### Registered office

10 Rue Edward Steichen, L-2540 Luxembourg, Grand Duchy of Luxembourg

### Board of Directors

#### *Chairman*

Mr Lucien CARTON, Head of Solutions and Client Advisory, BNP PARIBAS ASSET MANAGEMENT Amsterdam, The Netherlands

#### *Members*

Mr Thierry CRENO, Head of MAQS Target Allocation, BNP PARIBAS ASSET MANAGEMENT France Paris, France

Ms Gaëlle RIVOALLAN, Head of Investment Compliance, BNP PARIBAS ASSET MANAGEMENT Luxembourg, Luxembourg, Grand Duchy of Luxembourg

Ms Isabelle TILLIER, Head of Fund Selection, BNP PARIBAS ASSET MANAGEMENT France Paris, France

Ms Béatrice VERGER, Head of SRI Development, BNP PARIBAS ASSET MANAGEMENT France Paris, France (until 9 December 2022)

### Management Company

BNP PARIBAS ASSET MANAGEMENT Luxembourg, 10 Rue Edward Steichen, L-2540 Luxembourg, Grand Duchy of Luxembourg

BNP PARIBAS ASSET MANAGEMENT Luxembourg is a Management Company as defined by Chapter 15 of the Luxembourg Law of 17 December 2010 concerning undertakings for collective investment, as amended.

In this capacity, the Management Company performs the administration, portfolio management and marketing duties.

The functions of net asset value calculation, transfer and registrar agent are delegated to:

BNP Paribas S.A., Luxembourg Branch\*, 60 Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg

Portfolio management is delegated to:

### Affiliated Investment Managers

BNP PARIBAS ASSET MANAGEMENT France, 1 Boulevard Haussmann, F-75009 Paris, France

The role of this investment manager is to provide support during changes of non-affiliated investment managers.

BNP PARIBAS ASSET MANAGEMENT UK Ltd., 5 Aldermanbury Square, London EC2V 7BP, United Kingdom

This investment manager is used for share class hedging.

### Non-Affiliated Investment Managers

AllianceBernstein L.P., 1345 Avenue of the Americas, New York, NY 10105, USA

Allianz Global Investors GmbH, Bockenheimer Landstrasse 42-44, 60323 Frankfurt-Am-Main, Germany

Amundi Ireland Limited, 1 George's Quay Plaza, George's Quay, Dublin 2, Ireland

BlackRock Investment Management UK Limited, 12 Throgmorton Avenue, London EC2N 2DL, United Kingdom

BlueBay Asset Management LLP, 77 Governor Street, London, W1K 3JR, United Kingdom

Harris Associates L.P., 111 South Wacker Drive, Suite 4600, Chicago, IL 60606, USA

---

\*Until 30 September 2022: BNP Paribas Securities Services, Luxembourg Branch

## Information

---

AMSelect (the “Company”) is an open-ended investment company (*Société d’Investissement à Capital Variable* - abbreviated to SICAV), incorporated under Luxembourg law on 27 May 2021 under the name of “AMSelect” for an indefinite period.

The Company is currently governed by the provisions of Part I of the Law of 17 December 2010, as amended, governing Undertakings for Collective Investment as well as by the European Council Directive 2009/65/EC (UCITS IV), as amended by the Directive 2014/91/EC (UCITS V).

The Articles of Association of the Company have been filed with the clerk of the Trade and Companies Registrar of Luxembourg, where any interested person may examine them or obtain a copy. They were published in the *Mémorial, Recueil Spécial des Sociétés et Associations* (the “Mémorial”) on 17 June 2021.

The Company is registered with the Luxembourg Trade Register under the number B 25 5860.

For each day of the week on which banks are open for business in Luxembourg (a “Valuation Day”), there is a corresponding NAV which is dated the same day.

As to Net Asset Values and Dividends, the Company publishes the legally required information in the Grand Duchy of Luxembourg and in all other countries where the shares are publicly offered.

This information is also available on the website [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

The Management Regulations, the Prospectus, the key investor information and the annual and interim reports may be consulted at the Company’s registered office and at the establishments responsible for the Company’s financial service and are available free of charge and on simple request from the representative in Switzerland. Copies of the Management Regulations and the annual and interim reports are available upon request.

The list of changes (purchases and sales of securities) affecting the composition of the securities portfolio during the year is made available to interested persons free of charge and on simple request from the representative in Switzerland.

Except for the newspaper publications required by Law, the official media to obtain any notice to shareholders will be our website [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

The documents and information are also available on the website: [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

## Manager's report

### Economic context

In the face of higher-than-expected inflation, which is predicted to remain so longer than initially anticipated, particularly as a result of increased prices for energy and agricultural products, the main theme of 2022 was the normalisation of monetary policies. Key rate rises accelerated in the second half of the year despite concerns about global growth. Just after the invasion of Ukraine, the price of a barrel of Brent reached USD 128 in March, the highest since mid-2008. It then experienced sharp variations between USD 100 and USD 120 due to signs of stalemate in the conflict on the one hand and fears about the world economy on the other. In the end, the latter prevailed: the price of oil suffered from the deteriorated growth prospects and remained on a downward trend until early autumn. In the last quarter, it fluctuated sharply, reaching a low for the year in early December (at USD 76 per barrel) before ending at nearly USD 86, a 10.5% increase in 12 months. The WTI barrel price followed a similar path and ended 2022 at USD 80 (+4.2%). The rise in key rates and the acceleration of inflation (from 7.2% in January to 10.7% in October for the OECD) led to strong tensions in government bond yields and a sharp reversal of interest rate curves in the United States. The change in the Chinese authorities' attitude to the health crisis is an important factor that was rightly welcomed by investors at the end of 2022, as the authorities seem to be more concerned about growth.

### United States

In 2022, GDP contracted in the first and second quarters (-1.6% and -0.6% respectively on an annualised basis) but domestic demand excluding inventories remained dynamic, as did the labour market, and growth in the third quarter was 3.2%. The "real-time" estimate of growth in the fourth quarter varied between 3% and 4% in November and December (GDPNow calculated by the Federal Reserve Bank of Atlanta). Job creation, less spectacular than in 2021 when it amounted to 6.7 million, was very dynamic throughout the year (more than 4 million from January to November). The fall in the unemployment rate from 4.0% in January to 3.6% in November led to strong wage increases, but announcements of massive lay-offs in certain sectors multiplied at the end of the year. Activity surveys deteriorated at the end of the period. In December, the Purchasing Managers' Index (PMI) stood at 45, just above the level observed in August, which was then the lowest since the pandemic, and the manufacturing sector was particularly hard hit. The economists' consensus estimates that the US economy is 70% likely to have a recession in the next twelve months, and Jerome Powell said he "didn't think anyone knew whether or not there would be a recession". The end of 2022 was also marked by inflation inflection: in November, consumer prices rose 7.1% year-on-year (after 7.7% in October) and core inflation (excluding food and energy) was 6.0% (after 6.3% in October and 6.6% in September, which should mark the high point of this cycle). However, the Fed has indicated that it still needs to be convinced that inflation is slowing down and has revised its inflation forecast upwards for 2023 and 2024.

### Europe

At the beginning of 2022, developments were mixed: activity surveys initially recovered before being affected by the geopolitical situation. Against this backdrop, GDP growth of 0.6% in the first quarter of 2022 is not what it seems as it masks the decline in domestic demand. In the second quarter, activity was supported by the recovery in tourism, which allowed GDP to grow by 0.8% (with a 1.0% increase in consumption). This favourable momentum has faded, but so far the eurozone economy has weathered the energy shock better than expected. Growth was 0.3% in the third quarter, with many predicting stagnation. However, activity surveys deteriorated sharply from July onwards: the PMI indices fell below 50, reflecting a slowdown in services and a contraction in the manufacturing sector, especially in Germany where export orders collapsed. The business climate measured by the IFO deteriorated sharply, hitting its lowest level since May 2020 in September. Confidence in the services sector collapsed, particularly in the hotel and restaurant sector. Faced with the risk of an energy shortage this winter, the degree of uncertainty about the German economy is now close to the high point reached at the time of the first lockdown and exceeds the threshold reached at the time of the invasion of Ukraine. Throughout the eurozone, and despite low unemployment (6.6%), consumer morale is at a historically low level. However, the very end of the year was characterised by a slowdown in the contraction of the eurozone economy. The average level of the PMI in the fourth quarter is still the largest quarterly drop in GDP since 2013 (excluding the pandemic). The inflection of the price increase is very modest: in November, total inflation stood at 10.1% year-on-year (after 10.6% in October) while core inflation (excluding food and energy) stood at 5.0% compared to 2.3% in January.

---

## Manager's report

---

### Japan

In March 2022, while activity surveys had experienced a further change due to the deterioration of the health situation, the end of the Omicron wave and the lifting of restrictions allowed the Purchasing Managers' Index for services to bounce back, though the economy remains fragile. Industrial production suffered from supply chain disruptions due to lockdowns in China. Domestic demand at the end of the year was supported in the short term by the recovery of tourism as the government announced the ending of entry restrictions (effective as of 11 October) that had been in place for more than two years. Companies are concerned about rising costs and the prospect of a recession in the global economy. Against this backdrop, changes in the Japanese GDP have remained erratic since the beginning of the year; a 4.9% (annualised) rise in GDP in the fourth quarter of 2021 was followed by a 1.8 drop, a 4.5% rebound and a modest decline (-0.8% in the third quarter). These variations have resulted in a growth rate of 1.0% for 2022, so that average growth in 2022 is expected to be more modest than in the United States and the eurozone (at 1.4% compared with the consensus of 1.9% and 3.2% respectively). The event of the year in Japan was the sharp acceleration of inflation, which in November returned to its highest level since the end of 1981 at 3.7% (index excluding fresh produce). At the same time, inflation excluding fresh produce and energy stands at 2.8%, which also corresponds to a high of almost 40 years but has not changed the analysis of the Bank of Japan ("BoJ"), which still considers this to be a temporary phenomenon (linked to energy and imported products), with service prices remaining moderate. However, price increases weigh heavily on household confidence, which, in November, returned to its lowest level since June 2020.

### Emerging markets

In China, health restrictions (including strict lockdowns) continued to be put in place as new infection cases were discovered, with the authorities wishing to maintain their zero-Covid strategy despite its effects on activity. GDP growth in the second quarter (+0.4% year-on-year after +4.8% in the first quarter) disappointed expectations that were already modest and reflected the deterioration of activity in all sectors (contraction in services, slowdown in industry and construction). Activity surveys continued to deteriorate, forcing the authorities to implicitly acknowledge that the growth target now seemed out of reach and to put in place supportive policies. In the third quarter, the GDP estimate showed a rebound in growth to 3.9% year-on-year. Even with a stronger rebound in the fourth quarter, average annual growth in 2022 would only reach 3.5%, well below the government's original target. This result and the very poor industrial production and, especially, consumption data in October and November may explain the crucial shift in the health policy at the end of 2022, with the implicit abandonment of the zero-Covid policy in favour of economic growth. Elsewhere in emerging areas, aggressive monetary tightening to fight inflation has finally yielded results. The end of 2022 was thus marked by a slowdown, or even a halt, as in Brazil, in the increases in key rates. Growth in emerging economies is expected to slow in 2023, reflecting significantly lower foreign demand, persistently high inflation and tighter financing conditions in 2022. Asia is expected to be more resilient as the acceleration of inflation has been better contained and the re-opening of the Chinese economy is likely to support activity throughout the region.

### Monetary policy

As early as January, the US Federal Reserve (the "Fed") began to communicate much more aggressively. It began to raise its key rates in March (by 25 bp) and quickly increased the pace (50 bp in May and then four consecutive 75 bp hikes). On 14 December, after a 50 bp increase, the target federal funds rate was raised to the 4.25%-4.50% range, a cumulative increase of 425 bp in 2022. Over the months, it has become clear that within its dual mandate, the Fed is focused on inflation and that the potential damage to growth and employment will not stop it. This message, though clear, does not seem to be well understood. The Fed, considering inflation to be "widespread and too high", is determined to bring it back to the 2% target and, to do so, will continue to raise its key rates in 2023 and keep them in restrictive territory for some time. For their part, investors believe that this brutal monetary tightening will provoke a recession and that the Fed will have to quickly resume cutting rates. This so-called "Fed pivot" assumption, reflected in futures markets, was sustained by the slowdown in the pace of rate rises in December and by the worsening of activity surveys. The difficulties in manufacturing have reinforced the belief of some observers that the Fed is likely to "do too much" in terms of rising key rates. The inflation inflection (from 6.6% in September to 6.0% in November year-on-year for the consumer price index excluding food and energy) also played a role in these expectations. The Fed repeats that inflation will remain at an "uncomfortably high" level for some time and that its decline "will likely require a sustained period of growth below potential growth". The Fed expects the unemployment rate to rise to 4.6% in 2023.

---

## Manager's report

The European Central Bank ("ECB") did not change its key rates until June 2022, but expectations of a rise appeared in early 2022. Normalisation started with a rise of 50 bp in July, while the ECB committed in June to an increase of 25 bp. The statement noted that "the Council considered that a larger first step towards interest rate normalisation than indicated at its previous meeting was appropriate". The presentation of the anti-fragmentation tool (known as the TPI or Transmission Protection Instrument) also played a role in the decision. This new tool can be activated to "fight against an unjustified, disorderly market dynamic that would seriously threaten the transmission of monetary policy within the eurozone". As early as August, the tone of comments became much stronger in the face of accelerating inflation and in September, the ECB proceeded with a historic increase of 75 bp which, by raising the deposit rate to 0.75%, ended the period of zero or negative rates. The ECB then indicated that it intended to continue the tightening cycle and, indeed, raised its three key rates twice in the fourth quarter, by 75 bp in October and by 50 bp in December. Following the Governing Council on 15 December, the interest rates on the main refinancing operations, the marginal lending facility and the deposit facility were raised to 2.50%, 2.75% and 2.00% respectively. After a cumulative rise of 250 bp in the second half of the year, the ECB's tone did not soften - quite the contrary. While inflation in the eurozone showed only a limited inflection at the end of the year (at 10.1% in November year-on-year compared to 10.6% in October and 5.0% at the end of 2021), Christine Lagarde did not hesitate to evoke "a 50 bp rate of increase for some time" and specified on several occasions that going from a 75 bp increase in October to 50 bp in December does not constitute "a pivot, we are not slowing down". In addition, the various measures announced by eurozone governments to limit the consequences of the energy crisis for the most vulnerable households and companies, in effect providing support for growth, are likely to encourage the ECB to tighten its monetary policy further. Despite the downside risks to growth, it is no longer a question of simply normalising monetary policy but of implementing restrictive measures, as the ECB believes that the moderate recession, which it anticipates for the next few months, will not be enough to bring inflation down and considers that it "has no choice".

### Foreign exchange markets

The Fed's very aggressive statements and decisions, along with fears about the health of the global economy, led to a widespread and rapid appreciation of the US dollar until September. The DXY dollar index (measured against a basket of the euro, yen, pound sterling, Canadian dollar, Swedish krona and Swiss franc) rose by 19% between the end of 2021 and 27 September, when it reached its highest level since May 2002. Part of the subsequent decline likely reflects questions among market participants about the appropriateness of an unqualified bullish dollar positioning against central banks that are likely to be upset by this additional source of volatility. In November, the dollar's decline became more pronounced and widespread due to the prospect of the Fed tightening its monetary policy and the renewed appetite for risky assets triggered by this assumption. Compared to the end of 2021, the DXY index finished up by 7.9%. The EUR/USD exchange rate (1.1374 at the end of 2021) fell below 1.00 on 22 August due to uncertainty about Russian gas supplies to the eurozone this winter and associated recession fears. Faced with concerns about growth, the hardened tone of ECB officials and the rise in key rates from July were not enough to sustain the European currency. Moreover, some operators consider that too rapid a tightening of the ECB's monetary policy could destabilise peripheral bond markets and thus further weaken the euro. The EUR/USD exchange rate dropped to 0.95 on 26 September, its lowest in more than 20 years, before recovering in the fourth quarter in a dollar movement that brought it above 1.07 in December, the highest since the beginning of June but down 5.9% in twelve months.

The USD/JPY exchange rate, which stood at 115.14 at the end of 2021, hovered around this level in January and February before rising sharply as the Bank of Japan ("BoJ") continued to analyse inflation as being driven by rising commodity prices. In the third quarter, the upward trend was more pronounced and Governor Kuroda did not hesitate to declare at the end of August that the BoJ had "no choice but to maintain its accommodative monetary policy until wages and prices rise in a stable and sustainable way". In September, the yen experienced a further weakening that triggered direct intervention in the foreign exchange market on the second. The effect was short-lived and the exchange rate stood at 152 on 21 October, the highest since July 1990. In November, like many financial assets, the yen experienced violent changes on the 10th following the publication of the consumer price index in the United States. Finally, in December, the dollar fell when, following its monetary policy meeting on the 20th, the BoJ announced the widening of the yield curve control interval. This decision surprised observers and sharply sent the yield of the 10-year JGB above 0.40% (compared to 0.255% at closing the day before). The BoJ had tried to curb this type of reaction by stating that it was a technical adjustment and not a change in monetary policy, which did not prevent the sharp return of the USD/JPY exchange rate to its lowest level since early August. It ended at 131.12, a 12.2% annual decline in the yen against the dollar.

---

## Manager's report

### Bond markets

The 10-year T-note yield (1.51% at the end of 2021) tracked an upward trend at the beginning of the year following the Fed's change of course to fight against increasingly high and diffuse inflation. A one-off easing occurred as a result of the invasion of Ukraine, but the Fed quickly confirmed its intention to normalise monetary policy, which led to a rapid rate hike. The 10-year T-note yield first rose above 3.00% in May, the highest since November 2018. Position adjustments were then made by investors who had taken a selling position for many months and were thus taking their profits, which led to a slight easing of rates without reversing the upward trend. The 10-year rate was close to 3.50% on 14 June, the highest in 10 years. Subsequently, concerns about growth became paramount. More and more observers began to speculate that the Fed's aggressive monetary policy could cause a recession. Despite inflation remaining very high and well above the 2% target, investors became convinced that the tightening cycle would be less abrupt than announced and followed by an easing from early 2023. Rates eased significantly until early August. The members of the Federal Open Market Committee ("FOMC") have fought against this so-called "Fed pivot" scenario, which could limit the desired effects of tightening their monetary policy. After several unambiguous statements, an upward trend was re-established on short and long rates, asserting itself in the second half of August and finally sending the 10-year rate to 4.25% in October. From then on, changes were driven by inflation figures and expectations of Fed decisions. The publication of consumer price indices played a crucial role throughout the fourth quarter. The 10-year T-note yield ended the period at 3.87%, an increase of 236 bp in twelve months. The rate curve reversed, with the 2-year rate rising from 0.73% to 4.43% (+370 bp) amid key rate rises and expectations of further tightening.

The German 10-year Bund yield (-0.18% at the end of 2021) quickly moved towards 0% in the wake of US long rates, with the ECB's unexpected change in tone on 3 February sending it to 0.30% in mid-February, the highest since the end of 2018. The invasion of Ukraine led to the usual flight to safety, this time accompanied by a drop in expectations of monetary policy tightening and buybacks of short positions. The German 10-year rate dropped below 0% in early March, but quickly resumed its upward trend when it became clear that the normalisation of monetary policy (raising key rates, halting asset purchases) remained, on the contrary, on the agenda. The 1.00% threshold, the highest since mid-2015, was approached at the end of April and then crossed in May, paving the way for a further rise in rates. Even though it remained chaotic, the ECB's tougher stance and the increases in its key rates from July onwards enabled the German 10-year rate to quickly clear all the symbolic thresholds (1.50% at the end of August, 1.75% and then 2.00% in September) to approach 2.50% in October, a level that had not been seen since 2011, when inflation exceeded 10% year-on-year. The short end of the yield curve reacted to the much more aggressive comments of many ECB Governing Council members. Over the weeks, it became clear that, like most of its counterparts in developed economies, the ECB would not hesitate to raise key rates to fight inflation, even if growth showed signs of weakness. The 10-year Bund yield ended at the highest level of the year at 2.57%, which corresponds to an increase of 275 bp in twelve months, while the 2-year rate rose from -0.62% to 2.76% (+338 bp). Against a backdrop of rising key rates and the end of the ECB's exceptional securities purchase programmes, the eurozone's peripheral markets had a turbulent year, which resulted in underperformance: the Italian 10-year rate rose by more than 350 bp to 4.72% and Spanish and Portuguese rates by around 310 bp to 3.66% and 3.59% respectively.

## Manager's report

### Equity markets

Since the beginning of the year, a geopolitical crisis has been added to the worsening health situation in Asia, which in turn has been affected by the Omicron wave. China reinstating lockdowns has been identified as a major risk to global growth. The nervousness of investors and economic agents and the soaring price of commodities that has fuelled inflationary pressures can therefore be explained by geopolitical tensions that existed even before the invasion of Ukraine on 24 February 2022.

The decline in global equities linked to geopolitical risk was partly corrected at first, but concerns eventually prevailed over the renewed hardened tone of the central banks, led by the US Federal reserve. Since the beginning of 2022, this hardened tone has also driven financial market movements and has quickly become dominant. Pressures on long-term interest rates caused by inflationary fears following the less accommodative stance taken by monetary policies have indeed penalised equities, particularly growth stocks. After weighing on the stock markets from January (regarding inflationary concerns), these pressures were practically put aside when the invasion of Ukraine stunned investors. They quickly returned to the forefront as central banks became increasingly aggressive. Global equities declined in January and February, saw a limited increase in March, sharply declined again in April, stabilised in May thanks to a market upturn in the last week of the month, before losing more than 10% in the first half of June. They were then able to take advantage of the easing of long-term rates and, while some participants likely benefited from cheap purchases, they were not able to withstand the deterioration of economic indicators and ended June down by 8.6% compared to the end of May. The MSCI AC World dollar index lost 20.9% in six months. Since the beginning of the second half of the year, stocks have fluctuated considerably, both up and down, as investors have anticipated that the Fed's monetary policy may experience a less restrictive turn in the coming months. Yet central bankers' discourse remained very aggressive and accompanied by stronger-than-expected increases in key rates as early as the summer. The "Fed pivot" scenario then evolved to become synonymous with a slowdown in the pace of key rate recovery. This assumption clearly supported equities in October and November, but from mid-December, investors had to pay more attention to central banks' statements that inflation is still too high and that monetary policy must become restrictive and should remain so in 2023.

Moreover, while business results remained encouraging, the consensus for a recession in 2023 strengthened at the end of the year with the deterioration of activity surveys and objective data, particularly in the United States. On the other hand, starting in November, the change of strategy in China in the face of the Covid pandemic has maintained hopes. The re-opening of the Chinese economy is synonymous with recovery in Asia and the normal functioning of global production chains. Faced with these contradictory factors, to which must be added the mini-financial storm of September caused by the announcement of the British mini-budget, equities ended the second half of the year practically at equilibrium (+1.4%) at the end of a rough course that reflects the confusion of investors. After three consecutive quarterly declines followed by a rebound in the fourth quarter, global equities lost 19.8% in 2022, their steepest decline since 2008, a year marked by the Global Financial Crisis and a drop of more than 40%. The American markets suffered from their often predominantly growth-oriented composition, such as the Nasdaq Composite index, down 33.1%. The S&P 500 index fell by 19.4%, the Eurostoxx 50 dropped 11.7%, and the Nikkei 225 index ended down 9.4% (local currency indices, dividends not reinvested). Sectoral performance was very disparate: The only significant increase was recorded by energy; the cyclical sectors (consumption, technology) fell sharply and defensive stocks, although declining, outperformed, as did financial stocks.

The Board of Directors

Luxembourg, 27 January 2023

## Audit report

To the Shareholders of  
**AMSELECT**

---

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of AMSELECT (the “Company”) and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### *What we have audited*

The Company’s financial statements comprise:

- the statement of net assets as at 31 December 2022;
  - the statement of operations and changes in net assets for the year then ended;
  - the securities portfolio as at 31 December 2022; and
  - the notes to the financial statements, which include a summary of significant accounting policies.
- 

### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

#### **Responsibilities of the Board of Directors of the Company for the financial statements**

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

#### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company;

- conclude on the appropriateness of the Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Company or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative

Luxembourg, 30 April 2023

Harris US Equity Value	16 December 2022	Activation of the share class "Classic EUR - Capitalisation"
Robeco Global Credit Income	16 December 2022	Activation of the share classes "Classic EUR - Capitalisation", "Classic RH EUR - Capitalisation", "Privilege EUR - Capitalisation" and "Privilege RH EUR - Capitalisation"
Vontobel Global Equity Emerging	16 December 2022	Activation of the share classes "Classic EUR - Capitalisation", "Classic RH EUR - Capitalisation", "Privilege EUR - Capitalisation" and "Privilege RH EUR - Capitalisation"

### Note 2 - Principal accounting methods

*a) Net asset value*

This annual report is prepared on the basis of the last unofficial technical net asset value calculated for financial statements purpose as at 31 December 2022.

*b) Presentation of the financial statements*

The Company's financial statements are presented in conformity with the legislation in force in Luxembourg on Undertakings for Collective Investment. The currency of the Company is the Euro (EUR).

The statement of operations and changes in net assets covers the financial year from 1 January 2022 to 31 December 2022.

## Notes to the financial statements at 31/12/2022

---

### c) *Valuation of the securities portfolio*

Transferable securities and money market instrument that are listed or traded on an official stock exchange or other regulated market are valued at the last known closing price available on the market where they are principally traded or, if that does not reflect current market realities, at fair value.

Fair value is routinely used for securities traded in Asian markets, in part because of time zone differences. Liquid assets, money market instruments and all other instruments may be valued at their nominal value plus accrued interest or according to the linear amortisation method, provided that it is a permissible market practice and that the Board approves the decision, records the reasons for it, and puts in place appropriate checks and controls.

Non-listed securities are valued at fair value.

Shares or units of UCITS or other UCIs are valued at the most recent NAV reported by the UCITS/UCI, or, if that does not reflect current market realities, at fair value.

Derivatives that are traded on regulated markets are valued at the settlement price most recently quoted for a derivative's primary market(s), adjusted if necessary to allow for settlement on a different day if current-day settlement is not possible.

All other derivatives that are not traded on regulated markets are valued at liquidation value, according to policies applied consistently for each given type of derivative.

### d) *Net realised result on the securities portfolio*

The net realised result on investment securities is calculated on the basis of the average cost of the securities sold.

### e) *Income on investments*

Dividends are recognized as income on the date they are declared and to the extent that the information in question on this subject can be obtained by the Company. Interests are recognized on a daily basis.

### f) *Valuation of futures contracts*

Unexpired futures contracts are valued at the last price known on the valuation date or closing date and the resulting unrealised gains or losses are accounted for.

Margin accounts to guarantee the liabilities on futures contracts are included in the "Cash at banks and time deposits" account in the statement of net assets.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

### g) *Valuation of forward foreign exchange contracts*

Forward foreign exchange contracts remaining open at the closing date are valued by reference to the forward foreign exchange rate corresponding to the remaining life of the contract. Any unrealised gains and losses are included when determining the result of the transactions.

To calculate the net positions per currency, the positions are converted at the forward exchange rates corresponding to the remaining life of the contract.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under "Net Unrealised gain on financial instruments" or "Net Unrealised loss on financial instruments". Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under "Net realised result on Financial instruments" and "Movement on net unrealised gain/(loss) on Financial instruments".

## Notes to the financial statements at 31/12/2022

### *h) Valuation of credit default swaps*

The value of a Credit Default Swap (CDS) shall be determined by comparing the value of the protection swap leg and the value of the premium swap leg. The value of the premium leg is obtained by discounting the future premium flows using the relevant risk-adjusted discount. The value of the protection leg is the present value of the expected loss inherent to the contract. Default probabilities used to compute the expected loss are derived from the structure of par market swap rates. Par market swap rates will be obtained from a cross-section of market counterparties.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under “Net Unrealised gain on financial instruments” or “Net Unrealised loss on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

### *i) Valuation of interest rate swaps*

Interest rate swaps (IRS) are valued on the basis of the difference between the value of all future interest payable by the Company to its counterparty on the valuation date at the zero coupon swap rate corresponding to the maturity of these payments and the value of all future interest payable by the counterparty to the Company on the valuation date at the zero coupon swap rate corresponding to the maturity of these payments.

The unrealised appreciation/(depreciation) is disclosed in the Statement of net assets under “Net Unrealised gain on financial instruments” or “Net Unrealised loss on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

### *j) Conversion of foreign currencies*

The cost of investments denominated in currencies other than the sub-fund accounting currency is converted into that currency at the exchange rate prevailing at the purchase date.

Income and expenses in currencies other than the sub-fund accounting currency are converted into that currency at the exchange rate at the transaction date.

At the end of the period, the assets and liabilities denominated in currencies other than the Company accounting currency are converted into that currency at the exchange rates prevailing at that date. The resulting realised and unrealised foreign exchange gains or losses are included in the statement of operations and changes in net assets.

## **Note 3 - Management fees (maximum per annum)**

Management fees are calculated and deducted monthly from the average net assets of a sub-fund, share category, or share class, are paid to the Management Company and serve to cover remuneration of the asset managers and also distributors in connection with the marketing of the Company’s stock.

The fee applied to the “Classic” class is also applicable to all other categories of shares with the word “Classic” in their denomination.

The fee applied to the “I” class is also applicable to all other categories of shares with the word “I” in their denomination.

The fee applied to the “Privilege” class is also applicable to all other categories of shares with the word “Privilege” in their denomination.

The fee applied to the “X” class is also applicable to all other categories of shares with the word “X” in their denomination.

Sub-fund	Classic	I	Privilege	X
AB US Equity Growth	1.50%	0.75%	0.75%	0.50%
Allianz Euro Credit (launched on 1 February 2022)	0.90%	0.40%	0.45%	0.30%

Sycomore Euro Equity Growth	1.50%	0.75%	0.75%	0.50%
Vontobel Global Equity Emerging	1.75%	0.85%	0.90%	0.50%

### Note 4 - Other fees

These are fees and expenses to cover various services and regulatory requirements such as:

- administration, domiciliary and fund accounting
- custody, depositary and safekeeping
- transfer, registrar and payment agency
- audit
- compliance documentation including the preparation, translation and distribution of the prospectus, key information documents and financial reports
- ESG certification and service fees
- financial index licensing (when applicable)
- legal expenses
- listing of shares on a stock exchange (when applicable)
- management company expenses (including AML/CFT, KYC, Risk and oversight of delegated activities)
- marketing operations and publications of fund performance data
- registration expenses including translation, services associated with the required collection, tax and regulatory reporting, and publication of data about the SICAV and its investments and shareholders

Not included are fees paid to independent directors and reasonable out-of-pocket expenses paid to all directors, expenses for operating hedged shares, duties, taxes and transaction costs associated with buying and selling assets, brokerage and other transactions fees, interest and bank fees. All of these fees and expenses are deducted directly from funds' assets and are factored into stated performance figures. These fees are calculated on each business day and paid on a monthly basis.

### Note 5 - Taxes

The Company is subject in Luxembourg to an annual subscription tax ("taxe d'abonnement") representing 0.05% of the value of the net assets. This rate is reduced to 0.01% for the following:

- a) sub-funds having the exclusive objective of collective investment in money market investments and deposits with credit institutions;
- b) sub-funds having the exclusive objective of collective investment with credit institutions;
- c) sub-funds, categories and/or classes reserved for Institutional Investors, Managers and UCIs.

The following are exempt from this "taxe d'abonnement":

- a) the value of assets represented by units or shares in other UCIs, provided that these units or shares have already been subject to the "taxe d'abonnement";

## Notes to the financial statements at 31/12/2022

b) sub-funds, categories and/or classes:

- (i) whose securities are reserved to Institutional Investors, Managers or UCIs and
- (ii) whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and
- (iii) whose weighted residual portfolio maturity does not exceed 90 days, and
- (iv) that have obtained the highest possible rating from a recognised rating agency;

c) sub-funds, categories and/or classes reserved to:

- (i) institutions for occupational retirement pension or similar investment vehicles, set up at the initiative of one or more employers for the benefit of their employees, and
- (ii) companies having one or more employers investing funds to provide pension benefits to their employees;

d) sub-funds whose main objective is investment in microfinance institutions;

e) sub-funds, categories and/or classes:

- (i) whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly that is recognized and open to the public, and
- (ii) whose exclusive object is to replicate the performance of one or several indices.

When due, the “*taxe d’abonnement*” is payable quarterly on the basis of the relevant net assets, and is calculated at the end of the quarter for which it is applicable.

In addition, the Company may be subject to foreign UCI’s tax, and/or other regulators levy, in the country where the sub-fund is registered for distribution.

### Note 6 - Share currencies

The net asset value per share is priced in the currency of the share class and not in the currency of the sub-fund in the section “Key figures relating to the last 3 years”.

### Note 7 - Exchange rates

The exchange rate used for combination and for the conversion of share classes denominated in a currency other than the reference currency of the relevant sub-fund as at 31 December 2022 was the following:

EUR 1 = USD 1.06725

### Note 8 - Futures contracts

### **Note 10 - Swaps**

#### **Credit Default Swaps**

The Company has entered into credit default swaps agreements whereby it exchanges fixed income for income linked to changes in credit events, whether with respect to an index or a bond (see details in the tables below), and vice versa. These amounts are calculated and recognised at each calculation of the Net Asset Value; the amount of the unrealised capital gain is stated under “Net Unrealised gain on financial instruments” in the Statement of net assets, and the amount of net unrealised capital loss is given under “Net Unrealised loss on financial instruments” in the Statement of net assets.

#### ***BlueBay Euro Bond Aggregate***

Nominal	Currency	Maturity	Sub-fund paid	Sub-fund received
8 500 000	EUR	20/12/2027	ITRX EUR CDSI S38 5Y Corp 20/12/2027	1.000%
<b>Net unrealised gain (in EUR)</b>				<b>37 706</b>

#### **Interest Rate Swaps**

The Company has entered into interest rate swaps agreements whereby it exchanges fixed income (sum of the notional amount and the fixed rate) for variable income (sum of the notional amount and the floating rate) and vice versa. These amounts are calculated and recognised at each calculation of the Net Asset Value; the receivable amount is stated under “Other assets” in the Statement of net assets, while the payable amount is given under “Other liabilities” in the Statement of net assets.

#### ***BlueBay Euro Bond Aggregate***

---

**Counterparties to Swaps contracts:**

Goldman Sachs International London, United Kingdom  
 Citigroup Global Market, United States  
 BNP Paribas Paris, France

**Note 11 - Changes in the composition of the securities portfolio**

The list of changes in the composition of the securities portfolio during the year is available free of charge at the Management Company's registered office and from local agents.

**Note 12 - Global overview of collateral**

As at 31 December 2022, the Company pledged the following collaterals in favour of forward exchange contracts traded and swap agreement counterparties:

<b>Sub-fund</b>	<b>Currency</b>	<b>OTC collateral</b>	<b>Type of collateral</b>
BlueBay Euro Bond Aggregate	EUR	861 204	Cash

As at 31 December 2022, the counterparties to financial instruments pledged the following collateral in favour of the Company:

<b>Sub-fund</b>	<b>Currency</b>	<b>OTC collateral</b>	<b>Type of collateral</b>
BlueBay Euro Bond Aggregate	EUR	230 000	Cash

**Note 13 - Transaction fees**

Transaction fees incurred by the Company relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of standard fees, sundry fees on transaction, stamp fees, brokerage fees, custody fees, VAT fees, stock exchange fees and RTO fees (Reception and Transmission of Orders).

In line with bond market practice, a bid-offer spread is applied when buying and selling these securities. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's fee.

### Note 15 - Related party transactions

The related parties may, in their capacity as portfolio managers, also conduct transactions or invest in currencies or other financial products for the account of each sub-fund for which the related parties act as broker or for their own account or as counterparty for their clients, including in the case in which the related parties or their clients have the option of conducting transactions for their own account at the same time as for the account of each sub-fund.

When handling purchases and sales of securities for each sub-fund, the related parties may also have acted as counterparty at the best market conditions.

The Company considers that the commissions, increases and reductions invoiced by the related parties are competitive, although it is in the related parties' interests to receive favorable commission rates, for each sub-fund.

---

### **Note 16 - Significant event**

Since 24 February 2022, the Board of Directors has been very attentive to the consequences of the conflict between Russia and Ukraine and its impact on the energy shortage and food supplies in Europe. The Board of Directors closely monitors developments in terms of global outlook, market and financial risks in order to take all necessary measures in the interest of shareholders.

### **Note 17 - SFDR Statement**

The SFDR disclosure related to Art 8 and/or Art 9 is available free of charge in the Company's official annual report.

## Unaudited appendix

### Global market risk exposure

The Management Company of the Fund, after a risk profile assessment, decides between the commitment approach and the VaR (99%, 1 Month) to determine the global market risk exposure.

The VaR limit use (minimum, maximum and average) is calculated by dividing the Daily VaR by the daily VaR limit (20% for absolute return VaR sub-funds and 2 times benchmark VaR for relative VaR sub-funds).

The global market risk exposure information for the year ending 31 December 2022, is as follows:

Sub-fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit	Lowest utilisation of VaR limit	Highest utilisation of VaR limit	Average utilisation of VaR limit	Average level of leverage reached during the year
Bluebay Euro Bond Aggregate	Relative VaR	Historical VaR	Bloomberg Euro Aggregate Bond	2 times Benchmark VaR	42.95%	74.25%	54.00%	257.55%

The sub-funds not disclosed in the table here above use the commitment approach in order to measure and monitor the global exposure.

### Information according to regulation on transparency of securities financing transactions

The Company is not affected by SFTR instruments during the financial year ending 31 December 2022.

### Eligibility for the “Plan Epargne en Actions” (PEA)

Owing to their eligibility for French share savings schemes (PEA), the sub-funds of the Company listed below permanently invest at least 75% of their net assets in shares and rights that are eligible for the PEA and are issued by companies established in France, another Member State of the European Union or in Iceland or Norway and which are subject to corporation tax or an equivalent regime.

- BlackRock Euro Equity
- HSBC Euro Equity Value
- Sycomore Euro Equity Growth

## Unaudited appendix

### Information on the Remuneration Policy in effect within the Management Company

Below are the quantitative information on remuneration, as required by Article 22 of the AIFM directive (Directive 2011/ 61 / EC of 8 June 2011) and by Article 69 (3) of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format compliant with the recommendations of the AFG (French Asset Management Association)<sup>1</sup>.

#### Aggregate quantitative information for members of staff of BNP PARIBAS ASSET MANAGEMENT Luxembourg (“BNPP AM Luxembourg”) (art 22-2-e of AIFM directive and art 69-3 (a) of the UCITS V directive):

Business area	Number of staff	Total Remuneration (K EUR) (fixed + variable)	of which total variable remuneration (K EUR)
All staff of BNPP AM Luxembourg	78	8 248	1 098

#### Aggregate quantitative information for members of staff whose actions have a material impact on the risk profile of the firm and who are indeed “Identified Staff”<sup>2</sup> (art 22-2-f of AIFM directive and art 69-3 (b) of the UCITS V directive):

Business sector	Number of employees	Total remuneration (EUR thousand)
Identified Staff of BNPP AM Luxembourg	3	752
<i>Of which AIF/ UCITS and European mandates Portfolio managers</i>	0	0

#### Other information about BNPP AM Luxembourg:

##### ➤ Information on AIF and UCITS under management

	Number of sub-funds (31/12/2022)	Assets under management (billions of euro) on 31/12/2022 <sup>3</sup>
UCITS Alternative Investment Funds	192 23	118 3

- Under the supervision of the Remuneration Committee of BNP Paribas Asset Management Holding and its Board of Directors, a centralised independent audit of the global remuneration policy of BNP Paribas Asset Management along with its implementation during the 2021 financial year was carried out between June and September 2022. As a result of this audit, which covered the entities of BNP Paribas Asset Management holding an AIFM and/or UCITS licence, a score of “Satisfactory” was awarded (the highest of four possible scores), thus endorsing the solidity of the system in place, particularly in its key stages: identification of regulated staff members, consistency of the relation between performance and remuneration, application of mandatory deferred remuneration rules, implementation of indexation and deferred remuneration mechanisms. A recommendation – not presented as a warning – was issued in 2022, , the documentation and controls of the selection of the baskets of index for the members of the management teams who do not directly manage the portfolios themselves needed to be improved in certain cases.
- Further information concerning the calculation of variable remuneration and on these deferred remuneration instruments is provided in the description of the Remuneration Policy published on the Company's website.

<sup>1</sup> NB: the figures for remuneration provided below cannot be directly reconciled with the accounting data for the year as they reflect the amounts awarded based on staff numbers at the close of the annual variable remuneration campaign in May 2022. Thus, these amounts include for example all variable remuneration awarded during this campaign, whether deferred or not, and irrespective of whether or not the employees ultimately remained with the Company.

<sup>2</sup> The list of regulated staff members is drawn up on the basis of the review carried out at the end of the year.

<sup>3</sup> The amounts thus reported take into account master-feeder funds.

### Total Expense Ratios

The Total Expense Ratio (TER) is the sum of Management Fees and Other Fees for the period, as a proportion of the average net assets of the unit class. Management Fees are calculated on the basis of the average net assets of the previous month for each unit class.

Other Fees include all other fees (auditor's fees, cost of net asset value publication, "taxe d'abonnement" (subscription tax), etc.) and commissions (depositary, administrative agent, etc.) with the exception of fees and commissions linked to transactions.

In the specific case of sub-funds and unit classes launched during year, the TER has been calculated on the basis of Management Fees and Other Fees recognised since launch and extrapolated over a 12-month period.

For the year from 1 January 2022 to 31 December 2022, the TER is :

<b>Sub-funds</b>	<b>Share classes</b>	<b>TER</b>
AB US Equity Growth	Share "Classic - Capitalisation"	1.64%
	Share "Classic - Distribution"	1.65%
	Share "Classic EUR - Capitalisation"	1.65%
