors, environment, clients, employees, suppliers and civil society), our conviction being that equitable distribution is an important factor in a company's development. This work has a decisive impact on the risk premium and the price targets thus estimated. The NEC metric allows the assessment of transition risk and is completed

with green differentiation and forward-looking information, such as alignment and trajectory elements, taxonomy-related information or eco-design and lifecycle approaches.

The management team also relies on SRI exclusions (no investments in companies whose activities have demonstrated a negative impact on society or environment), themes (environmental and energy transition), shareholder engagement (promotion of the best ESG's practices through the voting rights), best in universe (best players in the investment universe) and best efforts (investment in companies making visible efforts in sustainable development, even though they might not yet be among the best in the ESG investment universe) approaches. The eligible investment universe of the Sub-Fund is therefore reduced by at least 20% compared to the initial investment universe i.e. equities listed on global market and covered by our ESG analysis process. More detailed information on this subject is available in the Fund's prospectus and in our Commitment Policy, which is available at www.sycomore-am.com.

To complete the core equity strategy the Sub-Fund may be exposed to (1) bonds (including convertibles) and other debt securities, up to a maximum of 20% of net assets, (2) futures Futures and derivatives traded on regulated markets and/or over the counter, (3) European UCITS, up to a maximum of 10% of net assets and (4) public or corporate money market instruments, up to a maximum of 10% of net assets.

Benchmark I MSCI AC World Net Return index. The Sub-Fund is actively managed and references the benchmark by seeking to outperform it and for the purpose of calculating the performance fee. The Management Company has full discretion over the composition of the Sub-Fund's portfolio and there are no restrictions on the extent to which the Sub-Fund's portfolio and performance may deviate from the ones of the benchmark. The weight of each company in the net assets of the Sub-Fund is thus completely independent from the weight of the same company in the benchmark. It is possible for the Sub-Fund to invest in companies which are not included in the benchmark. Conversely, the Sub-Fund might not invest in a company appearing prominently in the benchmark.

Allocation of distributable sums I Accumulation

Deadline for the centralisation of subscription/redemption orders I Investors can subscribe for and redeem shares on a daily basis on each Luxembourg and/or French business day ("Valuation Day").

Intended retail investor I Sycomore Global Eco Solutions is intended for any type of investors

Further information about the prospectus, reporting, net asset value or any other information is available on our website www.sycomore-am.com or on

What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7 which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Risks not reflected by the synthetic risk and reward indicator I In case of very low trading volumes, a buy or sell order can result in significant price changes for one or more assets, which may weigh on the net asset value.

Guarantee I As the Sub-Fund does not provide any protection against market evolutions, you could lose all or part of your investment.

Performance scenarios (amounts in Euros) I

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred for an investment 1 and 5 years.

Recommended holding period: 5 ans

Example Investment : 10 000 €

Scénarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	3 020 €	2 340 €
	Average return each year	-69.81%	-25.20%
Unfavourable	What you might get back after costs	8 180 €	8 340 €
	Average return each year	-18.18%	-3.56%
Moderate	What you might get back after costs	10 730 €	15 970 €
	Average return each year	7.30%	9.82%
Favourable	What you might get back after costs	16 650 €	19 730 €
	Average return each year	66.50%	14.56%

The unfavourable scenario occurred for an investment between December 2021 and December 2022. The moderate scenario occurred for an investment between December 2016 and December 2021. The favorable scenario occurred for an investment between April 2014 and April 2019

What happens if Sycomore Asset Management is unable to pay out?

This Sub-Fund is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of default by Sycomore Asset Management, the Sub-Fund's assets are retained by the latter's custodian and will not be affected. In the event of default by the depositary, the risk of financial loss to the Sub-Fund is mitigated due to the legal segregation of the assets of the depositary from those of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If you are investing in this product as part of a life insurance or capitalization contract, this document does not take into account the contract fees.

Costs over time (amount in Euros) I

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year] you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 5 year (recommended holding period)
Total costs	410 €	1 457 €
Annual cost impact (*)	4.13%	1.93% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.75% before costs and 9.82% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs I

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	300 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.01% of the value of your investment per year. This is an estimate based on actual costs over the last year.	98 EUR
Transaction costs	0.12% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	11 EUR
Incidental costs taken under certain specific conditions		
Performance fees	15% over the MSCI AC World Net Return Index The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period : 5 years at least due to the nature of the underlying of this investment. The shares of this Sub-Fund are medium term investment vehicles, they must be acquired with a view to assets diversification. All shareholders may at any time redeem part or all of their shareholdings for cash. Redemption requests which are irrevocable should be sent either to the Transfer Agent, to the counters of other institutions appointed by the management company (SYCOMORE AM), or to the management company's registered office.
