What is this product?

Type

This is an open ended UCITS fund.

Term

The fund is established for an unlimited period. In certain circumstances the fund may be unilaterally terminated in accordance with legal requirements.

Investment objective

The fund aims to provide capital growth in excess of the MSCI Nordic Micro Cap (Net TR) Index after fees have been deducted over a five to seven year period by investing in equities of micro-sized Nordic companies.

The fund is actively managed and invests at least two-thirds of its assets in equities of micro-sized Nordic companies. These are companies which, at the time of purchase, are considered to be in the bottom 10% by market capitalisation of the Nordic equities market. Up to 10% of the fund can be invested in unlisted securities.

Portfolio construction is based on fundamental research, with a bias towards investing in well-managed, innovative businesses that can generate cash and grow sustainably in the long term.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in appendix I of the prospectus).

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against its target benchmark being to exceed the MSCI Nordic Micro Cap (Net TR) Index and compared against the Morningstar Nordic Small/Mid-Cap Equity Category. The fund's investment universe is not expected to

overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Currency: The sub-fund currency is EUR. The share class currency is EUR.

Dealing Frequency: You can buy and sell shares weekly on Wednesday (or the next business day if a Wednesday is not a business day) and on the last business day in a month.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund may be suitable for investors who are more concerned with maximising long term returns than minimising possible short term losses. The fund is intended for retail investors who have a basic investment knowledge and an ability to bear large short-term losses. This investment should form part of a varied investment portfolio. This fund is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

Performance Scenarios

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Liquidity risk: You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

The fund's assets are held in safekeeping by its depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depositary's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depositary or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.
