Nominal corresponds to the underlying exposure.

The sale of protection through Credit Default Swaps allows the SICAV to receive a premium as the SICAV is exposed to the risk of default by an issuer. A payment default by the issuer may be offset by settlement either in cash or in kind. In the case of settlement in cash, the buyer of a Credit Default Swap for hedging purposes receives from the seller a sum equivalent to the difference between the face value and the redemption amount which is still recoverable. In the case of settlement in kind, the buyer of a Credit Default Swap for hedging purposes receives from the seller the entire face value, in exchange for which he hands over the defaulted security to the seller; alternatively the buyer and seller exchange securities selected from a basket whose composition is decided in detail when the Credit Default Swap contract is signed. Events of default are set out in the Credit Default Swap contract, as are the arrangements for the delivery of bonds and debt securities. The SICAV may, if necessary, re-sell the Credit Default Swap acquired for hedging purposes, or reproduce the credit risk by buying call options.

### 1 - General information

UBAM (hereinafter the "SICAV") is a variable capital investment company incorporated in Luxembourg on 6th December 1990 in accordance with the legislation of the Grand Duchy of Luxembourg, subject to Part I of the law of 17th December 2010 relating to undertakings for collective investment (the "2010 Law"), as amended.

The objective of the SICAV is to offer its shareholders the possibility to invest in an investment vehicle oriented towards the growth of capital invested in various transferable securities.

The SICAV offers investors a choice between various sub-funds, each having different investment objectives. Each sub-fund constitutes a distinct set of assets, represented by different classes of shares. The SICAV thus constitutes a company with multiple sub-funds.

The Board of Directors may at any time and in conformity with the articles of incorporation, issue classes of shares falling within other sub-funds, whose investment aims differ from those of already existing sub-funds.

At period end, the following sub-funds are active:

### 2 - Principal accounting policies

#### 2.1 - Presentation of the financial statements

The financial statements of the SICAV are prepared in accordance with the Luxembourg regulations relating to undertakings for collective investment and generally accepted accounting principles.

#### 2.2 - Portfolio valuation

The valuation of any security traded or listed on a stock exchange is based on the last known price unless such price is not representative.

Regarding the valuation of money market instruments and other debt securities with a residual duration of less than 12 months, the valuation will be based on the nominal value plus any capitalised interest or based on the amortisation costs. The valuation thus calculated may differ from the actual market price. In case of significant variations in market conditions, the basis for evaluating the different investments is adjusted based on the new market returns.

The valuation of any security traded on another regulated market is based on the last available price.

When securities held in the portfolio are not traded or listed on a stock exchange or another regulated market, or when the price determined in respect of securities listed or traded on a stock exchange or another regulated market is not representative of the actual value of those securities, such securities are valued based on the likely realisable value, which must be estimated with caution and in good faith by the Board of Directors.

The net unrealised appreciation or depreciation is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciations or depreciations are disclosed in the statement of operations and changes in net assets.

Shares/Units in underlying open-ended investment funds are valued based on the net asset value available on the business day preceding the valuation date, provided said net asset value is dated on prior to the valuation date, after deducting any fees applicable.

#### 2.3 - Net realised profits or losses on sales of investments

The net realised profits/(losses) on sales of investment securities are determined on the basis of the average cost of the securities sold and are recorded in the statement of operations and other changes in net assets.

#### 2.4 - Foreign currency translation

Bank balances, other net assets and liabilities and the valuation price of the securities portfolio expressed in currencies other than the currency of the sub-fund are converted into this currency at the exchange rate prevailing at the closing date. Income and charges expressed in currencies other than the currency of the sub-fund are converted into this currency at the exchange rate prevailing on the date of the transaction.

Exchange gains and losses are recorded in the statement of operations and changes in net assets.

In each sub-fund, the cost of acquiring securities denominated in another currency than the currency of the sub-fund is converted into this currency at the exchange rate on the date of purchase.

## Other notes to the financial statements

### 2 - Principal accounting policies

#### 2.6 - Valuation of options

Premiums received on the sale of options are recognised as liabilities and premiums paid on the purchase of options are carried as assets. Option contracts outstanding at the closing date are valued at the last known price on the stock exchanges or regulated markets for that purpose.

OTC options are marked to market based upon prices obtained from third party pricing agents.

#### 2.7 - Valuation of forward foreign exchange contracts

Forward foreign exchange contracts that have not matured on the valuation date are valued on the basis of the forward rates applicable on that date. Resulting unrealised profit or loss is disclosed in the statement of net assets. Realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and changes in net assets.

For the details of outstanding forward foreign exchange contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.8 - Valuation of financial futures

Futures are posted off-balance sheet and valued at their last known price on the stock exchanges or regulated markets for that purpose. The unrealised profit or loss is disclosed in the statement of net assets. Realised profits or losses and changes in unrealised profits or losses are disclosed in the statement of operations and other changes in net assets.

For the details of outstanding futures contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.9 - Valuation of swaps

Swap contracts are posted off-balance sheet and their values are determined each day on a reliable basis and verified by a competent professional appointed by the SICAV (the calculation is done through the system Kondor, fed by the data coming from the independent provider "ICAP"), in line with market practices. The unrealised profit or loss is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and other changes in net assets. Valuation of CDS (Credit Default Swaps) contracts is essentially depending on the issuer's credit risk, this being defined via a spread listed in basis points.

The interests to be received and to be paid on swap contracts are accrued for each net asset value calculation according to their rate, the coupon payments frequency and the maturity date of the contracts.

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on notional amount that serves as a computation basis which is usually not exchanged. Interest rate swaps are marked to market at each net asset value calculation date. The unrealised gain or loss is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and other changes in net assets.

For the details of swaps, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.10 - Dividend and interest income

Dividends are accounted at the ex-date. Interests are accounted on a prorata temporis basis and include amortization on zero coupon bonds.

#### 2.11 - Interest paid

The caption "Interests paid on bank overdraft" includes negative interest charged on positive cash balances.

## Other notes to the financial statements

### 2 - Principal accounting policies

#### 2.12 - Formation expenses

Expenses in connection with the incorporation of the SICAV are amortised on a straight line basis over five years.

#### 2.13 - Transaction fees

The transaction fees, i.e. fees charged by the brokers for securities transactions and similar transactions, are recorded separately in the statement of operations and other changes in net assets under the caption "Transaction fees".

#### 2.14 - Receivable / payable on treasury transactions

The caption "Receivable on treasury transactions" comprises time deposits matured and foreign exchange transactions not yet recorded under the caption "Cash at banks".

The caption "Payable on treasury transactions" comprises new time deposits, maturities of borrowings and foreign exchange transactions not yet recorded under the caption "Cash at banks".

For a sub-fund having "Receivable on treasury transactions" and "Payable on treasury transactions" at the closing date, only the net amount is disclosed in the statement of net assets.

No management fee is levied for Type Z shares.

When a sub-fund invests in shares of UCITS and/or other UCIs managed directly or indirectly by the SICAV or by a company with which it is affiliated through common management or control or by a direct or indirect stakeholding of more than 10% of the capital or voting rights, there will not be any duplication of management fees for the sub-fund and the UCITS or other UCIs concerned.

### 4 - Performance fees

The fee is equivalent to a percentage of the highest net return of the sub-fund and, respectively, of the class with respect to a reference index or a fixed rate of return. If this difference is negative or equal to zero, no performance fee will be paid by the sub-fund.

The performance fee is payable annually in arrears at the end of each 12-month year (financial year), and is equivalent to a percentage of the net asset value earnings, when this is greater than the reference net asset value, the minimum return-rate, or the high-water mark of the benchmark index. The performance fee is calculated on the basis of the net asset value after all charges and management fees (but not the performance fee) have been deducted, and is modified to take into account subscriptions and redemptions. For Sub-Funds which were launched in the course of the financial year, the performance fee can only be crystallised at the end of the financial year, but not before at least 12 months after the launch. The High Water Mark must be reset every 5 years.

### 9 - Swing pricing

The sub-funds may suffer a reduction in value of the net asset value per share due to transaction costs incurred in the purchase and sale of their underlying investments and/or the spread between the buying and selling prices of such investments when underlying investments trades are undertaken by the Investment Managers to accommodate subscriptions, redemptions and/or switches in and out of the sub-fund.

In order to counter this and to protect shareholders' interests, the Management Company adopted a Swing Pricing Mechanism. The Swing Pricing Mechanism means that in certain circumstances, the Management Company will make adjustments in the calculation of the net asset value per share. The net asset value per share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively. The extent of the adjustments will be set by the Management Company to reflect the above mentioned transactions costs and/or spread when these are deemed to be significant. The maximum adjustment will not exceed 2% of the original net asset value per share.

The Swing Pricing Mechanism may be applied across all Bond sub-funds with the exception of UBAM - DYNAMIC EURO BOND, UBAM - DYNAMIC US DOLLAR BOND, UBAM - EURO BOND, UBAM - EURO CORPORATE IG SOLUTION, UBAM - EURO HIGH YIELD SOLUTION, UBAM - GLOBAL HIGH YIELD SOLUTION, UBAM - GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION, UBAM - US DOLLAR BOND and UBAM - US HIGH YIELD SOLUTION and will be applied in an equitable manner to all shareholders of a same sub-fund on the same net asset value calculation date.

No Swing Pricing Mechanism will be applied for Convertible bond sub-funds and Equity sub-funds, Asset Allocation sub-funds, Fund of funds sub-funds and other sub-funds.

During the period, swing pricing has been applied in some net asset value calculations for the below sub-funds:

- UBAM - ABSOLUTE RETURN FIXED INCOME

#### Total expense ratio ("TER")

The Total expense ratio ("TER") is calculated for the last 12 months preceding the closing date.

For Switzerland, the composite (synthetic) TER is calculated according to the AMAS guideline and is based on the TER of the target funds.

Transaction fees are not taken into account in the calculation of the TER.

If a performance-related fee is foreseen and has been calculated, the TER is disclosed including this fee. Moreover the performance fee ratio is calculated in percentage of the average net assets for the last 12 months preceding indicated reference date.
