What is this product?

Type

The product is a share class of the sub-fund Martin Currie UK Equity Income Fund (the "Fund") which is part of Franklin Templeton Investment Funds, an open-ended investment company with variable capital (SICAV), qualifying as a UCITS.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The Fund aims to generate an income that is higher than that of the FTSE All-Share Index, together with investment growth over a three to five-year period after all fees and costs are deducted. There is no guarantee that the Fund will achieve its return objective.

Investment Policy

The Fund invests mainly in equity securities of large-cap companies incorporated, domiciled or having their principal business activities in the UK. The Fund typically invests in companies that are constituents of the FTSE All Share Index but the investment manager has broad discretion to deviate, even significantly, from the FTSE All Share Index's securities and weightings.

The Fund can invest to a lesser extent in:

- debt securities issued by governments, government-related entities, supranational entities and corporations
- units of other mutual funds (limited to 10% of assets)
- derivatives for hedging and efficient portfolio management

The Fund is actively managed and seeks to invest in companies across a wide range of sectors.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

The benchmark of the Fund is the FTSE All-Share Index. The benchmark has been selected because the objective of the Fund is to generate an income in excess of the benchmark. Though many of the Fund's equity securities are likely to be represented in the benchmark, the Investment Manager has broad discretion to deviate, even significantly, from its composition and weightings.

Share Class Policy

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

Processing of subscription and redemption orders

You may request the sale of your shares on any Dealing Day (as defined in the current prospectus of the Fund).

Intended retail Investor

The Fund may appeal to investors looking to income and capital appreciation by obtaining exposure to equity securities of companies located or having their principal business activities in the United Kingdom and willing to hold their investment over the medium to long term for a minimum period of 3 to 5 years. The Fund is suitable for investors who have a basic knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

	If you exit after 1 year	If you exit after 5 years
Total costs	761 GBP	1,748 GBP

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 1.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
